# ENCYCLOPÆDIA

OF

# MISSIONS

---

**Mabang**, a town of Sierra Leone, West Africa, east of Freetown. Station of the Wesleyan Methodist Missionary Society (England), with 1 native missionary, 6 local preachers, 85 church-members, 30 day-scholars.

**Maboulela** (Mabolela), a town in Orange Free State, South Africa, north of Berea, and almost due east of Bloemfontein. Mission station of Paris Evangelical Society (1859); 1 missionary, 5 evangelists, 372 communicants, 151 scholars.

**Macarthy's Island**, an island in the mouth of the Gambia, Senegambia, West Africa. The Wesleyans founded a station here in 1832, but so many white missionaries died on account of the climate, that in 1848 it had to be left to the charge of native preachers from Sierra Leone. They have 86 church-members, a congregation of 300, and the Gospel of Matthew has been translated into Wolof. English, however, is generally understood.

**Macao**, a colony of Portugal, on the south-east extremity of Hiung-shang Island, Canton province, China, 60 or 70 miles southeast of Canton. This place was formerly the shipping station for the coolies sent to South America. It is noted now principally for its healthfulness, and for the gambling which is there carried on. A station of the Presbyterian Board (North), with 1 missionary and wife, from which out-stations in the Canton province are worked. The work is mainly among the districts from whence emigrants go to the United States and other countries.

**Macassar Version**.—The Macassar belongs to the Malaysian languages, and is spoken in the island of Celebes. A version of the Gospel of Mark, which Dr. Leyden had prepared with the help of some learned scholars, was never printed. In 1840 Dr. B. F. Matthess of the mission house at Rotterdam was sent to Celebes, and after having studied the language, he translated parts of the New Testament, which were published by the Netherlands Bible Society between 1863 and 1874. The first part of the New Testament was published at Macassar and

Amsterdam in 1875, and the second in 1888 by the above Bible Society.

**Macedonia**, a section of European Turkey, bounded on the north by Bulgaria, on the south by Greece, on the west by Albania, while on the east there are no definite boundaries to separate it from the rest of European Turkey. It is in the main coincident with the old kingdom of Macedonia. The chief cities are Salonica (Thessalonica), Uscup, and Monastir. The population is chiefly Bulgarian and Greek, though there are large numbers of Albanians. Mission work is carried on by the A. B. C. F. M., with a station at Monastir; and the Presbyterian Board (South), with a station at Salonica. A missionary of the Committee of the Free Church of Scotland for the Conversion of the Jews resides at Salonica. (See Turkey, and Bulgarian Mission of the A. B. C. F. M.)

**Macedonian-Rouman Version**.—The Rouman or Roumanian belongs to the Græco-Latin branch of the Asian family of languages, and is divided into two dialects: the one is the standard Rouman, and is vernacular in Roumania and part of Transylvania; the other is the Macedonian dialect, and is spoken by the Roumans or Vlachs, as they are called, of Macedonia, Albania, and Thessaly. All former efforts made in behalf of the British and Foreign Bible Society to procure a translation into this dialect having failed, the Society at last succeeded in procuring the services of Lazar Demetrius, a teacher in the Roumanian Academy at Monastir, who translated the Gospel of St. Matthew into this dialect, which after a careful revision was printed under the direction of Mr. Kyrias, a good Rouman scholar, at Bucharest in 1889. The edition consists of 5,000 copies.

**Maccio**, a city of Brazil, South America, on the coast in the province of Alagoas. Its harbor is protected from the ocean by a reef of rocks. Population, 10,000. Mission station Southern Baptist Connection; 1 native pastor.

**Macfarlan**, a town in East Kaffraria, South Africa, northwest of King William's Town. Mission station of the Free Church of Scotland;

1 missionary, 1 church, 326 communicants, 6 out-stations, 4 schools, 218 scholars.

**Mackay, Alexander M.**, b. Rhynie, Aberdeenshire, Scotland, October 13th, 1849; was a son of a minister of the Free Church. At three years of age he read the New Testament; at seven, Milton's "Paradise Lost," Gibbon's "Decline and Fall of the Roman Empire," and Robertson's "History of the Discovery of America." His father taught him geography, astronomy, and geometry; stopping in their walks to demonstrate a proposition of Euclid, or illustrate the motions of the heavenly bodies, or trace the course of a newly-discovered river of the Dark Continent with his cane in the sand. He listened with interest to letters and conversations of men of science, as Hugh Miller, Sir Roderick Murchison, and others, who were sometimes visitors at the manse, sometimes in correspondence with his father. At eleven he for a time discarded books, and gave himself to the study of engines, gas-making, carpentry, blacksmithing, saddlery, etc. At thirteen he again began to devour books, and made great progress in the classics and mathematics, but for recreation watched the processes of photography and ship-building. At sixteen his mother's death, and her dying request that he would "search" the Scriptures, deeply impressed him. At eighteen he entered the training-college for teachers, and was distinguished in many departments of study. He afterwards studied for three years, at Edinburgh University, applied mechanics, engineering, higher mathematics, physics, to which he added one year of surveying and fortification. At twenty-four he went to Germany to acquire the language, and thus have access to the stores of lore in that land. He soon secured a position in a large engineering establishment in Berlin as *constructeur* or draughtsman. Here he was a missionary among the ungodly workmen in the institution, and was preparing in heart and purpose to go as an engineering missionary to carry the gospel with civilization to some dark corner of the heathen world. At twenty-six, in 1875, in response to an appeal from the Church Missionary Society for a practical business man to go to Mombasa, he offered himself, but another person had been secured. Later in the year an offer of a highly lucrative secular position was made him; but he declined it, that he might be ready, when the Lord should permit him, to go to the heathen. Early the next year he was accepted by the Church Missionary Society; embarked April 25th, 1876, for Victoria Nyanza, reaching Zanzibar May 29th. In November, on the march through Ugogo, he was taken very ill, and was sent back by Dr. Smith, but recovered before reaching the coast. Instructed by the secretary not to return before the close of the rainy season, he constructed 230 miles of road to Mpwapwa. In November, 1878, he reached Uganda. Alluding to the kind treatment he had received from the natives, he says: "Wherever I find myself in Stanley's track, I find his treatment of the natives has invariably been such as to win from them the highest respect for the face of a white man." Mr. Mackay had acquired a knowledge of the Swahili language, and was able immediately to print portions of the Scriptures, and to read and explain them to the king and his people. Mtesa showed much interest in the truth. Children

were much drawn to Mr. Mackay, and constantly surrounded him. Many were learning to read the Bible, and the Sabbath began to be partially observed at Court. Soon Roman Catholic teachers came, and bitterly opposed his teaching. Mohammedans also began to withstand him. He labored daily at the printing-press, having to cut his own types, and also repaired tools, and did other work for the natives, thereby supplying his own wants. He expressed regret that so much of his time was thus taken from religious teaching, but hoped his example would be useful, as labor was so much despised by the heathen. November 1st, 1879, he wrote: "Hosts of people come every day for instruction, chiefly in reading." Again he mentions having men read to him while he works at the lathe or forge. His journal shows intense zeal and incessant labor in making known the gospel with prayer and faith. In 1882 five converts were baptized, and in 1884 the native church consisted of 86 members, including two daughters and a grand-daughter of the king. But in that year Mtesa died, and was succeeded by his young son Mwanga, who proved to be weak and vacillating, and a tool in the hands of his crafty courtiers. Political events in Africa stimulated suspicion of foreigners, and he soon began to persecute the Christians and oppose the missionaries. Three lads were burned for their adhesion to Christianity, and many others were slain. Mr. Mackay was repeatedly threatened with expulsion, but held his ground, and was allowed for a time to continue his work, his skill as an engineer and mechanic, of which the king often availed himself, helping to secure his favor. In 1886 the persecution broke out again, many under great tortures exhibiting a Christian fortitude and heroism unsurpassed in apostolic times. In 1887 the Arabs succeeded in persuading Mwanga to expel Mr. Mackay. Having locked the mission premises, he embarked July 20th for the southern end of the lake, making his abode at Usambiro. Here he remained for three years, translating and printing the Scriptures, teaching the Christian refugees from Uganda, instructing the natives of the district, as far as he could with an imperfect knowledge of their language, and working at house-building, brick-making, and the construction of a steam-launch with which to navigate the lake. He was attacked with malarial fever, and died February 8th, 1890, after five days' illness. Mr. Ashe, his companion, says: "I have lost my best and most loving earthly friend. A born leader, as gentle as he was brave. One part of his character was his earnestness in prayer and the study of the Bible." Colonel J. A. Grant, companion of Speke in his journeys, thus writes: "The blow to civilization in Central Africa which has fallen on us all is not easily repaired, for a score of us would never make a Mackay." Mr. Stock remarks: "Mackay is identified in most minds with the industrial, material, and civilizing side of missions. It would indeed be most unjust to think of him entirely in that aspect. A man who was one day grappling with Mohammedans in strenuous theological argument, and preaching Christ, that He is the Son of God; who the next day was content to sit for hours teaching boys to read, and explaining to them simple texts; and who the third day was patiently translating the blessed words of life into a language that had no grammar or dictionary

—such a man was no mere industrial and civilizing missionary." The Society thus records its estimate of Mr. Mackay: "His talents were of a very high order, and he brought to bear upon the cause of the spread of Christianity and civilization in Africa not only remarkable practical resourcefulness as an accomplished engineer, but the powers of a vigorous and cultivated mind, and a devotion and perseverance unsurpassed by any African missionary. Moreover, he took a leading part in the direct work of the mission, teaching and preaching the Word of God; and he utilized the knowledge of both classical and modern languages in reducing the vernacular of Uganda to writing, and rendering into it portions of Scripture, prayers, etc."

**Mackenzie, J. Kenneth, M.D.,** a medical missionary of the London Missionary Society; was first appointed to Hankow; he took charge of the mission hospital there till 1878, when in the autumn he was transferred to Tientsin. He was called in to prescribe for the illness of the wife of the powerful Viceroy of Chihli, Li Hung Chang, and his success in curing her attracted the attention of the Viceroy to his work. A dispensary was opened in the Viceroy's theatre, with a female department, and large subscriptions were made by him and other high officers towards the building of a hospital. In 1881 the hospital, on the premises of the London Mission, was opened by the Viceroy, and plans were adopted for a medical school, to which the students formerly sent to the United States of America by the government were sent to be trained as doctors, and a thorough organization of a medical staff for the Chinese army and navy was in course of formation. Amid his arduous duties, Dr. Mackenzie found time to pursue evangelistic work, both among the poor patients and those "in Caesar's household," for the favor of the Viceroy secured him access to many of the high officials. The work at Tientsin grew and enlarged, so that in his last report, 1887, he gave the number in attendance at the dispensary as 13,799, in-patients in the hospital 591, and 9 medical students. He was called suddenly away from his work by death, April 1st, 1888. He was universally admired and beloved by his associates, and was said to be the "most important man in Tientsin." The London Missionary Society report speaks of him thus: "A skilful physician, he was also, and above all, an earnest evangelist." A handsome slab of stone, bearing a brief motto on one side, and on the other a short biographical sketch, built into the outer wall of the courtyard of his old dispensary at Tientsin, is the mark of the esteem and loving memory of his college students and some of the native Christians who knew and loved him well.

**Macleag,** a settlement on Lake Alexandra, South Australia; was founded in 1858 by the Scotchman Tapiu, who translated parts of the Bible into Narrinjeri, wrote a grammar of the tongue, and made a careful study of 22 native languages. Station of the Hermannsburg Evangelical Lutheran Mission.

**Macmillanpatna,** town in Orissa, India, two miles from Cuttack, the capital. A sub-station of the General Baptist Missionary Society (established 1868), worked from Cuttack. It

has one chapel, supplied by preachers from Cuttack, 32 church-members, and a Christian community of 115.

**Madagascar,** an island of the Indian Ocean, nearly parallel with the eastern coast of South Africa, from which it is separated by the Mozambique Channel, which varies in width from 220 to 540 miles. Its northernmost point is in 11° 57' 30" south latitude, and the southernmost is in 25° 38' 55" south latitude. Its breadth is at the widest point over 7° of longitude. Its extreme length is 975 miles, and its breadth varies from 250 to 350 miles. Its area is about 230,000 English square miles. It is the third largest island in the world, ranking only below Borneo and New Guinea.

Madagascar has a coast-line of over 2,000 miles, and on the northwestern, northern, and northeastern coasts there are many good and some excellent harbors; but south of latitude 19° there are very few roadsteads where a vessel can ride in safety, either on the east or west coasts. At the north, Diego Suarez Inlet is its finest harbor. The ports best known on the east coast are: Port Choiseul in Antongil Bay, Ports Ste. Marie, Fenoarivo, Foule Point, Tamatave, Mahanoro, Vatamandry, Mohila. On the south are Fort Dauphin and two or three less important ports. On the west the important harbors are: Nosy-Vé, Morondava, Maintirano, Mojanga, the largest port on the island; Helleville, in the French island of Nosy-Bé; Bavatoby, and Pasindava.

**Surface and Productions.**—The island is of volcanic origin, and has many extinct volcanoes and some which, if not now active, have been so within the historic period. Its general structure includes three or four ranges of mountains, not parallel, but extending from north to south, with many spurs; these are in the central portions of the island, though nearer to the east than the west coast. Some of the ranges extend nearly to the northern limit of the island, and others to the southern coast. Ankaratra mountains, mostly in Imerina, whose principal summits rise between 8,000 and 9,000 feet; the Angavo range, forming the water-shed of the island, about 70 miles from the east coast, and 200 from the west, having five summits with an elevation of 6,000 to 7,300 feet; the Andringitra ranges, mostly in Betsileo, and others farther south. The mountain summits, lofty as they are, do not in this latitude reach the snow-line. This mountainous region is known as the Highland provinces, and constitutes the finest portion of the island in healthfulness, delightful climate, productiveness, and the intelligence of its inhabitants. Immediately below these highlands is a belt or perhaps two belts of forest, extending nearly around the island. This forest belt varies in altitude from 1,800 to 4,000 feet. Portions of it are dense jungle, with the lianas or climbing plants rendering it almost impassable; other portions are park-like groves, with stately and valuable timber-trees; toward the south there are extensive prairies and desert lands. The forest belt varies from 30 to 50 miles in breadth.

From the forest belt to the coast extends the littoral or alluvial region, having a flat, low-lying, sandy, and marshy soil, washed down through the ages, from the rocks and forests, and bordered on the east coast by a long line of lagoons or sounds. This littoral region is from 20 to 30

miles wide on the east coast, but from 40 to 60 on the west coast. It is sickly and hot, the decaying vegetation producing fevers and miasmatic diseases.

*Climate.*—Temperate and healthy in the Highland provinces, the temperature rarely above 85° F. or below 40° F., except in the mountains, where it sinks to 32° at night perhaps once or twice in a year. In the forest belt, less healthy and more moist, and at times hot; in the more open timber the climate is delightful. In the littoral region the heat is intense, and the Malagasy fever prevails, and very often proves fatal to those who are not fully acclimated.

*Natural History and Products.*—Madagascar is remarkable in its zoölogy. There are no great beasts of prey. The lemur takes the place of the various families of monkeys and apes; there are several species of ant-eaters, two or three civet cats; the aye-aye, an animal allied to the sloth family, but found nowhere else; and there are several rodents. Reptiles are numerous, but, except the crocodile and three or four species of pythons, are generally harmless. Birds are numerous, and many of them of beautiful plumage. The birds of prey are large and powerful, but not abundant; and a species, just become extinct, the *epyornis*, is believed to have been the largest bird on the earth. About two thirds of the known species of birds on the island are peculiar to Madagascar.

The fish are plentiful, and many of them of edible species. Most of the domestic animals have been introduced, and cattle and sheep are raised and exported in great numbers. Wild dogs are so numerous as to be a pest.

The flora of Madagascar is abundant, and about 700 out of 3,000 species are peculiar to the island. Many of them are of exquisite beauty. It is a paradise for the orchids; more, and more beautiful species being found here than in all other countries. The forests abound in peculiar and valuable timber, some of it the finest known; and caoutchouc trees and vines, the copal tree, the sago-palm, the bread-fruit, the *Rofia* palm, the pepper-tree, the tallow-tree, the traveller's-tree, the pomegranate and other trees of the *Citrus* family, the tamarind, the quassia, the lace-leaf shrub, the sugar-cane, the manioc—an indigenous arrow-root, etc., etc., are plentiful in the forests and highlands. Most of the cereals are largely cultivated.

*Ethnology and Tribal Divisions.*—The origin of the Malagasy and their race affinities with the other oriental nations have led to great controversies among the most eminent ethnologists of our century.

It is generally agreed that the original inhabitants of the island were from some of the African races, and most probably from south-eastern Africa—Zulus or Kafirs. Though dark, they seem to have been negritos rather than negroes. They were known by the Malagasy as Vazimba. Investigations show that they were of low stature; their heads were narrow and elongated; they were physically weaker than the invading tribes, had no knowledge of the use of iron, and fled before the superior weapons of their adversaries. A small remnant of them were still living in 1843, and it is believed that a few are yet to be found in the southwest.

In regard to the present inhabitants of the island, known as the Malagasy, these facts are

settled: They all speak the same language, the dialects differing no more than the Yorkshire and Lancashire do in England; and this language is of very close kindred with the Malay, and has many Malay words. There is a marked difference in color, features, and hair among the different tribes: some are of fine stature and physique, but very dark, with curly or frizzly black hair; their features are more Polynesian than negro; others are of lighter complexion, with straight or very slightly curled hair, generally of good height, and well-formed. The Hovas, who are the ruling tribe, are generally somewhat below the middle stature, of a light-olive complexion, frequently fairer than the Spanish, Portuguese, or Italians. Their hair is black, but soft, fine, and straight or curling; their eyes are hazel, their figures erect, and though small, well-proportioned; the hands and feet small, and their gait and movements agile, free, and graceful.

The theory of their origin which is best supported seems to be that these tribes are of Malayan or Malayo-Polynesian stock; that they came to Madagascar at different times, and probably not in large numbers at first; that the first invaders landed on the south-southeast or east coasts, and gradually crowded the Vazimba into the interior or highland regions; that other companies came later, and landed upon the southern and western coasts, and they also forced the aborigines away from the coasts; that these invaders, engaging largely in the slave-trade (bringing negroes from the Mozambique coast), and trading with Arabs, Phœnicians, and Syrians, and being of loose morals, became gradually a mixed race, having the physical characteristics of the several races thus commingled. At a period about 1,000 years ago, a fresh irruption came from Malaysia, a more intelligent tribe than their predecessors, and finding the coasts occupied, pushed forward into the interior, and driving the Vazimba before them, possessed themselves of their lands, and grew strong and great there. These were the Hovas, and perhaps also the Bêtsimisarakas, the Bêtanimèna, and the Sihanakas of the eastern coast and forest regions. The Betsileo, who occupy the province south of Imerina, though in intelligence and political ability they strongly resemble the Hovas, are physically very different from them, being of large stature, very dark complexion, and crisp or woolly hair, and with a low and broad forehead and thick lips, resembling the negro race more strongly than any other of the Malagasy tribes. Yet their language is substantially the same with that of the Hovas, and they take as readily to the arts of civilization. They were probably earlier immigrants, and perhaps had intermarried with the Vazimba or the Mozambique slaves. They were divided into three clans, and these were often at war with each other, and the captives became the slaves of the captors.

In 1810 the principal tribes of Madagascar were: 1. The Sâkalâva, divided into the northern and southern tribes, occupying the western coast, and including many smaller clans; their members were estimated at 1,500,000. 2. The Bêtsimisarakâ, with several clans, and including the Bêtanimèna, occupying the east coast, about 1,500,000 more. 3. The Sihanaka and Tankarana, northeast provinces; about 500,000. 4. The Bara and Tanala and some smaller tribes, in the southeast, 500,000. 5. Imerina, the land of the

Hovas, then about 600,000; and 6. The Betsileo, 1,200,000. The last two were the Highland provinces.

**Social and Religious Condition before Missions were established.**—

Though discovered in mediæval times, no effort was made by Europeans to explore or colonize Madagascar till 1506, when the Portuguese, after some exploration in 1540, undertook to enslave and Christianize its inhabitants. They made repeated efforts to this end in the next hundred years, landing small colonies on its shores, establishing trading-posts, from whence they sold the people who came under their power as slaves. These natives were Sâkalâvas, who did not choose to be the prey of European slave-dealers, and massacred the Portuguese colonists and priests in 1548, 1585, 1600, and 1615. The English and Dutch made several attempts to plant colonies at various points on the coast of the island, between 1595 and 1640. Both nations were at that time engaged in the slave trade.

In 1642 the French undertook to colonize Madagascar, and within the next 170 years they had organized several great companies or societies, and planted many colonies, in which Lazarist and Jesuit priests were always conspicuous and often evil advisers; but owing to their maintenance of the slave-trade, and their treacherous dealings with the natives, four or five of these colonies were attacked and massacred by the chiefs. From their own misconduct and the deadly character of the climate on the coast, the last of these societies was obliged, in 1686, to surrender its charter and its whole property to Louis XIV., King of France, who claimed, but never exercised, authority over it. For the next thirty or thirty-five years the northern part of the island was the most formidable rendezvous of the pirates, who infested the Indian Ocean and bade defiance to all the European powers. They treated the natives well, and several of the tribes were on friendly terms with them; but their rendezvous was finally broken up in 1723. It was not until 1754 that another attempt was made by the French to plant a colony in Madagascar, and this was broken up by a massacre. In the 57 years which followed, occasional attempts were made to establish trading-posts at different points on the island—at Fort Dauphin in the south, Tamatave and Foule Point on the east coast, and Nôsy-Bé and Ste. Marie Islands; but these were one after another abandoned, till, in 1811, the only two remaining trading-posts, Tamatave and Foule Point, with a mere handful of men in each, were surrendered to the English, as their sole possessions in Madagascar. These settlements and trading-posts, maintained with fitful irregularity from 1642 to 1811, had professed to have, for one of their objects, the conversion of these heathen to Christianity; they had had at all times Roman Catholic priests, generally Lazarist or Jesuit Fathers, at their stations; but the rapacity and licentiousness of the officials and their men, and in many cases of the priests themselves, had disgusted the Malagasy, and made them despise a religion so much worse in their sight than their own idolatry. In all these 160 years there is no mention of more than one Malagasy convert, who had been taken to France, and educated by Vincent de Paul; and he, while acting as a servant of two of the belligerent priests, was slain with them by his own countrymen in 1663.

The social and religious condition of these tribes at the beginning of this century was most deplorable. Not only were the different tribes almost constantly at war with each other, for the double purpose of obtaining spoil, and of securing captives who were reduced to slavery and sold to the slave-ships of the Arabs, Turks, Portuguese, Spanish, French, and (alas, that it should be necessary to say it!) English, and possibly Americans. Their principal chiefs also carried on a considerable trade with the Arab *dhows*, or slavers, from Zanzibar, Mozambique, and Sofala, purchasing negro slaves from Mozambique and rum from Zanzibar, and paying for them in rice, bullocks, timber, and other products of the island, and often in their own countrymen whom they had enslaved. As might be supposed, the state of morals was as low as it well could be: polygamy was the rule with the chiefs and nobles; chastity was unknown in the towns, and little regarded in the country. Many of the large tribes were adroit thieves, cheats, and liars. This was particularly true of the Sâkalâva (long the ruling tribe), the Bara, and the Betsileo. One of the best of the Sâkalâva said to Mr. Sibree: "All the Sâkalâva steal; I myself also." They were also the most treacherous and vindictive of the tribes. Some of the tribes were industrious and skilful, so far as their opportunities admitted, in the mechanic arts; others were indolent, averse to work, but ready to steal. The coast tribes were generally, though with some exception, fond of aquatic pursuits, skilful as fishermen, turtle-catchers, or rowers, and imitated the Malays in their long and well-handled *proas* or canoes with outriggers; the interior tribes were generally agriculturists, when not engaged in war.

Their religious system was not as artificial or philosophical as that of many heathen nations. They believed in a supreme being who ruled over all; they also had an idea of subordinate deities, who ruled over certain places, persons, or interests. There were no idol temples, few idolatrous processions, no priestly class in rich robes and exerting almost regal power, no pilgrimages, penances, castes, no costly offerings or sacrifices (this at least among the Hovas, though it is said that among some of the coast tribes, on important occasions, human sacrifices were offered), and while there was some superstition, and occasionally attempts at divination, there seems to have been little tendency to fetichism or voodooism. Mr. William Pool was present when, at the destruction of the national idols in 1869, their chief idol, Rakêlimalâza, was dissected before being burned. It was of small size—a piece of wood two or three inches long, and as large as the middle finger of a man's hand, wrapped in two thicknesses of scarlet silk about three feet long and three inches wide, the wood pointed at one end and movable in the silk, and two silver chains about three inches in length at either end of the silk. It was placed in a small case made of a portion of the trunk of a young tree hollowed out. There was no carving or ornamental work upon it. This idol was the guardian of the sovereign and the kingdom; others, as that protecting against serpents, that preserving the rice crop from harm, etc., were still more rude than that already described. One of the sovereign's idols was a small quantity of sand tied up in a cloth; another was an imitation of shark's teeth in silver; others, pieces of coral or bone. The wor-

ship of these idols was not very general or reverent. The Malagasy were not a devout people; they did not like to retain God in their knowledge. They paid a sort of homage to their deceased ancestors, but reared no temples or statues to them. The idol-keepers, who by custom held the rank and privileges of nobles, were not very numerous, and were disliked by the people. They resorted to divination at the demand of the rulers, and generally the ordeal of the *tangena* was administered by them. This ordeal, which consisted in the administration of a portion of the nut of the *Tanghinia Venenestua* in a part of a ripe banana, with many ceremonies and prayers and much mystery, was a very potent instrument of evil in the hands of these idol-keepers. From one third to one fourth of those who took it died. It was a powerful emetic poison.

The religious system of the Malagasy exerted no influence on their moral natures, and indeed made no pretence of doing so. It was simply supposed to confer upon them temporal benefits; why or for what service on their part does not appear.

There were no days or seasons for the public worship of the idols; indeed they seem to have been only or mainly used for purposes of divination. On certain occasions, such as the accession of a new sovereign, the coronation or public showing (*fiseloana*) of the new ruler to the people, and the observance of the Malagasy new year, which usually took place in the spring, they were brought out. The Malagasy year was a lunar year, and consisted of only 354 days. This observance of the new year was a feast of five days; the sovereign bathed publicly in the palace, and each of the principal families in their own homes. There was great feasting in all the capital villages, many thousands of bullocks being slain and their flesh distributed. The idols were carried in procession, all laws being in abeyance for the time, and drunkenness and the most horrible licentiousness prevailed everywhere during these public days, as on the other occasions already mentioned.

The government of the various tribes was, like that of most savage nations, by chiefs. It was not necessarily hereditary, though confined to the class of nobles (*Andriana*), and was as often, perhaps, in the female as in the male line. The succession was not often conferred upon the eldest son or daughter, and there was much intrigue, and sometimes bloodshed, before the ruler was selected. Once on the throne, however, his government was an absolute despotism, though sometimes "tempered by assassination." There was no written language in any of the tribes; the decrees of the sovereign were promulgated by heralds, and however unjust, could only be changed by his will. The government was feudal in its character; the chief and the nobles held the tribe in bondage; they owned all the land, and the people as well; if either the ruler or the nobles required any work done, as the cultivation of the fields, the preparation of clothing, or arms and munitions of war, or if they desired to go to war with a neighboring tribe, the clansmen were called out and required to perform the service, providing themselves with food and clothing, for the time required. The chief or nobles were only required to furnish the necessary arms. This forced service was called *fanompoana*, and it exists, in a modified form, to this time.

There was no military organization, no drill, and nothing but an ignorant mass or rabble of men, ill provided with weapons, and each fighting "on his own hook." There was always, of course, immense loss of life, more from starvation and fever than from wounds in battle. The raids, which were very frequent between the tribes, were started for purposes of plunder, the theft of cattle, and the capture of slaves, either for purposes of lust or for sale—not infrequently for both.

For the most part, during the 17th and 18th centuries, the *Sakalava* who were divided into two great tribes,—the Northern and Southern *Sakalava*,—seem to have been in the ascendancy, and to have controlled, though with many revolts, the tribes of the forests and the highlands. The yoke they imposed was a heavy one, and the *Hovas* and *Betsileos* were restless under it; but their conquerors treated them with contempt, calling them dogs, outcasts, and denying that they were true Malagasy.

The *Hovas* and *Betsileos* were at this time unknown to the outside world. Neither the Portuguese, the French, the Dutch, nor the English had ever heard of them except in terms of contempt. They were the dogs, the slaves of the *Sakalavas*; of less account than the *Betanimeha*, the *Betsimisarakha*, the *Bära*, or the *Anösy*. But in 1785 an *Andrian*, or chief, of the *Hovas*, called *Impoinimerina* (the desire of Imerina), succeeded in uniting the divided clans of the province of Imerina under his own authority, and by his superior abilities and diplomacy gained to his cause several of the smaller adjacent tribes; but while he proceeded to subdue most of the forest tribes, he was yet compelled to pay tribute to the *Sakalava* of the western coast. Between 1808 and 1810 he was attacked with a mortal sickness, and summoned home his son *Radama*, born in 1792 and trained in part by Arab teachers. This young chief, not over 17 years of age, at his father's death was proclaimed as *Radama*, King of the *Hovas*.

*Radama* was a very remarkable man. He had no faith in the idols of his countrymen, but he was ambitious, intelligent, capable of reading character, shrewd and politic, and possessed of that magnetic power over men which would compel them to do his will. He had in the *Hovas* a people who were thoroughly fitted for his purpose, obedient, teachable, and capable of being made good soldiers. In some way he had provided them with a considerable quantity of firearms. It was his purpose from the day he ascended the throne to throw off the yoke of the *Sakalavas*, and become King of Madagascar. He knew that for this purpose he must have a very large army, well trained in European tactics and discipline, and supplied with European arms and ammunition. Great Britain was at war with France in all parts of the world; and in 1810 her squadrons captured the two islands Mauritius or the Isle of France, and Bourbon (afterwards called Réunion). Mauritius had been actively engaged in commerce, and the French settlements or trading-posts in Madagascar had been placed under the control of the French commandant, or governor of Mauritius, and were known as dependencies of the Mauritius government. The surrender of these two islands to Great Britain involved also that of the dependencies in Madagascar, of which there were but two, Tamatave and Foule Point,

The French were not disposed, however, to give up their claims on Madagascar, and a long controversy, involving much treachery on the part of some of the coast chiefs, ensued. The new governor of the Mauritius, Sir Robert Farquhar, was exceedingly hostile to the slave-trade, of which Madagascar had been the chief seat in the Indian Ocean; and he sought, in this surrender of the French power in Madagascar, to strike a crushing blow at the slave-trade there, of which the French had been the strong supporters. Learning of the increasing power of the Hovas and the ability of their king, Radama, he resolved to make a treaty with him, as the representative of the Malagasy, by which, under terms favorable to both parties, the slave-trade in Madagascar should be broken up. The time was favorable, for Radama needed the help which the English Government could give him, and was ready to make large concessions to obtain it. There were many difficulties in the way of the negotiation. Radama wished to be recognized as King of Madagascar, yet it was only by receiving arms and money by means of this treaty that he could conquer the formidable tribes to which he was now paying tribute. He hoped, also, that by reducing the language to writing, educating his people, and giving his soldiers military instruction, he should be able to retain the ascendancy over the whole island, which he was endeavoring to acquire. Sir Robert Farquhar believed that Radama would soon become sovereign of Madagascar, and while he knew the craftiness and treachery of most savage chiefs, he felt satisfied that the young king would keep faith with him. The great objects he sought to gain were the breaking up of the slave trade, the securing of the commerce of the island to England, the elevation of these savages to civilization, education, and a better life; and the introduction of Christianity among a people wholly given over to vice. At the same time he knew that if this treaty was made with Radama alone it would be repudiated by some or all of the coast tribes, who together were possibly stronger than Radama. Sir Robert Farquhar sent Captain Le Sage and Mr. Hastie to Antananarivo, the Hova capital, to negotiate the terms of the treaty; and on January 14th, 1817, Captain Le Sage took the oath of blood with Radama; and the treaty between them was concluded on the 4th of February, in which it was stipulated that Radama should cause the cessation and extinction of the export slave-trade throughout the island, either by himself or parties under his control, any aiding or abetting in such sale in any way being punishable by the reduction of the person or persons so offending to slavery themselves. In consideration of this concession on the part of Radama, the commissioners on the part of the Governor of Mauritius and of the King of England agreed to pay to Radama yearly \$1,000 in gold, \$1,000 in silver, 100 barrels of powder, 100 English muskets, 400 uniforms, a complete uniform for the king, swords and belts, two horses, etc., etc. Further it was stipulated that officers should be sent for the instruction of the Malagasy troops in military tactics; that there should be no attacks made on the Sultan of the Comoro Islands; that the language should be reduced to writing, and that schools should be established.

Sir Robert Farquhar did not deem it safe to conclude definitively the treaty until he had

secured the acquiescence of other chiefs who were partially independent of Radama. Accordingly he instructed his agent Mr. Pye to bring to Tamatave, if possible, two younger brothers of Radama, one of them heir-presumptive; the two chiefs of the Betsimisaraka (one a French half-breed, who called himself King of Tamatave), two of the southern chiefs, a son of one of the chiefs of the Bètanimèna, and Radama's two chief ministers, and reconciling them with Radama, to have the treaty signed and approved by all. This was accomplished after many delays, October 23d, 1817, and Captain Stanfell and Mr. T. R. Pye signed on the part of Sir Robert Farquhar; and Mr. James Hastie, as agent, went to Antananarivo and continued to instruct the young princes and aid in enforcing the treaty for preventing the exportation of slaves. Many untoward circumstances, including the treachery of some of the parties and the stupidity of others, delayed the ratification of this treaty until October 11th, 1820.

Meanwhile, early in 1818, without waiting for the final ratification of the treaty, the LONDON MISSIONARY SOCIETY sent two missionaries, Rev. S. Bevan and D. Jones, with their families, as their first missionaries to Madagascar. They had attempted to plant a mission there in 1811, but their missionary, Dr. Vanderkemp, had died on his way from the Cape of Good Hope to Mauritius. Messrs. Bevan and Jones reached Port Louis (Mauritius) in July, 1818, and landed at Tamatave August 18th, leaving their families in Mauritius. They were kindly received by some of the chiefs, and collected together a number of children, whom they taught, and made some studies in regard to the language. About October 1st they revisited Port Louis, but soon returned with their families. Soon after landing on the coast, where a station was established at Andovoranto, all were attacked with the deadly Madagascar fever, and before two months had passed Mr. Jones was the sole survivor of the two families. In April he attempted to resume his labors, but frequent relapses rendered it necessary for him to return to Mauritius in July. He remained there for fourteen months, but when the troubles with Radama had been adjusted and Mr. Hastie was about to return to Antananarivo, Mr. Jones accompanied him, Sir Robert Farquhar doing all in his power to secure for him a favorable reception. He arrived there October 4th, 1820. King Radama welcomed him cordially, and gave the fullest permission for English Protestant missionaries to settle at his capital; and by his personal kindness to Mr. Jones showed his people how desirous he was that they should be instructed. On the 8th of December, 1820, the first school was opened at Antananarivo. The London Missionary Society, awake to their great opportunity, sent forward their missionaries, teachers, and artisans as rapidly as practicable, and very soon the mission work was actively prosecuted in all directions. The first work, of course, was the acquisition of the language and its reduction to writing; then, in their schools, the children were taught the written language, and elementary instruction by means of it. The missionary teachers were preparing books in the Malagasy language; the artisans were teaching the people carpentry, weaving, tanning, and blacksmith work; and a printing press having been sent out, and fonts of Malagasy type cast in England, they were

soon printing school-books and portions of the Scriptures, and instructing the young and teachable Malagasy boys in the art of printing. The missionaries were engaged in translating the Scriptures, and in preaching as soon as they could command the language. No missionaries ever worked harder, and none had more evident manifestations of the divine blessing on their labors. Necessarily, the schools held a prominent position in their work for the first few years. The king, though engaged with his army and his wars, encouraged the instruction of his people to the utmost of his power. Nearly 100 schools were established in the capital and its vicinity, and between 4,000 and 5,000 pupils of both sexes passed through them before 1828, having received the elements of a good education. The instruction in the arts and trades was also making great progress. At first it was difficult to overcome the strong prejudices of the people against foreigners and their teaching, and it was still more difficult to teach those who had been the bond-servants of sin and addicted to the grossest vices, to become temperate, chaste, pure, and Christ-like. The missionaries found, after they became able to preach, that it was necessary to have the Word of God circulated among the people as far as possible; and hence they redoubled their efforts to translate the Scriptures quickly, and have them printed and circulated, at the same time multiplying as rapidly as they could the number of readers.

A church was organized from the English residents in the capital, and though small in numbers, it was very active in Christian work; and those who understood the Malagasy tongue were encouraged to gather the young Hovas for religious instruction and singing. Two congregations of natives for Christian worship were formed in Antananarivo, and very fully attended; others were formed in villages around the capital, and two or three in Vozizongo, a district about a day's journey to the west. In January, 1828, the Gospel of St. Luke in Malagasy was put to press, and other portions of the Scriptures were printed as rapidly as they could be properly prepared. In the autumn of 1827 a permission had been received from the king allowing any to be baptized who desired to receive that rite; but though none came, there was evidence in abundance that many had abandoned their idols, and were seeking after God, and that His truth was finding an entrance into their hearts.

It was at this time, when the missionaries were beginning to feel encouraged at the great success which seemed to be within their grasp, that King Radama died, on the 27th of July, 1828. Radama was not a Christian; indeed he was a man of many and heinous faults, and his death, at the early age of thirty-six, was undoubtedly due to his excesses and self-indulgence. But he had many good traits: he was patriotic, manly, and truthful; he was far-sighted, and even his ambition led him to desire the improvement and elevation of his people. He saw that a written language, education and general intelligence, the promotion of industry, and thorough military discipline would make the Hovas superior to all adjacent tribes or nations; he had no faith in the national idols or in divination; and without any convictions of the necessity of personal religion, he was persuaded that Christianity would be

better for his people than heathenism. The loss of such a ruler, at such a time, seemed the severest blow which could be inflicted upon this infant mission; but God made it eventually the means of the greatest good. Radama had selected his nephew as his successor, if he left no son; but one of his twelve wives, by no means the favorite wife, conspired to secure the throne to herself, and succeeded. Her name was Rabodo, and she was of a family of nobles of the first rank; but she was of violent temper, utterly unscrupulous and bloodthirsty, devoted to the worship of idols, and given to all the vices of the Hovas. She ascended the throne as Ranavalona I.; and her first official act was the putting to death of all the near relatives of the late king, and all the officers who had been most attached to him. Some of these were speared, but others of the highest rank, and among them the mother and sister of Radama, and the husband of the latter, were starved to death. No one was left alive who could contest her claim to the throne. Mr. Hastie, the British resident and warm friend of the missionaries, had died at Antananarivo in 1826; but his successor, Mr. Lyall, was ordered to leave the country at a few hours' notice, and his family were subjected to gross insults. The missionaries and their followers were naturally alarmed; but though there were indications of a coming storm of persecution, it pleased God that its fury should be averted for nearly seven years, and that the new converts should be gathered into churches, and encouraged and instructed by the missionaries till they could bear up against persecution and death. In 1829, '30, and '31 the queen was engaged in a controversy, and a sort of guerilla warfare with the French. Their war-ships had bombarded Tamatave, Foulé Point, and Point Larée, but had been severely repulsed at Foulé Point, and the French commander and six sailors captured, beheaded, and their heads put on poles on the shore of the town. The revolution in France prevented a continuance of the war; but Queen Ranavalona, to show her brutal nature, had sent out her armies against the coast tribes north, south, and west, and at a fearful cost of the lives of her own subjects had, by deceit and trickery, caused the surrender of great numbers of the innocent inhabitants, on the promise that their lives should be spared; and then butchering the men, had taken the women and youth captives, and sold them into slavery. In 1831, '32, '33, and '34 there were about 25,000 people murdered in these raids, while more than 50,000 were captured and sold into slavery. In one district on the west coast the headmen of a clan of Sakalava were accused of concealing arms, seized and crucified, to the number of some hundreds, the crosses surrounding the village; and some thousands of the people, whom they had tried to defend, were seized and sold as slaves. So great was the reign of terror, that the people of Vohilena, in the forest belt, escaped to the forests, and became brigands, plundering all who came that way.

During this period the queen found little time to persecute the Christians, among whom she believed there were very few natives; while she hated the missionaries, she was disposed for a time to allow them to teach in the schools, to print school-books, to prosecute scientific studies, and in other ways to improve the condition of the people. Accordingly, at

the end of six months after Radama's death the missionaries were permitted to resume their labors, and the schools, the translation of the Scriptures and other books, and their printing went forward rapidly; the New Testament translation was completed, and soon after, by the aid of the British and Foreign Bible Society, its printing was commenced. Portions of the Old Testament, and particularly of the Psalms, were prepared for the press, and the translation of the whole of the Old Testament was pushed forward. Through the children in the schools, and those who had gone out from them, these portions of the Scriptures were widely circulated; and when in 1832 all the boys above thirteen years of age in the schools were drafted into the army, large quantities of these and other good books were widely circulated. In 1833 not less than 15,000 copies of parts of the Scriptures were finished, and upwards of 6,000 of them were sent out. Mr. and Mrs. Atkinson were sent home in July, 1832, on the plea that their permit to remain had expired, and Mr. Cauborn in 1833; but there were about a dozen missionaries and their families left, and none of these were ordered away till 1835, when Messrs. Cameron, Freeman, Chick, and Kitching were dismissed. During these years the missionaries who were able to preach had been very active, and their labors had been greatly blessed. No native church had been formed, and no Malagasy had been baptized until 1831; but on the 22d of May of that year the queen issued a message, granting permission for the baptism of converts. Regarding this as the direct answer to prayer, the missionaries proceeded to avail themselves of it. There were many converts, and on the 29th of May, 1831, Mr. Griffiths baptized twenty, and the first native church was formed. Baptisms were almost constant, other churches were formed; and in a few months there were between one and two thousands of members of these churches. At the end of six months the permission to baptize was withdrawn in the case of those who were in the government service, and a month or two earlier the use of wine at the Communion was prohibited to the same class. About three months later, in January, 1832, these prohibitions were extended to all the people. Before 1833 the attempt was made to divest the education given in the schools of any religious character, and those who had been baptized were put into inferior positions. The queen was proceeding cautiously, but it was evident that a decided reactionary policy had commenced. Liberty to preach and print still remained, and great exertions were made to prepare a large number of books for circulation, and to instruct the increasing congregations which pressed forward to hear the Word of God. The Christian soldiers, who had formed part of the army of the queen, had carried their portions of the Scriptures with them, and all over the island little groups were learning to read, meeting together for worship, and trusting in Christ for salvation. The more promising of the converts were seeking for instruction to enable them to preach Christ to their countrymen. In June, 1834, the missionaries, though looking forward to the rapid approach of the storm of persecution, were still able to praise God that so many were savingly converted and that the work was going forward with such power. In July, 1834, the queen forbade any native except those in the govern-

ment service to learn to read or write; it was evident that still greater trials were in store for the Christians. This and other proclamations indicated that the whole force of the queen's displeasure was to be visited on the native Christians; and a few who, from unworthy motives, had manifested some friendship for the Christians (though, to their honor be it said, not one of those who had received baptism), began to withdraw from them, and associate with the heathen portions of the community.

Ratsimanisa, who had been the commander-in-chief of the army, and about this time became prime-minister to the queen, was the chief persecutor, and prompted her to greater cruelties than even her brutal nature demanded. It was clear to him that if Christianity was not arrested the idolatry of the country would be overturned, and the customs of their ancestors forgotten; and in January, 1835, at his instigation, a formal accusation was made against the Christians, before the chief judges of the Hovas, and the following charges were preferred: 1st. They despise the idols; 2d. They are always praying; 3d. They will not swear, but merely affirm; 4th. Their women are chaste; 5th. They are of one mind with regard to their religion; 6th. They observe the Sabbath as a sacred day. It seems that their enemies could allege nothing against them, "except it were concerning the law of their God."

The queen formed the opinion that their despising the idols of their fathers, and ceasing to pray to the royal ancestors by whom the kingdom had been founded, would surely lead them in time to despise her, and treat her, their living sovereign, with contempt, reserving all their reverence and love for the Lord Christ. Thus jealousy was added to her hostility to Christianity.

The crisis which came so suddenly was said to have been brought about by the following incident: An influential chief appeared before the queen, and requested that a bright and sharp spear might be brought, saying "that he could not but see with grief the dishonor done, both to the idols and the memory of the queen's predecessors, by the doctrines of the foreigners, and how the ancient customs were being destroyed, and the new faith was spreading on every hand; that this would soon be followed by the invasion of Madagascar by the Europeans; and as he would rather die than see his sovereign and country so disgraced, he asked for a spear to pierce his heart before that evil day came."

It is said that the queen was so affected with grief and rage that she remained silent for a considerable time, and then vowed that she would put a stop to Christianity if it cost the life of every Christian on the island. She issued an order on the 15th of February, 1835, for a grand *kabary* (a mass-meeting of the people), to assemble on Sunday, the 1st of March, on the plain of Mahamasina, west of the capital, and great preparations were made for the assembly. On the same day (February 15th), all the "heads of hundreds" were assembled on the same plain, where the judges met them, and conveyed the queen's command that they should forthwith summon all who were able to walk—men, women, children, and slaves—to attend the *kabary* to be held that day fortnight, on the 1st of March. None were to remain at home in Imerina except one individual in each house, to take

charge of the property. On the 26th of February several officers, headed by Ratsimanisa, entered the chapel at Ambatonakanga in the capital and read a letter from the queen addressed to the missionaries, forbidding religious worship, the rite of baptism, and the assembling of a society, to her subjects. The Europeans were permitted to follow their own customs and religious practices, but they could not be allowed to teach them to the subjects of Ranavalona. They would be allowed to teach such arts and sciences as would be beneficial to her subjects, but nothing beyond these.

At the great kabary of March 1st there was firing of cannon and musketry, and the soldiers surrounded the multitude to inspire them with terror, and then the principal judge addressed the kabary, delivering a long message from the queen, calling upon all who had been baptized, all who had worshipped and kept the Sabbath, or had entered into a Christian society, to come forward and accuse themselves, and confess such crimes, under pain of death. Ratsimanisa repeated the substance of the queen's royal message, and some of the head men replied to it with servility. Others seemed reluctant to make reply; when Rainiharo, one of the queen's chief officers, and for twenty-five years a prime-minister, the bitterest of persecutors, said that unless the guilty came forward within a month to accuse themselves, the officers and judges would cut off their heads. The queen reduced the time for confession to a week. About two thousand confessed, and on the 9th of March, 1835, she pronounced sentence on them. The twelve senior teachers were reduced in rank, and four hundred of the officers of the army were degraded, some of them to the condition of common soldiers. Among the people, those who did not hold offices under the government were fined according to the extent to which they had avowed their attachment to Christianity. There were about 1,600 of these. There was no shedding of blood at this time; but as an answer to the earnest petition of the missionaries and teachers to be permitted to teach and preach under certain restrictions, the queen ordered that any Malagasy who was seen in company with any of the missionaries should be arrested and put in chains.\* All portions of the Scriptures and other religious books were ordered to be given up, under the severest penalties; but many were concealed, and gave comfort to the persecuted ones in after years. All religious meetings were prohibited, and spies commissioned to hunt the Christians and their forbidden books.

In June and August Messrs. Cameron, Freeman, Chick, and Kitching left Madagascar by order of the queen, but Rev. Messrs. D. Johns and E. Baker remained to give what comfort and help they could to the little band of faithful disciples. They also determined to complete the translation and printing of the entire Scriptures and of the "Pilgrim's Progress." Their Malagasy printers and compositors had been compelled to leave them, but they toiled on till they had completed both books, and printed an edi-

tion of about one thousand copies, which were soon absorbed by the Christians, who concealed them, as far as possible, from the government spies. Probably the larger part were eventually confiscated, but a considerable number came to light after Ranavalona's death. Being again ordered to leave the island, Messrs. Johns and Baker departed in July, 1836, but not till they had bid the converts an affectionate farewell, preaching at great risk in the old chapel at Ambatonakanga from the text, "Lord, save us! we perish." They retreated to Mauritius, but Mr. Johns, at least, visited the island more than once, and in 1840 penetrated to the capital, where he found to his sorrow that many of the disciples had been called to suffer martyrdom, while nine at the time of his visit were put to death at Ambôhipôtsy. More than two hundred Christians were scattered over the country, many of them in chains, others hiding from their enemies, but all "destitute, afflicted, tormented," yet full of faith and trust in God, "enduring as seeing Him who is invisible" to mortal eyes. Mr. Johns made great efforts to secure the escape of some of these to Nôsy-Bé, and thence to Mauritius. A few did escape, but the strict watch kept up by the queen rendered it almost impossible for them to evade her spies. In 1843 Mr. Johns, who had again visited Nôsy-Bé on one of these errands of mercy, succumbed to the fever, and died a martyr to his zeal for the rescue of these Malagasy converts.

Greatly to the astonishment of Queen Ranavalona, her plan for extinguishing Christianity in Madagascar had signally failed. She had closed the schools; prohibited all religious meetings; sent away all the missionaries; confiscated all the portions of Scriptures and religious books she could find by her spies; degraded, fined, and whipped the Christians, and threatened them with severer punishments: and yet the number of Christians was increasing every day, and quietly but persistently all her decrees were set at naught. She determined upon severer measures, for she had sworn a solemn oath to root out Christianity if she had to put every Christian to death.

Early in 1836 Rafaravavy, a woman of high rank, was accused of Christianity, and was condemned to death; but the queen, being alarmed by a great fire in the capital, spared her life but fined her heavily.

The queen's bloody wars and reckless disregard of the lives of her soldiers, who perished by tens of thousands, had led to a famine and to uprising in some portions of Imerina; these she put down with a strong hand, and if those accused were Christians, there was no mercy for them. In the eight months following Messrs. Johns' and Baker's departure in July, 1836, 1,016 persons were put to death in the capital on various charges, 900 of them having been declared guilty by the *tangena* ordeal, and either dying from the poison or being speared, 56 being burned to death, and 60 killed by crucifixion or other means. That a considerable number of these were Christians was certain; but the avowed executions for professing Christianity did not begin till August, 1837, when a prayer-meeting was discovered and broken up, those who had attended it arrested and punished: one of these, a young woman named Rasalama, one of the earliest converts, who had been baptized by Mr. Griffiths, was reserved

\* The Malagasy punishment of putting an accused person in chains was one of great severity: the prisoner had bands or collars of iron around his neck, waist, and ankles, the latter being sometimes bound together. These bands were connected together by heavy bars of iron, so that sitting was impossible, locomotion difficult, and the torture was constant.

for death by the queen. She was first chained in the way to produce the utmost torture, and the next morning led to the place of execution at Ambôhipôtsy, where, while praying that the Lord would receive her spirit and that this sin might not be laid to the charge of her murderers, she was thrust through by the fatal spear, and her body left to be devoured by the wild dogs. In 1837 Rafaralahy, a young but devoted Christian man, suffered martyrdom on the same spot, and with the same holy confidence and joy. The storm of persecution now increased in violence, and a large number of Christians were apprehended and condemned to death. Among the number were six (four men and two women, one of the latter being Rafaravavy, already mentioned), who escaped from the island and reached England. Most of those who were condemned suffered death by the spear. Many were sentenced to take the *tangena* ordeal, and being generally declared guilty, were speared, if they did not die first from the poison. Many were deprived of their honors and rank, and if in the army, whatever their rank, were degraded to the position of common soldiers. Heavy fines were exacted from others; many were sold into perpetual slavery, and some were sent to the most unhealthy portions of the coast to die from the fatal marsh fevers.

There were many hundreds of these sufferers for Christ's sake, but none of them turned back to idols, or to the vile life of the heathen; and what was especially astonishing to the queen, there were scores of adherents to the new faith for every one whom she put to death. The persecution raged fiercely in 1839, 1840, 1841, and 1842.

The years from 1843 to 1848 were marked by a decided lull in the persecution. The queen was in difficulties with both England and France, and her attention was diverted from the Christians by the incidents of the war. In this lull of the persecuting spirit the gospel made great progress. The queen's son, Rakôto (afterward Radama II.), took a great interest in the Christians, and it is said professed conversion; Prince Ramonja, his cousin, was already an active Christian, and had suffered for the faith, and among others of noble rank the son of Rainiharo, the prime-minister of the queen, and the most violent persecutor among the Hovas, had joined the Christians. The native preachers preached and baptized almost openly in the suburbs of the capital, and very many were added to the churches. Another fiery baptism came in the early months of 1849. The queen finding that her realm was becoming largely Christian in spite of her previous efforts, resolved now to try still severer means of fulfilling her vow. On the 28th of March, 1849, nineteen Christians, all of them of excellent families and four of them at least from the highest nobles, were condemned to die for the crime of being Christians. Fifteen were to be hurled over the cliffs at Ampâmarinana, a perpendicular wall of rock 150 feet high, and with a rocky ravine or cañon at the bottom. This is now known as the Rock of Hurling of Antananarivo. The queen looked down from her palace windows and saw her subjects dashed to pieces because they were Christians. The idols were taken to the place of execution, and each victim was lowered by a rope a little way over the precipice, and the demand made, "Will you

worship this god? or will you cease to pray to Christ?" The answer in each case was an emphatic "No!" and the rope was cut, and the martyrs, often singing as they went, were hurled down upon the rocks below. Only one of the condemned was spared—a young girl of fifteen, a relative and favorite of the queen, who finding her firm caused her to be taken away and sent to a distant village on the charge that she was insane. This noble girl, Raviva by name, lived to found a large Christian church in the place where she was exiled, and to bring her father and her relatives to Christ. Mr. Ellis saw her in 1862.

Four of the nineteen who were condemned to death that day were andrians or nobles of the highest rank, and as, by the Hova custom, their blood could not be shed, the queen resolved to put them to death by burning them at the stake. The sentence was executed at Faravôhitra, a level summit of the northern ridge of hills of the city, just where it begins to slope down to the great plain. Of these four, two were husband and wife, the latter about to become a mother. They walked calmly to the place of execution, singing the sweet Malagasy hymns which had been their joy in the past and were their solace now. Arrived at the place they meekly surrendered themselves to be fastened to the stakes. Amid a terrific storm of rain and lightning the fires were kindled and mounted higher and higher, but no cry of pain proceeded from the funeral pyres, but only songs of praise, and these prayers, recorded by a faithful disciple who witnessed their martyrdom: "O Lord, receive our spirits; for Thy love to us has caused this to come to us; but, O Lord! lay not this sin to the charge of our rulers." The Christian lady had the pangs of maternity added to the terrors of the flame, but she uttered no cry of anguish even when the brutal executioner with his spear thrust the new-born babe back into the flames. When their bodies were consumed the bodies of those who had been hurled over the cliff at Ampâmarinana, or such portions of them as had not been devoured by the wild dogs, were brought to Faravôhitra and burned in the same fires which had consumed the other martyrs.

This was only the beginning. The queen's rage increased every day, and she was constantly inventing some new torture. Her prime-minister, Rainiharo, was equally ferocious with his mistress as a persecutor—both had sons who were converts, or at least fearless advocates of the Christians. They resorted to crucifixion, and fearing lest the agony of this form of death should not be sufficient, when they were nearly dead with hunger and thirst and exhaustion, fires were lighted under the crosses, and these and the martyrs were consumed together. At Fiadana, a plain adjacent to the capital, scores of victims were put to death by stoning, and the horrors of this form of death as committed by Malagasy hands were said to have exceeded all others. The friends of those put to death at Fiadana stole forth at night, and at the imminent peril of their lives carried off for interment all that could be collected of their remains.

Every possible indignity was inflicted upon those who were condemned to death. These executions were continued till hundreds had perished. In addition to those who endured the extreme penalty of death by these various

modes of destruction, a far larger number suffered in other ways, and in very many cases their sufferings terminated in death or helplessness. Thirty-seven preachers, with their wives and families, were consigned to a life of irredeemable slavery. The property of those who were sold into slavery, as well as of those who were executed, was allowed to become the prey of the rabble, who were thus encouraged to become spies. Over 100 were flogged terribly with whips, and then sentenced to work in chains for life. Many who had property were heavily fined, and the nobles who had professed Christianity were not only deprived of their rank, but were forced to the hardest and most menial labor. Officers of the army were reduced to the ranks and condemned to severe labor in building a large stone house as a government factory, and were branded with the words *Tsi-hukorana*,—"That which is not to be imitated,"—to prevent others from following their example. "Altogether, in the early spring of 1849," says the Rev. E. Prout, one of the missionaries of the London Missionary Society, "1,900, according to the lowest estimate, but more probably upwards of 2,000, were thus severely punished and tortured because they had either professed or favored the religion of Jesus."

This cruel persecution went on for years. The judges were incessantly occupied with examinations, and the least act or word, the vaguest suspicion, exposed all, from the highest to the lowest, to be dragged before them. The country was scoured in all directions by the spies of the queen and the idol-keepers. Domiciliary visits were of daily, often of hourly, recurrence, and slaves—usually an affectionate class of the inhabitants—watched their owners' every movement, and, for the first time, found themselves listened to in a court of justice. Numbers fled to the mountains, or hid themselves in the depths of the neighboring forests, eking out a scanty subsistence, until want and exposure put an end to their lives. Others constructed hiding-places in their own houses, in their rice-pits, and on their own farms, and were there tended and supplied with food by their relatives for years, reappearing long after they had been accounted dead.

The four principal places of execution, Ambohipotsy, Ampamarinana, Ambatonakanga, and Faravohitra, have, since the queen's death, been made the sites of four memorial churches of stone, capable of seating about one thousand worshippers. The money for erecting these was furnished by English friends of the Malagasy Christians, but the Christians have themselves erected excellent and commodious churches on other sites, where the blood of the martyrs was shed. All the testimony, both heathen and Christian, shows that not only was there no recantation among these converts to Christianity, many of whom were illiterate and but recently brought to Christ, but that they bore the gross indignities, and the cruel and terrible deaths to which they were subjected, with quiet heroism and unflinching trust in God. "Let us go and see how these Christians behave; they are said not to be afraid to die," were the words of some of the principal officers of the royal household. The same officers said afterward, "We were near, and saw all that took place. The Christians were not afraid, and did not recant."

Their fortitude and courage produced a deep impression on the minds of the people. The cruelty of the queen was beginning to defeat its own purpose. The heathen saw that there was a power in the Christian religion which overcame all earthly opposition, and that the Christians were the most truly loyal of all the queen's subjects. Many felt and said: "This is the finger of God; there must be something divine in this belief;" and they were led to become Christians notwithstanding the peril to which it exposed them.

This persecution continued with great fury till 1852, when the death of Rainiharo, the prime-minister (who had been even more bitter in his persecuting spirit than the queen herself); the influence of the young prince, which was exerted in favor of Christianity; and of his cousin Ramonjā, who was an active Christian—were instrumental in producing greater toleration. But the discovery of a plot to dethrone the queen, instigated by a French adventurer, and maliciously charged against the Christians, furnished a pretext for the commencement of a new and still more bloody persecution by the queen in 1857.

During this period of comparative quiet, Rev. William Ellis, Foreign Secretary of the London Missionary Society, made three visits to Madagascar, in the hope of bringing comfort to the suffering, faithful disciples in Imerina, in 1853, 1854, and 1856. He reached Tamatave and other towns on the east coast in 1853 and 1854, and Antananarivo in 1855. Again in March, 1856, he visited the island. In these visits he was able to cheer and comfort many of the Christians, to distribute many copies of the Malagasy New Testament, and in his third visit to make the acquaintance of the young Prince Rakoto (later Radāma II.), of whom he formed a high opinion. He was also presented to the queen, who treated him courteously, but coldly. He returned to England in March, 1857, and three months later, the last great persecution was commenced. On the 3d of July, 1857, the population of the capital were driven from their homes by the soldiers to a great kabary or National Assembly. The queen announced her determination to stamp out Christianity. All suspected persons were imprisoned, and daily kabarys (assemblies) were held in the city and its neighborhood to denounce the Christians. A few days after the first great assembly, twenty-one were stoned and then beheaded; many others suffered at the "Rock of Hurling;" and it was believed that this was the most fatal of all the persecutions. A large number were sentenced to the tangena ordeal, by which many died, and many more were put in chains and reduced to slavery. This persecution was maintained for nearly three years. But deliverance was now at hand. On the 15th of August, 1861, the queen died. She had reigned thirty-three years, and twenty-five of those years had been marked by cruel persecution of the saints of God, and vain efforts to root out Christianity from the island. The result had been that those who were persecuted "went everywhere, preaching the Word." Christian life had attained a depth, power, and reality which would have been impossible in a time of ease and prosperity. All that an absolute sovereign, backed by a powerful government and a numerous army, could do to dislodge Christianity from the country had been done. Several

thousands had been put to death in various ways. Yet the little company of believing men and women left by their English pastors and teachers, as sheep without a shepherd, in 1836, had multiplied at least twenty-fold in 1861, and had attained to a fulness of faith and love, which brought their heathen fellow-countrymen to Christ more surely than any preaching could do. They had studied the Word of God very faithfully, and, like Paul, they knew in whom they had believed. Their patient trust in God, their forgiving spirit, had often melted the hearts of their persecutors. Their purity of life and morals was attested by their enemies; their religion was their only crime. On the 18th of August the Prince Rakoto, the son of Ranavalona I., succeeded his mother with the title of Radama II. Mr. Ellis says: "The sun did not set on the day on which Radama II. became King of Madagascar before he had proclaimed equal protection to all its inhabitants, and declared that every man was free to worship God according to the dictates of his own conscience, without fear or danger." Prison doors were opened, the fetters were knocked off from the prisoners, messengers were dispatched to the remote and pestilential districts, to which many of the Christians had been banished, to save alive those who had not already perished from disease and exhaustion, to remove the heavy and cruel chains they had worn so long, and to set free those who had been consigned to hopeless slavery. The exiles hastened home. Men and women, wan and wasted with suffering and want, reappeared in the city, to the astonishment of their neighbors, who had deemed them long since dead, and to the grateful joy of their friends. The long-desired jubilee had come, and gladness and rejoicing everywhere prevailed; while even the heathen, who had sympathized with the Christians in their sufferings, now congratulated them on their deliverance.

Within a month after the queen's decease eleven houses were opened for the worship of God in the capital and great numbers in the adjacent country, and churches were being erected everywhere, and filled Sabbath after Sabbath with rejoicing worshippers. Within a very few years the memorial churches were erected, which rendered Antananarivo famous alike for its churches and palaces.

Radama II. invited the missionaries of the London Missionary Society, and especially his friend Rev. William Ellis, to return. Mr. Ellis reached the capital in June, 1862, and was followed in August by three ordained ministers, a medical missionary, a teacher and a printer, who were all soon busy resuming the work laid down in 1836. Christianity had triumphed. The 2,000 adherents to the Christian cause who then braved the rage of the persecuting queen had become a host of 40,000, only about one fifth of them baptized believers, but all witnesses for Christ, and ready to suffer and die for Him. In this jubilee of deliverance many were daily added to the churches. Back of these were more than 100,000 who, though not believers, had rejected idols and were ready to embrace Christianity. Provision was made as rapidly as possible for reopening the schools, and the king gave his sanction and aid, for he desired that the children should be educated, and that the nation should make progress. The

printing was also actively resumed, and this was of great service to the king.

Radama II. was a man of fair abilities, and of a kindly and amiable disposition. He had, in the later years of his mother's life, been very heartily in sympathy with the Christians, and had boldly defended them, sometimes at the peril of his own life. He had never united with any of the churches, nor did he profess to be a Christian after he came to the throne, though he had often said he hoped to become one. His earliest proclamations were very favorable to Christianity, giving perfect religious freedom to all, and inviting religious teachers to come to the country. He also invited traders and foreigners to come to the island and establish trade there. He also abolished all export and import duties. The immediate result of this was that the cheap, vile rum of the Mauritius was poured into the island in immense quantities, and the great trade in bullocks and other commodities was paid for in this horrible stuff. The natives, especially of the coast tribes, who had previously been addicted to the use of their own rum, which was more costly, now became utterly besotted and ruined, both in body and estate. He made many other decrees which were wise and good. He restored the lands and property to the Christians which had been confiscated by his mother's orders. He diminished very greatly the *fanompôana* or unrequited service, which had been exacted from the common people by the government or nobles, and set the example of paying for labor in money. He set free all the captives of the Betsileo, Sakalava, and other tribes which his mother had raided; and not only restored their property so far as he could, but sent back the bones of those who had perished. He endeavored to make treaties with foreign nations, and to secure for his people the advantages of foreign inventions.

But with these good laws and decrees he made many bad ones, which worked great injury to himself and his country. He became very intimate with a wily and unscrupulous French adventurer named Lambert, the same one who had conspired against his mother, who led him into intemperance and other vices, that he might have more power over him. While intoxicated, the king conceded to Lambert over one third of the arable lands of the island, the privilege of working all its mines, and of conducting manufactures, and of bringing in as many Jesuits as he pleased. These concessions were all violations of the long-established "customs" of the Hova rulers, but Lambert induced him to sign contracts for them, without any compensation. He had also surrounded himself with young men, many of them heathen, and of dissolute habits, with whom he engaged in gross excesses, and who controlled the appointments to offices, and really governed the realm. These young favorites were called the *Menamâso*. At their prompting, and in the interest of the idol-keepers, he promulgated a decree that all differences of opinion, whether of individuals or of villages and towns, might be settled by open battle between the parties, and that the successful party should not be called to account for any deaths which might result. This was really opening the way to civil war, and the wiser nobles and leaders would not permit this law to go into

effect, nor the Mènamaso to continue to rule. The most powerful of the nobles went to the king and, on their knees, begged him to revoke this decree and give up the Mènamaso. He obstinately refused to do either; a revolution ensued; the Mènamaso were secured, and most of them put to death; and the king, still continuing obstinate, was strangled. No other deaths and no riots ensued, and the next day the queen, Rabôdo, was proclaimed as a constitutional sovereign, ruling in connection with the body of nobles and the heads of the people. The new queen was called to the throne as Rasoherina. The constitutional provisions were few and simple, but very effective. These are samples: 1. "The sovereign shall not drink spirituous liquors." 2. "Perfect freedom and protection is guaranteed to all foreigners who are obedient to the laws of the country." 3. "Friendly relations are to be maintained with all other nations." 4. "Protection and liberty to worship, teach, and promote Christianity are secured to the native Christians as well as to foreigners." 5. "The sovereign or any other person may not sell to foreigners any lands, or mines, or waterfalls." This last was the revival of an old law.

Queen Rasoherina was not a Christian, but an idolater; but she was a woman of good sense and integrity, and she carried out, in perfect good faith, the agreement she had made, and even added many favors to the Christians. She had difficulties at first with the Sâkalâvas and some of the other tribes, who would not believe that Radama II. was dead; later she had troubles with Lambert, who insisted on his concession, and threatened to cause the French squadron to bombard Tamatave unless it was yielded. He was finally quieted by the payment of \$240,000 by the Hova government. She was also greatly annoyed by the Jesuit priests, who were really French spies. They demanded sites for churches, and the recognition of their schools, and were given to intruding into the palace, and administering their ritual and rites, without asking anybody's permission. They claimed to have crowned Radama II., and when Queen Rasoherina was dying, and had been for many hours unconscious, to have administered extreme unction and ushered her, all unknown to herself, into heaven as a devout Catholic queen. She found it necessary to depose her first prime-minister for intemperance, and replaced him by his brother, Rainilaiarivony, who became later distinguished as the ablest of Oriental statesmen.

But in all her relations with the missionaries and Christians she was a good and just ruler, and during her reign the churches prospered, and the mission work went on very satisfactorily. From 1864 to 1866, the Society for the Propagation of the Gospel had planted some missions at Tamatave and at Foulé Point, but owing to the climate did not for some time meet with great success, and after the withdrawal of the Church Missionary Society from the coast in 1874 they transferred their headquarters to the capital, though still maintaining a mission at Tamatave and its vicinity, and going forward with the work in Betsileo. They now have a bishop at the capital. The Church Missionary Society, after many misfortunes, established a mission at Andevoranto, 70 miles south of Tamatave, and in 1868 extended their labors into the Betsileo province.

Their missions in Madagascar were transferred to the S. P. G. in 1874. There are more than 10,000 adherents in these combined missions, and 112 native preachers and teachers. The Society of Friends, both of England and America, established schools and labored zealously with the missionaries of the Loudon Missionary Society from 1867, and soon established a printing establishment. They have many schools, and are doing a great and good work. The Norwegian Missionary Society commenced their labors in 1867 at Bitâfo, in North Betsileo. Their work here has been productive of excellent results. They had in 1888 23 stations, including several among the Sâkalâva of the west coast, established in 1874, but not very successful; and three established in 1888 among the Tanâla and Anôsy of the southeast coast, which are promising. They have more than 20,000 adherents, and 304 schools with nearly 33,000 scholars.

The last days of Queen Rasoherina were darkened by a conspiracy and insurrection, headed by the ex-prime-minister, Rainivonina-hitriani-ony, to place a young Christian king on the throne, with himself as his prime-minister. The scheme failed signally, and the conspirators were arrested and put in irons. Queen Rasoherina died April 1st, 1868. On the 2d of April, 1868, Ramoma, a niece or cousin of the late queen, was proclaimed Queen of Madagascar under the title of Ranavalona II. On this occasion, for the first time in the history of Madagascar, no idols were brought forth to greet the new queen as she stood before the people on the balcony of the great palace. The popular leaders of the Malagasy were shrewd enough to see that the attempted revolution after the death of Radama II. had partly failed because it had not gone far enough, and that if they would retain their position, and make Madagascar a real and permanent power among the eastern nations, the reform must go forward, and Christianity must be recognized as a real power in the state, and its government and policy must be changed with that end in view. The prime-minister, Rainilaiarivony, a man of extraordinary ability, who was at the head of this movement, was not, probably, at that time a Christian, though he had been for years a student of the Scriptures. One after another, changes were made, and it soon became understood that Madagascar was to be a Christian kingdom, and that Ranavalona II. was to be the first Christian queen of the island. On the 3d of September, 1868, the coronation (literally the *fisehoàna*, or "ceremony of showing"), the first public occasion when the sovereign showed herself to the people, took place. It was celebrated with great pomp and ceremony: the royal canopy was emblazoned with Scripture texts, and a copy of the Malagasy Scriptures, elegantly bound, was placed conspicuously by her side under the canopy, and on her return to the palace prayers were offered by one of the native pastors. The next month the queen, the prime-minister, and the household of the palace met together for Christian worship, and this practice was maintained daily during her whole reign. On the 19th of February, 1869, Ranavalona II., following the example of former queens, was married to the prime-minister, Rainilaiarivony. It was in their case a love-match; he had been converted since her accession to the throne. Two days later, after a

very careful and thorough examination, the queen and prime-minister were baptized and received into the palace church by Audriambelo, one of the most eloquent and devoted of the native pastors. It was the custom with each sovereign of Madagascar to erect at the beginning of the reign some stately building, usually a palace, in the royal enclosure. Queen Ranavalona II. commenced the erection of a stone church in the palace enclosure in July, 1869.

The idol-keepers and the idol-worshippers of Imerina saw that the power would soon pass out of their hands, and they were enraged. Their anger was increased by the notice given them that they were degraded from their rank as nobles, and would be compelled henceforth to render the *fanampoina* or forced government service. The principal idol-keepers came to the palace and demanded that the queen should return to the worship of her ancestors: when this was refused, they declared that the idol had medicine that killed. The language was treasonable, and after a hasty consultation a deputation of the chief officers of the government was sent to Ambôhimambôla, the place where the national idols were kept, to burn them; the queen replying meanwhile to the idol-keepers at the gate: "I will burn all the idols of my ancestors; but as to yours, they are your concern." They were burned on the 8th of September, 1869, in the presence of many witnesses. On the following day officers were despatched to destroy the royal idols in other parts of the country; the people followed the example of the queen, though with many apprehensions of evil and disaster, and the greater part of the idols were destroyed.

In a few days requests came from all parts of the island: "You have destroyed our gods, and we know not how to worship according to the new religion; send us teachers." So many requests of this sort came to the prime-minister that he called the missionaries together, and after deliberation 126 teachers were sent out, all selected by the missionaries of the London Missionary Society; the government released them from the forced government service, and the mission guaranteed their support.

Thus was the final blow struck which insured the supremacy of Christianity in the island of Madagascar. Fifty years before, they were in the darkest depths of heathenism; forty years before, there was not a native Christian among the millions of the Malagasy; now, there were probably 50,000 communicants, 150,000 adherents, many thousand scholars in the schools, and a population of at least 1,500,000 asking for Christian instruction. On the borders, among the Sakalava, the Bâra, the Betanimena, the Betsimisaraka, and many of the smaller tribes, and even among the Betsileo and Antsihanaka, darkness yet reigned, and idolatry, though waning, was yet rife; but the time was not far off when they too would abandon their idols and come to the light. During her whole administration of fifteen years this wise Christian queen sought to do that which would please God, and make her people an intelligent, civilized Christian nation. She had many difficulties to encounter, and serious obstacles to surmount. The coast tribes, numbering at least two thirds of the whole population, were still savages and idolaters of the worst sort, liars, thieves, bloodthirsty, and lustful; they persisted in making raids for plunder and

slaves, until the queen's firm and gentle management made them ashamed. As soon as possible she sent missionaries and teachers among them. Even of her own Hova and Betsileo, nearly 2,500,000 in number, only 150,000 were nominally Christians; and the rest, though their idols were burned, were liable to lapse into idolatry again if they had a determined leader. Their tendencies in this direction must be overcome.

The French, under the influence of Lambert and the Jesuits, continually harassed the queen by their demands and intrigues to gain possession of the island, expel the Protestants, and establish the Roman Catholic Church there. At one time they demanded indemnity for a pretended loss; at another they required an unconditional surrender, giving her eight days to comply with their ultimata, the alternative being the bombardment of all her ports. After six or seven years of such conduct the queen was driven into a defensive war with the French nation, and through the two years of life which remained to her she carried it on with a dignity and patriotism which commanded the admiration of other nations.

While thus resisting evil from without, she carried forward reforms and measures of Christian civilization within her own realm, which transformed the Malagasy, in those fifteen years, into an enlightened Christian nation, worthy to take its place among the nations of Christendom. She established schools everywhere, drawing upon the London Missionary Society and its native pastors and teachers for the men for the work; made attendance upon the schools compulsory; established and promoted normal schools, high-schools, and aided the theological schools; built many churches, and aided in the building of others; fully organized the government in ten bureaux, all subordinate to the prime-minister; promoted agriculture and commerce; established schools of training and drill for the army; codified, revised, and enlarged the laws; abolished forever the *tangena* ordeal, and established a judiciary system with trials by jury; organized a constabulary force, the officers of which had also the powers of justices of the peace, and were drawn from the best of the petty officers of the army and the most intelligent graduates of the schools. Above all her other acts of patriotism were those relating to slavery. She, by severe edicts, prohibited the importation or sale of any slaves in Madagascar; and finding these edicts evaded, she ordered that every Mozambique (as the slaves from the east coast of Africa were called) should be set free, and be at liberty to return to Africa or remain on the island. As there were about 150,000 of these, the cost of this liberation was borne by her husband and herself from their own private fortunes. They had previously emancipated all their own personal slaves. This heavy sacrifice was made for the good of her country, and to please God. This royal example was followed by a number of nobles of the highest rank. In all these reforms her husband, the prime-minister, went hand in hand with her, and many of them could not have been accomplished without his powerful influence. In several of them, especially those relating to the schools, the Jesuits and nuns prompted the people to disobey the new laws, telling them that they would make it all right. The queen, while promoting these

reforms, was tenacious on one point. There are no roads or highways on the island, except in the large cities; the whole internal commerce of the island is conducted through bridle-paths, and all burdens are transported either on the shoulders of men, or the backs of animals—generally mules. The French ridiculed the queen and the Malagasy government for this condition of things, insisting that it was absurd to call any people even half-civilized who had no roads. But the queen was firm. There were inconveniences, she acknowledged, in not having roads; but situated as they were, with a wily enemy ready to take advantage of them, their marshes, forests, mountains, and bridle-paths were their defences and safeguards. And so it proved in the war which followed.

When the French commissioner and admiral made their last demands upon the queen, she received their threatening messages, and replied quietly that she could not yield to their demands; and then, like Hezekiah, she laid their letters before the Lord. She knew that He was mighty to save, and she trusted Him fully. She then sent an embassy to England, France, Germany, and the United States, pleading with France not to do this great wrong, and with the other nations to intervene and prevent it. Her ambassadors were treated by the French Government with contempt and gross insults; by the other nations with civility and some expressions of sympathy, but no active measures of intervention. France was too near and too strong, Madagascar was too far away and too weak. Our own government, which had the largest commerce at stake, was pitifully apathetic. The queen immediately took measures to arm and increase her military force, to have them instructed in military tactics; and calling her people together in a grand kabary, or assembly, she laid before the assembled myriads the demands of the French, and her reply, and all that she had done, and asked them to say if she had done rightly. Her whole speech was quiet, just, and Christian, but determined. She could not manifest a hostile or bitter spirit, but she must defend and protect the land God had given to her fathers, and she did this, trusting only in God, who had made her the sovereign of this people. He was her God and their God. Would they trust in Him, and when they went to the battle, marching side by side with their queen, would they contend valiantly for their country? The whole assembly (over 100,000, it is said) were ready to lay down their lives for their queen, and begged for the privilege of fighting in her behalf. The bombardment of Mojanga, Tamatave, Foulé Point, etc., by the French, without a formal declaration of war, and after giving the inhabitants only an hour's notice, made it necessary for the Queen to send away the French missionaries, teachers, and residents of the capital. They were about 90 in number, and the greater part of them had been actively engaged as spies of the French Government, conveying to the French commissioner everything they could pick up, whether true or false, in regard to the queen's movements. It was evident that they must go at once, and the government officers were urgent to send them off *sans ceremonie*; but the queen said: "No! they sent our people away from Mojanga at an hour's notice, and with the loss of all their effects; we will give them five days (from May 25th to May 30th), to pack up

their goods." The Jesuits proposed to walk and carry their goods, intending to pose as martyrs, but the queen, from her own private purse, furnished an ample supply of bearers and provisions, and as the way was long and dangerous (about 200 miles), she detailed an escort of Christian soldiers to protect them. Such was her understanding of the law of Christ. It hardly seems possible, but the records of the French commissioner show, that these Jesuit missionaries made bitter complaint of the manner in which they had been treated by the queen, alleged that they had been robbed by the escort, and put in a claim against the Malagasy Government for \$50,000 (which they subsequently increased to \$250,000, as a part of the indemnity in 1885-86) for the losses they had sustained. And these Jesuit missionaries immediately after the war came back and demanded their schools and privileges!

The queen's health had been failing for some months, and she herself knew that death was approaching. She had been, during all these fifteen years, a most devoted Christian. Whatever might be the cares of state, she would spend two or three hours of every day in reading the Scriptures and in communion with God. She took no important step without asking counsel of the Most High. As she approached death, her faith and trust never faltered. She declared that she should die fully trusting in Jesus Christ as her Saviour. After joining in the evening prayers, she summoned the prime minister, her husband, and her niece who was to be her successor, to her side, and assuring them that she felt no anxiety for her beloved country, charged them to remember that her kingdom was resting upon God, and that they were to continue as before in all matters of religion. She begged them to remember that not one foot of her land was to be given to the French. Having thus given her testimony, she fell asleep. By her own request she was buried quickly and without unnecessary pomp or display, in order that no interruption should occur in the preparations for resisting the French.

The death of Ranaivalona II. took place in the early morning of July 13th, 1883, and the accession of her niece, Razafindrahety, as Ranaivalona III. was announced on the evening of the same day. She was about twenty years of age, a widow and childless. She was a graduate of the Friend's Foreign Mission Association School, and of the London Missionary Society's Girls' High School at Ambodin-Andohalo, near the capital. She was well educated and an active Christian.

The war went on, the French as boastful and insolent as ever; but the fever and the excesses of the men caused from 50 to 60 per cent of the force to be on the sick-list all the time, and brought the death-rate up to 40 per cent, while the expenditure was enormous. With all their boasting, they had never been able to penetrate into the island farther than the guns of their warships could protect their men, and every attempt to extend their lines, for even eight or ten miles inland, was followed by a swift and bloody repulse.

On the other hand, the Malagasy were not losing ground, and their expenditures, though large, did not seriously impoverish them; their loss of men on the field was small; it was greater from fever, especially in the lowland camps; but they were learning the art of war very

rapidly under the instruction of able and experienced English and American officers. The sick had excellent nursing in their camps from the nurses of the Geneva Red Cross Association, a branch of which Ranavalona II. had established. They could go on with the war for years, if necessary, and make the condition of the French forces constantly more untenable. They were fast becoming as formidable a military force as the Sepoys of India. There was no moral or religious deterioration of either the army or the people, during the four years of the war. In all modern history, even among Cromwell's Ironsides, no such statement could be made with truth; but under the wise management of the Christian leaders of the Hovas, it was not difficult to maintain this high moral and religious standard. The soldiers were massed in large camps at the strategic points, and their families were encamped with them. Intoxicating drinks were rigidly prohibited. No camp-followers of either sex were permitted. The Christian soldiers and their families were organized into churches (of which there were twenty in some of the largest camps), each with its native pastor, who was usually himself an officer or soldier. They had regularly two services on the Sabbath and frequent prayer and praise meetings during the week. The Sunday and day schools were kept up in all the camps, and the soldiers, when called into action, marched singing hymns.

The queen and the venerable prime-minister did much to keep up the faith and courage of the people. Every few months, kabarys were held on the great plain, usually attended by 100,000 or more, at which the situation was rehearsed, and the queen and prime-minister expressed their complete trust in God, and their fervent love for their country. The responses of the people were always thoroughly loyal and hearty. On one occasion, when the skies were darkest and the people anxious, the queen requested the prime-minister to voice the nation's petitions to God for deliverance. It was an impressive scene! The venerable man, standing upon the "Sacred Stone," with bared head, gave utterance to their petitions in a prayer, humble, earnest, and fervent, and which showed that he was accustomed to commune with God, while from myriads of hearts and lips in the great congregation went up the deep and hearty *Ameus* like the voice of many waters. Not only in these great assemblies were prayers for God's blessing and deliverance offered. Mr. H. E. Clark, a missionary of the Friends F. Mission Association, was in the Highland provinces of Madagascar during the whole of the war. At the London Missionary Conference in 1888, he said: "In the time of the war the central provinces (Imerina and Betsileo) may be said to have been almost one large prayer-meeting. . . . I have seen a young man kneel down in his pulpit, and I have heard him pray, with tears running down his cheeks, that God would be pleased to take the French soldiers back again safe and sound to their wives and children in France. I do not mean to say that they did not pray that God would help them to conquer the French; but they did also, in some degree, carry out the words of the Saviour when He commanded them 'to love their enemies.'" Mr. Clark said further, that it was during the years of the war that the Sunday-school movement in Antananarivo took firm hold upon the

people; and that now, in the capital, it has become almost as much an institution as it is in London, and that the Home Missionary Society established by the native churches increased in strength so much during the war that they were constantly sending out missionaries to the heathen tribes who were employed by the French to make war upon them. The church of God, all the missionaries say, is every way stronger and more robust in its spiritual life than before the war. God did hear these fervent and earnest prayers of the Malagasy churches and of Christian people in other lands, and He sent deliverance.

The time had come when the French Government found themselves compelled to give up the conflict, and withdraw from it on the best terms they could. The Madagascar question had already aided in overthrowing two cabinets. The expenditures in men and means had been enormous—over 100,000,000 francs and about 12,000 of their best troops, and they had gained neither lauds, goods, nor reputation. Their allies, as they called the savage *Sakalavas*, were cowardly, indolent, and thievish; they would not fight the Hovas, but in midnight raids would steal cattle and slaves, keeping the former for their own use and selling the latter to the Arabs. On an average, 6,000 French soldiers were sent out annually, but they had never been able to bring 1,200 effective men into the field at any one time. They held no cities, for they could not capture any; and the reputation they had acquired by their cruelties and barbarities during the war, was so unsavory that they could no longer endure it. The Society of Friends in England, America, and France, and all Protestants everywhere, were making vigorous demonstrations against it, and the English and Italian governments were offering to mediate. So, though the French consul, commissioner, and admiral were blustering more loudly than ever, and threatening to capture the island, to loot the capital, and to carry off the queen to France as a prisoner, the French war minister put an end to their vamping, recalled them in disgrace, sent a special commissioner to Madagascar, and ordered him to negotiate a peace.

The terms offered were hard and unjust, and ought not to have been sanctioned by England or the United States; yet France was by far the greatest loser, as she deserved to be. They were: The cession of the harbor of San Diego Suarez and a moderate amount of territory around it (the harbor is good, but the territory ceded is barren, and very sparsely inhabited); the payment by the Malagasy Government of an indemnity of 10,000,000 francs (\$2,000,000); and the concession to France of the complete control of all the foreign affairs of the kingdom. The internal management of the nation's affairs was to be in the hands of the Malagasy Government, but a French minister resident was to reside at the capital, with a staff and military escort, and no transaction with any foreign government was to be permitted without his approval. The Catholic churches and schools were to be placed on the same footing as the Protestant churches and schools. The French professed great solicitude for their ancient allies and protégés, the *Sakalavas*, and requested that the queen's government would treat them with the greatest benevolence, and not subject them to any of those tortures or punishments which they had been in the

habit of practising on these tribes. Base and false as this insinuation was in every respect, the queen passed it over in silence, ordered the treaty signed, and awaited the result. The French forces left the island, rejoiced to get away; but they made no provision for the payment or care of the Sâkalâvas, who had, according to their capacity, served them faithfully, but left them on the lowlands of the coast to die of their wounds, of the fever, or of starvation. The queen, learning their condition, at once sent supplies, physicians, and nurses of the Red Cross Association, and even visited some of their camps in person to minister to their needs. Though her enemies, they were sick and in distress, and she visited and cared for them. It is safe to say that during the lifetime of the present queen these northern and western Sâkalâvas will never be hostile to her.

The Malagasy Government has complied with the provisions of the treaty in good faith, and accepted the situation. They have paid the indemnity, and the Jesuit priests and nuns in charge of the churches and schools, though not welcome, are tolerated. What the future may have in store remains to be seen. Meantime the close of the war in the early part of 1886 brought new duties to the Christians of Madagascar. New missions to the Sâkalâvas, the Bara, the Anôsy, and the Antsihânaka have been undertaken, and some of the ablest of the young Hova preachers have volunteered to go and preach to them the way of salvation. There have been extensive revivals in several of these missions as well as in the capital, and in the principal towns of Imerina and Betsileo.

It is the testimony of the missionaries as well as of those Christian visitors who have been there, that the churches have since the war manifested a higher type of Christianity than before. They are more zealous after a holy life, more anxious to bring souls to Christ and to convert the heathen, more hearty in their determination to support not only their pastors and churches, but missionary operations on their own island and elsewhere.

Of course, among so many converts from heathenism in less than sixty years there will be some who will fall away. Temptations to intemperance, to licentiousness, to theft and falsehood, surround them, and some of the professed converts are not strong enough to resist. It has been so in all the Christian ages. The Apostolic churches suffered largely from such apostasies; so did the mediæval churches; so do the churches in Japan, in Burma, in Siam, and in India. A rigid discipline is maintained in all these missions, but we are inclined to believe that the defections in India and in Japan are quite as large in proportion to the membership of the churches as in Madagascar. The influence of a pure and holy example, and great activity in Christian work, will do much to prevent the weak from falling into sin; and these safeguards they have in the lives of their pastors, teachers, and superintendents and rulers. No more saintly woman has occupied any throne in modern times than Ranaivalona II., and her successor seems to be imbued with the same spirit.

Intelligence has come within the past year that at the ports of the island, particularly on the west and northwest coasts, intemperance and licentiousness prevail to a fearful extent, and that the slave-trade has been renewed at

some of those ports with the Arab traders, and that the French colony of Réunion (Isle Bourbon) is now, as in the time of Ranaivalona I., profiting by it. We fear that these reports are partially true; but though they are very sad, they do not reflect upon the government of Ranaivalona III., nor should they be quoted against it. The ports and foreign commerce of Madagascar are, by the treaty, wholly under the control of the French resident. No vessels can trade at those ports without a permit from him; and if the slave-trade is reopened there, it is by his permission or connivance, and for the benefit of the French colonies of Réunion, Nôsy-Bé, etc. He knows what sacrifices the present queen and her predecessors have made to extinguish the slave-trade, and that the queen is hostile to it in heart and soul; but both the Arabs and the Creoles of Réunion are thoroughly wicked and unscrupulous. As to the depravity at the ports, the French soldiers and sailors, and the Arab, Portuguese, and other sailors, at any ports where there is free license, and among such a class as the heathen women of those ports, will reach depths of depravity which would make even the denizens of the pit of destruction recoil with horror.

The apprehensions of the missionary friends of Madagascar in regard to the results of French interference with its church and educational work have been unhappily verified within the year 1890. Though France is not now professedly a Catholic state, and two of its recent premiers have been Protestants, yet in its intercourse with foreign nations in Asia and Africa Jesuits have always been its representatives, and they have always wielded the whole power of the French Government for the prosecution of their often nefarious schemes. They have, since 1886, determined to capture the schools and the educational institutions of the capital, Antananarivo, although they knew that the queen and prime minister were decided Protestants. They grew more and more aggressive, till in the autumn of 1890 their action became so treasonable that the prime minister arrested them and broke up their establishment. They at once appealed to the French Resident, with what result has not yet transpired, though it can hardly be doubted that he would insist upon their reinstatement and upon other concessions, and this may lead to another war.

For the summarization of the mission work in Madagascar, we refer to the statistical tables and the notes appended to them. The provinces of Imerina and Betsileo are Christianized, and there are Christian churches among a vast mass of heathenism in the other provinces, but the rulers and government are Christian.

**Madampitiya**, a station of the Wesleyan Methodist Missionary Society in the Colombo district, South Ceylon, with 2 chapels, 1 preaching-place, 1 native assistant, 6 day-schools, 65 church-members, and a congregation of 150.

**Madanapalli**, a town in Cuddapah district, Madras, South India, 154 miles northwest of Madras City. Climate hot, 60°-110° F. Population of city and circuit, 550,000, Brahmîns, Dravidians, Hindus, Moslems. Languages, Telugu, Hindustani, Kanarese, Marathi, Tamil. Natives of higher classes comfortably off; lower, very poor; education at a low ebb. Mission station Reformed Church in America (1863); 2 ordained missionaries, 1 missionary's

wife, 1 other lady, 45 native helpers, 13 out-stations, 1 church, 128 church-members, 18 schools, 589 scholars.

**Madhepur** (Madhupur), a town in Bengal, East India, 25 miles east of Darbhanga. Admirably situated for trade with all parts of Tirhút and Purniah, it will probably become an important commercial town. Population, 5,054, Hindus and Moslems. Station of the Wesleyan Methodist Missionary Society; 1 native assistant, 5 Christians, 1 school, 14 pupils.

**Madjalengka**, settlement on the north coast of Java, west of Cheribon. Mission station of the Dutch Missionary Society.

**Madras**, a city of British India, capital of the Madras presidency (see next article), and the third city in size and importance in all India, being outranked only by Bombay and Calcutta; situated in north latitude  $13^{\circ} 4'$  and east longitude  $80^{\circ} 17'$ , on the east coast of the peninsula of India. Population (1881), 405,848. The first settlement was begun in 1639, when a grant of land was obtained by Mr. Francis Day, a servant of the East India Company, from the Hindu prince who possessed jurisdiction in that region. A factory (as it was then the custom to term the headquarters of the Company's mercantile establishments in India) and slight fortifications were at once erected, and the city of Madras was begun. The origin of the name is exceedingly uncertain. The word "Madrissa" signifies a Mohammedan school, and some scholars consider the name of the city to have been derived from that. In 1653 Madras was made the seat of the local government or presidency of the East India Company's territory in South India. In 1746, during the time when the French power in South India threatened to eclipse the English, it was taken by the French commander La Bourdonnais, but was restored two years later by the treaty of Aix-la-Chapelle. Within a century of the first settlement Madras had become the largest city in South India. Its growth since then has been great, though far less than that either of Calcutta or Bombay; but its natural advantages are far less than those enjoyed by its sister cities. It has no harbor; vessels are obliged to lie off at a distance of a mile, more or less, from the shore; and until very recently all freight and passengers have been transported back and forth between the shore and the ships in surf-boats, for skilful management of which, through the surf which breaks unceasingly on the beach, the boatmen of Madras are famed. In 1862 a pier was constructed, which extends out 300 yards into the sea; and more recently still the construction was undertaken of an artificial harbor, consisting of two parallel breakwaters curving towards each other at the outer end. The city is by no means compact, but stretches along the shore of the Bay of Bengal for more than 9 miles, and its territory extends 3 miles inland. Of the population more than three fourths are Hindus. The Mohammedans number only one eighth—a little over 50,000, Christians nearly 40,000, 3,205 Europeans, 12,659 Eurasians (half-castes of mixed European and Indian descent). Tamil is spoken by more than half of the entire population; Telugu by a little less than a quarter.

**MISSION WORK.**—Danish missionaries had been operating at Tranquebar and other points

south of Madras for a number of years early in the last century before any form of Christian work was attempted in Madras itself. In the year 1716, with the help of the English chaplain at Madras, they commenced a Christian school in that city, which however languished, and soon ceased altogether. In 1726 Schultze, one of the missionaries at Tranquebar, made a journey to Madras, began the school work again, and laid the foundations of the first Protestant mission in the capital of South India. A few years afterwards the Society for Propagation of Christian Knowledge, of England, undertook its support, though Schultze continued in charge of it. The missionary labored hard, preaching, teaching, translating, and writing. Results were not slow in appearing. In the one year 1729 Schultze baptized 140 persons; by the end of 1736 the converts numbered 415. The mission was encouraged by the Madras government. Other missionaries arrived from Europe, and the work went on apace. In 1746 the capture of the city by the French was the occasion of much distress to the mission; its work was interrupted, its buildings destroyed, and its church used by the French conquerors as a magazine. In 1748, when the city was returned to the English, the missionaries and Christians who had fled during the troubles came back, and operations were resumed—still under the fostering care of the government. By the end of the last century some 4,000 persons had been received into the Christian church. With all this apparent success it may be doubted if the real achievements were very great. These numerical results were not carried over into the present century; on the other hand, when the first converts died off there seemed to be no vital Christianity behind them as a basis for further progress. With all their devotion and industry the earlier missionaries did not have the best methods of labor, and the churches which they founded lacked accordingly that sound and efficient vitality which would have ensured their permanence.

With the beginning of this century began the new era of missionary work in Madras and throughout all India. Of the great missionary societies which were formed near the year 1800 the London Missionary Society was first on the ground at Madras in 1805. Their collegiate institution was begun in 1852, and has had a most successful and useful career. The mission has also maintained a girls' boarding school. The Church Missionary Society began work in 1815. From the first this mission paid much attention to education as well as to preaching, and schools for both sexes were carried on with vigor. The Wesleyans came in 1816. About the year 1826—just 100 years after its establishment by Schultze—the original mission of the Christian Knowledge Society was transferred to the care of the Society for the Propagation of the Gospel. The American Board entered the field in 1836, but withdrew in 1864 in order to concentrate its strength more effectively on other stations. During its existence great attention had been devoted by it to the work of translating and publishing. The Leipzig Lutheran Society entered Madras in 1848. The Established Church of Scotland began a mission in 1837, and devoted its energies, as in Calcutta and Bombay, especially to the higher education, through the medium of the English language. The fervid eloquence of Dr. Duff of Calcutta

during his first visit home is said to have been the exciting cause of the beginning of the Madras work. The Scotch institution was begun in 1837 with 59 pupils, but had 277 on its rolls before the end of the following year. After the disruption of the Scotch Church the Madras missionaries sided with the Free Church; so that in 1843 another mission of a similar character was begun by the Old Kirk, and since then the two have worked on harmoniously and successfully side by side. The Free Church has also had much success among high-caste women in Madras, and girls' schools have prospered greatly under their care. The Strict Baptists have a small mission in Madras, begun in 1866, and the Danish Lutherans another dating from 1878. The Christian Vernacular Education Society has here its central station, though its three schools for the training of vernacular teachers are in other parts of India. Zenana mission work is conducted, not only by the ladies connected with the societies just mentioned and by their women's auxiliaries, but also by other ladies connected with the Female Normal School Society. There is also a mission especially for lepers, over 400 of whom were reported in the census of 1881. The usual missionary agencies are reinforced by the Bible and Tract Societies and by the Society for the Propagation of Christian Knowledge—the venerable organization which so long supported the mission started by Schultze, but which now works wholly through the press. The American Methodists, under the lead of Rev. Wm. Taylor, began work in 1872, at first directing their efforts especially to unevangelized Europeans and Eurasians, though not neglecting persons of other races who might be brought under their influence.

Besides the mission chapels the city is well provided with Protestant churches for the accommodation of Europeans, and with Roman Catholic churches for persons of all nationalities who adhere to that form of Christianity. The usual institutions of a philanthropic or literary character which spring up everywhere in the path of enlightened and liberal government, such as hospitals, libraries, and the like, are not wanting in Madras. Education is in a fair state of progress. In 1881 over 24 per cent of the city's population were able to read and write or were under instruction. This was a gain during the preceding ten years of 6 per cent. In 1882-3 there were in operation 5 colleges, also 3 others for professional training, an art school, and a medical college. There were 14 English high-schools as well as many of lower grade; there were 54 high-schools for girls. There were several normal and special institutions. In all, 495 institutions were in that year teaching 26,234 pupils. Missionary institutions are included in these statistics.

*Missionary Societies* at present at work in the city: American Baptist Missionary Union; 4 missionaries and wives, 2 female missionaries, 6 native preachers, 2 self-supporting churches, 107 church-members, 200 Sabbath-scholars. Methodist Episcopal Church (North), U. S. A.; 3 missionaries (2 married), 1 female missionary, 138 church-members, 827 Sabbath-scholars. London Missionary Society; 2 missionaries and wives, 4 female missionaries, 8 native preachers, 206 church-members, 153 Sabbath-scholars. Society for the Propagation of the Gospel (the Society's report gives the individual

congregations in Madras separately, but in such a way that it is impossible to give the sum of all). Strict Baptist Mission (England); 2 workers, 20 church-members, 25 scholars. Wesleyan Missionary Society (England); 8 missionaries and wives, 5 catechists, 524 church-members, 1,459 scholars. Established Church of Scotland; 2 missionaries and wives, 2 lay teachers, 4 female missionaries, 4 native preachers, 104 communicants, 608 scholars. Free Church of Scotland; 10 missionaries, 2 female missionaries, 3 medical missionaries, 358 communicants, 6,376 scholars. Evangelical Lutheran Society of Leipsic; 2 native preachers, 553 communicants, 533 scholars.

**Madras Presidency** is one of the general divisions into which British India is divided. It is ruled by a governor and council appointed by the crown, subject to the supervision of the governor-general and viceroy of India. This presidency covers the southern portion of the Indian peninsula—with the exception of the territory still under native princes. Its eastern boundary is the Bay of Bengal; its western, the Indian Ocean. But the territory of the presidency extends along the coast of the former for some 1,200 miles, while its western shore-line, along the Indian Ocean, extends only 540 miles. On the north and northwest it joins (proceeding from east to west) Orissa, a part of the Bengal presidency; then the Central Provinces; then the dominions of the Nizam of Hyderabad; and finally, as its boundary-line nears the Indian Ocean, the presidency of Bombay. Near the centre of this irregular triangular territory is the great native state of Mysore, including five smaller native states which are very closely related to the Madras government, and directly subordinated to it. The total area of the presidency is 149,092 square miles, and the population 34,172,067 souls. The presidency may be divided, as to its physical aspects, into three well-marked areas. Along the eastern coast, between the range of hills known as the Eastern Ghats and the sea, is a broad strip of low country. A similar, though narrower and more diversified, strip of land extends along the western coast, between the Western Ghats and the Indian Ocean. The interior consists of a tableland, supported on its western edge by the Western Ghats, and sloping down gradually towards the Bay of Bengal on the east, its boundary on that side being the eastern range just alluded to. Much of the high interior is occupied by the native state of Mysore. The mountains rise to greater heights as they go south: the highest peaks of Southern India are those of the Nilgiri and Anumalai groups, several of which are between eight and nine thousand feet high. Just south of the Anumalais, the group known as the Palanis rise to a height of nearly 8,000 feet. Three large rivers, with a number of tributary and minor streams, traverse the presidency from west to east, having their sources in the Western Ghats, and discharging their waters through deltas into the Bay of Bengal. These are the Godavari, the Krishna, and the Caveri. Each of them has a number of affluents, some of which are of considerable size. The only rivers on the west are the small and short streams which can crowd their short course into the narrow strip of land between the foot of the western range and the sea. Neither of the larger rivers is navigable to any extent; all are

impetuous torrents during the rains, but dwindle away greatly in volume during the hot months. Their waters, however, diverted by dams and weirs into canals, are useful for irrigation. The surface of the agricultural districts is dotted with tanks and reservoirs of greater or less extent, some being immense artificial lakes, others covering but a few acres, wherein the water is stored during the rains, and in the dry season distributed to the fields by ingenious systems of canals and ducts. Many of these reservoirs were constructed by Hindu governments ages ago; some have fallen into disrepair, and others are kept up and still serve their fertilizing purpose. Recently the government has paid much attention to the matter of irrigation, and some great canal systems have been devised and perfected by government during the past forty or fifty years. Rice in some districts is the staple food; and elsewhere, where rice cannot be grown, other cheap grains are eaten. Tea and coffee are cultivated successfully in several of the mountainous districts. Cocoanuts grow plentifully along the western coast, and the mountains are often covered with dense growth of timber, some of it valuable. Pepper is grown on the hills at the south. On the whole, however, the presidency can hardly be considered favorable for the agriculturist, although the larger part of the people depend upon agriculture for their maintenance. But it is in many places only moderately fertile; over much of the presidency the rainfall is deficient and irregular, and sometimes irrigation is difficult or impossible. The average density of the population—221 per square mile, as opposed to 443 in Bengal and 416 in the Northwest Provinces—indicates with tolerable clearness the smaller power of the soil in the southern presidency as compared with the fertile richness of the Ganges valley.

The population is chiefly Hindu; over 91 per cent were thus classified in the census of 1881; Mohammedans claim only a trifle over 6 per cent. Christians numbered in that year 711,072—nearly 2½ per cent. About 25,000 reported themselves as Jains, and the unclassified number was exceedingly small. Probably most of the aboriginal tribes were classed among the Hindus.

The Hindus of this presidency, and some of the so-called aboriginal tribes also, belong to the Dravidian family, of which the strongest subdivision is that now known as the Tamil. People of this race appear, in prehistoric times, to have occupied the Gangetic valley, and to have been pushed south by the invading Aryans as they moved down the valley and spread over the peninsula. Portions of the Dravidic population declined to accept the lordship of these Aryan invaders, and, retiring to mountain and jungle tracts, gave rise to some of the aboriginal tribes still found in Central India, of which the Khonds and the Gonds are the most important, though two smaller tribes are still found occupying land within the limits of the Bengal presidency, one of them in the very centre of the valley (the Oraons and the Rajmahals); but for the most part the Dravidians were absorbed into the social system of their conquerors, were fused with them into Hinduism, and furnished the main stock of the population of Southern India. The language of the Dravidians still exists, though differentiated into the distinct modern tongues of South

India, viz.: the Tamil (most important) spoken by over 12,000,000 in the presidency; the Telugu, used by almost as large a number; the Kanarese, spoken by about 1,300,000; the Tulu (preserved only by a remnant of the people among the mountains in the west of the presidency, and doomed doubtless to disappear as a spoken language); the Coorg (see that article) and the Malayalam (2,400,000). The languages of the aboriginal tribes above mentioned are also Dravidian. The original religion of the Dravidians, before the coming of the Aryans, was probably some form of demon-worship, such as the jungle tribes still preserve. Doubtless many of these demon-deities were admitted to the Hindu Pantheon by the Brahmans as time went on; the popular Hinduism of South India still shows many marks of this early kinship with the religious ideas of a more barbarous time, and preserves in its rites and superstitions marks of the primeval demonolatry. Though the civilization, language, and religion in South India bear profound evidence of Aryan influence, yet the fusion between the Aryan and original elements is probably less perfect here than in the north. The debt of the modern Dravidian languages to Sanskrit is not so great; the proportion of Brahmans and the other Aryan castes to the entire population is smaller (less than half as great as in the Bombay presidency); while the separation between the Brahmans and the lower castes is wider than in the north, thus showing that the union between the two classes is less complete. The number of Mohammedans also is much less here than in most parts of India: 6 per cent of the population were thus classed in 1881; while in the Bombay presidency the percentage was about 20 per cent, and throughout India as a whole it is somewhat greater even than that. The distance of the Madras presidency from the Ganges valley, where the Mohammedan empires erected their chief stronghold, accounts for this. Their power over the outlying provinces dwindled with increasing distance. The native states within the territorial limits of the presidency which were overthrown by the English and absorbed into the fabric of the present government, were mostly Hindu, and not Mohammedan.

A word must be said as to the connection of the English with the presidency. Calicut and Cranganore on the west coast were occupied by the East India Company as places of trade in 1616. The Company had been preceded, first by the Portuguese, and as their power waned, by the Dutch. But finally the former concentrated themselves at Goa, and the Dutch withdrew. On the east coast, Masulipatam, north of Madras, was occupied by the English traders in 1611. The first English settlement on the site of Madras City was in 1639 (see Madras City). The French occupied Pondicherry, south of Madras, in 1672. It was not until the middle of the 18th century, when the English and French powers were in armed rivalry in Europe, that the thought of a possible rivalry for supremacy in India began to be realized. In 1746 Madras was overpowered and captured by the French commander La Bourdonnais; but restored to the English two years later, at the peace of Aix-la-Chapelle. But the country was occupied with weak and tottering dynasties of native princes. In their contests among themselves, the English would

befriend one princeling, and the French another. The strife between the Oriental principals could not fail to extend itself to the European powers by which they were respectively seconded; and for half a century the fate of South India hung undecided between the French and English. Dupleix undertook to unite the native powers into one combination under French protection; but his plans were defeated by the military skill, first of Lord Clive, afterwards of Sir Eyre Coote. Haidar Ali, and his son Tippu Sultan, the only members of a Mohammedan dynasty which erected itself on the ruins of a Hindu principality in Mysore, withstood the progress of English power with a fierceness which at one time threatened to stop it altogether. But in 1799 Tippu Sultan died in the breach at his capital, Seringapatam, the English entered the fort in triumph, and military opposition, from whatever quarter, to the English power in South India was at an end. Since then the English Government has had hardly any use for its Madras army, save for police purposes.

To the historian of Indian Christianity the Madras Presidency is the most interesting portion of India. Tradition says that the Apostle Thomas preached the gospel here; and Mount St. Thome, near Madras, is his traditional burial-place. A branch of the Syrian Church settled on the west coast, near Cape Comorin, centuries ago, and this "Syrian Church of Malabar" still preserves its ancient liturgies, and still acknowledges subjection to the patriarch of Antioch. Here also Xavier preached and baptized in the 16th century, and the Jesuit missionaries of Madura in the 17th. And here was the beginning of the Protestant missionary movement in India, by the hands of two young Danish missionaries (Bartholomew Ziegenbalg and Henry Plutschau), in 1705. Tranquebar (on the coast south of Madras) was the first station occupied. The Society for Promoting Christian Knowledge (English) in a few years assumed support of the mission. But it was long before a distinctively English mission was founded. Schultze came in 1719, and in 1726 began the first really successful mission in Madras City. Kiernander came in 1740; but in 1746, when the French were besieging Cuddalore, where he was stationed, and rendering his operations there impossible, he removed to Calcutta, and became the father of Protestant missions in the Bengal presidency. (See Calcutta). In 1750 Christian Frederic Schwartz landed in South India, and until his death in 1798 labored uninterruptedly for the good of the people and the progress of the cause of Christ. No better or greater name adorns the history of Protestant missions in India than his. His influence as a missionary was great; his influence as a man was felt all over South India, by all classes. The Rajah of Tanjore, a Maratha principality, though far removed from the original seat of Maratha power, revered him as a father, followed his advice in the conduct of his kingdom and in his relations with the English Government and other powers around him, and finally on his death virtually constituted him guardian over his son during the latter's minority. By the labors of these great and good men and their associates congregations were gathered, schools established, and churches founded at Tranquebar, Madras, Trichinopoli, Tanjore, and other places. Converts were baptized by the

hundred and the thousand. Yet with all their excellences of character, their ability, their piety, and their zeal, these men did not plant a self-sustaining, manly, and vigorous Christianity. Their churches exist, but with diminished numbers and enfeebled strength. The Protestant Christianity of the present day, in South India, rests chiefly on foundations independently laid, not on those laid by the Danish and German laborers of the last century. The churches gathered by them have in many cases been surpassed by those more recently organized, not alone in numbers, but in aggressive character and influence. For the most part the work begun by the missionaries of the last century was subsidized by the Society for the Propagation of Christian Knowledge, which to a large extent furnished the funds, while the missionaries themselves came from Denmark and Germany. Early in the present century this Society transferred the missions to the Society for the Propagation of the Gospel, and in due time the *personnel* of the mission staff came to be recruited wholly from the English Church, even as the money came from the same source.

The introductory labors of the missionaries of the 18th century were followed by work on a larger scale, more systematically and energetically pursued, during the present century. We record here the principal agencies operating in this more recent era. The London Missionary Society leads the way. Two missionaries of this Society occupied Vizagapatam, on the east coast, far north of Madras, in 1805, during a period when the Indian Government, taught by the directors of the East India Company at home, was bitterly opposed to the entrance of missionaries into India. The missionaries at Vizagapatam, however, were not molested, and when in 1814 Parliament, in the new charter granted that year to the company, inserted a clause favoring missionary operations, and the opposition of the government ceased in consequence, the London Society was all ready to establish a station in Madras City. Bellari, northwest of Madras, near the boundary-line now separating the presidency from that of Bombay, had been occupied in 1810, and Coimbatore was occupied in 1830. The Church Missionary Society entered Madras City in 1815, and took over the Palamcottah station (in the Tinneveli district) from the Danish missionaries, who had planted it in 1785, in 1817. In the same year the Society for the Propagation of the Gospel began work at Cuddalore, and assumed, during the years 1820-29, charge, from the Society for Propagating Christian Knowledge, of most of the old Danish missions. The Wesleyan Missionary Society appeared upon the scene at Madras in 1816, and at Trichinopoli two years later. The Basle Evangelical Missionary Society began its work, which since has spread over all the western portion of the presidency, and into many of the Kanarese districts of the Bombay presidency, in 1834. The English Baptists planted a station in the Ganjam district, the most northerly of those bordering on the Bay of Bengal, in 1837. The American Board of Commissioners for Foreign Missions, whose mission among the Tamil-speaking people of Jaffna, in North Ceylon, had been begun soon after 1820, colonized thence, first to Madura in 1834, to Madras in 1836; Arcot was occupied by this Society in 1855, but its work there was a year or two

afterwards transferred to the Dutch Reformed Church (as it was then called) of the United States, by which church it has since been maintained with much vigor. The mission in Madras City was discontinued, but that in the city and district of Madura is one of the most flourishing of all the missions sustained by the American Board. The Church of Scotland came to Madras in 1837, and after the Disruption in 1843 two Scotch missions have worked there side by side, and to some extent also in the interior. The American Baptist Missionary Union began its work—now of large proportions and of extraordinary success—in Nellore, and other parts of the Telugu portion of the presidency, in 1840. The Leipsic Lutherans came in 1841 to Tranquebar and adjacent stations, where the Lutherans of the preceding century, whose places were now filled by missionaries of the English Church, had labored with such assiduity. There are also small German missions elsewhere in the presidency—that of the Hermannsburg Lutherans at Nellore, (1865), of the American German Lutherans in the Krishna district (1842), and an independent though successful German mission in the Godavari Delta, which dates from 1838. (See also Madras City.)

The chief successes of this army of Christian laborers have been won in the Tinneveli district, where the Christian churches and communities are very numerous, and where the native Christians are numbered by thousands. In the Telugu districts, also, under the charge of the American Baptists, there have been gatherings of surprising vastness and power; the American missionaries in the Arcot and Madura districts have also been very successful. Probably in no other part of India has Christianity taken so firm a hold. Elsewhere individuals have been reached and converted, but in many parts of the Madras presidency the converts have come in families, in groups, sometimes by whole villages. People of the Dravidian races seem disposed to move gregariously.

The statistics of education during the past forty years show great progress. In 1852-3 the Madras Government expended in all for educational purposes only £4,556. Beyond the indigenous schools, where the children of the upper castes—so far as they wished to learn—were taught to read and write their own vernacular and to keep accounts, by old Brahman pedagogues, and the educational operations of the missionaries, nothing was done for popular education. The present system of government education dates from 1855. In that year the Madras University was remodelled, and systematic operations begun by the government to promote the education of the people. In 1882-3 the total number of schools of all kinds in the presidency was 17,494; attendance, 446,324. These institutions were all in some way under governmental inspection; and besides these were an unknown number of indigenous and uninspected schools. The census of 1881 reported 514,872 boys and 39,104 girls under instruction, besides 1,515,061 males and 94,013 females able to read and write. In 1882-3 it was estimated that the total number of schools of all sorts, inspected and uninspected, was about 20,000, which would give only one school for every 1,550 of population—estimating the latter at 31,000,000. Between 1853 and 1883

the Madras government has spent about £1,250,000 sterling on the higher education,—how much upon all grades of educational operations is not stated. With the educational system of the presidency are connected 29 colleges; also 3 professional colleges, and over 100 high-schools, of which 16 are for girls. The extent to which the young men of the presidency are influenced by the higher education is roughly indicated by the fact that during the 10 years 1873-1883, 28,575 candidates appeared for the entrance examination of the Madras University, of whom over one third succeeded in passing. The distribution of these candidates among the several classes of population may be indicated by the figures for 1876, when of the students who matriculated at the University (1,250 in all), 59 per cent were Brahmans, 26 per cent Hindus of other castes, 1½ per cent Mohammedans, and nearly 7 per cent native Christians. The remainder were Eurasians and Europeans.

**Madura**, a city (and district, the city being the capital of the district) in the Madras presidency (British India); situated in north latitude 9° 55' and east longitude 78° 10', about 275 miles south southwest from Madras. The population of the city is 73,807, divided as follows: Hindus, 64,823; Mohammedans, 6,701; Christians, 2,281; others, 2. The language of the Hindus is Tamil, though with the progress of education the rising generation of natives is more and more familiar with English. Madura has long been the most important place in South India. It was the seat of an ancient dynasty of Hindu kings (the Pandyan), whose history stretches back into prehistoric times, and is adorned with the usual wealth of myth and legend. As the Mohammedan power stretched south in the 15th and 16th centuries this Hindu kingdom was overthrown, though no Mohammedan dynasty took its place; but on the ruins of the old state rose another Hindu dynasty,—that of the Nayaks,—which culminated in the 17th century, when most of the architectural works at Madura, which still attest the power and wealth of this line of princes, were completed. During the political chaos of the last century the Nayak kingdom in its turn crumbled. Maratha and Mohammedan armies successively overran the region, until at last the British came, and in 1801 Madura passed into their possession. The religious history of the place chiefly concerns us now. It contains one of the most famous Hindu temples—that of the goddess Minakshi—in India. The temple enclosure is 847 ft. long and 744 ft. broad, and contains, besides the shrines of the goddess and of the god Siva, a vast collection of buildings,—halls, bazaars, etc.,—occupied by the priests and temple attendants. The conspicuous features of the temple are the great towers, 9 in number, which rise above its outer walls, in one case reaching to the height of 152 feet.

The Christian history of Madura is of much interest. The famous Roman Catholic missionary Francis Xavier gathered a little church here in the 16th century. In 1606 a Jesuit mission was begun here by Robert de Nobilis, who lived as an ascetic, was renowned for his sanctity and learning, and his complete mastery of the Tamil language. Following him were men of like spirit, notably John de Britto, who suffered martyrdom in 1693, and Beschi, who pre

pared the first Tamil grammar, and whose writings are regarded as models of pure Tamil style. The native converts in the region about Madura were estimated at a million or more, won largely by the great concessions to Hinduism which the missionaries made. The number of Catholic Christians now in the district has greatly dwindled, hardly 70,000 being returned in the census of 1881.

The history of Protestant effort begins in 1834, when the place was occupied by Messrs. Todd and Hoisington, connected with the Board's Mission in Jaffna, Ceylon, which had been founded in 1816. The work of the American missionaries has been carried on vigorously and successfully ever since. In process of time they occupied most of the important towns in the district round Madura as mission stations, established schools of different grades, gathered congregations of Christian adherents, and founded churches, composed of such as gave credible evidence of piety. They have labored as preachers on their tours and in the churches, as teachers in their schools, as writers and editors through the medium of the press, as physicians through their labors in hospitals and dispensaries. They have hospitals at Madura and Dindigul, 38 miles north; a training-school for teachers and preachers, with which a collegiate department is now connected, at Pasmalai, just out of Madura; a boarding-school for girls in Madura, besides churches and schools of different grades at all the mission stations, and in many villages through the district. The latest statistics show that in the mission of which Madura is the centre there are 12 stations and 259 out-stations, 13 missionaries with their wives, 8 other American ladies, 17 ordained native preachers, 431 other native laborers, preachers and teachers, etc.; nearly 13,000 adherents, 36 churches with 3,562 members, and 4,628 in Sunday-schools, and nearly 5,500 pupils in the schools of all grades. The contributions of the native Christians for religious purposes amounted to \$6,192. These figures represent the state of the work in 1889-90.

**Madura District**, a district or collectorate in the Madras presidency, of which Madura is the capital. It covers an area of 8,401 square miles, extending from the straits separating Ceylon from the mainland on the east, to the mountains on the west (known as the Palnais) which form the boundary between British territory and the native state of Travancore. Other districts of the Madras presidency bound it on the north and south. The population is (1881) 2,168,680; 90 per cent are Hindus;  $6\frac{1}{2}$  per cent Mohammedans; 4 per cent Christians (Roman Catholic Christians number a little over 67,000). Since the census of 1871 Christians had increased nearly 20 per cent, and the Hindus have lost nearly 6 per cent.

The history of the district has been sufficiently indicated for our purposes in the article on "Madura City," where will also be found statements relative to present missionary work within the district.

**Madurantakam**, a station of the Wesleyan Methodist Missionary Society in the Madras district, India; 1 missionary, 1 assistant, 3 preaching places, 1 chapel, 26 church-members, 395 scholars.

**Mafeking**, a small English town in British

Bechuanaland, South Africa, where there are 1 missionary with 3 native assistants of the Wesleyan Methodist Missionary Society, 355 church-members, a congregation of 1,275, and 250 Sunday-school scholars.

**Mafubé**, a station of the Paris Evangelical Society (Société des Missions Évangéliques) in the Orange Free State, Africa (1883); 1 missionary, 325 church-members, and 315 pupils.

**Mágadhi Version**.—The Mágadhi is a dialect of the Behari language, differing radically from Hindi and Bengali. It is vernacular of the country-folk in the district of Patna and Gaya, Monghyr, and the greater part of Chhota Nagpur. It is spoken by probably 4,000,000 people. A version of the New Testament was made by the late Dr. Carey, and published at Serampore 1824-26. It was not reprinted. More recently portions of the Gospels were translated by the Rev. E. Start of Patna, of which the Gospel of Matthew was published by the British and Foreign Bible Society in 1867. In 1887 the same Society issued at Calcutta, at the request of Mr. Grierson, a magistrate of Gaya, the Gospel of Mark from Carey's New Testament. As there is no missionary who now knows the language, the version will be circulated tentatively among the people.

**Magalle**, a station in the South Ceylon district of the Wesleyan Methodist Missionary Society; 1 native assistant, 6 church-members, 174 pupils.

**Magdala**.—1. A station of the Moravian Brethren at a village on Pearl Key Lagoon, Mosquito Coast, Central America (1853). There were many negroes, mulattoes, and Indians in the vicinity of the station.—2. An out-station of the Moravian Brethren, worked from Bethesda among the Hlubi Kafirs in Griqualand, South Africa. Has 1 native pastor.

**Magila**, a station of the Universities Mission in Usambara, on the continent opposite Zanzibar, East Africa, founded in 1869 by Bishop Tozer. In 1882 the Moslems of the place closed their mosque and became Christians. It has 1 missionary and 4 laymen.

**Magomero**, on Lake Scherwa, East Africa. In 1861 Bishop Mackenzie, leader of the Universities Mission, on his way up the Sambesi, met a gang of slaves. He liberated them, settled them at Magomero, and began their education and conversion. But the situation was too difficult. He died in 1862, and in 1864 his successor, Bishop Tozer, moved the colony to Zanzibar. (See Mbweni.)

**Magyar**: see Hungarian.

**Mahabeleshwar**, a town in Bombay presidency, West India, 80 miles southeast of Bombay. Principal sanitarium of the presidency, and during some seasons of the year one of the most lovely spots on earth, owing to the beauty of its scenery, and the great variety and luxuriance of its foliage and flowers. Population, 3,248. Mission station A. B. C. F. M. with Satara (q.v.).

**Mahaena**, station of the Paris Evangelical Society in Tahiti; 1 native pastor, 67 church-members.

**Mahanad**, station of the Free Church of Scotland, in Bengal, India; 1 missionary, 1 native teacher, 1 colporteur.

**Mahanaim**, station of the Hermannsburg Missionary Society in South Transvaal, East South Africa; church-members, 102.

**Mahanoro**, on the east coast of Madagascar, about latitude 20° south, was occupied by the S. P. G. in 1884; 1 missionary, 1 native pastor, 1 physician.

**Mahé**, one of the Seychelles Islands, East Africa. A station of the C. M. S., which works principally by its schools among the Creole negroes.

**Mahraoli**, a town in the Lahore district, Punjab, India. A station of the S. P. G.; 3 native workers, 6 communicants.

**Mai**, a small island belonging to the middle group of the New Hebrides, Melanesia; is visited by the Melanesian Mission, and looks promising. Three entirely different languages are spoken in this island.

**Maiana**, one of the Gilbert Islands, Micronesia. Population, 1,900; 1 missionary and wife under the Hawaiian Evangelical Association; 57 church-members.

**Main**, mission station of the Free Church of Scotland, in Kafraria, Africa; 16 preaching places, 1 missionary, 9 native assistants, 377 communicants, 7 schools, 338 pupils.

**Mainpuri** (Mynpuri), station of the American Presbyterian Board (North), in the North-west Provinces, India (1843); 1 missionary and wife, 7 native assistants, 32 church-members, 260 pupils.

**Maiwo**, an island in the central group of the New Hebrides, Melanesia; was opened for the Melanesian missionaries in 1874, and has now over 70 Christians.

**Makewitta**, Ceylon, station of the Baptist Missionary Society; 2 evangelists, 58 church-members, 310 pupils.

**Makhabeng** (Makhabeng), town in North Transvaal, East South Africa, on a branch of the Limpopo River, northwest of GaMatlale. Mission station of Berlin Evangelical Lutheran Society (1868); 1 missionary, 3 native helpers, 190 church-members.

**Makhaleh**, station of the United Presbyterian Church of U. S. A. (1869), in the province of Assiout, Egypt.

**Makodweni**, town in East Central Africa, near the coast, 16 miles west of Mongwe. Mission station of A. B. C. F. M.; 1 missionary and wife.

**Mala**, a town in Southeast Lapland, south-east of Sorsele and north of Lucksele. Station of the Friends of the Mission to the Lapps, Sweden.

**Malacca**, a portion of the Straits Settlements of Great Britain, lying along the western coast of the Malay peninsula between Singapore and Penang, consists of a strip of territory

about 42 miles in length, and from 8 to 24½ miles in breadth. Its surface is hilly, but not mountainous; and it is drained by five navigable rivers, making the soil alluvial and rich. The climate is equable and healthful. In 1881 the population numbered 93,579, of whom there were 67,523 Malays, 19,741 Chinese, 1,891 natives of India. Missions: S. P. G., stations at Singapore and elsewhere; 8 missionaries. Presbyterian Church of Scotland, stations at Singapore, Bukit-Timat, Serangoon, Tekkha, and Johor; 2 churches, 1 missionary and wife, 2 single ladies.

**Malagasi Version**.—The Malagasi belongs to the Malayan languages, and is spoken on the island of Madagascar. The Revs. Jones and Griffiths of the London Missionary Society translated the entire Bible, which was printed at Antananarivo between the years 1828 and 1835. In 1865 the British and Foreign Bible Society published at London another edition of the Malagasi Bible, which was prepared for the press by the Revs. Jones, Griffiths, and Meller. In 1869 the same Society published, at London, a revised edition of the New Testament with marginal references, under the care of the Rev. R. G. Hartley, of the London Missionary Society; and in 1871 an edition of the Bible was issued under the editorship of the Rev. R. Toy, who corrected the orthography of the Old Testament to make it harmonize as far as possible with the New. In order to secure as far as possible a thoroughly accurate and idiomatic version of the Bible in the Malagasi tongue, a joint board, representing all the missions on the island, was formed in 1873. In 1882 an interim edition of the Bible was published at London, under the care of the Rev. J. J. Sibree. The preliminary revision of the Bible, forming the basis of the revision committee's work, was completed by the Rev. W. E. Cousins, the chief reviser, September 15th, 1884. The work was begun December 1st, 1873, and the actual time which he has spent on it has been about eight years, and two days per week of that time have been given to the revision committee. On October 28th, 1885, the completion of the first revision of the Bible was made. The revision committee sat 433 days, and held 771 sittings, chiefly of three hours each. A second revision, for the purpose of harmonizing the different parts of the whole Bible, was begun on November 4th, 1885. The changes made in the second revision were chiefly from the native standpoint, to render the translation more easily understood, and more pleasant to the ear. The last meeting was held in the committee-room of the London Missionary Society, Madagascar, on April 30th, 1886. On May 2d, two days after the completion of the revision, a thanksgiving service was held in the Memorial Church, attended by missionaries, native pastors, and a large number of the Christians. The prime-minister was present, with a special message of thanks from Queen Ranavalona III., and this he delivered with his own congratulations on the very spot where, 38 years before, 14 Christians were hurled over the precipice at the command of Ranavalona I., for their adherence to the Word of God. The revised edition was printed at London under the care of the Rev. W. E. Cousins, assisted by others, and published in an edition of 8,000 copies 8vo, in 1888; an edition of the

New Testament in 32mo, consisting of 25,000, was also issued at London in 1887. Up to March 31st, 1889 there were disposed of 426,454 portions of the Scriptures.

(*Specimen verse.* John 3 : 16.)

Fa Izany no nitiavan' Andriamanitra izao tontolo izao, fa nomeny ny Zanani-lahi-tokana, mba tsy ho -very izay rehetra mino Azy, fa hafafo fainana mandrakizay.

**Malan**, district in East Kafraria, south Africa, south of Duff, 100 miles from King William's Town. Temperate, healthy. Population, 25,000, Kafir. Language, Xosa-Kafir. Religion, belief in spirits and an Almighty Maker—a sort of worship of ancestors. Natives very degraded. Mission station United Presbyterian Church of Scotland (1882); 1 missionary and wife, 19 native helpers, 12 out-stations, 8 churches, 342 members, 5 schools, 9 teachers.

**Malang**, a town in Southeast Java, south-east of Kediri. Mission station of the Netherlands Missionary Society (Reformed Church); has 750 members and a medical mission. Missionaries from this station have of late begun to visit the inhabitants of the neighboring Tenger mountains, who annually offer sacrifices to the volcano Bromo.

**Malanha**, one of the Solomon Islands, Melanesia. A station of the Melanesian Missionary Society.

**Malay Versions.**—The Malay belongs to the Malaysian languages, and is spoken in the isles of Sumatra and Malacca. It is divided into the Standard and Low Malay.

1. *The Standard Malay.*—More than fifty years before the first complete New Testament in the Malay was published, parts of the Bible by different translators had been published. In 1668 the New Testament was printed in Roman letters at Amsterdam, translated by Daniel Bower, a Dutch minister who lived and died in the East. His translation of the Book of Genesis was also printed in 1662, and again in 1687. In 1685 Dr. M. Leidekker, a Dutch minister of Batavia, commenced a translation of the Bible, which became the standard Malay version. Upon the death of Dr. Leidekker, in 1701, Petrus von der Vern was appointed to complete the work of his predecessor, which he did during the same year. In 1722 a revision committee was appointed by the Dutch Government, which completed its work in 1728. Two editions were made—one in Roman characters, printed at Amsterdam 1731-33; the other in Arabic characters, published at Batavia in 1758. An edition of the New Testament from the Amsterdam text was published at Serampore in 1814, for the benefit of the Christians at Amboyna, by the Calcutta Auxiliary Bible Society, which in 1817 also issued an edition of the entire Bible from the Amsterdam text. An edition in Arabic characters from the Batavia text, carefully revised, was also issued by the same Society in 1822, and forwarded to Penang, Malacca, Java, and Bencoolen, for distribution. In the same year the British and Foreign Bible Society and the Netherlands Bible Society republished the Antwerp text, and in 1824 the latter Society also issued an edition from the Batavia text, under the care of Professor Wilmet. The same Society published between the years 1868

and 1872 a translation of the New Testament, and of the Book of Genesis, made by the Rev. H. C. Klinkerl; while the National Bible Society of Scotland issued an edition of the New Testament at Haarlem in 1877, under the care of Mr. Roskott, the translator. A new version of the Malay Scriptures, in Roman and Arabic characters, was undertaken by the Rev. B. P. Keasberry, and an edition of the New Testament was published in 1863. Some parts of the Old Testament, also translated by Mr. Keasberry, were issued by the British and Foreign Bible Society; the translator's death in 1875 put a stop to the work of completing the Old Testament. In 1885 the British and Foreign Bible Society issued, under the editorship of Dr. Rost of the India Office, a corrected edition of 5,000 copies of the four Gospels, and also an edition of 5,000 copies of the Books of Genesis, Psalms, and Proverbs, of Keasberry's translation. The Acts of the Apostles were edited in a slight revision by Mr. Klinkerl, of Leiden, the edition consisting of 5,000 copies. A new edition of the Malay Bible, lithographed from the translator's (Mr. Klinkerl's) own writing, was published by Netherlands Bible Society at Amsterdam, 1886-9, 4 vols.

2. *Low Malay or Sourabayan.*—An edition of the New Testament, prepared by Robinson and Medhurst, was published in 1816 and 1833 at Singapore. In 1846 the Netherlands Bible Society published an edition of the Psalms, and in 1853 the New Testament. The Book of Exodus, translated by the Rev. J. L. Marten, was published by the British and Foreign Bible Society in 1877 at Edinburgh, under the care of the Rev. E. W. King. An edition of the four Gospels and the Acts were published by the same Society in 1887, under the care of Mr. Klinkerl, whose second edition of the New Testament was issued by the Netherlands Bible Society in 1888.

(*Specimen verse.* John 3 : 16.)

*Standard.*

كُرنَا دُمِكْيَانْلَهْ هَالْنِْيَا اَللّٰهُ سَرْدَهْ مَغَاسِيْبِيْ اَيْسِيْ دُنْيَا  
سَهِيْقَتْ كِرْنِيَكِيْ اَنْقَلْ يَغْ تَوْغَنْكَلْ سَلَايْ بَارْعَسِيَا  
يَغْ تِرْجَلِيْ اَكِيْ دِيْ تِيَادْ اَكِيْ بِنَاسْ هَالْ مَنْدَقَاتْ  
كِهِيْدُوْنِيْ يَغْ كَلَلْ.

*Roman.*

Kūrna dūmkianlah halnya Allah tūlah mūnga-  
sihi orang isi dunia ini, sabingga dikurniakan nya  
Anak nya yang tunggal itu, supaya barang siapa  
yang pūrchaya akan dia tiada iya akan binasa,  
mūlainkan mūndapat hidup yang kūkal.

*Low Malay, or Sourabayan.*

Karna sabagitoe sangat Allah soedah menga-  
sehi isi doenia, sabingga ija soedah membri  
Anaknja laki-laki jang toenggal, soepaja sasa-  
orang jang pertaja akan dia, djangan binasa,  
hanja beroleh kahidoepan kakal.

**Malayalam Version.**—The Malayalam or Malayalim belongs to the Dravidian family of non-Aryan languages, and is spoken in Travancore and Malabar. The New Testament was translated by Timapah Pillay, and published at Madras in 1810 by the British and Foreign

Bible Society. A new translation was undertaken by Mr. Bailey of the Church Missionary Society, for Travancore, and another by Mr. Spring for Malabar. The former's version of the New Testament was published at Cattayam by the Madras Auxiliary. When the first edition of the entire Bible was published is not known, but probably between 1832 and 1856. A new translation of the New Testament was made by Mr. Gundert, and published at Mangalore in 1868 by the Basle Bible Society. A reprint of the Old Testament was issued by the British and Foreign Bible Society in 1863.

In 1870 a joint committee representing the different missionary societies and including members of the Syrian Church, was formed for the purpose of revising the New Testament. Dr. Gundert's version is to be taken as the basis, and an attempt will be made to adopt such terms as may render one version intelligible both among the northern and southern Malayalam-speaking people. The revision of the New Testament which was begun in 1870 was completed on September 19th, 1882, and printed under the care of the Rev. J. Knoblauch. In 1885 the Revision Board resolved to revise again the revised New Testament but to meet a pressing demand an interim edition of 2,500 copies each of the old and the revised versions of the New Testament was issued. In 1888 an interim edition of 5,000 copies of Bailey's New Testament was published to meet present wants. The work of re-revision is steadily progressing.

Mr. Gundert continues his translation of the Old Testament in Germany.

(Specimen verse. John 3 : 16.)

മരിക്കാമെന്നാൽ ദൈവം തന്റെ ഏകജാതനായ പുത്രനെ, അപനിൽ വിശ്വസിക്കുന്നവൻ ഒരത്തനും നശിച്ചുപോകാതെ, നിത്യജീവൻ ഉണ്ടാകെണ്ടെന്നതിന്നു, തരുവാൻ തക്കവണ്ണം ആദ്യം ലോകത്തെ സ്നേഹിച്ചു.

**Malays.**—1. In its strictest sense, the name given to the inhabitants of the Malay peninsula, Penang, and Sumatra, who belong to the Mongoloid race, being closely allied anthropologically to the Chinese. In physical appearance they are of somewhat short stature; brown complexion—not so light as the Chinese or so dusky as the Hindu; have straight black, coarse hair; no beard; large mouth; flat nose; large, dark eyes; somewhat thick lips; small hands and feet, with thin, weak legs. In temperament the Malays are thoroughly Asiatic—taciturn, undemonstrative, cunning, treacherous, and at times cruel. Their passions are easily aroused, and under special exciting circumstances, such as love, jealousy, or stimulants, they reach a height of frenzy during which they “run amuck,” assailing violently all whom they meet.

We find three principal classes: the *Orang benua*, “men of the soil,” or hill-tribes; the *Orang laut*, “men of the sea,” who are the daring, skilful, adventurous seafaring men of the Indian Archipelago; and the *Orang Malayeru*, or Malays proper, the civilized class, who exhibit more of refinement, and are courteous and kind to their families and friends. The Malay sailors were the formidable pirates who formerly menaced commerce and were the dread

scourge of the Indian seas. Their deeds of cruelty, treachery, and cunning, aided by their daring, brave, audacious seamanship, are still the theme of stories of adventure. Even at the present time few ship-captains care to have a crew composed entirely of Malays, though they form the largest part of the sailors on the Indian and China coast.

Mohammedanism was embraced by the Malays in the 13th and 14th centuries, the fierce, uncompromising, aggressive spirit of the False Prophet attracting them at once to the faith.

**Language.**—The Malay language is the *lingua franca* of the Indian Archipelago. Its phonetic elements are simple, the grammatical structure is regular, and its vocabulary, especially in nautical terms, is very copious. It has the five vowels, *a, e, i, o, u*, short and long, with one diphthong. The consonants are, *b, d, g, h, j, k, l, m, n, ñ, p, r, s, t, w, y, ng, ch*. Malay is a dissyllabic language, with the accent as a rule on the penultimate, except where that syllable is open and short. Derived words are formed by prefixes, affixes, infixes, and reduplication. Much skill is displayed in the idiomatic use of the hundred or more derivative forms. There are no inflectional forms to distinguish number, gender, or case. Number is denoted only when absolutely necessary by the use of the adjectives *sagāla*, all, and *bānak*, many, or by *sa* or *satu*, one, with a classifier. As in the Chinese language, classifiers are numerous, such as *orang*, used in speaking of persons; *keping*, piece, for flat things. Gender is distinguished by the use of auxiliary words. Case is indicated by position. Verbs have no person, number, mood, or tense. Long sentences are avoided, and in a sentence first comes the subject, then the verb followed by the object, and qualifying words follow the words they qualify.

The Perso-Arabic alphabet is used for writing Malay; it was introduced at the time of the Mohammedan conquest. A great number of Arabic words have also been introduced into the vocabulary.

The literature of the Malays consists mainly of proverbs, and love poems of four lines. Their religious literature is remarkable mainly for its independence, and the fact that it does not show the influence of Islam.

2. In a wider sense the term is applied to the races inhabiting the Indian Archipelago and many of the islands of the Pacific, embracing an area 13,000 by 5,000 miles, or from Easter Island to Madagascar, from New Zealand to the Hawaii Islands. This wide dispersion of the race has been the subject of much study and theory; but the causes of it, and proof as to the fact, are not within the limits of this article. A classification of this wider definition is as follows: (1) Malay. (2) Malay Javanese: the inhabitants of the Ladrones, Formosa, Philippine Islands, the Malagassi, the Javanese. (3) Melanesian: Fiji Islands. (4) Polynesian: the Hawaiians, Marquesas Islanders, Tahitians, Rarotongans, Samoans, Tongans, Maoris. To these Wallace adds the Papuans, who are the farthest removed from the Malays, yet whom he considers to be of the same stock. They represent the extreme difference in type, due to the mingling of other races with the Malays, and have frizzly hair, are tall and black, bearded, and hairy-bodied. The mental

characteristics of the Papuan are also modified, and they are bold, excitable, impetuous, and noisy. Between the two extremes every gradation is found, varying with the preponderance of either the Malay or Papuan type. In some of the provinces of China, in Formosa, and Hainan, the aborigines are closely allied if not identical with the Malays. The special characteristics of the Malay are modified in the various islands by the lapse of time and the influences of environment, so that each island race has peculiarities of its own. In Borneo we find the fierce spirit of the passionate Malay cropping out in the grim hunt for human heads; in other islands cannibalism is the form it assumes. Mohammedanism does not accompany the Malays in their dispersion, and low forms of superstition, of fetishism, and of demonolatry take its place in the religion of the races.

For mission work, see Malacca and Singapore.

**Malegaon** (Malegam), town in Bombay. India, on the Mosam River, about 100 miles northeast of Bombay City. It is the headquarters for the work of the Church Missionary Society in the Khandesh district, which covers an area of 13,000 square miles, with a population of 1,227,000. The people are eager to hear the gospel, which is being preached to them by a small force of workers: 1 missionary and wife, 18 native teachers, 8 schools, 143 Christians, 65 communicants. A "triple chain of caste, custom, and debt" holds the people in bondage, and keeps them heathen.

**Malekula**, one of the New Hebrides Islands; has three foreign missionaries under the general direction of the Presbyterian Church in Canada, though they are supported by the Presbyterian Church in Victoria, Australia. These islands are now in monthly communication with Australia by the establishment of a line of steamers running between Melbourne and Sydney, and the principal islands.

**Maliseet Version.**—The Maliseet belongs to the languages of America, and is spoken by an Indian tribe in New Brunswick. A translation of the Gospel of John was made by the Rev. S. T. Rand, aided by a native, who was confined to his couch, by a broken thigh, during the whole time that he was engaged on this important work. An edition of the Gospel was printed by the British and Foreign Bible Society at London in 1870.

(*Specimen verse.* John 3 : 16.)

Eebüchül Nükskam ēdooche-moosajitpūn oos-  
kītkūmlkw wēmeloōētpūn wihwebu Ookwōōsūl,  
wēlaman 'mseu wēn tan wēlāmsūtūk oohükēk,  
skatūp ūksekāhawe, kānookūloo ooteinp askū-  
mowsooagūn.

**Malmesbury**, town in Southeast Cape Colony, South Africa, north of Cape Town. Station of S. P. G.; 1 missionary.

**Malokong**, town in Transvaal, East South Africa, on a branch of the Limpopo, south of GraMatlale. Mission station Berlin Evangelical Lutheran Society (1867); 1 missionary, 5 other helpers, 6 out-stations, 71 church members.

**Malta**, an island in the Mediterranean, south of Italy; a British crown colony, and an important naval station. Area, 95 square miles. Population, 162,423 (English, 2,138; foreigners, 1,097, the remainder natives). Language, a patois of Arabic. Religion, Roman Catholic.

Malta was for many years the most important missionary station in the Mediterranean, and was occupied by all the missionary societies seeking to work in the Levant. The mission press of the A. B. C. F. M., was established here prior to its removal to Smyrna, and it was here that Wm. Goodell and his associates studied the Turkish and Armenian before establishing themselves at Smyrna, Constantinople, and Beyrout. It is now occupied as a preaching station by several of the Colonial Societies of England and Scotland, especially the Scotch Free Church.

**Maltese Version.**—The Maltese is a dialect of the Arabic, belonging to the Semitic family of languages, and is spoken by the natives of Malta, the ancient Melita. In writing, the Roman letters are used, Arabic characters being unknown to the Maltese. The first attempt to translate the Scriptures into Maltese was made in the early part of the present century by the Rev. W. Jowett of the Church Missionary Society aided by a native. In 1882 a small edition of the Gospel of John was published at London as a specimen of the work. In 1827 the four Gospels and the Acts were published by the Society for Promoting Christian Knowledge; and in 1847 the entire New Testament in Maltese. The translation was for the greater part made by Mr. Camilleri, a native of Malta, but afterwards a minister of the Church of England. The book, however, did not meet with that acceptance which had been hoped for, owing not so much to any defects in the translation as to the bigoted ignorance of the people, and also in part to the difficulty of expressing Arabic gutturals in Roman characters. About eight different systems of orthography have been tried at various times, but the uncouth letters which have been adopted to represent certain sounds failed to give satisfaction. A deep interest having been taken by a few Englishmen living in the island in the spiritual welfare of this priest-ridden people, a revised translation of the Gospel of Matthew was prepared by Mr. Bonavia, and sent over to England. After due examination and revision it was printed, under the editorship of Dr. Camilleri, at London in 1870. In 1872 the Gospel of John and the Acts were also issued by the British and Foreign Bible Society.

(*Specimen verse.* John 3 : 16.)

Ghaliex Allā hecca' hab id dinta illi tā' l'Iben  
tighu unigenitu, sabiex collmin jemmen bih  
ma jintilifx, iżda icollu il haja ta dejem;

**Malto, Pahari, or Rajmahal Version.**—The Malto belong to the Dravidian family of non-Aryan languages, and is spoken by the Paharis in the Rajmahal district of North India. Methodist Episcopal missionaries of North India translated the Gospel of Matthew, which was published by the American Bible Society in 1875. A translation of the Gospels of Luke and John was prepared by the Rev. E. Droese of the Church Missionary Society, who for more than twenty years lived among the Paharis.

The former was published by the British and Foreign Bible Society in 1882, the latter in 1883. Mr. Droese also translated the Gospels of Matthew and Mark and the Acts, which were published by the Calcutta Auxiliary in 1887. An edition of the Psalms was issued in 1888 at the Secundra Orphanage Press, under the care of the same auxiliary in 1888. The version was also made by Mr. Droese.

**Malua**, town in Upolu, one of the Samoan Islands, Polynesia; is occupied by the work of the London Missionary Society (1836). It has a training institute for young men, with 96 students in full course, 11 in preparatory; 3 missionaries, 1 lady, 8 native ministers, 14 native preachers, 478 church-members, with an attendance of 1,596. Contributions, £161 7s. 2d. A movement to promote higher education among the girls and women has recently been inaugurated. The late political troubles, added to the severe ravages of a hurricane, have been great hindrances to the work; but it is now progressing very favorably. The Samoan Christians give striking proof of the efficacy of the gospel in changing natural vices to Christian virtues.

**Mamboe**, a town in the Sherbro country, West Africa, on the Mamboe River, east of Yoruba. Station of the United Brethren in Christ (U. S. A.); 1 teacher, 1 itinerant, 16 church-members, 1 school, 18 pupils.

**Mamboia**, town in East Central Africa, inland, due west of Zanzibar Island, north of Usagara. Mission station C. M. S. (1879); 1 missionary, 1 native assistant, 2 communicants, 1 school. The work here is carried on with great danger on account of the hostility between the Arabs and Germans. Communication with England is often interrupted, so that five months passed at one time without any word from the coast.

**Mangaia**, one of the Hervey Islands, Polynesia, south of Rarotonga. Mission station L. M. S.; 1 missionary and wife, 3 native pastors. Communication with this station is most difficult, five months sometimes elapsing between the sending and receipt of a letter.

**Mamre**, a town in Cape Colony southeast of Malmesbury, South Africa. Mission station of the Moravians (1808); 3 missionaries and their wives, 1 assistant missionary, 1,843 church-members.

**Mamusa**, a city in the Orange Free State, on the river Hart, South Africa. In 1841 a Paris missionary founded a station here among the Kavas, which for a long time was maintained by their pious chief. It is now an out-station of the work of the London Missionary Society at Taung (q.v.).

**Manaar**, a station of the Wesleyan Methodist Missionary Society in the Jaffna district, Ceylon; 1 native preacher, 1 chapel, 6 preaching-places, 28 church-members, 127 pupils.

**Manado**, a city of Minabassa, the northeastern peninsula of Celebes, East Indies, and noted as a great coffee emporium. From 1830 to 1874 it was the chief seat of the *Nederlandische Zendingvereeniging*, which worked with great success among the heathen Alifures. Out of a population of 114,000 no less than 95,000 were converted, and the great difficulty arising

from the different languages spoken by the Alifures was happily overcome by the introduction of the Malay language in church and school. But lack of money and the discoveries of the Dutch Government compelled the missionaries to enter the service of the state church in 1870, and now Islam is making great headway.

**Manamadura**, city in Tamil country, Madras, British India, 30 miles southeast of Madura. Climate very hot and dry, 80°–100° F. Language, Tamil. Religions, Brahminism, Moslemism. Natives ignorant, degraded. Mission station A. B. C. F. M. (1864); 1 missionary and wife, 33 native helpers, 1 church, 27 out-stations, 3 churches, 219 church-members, 20 schools, 628 scholars.

**Manandona**, town in West Central Madagascar, northeast of Morondava. Mission station of the Norwegian Missionary Society (1870).

**Manargudi**, town in the south-central part of the district of Trichinopoly, East Madras, India, south of Combaconam and southwest of Negapatam. Mission station of the Wesleyan Methodists; 3 missionaries, 32 native helpers, 26 church-members, 1 chapel, 7 schools, 570 scholars, and a high-school.

**Manchentuduvy**, a station of the Wesleyan Methodist Missionary Society in the Jaffna district, Ceylon; 1 native minister, 23 church-members, 378 pupils.

**Manchuria**, one of the divisions of the Chinese Empire (see China), lying north of China proper, between latitude 42° and 53° north. In accordance with the treaty of 1860 between Russia and China, nearly one half of the former territory was given over to Russia, and the present limits are the Amoor on the north, the Usuri and Sunga-Cha on the east, Kirin on the south, from which it is separated by the Shan-Alin range; and on the west the Khingan Mountains, the Sira-Muren River, and the district of Upper Sungari separate it from the desert of Gobi. Its area is about 378,000 square miles. Population estimated from 11,000,000 to 12,000,000. Physically, the country is divided into the mountain ranges on the north and east, among which lie numerous fertile valleys; and the plain which stretches south from Moukden to the Gulf of Liao-tung. There are three principal rivers—the Amoor, the Usuri, and the Sunagari. The latter is over 1,200 miles long, and along its fertile banks is the most populous region of the country. Manchuria is divided into three provinces: Shing-King, or Liao-tung, of which Moukden is the capital (q.v.); Newchwang (Ying-tse), at the head of the Gulf of Liao-tung, is the treaty port;—Kirin (Central Manchuria); capital, Kirin, on the Sungari, 200 miles from its source, has a population of about 150,000, mostly Chinese;—and Tsi-tsi-har (Northern Manchuria), sparsely populated, with few cities of importance. The climate varies from extremes of heat and cold, from 90° F. in the summer to 10° below zero in the winter. During four months of the year the rivers are frozen up, a short spring is followed by the heat of summer, and a few weeks of autumn usher in the snow and ice of the winter. Minerals are abundant. The agricultural products are mainly indigo and opium, though cereals, cotton, and tobacco are

also grown. The reigning race of China are Manchus, but though they have subjugated China, Manchuria is gradually losing its native language and system of education under the influence of the Chinese, who are overrunning the country and bringing its customs into conformity with those of China. The native Manchus are a finer race physically, mentally, and morally than the Chinese; they are of larger frame, lighter color, and have greater intellectual capacity. Mission work in this part of China is carried on by the Presbyterian Church of Ireland, with stations at Newchwang, Jin-jow, Kwan-cheng-tzu, and Kirin (q.v.); and by the United Presbyterian Church of Scotland, with stations at Newchwang, Haichung, Liaoyang, Moukden, Tieling, Kaiyuen, Taiping Kow (q.v.).

**Mandailung**, a dialect of the Batta language (q.v.), spoken in Southern Sumatra. Seven thousand and ten copies of the New Testament and portions in this dialect were put in circulation previous to March 31st, 1889.

**Mandalay**, the capital (and district) of Upper Burma, on the Irawaddy, 380 miles north of Rangoon. The climate is tropical and dry. In the district there are 150,000 to 200,000 people. Burmese is the language spoken; Buddhism the prevailing religion. Station of A. B. M. U.: 1 missionary and wife, 4 other ladies, 1 physician, 3 native assistants, 1 church, 80 church-members, 95 pupils. S. P. G.: 2 missionaries, 4 native assistants, 53 communicants. Wesleyan Methodist (1886); 1 missionary, 1 native pastor, 1 Anglo-vernacular school, 85 pupils, 4 church-members.

**Mandapasalai**, a city in the Madura district, South India. Population, 200,000. Language, Tamil. Religions, Hinduism and Mohammedanism. A station of the Madura mission of the A. B. C. F. M. (1851); 1 missionary and wife, 10 out-stations, 2,493 adherents, 10 churches, 723 communicants, 3 native preachers, 32 assistants, 25 Sunday-schools, 400 scholars, 2 girls' schools, 80 scholars. Contributions (1888), \$595.

**Mandari Version**.—The Mandari belongs to the Kolarian group of non-Aryan languages, and is used by the Kohls of Chota Nagpur, Central India. A translation of the Scriptures into this language was undertaken by the Rev. N. Nottrott of the German Missionary (Gossner's) Society, who prepared the Gospel of Mark, which was issued by the Calcutta Auxiliary Society in 1876. The Gospel of Luke was added as prepared by the Rev. L. Beyer of the same missionary society in 1879. The Gospels of Matthew (by Nottrott) and of John (by Beyer) were published in 1880. Each revised the work of the other by the help of native assistants, and thus they provided the four Gospels for the 25,000 Christians of their own mission, and the 10,000 Christians of the Society for the Propagation of the Gospel mission, and the still larger number of non-Christian Kohls of Chota Nagpur. In 1885 an edition of 2,000 copies of the Acts of the Apostles, translated by Mr. Beyer, was issued by the Calcutta Auxiliary; and in 1887 the Epistles of Peter and James, translated by Mr. Nottrott. Thus far 32,570 portions of the Scriptures have been disposed of.

(Specimen verse. Mark 3 : 35.)

बिबलि परमेश्वर नेने लेका सेतवन होदो इनीगे जइया हागा  
जोदो भिकी जोदो जइया रंगा नेनेपा ॥

**Mandarin Colloquial Version**.—The Mandarin is one of the most important dialects of the Chinese, because it is the colloquial medium of a large proportion of the people of Northern China. In general two branches of the Mandarin Colloquial are distinguished: the Pekin or Northern, and the Nankin or Southern.

1. *The Pekin or Northern*.—The New Testament into this dialect was translated by Revs. Burdon, Blodgett, Schereschewsky, Edkins, and Martin, and was published by the American and British Bible Societies in 1872. The Old Testament, translated by Dr. Schereschewsky, was also published by both Societies in 1875 and 1877.

The British and Foreign Bible Society also published, in 1888, a reference edition of 3,000 copies of the New Testament in the Roman alphabet. About the year 1875 the China Inland Mission brought out an edition of the four Gospels and Acts. This portion was revised by the Rev. W. Cooper, who has transliterated the remaining books of the New Testament, and added the references. The text is a rendering, word for word, into Roman character of the Northern Mandarin version. The term used for God is Shang-ti, and the transliteration has followed the system in use in the China Inland Mission for twenty years. Several missionaries assisted in the final preparation of the copy, and the edition was edited by Mr. Cooper.

2. *The Nankin or Southern*.—A New Testament translation into this dialect was made by the Revs. Medhurst and Stronach, and published by the British and Foreign Bible Society in 1856.

(Specimen verse. John 3 : 16.)

1. Pekin colloq.

2. Nankin colloq.

信 他 的 不 至 滅 亡 必 得 永 生	天 主 憐 愛 世 人 甚 至 將 獨 生 子 賜 給 他 們 叫 凡	惜 世 人 如 此	着 長 久 的 生 命 上 帝 愛	免 得 永 遠 受 苦 可 以 得	給 世 人 使 那 信 他 的 人	上 帝 把 獨 生 的 兒 子 賜
---	--	-----------------------	---	---	---	---

**Manisa**, a city of Asia Minor, about 50 miles east of Smyrna. The ancient Magnesia, it is still a large and important city. Popula-

tion about 40,000, chiefly Turks, Greeks, and Armenians. For many years it was an out-station of the A. B. C. F. M., worked from Smyrna. Then for a few years it was occupied as a missionary residence, on account of the heat and difficulty of mission work in Smyrna. A flourishing church was established. It is now again an out-station of Smyrna.

**Mannoh**, town in Sherbro, West Coast, Africa, a little north of Avery. Station of the United Brethren (U. S. A.); 19 church-members, 1 day-school, 18 scholars, 1 Sunday-school, 18 scholars.

**Mansinam**, town on island of Manuswari, New Guinea. Station of the Utrecht Missionary Society (1863); 2 missionaries, 1 female missionary, 1 native assistant, 40 communicants, 1 school, 40 scholars.

**Mansura** (Monsoora), town in Upper Egypt, near the apex of the Delta, north of Cairo, south of Damietta. Station of the United Presbyterian Church of America (1866); 2 missionaries and wives, 1 female missionary, 7 native assistants, 37 communicants, 2 schools, 241 scholars.

**Manchu Version**.—The Manchu belongs to the Tungus branch of the Ural-Altaic family of languages, and is spoken in Manchuria, and is also the court language of Peking. Into this language Mr. Lipofzoff translated the Gospel of Matthew, which was printed in 1822 at St. Petersburg, by the British and Foreign Bible Society. An edition of the entire New Testament was issued by the same Society in 1835, the translation having been made by Mr. Swan of the London Missionary Society. In 1857 an edition of the Gospels of Mark and Luke in Manchu and Chinese, in parallel columns, was published at Shanghai, under the care of Mr. Wylie.

**Manua**, one of the Samoan Islands, Polynesia. The people have their own king and government, and have been undisturbed by the political troubles in the other islands. None of their land is alienated to foreigners. The people are noted for the simplicity and purity of their Christian life. The London Missionary Society began work in 1837, but now the native ministry carry on the work, with an occasional visit from the missionaries on the other islands. There are 8 native ministers, 412 communicants, 1,613 adherents, 7 Sunday-schools, 592 scholars, 7 boys' schools, 327 pupils, 7 girls' schools, 265 pupils. Contributions, £12 1s. 0d.

**Mauuane**, a Hermannsburg station in the circle of Mariko, Transvaal, South Africa, with 517 members.

**Maux Version**. The Maux belongs to the Krio branch of the Arvan family of languages, and is used in the Isle of Man. It is a dialect of the Gaelic language, and is spoken by the people of the Isle of Man. It is a dialect of the Gaelic language, and is spoken by the people of the Isle of Man. It is a dialect of the Gaelic language, and is spoken by the people of the Isle of Man.

(Specimen verse. John 3:16.)

Són lheid y ghraih shen hug Jee da'n theihll,  
dy dug eh e ynryan Vac v'er ny gheddyn,  
nagh. jinnagh quoi-erbee chredjagh aynsyn  
cherraghtyn, agh yn vea ta dy bragh farraghtyn  
y chosney.

**Maoombi** (Maumby), a town in Northwest Celebes between Manado and Talawan, west by northwest from Ajimandidi. Mission station of the Netherlands Missionary Society.

**Maori Version**.—The Maori or New Zealand belongs to the Polynesian languages, and is spoken in New Zealand. The first edition of the New Testament was printed by the British and Foreign Bible Society in 1837. The translation was made by the Revs. Williams and Yate of the Church Missionary Society. Soon the edition of 5,000 copies was exhausted, and a second and a third edition, each of 20,000 copies, were reprinted in a few years. In 1859 the Old Testament, as translated by the Rev. R. Maunsell of the Church Missionary Society, was published at London in 1858. An edition carefully revised by Mr. Maunsell and members of the Church Missionary and Wesleyan Missionary Societies was published at London in 1868, under the editorship of the Rev. T. W. Meller. In 1885 an edition of the Maori Bible, corrected and slightly revised by Messrs. Maunsell and Williams, with the numbers of the verses prefixed to the verses and not placed in the margins, and with chapter and page readings, was commenced in 1885 by the British Bible Society, and was completed at press in 1888, the edition consisting of 6,000 copies of the complete Bible, 4,000 New Testaments, and 2,000 each, of the four Gospels and Acts, as portions. Thus far 141,150 portions of the Scriptures have been disposed of.

(Specimen verse. John 3:16.)

Na, koia ano te aroha o te Atua ki te ao,  
homai ana e ia tana Tamaiti ko tahi, kia kahore  
ai e mate te tangata e whakapono ana ki ia,  
engari kia whiwhi ai ki te oranga tonutanga.

**Maoris**, the aboriginal inhabitants of New Zealand, who belong to the Malay family of mankind. They claim to have migrated to New Zealand 500 years ago from "Hawaiki," which is supposed to be either Hawaii or Savaii of the Samoan Islands. They are a fine race, of average stature, with olive-brown skins, and their heads exhibit a high order of intellectual development. They are beardless as a rule, but that is due in part to the custom of plucking out the beard with shells. Most of the race have long black hair, but some have reddish hair, and in others it is frizzly. Large eyes, thick lips, and large, irregular teeth are characteristic. The women are smaller than the men, and generally inferior to them. Tattooing was a universal practice previous to the introduction of Christianity. The custom of *taboo*, which has given a word in universal use among English-speaking people, was practised by the priests to make any person or thing sacred and inviolable. Such regard was paid to the sanctity of the taboo, that even in war time tabooed persons or things were not harmed. Cannibalism was practised by the heathen

Maoris, but has disappeared, together with infanticide, slavery, and polygamy, under the enlightening influences of Christianity.

The Maoris, like most races in tropical climates, marry young, but they are not a very prolific race. Their language belongs to the Malay family. Fourteen letters, *a, e, h, i, k, m, n, o, p, r, t, u, w,* and *ng*, are all that the alphabet contains. Seven dialects are recognized. The language is sonorous, and adapted to lyrics and poems, and the popular literature consists largely of metrical proverbs, legends, and traditions. The people are very fond of music and songs. (For mission work, see New Zealand.)

**Mapumulo**, town in Natal, East South Africa, near Port Natal. Station of A. B. C. F. M.; 1 missionary and wife, 1 out-station.

**Marakei**, one of the Gilbert Islands, Polynesia. The work in the island is under the native preacher, in the employ of the Hawaiian Evangelical Association since 1887, and a missionary of the L. M. S. makes an annual visit to the islands. The population of the island is 2,000; and 70 are church-members.

**Maran**, one of the Solomon Islands, Melanesia. Has a station of the Melanesian Mission.

**Maranhao**, city in Northeast Brazil. A place of great mercantile importance. Climate hot, unhealthy. Population, 34,023. Mission station Presbyterian Church (South); 1 missionary and wife.

**Marash**, a city of Northern Syria, at the foot of the Taurus Mountains, 90 miles north-west of Aleppo. Population about 40,000, Turks and Armenians. Mission station of the A. B. C. F. M., with 4 missionaries and wives and 2 female missionaries, 3 large churches with fine buildings and over 2,000 church-members. Here is located the theological seminary of the Central Turkey Mission and a flourishing girls' boarding-school of high grade. The graded schools of the city are most excellent—not surpassed by those of any city in Turkey. Missionary work commenced with bitter persecution, but after repeated attempts a foothold was obtained, and then the work progressed very rapidly. The Foreign Christian Missionary Society (U. S. A.) also have a preacher, a school, and 25 scholars.

**Marathi Version.**—The Marathi belongs to the Indic branch of the Aryan family of languages, and is spoken by the educated natives in the Bombay presidency. A version of the Scriptures was undertaken in 1804, and the entire Bible was published at Serampore between 1811 and 1820, and a second revised edition in 1825. A new version was undertaken by the Rev. John Taylor, but he only lived to complete the Gospel of Matthew, which was printed at Bombay in 1819.

American missionaries (Messrs. G. Hall and S. Newell) commenced a version in 1817, and the New Testament was published at Bombay in 1826; a revised edition was printed in 1831, and a second revision, to which Rev. H. Ballantine devoted several years, in 1845. In 1858 a New Testament with references was published, and again in 1868. The Bible was issued in 1847, and a thorough revision in 1855. In 1857 and 1871 other editions of the Bible followed, published by the American Bible So-

ciety. In 1881 the British and Foreign Bible Society issued an edition of the Old Testament with paragraph headings prepared by the Rev. Baba Padmonji, and in 1888 the New Testament.

All these editions are printed in the so-called Balboodh or Balborah character, which appears to be almost if not quite the same as the Devanagari itself. But there is also the Modhi character, which is most generally understood, and is employed in all transactions of business. In this latter character the Gospels and the Acts, as prepared by Mr. Farrar, are also published.

In 1881 an edition of 500 copies of the Gospel of John in Roman characters was carried through the press by Dr. Murray Mitchell.

The Marathi Bible is now undergoing a thorough revision.

(Specimen verses. John 3:16.)

कां तर देवाने जगावर एवढी प्रीति केली  
कीं त्याने आपला एकुलता पुत्र दिव्हा,  
यासाठीं कीं जो कोणी त्यावर विश्वास  
रेवितो त्याचा नाश होऊं नये. तर त्याला  
सर्वकालचें जीवन व्हांवें.

(Modhi.)

मंतर येसे जगावर ऐपढी प्रीती मेळू प्रीं, एवढे  
एवढा ऐपिडवा पुत्र दिव्हा, मजगीं प्रीं जे  
मेलीं एवढा पाश्चात् बेप्रीती एवढा मज  
येतं नये, तर एवढा उरिळउं जीपन व्हाये.

**Marburg**, a small town on the east coast of Natal, Africa, south of Durban and northeast of Queenstown. Mission station of the Hermannsburg Missionary Society.

**Marden, Henry**, b. New Boston, N. H., U.S.A., December 9th, 1837; graduated at Dartmouth College 1862, and Andover Theological Seminary 1869; ordained September, 1869; sailed for Turkey as a missionary of the American Board September 21st, the same year. He was stationed at Marash, Central Turkey. He visited the United States in 1878, and his health having failed, he again left for home April 17th, 1890, with Mrs. Marden and his daughter. In a letter written from Marash, May 2d, he said: "I find that during the year ending to-day I have been absent from home 189 days, and have travelled over 1,500 miles on horseback, visiting 43 cities and towns which have Christian communities. Only a part of these places as yet have Protestant congregations, but I have personal relations with the people in them all." On reaching Athens, May 4th, he was seriously ill, and by the advice of friends was removed to the "Hospital Evangelismos." His disease proved to be a malignant form of typhus. The best medical skill and nursing failed to arrest it, and he died Tuesday, May 13th. He was buried in the beautiful Greek cemetery at Athens. Great sympathy was expressed by the Greek Prime Minister, the American Minister, and Mr. Manatt, the United States Consul at Athens, who writes of the sympathy awakened throughout the American community at Athens, and of their purpose to endow an American ward in the

"Hospital Evangelismos" in honor of Mr. Marden. His associates bear witness to his earnestness and fidelity, and his courage in pursuing the evangelistic work, often requiring great wisdom and physical endurance. A native paper speaks of him as "a man of fine culture, and of true Christian spirit, honored and loved by all;" and a fellow-missionary, who was with him for years, speaks of him as "truly the people's friend." Rev. H. G. Clark of New Hampshire, a classmate and intimate friend, says: "He was regarded by his classmates and missionary associates as a man of sound sense, and the results of methods of work he adopted usually proved the wisdom of his judgment and foresight." He gives the following extracts from a letter written in 1881 and 1890: "I am satisfied to spend my life here, and though I long inexpressibly for the home land and the home friends, I am sure that nothing could induce me to leave the work while I am able to stay." In speaking of the long tours made among the mountain villages and the preaching in the private houses of the Armenians, he says: "I ask for no nobler work than this hovel preaching, notwithstanding its discomforts." Just before leaving his work last April he wrote: "I long for home at times more than tongue can tell, yet I am sorry to leave the work here even for a year."

**Mardin**, a city of Eastern Turkey, about 60 miles southeast of Diarbekir; most picturesquely situated on a bluff of the Taurus Mountains, commanding a magnificent view over the Mesopotamia plain. On a clear day the hills nearly a hundred miles away to the south are clearly visible. In spring the plain several thousand feet below looks like a broad carpet beautifully diversified with rich colors. The climate is trying, the summer being long and hot; the winter pleasant, but lacking in any tonic which can repair the waste of the summer's work. The population of the city is about 15,000, chiefly Arabs and Syrian Jacobites, though there are Chaldeans, Armenians, Koords, and Jews. Mission station of the A. B. C. F. M. (1839); 4 missionaries and wives, 3 female missionaries, 37 native helpers, 20 out-stations, 8 churches, 330 church-members, 28 schools, 708 scholars. There is a large and flourishing high-school, virtually a college (see A. B. C. F. M. Assyrian and Eastern Turkey missions; also Armenia). Since the giving up of the station at Mosul, Mardin has been the centre of the Arabic work of the A. B. C. F. M. Of late years, however, it has been decided to reopen the Mosul station.

**Maré**, on the Loyalty Islands, Southwest Polynesia, off the coast of New Caledonia, southeast of Lifu. Mission station of the L. M. S.; 15 native pastors, 688 church-members. The London Missionary Society brought teachers hither from Samoa and Rarotonga in 1841, and in 1855 a congregation was formed at Maré, which now numbers 3,117 members under 15 pastors. The New Testament, the Psalms, and the Pentateuch have been translated. Nevertheless, when the French took possession of the Loyalty Islands in 1864, the Roman Catholic priests began their intrigues and chicaneries immediately, and in 1884 they obtained a decree from the governor by which all Protestants were placed under the supervision of French priests, all schools in which the instruc-

tion was not carried on in French were closed, and the Maré Bible was forbidden.

**Maré or Nengone Version.**—The Maré belongs to the Polynesian languages, and is spoken in the Loyalty Islands. The first part of the Scriptures printed was the Gospel of Mark, and in 1867 the New Testament was printed on the spot. In 1867 Mr. Jones carried through the press in London a revised edition of the New Testament at the expense of the British and Foreign Bible Society. The edition consisted of 4,000 copies. During Mr. Jones' absence Mr. Creagh translated the Books of Genesis, Exodus, Leviticus, Isaiah, and Jeremiah, and printed Genesis and Exodus at the mission press in Maré. Mr. Creagh having removed to the neighboring island of Lifu, Mr. Jones carried on the translation of the Old Testament. He translated the Psalms, which Mr. Creagh, during a visit which he made to England in 1876, carried through the press. In 1887 Mr. Jones was expelled by the French from the island, and thus for the present the work of translation is interrupted.

(Specimen verse. John 3:16.)

Wen' o re naeni Makaze hna raton' o re ten' o re aw, ca lle nubonengo me nunuone te o re Tei nubonengo sa so, thu deko di ma tango-ko re ngome me sa ci une du nubon, roi di nubone co numu o re warūma tha thu ase ko.

**Maripastoon.**—A town on the left bank of the river Saramacca, in Surinam, South America, a station of the Moravians. The Matuari tribe of Bush-negroes reside here, among whom a work was commenced by John King, the native evangelist. A native minister is in charge here, as it would be impossible, it is said, for any European to live at Maripastoon.

**Marquesas Islands.**—A group of islands in the South Pacific, northwest of the Society Islands. Since 1841 a possession of France. Area, 480 square miles. Population, 5,250. Occupied by the Hawaiian Evangelical Society.

**Marquesas Version.**—The Marquesas belongs to the Polynesian languages, and is spoken in the Marquesas Islands. The Marquesan language was first reduced to writing by English missionaries early in this century, and the Gospel of Matthew was printed at Honolulu in 1853, and in 1857 the Gospel of John followed. American missionaries took up the work in a more thorough manner, and the New Testament appeared in 1873, and in a second edition in 1878.

(Specimen verse. John 3:16.)

Ua kaoha nui mai te Atua i to te aomaama nei, noeia, ua tuu mai oia i taia Tama fanautahi, ia mate koe te enata i haafia ia ia, atia, ia koaa ia ia te pohoe mau ana'tu.

**Maronites.**—The Maronites of Syria take their name from John Maron, their political leader and first patriarch, who died 701 A.D. During the sixth and seventh centuries of our era the Monophysite (*monos*, one; *phusis*, nature) controversy was raging throughout the Eastern church. Armenia, Syria, and Egypt, frontier lands of the Byzantine Empire, were deeply infected by the heresy. The Emperor

Heraclius (610-640 A.D.) was anxious to reunite the church that he might the more effectually ward off the Saracen invasion from Arabia, which threatened to despoil the empire of its south-eastern provinces. With the help of Sergius, Patriarch of Constantinople, a Syrian, he arranged a compromise doctrine which he hoped would put a stop to the rancorous theological dispute. The statement proposed was, that whatever might be said, Christ having one (divine) or two (human and divine) natures, all ought to agree that he has but one will (divine and therefore sinless). Honorius, Bishop of Rome, assented to this proposition, and many of the Monophysites agreed to accept it. But no imperial decree could stop the quarrel; and after a long controversy (during which the Saracens conquered Syria, Egypt, and all North Africa) the case was decided against the Monothelites (*monos*, one; *thelem*, to will), and Bishop Honorius (afterwards called "Pope") was declared heretical.

Among many who accepted the Monothelite heresy were the Christians of Syria, who fled to the mountains before the Saracen invader. John Maron was their leader. High up on the shoulders of Lebanon and Anti-Lebanon these vigorous people managed for five hundred years to maintain their independence in the face of Byzantine, Greek, and Saracen. Defended by tremendous ravines and snowy mountain passes, they were never seriously in danger. The long contest developed many qualities and industry. They spoke Syriac, and used it in all their services. A sort of feudal system developed itself. The government was theocratic, the head of the state being styled "The Patriarch of Antioch and all the East." The episcopal dioceses were Aleppo, Ba'albek, Jebel, Tripoli, Ehden, Damascus, Beyrout, Tyre, and Cyprus. Village sheikhs were elected, as were all the officers, secular and religious.

The Crusaders brought to light this interesting people, so long cut off from Christendom. William of Tyre and Jacob de Nitty have left us accounts of the Maronites, who leagued themselves with the Crusaders, and in 1182 opened communications with the papal hierarchy. They gradually dropped their heretical tendencies, adopted the Arabic language as their vernacular, and in 1445 at the Council of Florence were taken entirely under the wing of the Roman Church. They were allowed to retain their Syriac liturgy, the celebration of the communion in both kinds, the marriage of the lower clergy, their own fast-days, and their own saints. In 1596 the decrees of Trent were accepted; transubstantiation, prayers for the Pope, and other novelties were introduced. A special college was established at Rome (Collegium Maronitarum) for investigation by Maronite scholars, which gave to the world the learned Assemani. Schools for the clergy and printing-presses were established in Syria. A papal legate was sent to Beyrout, and to-day the Maronites are submissive followers in the Latin Church.

There are about 250,000 of this sect scattered all over the Lebanon range and the Anti-Lebanon. They are massed somewhat in the northern districts of Lebanon (Kesrawan and Bshereh), and have complete control of local affairs. They are found as far south as Mt. Hermon, in the heart of the Druze country. The growing hostility of Druze and Maronite, fostered by

the Turkish soldiery, culminated in the massacre of 1860, in which thousands of the Maronites were butchered. European intervention compelled the Sultan to redistrict Syria, and form the pashalik of Mt. Lebanon, which must have a Christian pasha to rule it, and which is under the protection of the Great Powers. The stronghold of the Maronites in the North Lebanon region is high up on the mountains, with surpassing views over the Mediterranean to the west. It is a bit of the Middle Ages left over. The priests have complete control, and the people are frugal and industrious. They are illiterate for the most part, and schools are established only when they are required to ward off Protestant influences. The rough mountain sides are terraced, and every available bit of soil utilized. The raising of cattle, silk culture and weaving, vineyards, grain, maize, and potatoes (Irish) occupy the attention of the people. Hundreds of monasteries are scattered over the mountains, the most notable one being the monastery of Kennôbin (the Greek word for monastery), which is romantically situated in the gorge of the Kadisha (Holy) River, and is the summer home of the Patriarch. At the head of this profound ravine is the famous group of 400 ancient cedars, which are carefully guarded as sacred. Some of them are 40 ft. in circumference, and over 100 ft. high.

When the American missionaries entered Syria, in 1823, the Roman Catholic authorities became alarmed, and have put forth every effort to hold the Maronites true to their papal allegiance. In the early days of this rivalry a young Maronite, Asaad Shidiak, who had adopted the evangelical faith, was imprisoned in the Kennôbin monastery, where he died from rigorous treatment. He has been called "The Martyr of Lebanon." The Jesuits and Lazarists have in hand the task of holding the Maronites to the Latin faith. A fine school for boys is found at Antura, conducted by the Lazarites, not far from Bkurreh, the winter home of the Patriarch. The Jesuit College at Beyrout is an imposing institution, with a fine library and a very complete scientific apparatus. The Jesuits were forced to issue an Arabic Bible, and it is interesting to note that they made the translation from the original Greek and Hebrew Scriptures.

At the time of the massacre of 1860 the Protestant missionaries had the privilege of endearing themselves to the Maronites by caring for thousands of orphans and other fugitives in Sidon and Beyrout. But as yet the northern portions of the Lebanon range have been impervious to Protestant influence. Rev. Isaac Bird, in the early days of the mission, was driven from the region, and no attempt has since been made to permanently reside in the Kesrawan and in Bshereh. Missionaries occasionally have summered in the mountains above Tripoli, and the prejudice against them is gradually subsiding. The potatoes which Mr. Bird left behind in his garden have spread all over the mountains, and form a staple of agriculture along with maize. Other societies besides the Presbyterian Board are reaching the Maronites. The Free Church of Scotland have occupied the Metu region just south of Kesrawan for some years. The English schools for girls, established after 1860, and which are scattered over the mountains to the south, are doing very efficient work. The mission of the Irish

Presbyterian Church in Damascus is reaching the Maronites in that region. In spite of the great care of the Roman Catholics, education is transforming the whole sect, and evangelical truth is more and more winning its way among them.

**Marshall**, a town of Sierra Leone, West Africa, centre of a circuit of Bishop Taylor's work. It has 5 local preachers and 84 church-members.

**Marshall Islands**, Micronesia, two chains of lagoon islands, called Ratack (13) and Ralick (11); comprise an area of 1,400 square miles with an estimated population of 10,000. A missionary of the A. B. C. F. M. is located at Kusaie (q.v.), and the work among the various islands is carried on by native preachers and teachers under his supervision. Ten islands have schools or preaching places; there are 8 churches, 6 pastors, and 12 native preachers. The German occupation of the islands has not improved the morals of the natives.

**Marshman, Joshua**, b. April 20, 1768, Westbury-Leigh, Wiltshire, England. When young, he showed a great passion for reading. His parents being poor, his school education was defective, and he followed the occupation of a weaver till 1794. Removing then to Bristol, he taught a small school, and at the same time became a student in Bristol Academy, where he studied Latin, Greek, Hebrew, and Syriac. Having decided to be a missionary to the heathen, he offered himself to the Baptist Missionary Society, and 1799 was sent with three others to join Dr. Carey in his mission north of Bengal. As the East India Company prohibited missions in its territories, they were advised not to undertake to land at Calcutta, but to go direct to the Danish settlement of Serampore on the Hugli, 16 miles above Calcutta. They reached Serampore October 13th, 1799, and were cordially received by the governor, Colonel Bie. Carey soon joined them. Dr. Marshman, finding the support granted by the Society insufficient, with the aid of his wife, opened two boarding-schools for European children, and a school for natives. The income from these, supplemented by that of Carey as professor in the Fort William Government College, rendered their mission nearly independent of support from the Society. The Committee disapproved of this course, and censured the missionaries. Dr. Marshman in 1822 sent his son John to England to make explanations and endeavor to restore harmony; but being unsuccessful, he himself went in 1826 in order to confer with the Committee. But failing in his object, the Serampore Mission was separated from the Society, and was for several years an independent mission. He returned in 1829 to Serampore. The death, from cholera, of Mr. Ward, with whom he had labored for twenty-three years, and the treatment he received from the parent Society, greatly distressed him, so that his strength of body and mind was much impaired. Other afflictions followed. The death of Dr. Carey in 1834 left him alone. In 1836 his daughter, wife of General Havelock, barely escaped with her life from her burning bungalow, losing one of her three children in the flames. The nervous excitement from these afflictions completely prostrated him, and he died December 5th, 1837. A few days before

his death the Society in London had arranged for a reunion with the Serampore Mission, and the appointment of Dr. Marshman as superintendent.

In addition to his more special missionary duties, he applied himself to the study of Bengali, Sanskrit, and Chinese. Dr. Carey wrote to Andrew Fuller: "Brother Marshman is a prodigy of diligence and prudence; learning the language is mere play for him." He translated into Chinese the Book of Genesis, the Gospels, and the Epistles of Paul to the Romans and Corinthians. In 1811 he published "A Dissertation on the Characters and Sounds of the Chinese Language." "The Works of Confucius, containing the Original Text, with a Translation;" "Clavis Sinica: Elements of Chinese Grammar, with a Preliminary Dissertation on the Characters and Colloquial Mediums of the Chinese." He was associated with Dr. Carey in preparing a Sanskrit grammar and Bengali-English dictionary, and published an abridgment of the latter. Raja Rammohun Roy having assailed the miracles of Christ in a work entitled "The Precepts of Jesus the Guide to Peace," Dr. Marshman replied in a series of articles in the "Friend of India," afterwards published in a volume entitled "A Defence of the Deity and Atonement of Jesus Christ." To this Rammohun Roy replied. The degree of D.D. was conferred on Mr. Marshman by Brown University, 1811.

**Marsovan**, a city of Asia Minor, Turkey, 350 miles east of Constantinople, and 60 miles south of Samsun, its port on the Black Sea. Climate mild and healthy. Population of the city about 30,000; of the district 800,000; mostly Turks and Armenians, though there are a number of Greeks. Of late years large companies of Circassians from the Caucasus have been located in the villages of the plain, causing much disturbance. Mission station of the A. B. C. F. M. (1853); 4 missionaries and wives, 4 female missionaries, 14 native helpers, 5 churches, 776 church-members, 27 schools, 2,000 scholars. These cover the district. In the city itself there is a large self-supporting church.

Marsovan is also the seat of Anatolia College, which is the outgrowth of the theological seminary of the Mission, originally established in Constantinople, but removed to Marsovan. In 1881, it was divided into two parts, one for strictly theological training and the other a high-school. This has developed into a college since 1885. The course of study is very full, and of high grade. There are 10 professors and instructors, and 117 undergraduates, 58 in the college and 59 in the preparatory department; 80 are Armenians, 34 Greeks, 2 Germans, and 1 an Israelite. (See Armenia).

**Martyn, Henry**, b. Truro, Cornwall, England, February 18th, 1781; attended the grammar school of Dr. Carden in his native town; entered St. John's College, Cambridge, 1797; received in 1801 the highest academical honor of "senior wrangler," and also the prize for the greatest proficiency in mathematics. In 1802 he was chosen fellow of his college, and took the first prize for the best Latin composition. He was twice elected public-examiner. It was his intention to devote himself to the bar, but the sudden death of his father and the faithful preaching and counsels of Mr.

Simeon, the university preacher, led to his conversion and dedication to the ministry. In 1802 a remark of Mr. Simeon on the good accomplished in India by a single missionary,—William Carey,—and a subsequent perusal of the “Life of David Brainerd,” led him to devote himself to the work of a Christian missionary. He was ordained deacon October 22d, 1803, then priest, and served as curate of Mr. Simeon. But his heart was still set on work in heathen lands, and he designed to offer himself to the Church Missionary Society. A sudden disaster in Cornwall deprived him and his unmarried sister of the property their father had left for them, and it was necessary he should obtain a position that would support them both. His friends applied for a chaplaincy under the East India Company, and being appointed, he embarked for India July 5th, 1805, reaching Calcutta May, 1806. Detained at Calcutta a few months, he applied himself to the study of Hindustani, which he had begun in England, and pursued on board ship, and preached the gospel to his own countrymen. In October he went to his station, Dinapore. On the boat he studied Sanskrit, Persian, and Arabic, and translated the Parables. At Dinapore and Cawnpore most of his work in India was done in the space of four and a half months. He not only labored among the soldiers and English residents as chaplain, but preached to the natives in their vernacular, established schools, and spent much time in the work of translation. He studied Sanskrit, soon became fluent in Hindustani, and had religious discussions daily with the moonshee and pundit. In February, 1807, he finished the translation of the Book of Common Prayer in Hindustani, and soon after a Commentary on the Parables. In September he was urged by the Rev. M. Brown to take charge of the mission church at Calcutta, but declined, because he wished to labor among the natives. His Sunday service was reading prayers and preaching at 7 A.M. to Europeans, to Hindus at 2 P.M. and attendance at the hospital, and in the evening he met privately the pious and inquiring soldiers. In March, 1808, he completed the version of the New Testament in Hindustani, which was pronounced by competent judges to be idiomatic, and intelligible by the natives.

In April, 1809, he was removed to Cawnpore, 628 miles from Calcutta. He went in a palanquin in the hottest season. In his journey of 400 miles from Chunar, the intense heat nearly proved fatal to him. On his arrival he fainted away. There being no church-building at Cawnpore, he preached to a thousand soldiers, drawn up in a hollow square in the open air, with the heat so great that before sunrise many were overpowered. At the end of this year he made his first attempt to preach to the heathen in his own compound, “amidst groans, hissings, curses, blasphemies, and threatenings;” but he pursued his work among the hundreds who crowded around him, comforting himself with the thought that if he should never see a native convert, God “might design by his patience and continuance to encourage other missionaries.” He now translated the New Testament into Hindi, and the Gospels into Judæo-Persic. Having perfected himself in the Persian, he prepared, by the advice of friends, with the assistance of the moonshee Sabat, a version of the New Testament in that language. His health

being seriously impaired, the doctors ordered him to take a sea-voyage; and his version not being sufficiently idiomatic, he decided to go to Persia and correct it with the aid of learned natives, and also revise the Arabic version, which was nearly finished. After preaching in the new church, whose erection he had accomplished, he left Cawnpore October 1st, 1810. Delayed at Calcutta a month, he preached, though in great weakness, nearly every Sabbath, and also at the anniversary of the Calcutta Bible Society. He left, January 7th, 1811, for Bombay, and after a five months’ journey reached Shiraz June 9th, 1811, where, with the help of learned natives, he revised his Persian and Arabic translations of the New Testament. He made also a version of the Psalms from the Hebrew into Persian. He held frequent discussions with the mollahs and sufis, many of whom were greatly impressed. “Henry Martyn,” said a Persian mollah, “was never beaten in argument; he was a good man, a man of God.” To counteract the effect of these discussions and of his translation of the New Testament into Persian, the preceptor of all the mollahs wrote an Arabic defence of Mohammedanism, to which Martyn replied in Persian. He had also a public discussion with a professor of Mohammedan law, and another with Mirza Ibraheem, in a court of the palace of one of the Persian princes in the presence of a large body of mollahs. Having ordered two splendid copies of his manuscript of the Persian New Testament to be prepared, one for the Shah of Persia, the other for Prince Abbas Mirza, his son, he left Shiraz for the Shah’s camp to present them. The Shah refused to receive them without a letter from the British ambassador, and he proceeded to Tabriz to obtain one from Sir Gore Ouseley. On this journey he suffered much from fever; but after arriving at Tabriz, he was tenderly cared for by the ambassador and his lady. Being too ill to make the presentation to the Shah, Sir Gore kindly performed this service, and received from his majesty a letter of acknowledgment, with appreciative mention of the excellence of the translation. After a temporary recovery, he found it necessary to seek a change of climate. On September 12th, 1812, he left on horseback, with two Armenian servants, for England via Constantinople, 1,300 miles distant. Though the plague was raging at Tokat, he was compelled to stop there from utter prostration, and after a week’s illness, died, October 16th, 1812, in the thirty-second year of his age, among strangers, with no friendly hand to care for his wants. His body rests in the Armenian cemetery. A monument was erected over the grave in 1813 by Mr. Claudius James Rich, the accomplished British resident at Bagdad, with an inscription in Latin. The East India Company had another constructed, bearing on its four sides an inscription in English, Armenian, Turkish, and Persian.

He published “Sermons Preached in Calcutta and Elsewhere” (1822); “Controversial Tracts on Christianity and Mohammedanism” (1824); “Journals and Letters” (1837). The great work of Martyn’s life was the translation of the Bible. His versions of the New Testament in Hindustani and Persian, spoken by many millions of people, are enduring monuments not only to his scholarship, but to his zeal for extending the knowledge of the Christian Scriptures.

**Maruthuvambadi**, a town of Arni district, Madras, India. Out-station of the Reformed (Dutch) Church, U. S. A.; 22 communicants, 65 scholars.

**Marwari Version.**—The Marwari is a dialect of the Hindi, and belongs to the Indic branch of the Aryan family of languages. It is spoken in the province of Jaipur, or Marwar, north of Mewar. The New Testament as translated into this dialect was published at Serampore in 1821. In 1866 the Bombay Auxiliary Bible Society published an edition of the Gospel of Luke, to be used in Rajputana generally.

**Masinandriana**, a town in South Central Madagascar, a little west of Sirabe. Mission station of the Norwegian Missionary Society.

**Mason, Francis**, b. York, England, April 2d, 1799. His grandfather was rightful heir to an estate worth £200 per annum, but religious scruples prevented his going to law to secure it. So his father, a lay-preacher of the Baptist denomination, was under the necessity of supporting his family as a shoemaker, and Francis followed the same trade. The son's opportunities for schooling were small, but his father's conversations enlightened him in history, and his mother aided him to the books he craved for the study of trigonometry, algebra, navigation, and optics. Of religious controversy he heard much. He became skeptical. At the age of nineteen he came to America, travelled through many States, and settled in Massachusetts. He boarded with Mr. Putnam, the Baptist minister of Randolph, who sought in personal conversation to show him his need of a Saviour. He also married an excellent Christian woman, whose influence and prayers were blessed to his conversion. The reading of "Butler's Analogy" he mentions as having overcome his skeptical difficulties. "One of my first petitions in the corner of my workshop was," he says: "O God, give me religion, if there be any truth in religion." Theologians might say God would not hear such unbelieving prayer, but He did hear and answer too, and I soon was a praying man." "I had been moving through the world," he said, "with an aching want at my heart, but when I believed in Jesus I entered into rest." Again: "I had wandered over the world like a lost child yearning for its mother, but when I found God I felt that I had got home." He struggled for months against a conviction which grew in his mind that he ought to preach, but left it to the decision of the church in Canton, which was that he should become a minister. He was licensed to preach October, 1827, and the next month entered the Newton Theological Seminary, having previously studied Greek and Hebrew. In his second year his wife died of consumption. In connection with his first thoughts of preaching the Gospel, his mind was directed to the missionary work. In regard to this he says that the story of the conversion of the Saxon king Edwin from heathenism, told him in childhood, had much influence in turning his thoughts to heathen lands in after-years. He was appointed by the American Baptist Missionary Convention as a missionary December 17th, 1819, ordained May 23d, 1830, married Miss Helen Griggs of Brookline, and sailed May 26th for Burmah. After spend-

ing a short time at Moulmein, he was stationed, January, 1831, at Tavoy, a town with from ten to fifteen thousand inhabitants. The province contained fifty Burmese villages. He was met at the wharf by Mr. Boardman, who, unable to walk, was carried in a chair to the jetty to welcome him. He accompanied Mr. Boardman on his last tour among the Karens, and witnessed his triumphant death. Entering upon the work in his new field, he labored earnestly among the Karens, visiting them in their jungle homes, preaching, organizing churches, establishing schools. The rainy season was occupied in translating the Scriptures, and instructing in the theological seminary established for training Karen preachers. One evening, on his return from a preaching tour among the Burmans, he found a Sgau chief sitting like a child at Mrs. Mason's feet, and earnestly imploring her to visit the Karens in his village and neighborhood. "We have heard of Christianity, and it seems to us something wonderful. We do not understand it, yet it seems the thing we want. Come to our jungle homes, and preach to us. Many will believe. I have a wife, daughters, daughters-in-law, brothers and nephews, all of whom will become Christians, as well as myself, as soon as we really understand it."

Mr. Mason was not only a preacher among the Karens, he was also a man of science and a great linguist. He translated the Bible into the two principal dialects of the Karen, the Sgau and Pwo, and also Matthew, Genesis, and Psalms into the Bghai, another dialect. He wrote and printed a grammar of the first two for the use of missionaries. Wishing to give the pupils of his theological school some scientific knowledge, he wrote an original treatise on "Trigonometry, with its Applications to Land Measuring, etc." This was printed in Sgau and Burmese, and the government paid for an edition in Bghai Karen. In 1832 he received the degree of M.A. from Colby University. At the request of English residents at Moulmein he prepared and had printed a work on the natural productions of the country, entitled "Tennasserim; or, Notes on the Fauna, Flora, Minerals, and Nations of British Burmah and Pegu," of which "The Friend of India" says: "It is one of the most valuable works of the kind which has ever appeared in this country, not only for the complete originality of its information, but also for the talent exhibited in collecting and arranging it." His motive in investigating these subjects was the more accurate translation of the Scriptures. He had observed the difficulty met by translators of correctly rendering the terms used in the original Scriptures to designate beasts, birds, fishes, insects, trees, gems, and many other natural objects, the misinterpretation of which often made the sense obscure, sometimes to the native mind absurd. He studied medicine after reaching Burmah, and wrote a small work on "Materia Medica and Pathology," in three languages. His greatest literary work was a "Pali Grammar with Chrestomathy and Vocabulary," which was received by scholars with great favor. In 1842 he started a Karen periodical, the first native paper published east of the Ganges, and the next year a similar monthly in Burmese at Moulmein. The Karens had no books but many traditions, among which were many remarkable Scripture traditions, all of which Mr.

Mason collected. Those relating to Scripture were published in an appendix to his "Life of Ko-Thah-Byu." In 1846 Mrs. Mason died. His health having failed, he yielded to the advice of the mission to return for a season to America. Arriving in Calcutta with health improved, he concluded to return to Burmah and work on the translation of the Old Testament, stopping at Moulmein in order to have the advice of the missionaries there. While there he was married to Mrs. Bullard. The translation was finished in 1853, and returning to Tavoy he had the entire Bible printed. In appreciation of his marked literary and Biblical attainments the degree of D.D. was conferred upon him in 1853 by Brown University. After the printing of the Karen Bible he took his final departure from Tavoy for England and America. On reaching Moulmein with health improved, he decided to visit Toungoo, the ancient capital, and begin a new mission. He started with Mrs. Mason in a canoe, and found the people, who had never heard the gospel message, wonderfully eager listeners. Dr. Mason continued to labor until utter exhaustion compelled him to leave. But God had raised up from the Karen nation a man qualified by talent and Christian character to take charge of the new mission. San Quala had been since 1830 a consistent Christian and a faithful worker among his people in Tavoy. For fifteen years he had accompanied Dr. Mason in his jungle tours, and in 1844 was ordained. He had often desired to carry the gospel to the province of Toungoo, and soon followed Dr. Mason thither. Committing the mission to Quala, Dr. Mason left for Calcutta January 18th, 1854, and there took a steamer for England. He visited America in October, 1854, where he again embarked for Burmah July 2d, 1856. Reaching Calcutta after a long and perilous voyage, he arrived at Toungoo January 2d, 1857. The progress during his absence through the labors of Quala and three assistants was wonderful. He found 2,600 baptized Christians and 35 churches. Three years before not one in those jungles had heard of the Saviour. "When I look around me," he says, "I find myself in a Christian country, raised up as if by magic from the darkness of heathenism in three years." After his return Pwaipan, who had been a member of his theological school in Tavoy, was ordained. In his youth Dr. Mason had a great desire to be a printer. That desire was gratified in Toungoo after he was sixty years of age. Living next door to Mr. Bennett's printing-office, he learned the trade himself, taught the Karens, and soon his printing, done in English, Burmese, Karen, Old Pali, and Sanskrit, was pronounced equal to that done in the best printing-offices in India. Dr. Mason's last missionary labor was a visit to Bhamo in Upper Burmah, on the Irrawaddy, to endeavor to establish a mission among the Ka Khyens. In this he failed, but was permitted by the king to live and work in Mandalay. Having entered into a contract with the E. I. C. to print a new edition of one of his books on Burmah, he started for Calcutta, but was attacked with fever at Rangoon, and after a short illness died March 3d, 1874, aged 74.

Besides the works mentioned, he published a memoir of his second wife, Mrs. Helen M. Mason, "Life of Ko-Thah-hyu, the Karen Apostle," a collection of Karen hymns, "The

Story of a Workingman's Life," an autobiography.

**Masset**, Queen Charlotte's Islands, North Pacific, U. S.; a town on one of Queen Charlotte's Islands, which lie in the North Pacific Ocean about 70 miles off the coast of British Columbia. Climate healthy and temperate; rainfall very great. Population, 1,000, composed of people of the Haida race. Language, Haida, a strange tongue totally different from the languages of the coast. Religion, pagans up to 1876; now Christian. Station of the Queen Charlotte Islands' Mission. C. M. S. occupied it in 1876 by Rev. W. H. Collison; present missionary, Rev. Charles Harrison; 1 out-station with 350 adherents, 1 organized church, 132 communicants, 2 preaching-places with an average attendance of 350, 3 unordained preachers, 1 Sabbath-school, 60 scholars; 1 other school, 63 scholars, 2 teachers.

**Massitissi**, a small town in Cape Colony, South Africa, on a southern branch of the Orange River, southeast of Bethesda. Mission station of the Paris Evangelical Society (1866), 1 missionary, 7 evangelists, 511 communicants, 293 scholars.

**Massowa** (Massawah), a town on the coast of Abyssinia, brought into special notice by its occupation by the Italian forces. Occupied at one time by missionaries of the Swedish Missionary Society. They were, however, driven away, and remained in Syria until the Italian troops went to Massowa, when they went with them, hoping thus to get access to the interior, a hope which has been in a measure fulfilled. (See Abyssinia.)

**Masulipatam**, city in Madras, British India, Kistna district, 215 miles north of Madras, with 37,000 inhabitants. Mission station C. M. S.; 8 missionaries, 2 missionaries' wives, 31 native helpers, 366 communicants, 26 schools, 423 scholars, a seminary, a printing establishment, and active zenana mission.

**Matale**, town in Ceylon, 15 miles north of Kandy. Population, 3,529. Mission station of Baptist Missionary Society (1868); 1 missionary, 3 out-stations, 59 school-children, 17 church-members. S. P. G.; 1 missionary, 40 communicants, 2 schools, 4 teachers, 115 scholars. The coffee-plantations here are mostly owned by European planters, and worked by coolies imported from the continent, as the natives are very lazy. The mission among the coolies receives much encouragement from the planters, but has to stand a good deal from the trickery of the natives.

**Matamoras**, city on the northeast Mexican frontier, 450 miles north of the city of Mexico. Climate, semi-tropical. Population, 12,000, Mexicans, Spaniards, Aztecs. Language, Spanish. Religion, Roman Catholic. Natives poor, ignorant, superstitious, lazy. Mission station of Presbyterian Church (South) (1874); 1 missionary and wife, 3 other ladies, 9 native helpers, 6 out-stations, 7 churches, 500 church-members, 1 theological seminary, 4 students, 2 schools, 175 scholars. Methodist Episcopal Church (South); 1 native preacher.

**Matara**, a town in the district of Colombo, Ceylon, northeast of Colombo. Mission station of the S. P. G.; 2 missionaries, 1 native agent,

3 out-stations, 3 churches, 121 church-members, 12 schools, 1,166 scholars. Wesleyan Methodist Missionary Society (England); 3 missionaries and assistants, 3 local preachers, 100 church-members, 841 scholars.

**Matara**, on the Berbice, British Guiana, South America, is the seat of a Plymouth Brethren's station, which works with great success among the Indians, negroes, and Chinese.

**Matautu**, a town on the island of Savaii, Samoan Islands, Polynesia. Mission station of the L. M. S.; 1 missionary, 17 native preachers, 1,024 church-members, 1,450 Sunday-school scholars, 1,400 other scholars. The Wesleyan Methodists (England) also carry on work here, but no statistics are available.

**Matawankumma**, a station of the C. M. S. in the Moosonee district, Canada; 3 native workers, 62 church-members, 1 school, 24 scholars, among the Ojibwa Indians.

**Matchuala**, a city of Mexico, State of Coahuila. Mission station of the Southern Baptist Convention; 1 missionary and wife.

**Mather, Robert Cotton**, b. November 8th, 1808, at New Windsor, Manchester, England; educated at Edinburgh, Glasgow, and Hamerton College; sailed July 9th, 1833, for India, as a missionary of the L. M. S. He was stationed at Benares for four years, and then removed with his family to Mirzapore, founding a new station. In 1884 he went to England for his health. Returning in 1846, he continued his work in and around Mirzapore, and prepared Christian vernacular literature. He again visited England in 1857, where he was occupied for three years, at the request of the North India and the British and Foreign Bible Societies, engaged in making a revision, with marginal references, of the whole Bible in Urdu. This was carried through the press, and the New Testament in English and Urdu was reprinted. He re-embarked for India November 20th, 1860, with Mrs. Mather. In 1862 he received the degree of LL.D. from the University of Glasgow. In 1869 he left Mirzapore for Almora, seeking to benefit his health. He aided in mission work while carrying on his literary work, completing a new edition of the entire Bible in Urdu-Roman. He commenced work on an edition in Urdu-Arabic with references. He returned to Mirzapore in 1870. In 1873 he left India on his final return to England. At the request of the Religious Tract Societies of North India and London, he undertook to prepare and carry through the press a Hindustani version of the New Testament portion of the Tract Society's Annotated Paragraph Bible. This was completed in two years. He then undertook the preparation of a similar version of the Old Testament portion of the same work. Unable to resume foreign missionary work, he thus continued in England to work for India with his pen. He died at Finchley, near London, April 21st, 1877.

**Matsumoto**, Japan, a town in the Nagoya district, on the main island (Nippon), south of Tokyo. Mission station of the Methodist Episcopal Church, (North); 2 native preachers, 30 church-members, 1 school, 35 scholars.

**Matsushiro**, Japan, a town in the Nagoya district, South Nippon Island. Mission

station of the Methodist Episcopal Church (North); 1 native preacher, 35 church-members.

**Matsuyama**, Japan, a town in the Hiroshima district, in the extreme southwestern part of the island of Nippon. Mission station of the Methodist Episcopal Church (South), U. S. A.; 1 missionary and wife.

**Matsuye**, Japan, a town on the northern coast of the southwestern extremity of the island of Nippon, northeast of Hiroshima. Mission station of the C. M. S.; 1 native pastor, 16 church-members.

**Mattisudden**, a town in Central Lapland, southeast of Jokmok. Mission station of the Friends of the Mission to the Lapps (Sweden).

**Mattoon, Stephen**, b. Champion, N. Y., U. S. A., May 5th, 1816; graduated at Union College 1842, at Princeton Theological Seminary 1846; ordained as an evangelist by the Troy Presbytery; sailed for Siam as a missionary of the Presbyterian Board July 20th, 1846, reaching Bangkok March 22d, 1847. Bitterly opposed at first, he soon won the confidence of the people, and carried forward the missionary work with great success. A treaty having been negotiated between the United States and Siam in 1856, at the solicitation of the American Government and the Siamese authorities, and for the good of the mission cause, he consented to act as United States consul until some person should be sent to take his place. He held the office for three years. Meanwhile his mission work was not intermitted. He was the first to translate the gospels into the Siamese tongue, and his last great work before returning home was the revision of the entire New Testament in that language. "The records show that he was a leader in all the details and enterprises connected with the mission, and that his prudent counsel was sought and his advice accepted by all." He resided and labored mainly in Bangkok, and was pastor of the First Presbyterian Church in that city from 1860 to 1866. In the latter year, on account of the failure of Mrs. Mattoon's health, he returned home. In 1867 he was settled as pastor of the Presbyterian Church at Ballston Spa, N. Y., from which he was released, December 2d, 1869, to accept the presidency of Biddle Institute, (chartered in 1877 as Biddle University), at Charlotte, N. C., which position he held till 1885, still retaining his chair as Professor of Theology and Church Government till near the time of his death in 1889. He was at the same period stated supply of several churches. He was an indefatigable worker in his classrooms, and on Sundays would often ride 25 miles to preach the gospel to some little colored church. During the last year of his life his health failed rapidly from organic disease of the heart, but having somewhat improved from a visit to Clifton Springs, he started for his Southern home, stopping on the way with his daughter, Mrs. Thomas, at Marion, Ohio. There he rapidly grew worse, and died August 15th, 1889, aged 75. To the great educational work among the freedmen he gave himself with ardor, and with it to the labor of preaching the gospel to the colored people throughout that region. Commencing his work in the reconstruction period, when passion and prejudice controlled public senti-

ment, he soon by his prudence and wisdom won the confidence and support of the community, and the universal grief at his funeral attested the esteem in which he was held. He was interred at Charlotte, N. C. Dr. Mattoon was honored with the degree of D.D. by his Alma Mater, Union College, in 1870.

**Maubin**, town in Thongwa district, Irawadi Division, Burma, directly west of Rangoon. Climate warm, unhealthy. Population, 1,589. Burmese, Karens, Shans, Chinese, Hindus of all castes. Languages: 42 different tongues used by the various races represented in Burma. Religion, Buddhism, demon-worship, and various other idolatrous forms. Mission station of the American Baptist Missionary Union among the Pwo Karens (1880); 1 missionary and wife, 1 other lady, 22 native helpers, 15 out-stations, 15 churches, 635 church-members among the Pwos.

**Maui**, one of the Hawaiian Islands, between Hawaii and Oahu. The inhabitants, 12,109 in number, are all nominally Christians. Station of the Hawaiian Evangelical Society, which has taken up the work commenced by the A. B. C. F. M.

**Maupiti**, one of the Society Islands, South Pacific, 60 miles northwest of Raiatea. Mission station L. M. S.; 1 native pastor.

**Mauritius**, Island of, lies in the Indian Ocean, 500 miles east of Madagascar. Area, 708 square miles. Together with its dependencies, the Seychelles group, Rodriguez, and Diego Garcia (total area, 172 square miles), it forms a colony of Great Britain. Climate tropical, and very malarious and unhealthy on the coast. Population, 1889, 369,302; of this number 251,550 are Indians, and the remainder are Africans, mixed races, and whites. The Chinese number 3,935. The people are divided in their religious belief as follows: Hindus, 200,000; Roman Catholics, 108,000; Mohammedans, 35,000; and Protestants, 8,000. State aid is granted to both Roman Catholics and Protestants. English, French, and the languages of the different races represented are spoken there. The island was originally a French colony, and a stronghold of the pirates in the Indian Ocean. In 1810 the English took possession of it, and in 1834 the 90,000 negro slaves were emancipated. The island is one of the foremost sugar-producing places of the globe, and the emancipation of the slaves necessitated the importation of labor from China and India, with the resulting conglomerate population. Education is conducted partly in government and partly in state-aided schools, 144 in number, with an average attendance (1888) of 10,143. There is also a Royal College. Missionary work was commenced here in 1814 by the L. M. S. (q.v.). After the Society gave up the mission in 1832 Mr. Le Brun, their missionary, returned to the island and took the pastoral care of the people, and the church of 50 members. When persecution in Madagascar (1836) drove out both Christians and missionaries, one of the latter, Mr. Johns, went to Mauritius, and continued to labor among the Malagasy. A plot of land was procured, and a congregation of Malagasy refugees was gathered together in 1845, after Mr. Johns' death, and theological instruction was given to young men from Madagascar, to

prepare them for work, as soon as the persecution ceased. In the meantime Mr. Le Brun continued his labors among the natives, and in 1850 there were 173 church-members at the stations of Port Louis and Moka. At the present time there is a native church council, who number 2,221 Christians on the rolls of their churches.

The S. P. G. station (1836) now numbers 4 missionaries, 383 communicants, 10 schools, 455 scholars. The C. M. S. Mission (1856) is carried on among (1) the Tamil-speaking coolies, (2) Bengali and Hindus, (3) the Chinese, (4) Seychelles Islanders. They number 5 pastorates (exclusive of Chinese and Seychelles Missions), 3 missionaries, 1 layman, 3 native pastors, 542 communicants, 25 schools, 1,562 scholars. Much hindrance to the work of the Protestant missions is caused by the efforts of the Church of Rome to get the larger part of the state grants in aid of education.

**Mauritius Creole Version.**—The Mauritius Creole is a dialect of the French, belonging to the Græco-Latin branch of the Aryan family of languages, and is spoken by about 350,000 Creoles in Mauritius, East Africa. It is the only medium of communication among all the languages and dialects of the island. A translation of the Gospel of Matthew into this language was made by the Rev. T. H. Anderson, a native of Mauritius, and after having been revised by several Mauritius scholars it was published by the British and Foreign Bible Society in 1884. Encouraged by the reception given to the version of Matthew, the same Society issued in 1887 a tentative edition of 500 copies of the Gospel of Mark, also prepared by Mr. Anderson.

**Mavelikara**, town in Travancore, Madras, India. Mission station of the C. M. S. The church council centred here includes 8 pastorates.

**Mawphlang**, a city of Assam, India, among the Khasia and Jaintia Hills. Mission station of the Welsh Presbyterian Church; 1 missionary and wife. The district contains 2 churches, 3 preaching stations, 123 church-members, 159 Sunday-scholars and teachers, and 103 day-scholars. A successful medical mission is also carried on.

**Maya Version.**—The Maya belongs to the languages of South America, and is vernacular to the Yucatan Indians. The Gospel of Luke was translated and published between the years 1862 and 1866 by the British and Foreign Bible Society. In 1870 an edition of the Gospel of John was published at London, the translation having been made by the Rev. R. Fletcher of the Wesleyan Missionary Society.

(*Specimen verse.* John 3: 16.)

Tumen bay tu yacuntah Dioz le yokolcab, ca tu caah u pel mehenan Mehen, utial tulacal le max cu yoczietyul ti leti, ma u kaztal, uama ca yanacti cuxtal minanuxul.

**Mayaguana**, a station of the Baptist Missionary Society in the Bahama Islands, West Indies; 3 evangelists, 3 out-stations, 66 communicants, 40 pupils.

**Mayaveram** (Majaveram), a town of the Tanjore district, Madras, India, northwest of Tranquebar, northeast of Combaconam, be-

tween the Cauvery River and the sea. Mission station of the Evangelical Lutheran Society of Leipsic, founded in 1845; 1 missionary, 1 native pastor, 771 communicants, 223 scholars.

**Mayhew, Experience**, b. Martha's Vineyard, R. I., U. S. A., 1673. He was the oldest son of Rev. John Mayhew and great-grandson of Gov. Thomas Mayhew. In 1694, at the age of twenty-one, he began to preach to the Indians, having the oversight of six congregations, which continued until his death, a period of sixty-four years. Though not liberally educated, Dr. Cotton Mather, in a sermon printed in Boston 1698, and reprinted in his "Magualia," London, after speaking of more than "thirty hundred Christian Indians," and "thirty Indian assemblies," adds: "A hopeful and worthy young man, Mr. Experience Mayhew, must now have the justice done him of this character, that in the evangelical service among the Indians there is no man that exceeds this Mr. Mayhew, if there be any that equals him." He learned the Indian language in his infancy, and having afterwards thoroughly mastered it he was employed by the Commissioners to make a new version of the Psalms and the Gospel of John. This was accomplished in 1709, in parallel columns of English and Indian. He was offered the degree of Master of Arts by Cambridge University, which he declined; but it was conferred at the public commencement July 3d, 1728. He published in 1727 "Indian Converts," comprising the lives of 30 Indian preachers and 80 other converts; also a volume entitled "Grace Defended." He died 1758.

**Mazatlan**, a town in the Sonora district, Mexico. Mission station of the Methodist Episcopal Church (South), U. S. A.; 1 missionary, 1 native preacher.

**Mbau**, a city in Witi-Lewu, one of the two large islands in the Feejee group, Polynesia. One of the chief stations of the Wesleyan Missionary Society in this region. It was the residence of King Thakombau, who in 1834 was converted to Christianity, after many feuds with the French, who introduced a Roman Catholic Mission in Awalau, and with European and American traders finally brought peace and order to the islands by placing them in 1874 under English protection. He sent the queen a silver-inlaid club as token of his submission, and she accepted it. Mbau has given its name to the principal dialect spoken in the Feejee Islands, that one in which Calvert and Hunt translated the Bible.

**Mbulu**, city in Cape Colony, South Africa, 70 miles northeast of King William's Town, 10 miles southeast of Queenstown, 70 miles inland from the mouth of the Kei River. Climate very healthy. Population, 50,000. Race, Fingo. Language, Abantic. Religion, Fetichism; fast becoming Protestant Christianity. Social condition barbarous; polygamy, circumcision, and tattooing common. Mission station (1868) United Presbyterian Church of Scotland; 1 lady, 45 native helpers, 9 out-stations, 9 churches, 590 church-members, 12 school children.

**Mbwani**, a city of Zanzibar, East Africa. Mission station of the Universities Mission to Central Africa, with 2 clergy, 7 laity, 1 native reader, 6 native teachers. There is a home for 71 girls, and a separate building for an indus-

trial school with 21 girls. A village of 300 released slaves, with permanent church, domestic chapel, workshop, traction engine, lime kiln, etc

**McAll Mission**, known also as the "Mission Populaire Évangélique de France." Headquarters, 28 Villa Molitor, Auteuil, Paris.—The first thought of this "Mission to the Workmen of France" was suggested to the founder, Dr. Robert W. McAll, by the urgent request of a French workman to come over and teach them "a religion of freedom and earnestness;" in place of the imposed religion of the Church of Rome, which he and thousands of his fellows in the turmoil of the revolution had cast off. These words, spoken in August, 1871, led Dr. McAll to leave his English home and pastorate, and devote himself to those who through their comrade had made this appeal.

Plans of work were formed, and a suitable place of meeting found, and opened January 17th, 1872, in Belleville, the capital of the Commune, where Miss De Broen had already established her work. The constitution of the mission has been developed as circumstances have indicated. At first a purely personal and private effort to make known the love of God in Christ, it soon gathered to itself willing helpers, who were rejoiced to find that there was so ready a hearing for the truth. Soon appeals came from distant parts of the city that meetings might be held there too. Gradually new halls were opened; at present there are 42 in and around Paris, and 88 scattered throughout 33 out of the 86 Governmental Departments into which France is divided.

The mission is guided by a Board of Directors, and is carried on among the French, in their own country and the adjacent colonies, Corsica, Algiers, and Tunis. The workers from Paris have been sent for to inaugurate efforts in other places, and thus the work has radiated to the extreme points of the land, until more than 60 cities and towns have received the light of God's truth.

In connection with its halls it has established Bible-schools on Sundays and week-days, mothers' meetings, dispensaries, libraries, societies for Bible study and Christian converse, domestic visitation, tract distribution and circulation of the Scriptures, besides the regular services and preaching of the gospel.

Forming no separate churches of its own, it helps all evangelical workers, and knits its converts to the existing churches. At the same time all evangelical pastors assist in its meetings, and in many cases find there the people who will not enter their churches.

The workers in this mission do not attack any forms of Christian life around them, but freely proclaim God's truth, leaving it to meet the errors of the past. In contrast with the constant demands for payment of service in the Church of Rome, the mission has from the first presented the message of the gospel freely to the people. Its support has been derived from generous gifts of Christians in Great Britain, Ireland, America, and many parts of Europe. No development of the work of sustaining the mission has been so remarkable and interesting as the growth of the American McAll Association, which numbers more than 60 auxiliaries.

Extensive work has been done this year (1889) in halls close to the main entrance to the

Exposition. Co-operating with the British and Foreign Bible Society, and the Religious Tract Societies of London and Paris, these halls have been used for the distribution of the Scriptures and tracts, as well as for the regular preaching of the gospel.

There are now open 130 mission halls, having 20,000 sittings. More than 20,000 meetings have been held during the past year, with an attendance of 1,155,000; 26,000 visits to the homes of the people have been paid, and more than 500,000 Scriptures, tracts, and illustrated papers circulated.

A maritime branch of this mission carries on very interesting work among the seaboard towns of France. By means of the "Herald of Mercy," a missionary boat lent to the mission by Mr. Henry Cook, of the Portsmouth and Gosport's Seamen's Mission, services are held in many places otherwise inaccessible. The chief part of the time available in 1888 was divided between the northern seaports Cherbourg and Morlaix. In both places crowds of all ages and classes flocked to the vessel on each occasion when a meeting was to be held. None were more eager listeners than the soldiers of the garrison at Cherbourg. A permanent mission hall was the result of the visit of the ship. Morlaix, a town in the very midst of Popish Brittany, was an entirely new and untried sphere for such efforts. The preaching was conducted in the native Breton, as well as as in French. On every occasion the people crowded around the vessel, filled the cabin and the deck, and stood on the quay seeking to hear. The pure gospel of Christ came as a new and surprising discovery to multitudes, and on all sides the earnest desire was expressed that another season the "Herald of Mercy" might visit Morlaix again.

In connection with the mission are also free lending libraries, dispensaries, etc. During the year 9,000 persons have been prescribed for at the latter; the very poorest make use of them, and many come from long distances, so much do they prize the kind aid offered them. To all the gospel is spoken, and many weary and troubled hearts are comforted.

The mission in Tunis embraces "foreign mission" work, in addition to its work for the French and German residents, through its connection with the Kabyle Mission, whose evangelist, Mr. Jocelyn Bureau, was one of the early converts at Belleville.\* In Algiers, also, meetings are held for the purpose of reaching the Arab population.

The mission is greatly aided in its work of distributing tracts, etc., by the large grants made to it by various societies. Among these the "Feuilles Illustrées," published by the Children's Special Service Mission, are greatly prized.

**McKullo**, a town in Eastern Abyssinia, North Africa, just inland from Massowa. Mission station of the Swedish Evangelical National Society.

\* Owing to the fact that Mr. McAll's Mission had its first station at Belleville, it is often confounded with "Miss De Broen's Belleville Mission" (q.v.). As will be seen, the two missions are entirely distinct in origin, organization, and scope, having in common only the earnest desire to bring the gospel to the multitudes who are destitute of it. Miss De Broen, knowing from experience the magnitude of the work, urged Mr. McAll to listen to the appeal of the French workingman, and establish a mission for them.

**McMullin, Robert**, b. Philadelphia, Pa., U. S. A., November 30th, 1832; graduated at the University of Pennsylvania 1850, and at Princeton Theological Seminary 1854; ordained July 27th, 1856, and sailed for India September 11th, the same year, as a missionary of the Presbyterian Board of Foreign Missions. He was stationed at Futtehghurh. A few months before his capture by the Sepoy rebels he wrote: "We are trying to be calm and trustful, but this cloud is fearfully dark. No matter whether our lives be prosperous or adverse, God has some gracious purpose, which will sooner or later be made manifest." When the mutiny broke out, he with other missionaries endeavored to reach Allahabad, a British station, but was made prisoner, and put to death at Cawnpur by order of the rebel chief Nana Sahib, June 13th, 1857.

**Medak**, a city of the Hyderabad district, India. Station of Wesleyan Methodist Missionary Society (England); 2 missionaries, 13 church-members, 1 school, 7 scholars.

**Medhurst, Walter Henry**, b. London, England, 1796; learned the trade of a printer; was educated for the ministry, and, having decided to be a missionary to the heathen, was appointed by the London Missionary Society, and sailed as its missionary in 1816 for Malacca. He was ordained there in 1819. In 1822 he was established at Batavia in Java, remaining there eight years, during which time and for several years afterwards he performed missionary work in Borneo and on the coasts of China. Having spent two years in England, he was in 1843, after the conclusion of the first war with China, stationed at Shanghai, where he remained till his final return to England in 1856. This was the earliest Protestant mission in that city. The printing-press owned by this Society, which had to this time been worked at Batavia, was now removed to Shanghai, and was under the charge of Mr. Medhurst. He preached three times a week to the patients in the hospital, and distributed tracts to readers. While in Shanghai he performed much mission work in the interior of China amid great peril. The mission was much opposed by Romanists, but it grew so rapidly that in 1847, 34,000 copies of various works were printed and 500 tracts widely distributed. A union chapel was built, and Mr. Medhurst wrote: "Our sanctuary opened August 24th, 1846, when every part of it was crowded with hearers who listened attentively to the preached word." In 1847 three Chinese were baptized, one of them a literary graduate. The University of New York conferred on Mr. Medhurst in 1843 the degree of D.D. In 1847 delegates from several missions convened in Shanghai for the revision of the Chinese versions of the Sacred Scriptures. After the completion of the New Testament Messrs. Medhurst, Milne, and Stronach, by instruction of the directors, withdrew from the general committee, and prosecuted the work of revision of the Old Testament. This was completed in 1853. The result of this revision was virtually a new version of the Bible, very correct in idiom and true to the meaning of the original.

Dr. Medhurst left Shanghai in 1856 in impaired health for England, and died two days after reaching London, January 24th, 1857. A remarkable linguist, he was a proficient in

Malay, well versed in the Chinese, Japanese, Javanese, and other Eastern languages, besides Dutch and French, in all of which he wrote. "Strong, sprightly, versatile, and genial, he was a man of extraordinary gifts and generous soul. No efforts (and many were made) could draw him from his devotion to the work of missions."

**Mediæval Missions.**—We include in this title all missions of Catholic Christendom from A.D. 500 till the Reformation. The missions of the Nestorians in Central and Eastern Asia, although in their bloom during this period, are so entirely detached from the rest that they form a subject apart.

We can hardly speak of missions of the Catholic Church in the East, in the Middle Ages. Russia, it is true, embraced Christianity in the 10th century. But this fundamentally important transition (we can hardly say that, to this day, it is a conversion) was not induced by missionary persuasion, but by a deliberate determination of the monarch, who issued orders to his subjects to be baptized and was implicitly obeyed.

The conversion of Ireland took place in the century previous to our *terminus a quo*. It was the real foundation of Mediæval Missions. To Ireland, much more certainly than to Rome, the Christianization of both England, Scotland, and Germany was due.

South Britain, under the Romans, of course shared in the general Christianity of the Empire. But when the heathen English came over from northern Germany and Jutland, they, in their slow, stubbornly contested advance, swept the land clean, as of its civilization and historical remembrances, so of its religion. The still unconquered Britons, retreating into the Welsh mountains, with difficulty maintained there a Christianity which the conquering English utterly despised. And when, in 597, the Benedictine abbot Augustine, and his companions, sent by Pope Gregory the Great, persuaded the men of Kent to accept the gospel, which from Kent spread among the West, East, and Middle Saxons, the Middle and Northern English remained but little affected. It is true, Paulinus, a companion of Augustine, accompanying a Kentish queen of Northumbria to York, prevailed on the Northumbrian king, her husband, and on his priests and nobles, to accept baptism, which the peasantry likewise received out of deference to their superiors. Yet, as Professor Green remarks, these latter remained profoundly indifferent to their new religion. The real Christianization of Northumbria came from Ireland. Columba, a youth of the royal blood of Ulster, having, as a penance for a civil war kindled through his fiery Celtic temper, been required to exile himself to Caledonia, and to spend the rest of his life in laboring for the conversion of the Picts, founded the famous monastery of Iona in the Hebrides, from which he and his disciples poured out with irresistible zeal and with complete success over the lands of the Northern Picts, the Southern Picts being already largely Christian. They were aided by the fact that western Caledonia was largely occupied by Christian Scots of Irish extraction. The Scottish kings, succeeding through intermarriage to the Pictish throne, gave the name of Scotia to the whole land, and withdrew it from Ireland, which was the original Scotia.

From Iona came the humble and zealous bishop Aidan to Northumbria, where he labored with great success. But the full Christianization of the country was accomplished through his disciple Cuthbert, who, himself a Northumbrian Englishman of humble birth, understood the inmost heart of his rude but strong and really tender-hearted countrymen, whose race extended from the Humber to the Forth. Of simple habits, dauntless courage, strong sense, ready wit, tenderness of heart, deep devotion, and of a missionary zeal inflamed by the example of his Irish masters, he became the Apostle of the North. From York the tide of Irish and Northumbrian missionary zeal rolled down upon Middle England, which then formed the kingdom of Mercia. Here the Mercian king, Penda, finding his political account in becoming the champion of heathenism, made a desperate stand against the new religion. But heathenism being already undermined in men's convictions, collapsed entirely at Penda's defeat and death in battle against the Northumbrians. Thenceforth the Mercians likewise gave up the old gods with one consent, and England was now Christian from the Forth to the Channel, being bounded by the Christian Scots on the north and the Christian Welsh on the west, which latter, however, in their implacable animosity against their conquerors, had refused to take the slightest share in the work of conversion.

East Anglia (now Norfolk and Suffolk) meanwhile had also become Christian, by contagion from the two great Anglian realms of Northumbria and Mercia, as well as by direct Roman efforts from the south. But so little is it true that Middle and Northern England were mainly converted by the Romans that even Sussex, on the British Channel, became Christian through the efforts of the exiled northern bishop Wilfrid, who preached to the rude fishermen at the same time that he won their hearts by teaching them greater skilfulness in plying their art. It is true, Rome and Iona may be said to have wrought conjointly in him, as he was an adherent of the Roman discipline.

The merits of Rome in the conversion of England are, however, great: (1) she initiated it; (2) she mainly converted the Saxons, as distinguished from the Anglians; (3) she introduced the gospel among the Anglians; (4) she undertook and carried through, with general consent of the English, that to which the Irish were everywhere utterly incompetent, namely, the organization and practical conduct of the English Church, which she thus held in unity with the general body of Christendom, and preserved it from erratic developments and from final disintegration and anarchy, such as befell the Irish Church, and finally induced even her to submit herself to the organizing skill of Rome.

The Irish Church was, during the early Middle Ages, equally zealous and equally effective in the work of conversion on the Continent. She was, indeed, the great missionary church of this era. The reception of the gospel in Ireland, although it did nothing to control the intertribal anarchy and to remove the moral rudeness of the people generally, evoked unbounded enthusiasm in thousands of elect spirits, who gathered around their abbots in multitudes of monasteries, surrounded by pious families, and gave themselves

up to an extravagant asceticism, but also to noble intellectual pursuits, and a deep study of the Scriptures. Irish piety, says Green, had (as it still has) a very imperfect control over the passions of anger and wrath; it was deficient in that moral dignity which was congenial to Roman, and is still more congenial to the higher English, piety; but, on the other hand, it was ethereal, full of tender and delicate sentiment, and pervaded with the glow of a fiery enthusiasm, which, finding insurmountable obstacles at home in an anarchy which it knew not how to reduce into order, poured itself in an irresistible flood upon Western and Middle Europe. The Irish at this time were incomparably superior to the Romans in point of knowledge, while the Irish temperament and the Irish mind, perhaps the finest didactic mind in the world, had an extraordinary power of communicating its convictions. The Irish monks, caring little for the secular clergy, allowed them to marry. They honored an abbot vastly more than a bishop. But they themselves, in their unsparing asceticism, presented to the wretched Continental populations of that era, succeeding the fearful devastations of barbarian conquest, the impressive spectacle of men living, by their own free will, a more wretched life than the wretched peasants, and yet making not the least account of this destitution of earthly comforts. No wonder then that they were listened to with profoundest reverence, and contributed mightily to the fuller Christianization of their fellow-Celts (of the Cymric branch, it is true), the rural populations of Gaul, and to the rooting of the gospel in Switzerland and in various parts of Germany, especially the south.

The great Irish missionary on the Continent was Columban (not to be confounded with the earlier Columba, of Iona), who established his monastery in 590 among the Vosges Mountains in Eastern Gaul. The monastic rule known as his, with its intolerable severities, is judged to be of later date. His own rule was severe, but practical, combining ascetic self-discipline, manual labor in various forms, and study, especially of the Scriptures. He laid great stress on the inward state, and subordinated all observances to this. But his courageous opposition to the wickedness of Queen Brunehild caused his expulsion from Frankish Gaul into what is now Switzerland. His enemies, however, following him up, expelled him after three years from his missionary labors here also. He withdrew into Italy, where he died in 613, in the monastery which he had founded at Bobbio, near Pavia.

He left behind, however, (detained by sickness, like St. Paul among the Galatians), a beloved pupil, a young Irishman of good family, named Gallus. Gallus sought out a retreat in the deep woods of Eastern Switzerland, where he founded the monastery famous for so many centuries as St. Gall, the nucleus of the present canton of that name. It became a great centre of population, civilization, learning, and Christianity for Eastern Switzerland, the Tyrol, and Southern Germany. Somewhat later came the Irish Fridolin, laboring in Alsace, Switzerland, and Suabia; and the Irish Thrudpert (whom the Germans call St. Hubert), laboring in the Black Forest. The Irish Cilian, after 650, labored in West Thuringia, towards the middle of Germany.

And these are only shining examples of an endless succession of missionary monks, that poured out for two or three centuries from Ireland into Gaul, Switzerland, Southern and Middle Germany. Before Boniface began his labors, about 720, Southern Germany seems to have been mainly, and Middle Germany largely, Christianized. The Saxons, who filled the great northern plain of Germany, gave not the slightest heed to the gospel, the acceptance of which they regarded as the mark of subjection to their rivals, the Catholic Franks.

From of old, along the Rhine and the Danube, and even farther in the heart of Germany, there had been Christian congregations. And though these had been ravaged and trodden down in the tumultuous movements of the Migration of the Nations, which overthrew the Roman Empire, they still offered a good many points of attachment for the Irish missionaries. Holy men, whose hearts were moved with compassion for the unspeakable miseries of this age, offered themselves as centres of consolation, both spiritual and temporal. The most illustrious of these were, on the Danube, Severinus, whom some held to be a North African and some a Syrian, and, near the Rhine, Eligius, of an old Christian family of the Franks, originally a goldsmith, afterwards a bishop. Both these men distinguished themselves by boundless compassion and works of mercy, sometimes redeeming captives, sometimes interceding successfully for the wretched people with their barbarian conquerors, and thus laying foundations the traces of which still subsisted when the Irish missionaries subsequently began their labors. Eligius, indeed, was later than the earliest of these missionaries.

There was, however, the same difficulty with Irish missionary work on the continent that there had been in England, namely, a want of unity and of organizing power. In Ireland itself, beyond a general deference paid to the abbey and bishopric of Armagh, there was no ecclesiastical unity. The priests had no defined parishes, the bishops no defined dioceses. The abbots were the real ecclesiastical rulers, but every abbot only of his own monastic sept. And this confusion and jarring individualism was reflected in the Irish work abroad. Ireland, moreover, having been for a long while cut off by the wall of English heathenism from the rest of Western Europe, had diverged in various particulars, not so much of doctrine (for both parties stood on the foundation of the great councils, including the Council of Orange) as of ecclesiastical usage in discipline, worship, and polity, points which necessarily occasioned a perpetual friction. Especially was it intolerable that while the Romans had adopted a corrected Easter cycle, the Irish still adhered to the earlier, unreformed cycle. Thus, before Oswiu of Northumbria had wisely decided to accept the Roman discipline, the Northumbrian kings had sometimes been holding the Easter rejoicings while their Kentish or Saxon queens were still, in the sadness of the Passion-week.

Germany, therefore, compelled like England to commit her Christian future either to the erratic uncertainty of Irish impulse or to the steady, though certainly much harder, hand of Roman discipline, decided, and doubtless on the whole decided wisely, for the latter. Many free influences and simpler Christian apprehen-

sions were, it is true, compelled to give way for a time. But in reality the Irish national spirit was as distinctly alien from Germany as the Roman. And, except in some casual particulars, the spiritual depth and evangelical freedom of the future Protestantism were no more anticipated in Celtic than in Latin Christianity. Protestantism was, as to its human source, an entirely original creation of the Teutonic genius, which first really apprehended the full significance of the apostolate of Paul. That Rome prevailed, and Ireland gave way in the final settlement of the German Church, cannot, therefore, be regarded on the whole otherwise than as a providential good. The more we learn of the Middle Ages, the more fully we become aware that there were never absent from them seething forces of spiritual and social anarchy, which Rome could hardly control, and which Ireland, herself anarchical, could not have controlled at all. There were, moreover, still latent in the Saxons of Northern Germany, and yet more terribly in the brooding cloud of Scandinavian piracy that was one day to burst forth over Europe, aggressive forces of heathenism, which could not have been withstood by any fabric less firm than that great organism owning Rome as its centre, which finally extended to the very Orkneys, and at last took in Ireland herself, and grappled with the most formidable enemy by incorporating the Scandinavian North. Neander, regretfully as he recounts the ultimate prevalence of Rome, acknowledges that the rude nations needed a rigorous discipline of centuries before they would be ripe for spiritual and national independence.

The conference at York, in the year 664, before King Oswiu, between Bishop Colman, of the Irish use, and the presbyter Wilfrid, of the Roman use, decided the Northumbrians and Mercians to join with the Saxons and Jutes of Southern England in accepting Rome, rather than Iona, as their future spiritual metropolis. It decided no less the ecclesiastical destiny of Germany. For it was an Englishman that was finally to bring Germany into conformity with Rome, and away from conformity with Ireland.

Winfrid, as he was properly called, was born in Kirton, Devonshire, in the year 680. His father, a man of wealth, destined him for some secular profession, but, humbled by a reverse of fortune, yielded at length to his son's ardent desire for a monastic life. In this, Winfrid developed the same qualities of fervent piety, deep disinterestedness, unquailing courage, practical skill, monkish narrowness of mind, and intolerant orthodoxy which distinguished him subsequently when acting, under the name of Boniface, as the papally invested missionary archbishop of Germany. As a Saxon he had, of course, an affinity of race with the Germans which doubtless came into play in his long contest with the Irish missionaries of the Continent. To him the Roman discipline and the Roman supremacy were of the very essence of the gospel. He was incapable of making the slightest concession to the Irish monks, although they had converted so much of Germany, for in his eyes the Irish hardly deserved to be called Christians at all, and he suffered grievous troubles of conscience that he could not altogether avoid an intercourse of social civility with them.

He began his missionary labors in 715, among

the Frisians of the German coast. His elder countryman Willibrord, after twelve years of study in Ireland, had begun a mission in Friesland, aided by various other Englishmen. Willibrord, although of Irish education, yet, as an Englishman, conformed to the Roman discipline, and visited Rome to solicit the papal sanction on his new mission. He was there ordained by the pope himself Bishop of Utrecht, where he died after thirty years of not ineffective work. Winfrid first came to Friesland during one of the many intervals of adversity in the mission. He afterwards, however, returned and labored for three years under Willibrord with encouraging results. Declining the aged bishop's offer to consecrate him as his successor, he journeyed to Thuringia, in Middle Germany, where he baptized two princesses, and in various visits admitted at least 100,000 persons to the Church. In Hesse, his boldness in felling the sacred oak of Donar (whom the Scandinavians called Thor) so appalled the heathen that large numbers forsook the worship of gods who seemed unable to defend their own honor. He had already twice visited Rome, and at his second visit, in 723, had been ordained regency bishop by the pope, with what we might call a roving commission, taking an oath of obedience and conformity to the Apostolic See, which became the keynote of his whole subsequent policy. Turning away from his nearest German kinsmen, the Saxons (who were, indeed, at this time wholly insensible to Christianity), he spent most of the rest of his life in incessant, sincere, intolerant, and finally successful efforts to bring Middle and Southern Germany under the Roman obedience. His double controversy with Virgil, the learned Irish abbot, subsequently bishop of Salzburg, was, it is true, unsuccessful. Rome, though a great admirer of her servant Boniface, decided both points against him, not without some gentle quizzing of his hyperbolic orthodoxy. But Virgil was willing to come under the new system, and after his death was impartially canonized by the Apostolic See.

In 738 Boniface visited Rome a third time, and received the fullest legatine powers, as archbishop of Germany. He held numerous synods, supported at length by Pepin, who, having been authorized by Pope Zachary to set aside the outworn Merovingian line and to assume the royal dignity for himself, was then, in the pope's name, anointed by Boniface, and thus stood committed to the closest union with Rome. Henceforth Boniface had good assurance of complete success in his effort to transform the German Christianity from the Irish to the Roman type. His veneration for Rome, however, had in it nothing of the slavishness of modern Ultramontaniam. He did not apprehend the pope as Universal Bishop, but as the court of highest instance in a graduated scale of episcopal pre-eminence. He himself meant to establish the German primacy at Cologne, but being disappointed of this by an intrigue, fixed it, less suitably, at Mentz. He also founded the renowned Benedictine abbey of Fulda, which for 1,000 years was the Monte Cassino of Germany. In all his organizing plans and administrative acts, his unsympathetic, heresy-hunting, Romanizing orthodoxy was accompanied by a large forecast of cool statesmanship, which in him decidedly prevailed over enthusiasm. Not even his most admiring disciples,

says Neander, ascribed to him a single miracle. It is the judgment of one who has given much attention to his course that the deepest instinct of his heart was, after all, not that of the ecclesiastical administrator, but of the monastic missionary. To this his early life agrees, and much of his middle life, and above all his end. For in 755, abandoning his great see of Mentz, he set out for his early mission-field of Friesland, and there, having fixed a day on which many of his baptized converts should return to him for confirmation, was, on that very day, surprised by a heathen band, and, in his seventy-fifth year, with many of his companions, joyfully received the crown of martyrdom.

It may be disputed, in view of the earlier successes of Ireland, whether we have a right to call him the Apostle of Germany. Nor can we be blind to his deep defects or at least to his narrow limitations. Yet after all abatements he stands forth as one of the great characters of Christian, of German and English, and of missionary history.

Germany was now two-thirds Christian. Its full Christianization, in the abandonment of heathenism by the mighty Saxon race of the northern plain, was accomplished, not by the missionary, but by the crowned soldier, Charles the Great. His spiritual adviser, the English abbot Alcuin, bitterly remonstrated against his unevangelical employment of force, and against his imposition of the tithe. But Charlemagne persisted, being convinced that his empire could never have peace until the Saxons were brought into the national and spiritual communion of his great realm. And though they were thus compelled into the Church, yet, so soon as the national pride of their adherence to paganism had been broken, they rapidly assimilated Christianity, and soon became perhaps the most stanchly Christian of all the German tribes. And when the fulness of the time had come, at the Reformation, for the complete emancipation of the gospel, it was in Northern Germany that the adult Christianity of Protestantism found its home. Luther himself, it is true, though called a Saxon, was only such by that curious territorial lapse which had transferred the ancient name from its proper seat, and made it the designation of a Middle German race.

The conversion of Northern Germany laid the basis for the Christianization of the three Scandinavian realms. The Apostle of Scandinavia, St. Ansgar, is a character of peculiar beauty. He was a native of the Frankish kingdom, having been born in the diocese of Amiens, A.D. 801. The delicacy of his imagination, and the sweet courtesy of his character, make it probable that he was a Roman rather than a German Frank; in other words, that he was a Frenchman proper. He early became a monk in the neighboring Corbie, under the abbot Adalhard and the learned teacher Paschasius Radbert. But when Charles the Great (Charlemagne), having forcibly converted the Saxons, wished to instruct them in their new religion, and removed a colony of monks from Corbie to the Weser, calling the daughter-abbey Corvey, Ansgar was one of the colonists. He had early been sensible of a vocation to the missionary life. Once he seemed to be lifted up to the Source of all light.

"All the ranks of the heavenly host, standing around in exultation, drew joy from this fountain. The light was immeasurable, so that I could trace neither beginning nor end to it. And although I could see far and near, yet I could not discern what was embraced within that immeasurable light. I saw nothing but its outward shining, yet I believed that He was there of whom St. Peter says that even the angels desire to behold Him. He Himself was in a certain sense in all, and all around Him were in Him. He encompassed them from without, and, supplying their every want, inspired and guided them from within.

And from the midst of that immeasurable light a heavenly voice addressed me saying, 'Go and return to Me again crowned with martyrdom.'" Ansgar's whole life showed that he "was not disobedient to the heavenly vision." The pious and statesmanlike Ebbo, archbishop of Rheims, having gained over to Christianity King Harold of Denmark, on a visit to the Emperor Lewis, deputed Ansgar to accompany the king on his return to his fierce heathen subjects, a journey then so much dreaded that Ansgar could only find a single monk, Authbert, to go with him, who, soon dying, left him alone. After two years of residence, and some initial successes, he and King Harold were both expelled. But now better prospects began to open in Sweden. Seeds of Christianity had already begun to germinate there. Ansgar, therefore, during some two years' residence, found much encouragement. His favorable report, on his return from Sweden, induced the Emperor Lewis to establish the archbishopric of Bremen-Hamburg as the basis of the Northern Mission, and to despatch Ansgar to Rome, where he received episcopal consecration and was invested with the archiepiscopal pallium. During many years, from the basis of his metropolitan see, with a flexible patience that knew no discouragement, that availed itself of every opportunity, and recovered itself after every shock of heathen aggression, such as once laid his own diocese waste, Ansgar steadily pursued his great purpose. He was aided by suffragan bishops in Denmark and Sweden, whom he supported as occasion required by personal visits. At last, the heathen having already become accustomed, by many instances of deliverance after invoking the name of Christ, to regard Him as a mighty deity, Ansgar visited the national assembly of Gothland, in the south of the peninsula, and that of Sweden proper, in the middle, and obtained from each a decree that the preaching and acceptance of the gospel should be freely permitted. Ansgar, having made arrangements for the more effective prosecution of the missions, returned to Bremen. There were many subsequent vicissitudes, especially in Denmark, for the gospel seemed to cohere more intimately with the nature of the milder and perhaps more thoughtful Swedes, who, moreover, are of a deeply devotional turn. But the foundations laid by Ansgar remained. Danish conquest in England, moreover, reacted for the evangelization of Denmark, especially through the influence of the mighty Canute. The process of conversion was slow but steady. By the year 1100 it is doubtful whether any traces of avowed heathenism remained in either Denmark or Sweden.

"After having labored," says Neander,

"more than thirty-four years for the salvation of the heathen nations of the north, when past the age of sixty-four he was attacked by a severe fit of sickness, under which he suffered for more than four months. Amidst his bodily pains, he often said they were less than his sins deserved, repeating the words of Job, 'Have we received good from the hand of the Lord, and shall we not receive evil?' His only regret was to find that the hope of dying as a martyr, with which that early dream had inspired him, was not to be fulfilled. An anxious concern for his diocese, for the souls of the individuals who stood round him, and especially for the salvation of the Danes and Swedes, occupied his mind to the last. In a letter written during his sickness he recommended in the most earnest terms, to the German bishops and to King Lewis, strenuous efforts for the continuance of these missions. At last, having received the holy supper, he prayed that God would forgive all who had done him wrong. He repeated over, as long as he could speak, the words, 'Lord, be merciful to me, a sinner; into Thy hands I commend my spirit;' and died, as it had been his wish to do, on the feast of the Purification of the Virgin, February the third, 865."

Ansgar's character seems to have the effectiveness of Boniface without his hardness, and the zeal of the Irish missionaries without the wrathful impatience adhering to some of them, —a most winning embodiment, certainly, of missionary excellence.

The Christianization of the Mongolian Finns resulted in part from the conquest of Finland by St. Eric, the first Swedish king of that name, but still more from the evangelical labors of St. Henry, the first bishop of Abo. St. Henry's day is still a conspicuous festival of the Lutheran Church of Finland.

The introduction of Norway within the Christian pale resembles in its earlier stage a chapter of Moslem and in its later stage of Buddhist propagandism, more than any chapter of genuinely Christian missionary effort. It seems to have had very little root in the religious instincts of the people, although genuine Christian influences are by no means absent. But the kings who finally subdued the whole of Norway under them, and rooted out the power of the petty local monarchs, being convinced, and very justly, that effective government could only rest on the foundation of a wider and richer civilization, and that this could only be supported by Christianity (thoughts such as are now working so vigorously among Japanese statesmen), really forced Christianity on their subjects at the point of the sword. And when these were once baptized, the Roman missionaries unfolded the utmost magnificence of their ritual,—here again like the Buddhist missionaries in Japan. And as the Norsemen, says Herder, had the profoundest faith in the efficacy of magical rites, and regarded the Roman ceremonies (not altogether unjustly) as a more exalted and a purer kind of magic, they finally surrendered themselves to the new worship without any further thought of resistance. But the fact that so few Norwegian kings or heroes have cared to be buried in the metropolitan cathedral of Trondjhem, is noted by Mr. Froude as signifying that they had little heart in their professed Christianity until the Reformation gave them a form of it which they could really believe. Lutheran Norway is now a genuinely and zeal-

ously Christian country, though somewhat stiffly and narrowly such. But the religious development of Sweden, both under Latin and under Lutheran Christianity, has been (as is natural, in view of its much greater population), a far richer and more conspicuous one. In the 14th century St. Brigitta, the widowed Swedish princess, may be regarded as "the bright consummate flower" of the Scandinavian race, showing, it is said, almost equal vigor of the practical, the poetical, and the prophetic instinct, and under the veil of an extravagant devotion to the Virgin revealing many deep evangelical perceptions, true harbingers of the Reformation. And although her ashes rest in Rome, and her name stands in the Roman calendar, yet her prediction is on record that "the throne of the Pope shall yet be cast into the abyss."

By this time Germany, France, Great Britain, Denmark, Sweden and Norway, were all included within the pale of Latin, and Russia within that of Greek Christianity. Poland and Bohemia and the other Slavonian countries were thus morally certain, sooner or later, to yield to the irresistible influence of what was becoming the religion alike of Southern and of Northern Europe. Moravia and Bohemia, indeed, the two principal Slavonic countries of Middle Europe, rather antedated than followed the conversion of Scandinavia. By an unusual providence, they were Christianized by two Greek missionaries, Cyril and his brother Methodius. These had already been active among the Bulgarians, who also received missionaries from the Pope, but after some wavering settled down under the patriarchal rule of Constantinople. Cyril and Methodius then labored among the Mongolian Chazars in the Crimea, with a good deal of success. They then came up into Central Europe, among the Moravians, not far from the year 850, and therefore while Ansgar was still laboring in the north. German missionaries sent out by the Archbishop of Salzburg had already effected a good many conversions. But their foolish obstinacy in adhering to the Latin liturgy was in the way. Methodius (for Cyril soon became a monk in Rome), with his more flexible Greek character, boldly introduced the Slavonian tongue into worship. The German bishops murmured; but the Pope, who had already consecrated Methodius Archbishop of Moravia, stood forth as his defender. Bohemia, then dependent on Moravia, was Christianized from it. The Germans still wrangled with Methodius over his independent jurisdiction and over his Slavonic liturgy, so that at last he went to Rome and seems to have followed his brother Cyril into retirement. But the Christianizing impulse had now become so strong among the Slavonians, that, by somewhat obscure stages, the whole Slavonic race from Bohemia to the Adriatic is found to be Christian. It is interesting to note that, after long interruption, the use of the Slavonic liturgy has lately been conceded again, by the present Pope, to the Slavonic Illyrians.

The propagation of Christianity among the Slavonic Wends, between Bohemia and the Baltic, is a confused history of genuine missionary successes, of armed proselytism by over-zealous princes, and of violent and persecuting heathen reactions. Yet ultimately Christianity prevailed here also, by an historical necessity. Poland, like its great Slavonian sister and rival, Russia, was Christianized mainly from above, not far

from the year 1000. But while Russia took Constantinople for her spiritual capital, Poland, as might have been expected from her rivalry, chose Rome. The Teutonic order of military monks had much to do with the suppression of Paganism along the Baltic.

The Magyars, of Mongolian race, who wrought fearful devastations in Germany in the earlier Middle Ages, but were finally shut up to their new kingdom of Hungary, of which they still form the dominant race, were found after this check not altogether inaccessible to German missionaries. St. Adalbert, Archbishop of Prague, who afterwards died a missionary martyr among the Slavonic Prussians (near Poland), spent some time in Hungary. Prince Geisa and his wife were baptized, but remained about as much pagans as before. Their son Stephen, however, (St. Stephen), was a thorough and zealous Christian. He married a German princess, received the rank of king from the Christian Emperor Otto, and succeeded in impressing on the kingdom of Hungary that deep character of mediæval yet kindly Catholicism which it still retains. Protestantism is there powerful, and honorably considered; but nowhere in Europe does the ecclesiastical magnificence of the Middle Ages remain so little disturbed. The Archbishop of Gran, the Primate of Hungary, is the only primate of actual jurisdiction in the Latin Church. And at a coronation the lines of splendid horsemen wearing the insignia of mitred abbots show that in Hungary the illustrious Benedictine order still retains its ancient pre-eminence. The Hungarian Christianity, which glories in the monarch's title of Apostolical King, has been the anvil that has worn out the Moslem hammer of the kindred Turks. But this Mongolian Christianity has shown its zeal rather in the field of war than of spiritual achievement, in which the Mongolian race has seldom been pre-eminent.

The latest surrender of a whole European nation to the profession of Christianity took place in 1384, when Ladislaus Jagiello, Grand Duke of the then very extensive and powerful principality of Lithuania, obtained the hand of Hedwig, Queen of Poland, and went over, with all his people, from paganism to the Church.

Such were the missions, proselytizing crusades, and proselytizing compacts of Catholic Europe. Eastern and Western, between the year 500 and the year 1500. The principles of the gospel seem to have been most thoroughly carried out in the Christianization of England, Scotland, Switzerland, Southern and Middle Germany, and Sweden, and to have been the farthest departed from in the cases of Northern Germany and Norway, the former of which, however, became soon, and the latter ultimately, sincerely and zealously Christian. Not even the gospel, accepted in this wholesale way as a national creed, can avoid large complications with uncivilized rudeness, with violence, and with selfish policy. The Reformation brought in that sifting process which is every day becoming more rapid, and setting Christ more distinctly over against Antichrist. Yet we have great occasion to thank God that over so large a proportion of mediæval Europe so great a number of humble and self-devoted men of God secured the genuine conversions of so many individuals and nations to the gospel of Christ.

Apostolic preaching was the root; mediæval missions were the trunk; and modern missions, going abroad into all the world, will appear, we trust, the fair and widely-extending crown.

**Medical Missions.**—"The history of Medical Missions is the justification of Medical Missions."

One of the oldest Buddhist writings recognizes the close connection between body and soul, and that the doctor should also be a missionary. We find the following expression: "No physician is worthy of waiting on the sick unless he has five qualifications for his office: 1, The skill to prescribe the proper remedy; 2, The judgment to order the proper diet; 3, The motive must be life and not greed; 4, He must be content and willing to do the most repulsive office for the sake of those whom he is waiting upon; and 5, He must be both able and willing to teach, to incite, and to gladden the hearts of those whom he is attending by religious discourse."

In view of the fact that healing was made so prominent in the Apostolic Church, we cannot but wonder at the extent to which, in the ages after the apostles, it dropped out of the Church's work.

The Roman Catholics of the sixteenth and seventeenth centuries used medicine largely as an aid to mission work. It is to them largely that we owe the use of cinchona, which has rendered mission work possible in fever-stricken lands; as well as ipecacuanha and many other remedies which we probably should not have known so soon had it not been for their labors.

America has been the foremost nation in this cause. Her sons, and later her daughters, have been among the earliest to enter the field. The first medical missionary to leave the United States was Dr. John Scudder, who, with his wife, sailed in 1819 from New York for India, where he labored until his death in 1855. In 1849 there were just forty medical missionaries in the world—26 from America, 12 from Great Britain, 1 from France, and 1 from Turkey or Arabia, at Jaffa. It was not until 1879 that the value of this agency for reaching the outcast and depraved in our large cities was realized sufficiently to lead to action. In this particular Great Britain has taken the lead, forming a large number of separate medical missions.

In 1876 Dr. William H. Thomson, with the desire of aiding medical missionary students, succeeded in establishing seven scholarships at the University of the City of New York, U.S.A. In April, 1879, Mr. E. F. Baldwin opened in Philadelphia the first organized medical mission in America, which was followed in 1881 by the International Medical Mission Society (q.v.) in New York City.

The need of medical missions is now universally recognized.

In all the heathen world the practice of medicine is marked by the densest superstition and characterized by the most extreme cruelties.

Even the Chinese have no doctors worthy of the name: they have absolutely no reliable knowledge of anatomy, physiology, chemistry, physics, surgery, or of obstetrical practice, and their "doctors" often do more harm than good. The sick are often left to die in the streets, and not even a drink of water is given to the wounded after a battle, who, if unable to drag themselves away, are abandoned to

perish. In India charms and incantations are a common resort. the sick are dosed with putrid Ganges water, and patients are suffocated with charcoal-fires.

The Arab resorts to the greatest confidence to the most ridiculous, severe, or disgusting remedies. A slip of paper, containing certain written words, is swallowed with avidity; a man in the last stages of consumption takes a prescription directing him to feed, for a fortnight, upon the raw liver of a male camel, and fresh liver not being attainable, he continues the use of this diet in a putrid state until he dies; while the Arab's most common remedy for all diseases is the "kei," or the burning of the skin, entirely around the seat of pain, with a red-hot iron.

To the missionary himself a knowledge of medicine is sometimes of essential importance, for he may find himself removed many days' journey from a physician, even, as it has happened in some cases, 250 to 800 miles. Let missionaries possess medical education, to enable them (1) to look after their own health: (2) to relieve the physical suffering around them; (3) to obtain ready entrance for the gospel; and (4) to enable them to support themselves as far as possible. At Melange, in Africa, 400 miles from the coast, Mr. Heli Chatelain, a few days after his arrival, was offered by a trader a home in his house and \$1,200 a year to look after his family alone, and he was assured that others in the town would increase the sum to \$5,000 per annum if he would consent to remain.

The benefits of medical missions may be well-nigh placed beyond computation in value. "It will not strike you with surprise," said Dr. J. L. Maxwell of Formosa, "when I tell you that again and again the lives of valued missionaries in China have escaped destruction at the hands of evil and fanatic mobs just because they were providentially recognized to be the associates of the mission doctor at this or that missionary hospital. During the Afghan war the tribe of the Wazaris destroyed the town of Tank, and even the government hospital, but spared the mission hospital of the Church Missionary Society, because of their esteem and affection for the Medical Missionary. In the Chinese village of Na-than, 100 miles to the north of Swatow, a most remarkable work has been carried on without the agency of a resident missionary. It is the dwelling-place of a leper who, after having visited the hospital at Swatow, where he was converted, returned to his home and gathered about him a congregation of men and women whom he instructed in the Word and in the worship of the living God." "In South Formosa I could point to four different congregations which lie far removed from each other, and at a distance from the mission headquarters, each of which sprang from men who had received their first religious impressions in the mission hospital, and these congregations have established flourishing schools."

The hospital is the secret of success in the foreign field. The influence of a dispensary is fleeting; but in the hospital the patient can attend the prayer-meetings and have time for thought and conversation. Even itinerating work is of less value. Such is the testimony of Dr. A. Sims.

"When young men go out as M. D.'s," said

F. K. Saunders from Ceylon, "the field is almost boundless in the influence they may exert. They get a hold on the people as no other missionaries can. What they can do in five or ten years, he can do in one."

"The medical missionary dispensaries are bringing," says Miss Patterson of Benares, "the different castes and peoples together—the Hindu and Mohammedan, Brahmin and Sudra, Jew and native Christian, Eurasian, Parsi and European. To some dispensaries the admission is by ticket, on which is also written a verse of Scripture. If the poorest outcast gets the first ticket of admission, she is the first attended to."

### *Statement of Medical Work in Foreign Fields.*

CHINA.—Of the Rev. Peter Parker, M.D., who arrived at Canton October 26th, 1834, it was said, "he opened China to the gospel at the point of his lancet." It would be difficult to estimate what Dr. Parker has accomplished in behalf of medical missions; not only has he furthered the cause in China, but in other countries also; and of him it has been said, he has done more to advance the cause of medical missions than any other man. He was instrumental in the founding of the Edinburgh Medical Missionary Society (q.v.)

It is in China that hospital work can be pursued to the best advantage as an aid to the mission cause, for a hospital in China is not troubled by any of the caste difficulties of India, and it can be carried on at a minimum of expense, being a kind of medical mission work which commends itself most powerfully to the Chinese people.

In one village a successful church of a hundred or more members resulted from the restoration of sight to a mother and her two daughters, the operations having been performed by Dr. Mackenzie. The Chinese are so accessible to the medical missionary that he has no need to take up any distinct clerical work at all as his time can be wholly occupied in treatment of pressing cases awaiting his skill.

Native assistants have now become so expert and trustworthy that they have been left in full charge of a hospital containing between fifty and one hundred patients.

In February, 1838, the Canton Medical Missionary Society was formed. Dr. Parker was elected Vice-President, and his hospital was taken under its patronage. Over 12,000 patients were treated at the Canton Hospital during one year; of these 703 were in-patients and there were 797 surgical operations. The number of patients increased in 1884 to 15,405 there having been 975 surgical operations performed. The new Christian College being founded by Rev. A. P. Happer, D.D., M.D., at Canton, will have a preparatory, a collegiate, and a medical department, under American professors, to raise up educated men to become Christian ministers, teachers, and physicians among the hundreds of millions of that empire.

At the various points where missionary work is carried on, experiences such as the following are constantly repeated. "During the summer months our work largely increased. It was not uncommon to see ten or twelve carts outside, crowded with sick people. The blind, the maimed, the halt, alike sought relief, many be-

ing beyond all hope of recovery. As numerous cases require operative interference and careful treatment, we look about for some premises we may hire, and convert into a temporary hospital. In some cases it is an inn, where the utmost publicity is allowed; and frequently it is difficult to come near our patient for the crowd, and even after succeeding, all the available light is carefully excluded."

The cities furnish a field for medical work not unlike that of any large city in the United States. The most frequent diseases met with are those relating to the digestive organs. The Chinaman whose "heart's mouth" has never pained is seldom to be met with. This "heart's mouth" is a favorite locality with the Chinese as a seat of disease. The native doctors know nothing of the dissection of the human body, and they rely chiefly upon their imaginations. The brain is put in the stomach; the seat of courage is in the liver; the bladder communicates directly with the mouth by a tube into which all liquids find their way; while a hole in the heart has mysterious relations with the stomach, and to this orifice is ascribed much of the pain consequent upon indigestion, which is exceedingly common, in consequence of the universal habit of rapid eating.

The *Hankow* native hospital was opened on the 27th of September, 1880, with a Christian dedicatory service. Gospel preaching and teaching have been continuously sustained. It is a Chinese building, supported by Chinese money. Opposite the doorway is the inscription in gilt letters, "To God be all the glory." Dr. Yang, a native who was educated at the hospital, is not only a skilful physician, but a most eloquent speaker, and will prove an effective instrument in furthering the great work in his native city.

*Canton*.—In this city the hospital, dispensary, and college attract wide-spread and deserved attention, 20,000 patients being treated annually. Associated with Dr. J. G. Kerr is an efficient staff of native doctors and surgeons whom he has trained. He has instructed scores of pupils, thirty of whom have taken the full course and received certificates. Most of these educated native doctors are Christians, and engage in evangelistic labors. The blessings of the Institution have been manifest in diminishing the power of superstition and lessening the anti-foreign feeling of the Chinese. The hospital was founded in 1838, and up to 1889 had treated three quarters of a million of cases, many of them demanding the highest possible surgical skill and experience. A small charge for medicines reduced (1886) the number of out-patients, but the number of in-patients has been very large. At times every ward has been crowded, from 150 to 175 being inmates at one time. The number of out-patients treated was 13,041; in-patients, 1,287; and the number of operations, 2,318, for the year.

*Shanghai*.—In this city there is an efficient hospital doing a work similar to that of Canton, the aggregate attendance having reached, as early as 1860, over 20,000. The most difficult cases are those of patients addicted to the opium-habit. Dr. James Henderson, soon after his arrival in 1860, had 15,000 copies of a small tract printed in Chinese, containing a short epitome of the gospel. Each patient who could read (the Chinese generally are taught to read) received a copy, and by this means Christian truth was widely diffused. In St. Luke's Hospital

(Episcopal Mission) there were treated (1887), in-patients, 601; other patients (seen for the first time), 8,627; total number of visits by these, 23,505.

*Peking*.—The beginning of medical missionary work in this city dates from the arrival of W. Lockhart, M.R.C.S., at the British Legation in September, 1861. From two or three daily applicants for medicine the number rapidly increased, and at the close of 1863 there were treated during the year 10,251 separate cases. In 1865 the hospital was removed to a Buddhist temple, where for over twenty years it has been accomplishing its noble work. In 1886 the visits at the dispensary were over 15,000, and four medical students were under instruction. Students from the Imperial College attend a weekly clinic at the hospital. The year 1873 was made notable by the arrival of the first lady physician, Miss Combs, M.D. (of the Methodist Episcopal Mission), who has since been followed by 25 doctors of her own sex. Dr. B. C. Atterbury in 1879 began medical work under the Presbyterian Board. First, a dispensary was opened in connection with the street chapel, and afterwards buildings were added. The An Ting Hospital now has room for about 45 patients, and in one year the attendance of patients has reached 16,318, the in-patients having been 111. There is also an opium refuge, in which 105 cases were treated.

*Hankow* presents a most important field for medical missions, as it is called by the Chinese "the mart of nine provinces," i.e., the half of all China. Within a five-mile radius they have a population of perhaps 1,500,000, and here the missionary comes in contact with traders from most distant parts. "During the more than twenty years" (Dr. Gillison reports in 1888) of the hospital's existence, many hundreds of patients from various provinces have been treated in our dispensary and wards, and have afterwards returned to their homes; and we may confidently hope that the kindness here shown them may help toward breaking down anti-foreign prejudice, which exists so intensely in the province of Hunan. Number of patients registered during the year (1887): out-patients, 5,415; patients making more than one visit, 3,875; seen in the country, 200; in-patients, 938; seen at home, 15; total, 10,443.

*Hangchow*.—In this large city Dr. Duncan Main, of the English Church Mission, has lately (1887) built a fine hospital. One of the Chinese newspapers said: "At the opening of the hospital all the mandarins came to congratulate Dr. Main. Chinese and foreign all came together, there not being a person in Hangchow who did not praise the work." The doctor treats more than 10,000 cases yearly; during the last year 79 cases of attempted suicide by opium were brought to him, in 60 of which life was saved. In 1888 there were 652 victims to the opium habit treated. Thirteen persons made a profession of their faith and were baptized.

*Swatow* has the largest mission hospital in the world, treating 3,592 in-patients in a year. The hospital buildings consist of three two-storied blocks, one being administrative, and the other two having each four large wards—two upstairs and two downstairs. There are also small wards for special cases, private wards, students' rooms, and the former leper hospital. One ward is for opium-smokers, free treatment

of whom proving unsatisfactory, they are now charged \$1 each as a guarantee of good faith. This has reduced the numbers one half, but the treatment of those who do come is much more satisfactory. A class of six students has been under instruction.

*Tien-tsin* furnishes a romance in the history of medical missions. When Dr. J. Kenneth Mackenzie reached this city in March, 1879, everything looked dark for the medical missions. While at prayer with the native converts a member of the English Legation learned that the wife of the viceroy was seriously ill, the doctors having wholly despaired of her case. The Englishman entering an earnest plea for the foreign doctors, the viceroy committed his wife's case to the care of Dr. Mackenzie, who was speedily summoned to the vice-regal palace, and in a few weeks Lady Li was quite well. Her treatment was followed by successful surgical operations in the presence of the viceroy. The court was stirred, and great public interest excited. The viceroy agreed to pay the current expenses of both a hospital and dispensary when erected. In a short time a building was completed, with wards for 60 patients, the Chinese themselves contributing the sum of \$10,000. The viceroy now believing in western medicine, he commissioned Dr. Mackenzie to select eight young men from among over 100 of those who had been educated in America, and enter them upon a three years' course in medicine and surgery, the viceroy building them a house in the mission compound, and the government answering for their support and furnishing all needed apparatus. The missionary stipulated that he should be entirely free in his religious intercourse with these young men. The practical results of the viceroy's interest are now showing themselves in the formation of various semi-recognized schools of medicine within China itself, and in the new school of medicine at Hong Kong, which was inaugurated October 1st, 1887. The medical profession and the colony generally have entered into the work of the college, which has already begun with 13 scholars. Several residents have made subscriptions to this worthy scheme.

*Han Chung-fuh* has a commodious house rented (1887), large waiting-rooms for men and women, and a long room fitted up for dispensary and consulting-room.

The following Chinese cities are fields of medical mission work: Tung-chau, dispensary, annual cases 3,474; Sio Khe; Han Chung; Tai-wan, Formosa, with three divisions of the work—healing, evangelistic, and educational; Chin-chew, hospital in charge of Dr. Grant; Che-foo, hospital and dispensary, 79 in-patients, 7,648 out-patients; Wei Hien, the "Mateer Memorial Hospital," the gift of ladies in Minneapolis and St. Paul; Fat-shan; Pao-ting-fu, hospital; Tai-ku, hospital; Wei Hien, hospital in private house; Nodoa, Haiuan, hospital given by a grateful mandarin; Che-fu, hospital; Formosa.

*Moukden* (Manchuria) has a hospital with the following apartments: waiting-room, consulting-room, dispensary, minor operating room and ophthalmic room, reception and class rooms, assistants' room, etc., all large, airy, and well lighted. The hospital proper, which is situated behind and quite distinct from the front building, consists of two large compounds after the ordinary native style. During

a period of four and a half years 17,389 individual cases have been treated, 40,859 visits were made, and 54 of the patients have been received into the church by baptism.

There is much itinerating work done by the missionaries. On one excursion "we had," says Rev. A. A. Fulton, "a thousand applications for medical aid, and every patient heard the gospel." Up to the close of 1889, 200 medical missionaries have gone to the Chinese field; there being now (1889) 82 such workers, the majority of whom are from the United States, 16 being lady physicians. In no part of the world is the medical missionary more highly appreciated than within the Chinese Empire. A great part of the current expenses of the hospitals and dispensaries are borne by Chinese officials, the gentry and the merchants, foreign residents also contributing with liberality.

INDIA.—It is not generally known that to the magnanimity of an English physician England owes, in great part, her influence and possessions in the East. In 1636 Dr. Gabriel Boughton, having cured a princess of the Great Mogul's court, who had been badly burned, asked, as his only reward, leave for his countrymen to trade with India. This was the beginning of English power and civilization in the East.

In Northwest India and Oude missionary physicians are doing a great work. Nearly 72,000 cases (1887) were treated at 11 missionary dispensaries, 11,000 women sought relief at Mrs. Wilson's dispensary at Agra, and 18,850 women and children were treated at the Thomas Dispensary at Agra, the lady doctors performing some very important surgical operations.

North India Conference of the Methodist Episcopal Church reports (1886) at *Bareilly*: patients in the hospital, 49, of whom 24 are Hindus; patients in dispensary, 10,025; prescriptions, 17,875; donations, 239 rupees. The Conference has (1886) 15 medical Bible readers, 50 patients in the zenanas, 45 hospital patients, dispensary patients 21,920, and prescriptions made 31,858.

Dr. Morrison of the Presbyterian Mission writes: "Our two dispensaries were kept open the entire year (1886), having had 10,231 visits, 3,681 making one visit each, and 6,550 making more than one. A portion come from a great distance, but the large majority live within a radius of ten miles from the station. Every patient hears the gospel message, receives a tract, and frequently makes purchase of a copy of a portion of the Bible or one of the Gospels, which are sold separately at less than a half-penny."

As early as 1847 Dr. Bachelier had treated 2,407 cases and performed 126 surgical operations, 12 of them under the influence of chloroform. Dr. Chamberlain, in giving an account of their itinerating work, says: "Patients come from hundreds, from thousands of towns and villages, and there is scarcely a day that we do not have those from more than 100 miles distant, who hear the gospel and upon departing receive a ticket upon the back of which is printed a concise statement of Christian truth, ending with the declaration, 'This is what the true *Veda*, the Holy Bible, teaches.'"

The fact that now (1889) there are 200 young

Hindu women studying medicine in the medical schools of India, affords increasing encouragement to the friends of this great cause.

*Calcutta*.—Babu Sagore Dutt left an estate of 30 lacs of rupees, or \$3,000,000, of which he bequeathed (1886) 12, or \$1,200,000, to establish and maintain an almshouse, hospital, and school for the benefit of the native community.

*Lucknow*.—Here the Government of India has made (1890) a free grant of land to the Indian Female Normal School and Instruction Society to build a hospital as a memorial of the late Dowager Lady Kinnaird.

*Bombay*.—Free dispensary opened (1888) by Dr. Lydia J. Wyckoff. "The India people are most generous; their gratitude oftentimes overcomes me."

*Amritsar* (Punjab).—The work of the medical mission here is enormous—40,000 patients last year (1886), 52,000 the year before, besides operations, in-patients, training of students, itineration, inspection of 3 dispensaries, etc. "The fame of our hospital has gone abroad, so that now patients come to us from all parts of the Punjab. Three dispensaries have been maintained in the district during 1886—at Jandiala, Sultanvind, and Narowal."

*Neyoor* (South Travancore).—Dr. Lowe fairly entered his mission hospital work in 1862, beginning at once a medical class for young Christian men, and opening three branch dispensaries in different parts of the field. In 1872 Dr. T. Thomson enlarged the training-school and branch work so that at the time of his death in 1884 there were 7 branch dispensaries and as many medical evangelists, and now (1889) there are nine dispensaries outside the Central hospital and dispensary at Neyoor. "The experience of this mission has shown conclusively the necessity and value of a native agency to carry on the branch dispensaries, for it is by these that heathen prejudices are broken down, accessions made to distant congregations, and the influence of the medical missionary increased tenfold."

*Jeyapore*.—Here great results ensued from the successful treatment of the Maharani by Dr. Colin S. Valentine. The Maharajah, Ram Singh, expressed his gratitude in most liberal plans for the furtherance of the mission cause. The college and educational institutions were transferred to Dr. Valentine, and a grant of 10,000 rupees was made for a college library and scientific instruments. The European members of the station were formed into a church, and through his Highness the Maharajah Dr. Valentine was enabled to establish several institutions for the physical and moral improvement of the people, among which are the school of arts, the public library, the philosophical institute, a museum, a medical hall, branch dispensaries, jail discipline, the introduction of prison works.

*Benares*.—In 1864 Dr. Valentine was appointed civil surgeon to this station and medical officer to the Ajmere and Marwara police corps, the duties of which appointments he carried on in conjunction with those of the mission, handing over the whole of the emoluments derived from the government appointments to the funds of the mission. In town and country he had from 12,000 to 14,000 patients and a large number of surgical cases. His labors were abundant here and in the vicinity, extending to the examination of government schools, publishing books,

attendance upon jail and regimental hospitals, vaccinating, with assistants, 7,000 children, etc. Miss Patterson of Benares emphasizes among the benefits of medical work: 1. It is understood and appreciated by the people. 2. It helps to educate a native agency, and to raise up a band of workers among India's own daughters. 3. It raises Christian missions and missionaries in the regard of the people, and our spiritual teachers are more willingly received for the sake of their medical sisters' skill.

*Calicut*.—A German-Swiss medical missionary began work in 1887, and treated in the first three months 640, 950, and 1,332 cases, respectively.

Medical mission work is also carried on in the following places: *Madras*—medical college hospital and dispensary, the expenses of which are assumed by the government. *Palumanair*—two hospitals and dispensaries, also a preaching place, the heathen insisting that pills and prayers cured more people than pills alone. *Delhi*—dispensary by the Church of England: \$2,400 contributed in 1886. *Badaar* (Northwest Province)—dispensary, 3,500 cases; attendance, 9,000. *Srinagar*—dispensary, 5,000 attendances. *Madura* and *Dindigul*—dispensaries and hospital, 42,111 cases treated, of which 4,995 were Christians, and 17,079 Hindus and Mohammedans. Patients come from more than 500 different villages, and from their first establishment, twenty-four years ago, these institutions have cost the mission nothing. *Biloches*—hospital, 112 in-patients, 6,755 out-patients. *Arcoot*—hospital and dispensary, and mission, founded by Dr. H. M. Scudder and wife. *Agra*—dispensary, 12,000 in attendance. *Kashmir*—dispensary, opened May 9th, 1865, by Dr. W. J. Elmslie; to June, 1867, 310 patients, next season 759, and made 15,000 visits. *Rahuri*—dispensary, a heathen committee donating 400 rupees, the patients, Hindus, willing to pay a small fee. *Midnapore*—free government dispensary, with a corps of able doctors, a European surgeon and four or five native assistants; also the mission dispensary for patients who prefer to pay rather than to apply at the free government institution. *Lucknow*—two dispensaries in 1886; 2,712 new cases; number of attendances, 6,930. *Behar*—the Maharajah of Darhanga established (for females) a hospital and dispensary at a cost of 55,000 rupees. This is the third hospital he has endowed, and in addition to many charitable works, he has built and maintained twenty-three schools, and has given (to 1888) \$1,750,000.

*Zenana Work*.—The lady physician when visiting her patient is always attended by her Bible-reader, who reads the Bible to the women while the doctor is attending to the sick. In all the dispensaries each prescription paper has printed upon one side a Scripture text. In the waiting-rooms of the hospitals and dispensaries the Bible-women read and expound the Bible to those waiting their turn in the consulting-room. At Miss Robert's dispensary there were, during the year 1886, 10,776 cases treated, most of the women being Hindus, and belonging to every caste.

#### SYRIA.

*Jerusalem*.—Here is the oldest field of labor of the (Prussian) "Sisters." In 1851, on Mt. Zion, near the Anglican Church, they opened, under the direction of Fliedner, a hospital "for the sick of all religions and confessions." This

hospital, after successive enlargements, now (1881) receives over 450 patients yearly, while 8,200 visit the clinics. Four "Sisters" are in charge. The original aversion of the Mohammedans to the "dogs' house" was soon overcome. At present over one third of all treated are Moslems. As a traveller was telling a Mohammedan—a former patient—about the German victories, the latter replied: "It is the Prussian Sisters who have conquered us."

**Leper's Asylum.**—In this institution German love has of late also extended its compassionate care to the lepers of Palestine. This asylum was erected 22 years ago by the Countess von Keffenbrink, and is conducted and served by the *Unitas Fratrum*. The imposing new building, situated not far from the Templar Colony, and dedicated in 1886, with room for about 30 patients, has been occupied mostly by men. An Arab evangelist gives a Bible lecture twice a week, which the inmates willingly attend, the word of God often conveying the deepest consolation to these sorely afflicted ones.

**Beirut.**—The medical school was organized on the graded system of Edinburgh, not on the usual American model. Its course of instruction extends through four years and is eminently practical. Students on entering must pass an examination in arithmetic, algebra, geometry, physics, and English, which is the basis of instruction. During their medical course they study elementary Latin, mineralogy, geology, botany, and zoology. This most thorough course has reacted on the whole system of medical education in the land, and is steadily advancing the standard of medical learning. The catalogue for 1886-7 has the names of 167 students, of whom 29 are in the medical department, which, with the pharmaceutical, has graduated 103 students since 1871.

**Hospital of St. John.**—Hospital under the care of the German sisters from Kaiserswerth, the American faculty of surgeons and physicians in charge, where the students receive their practical training. In 1888 there were 8,000 patients treated.

**Sea-of-Galilee Medical Mission.**—Dispensary, with a daily average of between 30 and 40, the number being limited; chiefly Jews. A colporteur and Bible-woman speak on religious subjects to the patients awaiting their turn.

**Jaffa Medical Mission.**—New hospital opened October 19th, 1886; total attendance from November 1st, 1885, to December 31st, 1886, was 11,176, and 231 nursed in the hospital, of whom 12 have died, 7 having been admitted in a hopeless condition.

In the wards every evening the Holy Scriptures are read in Arabic, and, as a recent report says, "the black eyes of the sick women fix themselves eagerly upon the reader as if they would devour every word she utters."

**Nazareth.**—Here and in the branch dispensaries were recorded (1887) 52,000 cases, 1,300 operations performed, 130 in-patients fed and cared for, and the spiritual aim continually kept in view.

#### TURKEY.

**Constantinople**—The Free Church of Scotland has a medical mission and dispensary, reporting as patients, Jews, 6,026; Mohammedans,

140; other creeds, 755—total, 6,921, and 592 visits to patients at home. The Friends' Medical Mission to the Armenians reports 200 to 250 patients a week, and the purchase of premises for a meeting-house, day-school, and dispensary.

**Aintab.**—The Azariah Smith Memorial Hospital, from funds given by Dr. Smith's classmates and from a grant in England, was erected in 1878, with a house for a medical professor. In the ninth year the number of patients was 3,130, of whom 150 were in-door cases; 200 surgical operations were performed, and great numbers had to be turned away for want of room. The people of the vicinity are now contributing to its support.

**Mardin.**—A dispensary under charge of a medical missionary of the A. B. C. F. M. Plans for a hospital have been made but not completed.

In almost every city of Turkey there are a number of physicians, most of them Armenians educated in America or in the college at Aintab, or by Dr. West, for many years a medical missionary of the A. B. C. F. M. at Sivas. The Turkish Government has a large medical college, and compels all physicians who wish to practice medicine in the empire to pass an examination and receive diplomas.

#### AFRICA.

**Wathen on the Congo.**—Medical mission opened in 1886, and also at Banana; another at Banza Manteke, where, after 1,000 conversions, the missionary was immediately thronged with patients, necessitating an increase of help when 300 to 400 patients weekly were recipients of medical skill. "Conversions, not medicine, brought the patients at this station." "As the natives give up fetiches and belief in Satanic origin of sickness, they come for medical assistance in great numbers." Drs. A. Sims, Clark Smith, W. R. Summers, and Mary R. M. Davenport are (1886) opening medical missions in Central Africa at Loanda, Cashilange, Melange, and a hospital at Leopoldville; thousands of cases having been treated by a single practitioner.

**Cairo.**—Dispensary for poor Moslems and others, built by Miss Whately in 1879, and relieving annually more than 7,000 of the sick and suffering poor.

**Livingstonia Mission** sustains (1886) a competent physician at Blantyre, another at Bandawe, a third at Mweniwanda, between the two great lakes. The attendances were, in 1882, 3,300; in 1883, 7,000; in 1884, 10,000.

**Livlezi Valley** (above the entrance to Lake Nyassa), overwhelming number of medical cases: in March and April, 1889, 1,270, of which 563 were men, 776 being surgical; 3 physicians in attendance.

**Lake Nyassa.**—On the north shore in 1886 an important medical mission was founded by Rev. David Kerr Cross, who subsequently performed heroic and important services as a non-combatant in the war between the African Lakes Company and the Arab slave-traders. The result was that, at the close of 1889, the Arabs signed a treaty by which the white men gained the concessions they demanded. During the war Dr. Cross tendered his medical aid to the wounded on both sides, meanwhile caring for the sick and needy of the natives.

## MADAGASCAR.

The medical mission was first begun in 1862 by the London Missionary Society, through Dr. Davidson, and in 1866 it was greatly extended under Dr. Thomson. In 1873 there existed a 'Royal Medical Missionary College,' with 41 students, with a hospital for 80 patients, three dispensaries, 14 native Christian women in training for nurses, and in which over 10,000 cases were annually treated.

*Antananarivo.*—Medical Missionary Academy inaugurated July, 1886; ten lads have obtained (1888) their diplomas. Arrangements have been made for a very full course of five years' study, preceded by an examination in general education. The hospital was reopened in 1881; in six years 1,755 in-patients have been treated in its wards, of whom 945 were cured and 546 relieved; the average attendance of out-patients is about 100 weekly, and all, except the poorest, willingly pay a moderate charge. Several native students are pursuing a course of medicine.

*Analakely.*—A hospital was built in 1864. "I do honestly and firmly believe," writes Dr. Andrew Davidson at the close of 1863, "that if I had at command a moderate sum per annum, I could reach within a few years every tribe in the country. My plan is this: to select suitable Christian young natives, train them in medicine and in the faith of Christ, and send them out as pioneers of the clerical missionary."

## JAPAN.

*Tokyo.*—The Cottage Hospital, founded in memory of Anna L. Whitney, who died in Tokyo April 17th, 1883, was commenced November, 1886, and as soon as the roof was on and floors laid, began to receive and treat the thronging patients. The beds are English made, with spring mattresses. The institution has consulting and medicine rooms. There are several native training-schools for nurses, and many asylums for the blind and afflicted. Japan is not far behind some of the more backward States of America. The sanitary condition of the people is more satisfactory than in any other city of the Orient. At the two dispensaries in Tokyo under the charge of Dr. Harrell (1887) 11,903 calls have been made—an increase of 2,500 over the year before; 61 in-patients were treated in temporary quarters.

*Osaka.*—The medical mission has been more than self-supporting: in-patients in St. Barnabas Hospital (1887) 105, out-patients 1,292, who made 6,985 visits. A Bible-teacher is employed daily to instruct the patients in Christianity. The fees from the patients amounted to \$2,890, and after all expenses of the year were paid a balance remained of \$445.

## KOREA.

*Seoul.*—The rapidly developed work here grew out of the treatment of the wounded prince, Min Yong Ik, by Dr. H. N. Allen, who arrived just prior to the *émeute* of 1884. The superiority of Western medical skill, made manifest by the treatment of both the prince and the wounded Chinese soldiers, induced the king to order at once the building of a new hospital (opened April, 1885) and the purchase of a compound of buildings adjoining the hospital to be fitted for a school-house. Money

was appropriated for needed apparatus, and a complete outfit of surgical instruments. Grand total of cases for the year, 10,460; operations, 394, by only two physicians, Drs. Allen and Heron. Venereal disorders among these basely sensual people present a terrible showing; no less than 1,686 cases, chiefly syphilitic, were treated, and there were 845 cases of skin disease, due in the main to want of cleanliness. It is estimated by the native faculty that about fifty per cent of the deaths in Korea are caused by small-pox. (Dr. Allen, sent out by the Presbyterian Board on a salary of \$1,500, soon earned from \$5,000 to \$8,000 a year, which he turned over to the Board; he has also been sent with the embassy to the United States by the king.) Twelve students (1887), who are supported by the government, are preparing for medical work. During the third year 1,970 hospital cases were treated.

## PERSIA.

"Dr. Grant, the first physician sent to Persia, found that his medical practice gave him twenty times as much intercourse with the Mohammedans as the clerical missionary could secure." His treatment of the governor of Tabriz prepared the way for the mission at Oroomiah. This remarkable man, by his patience, consummate skill, and eminent character, won universal favor in Persia and opened the door for the founding of various mission enterprises in this ancient land.

*Oroomiah.*—The hospital, in spacious grounds (16 acres), well-shaded, near the city, has been built (1886), equipped, and is in full operation. The dispensary has been thronged with sick (1887); as many as 100 a day are sometimes treated, besides numerous visits made far and near. Dr. Holmes' appointment as consulting physician to the heir-apparent to the throne, has greatly aided the work.

*Hamadan.*—Number of cases treated (1887) over 5,000, while the number of visitors was double that number.

*Teheran.*—By imperial firman (1887), his majesty has authorized the American missionaries to establish a hospital, where, without regard to religion or nationality, all seeking relief shall be received for treatment, and his majesty has conferred upon Dr. Torrence, director, the title of Grand Officer of the Order of the Lion and Sun of Persia.

*Tabriz* also has a dispensary, and at *Teheran* the Ferry Hospital is (1887) being built.

## ARABIA.

See Keith Falconer Mission.

## SIAM.

In 1828 Dr. Carl Gutzlaff, the famous German missionary, with Rev. Mr. Tomlin, visited Bangkok, treated thousands of patients who applied for medical aid, and distributed boxes of books and tracts in the Chinese tongue. They were so impressed with the needs of Siam and the open door to the missionary, that they appealed to the churches of America to send forth laborers into this new harvest field.

*Bangkok.*—The hospital here resulted (1887), from the efforts of foreign citizens to take care of sick seamen in the port, the king himself contributing four acres, containing buildings suitable for a hospital, physicians' dwellings, and ser-

vants' quarters. The first year 1,300 cases came under the care of Dr. Hays. To the Baptist Mission the king has recently given the sum of \$240,000 for a hospital and schools.

*Petchaburi*.—Here the king and queen have contributed to the medical missionary work (to 1890) \$25,000, and his majesty has presented Dr. J. B. Thompson with a silver medal for services rendered to his subjects. In 1888 additions were made to the hospital, consisting of two wings erected in front of the old building: one wing containing the dispensary and operating-room, the other to provide a ward for women and children. Dr. Thompson treated 2,838 cases during 1887.

*Rathiboree* (the third city in importance).—Here the prime-minister gave to the Mission a large and well-built brick house, which was the result of medical mission work, as he and his family had been under treatment at Petchaburi and Bangkok.

*Chieng Mai*.—A new dispensary has been (1888) completed, and a small temporary hospital erected, while much material has been prepared for the permanent hospital. In seven months Dr. Cary treated 670 patients, much of the medicine used being paid for by themselves. Surgical cases were treated with almost uniform success.

#### ZANZIBAR.

Here the munificent sum of Rs. 2,300,000 has been given (1887) by Mr. Taria Tophan for the building of the hospital and its permanent maintenance; the British Government holding in trust the sum of Rs. 1,500,000 for the support of this charitable institution.

Medical missions are also carried on at the following named places: *Morocco* (Fez and Tangier); *Fiji*, *Madeira*, *Formosa*, etc.; also in *Melbourne*, where, in the Mission House next the Dispensary, some 1,500 (1886) have been brought to Christ, and over 35,000 have attended the free medical dispensary.

**MEDICAL MISSIONS ESPECIALLY FOR THE JEWS** are carried on in Jerusalem, Tiberias, Constantinople, Buda-Pesth, Smyrna, Rabat, Morocco, and London, all of which are supported by British Societies.

*Jerusalem*.—Here is the oldest and by far the largest organization. The hospital admitted (in 1887) 849 patients (417 males, 432 females), while the out-patient department dealt with no fewer than 17,480 cases.

*Tiberias*.—Begun by Dr. Torrance in 1884. From November, 1887, to February, 1888, there were 601 dispensary patients, of whom 382 were Jews, 144 Moslems, and 75 Christians. The visits of these patients were 2,105, being an average of  $3\frac{1}{2}$  times for each. Many patients were visited at their own homes of whom no record has been kept.

*Constantinople*.—In an airy hall (for 100 people) one may see Scripture verses in many languages so placed as to catch the eyes of the Jews, who come from many lands to visit the dispensary. In 1887 of the cases treated there were 6,026 Jews, 140 Mohammedans, and 755 of other creeds,—total 6,921,—and 592 visits to patients at their own homes.

*Buda-Pesth*.—The work was established in 1841. Patients (in 1887) 312 (of whom 128 were Jews) and 1,091 visits.

*Smyrna*.—Hospital established, and during the first year 77 cases (56 Jews) were treated.

*Rabat-Saleh* (Morocco).—During 1887 there were treated 1,835 cases; of whom 219 were Jews, 1,338 were Moors, Europeans, Arabs, and Berbers; visits to homes, 278. None of the indoor patients had ever before heard of the name of Jesus. This mission work is also conducted at Safed.

*London*.—The mission here is associated with much other work in behalf of Israel, extending to the Continent, and also to North Africa. The attendances in 1887 were 13,822, including 5,000 individual patients, revealing the immense scope of this mission. Among the various agencies attached to the mission is a convalescent home for the Jews who have been treated in the hospital.

**Advantages and Benefits.**—1. Medical missionaries, as far as possible, become self-supporting, and go out on an unsectarian basis.

2. This plan does not conflict with the work of the regular mission boards, but on the contrary its purpose is to supplement their efforts, and pioneer where they may follow.

3. Where a dispensary has been located a church has soon been formed.

4. Medical mission work destroys caste. In the waiting-room may be seen, day after day, sitting side by side, the Brahmin, Sudra and Shanar, the Pulayar and Pariah, the devil-worshipper, the worshipper of Siva, the Mohammedan, the Roman Catholic, and Protestant; men, women, of all castes and creeds, while waiting their turn to be examined, listening attentively to the reading of God's Word, and the preaching of the gospel, thousands of whom, otherwise, would never have an opportunity of hearing the tidings of salvation.

5. Medical mission work secures protection and provision. Dr. Summers, with thirty-six carriers, penetrated Africa 1,500 miles in a direct line, securing from his grateful patients all the means and material which they needed upon the long and difficult tour, and during his whole career of three and a half years he did not receive one dollar from the Home Society.

6. Medical missions are far reaching in their results. "As many as 1,200 to 1,400 towns and villages have been represented in a single year among the in-patients of one hospital, who, returning to their homes, carry with them some of the truth received. In nine years more than 100,000 patients had been treated in the dispensaries under the charge of the New York Medical Mission. The hospitals and dispensaries of the Presbyterian Board reach 50,000 patients every year.

7. Medical mission work (especially in China) is lessening the anti-foreign feeling, is diminishing the power of superstition which connects disease with evil spirits, and is giving constant proof of the unselfish character of the Christian religion.

8. "One thing is perfectly certain," said Dr. Post of Syria, "namely, that medical mission work never fails. Other work may fail, but this affording of relief for physical suffering goes on the debit side of Christianity in all cases, and opens the way for other work to follow."

For additional references to medical work see articles on the different countries and stations mentioned above, the Missionary Societies and Methods of Missionary work.

**Medical Mission of Chicago.** Headquarters, 7 and 9 Jackson Street. Organized March, 1885. Incorporated July, 1885. *Title*—"American Medical Missionary Society."

This Society is interdenominational in character, and comprises three departments:

First, a board of managers having the supreme control.

Second, a board of honorary directors having advisory functions.

Third, an executive committee, composed of the officers of the board of managers having the power to transact the business of the Society during the recess of the board.

It is no part of the object of this organization to establish foreign missions or to send either physicians or ministers into the missionary fields of labor under its own superintendence, but to furnish systematic and well-directed aid in securing a full medical education to such young men and women belonging to any of the recognized evangelical Christian denominations as can comply with the following:

**Requirements.**—1. Every applicant must furnish the executive committee satisfactory testimonials of earnest Christian character and ability for Christian work from his or her church, society, or board of missions.

2. Every applicant must be a graduate of some college, or produce evidence of having received a fair, liberal education.

3. Every applicant must pass a physical examination, as is required by our good insurance companies.

4. Every applicant must agree to take a full medical course of three years, and to graduate.

5. Every applicant must bind himself or herself, on completion of the course of medical education furnished by the Society, to go out to the foreign fields as a medical missionary, or else to pay back to the Society the cost of the medical education provided.

These rules, besides exacting evidence of Christian character and other needed qualifications, also guard against the tendency to send out, as medical missionaries, men and women with only an inadequate amount of medical knowledge.

The Society does not intend to devote any part of the money received to the establishment of any medical college, as the work can be more economically and efficiently done in the best class of medical colleges already established in various parts of the country. As none of the officers receive salaries, all the money contributed can be devoted directly to the work of education, except a very limited amount for stationery, printing, etc., for the secretary and general agent.

The various bodies composing the Society share in its benefits in proportion to their gifts to its funds.

**AIMS AND OBJECTS.**—The great object of the Society shall be to endeavor to promote the consecration of the healing art to the service of Christ:

1. By making use of a dispensary and training institution, in addition to the medical instruction in the colleges, where the principle of medical missions may be seen in practical operation—the sick and suffering receiving appropriate surgical and medical treatment, and at the same time having the gospel faithfully pro-

claimed to them by those who minister to their bodily wants and infirmities.

2. By aiding financially and otherwise young men who may offer themselves for this department of the Lord's work, and who, after careful examination, are approved for their piety and capacity, and by providing them with the means of becoming fully equipped, thoroughly qualified, and well-educated medical men, as well as practically acquainted with evangelistic work while prosecuting their professional studies.

3. By endeavoring to promote the employment of female medical mission agency in the foreign field where such an auxiliary to evangelistic work is urgently required.

4. By furnishing other missionary boards with medical missionaries who shall be highly educated medical men, worthy representatives of the profession.

5. By establishing, either independently or in co-operation with other societies, medical mission stations and dispensaries abroad; by supporting as many medical missionaries in the foreign field as the funds at its disposal and the demand by other missionary societies for our medically trained missionaries will allow; by assisting medical missionaries laboring abroad in connection with other societies with grants of medicines, instruments, etc.; and by diffusing medical missionary intelligence as widely as possible, and enforcing the many considerations fitted to promote the cause of medical missions.

The board of managers is so proportioned, denominationally, as to represent the catholicity of the Society's constitution.

Actual cost of medical mission training is \$100 and upwards for each of three courses, making a total of \$300, or as much more as one is able and willing to spend for a better style of living, or luxuries not necessary.

Life-membership in the American Medical Missionary Society costs only \$100, which entitles the member to a place in the honorary board of directors. Those paying \$500 and upward shall be, in addition to life-membership, constituted honorary members of the board of managers of the Society. A life-membership fee pays the necessary expenses of one student for one year at the minimum rate as above noted.

The Society is now (October, 1890) furnishing eight young men with their medical education free in the "Rush" and "Chicago" Medical Colleges, and the Society has thus given a regular medical education in these colleges to over thirty young men. In this feature the Society takes a leading position.

As early as 1887 the Society had its workers in Africa on the east and west coasts, and also one in India.

The "Medical Missionary Journal" is the authorized publication of the Society. It is published monthly in the interest of medical missionary training and labor throughout the world.

**Medingen**, town of North Transvaal, East South Africa, north of Mphome, south of the Limpopo River. Mission station of the Berlin Evangelical Lutheran Society; 1 missionary, 10 native helpers, 5 out-stations, 76 church-members, of whom 52 are communicants, 31 scholars.

The station was founded in 1881, and in 1884 the preacher and his helper were murdered. At present, however, the station is flourishing.

**Meerut** (Mirat), a city of the Northwest Provinces, India, halfway between the Ganges and Jumna rivers. Climate variable, subject to extremes. Population, 81,000, Hindus, Moslems, Jains, Christians. Language, Urdu, Hindi. Mission station C. M. S.: 1 missionary, 2 female missionaries, 10 native helpers, 5 out-stations, 372 adherents, 3 churches, 186 communicants, 5 schools, 400 scholars.

**Meigs, Benjamin Clark**, b. Bethlehem, Conn., U. S. A., August 9th, 1789; graduated 1809; was converted in college and joined the college church. After graduation he taught school at Bedford, N. Y., and spent two years and a half at Andover Theological Seminary. While there he was a member of the select band that was formed for inquiry and prayer in reference to their personal duty to engage in mission work among the heathen, and determined to devote himself to a missionary life. He was ordained June 21st, 1815, and sailed October 23d following as one of the original founders of the American Board's mission in Jaffna, Ceylon. There he labored forty years. In 1840, after an absence of twenty-five years, he visited the United States, and sailed again from Boston October 17th, 1841, to resume his mission labors. Failure of health in 1858 compelled him to relinquish the mission work and return again to America. He died in New York City, May 12th, 1862, aged sixty-three. He possessed a kind, conciliatory spirit, excellent judgment, and was highly esteemed by the natives, as well as by his missionary associates.

**Meiktila**, a city of Burma, recently occupied as a station of the American Baptist Missionary Union. Has 1 missionary and wife.

**Weisel**, a town of Japan, near Tokyo. Station of the United Church of Japan; 1 preacher, 176 church-members.

**Megnanapuram**, a town of Madras, India. Centre of a church council of the C. M. S.; 63 churches; 20 native pastors, 4,004 communicants, 3,400 scholars.

**Melanesia**, the name given to that part of Australasia which lies south of the equator, including New Guinea, New Ireland, Solomon Islands, the New Hebrides, New Caledonia, the Louisiade group, and many small groups of islands. The inhabitants of Melanesia have more of the negro characteristics, as distinguished from the more typical Malay races of Microesia. (See special articles.)

**Melanesian Mission**.—Headquarters, Norfolk Island, Melanesia.

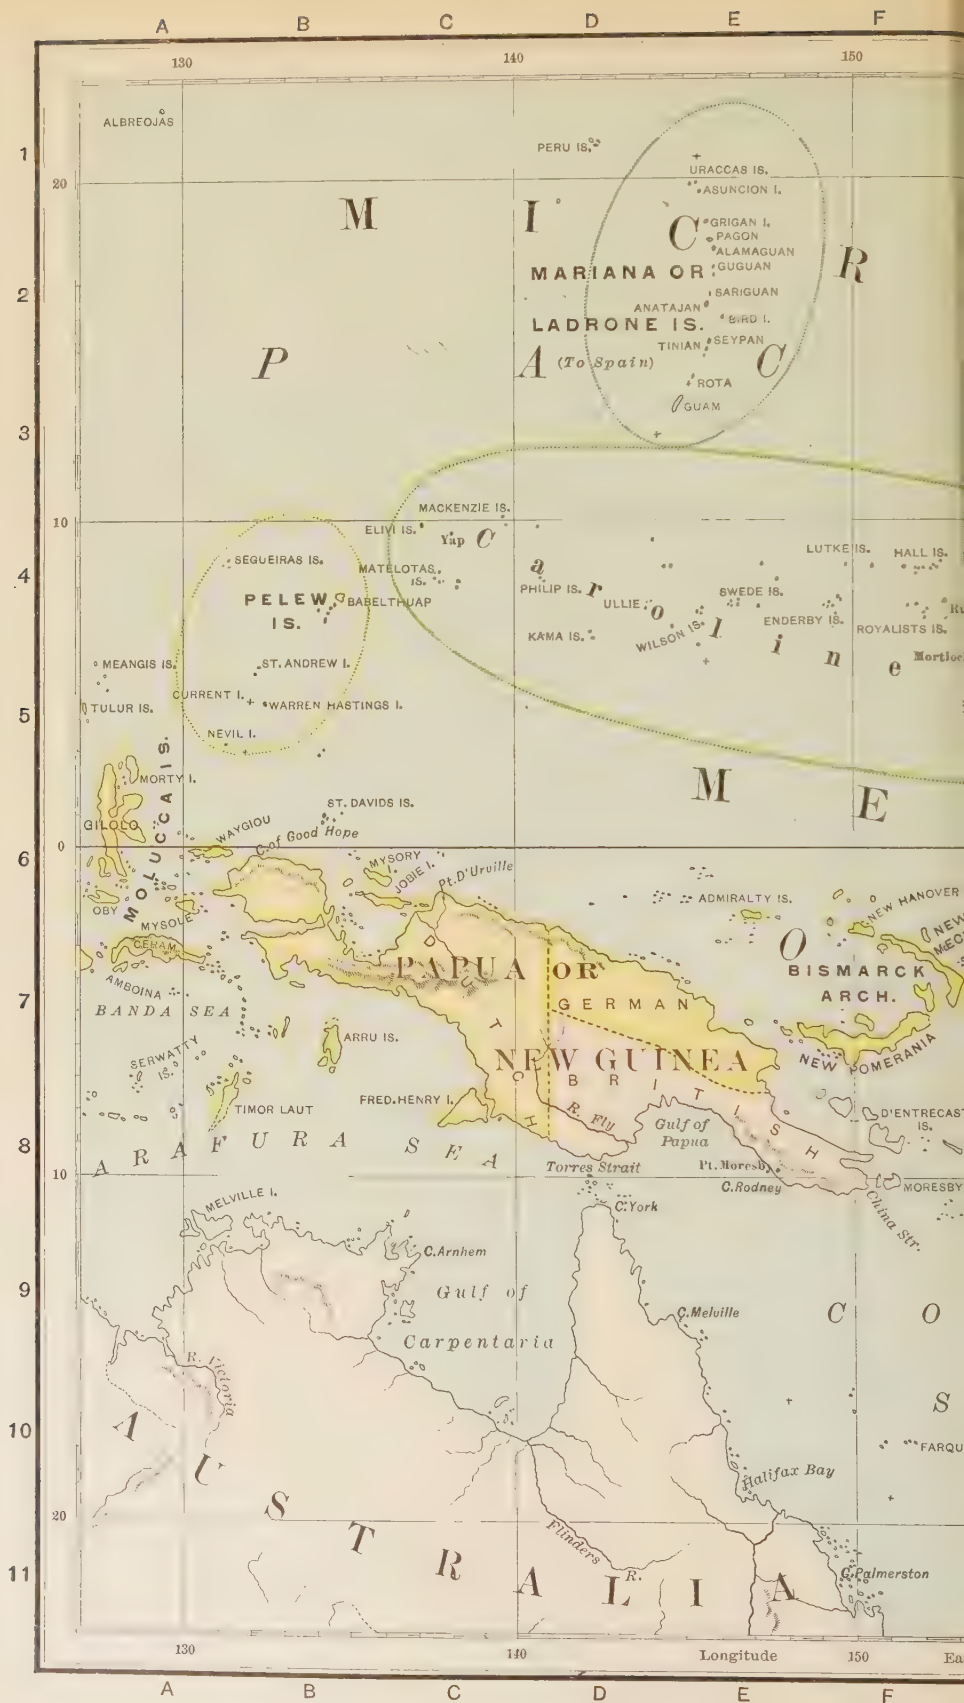

The diocese of the first Anglican bishop of New Zealand extended over 84° of latitude and 20° of longitude, and thus embraced a large number of the islands of the South Pacific; and Bishop Selwyn, occupied as he was with the duties of his colonial diocese—so extensive that it has since been divided into six—at once endeavored to carry out a suggestion made to him upon the occasion of his consecration as bishop of New Zealand in 1841 by Archbishop Howley—viz., that he should establish an Island Mission apart from that of New Zealand. He made many voyages along the coast of New Zea-

land, and became quite as expert in managing small craft at sea as the Cambridge boat in his university days, but was not able to visit any of the heathen islands of the South Seas until 1847, when he set sail in H. M. S. "Dido" on a voyage of inspection, which resulted, two years later, in a second voyage in his own small schooner, the "Undine," of twenty-one tons. Ten days after leaving Auckland he reached Aneityum, 1,000 miles to the north, the most southerly island of the New Hebrides, where he met Captain (now Admiral) Erskine of H. M. S. "Havannah," in whose company he proposed to make his trial voyage, the object of which was to get young lads from the New Hebrides, the Loyalty Islands, and New Caledonia, to take back with him to Auckland, where they would be instructed in reading, writing, and the elementary truths of the Scriptures. The vessels proceeded on their way through the various groups of islands, the Bishop developing a wonderful art in gaining the confidence of the savage people. Each of the many islands has a language of its own, but he picked up a few words in each, and carefully noted down the names of the chiefs whom he met on one voyage, and as carefully inquired for them when he next visited their island. Human nature being the same all the world over, these chiefs liked to be remembered by name, and in this way, and by his great tact and never-failing kindness, Bishop Selwyn gained the affections even of the cannibals of the South Seas. From year to year, as his acquaintance with the seas and the people increased, and as he obtained a larger vessel, he extended his voyages towards the north, and most of the islands between New Zealand and the Santa Cruz group were visited; all of them, with the exception of the Loyalty Islands and the southern portion of the New Hebrides group, being without European missionaries or even native teachers. With a courage and enterprise never surpassed, and with zeal and wisdom equal to his peculiar trials and difficulties, the bishop pioneered the way for those who were to follow. Few men have braved so many dangers, with less means of defence, in the service of Christ. In his first voyages he had no charts, and for a long time had to rely upon his own drawings and some old Spanish and Russian charts. He had to command his vessel, take observations, calculate distances, pull a rope, and manage people on board speaking perhaps ten languages. The natives who came on board sometimes brought their wives with them, and the bishop made dresses for the women, and when they were sick, "he even washed their babies." Thus was the Melanesian Mission founded, and at a meeting of the bishops of Australasia held in Sydney in 1850 it was adopted by them as the mission work of their churches.

By contributions from Australia, the "Border Maid," a schooner of 100 tons, was furnished for the mission; and in 1851 Dr. Tyrrell, the Bishop of Newcastle, New South Wales, who had been Bishop Selwyn's comrade in the Cambridge University boat, accompanied him on a voyage. At Mallicollo, one of the largest of the New Hebrides,—where very little intercourse could have been held with white men, since the natives did not know the words "tobacco" and "missionary," usually the first two English words known in the South Seas,—Bishop Selwyn and his men had a narrow es-

STRUTHERS & CO., N.Y.

cape. Leaving the Bishop of Newcastle on the "Border Maid," the Bishop of New Zealand landed, as he almost always did when near any island, and walked about, making special acquaintance with a very pleasing elderly man and his son, a fine intelligent lad. Finding a well of good water, the bishop returned the next morning with a party, to replenish his water-casks. The work was fraught with some danger, and, had it not been for the extraordinary presence of mind, which never seemed to be absent from the Bishop of New Zealand, the men might never have returned to the boat. The people were bent on mischief, but the bishop kept his eye on the chief, told his men to go on with the water, and thus got all in safety to the boats,—greatly to the relief of the Bishop of Newcastle, who had been watching the state of affairs with his glass. The canoes, which had in the meantime surrounded the ship, when the bishop's party arrived were got away, and no harm was done.

In 1855 the Rev. John Coleridge Patteson, M.A., joined the mission at his own charges, was trained by Dr. Selwyn to take complete charge of it, and in 1861 was consecrated Bishop of Melanesia. Carrying on the work as the Bishop of New Zealand had planned it, Bishop Patteson collected bands of young men, who were trained first at Auckland and afterwards at Norfolk Island (to which the headquarters of the mission were removed in 1867). Bishop Patteson was joined by Rev. R. H. Codrington, M.A., of Wadham College, Oxford, who also labored gratuitously, and together they trained young men to be missionaries to their fellow-countrymen. The chief sphere of Bishop Patteson's labors was in the Northern New Hebrides, the Banks, and Solomon groups. Between the latter are the Santa Cruz and Swallow Isles, where he eagerly sought openings; and it was at Nakapu in the Swallow group that he, with Rev. J. Atkin and a native teacher, was murdered in 1871. But the work was carried on. Dr. Codrington, while declining the bishopric, continued the mission, which now owes more than can be said to his labors in every field of the work, but especially to his management of the school at Norfolk Island, and to his unwearied researches into the philology of the island languages and his application of them to the practical work of translations. In 1873 Rev. J. R. Selwyn, M.A., a son of the pioneer bishop, and Rev. John Still volunteered for the work, and the former was, in 1877, consecrated Bishop of Melanesia. He had been a crack oarsman at Cambridge, and has proved a fine oceanic missionary. The present field of the Melanesian Mission embraces groups of islands from the northern part of the New Hebrides to the Solomon Islands, and extends from 17° to 7° south latitude and from 168° to 158° east longitude. In the Banks group the mission has won its greatest success, but it is pushing on to the Santa Cruz Islands, and has obtained a good footing on Nakapu, where Bishop Patteson perished.

**Mode of Working.**—From the earliest days of the mission the Bishop of New Zealand hoped to work these islands by means of native teachers and a native ministry. To use his own phrase, "The white corks were only to float the black net." To carry out this purpose, the islands are divided into districts, each headed by a white clergyman or member of the staff, and

from these districts boys are brought every year to Norfolk Island, where they are trained to be teachers of their own people. The mission estate on this island comprises 1,000 acres, for which £2,000 were paid by the Government, and contains several blocks of buildings for the bishop, clergy, and scholars, chapel, schools, and workshops. Towards the cost of these Bishop Patteson contributed £1,000, and Miss Yonge, the authoress, gave the profits of "Daisy Chain," and other sums amounting to £1,000. Farm work and mechanical operations are carried on, whereby the island youths and their wives (for many are married) are instructed and civilized. Lessons, in an almost endless variety of dialects and languages, alternate with work, and religious exercises are daily observed. As opportunity offers, these teachers are placed at stations in their own homes, or, as is often the case, on neighboring islands. Here they are superintended by the white clergymen, and the bishop makes a tour of inspection and examination every year. The young men are not allowed to become ministers, or even church-members, until after long trial. The school is considered the great work of the mission, and it is sought to form the characters of the boys by close and personal instruction. Each member of the European staff has a separate house, and the boys are lodged with them, and are encouraged to be friendly and to speak openly with their teachers. The students number about 200, and to feed and clothe them is no slight undertaking. Sweet potatoes and maize and very much of the meat, which form the staple food, are produced on the place, and their production is looked upon as a large part of the training of the Melanesians, but even under favorable circumstances of weather and crops, large quantities of biscuit, rice, and sugar have to be imported, and, as has recently been the case, when the crops fail through drought, the expense of importing makes heavy demands upon the mission funds. The Melanesian party breaks up in April, when the island voyages begin, and is not made up again til they are over, in November.

These winter voyages are the most arduous part of the work connected with the mission, and are prosecuted under circumstances of continual hardship and danger over seven months of the year and 18,000 miles of sea; but without them and the mission vessel, the "Southern Cross," the mission, which has now 83 stations and schools on the islands, could not be maintained.

The income of the mission, about £6,500, is derived from subscriptions from England, Australia and New Zealand, and from an endowment fund, a large portion of which was bequeathed by Bishop Patteson, and which produces about £1,500 a year. In New Zealand the mission is adopted as a work of the church, and collections are made for it in every parish. In Australia the help is less definite, and comes largely from Sunday-schools, which support scholars at the mission.

### Mission Fields.

**The New Hebrides.**—Many islands in the New Hebrides group were visited by the Bishop of New Zealand on his first voyage, and a few natives were induced to return with him to Auckland. Afterwards he and Bishop Patte-

sou repeatedly stopped at one and another island on their annual voyages in the "Southern Cross," and the Presbyterian missionaries on Aneityum, Futuna, Eromanga, and other islands of the group were many times cheered and helped by their visits, and the great interest which they always manifested in their mission. Many young men were trained at Auckland in the early days, and later at Norfolk Island, and returned to be teachers on their own or neighboring islands, and five or six languages were reduced to writing by Bishop Patteson; but gradually as the Presbyterian Mission increased in strength and enlarged its borders, the Melanesian Mission confined its labors in this group to the most northern islands, while extending its efforts towards Santa Cruz and the Solomon Islands. Its present stations in the New Hebrides are on Maewo, Opa, and Arahua.

1. Maewo, or Aurora, situated between 168° 3' and 168° 15' east longitude, and 14° 51' and 15° 21' south latitude: is about 30 miles long from north to south, and 7 miles broad. It is mountainous and richly wooded, and there are some picturesque waterfalls in the mountain streams. It was discovered by Bougainville in 1768, and in 1774 Captain Cook visited it. Bishop Patteson, after the visit to Leper's Isle (q.v.), went ashore here, and his men filled up their water-tanks at a beautiful waterfall. A few young men were obtained on this occasion, and subsequently for the institution at New Zealand and Norfolk Island, who were regularly returned to their friends; thus friendly relations were established, and the vessel called from year to year. When upon his last cruise in 1871 the bishop landed in two places. In the end of the same year H. M. S. "Rosario" sailed near the island, and the commander sent off a boat, under charge of the paymaster, for the purpose of obtaining fresh provisions. The paymaster, while offering beads to a native in exchange for cocoanuts, was treacherously struck from behind with a club, and apparently killed. The commander, seeing the occurrence from the ship, ordered a shell to be fired, and a party of seamen and marines landed for the purpose of punishing the wretches, who, however, made their escape; but four villages were burned and some canoes destroyed. The paymaster ultimately recovered, and Commander Markham admitted that it was possible that the treachery had been perpetrated in retaliation for some previous wrong inflicted on these islanders by his own countrymen. The attack may have been made in requital for the kidnapping of some of their tribe. (Cruise of the "Rosario," p. 200.) At the same end of Aurora, in November, 1874, Captain King, of a Fiji cutter in the labor trade, was clubbed to death. These cases indicate what sort of inhabitants are on Maewo; yet even here the "Southern Cross" wintered without any danger in 1874; the natives evidently distinguishing between a mission vessel and other vessels. The visits of the "Southern Cross" have greatly conciliated them; and the young men who had been taken to Norfolk Island and returned, prepared the way for the residence of a missionary during the winter months, and in June, 1878, Bishop Selwyn resolved to spend some time there. He had a house erected of closely-laced reeds, for which he paid 3 axes, 7 knives, and 14 pipes and tobacco. The little shanty, which he jokingly called his "palace," was only two feet off the

ground at the sides, so that he could not stand erect, except when under the ridge-pole. The people were friendly to his residence among them, and the bishop kept up daily service and taught the people, kept school in the mornings and evenings, and in the afternoons visited the villages. The language of the island is akin to that of Mota, which the bishop knew, so that he could generally follow his interpreter (he had two boys with him). He had a school of 25 children at a village near his "palace," and made a tour of all the villages, and was everywhere well received.

2. Opa, or Leper's Isle.—This island was also discovered by Bougainville, and was the only one of the New Hebrides upon which he landed. Although apprehensive of an attack, he remained long enough to take possession of the islands in the name of the King of France, and to bury underground a plank of oak upon which was an inscription telling what he had done. As he went off, the natives sent after him a shower of arrows and stones, and he retaliated in powder and shot. His impressions of the people were not favorable. "The islanders," he says, "are of two colors: black and mulatto. Their lips are thick, their hair woolly, and sometimes of a yellowish color. They are short, ugly, ill-proportioned, and most of them infected with leprosy, a circumstance from which we called the island they inhabit, Isle of Lepers." He saw few huts, but many people. Captain Cook, in 1774, was visited by two canoes from the island, but they did not remain long. From his ship he saw many beautiful cascades pouring down from the mountains, which are about 3,000 feet high. The island is about 15 miles long and is 8 miles from Aurora.

Bishop Patteson had a much higher opinion of the island and islanders than had Bougainville. "This magnificent island," he wrote, "is inhabited by a singularly fine race of people. Never was a place more completely misnamed." Many times he praised its beautiful scenery and interesting people, and regretted much that it should have been called the Isle of Lepers. Skin diseases common to the South Sea Islands are there, but not leprosy. Its native name is Opa. Bishop Patteson's first visit here was in 1857. At three different places he landed in his boat, and at a fourth waded ashore to meet the people. Things did not look favorable to him or his cause, but he showed no fear, and soon calmed the alarm of the natives, who were fingering their bows and arrows, from a suspicion that their food might be the object sought by the visitor. Upon another visit in 1864, he succeeded in getting two boys to go with him to Auckland, but was in very great peril from the club of an enraged man, which was lifted to strike him. He held out a few fish-books to the man, and at the same moment two of the natives, among whom the bishop was sitting, seized the man by the waist. This attempt to kill the bishop was owing to the fact that a young man had been shot dead by a trader two months before for stealing a bit of calico. "The wonder was," said the bishop, "not that they wanted to avenge the death of their kinsman, but that the others should have prevented it. How could they possibly know that I was not one of the wicked set? Yet they did discriminate: and here again, always by the merciful providence of God, the plan of going among the people unarmed and unsuspectingly has been seen to dis-

arm their distrust and to make them regard me as a friend." Some pupils were obtained from the island, and were taken to their home again. "The natives live in a very sad way among themselves," the bishop says in the record of a visit in 1868, "but they know us now in many parts of the island, and a visit to them has become far less anxious work than it once was." In 1869, he writes again, "I have learned enough of the Leper Island tongue to talk with some degree of fluency. . . . It fits into its place as a very friendly neighbor of Aurora, and still more Espiritu Santo and Whitsuntide; and all these go along with the Banks Islands." Thus a hope is held out that comparative philology may yet do something to reduce the babel of these island languages into unity. The bishop felt now that if a missionary were resident among the natives of Opa much good might result, and accordingly, by way of experiment, the Rev. C. Bice was left there for a fortnight in 1871, and was taken up again by the "Southern Cross," and seven boys, who had been for some time under instruction at Norfolk Island, were left. Thus the work began on Opa. Mr. Bice returned several times for a month's stay, and has now for many years been in charge of the mission on the island, where he has his residence during the winter months. Schools and churches have been established, and a wonderful work has been accomplished. The language of Mota, the common tongue at Norfolk Island, is now well understood, and is likely to become the vernacular.

3. *Aragha or Pentecost Island.*—Bougainville sighted the island of Aragha on Whitsunday (May 22d, 1768), and named it Ile de Pentecôte. He did not land on this island, and little was known of it even after Cook's voyage through the group, until the days of the bishop of New Zealand, who, with Mr. Patteson, visited it in 1857. They rowed to the shore, where they found a most friendly party, sixty in number, with a chief named Mankau at their head, who met them in the water up to his knees and presented the bishop with his bunch of bright colors, a compliment which was acknowledged by a gift of a hatchet, and then the bishop and Mr. Patteson stepped into the water and walked with him to land. The bishop had already acquired a few words of the Ambrym (an island south of Pentecost) language, and made the chief understand that he wanted water for his vessel. A supply was at once furnished, and thus the first visit passed off satisfactorily. The island is 36 miles long and less than 10 miles wide; its elevation is about 2,000 feet, and at some places the cliffs are very steep, but at the extreme northwest there is a landing-place called Van Marana. At this point Bishop Patteson frequently called, and acquired the language in use there, printing a vocabulary with many words arranged grammatically and with illustrative sentences. He soon became well known to the natives, and in 1862 sat for two hours alone among a crowd of people, and a young man afterward went with him to spend a year at Auckland. The natives continued to be friendly, and occasionally lads went in the schooner to the institute. There is a considerable population on the island, affording great opportunity for missionary operations, and Bishop Selwyn has followed up the work of his predecessor here as elsewhere. There are now in these three islands of the New Hebrides group several churches, and 12 schools with 23 teachers and over 300 scholars.

*Solomon Islands.*—This group of islands, discovered by Mendana in 1568, and called by him the Solomon Isles, because he supposed them to be the source of King Solomon's "gold, ivory, apes, peacocks," lies about 200 miles to the northwest of the New Hebrides group. They were first visited by Bishop Selwyn and Mr. Patteson in 1857, and from that time until his death in 1871 Bishop Patteson put forth every effort to extend to them the blessings of Christianity. Stations and schools are now established upon most of the islands of the group. At Isabel, the most northerly of the Solomon Isles, there are three schools, and Christianity has gained a great hold on the people. Native preachers and teachers in charge here are aided by the presence and advice of the missionaries, when they stop at the islands upon their annual voyages. At Florida, the history of the rise and progress of Christianity may be indicated by a slight sketch of the life and labors of Charles Sapibuana, a native of Gaeta, southeast of Florida. He was a very small boy, perhaps twelve years of age, when Bishop Patteson in 1866 took him to New Zealand. There, at Kohimarama, and afterwards at St. Barnabas, Norfolk Island, he received the teaching which bore such abundant fruit; the course of training, broken only by the holiday spent among his own people once in two years, was continued until 1877, when he, with his wife and child, settled at Gaeta, to begin work as a teacher. The ground there was entirely unbroken, save for such attempts at school work as he and other Gaeta scholars had been able to make during their holidays.

Setting himself with quiet and unflinching determination against what was wrong, his power began to be felt, and of course met with bitter and most dangerous opposition, but he passed unhurt through all, though the threats of vengeance and the plans to kill him and destroy his property might well have daunted a less determined man. It is not strange that his work should soon have begun to tell. In 1878 he gathered the first-fruits of his labors in the baptism of his brother and his brother's wife, with their two small children. Then several others joined the little party for daily prayers. In the following year a great change took place at Gaeta, the remarkable feature of which was the evident presence of something working in the minds of the people—something, the missionaries said, easier to be conscious of than to describe. As a result of it, more than thirty adults were baptized. After three years of hard work Sapibuana went to Norfolk Island for rest and medical treatment, but was compelled to return home, although his health was far from restored, owing to the troubles brought upon his people by the massacre of H. M. S. "Sandfly's" boat's crew. His influence with Kalekona, the Gaeta chief, was of the greatest assistance in bringing about the settlement which was finally secured. In 1882 he was ordained deacon in the presence of his people, and from that time until he left Gaeta in 1885, for another much-needed period of rest at Norfolk Island, and to receive his ordination as priest, his work became even more remarkable, and his influence among all, whether Christian or heathen, was greatly felt. Each year saw a large and increasing number received into the church, while the lives of the people, delivered from the dread of their native superstitious and the fear of treachery, expanded into brighter and

happier channels. Loved, respected, and obeyed, Charles Sapibuana was the guiding power among his people; and his death at Norfolk Island in October, 1885, seemed to the missionaries an irreparable loss; but his work was taken up by others, and is carried on with good success. Other islands in the Solomon Isles, upon which many schools and churches have been established, are San Christobal, Ulawa, and Malanta.

*Banks Islands.*—In this group, lying to the north of the New Hebrides, the mission, as has been said, has been most successful. Mota is now a Christian island, under the charge of a native pastor. There are six schools on the island. Moblav and Ra are also under the charge of a native pastor, and under his able and active superintendence Christian work is progressing favorably. The schools, well attended and well taught, fairly encircle the islands, so that the people almost everywhere have an opportunity of attending one or other of them within reasonable distance. At a recent confirmation service on Ra the church was too small to hold the congregation, so a place was prepared in the village under the large spreading banians. Mats were spread for the candidates (36 in number) in front, whilst the congregation sat behind. The whole scene was beautiful in the setting sunlight, and everything tended to make the occasion a bright and happy one. At Vanna Lava five schools are progressing favorably, and at Ureparapara a school under the charge of a teacher from Mota is doing satisfactory work. Many baptisms have taken place on this island. At Santa Maria there are eight schools; many of the natives have been baptized, and there has been a universal demand for teachers. Excellent work of great power and extent has been done by the native deacon in charge. At Merlav earnest work had been begun by a native teacher, but the bishop on his yearly visit in 1886 was met by the sad and disheartening news of his ill-conduct and the consequent breaking up of his school; but had the comfort of finding the other and older school, one of the best taught in the group, well attended, and the scholars earnest and well-behaved under their able and earnest Christian teacher. The little reef island of Rowa, with a population of 29 souls, is under the charge of a native teacher, and the people are well taught, industrious, and well behaved. The little church building recently completed is a great credit to them. Having little or no timber for the purpose, the walls, seats, communion-table, and altar-rails were all made of coral, plastered very smoothly and evenly with lime. The whole is excellently finished, considering that it is entirely native design and work. A great event throughout the Banks group was the recent visit of Mrs. Selwyn, who landed on most of the islands and visited many of the schools. Her presence excited an intense interest, and was productive of much good as well as much pleasure.

In 1888 a number of canoes were blown away from the island of Ticopia (northeast of the Banks Islands) in a gale, and three of them found their way to Banks Islands. The occupants were most hospitably received by the people of Mota and Motalava, and were eventually taken home by the bishop in his vessel. Two most friendly visits were paid to the island, and volunteers were readily forthcoming from

Motalava to establish a station there; but the people were afraid, saying that if these teachers should come, disease and death would follow. They were afraid also to have any boys go to Norfolk Island; but the bishop thinks there will be little difficulty in overcoming this natural hesitation, and hopes this year to establish a station on an island to which the path has been so providentially made clear.

In the Torres Islands very little progress has been made of late years, but a very good teacher and his wife, natives of Lo, have been established there, and their influence already is being felt.

*Santa Cruz Islands.*—For nearly three centuries the Santa Cruz Islands have borne a tragic relation to European life. Mendana died near Santa Cruz in 1595. Captain Carteret's expedition in H. M. S. "Swallow" had experience of sorrow there in 1797, in which his master was mortally wounded, and his lieutenant, gunner, and 30 men rendered incapable of duty. Several of them died there. The great French navigator, La Perouse, perished with all his company at Vanikora, the southern island of the group, in 1788. D'Entrecasteaux, sent to search for La Perouse in 1793, died as he sailed from Santa Cruz to the Solomon Islands. In 1864 Bishop Patteson's boat was attacked, and two of his faithful assistants in the mission, sons of Norfolk Islanders, died from the wounds inflicted by the savage natives. In September, 1871, Bishop Patteson was murdered by the heathen a short distance off in the Swallow group, while his thoughts were full of Santa Cruz and its people. Rev. J. Atkin and a native teacher were also killed, and, lastly, Commodore Goodenough, when on a mission of humanity to the natives of the same islands, died by their hostile arrows. As in the Hawaiian Islands, in Samoa, Fiji, the New Hebrides, and the Banks group, "the blood of the martyrs in the Santa Cruz Archipelago and in the Solomon Islands will also be the seed of the Church, and the Melanesian Mission will reap the harvest." Already sheaves have been gathered, and Bishop Selwyn, in his report for 1888, says that Santa Cruz, although as yet without many Christians, is open and friendly to mission work, and the erection of a cross on the spot where Commodore Goodenough was killed proves how completely the people have accepted the proffer of peace and friendship. In 1888, 17 Santa Cruzians were under instruction at Norfolk Islands.

The report of the mission for 1883 (the latest received) shows 766 baptisms, 96 confirmations, 83 stations, 145 teachers, and 2,514 scholars.

**Mela Seithali**, a town in the Tuticorin district, Madras, India. Station of the S. P. G.; 1 missionary, 7 native workers, 16 out-stations, 197 church-members.

**Melkaon**, a district of Cochin, India. Station of the C. M. S.; 3 churches, 1 native pastor, 541 communicants, 222 scholars.

**Mellawi**, a town in Lower Egypt. Mission out-station of the United Presbyterian Church of America (1872); 2 native workers, 42 church-members, 1 school, 50 scholars.

**Melnattan**, a town in the Negapatam district, India. Station of the Wesleyan Methodist Missionary Society (England); 1 missionary, 86 communicants, 570 scholars.

**Melorane**, a town in the Transvaal, South Africa. Station of the Herrmansburg Missionary Society.

**Memikan**, a village west of Oroomiah, Persia, on the border of Turkey and Persia. At various times missionaries from Oroomiah have been stationed there for work among the mountain Nestorians, but the work has been chiefly conducted by the native church and pastor.

**Mendi**, a mission in West Africa, in the Mendi country, on the coast near Sherbro Island, lying between latitude 7° and 8° north, and longitude 10° and 13° east.

In 1839 a Spanish slave ship called the "Amistad" was captured by the United States off Long Island. Forty-two Africans were found on the vessel, of which they had taken possession, and they were committed to jail on the charge of murder made by the Spanish captain. Anti-slavery men were aroused in their behalf, a committee was appointed to raise the funds and fight the case in the courts, and finally the slaves were declared free by the order of the Supreme Court of the United States in March, 1841. The committee was then empowered to return them to Africa and settle them as a colony, and with the funds in hand to establish a mission among them. The party, consisting of the Africans and two missionaries (one married), landed at Freetown, Sierra Leone, in January, 1842, and soon after a site was occupied near the village of KaMendi, on the Little Boom River. After their departure the "Amistad" committee was merged into the Union Missionary Society, which afterwards was united with two other kindred societies to form the American Missionary Association.

In spite of the war which broke out in 1845 in the Sherbro country and continued several years, the mission prospered, and in 1849 the church, organized in 1845, numbered 40 members. Through the mediation and wise counsels of one of the missionaries the war was finally brought to a close, and peace was once more known in the Mendi country. From that time till 1853 the work prospered, reinforcements of missionaries arrived, and a station was established at Tecongo. Tissana on the Big Boom River, Good Hope on Sherbro Island, and Avery Station in the Bargroo country, were successively opened as mission stations, the latter being in a most healthy location and having an industrial school connected with it. The mortality among the missionaries was so great that Africans or descendants of Africans were thought to be the best for the work, and a body of missionaries sailed in 1877, and an additional party of two Fisk University graduates, with their wives, was sent out in 1878; all of these took at once a vigorous part in the work.

In 1883 the American Missionary Association withdrew from its work in Africa. The Mendi mission was offered to the A. B. C. F. M., but on their declination it was transferred to the United Brethren in Christ, whose missionaries had long been laboring in close proximity to the mission, and the mission is now in their hands. (For present condition of the work see Shaingay.)

**Mendi Version.**—The Mendi belongs to the Negro group of African languages, and is spoken by the Mendi tribe, near Sierra Leone.

The Rev. J. F. Schön, of the Church Missionary Society, translated the four Gospels, aided by a native of the Mendi country, named Harvey Ritchell. The version, for which the alphabet of Dr. Lepsius has been adopted, was published at the request of the Church Missionary Society by the British and Foreign Bible Society in 1870. In addition to the Gospels, the Bible Society printed in 1871 the Acts of the Apostles, which the Rev. H. Johnson, a native African clergyman, had translated for the Church Missionary Society. In 1872 the Epistle to the Romans was added to the already published parts of the New Testament. The four Gospels were on exhibition at Calcutta.

**Mendoza**, South America, capital of Mendoza, a southwestern province of Argentine Republic, surrounded by several canals, one of which traverses the town, and the banks of all of which are fringed with poplars. Every available spot of land in the vicinity is highly cultivated. Population, 8,124. Mission circuit of the Methodist Episcopal Church (North); 1 ordained preacher, 1 unordained preacher, 81 church-members.

**Mennonite Missionary Society** (De doopsgezinde Vereeniging).—De doopsgezinde Vereeniging tot bevordering van Evangelieverbreiding, or, as it is generally called, The Mennonite Missionary Society, was founded in Amsterdam in 1840 and works, according to its last annual report, March 31st, 1889, in the Dutch colonies in the East Indies, maintaining one station at Pakanten, Sumatra, and one at Mergaredja, Java.

The coast-lands of Sumatra, mostly low, swampy, hot, but extremely fertile, are inhabited by Mohammedans who, as shown by a number of temples now falling into ruins, have been converted from Buddhism. On the plateaus in the interior heathen savages are found who were not wholly subdued by the Hollanders until 1878. The Rhenish Missionary Society has a great number of flourishing stations both among the Mohammedans and among the heathen. The Mennonite station, Pakanten or Huta Bargot, situated at the head of the Batany Gadis River, was founded in 1871, and has gathered a congregation of about 200 Christians, principally from among the Mohammedans. An out-station will probably very soon be established in the vicinity of Pakanten.

Java, "the pearl in the crown of Holland," was heathen throughout when, in 1594, the Dutch expelled the Portuguese and built Batavia. Now it is Mohammedan throughout, in spite of the exertions of the Christian missionaries. The population consists of 13,000,000 Javanese, into whose language the Bible was translated by Guericke in 1856; 8,000,000 Sundanese, into whose language the New Testament was translated in 1878; 3,000,000 Madurese and Malayans, 207,000 Chinese, and 33,700 Europeans. Most of these people are lively and alert, and the country they inhabit is one of the most luxuriant spots on the globe. But the constitution under which they live makes progress an impossibility. According to this constitution the Dutch Government is the sole proprietor of the soil. It gives to each native, when he comes of age and can marry, a rice-field or a coffee-garden, for which he as tenant must pay a certain rent or he will be sent to the

galleys. What surplus he raises above the rent is his, but he is not allowed to sell his products to anybody but the agents of the Dutch Government, and the price which they give is fixed in Amsterdam. In a good year the Dutch Government draws a revenue of about 50,000,000 fl. from Java, for which the Hollanders have built their railroads. In a bad year the natives are left to die like fish in a dried-up stream. This system, which is nothing but a clumsily masked slavery, explains with sufficient plainness why the natives have sought refuge in a stagnant Mohammedan fatalism, though Christianity was offered them.

In this teeming population of about 25,000,000 people there are at present 23 Christian missionaries at work under the direction of 1 German and 8 Dutch societies, and it is estimated that they have made about 10,000 converts among the natives. The Mennonite station at Mergaredja has 99 members and 5 out-stations: Teyalamba with 64 members, Kedung-pendjalin with 147, Bondo with 46, Bangutawa with 30, and Japara with 2—in all 388 members. The New Testament, translated by the missionary Jansz, has already been printed, and a translation of the Old Testament is in preparation.

**Mennonites, Foreign Missionary Society of.** Headquarters, Milford Square, Penn., U. S. A.—The mission work carried on by the Mennonite General Conference of North America is solely amongst the Cheyenne and Arapahoe Indians in Indian Territory. The work was begun during the summer of 1880 by S. S. Henry, sent out under the auspices of the Mennonite Mission Board, elected by the General Conference. A mission station was first established near the Cheyenne and Arapahoe agency at Darlington, I. T. A mission-house was built and an industrial boarding-school for young Indians established. In February, 1882, this mission-house was destroyed by fire and a larger and more substantial dwelling erected in its place.

A year or two later another station was opened, about 55 miles northwest of the first, at Cantonment, I. T. Here also a school was started similar to the one in Darlington. Both have been carried on since and are well filled with pupils.

Besides these two stations another is to be established near the Washita River about 60 miles southwest of Darlington, where a day-school is to be opened in connection with other mission work. In addition to the schools in Indian Territory, the Board maintains a government contract school for Indians at Halstead, Kansas.

Besides the missionaries and their wives there are a number of male and female helpers, among whom are several natives. One great drawback to the work is the sickly condition of the Indians, many of the most promising of the young men being called away by death when about to enter upon careers of usefulness. There are 3 Sabbath-schools with a total attendance of 125, and 2 places for stated preaching, though as yet no churches have been organized.

**Mercara** (Merkara), a town of Coorg, India, 67 miles west of Seringapatam, 72 miles northeast from Kannanore, 155 miles southwest of Bangalore. A pleasant town, comparatively well built and well kept. Climate

cool, damp, healthy. Population, 6,227, Hindus, Moslems, Christians, etc. Mission station Basle Missionary Society; 2 missionaries and wives, 4 other helpers, 58 communicants, 1 out-station, 2 schools, 55 scholars.

**Mergaredja**, a town of Java, East Indies. Mission station of the Mennonite Missionary Society (Holland); has 99 church-members and 5 out-stations with 388 church-members.

**Meriam, William B.**, b. Princeton, Mass., U. S. A., September 15th, 1830; graduated at Harvard University 1855; Andover Theological Seminary 1858; ordained November 29th of that year; sailed as a missionary of the A. B. C. F. M. January 17th, 1859, for Turkey, reaching Smyrna February 22d, Adrianople April 22d. After spending a few months at the latter place in studying Turkish, he went with Mr. Clark to the new station of Philippopolis, where he remained till his death. Returning from Constantinople with his wife he was met by five mounted brigands, and as he was alighting from his horse he fell, pierced by two balls in his right side. His death was almost instantaneous. Mrs. Meriam proceeded with the body to Philippopolis, where the funeral took place July 5th, 1862. Then followed a long and tedious struggle to bring the murderers to justice. Every conceivable excuse for delay was brought forward by the Turkish Government, but at last a conviction was secured, and the men were executed. This was a matter of special moment, as it was one of the few instances where Moslems have suffered the death penalty for the murder of a Christian, and the prompt, energetic action of the American Legation, supported by the English Consul, undoubtedly did much to insure the safety of Americans in travelling through the country. The universal esteem in which Mr. Meriam was held by all who knew him made his loss widely felt, and attracted the notice of many to the action of the government.

**Merrick, James Lyman**, b. at Munson, Mass., U. S. A.; graduated at Amherst College 1830, and the Theological Seminary, Columbia, S. C., 1833; ordained as a missionary to Persia 1834, and arrived at Tabriz 1835. After laboring among the Mohammedans for two years he joined the Nestorian Mission at Oroomiah. He returned to America in 1845, and became pastor of the Congregational Church at Amherst, where he died in 1866. He was well versed in Persian, Arabic, Hebrew, Turkish, Greek, Latin, and French. He was interested in the Persian language and literature, and bequeathed his property for the formation of four Persian scholarships in Amherst College and Columbia Seminary. He published "Life and Religion of Mohammed," translated from the Persian; "Keith's Evidences of Prophecy," translated into Persian; "A Friendly Treatise on the Christian Religion," and a full work on Astronomy, left in manuscript and translated into Persian.

**Mersine**, a city on the southern coast of Asia Minor, about 30 miles from Tarsus. Originally a mere landing-place for steamers to receive the merchandise brought by caravans from Southern Asia Minor, it has become a port of considerable importance. It lies very low, and is very malarious, so that the better class

of the inhabitants reside in villages on the slope of the mountains a few miles distant, at least through the hot summer months. The population includes representatives of every race on the border of the Mediterranean. The greater part, however, are of the Nusairiyeh sect, and speak the Arabic language.

Mission work was commenced by the A. B. C. F. M. missionaries at Adana, and a small congregation was gathered. Later the Reformed Presbyterian or Covenant Church of America transferred the Rev. David Metheny, M.D., to this place from Latakiah, and he commenced work among the Nusairiyeh. Flourishing schools have been started, and the work is progressing, although the missionaries have been compelled to remove their residence to Tarsus and Adana on account of the prevalence of fever.

**Mesopotamia**, originally the country "between the rivers," i.e., the Tigris and the Euphrates. It is not now a political division, and the term is used differently by different writers, but in general it may be said to include the whole plain of the valley of the Tigris from Mardin in the north to Bagdad or even Bassora on the south, and from the Euphrates on the west to the Zagros Mountains of the Persian border on the east. It comprises the cities of Mardin, Jezireh, Mosul (Nineveh), Suleimaniyeh, and Bagdad. The land is extraordinarily fertile, and even now if properly cultivated would yield a wonderful increase. The population are chiefly Arabs and Christians of the Jacobite and Chaldean sects. The Koords live mostly on the mountains, and come into the plains for their winter pasturage. Mission work is carried on by the A. B. C. F. M. (see Eastern Turkey and Assyria missions of that Board), with stations at Mardin and Mosul. The Presbyterian Board (North) is enlarging its work among the Syriac Nestorians, found in large numbers near Mosul and extending up the valleys of Koordistan. The C. M. S. has a missionary at Bagdad.

**Metaremba**, station of the Wesleyan Methodist Missionary Society in the Galle district, Ceylon; 1 chapel, 1 missionary, 25 communicants, 257 pupils.

**Methodist Church in Canada, Missionary Society.** Headquarters, Toronto, Canada.—The Missionary Society of the Methodist Church was organized 1824. At that time, in addition to work among the white settlers, some efforts were being made to reach the scattered bands of Indians in Ontario with the gospel message, and it was with a view of extending the work that the Society was formed. The income for the first year was less than \$150. Nearly 66 years have passed away, and the missionary force of the church now numbers some 596 persons, including missionaries, teachers, interpreters, and native assistants, but not including their wives. The field of operation has extended until it includes the whole of the Dominion. Newfoundland, Bermuda, and Japan, while the income has increased to over \$215,000. This includes both Home and Foreign work, and the entire fund is administered by one General Board.

Although there is but one fund and one management, the work itself is divided into several distinct departments. The Home work (called Domestic missions) embraces all the

dependent fields of the church among the English-speaking people throughout the Dominion, in Newfoundland and Bermuda. These fields are 396 in number, with 416 missionaries and 40,376 communicants. The expenditure on the Home work last year was a little over \$87,594. This department of missionary effort is constantly changing, inasmuch as every year some of the Home missions become self-sustaining charges, while on the other hand new fields are being constantly added, especially in the new settlements of the older provinces, in the northwest, and British Columbia.

The Indian missions are in Ontario, the Northwest, and British Columbia. They are 44 in number, with 43 missionaries, 20 native assistants, 28 teachers, and 12 interpreters, or a total missionary force of 103. The number of communicants is 4,697. There is a large Industrial Institute at Muncey, Ontario, where about 100 Indian youth of both sexes are educated and trained in various industrial pursuits; also a Home for Indian girls at Port Simpson, B. C., and an Orphanage at Morley, N. W. T. There are two Industrial Institutes being organized in the Northwest, which it is hoped will be in operation in the near future. The expenditure on the Indian work last year was \$48,508.

The results of mission work among the Indians have been of the most encouraging kind. Whole tribes have been reclaimed from barbarism and superstition, and many of them walk worthy of their high calling as followers of the Lamb. A significant illustration of the value of these missions is found in the fact that not one member or adherent of the Methodist Church among the Indians, nor, so far as is known, of any Protestant mission, was implicated in the revolt that occurred a few years ago.

The French missions are entirely in the province of Quebec. They are 6 in number, with 6 missionaries, 4 teachers, and several colporteurs. Buildings to accommodate 100 pupils of both sexes have been erected at a cost of \$40,000 in the suburbs of Montreal, and this Institute bids fair to be a powerful agency for good. The work among the French is peculiarly trying and difficult, but is not without many encouraging signs. Unquestionably, Quebec is the great problem in Canada's future; but the problem will be solved, if at all, along evangelical rather than political lines.

The only Foreign work of the Methodist Church is in Japan. This mission was begun in 1873, when two men were sent to the field. At the present time there are 14 missions, with 51 missionaries, 29 of whom are native assistants. The expenditure last year on this branch of the work, was over \$23,987. Over five years ago a college was established in Tokyo, designed as training-school for a native ministry, and also to afford a good education, under Christian auspices, to young men who might be disposed to avail themselves of its advantages. So popular did this school become during the first year, the building had to be enlarged, and the latest reports show about 200 young men on the register, and the work of the school limited only by the extent of the buildings and the number of teachers on the staff. The Woman's Missionary Society of the Methodist Church is also doing good work in Japan. They have an excellent ladies' school in Tokyo, which is patronized to the full capac

ity of the buildings and staff. They have also charge of two schools supported by the natives, one at Kofu, and the other at Shidzuoka. These schools are not only valuable as an educational force, but are centres of growing evangelistic power.

A few years ago the church had a providential call to begin work among the Chinese of British Columbia. There are now 3 missions, 2 missionaries, and 6 teachers. There are 76 communicants. Commodious buildings have been erected in Vancouver, and a site in Victoria secured, on which buildings are being erected.

*Methods in raising and disbursing funds.* In this, as in other matters, the Society proceeds upon the connexional principle. It is not left to the voluntary action of individual congregations to raise or expend money for missionary purposes, but in every congregation collections and subscriptions are taken once a year for the missionary work of the church. The usual custom is for missionary sermons to be preached and a public meeting held at which information from the Annual Report is presented, and the claims of the mission urged upon the people. The sympathy and co-operation of the young people are also utilized, and from this source alone nearly \$28,000 came into the treasury last year. The amounts collected are forwarded from time to time to the General Treasurer, and payments are made in accordance with the amounts fixed by the General Missionary Board.

In regard to disbursements, there is a General Board of Missions representing the whole church, which meets annually in the month of October. They have before them tabulated reports from every district in the connexion, giving the name of each mission, the amount which it is proposed to pay to the missionary, the amount which the mission is able to raise for this purpose, and the grant recommended from the fund by the district meeting. These reports are carefully scrutinized by the Missionary Board, and grants are then made on the basis of the preceding year's income.

It may be safely said that the missionary cause has a stronger hold upon the sympathy and liberality of the Methodist Church than any other interest. Conviction is growing that missions are not a side issue, but the main question, and that blessings upon the home churches may be expected just in proportion as they are faithful to the Master's command to preach His gospel "to every creature." The signs of the times all indicate the approach of a great missionary revival, and a speedy and large increase in missionary givings, as well as a large extension of the missionary field, are confidently anticipated.

**Methodist Episcopal Church (North), U. S. A.—Missionary Society.** Headquarters, 150 Fifth Avenue, New York, N. Y., U. S. A.—As in so many cases, the impulse for the formation of this Society came from an incident of church work. A drunken negro (John Stewart) in the town of Marietta, O., on his way to the river to drown himself, was arrested by the voice of Marcus Lindsey, a noted Methodist preacher of his day. The sermon resulted in his conversion. An impulse—who will say it was not the same that sent Paul to Macedonia?—moved him to bear his message

among the savage tribes of the Northwest. He reached the Wyandotte Agency. His simple story touched the heart of the agent, and his preaching resulted in the conversion of several chiefs and a number of the people. This work, demonstrating the gospel to be the power of God unto salvation of those savage tribes, stirred the entire church, and was among the leading agencies which led to the organization of the Missionary Society. Nathan Bangs, Joshua Soule, and other leaders of the Methodist churches in the city of New York, after earnest counsel and prayer, decided that the time had come when American Methodism should join in the organized missionary movements for the conversion of the human race. The Wesleyans of England had organized a society. The Baptists and Congregationalists of this country had entered the mission field, and like responsibilities rested on the Methodist Episcopal Church.

At a meeting of the preachers of the Methodist Episcopal Church in New York City, held in 1818, the Rev. Laban Clark proposed the organization of a Bible and Missionary Society in the church of which they were members. The subject having been fully discussed, the formation of such a society was resolved upon, and Messrs. Clark, Nathan Bangs, and Freeborn Garretson were appointed a committee to draft a constitution, which was approved by the Preachers' Meeting, and subsequently submitted to a public meeting of members of the church and friends of the missionary cause convened by the Preachers' Meeting, and held in the Forsyth-street Church, on the evening of April 5th, 1819. The constitution was adopted, and "The Missionary Society of the Methodist Episcopal Church" was organized, with Bishop McKendree as its first president, Rev. Thomas Mason as secretary, and Rev. Joshua Soule, treasurer.

The objects of the Society are charitable and religious; it is designed "to diffuse more generally the blessings of education and Christianity, and to promote and support missionary schools and Christian missions throughout the United States and Territories, and also in foreign countries, under such rules and regulations as the General Conference of the Methodist Episcopal Church may from time to time prescribe."

Until 1844 the Society represented all the churches of the denomination. In that year, however, a division was made, and the Methodist Episcopal Church (South) was formed, and established its own Missionary Society.

**Constitution and Organization.**—The Missionary Society of the Methodist Episcopal Church (North) is really the church itself acting through its various forms of organization. These will require special definition. First, the General Conference is composed of delegates from the different annual conferences. These delegates are ministerial and lay. The ministerial delegates consist (1890) of one delegate for every 45 members of each annual conference; the lay delegates of two laymen for each annual conference, except that when a conference has but one ministerial delegate, it shall be entitled to no more than one lay delegate. Second, the annual conferences are composed of not less than twenty effective members, that is, of ministers in a certain territorial district. Of these there are now (1890) one hundred and eleven.

The General Conference for the prosecution of its missionary work appoints two bodies, one

a Board of Managers, and the other a General Missionary Committee.

The Missionary Committee is composed of the bishops, as ex-officio members, one representative from each of fourteen districts, and the secretaries and treasurers; also fourteen members of the Board of Managers.

The Board of Managers is composed of the bishops as ex-officio members, thirty-two laymen, and thirty-two travelling ministers of the church elected by the General Conference.

The General Conference meets once in four years; the General Missionary Committee once every year, and the Board of Managers monthly, or oftener, as may be required.

Originally the Missionary Society was composed of members who had contributed a certain sum, not less than \$20 at one time, to the funds of the Society, and who had the right of voting at the annual meetings. When the charter was changed, and the General Conference assumed the supervision of the missionary work, the system was continued of acknowledging as members, honorary managers and patrons, those who contributed not less than \$20 to \$150, or \$500, respectively, at one time. This membership is practically merely honorary, though honorary managers and patrons have the right of attending the meetings of the Board of Managers, but do not vote.

The General Missionary Committee determines what fields shall be occupied as foreign missions, the number of persons to be employed in them, and the amount necessary for their support; it also determines the amount which each bishop shall draw for the domestic missions of the conference over which he shall preside. The appropriation of money rests entirely with the General Missionary Committee, except that the Board of Managers may provide for any unforeseen emergency that may arise in any of the missions, and meet any demands to an amount not exceeding \$25,000. Wherever a foreign mission is organized into a conference, they receive the notice of appropriations directly from the General Missionary Committee. Wherever missions are not thus organized as a conference, they receive their information of appropriations through the Board of Managers. For those missions that are organized as a conference the Board of Managers acts simply as the executive body of the Missionary Committee. All funds, however, for all missions pass through the hands of the Board of Managers, who account to the General Missionary Committee, and they to the General Conference.

Each mission, whether it be organized as a conference or not, is divided into districts over which certain ministers are appointed by the bishop as presiding elders, who superintend the work of that district and are in a sense diocesan bishops.

Whenever any appropriation is made to a mission, whether it comes directly from the General Missionary Committee to the mission as a conference, or from the Board of Managers to the mission, the bishop calls together the members of the conference in annual meeting, and the amount of money appropriated by the General Committee or the Board of Managers is apportioned among the different stations or departments of missionary work. The bishop has the right of veto over the decision of the annual conference.

**Development of Foreign Work.**—1. *Africa.*—In March, 1819, President Monroe approved an act of Congress by which all Africans recaptured from slavers should be restored to the coast of Africa and committed to the care of agents of the government of the United States. The depot of the United States for this purpose determined also the selection of the same section by the Colonization Society, and that, in turn, determined the location of the first Methodist mission at Sherbro, Liberia, in 1820. The utter unfitness of Sherbro became apparent in a few days, in the general prostration by fever and the speedy death of numbers, including two of the agents. The fragment of the colony returned disheartened to Sierra Leone. In November, 1821, Dr. Eli Ayres was instructed to visit the survivors and proceed down the coast in search of a new location. The party went about 250 miles until they came to a high point of land called Cape Montserrado. With address and firmness they secured by purchase a valuable tract, including the cape, consisting of 36 miles along the shore with an average breadth of two miles. They paid in exchange goods worth about \$300. On April 28th, 1822, the emigrants passed over and occupied the cape, having, however, to meet and overcome the hostility of the natives, who had repented of their bargain. Mr. Ashmun arrived the following August and became the instrument of giving form and permanence to Liberian institutions. He established a civil polity, purchased additional land, and in fact founded Monrovia. We now have, as a result, the Republic of Liberia.

Melville B. Cox, the first foreign missionary of this Society, arrived at Monrovia, March 7th, 1833. He entered heroically upon his work, but was very soon prostrated (April 12th) by the African fever. On June 26th he made his last record in his journal, and expired July 21st, having uttered these words: "Let a thousand fall before Africa be given up." Re-inforcements arrived on January 1st, 1834, and on the 10th was organized "The Liberia Annual Conference," which was also constituted a temperance society.

The Rev. John Seys was appointed superintendent, and arrived October 18th, 1834. He was born on the island of Santa Cruz and had lived and labored on fifteen of the West India Islands; he was thus better adapted to the African climate. Under his superintendency the work rapidly advanced, not less than 10,000 pagans having put themselves, during the year, under the care of the colony. The important acquisition of a thoroughly educated physician was enjoyed by the colony in the arrival (October, 1836) of Dr. S. M. E. Goheen.

The selection of Jackstown, Junk, Sinoe, and Boporto, in 1857, as missionary stations indicates the enterprise of the mission. The little host were pressing far down the coast and into the interior. It had now 15 missionaries, besides Dr. Goheen, and 7 school-teachers, instructing 221 pupils; it had 6 Sabbath-schools with 300 scholars. The next year there were 17 missionaries, 10 teachers, a physician, a missionary steward, and a printer; and the church numbered 421 members. The mission also entered upon the work of publication, issuing a bi-monthly named "Africa's Luminary." The next year the "Liberia Conference Seminary" was opened, and the superintendent obtained

permission and aid from the Board to erect a saw-mill and a sugar-mill, there being neither in the colony. In addition to these the "White Plains Manual Labor School" had been successfully instituted to teach agriculture and various kinds of handicraft to the natives.

In 1839 the Heddington station was blessed with a great revival, the first-fruits of a harvest of souls from the natives, among whom was King Tom himself.

At this time arose a series of difficulties with the government, and although the mission was completely exonerated from all blame, it was for a long time subject to annoyances from the government and the Colonization Society. Worse than these, however, were the dissensions between the missionaries themselves, which led to the dismantlement of the mission for a time. Matters were soon adjusted, and the work was taken up with renewed activity. Tours into the interior were undertaken, and new stations were established at various points. Bishop Levi Scott visited Africa in 1853, and met one of the great needs of the work by ordaining the preachers in the field. The Liberia Conference (January, 1858) elected Francis Burns to the bishopric, and he proceeded promptly to the United States for ordination. He was succeeded by Bishop Roberts, after whose death no "missionary bishop" was chosen to succeed him, and Bishops Burns and Roberts are the only colored bishops the church has had.

Bishop Haven, arriving at Monrovia December 16th, 1876, made an extensive tour among the mission stations, greatly encouraging the laborers and stimulating the work.

The General Conference of 1884 placed all the mission work in Africa under Wm. Taylor, who was elected and ordained as "Missionary Bishop for Africa." (See Bishop Taylor's Missions.)

In 1887-8 there were probationers, 161; full members, 2,641; local preachers, 60; churches, 36 (value, \$31,000); Sabbath-schools, 40; officers and teachers, 376; scholars, 2,342; collections, \$1,270.

2. *South America.*—The Rev. Fountain E. Pitts, appointed by the bishops (who were recommended by the Board to make the appointment which the General Conference had advised), sailed July, 1835, to South America with the view of examining fields for the establishment of mission-stations. His report recommended the establishment of missions at Rio de Janeiro and Buenos Ayres, where the American and English residents had especially encouraged the work. At the latter place he rented and furnished a room, and began preaching to the people.

**BRAZIL.**—At Rio de Janeiro Mr. Pitts formed a small society of religious people, with a promise that a pastor should be sent at no distant day. Rev. Justin Spaulding, by appointment, went to Rio, sailing in March, 1836, and Rev. John Dempster, appointed to Buenos Ayres, sailed in October.

There were indications that the grasp of Rome upon Brazil was rapidly loosening. The pope had refused to acknowledge a bishop ordained in Brazil, and the prince regent, in a speech before parliament, more than intimated that they could get on quite well without the pope's approbation. The message proved very popular. There was a large English-speaking population who welcomed the missionaries. The

Bible could be distributed, and the American Bible Society and the British and Foreign Bible Society generously supplied Spanish and Portuguese Bibles and Testaments for this purpose, the people eagerly receiving a book which, until recently, had been interdicted.

Mr. Spaulding rented and fitted a private room for public worship, and gathered a congregation. In November, 1837, Rev. Daniel P. Kidder and R. M. McMurdy, a local preacher, and wife, as teachers, sailed from Boston. Mr. Kidder entered upon extensive itinerations, preaching and scattering Bibles and tracts as he journeyed. In Rio the work grew; a Sunday-school was begun; and larger accommodations were needed. There were there 1,000 priests, but rarely was prayer or sermon heard in the language of the people. No interest was taken in the advancement of education, morality, or religion. Not one in five hundred of the natives had seen a Bible. The hostility of the Roman priests was awakened, and the superintendent (Mr. Spaulding) was subjected to every possible annoyance and hindrance. Journals and pamphlets were issued dealing in vituperation, violent abuse, and perversions of historic truth as against Protestantism and Methodism. But these efforts were short-lived and served to advertise the mission. The missionaries claimed their rights under the toleration act of the constitution. So eager were the people for the Scriptures that it was at first feared there was a general plan to secure copies to destroy them, but it was found that nearly every copy was appropriately used. Preaching services were held also on decks of vessels for the benefit of the thousands of seamen who frequent the harbor of Rio. Excursions to various points were undertaken, at different times, by Messrs. Spaulding and Kidder, the latter going alone to more distant parts, he being the first Protestant minister to visit San Paulo. In the interior a liberal *poudre* declared that Catholicism was well-nigh abandoned, and that infidel principles and infidel books had, for the most part, taken its place. Mr. Kidder extended his visits to Andradas, to Santos, northward to Bahia, Maceio, Pernambuco, Orlinda, Maranham, and Para.

Through financial embarrassment the Board abandoned Brazil at the close of 1841, and the field is now occupied by the missions of the Presbyterian Boards and of the Methodist Episcopal Church (South).

**BUENOS AYRES AND MONTEVIDEO.**—The first Protestant worship in the city of Buenos Ayres was held by Mr. James Thompson, a Scotchman, at the home of Mr. Dickson, an English gentleman, on Sunday, November 19th, 1820. These private meetings were continued for two years, and the first Sunday school was opened on March 23d, 1821. In October, 1823, Messrs. Brigham and Parvin, who were Presbyterians, arrived from the United States. They re-established preaching March, 1824, at the house of Mr. Tate. Mr. Parvin opened a Sunday-school, in which was a class of Spanish children taught by an American named Gilbert. This work excited great interest in the city, but was discontinued in 1836. Just as Mr. Torrey was closing his labors (1836) Mr. Pitts arrived in the field, and from the time of his arrival the missionaries of the M. E. Church have been the sole representatives of American Protestantism in this part of South America.

The mission was reinforced, and the interest

rapidly increased until the place of assemblage could not contain the worshippers. The Board appropriated \$10,000 for the erection of an edifice, and \$1,500 was subscribed in Buenos Ayres.

Rev. Wm. H. Norris arrived at Montevideo October 12th, 1839, and found two opposing armies within a few miles of the city, and the garrison fully manned. Not being able to land, Mr. Norris held his first services on a vessel in the harbor. An important step forward was secured when he obtained from the governor a decree authorizing the consuls of England, Sweden, and the United States "to erect a temple which may serve for the exercise of the worship of their countrymen, as also for the establishment of a public school for the children of the same nations." In October, 1841, the debt of the Society compelled the recall of the missionaries from Montevideo, and the work was retarded in Buenos Ayres by the terrible confusion, violence, robbery, and slaughter in that city (1840). "During this reign of terror a sepulchral gloom veiled the city." Mission work was resumed in Buenos Ayres in December, 1842, upon the return of Mr. Norris, for whose support the people had pledged \$1,000, petitioning for his return. On January 3d, 1843, the new church was dedicated and the Sunday-school reorganized. During the greater part of Mr. Norris's term of service a bloody civil war raged in the country.

New laborers continued to strengthen the mission and school work, and during the superintendency (13 years—beginning February, 1856) of Rev. Wm. Goodfellow the city was twice besieged, once visited by yellow-fever, twice decimated by cholera, and once shaken fearfully by a foreign war; but conversions continued and prosperity increased.

In 1860 the work was extended by cottage prayer meetings and Bible-readings. John F. Thompson, after years of preparation in the United States, returned, ably equipped for the work in Buenos Ayres and Montevideo, and confronted with great success the errors and superstitions of Romanism and infidelity by delivering lectures on "Evidences of Christianity, Darwinism, the Elements of National Progress, and other themes of world-wide or local interest." On a notable occasion of a public discussion between Mr. Thompson and a *padre*,—Mansueto,—presided over by Don Ambrosio Velazio, L.L.D., a prince among jurists, Mr. Thompson appealed to the crowded audience to decide between the two (for Father Mansueto had before declared he would accept the people as his judges); and when Mr. Thompson said, "I ask all those who think Father Mansueto entitled to the name of conqueror, to rise," not a man stood up. But when he said, "I now ask those who think he is not entitled to that name to rise," apparently every man in the house was instantly on his feet; and about 200 followed the *padre* fourteen blocks to his own door, loudly expressing their disapprobation and contempt for the manner in which he had treated Mr. Thompson and conducted the controversy; for he had publicly caricatured Mr. Thompson when he was ill and absent, and had offered to settle the controversy by a bet.

In Rosario (1864) after the visit of Rev. Thomas Carter a church was erected, the English and Spanish citizens contributing \$1,800 in gold, and friends in Buenos Ayres giving \$1,200 more.

So this church was reared without aid from the missionary treasury. An important part of the work here is that which is done in a Protestant educational institution. Rosario is the headquarters of higher education for the whole province.

*India*.—In 1852, \$7,500 was appropriated to the work of opening a mission in India. It was not, however, until 1856 that a beginning was actually made. The Rev. Wm. Butler, a native of Ireland, who had for four years before his appointment to the India field been laboring in the United States, arrived in Calcutta on September 25th, 1856.

After most careful investigation and much conference with others more familiar with India, the Northwest seemed to be the most needy and promising field. "Our field," wrote Dr. Butler, "is the valley of the Ganges with the adjacent hill range, a tract nearly as large as England, being nearly 450 miles long, with an average breadth of 150 miles, containing more than 18,000,000 people." On his way to Bareilly (a city of 100,000), selected as mission headquarters, Dr. Butler was greatly favored by the American Presbyterian Church at Allahabad giving him as a native interpreter and helper Joel T. Janvier, whom they had trained and educated, and who subsequently became the first native preacher of the Methodist Episcopal Church in India. A few native converts had been gathered in Bareilly through the zeal of an English chaplain, and religious services were at once begun.

Before much could be accomplished the "Mutiny" burst upon the country. A fortnight later, May 31st, 1857, the native soldiers in Bareilly mutinied, and attempted to assassinate their officers and exterminate every foreigner in the city. Dr. Butler and family, with other civilians, and all the women and children connected with the English residents, were sent away to Naini Tal, in the Himalayas. Scenes of fright and horror followed; yet after exposure, hunger, racking travel, perils from wild beasts in the jungle, and constant apprehension of sudden death at the hands of assassins, experiencing on occasion prompt deliverance through prayer, they arrived in safety at Naini Tal. Reinforcements for the mission arrived on September 22d, 1857, but were obliged to remain at Calcutta until the rebellion was over.

The faithful Joel Janvier and his family were preserved, and found their way to Naini Tal by way of Mussoree and the mountains.

Mr. Josiah Parsons, who had been five years in the country in the employ of the Church Missionary Society, joined (with his wife) the missionaries at Naini Tal, and work was immediately begun. During the summer of 1858 religious services in both English and Hindustani were held; and a school for boys was opened in the Bazaar, and one for girls in one of the mission houses. In an admirable location a house, with a small tract of land, was purchased, a chapel begun, the corner-stone of which was laid in October, by Major (now Sir Henry) Ramsay, who has continued a fast friend of the mission through all its history. Mr. Parsons, who was soon joined by Rev. J. and Mrs. Humphrey removed January, 1859, to Moradabad, which, early in the season, had been re-occupied by the English. Naini Tal was left in charge of Mr. S. Knowles and an English brother who had been an English officer and had joined the mission in 1858.

The missionaries at Moradabad were soon surprised by a deputation from the Mozhabee Sikhs, who begged them to visit their village, twenty miles away, and explain to their people the nature of the Christian religion. Some of them had heard American Presbyterian missionaries preach at the great *melas* on the banks of the Ganges, before the mutiny, and had been deeply impressed. This opening field was promptly occupied. Converts from these Mozhabee Sikhs have been doing service at the large stations, and are also scattered through the mission as preachers, catechists, colporteurs, and teachers; those in their villages support themselves without aid from the missionaries. Up to 1871 eight-tenths of all the Christians in this mission were from these Sikhs. They are living in over 100 villages; their work is divided into eight circuits, each under a pastor, and all under an ordained preacher of the same class as the people. These pastors have an average of 15 villages each and receive a salary of about ten rupees a month; the ordained preacher in charge of all getting 35 rupees (about \$17) per month. The rule among the people is to pay toward the support of their pastors as much, at least, as they expended on their own religion before their conversion.

Public preaching was begun March 18th, 1859, in the Bazaar at Bareilly by Dr. Humphrey. On July 24th he baptized the first convert (Zahur-ul-Huqq). Young men from the Sikhs came to Bareilly, worked for their food, and applied themselves to learning more of the Christian religion, and also to learning to read.

The *methods of work* adapted to India were already indicating themselves. Public preaching in the streets of towns and cities, and at great gatherings of the people, so common in India, at fairs or *melas*, seemed most important. It is not unusual to find two millions of people gathered at certain festivals by the sacred Ganges, for purposes of barter, and bathing, and for burning up some portions of the bodies of their deceased friends, to cast their ashes into the river. The missionaries also make tours through the country. There are no isolated houses. Agriculture being carried on co-operatively, the natives live in villages, and are easily accessible at the close of day, when they can be gathered in the public square, which is left vacant for purposes of assemblage. After preaching, the people are invited to the tent for books and conversation. Many respond, to whom, in the quiet of the camp, the missionary gives careful instruction.

Oudh.—The wretched government of Oudh was swept out of existence by the British authorities just before the "Mutiny," and the mission entered as a part of the new order of things at a time when Mohammedanism was broken and Christianity was politically triumphant. Much of the property of the mutineers had come into the possession of the British Government by confiscation, and was ready for disposal. In Lucknow, Commissioner Montgomery (a noble Christian) made over the large grounds and buildings of the "Asfee Kotee" (which had belonged to the Nawab of Oudh) for the use of the missionaries. He had the premises thoroughly refitted at the expense of the government, and the mission entered, free of charge, into possession of property which cost about 40,000 rupees.

Missionaries began work in September, 1858;

in November Mr. Pierce, Goel and Azim Ali had four preaching services, weekly, in the bazaars of Lucknow, a class-meeting, and two small schools. The soldiers were also included in their work. July, 1859, found two schools in the mission compound, one for boys and one for girls, and a third in the southern part of the city. Five missionaries arrived August 21st, 1859; they proceeded at once to the first general gathering of the missionaries, which took place at Lucknow.

The "Boys' Orphanage" began in September, 1858, in Lucknow (afterwards removed to Shahjehanpore), where children of those slain in the mutiny, or destroyed by the famine and pestilence that followed, were cared for by the missionaries.

This year, also, at Bareilly a printing-office was fitted up and the issue of publications begun. This was the foundation of the "Mission Press" or "Book Concern," now at Lucknow, to which place it was removed in 1886.

At Badaon a mission station was established in 1859, and premises for mission residence and school were purchased. Great scarcity followed a drought. Children were sold by their parents in the streets of the city for two or three rupees apiece. Men assaulted and pretended to rob others merely to get into prison, where they could be fed. Children were found whose protectors and friends had all perished of starvation. Many of these waifs were made over to the mission at various points. The girls were gathered together at Lucknow (1861) and constituted the "Girls' Orphanage."

From the lowest class of *meheters* (sweepers) were raised up efficient helpers, who, having been educated at the Theological Seminary, are now engaged in preaching the gospel in various mission fields. A valuable accession came from Mohammedanism. Mahbub Khan had been a teacher in a government vernacular school. As a boy he had been for a short time in a mission school in Sialkot. Interested in the search for truth he read all the Mohammedan books he could find, but his unrest continued. In that state of mind he wandered into a government school to ask the teacher if he had any books which could dispel a "fit of blues." The man replied he had only a New Testament which had been left by a missionary. Finding no other book, he took this to his home. He read; laid it aside; took it up again. The fifth chapter of Matthew interested him deeply. The beatitudes fascinated him, and so did the simple narrative. While reading the account of the Saviour's sufferings, in Matthew, 27th chapter, a profound conviction of the truth of the narrative and of the divinity of Christ came like a flash to his soul. He and his wife were baptized, several of his relatives following his example.

The year 1870 marked an era of unprecedented success in the Badaon field: 149 adults and 66 children were baptized. In summing up the results of labor done during his six years of residence, Mr. Hoskins states that over 450 have been baptized, of whom 300 are communicants.

In 1860 much attention was given to the English in Lucknow, and among the soldiers there was a continuous revival, and a chapel was built.

At Moradabad (1860) Sabbath services were conducted in English and among the soldiers.

Shahjehanpore (an important post in Rohilkund, near the borders of Oudh) was formally opened as a mission station October 1st, 1859, and a chapel was dedicated, January, 1861.

In October, 1861, J. T. Gracey and wife arrived, and were appointed to open the work at Seetapore, organizing the first school under the shade of a tree. January 18th, 1862, a mission school was opened in Haidarabad, and soon had 40 pupils. The war having occasioned the abandonment of large tracts in the province of Oudh, the government disposed of these tracts, and Dr. Butler was prompt to secure a section for the Christian village community, and the "grant" was named Wesleyppore—"pore" meaning place. This spot was the only one of equal size in all India where there was "not an idol, nor an idol temple, nor a Mohammedan mosque to be found," said the superintendent. There was also secured (1869) a tract or jungle of 887 acres, 12 miles east of Shahjehanpore, to provide homes for needy Christians, and within 50 days 25 families (95 souls) were settled in straw houses on this tract; better houses soon followed, and also a chapel and schoolhouse. In 1872, when Mr. Thomas endowed the theological school at Bareilly, this village was given by him as part of the endowment.

In 1874 floods came and crops were destroyed, but the work went on. An industrial school was opened in Bareilly, July 16th, 1868, men and women manufacturing cloth, carpets, and furniture. A school was also kept up for the children, and so, while thousands were perishing with hunger, these poor Christians were both clothed and fed.

At the annual meeting (February, 1864), upon his resignation, Dr. Butler gave a summary of the work done: 9 of the most important of the cities of India had been occupied; 19 mission houses built or purchased; 16 school-houses erected, and 10 chapels; 2 large orphanages and a publishing-house established; 12 congregations had been gathered, and 10 small churches organized; 1,321 youths were under daily instruction; 161 persons had attained a Christian experience, 4 of whom had become preachers and 11 of them exhorters; \$55,186 had been contributed in India for the work, and property accumulated worth \$73,188. Such were the results in so short a period.

Gurwal.—The work here owes its origin to General Sir Henry Ramsay, who promised \$1,500, with \$25 monthly for current expenses, —November, 1864.

The government school in Streenugger was now offered to the mission and accepted.

The year 1872 was made memorable by the establishment of a Theological Seminary, the donation of the Rev. D. W. Thomas amounting to \$20,000, the largest sum ever given by a missionary, Eliphalet Remington, Esq., giving \$5,000, to which the Board added \$5,000. The India Conference was organized in 1864 by Bishop Thompson; and in January, 1877, Bishop Andrews presiding, the instructions of the preceding Conference were carried out by organizing a second conference in Hindustan; the former one to be styled the North India Conference, embracing the old mission field; the new one, South India Conference, covering the work under the superintendence of William Taylor. In 1886 the Bengal Conference was organized; and in 1889 the Malaysian Mission.

EDUCATION has immense power in breaking

down the idolatry of India, inasmuch as false science is everywhere wrought into the very fibre of their religious text-books and systems, and to this false science geography and astronomy are fatal. Lord Halifax was the author of the developed system which was embodied in the great Educational Dispatch from the Court of Directors to the Governor-General of India, dated July 19th, 1854. Universities were established at Calcutta, Bombay, and Madras; all other schools (private, government, or church) were to be affiliated with these universities and lead up to them.

Among the important schools founded was the Centennial school of Lucknow, its history dating from the year 1866, the centennial year of American Methodism.

Practically the Mohammedan ignores the connection between religion and morality, hence the great need of religion in the schools.

MEDICAL INSTRUCTION was begun by Dr. Corbyne, civil surgeon of Bareilly, who taught, 1868, a class of midwives who were in practice in that city.

Dr. Humphrey had charge of seven different dispensaries, and gave treatment, during the year, to 24,652 out-door patients, 341 in-door, performed 21 capital operations and 411 minor ones, and the next year his patients exceeded 35,000.

When his Highness, the Nawab of Rampore, was approached by a proposition to grant his premises, he arrested the conversation and promptly presented the estate as a free gift, to be used for medical purposes in behalf of women, Miss Swain, M.D., taking charge of the work. As is well known, almost the only possible means of reaching the women of India is through women missionaries, and it is of great consequence that many of these should be possessed of the knowledge and practice of medicine.

Amid all the magnificence of Mohammedan and Hindu rule, neither system contains one thought calculated to relieve the wants, mitigate the sufferings, or improve the condition of humanity. Christian civilization, however, has dotted all India with schools, dispensaries, hospitals, asylums, and almshouses. Prominent among these are the orphanages, with their schools and industrial departments; the children being required to spend five hours daily in school and three hours at their trades.

THE MISSION PRESS was founded by Rev. James Walter Waugh, he beginning work in Bareilly (1860) with an antiquated hand-press and inferior material, himself having to boil the molasses and glue, and cast the inking rollers. In the course of five years, by taking in job-work, the business yielded a net profit of 5,000 rupees, and the press, which had been started on \$1,000, became worth \$3,500. In 1865 the press was removed to Lucknow, where there are greater facilities for shipment of material and securing of skilled laborers.

The widespread revival in South India dates its beginning from the labors of the noted evangelist, Rev. Wm. Taylor, who arrived (from Australia) at Bombay November 20th, 1870. Pressed by necessity for the nursing and building up of his converts, he everywhere formed them into "Fellowship Bands," societies within and around the churches, after the manner of Mr. Wesley. During his extensive tours, after beginning at Lucknow, he pursued his great work in Cawnpore, Bombay, Poona, Calcutta

(where a chapel was built, soon succeeded by a large church), Hyderabad, Madras (to the surrounding towns, where societies arose, as at Berhampore, Mount St. Thome, Palaveram, Arcunum, Jollarpet, Salem, etc.), and Bangalore. The evangelist, preaching through interpreters or not, preaching in theatres, in halls, in streets, in squares, in houses, preaching through converts and assistants, founded many churches and "Fellowship Bands," and multitudes of converts, from among not only the natives, but the English and other foreign residents, and the Eurasian English-speaking people, crowned his labors.

3. *China*.—The origin of the Methodist Mission in the great empire may be traced, in its first movement, to discussions which were conducted in the "Missionary Lyceum" of the Wesleyan University, at Middletown, Conn., during April and May of 1835. The question, "What country now presents the most promising field for missionary exertions?" was debated. The Chinese Empire was warmly advocated, and the Lyceum resolved that the Methodist Episcopal Church should send missionaries and a press at once to the field. A committee prepared an address upon the subject, which appeared in the "Christian Advocate" of May 15th, 1835, with a full exhibit of the field and its claims. China was placed on the list of foreign missions May 20th, 1846, with an appropriation of \$3,000 for two missionaries, half of this sum being for their outfit and travelling expenses. Previous to this a young man, Judson Dwight Collins, converted in the great revival at Ann Arbor, Michigan (1837-38), was ardently moved to enter upon work in China; and when told there had been nothing done toward beginning such a work, he replied to Bishop James: "Engage me a place before the mast, and my own strong arm will pull me to China and support me while there."

Months of hesitation and delay ensued, and it was not until April 15th, 1847, that the first company of Methodist missionaries for China departed, setting sail in the "Heber" from Boston harbor. On September 4th they entered the mouth of the river Min, and on the 6th they were hospitably received by the brethren of the American Board in Foochow. On a small island (Tong Chin) abreast of the city of Foochow, and densely inhabited, the missionaries were able to secure premises for their occupation. Quietly housed, they set themselves to the study of the language, and carefully used their little stock of medicines in administering to the sick, and were marvellously successful. They also distributed many tracts and portions of Scripture, which had been translated by Dr. Medhurst of the L. M. S. The Kian San House and the Kulan Orchard House were erected south of the river. In October Mr. Collins made a vigorous effort to obtain a foothold within the city walls. He rented quarters in a house and afterwards in a temple, but thought it prudent to retire because of the public excitement. Rev. Henry Hickok and wife and Rev. R. S. Maclay reinforced the mission, arriving April 15th, 1848.

As soon as possible the missionaries opened schools, employing native teachers, the missionaries giving religious instruction and conducting the devotions. The first of these schools was begun February 28th, 1848, but was suspended because much of the mission force became disabled. The first Sunday-school was organized in 1848, most of the children coming an hour

before the appointed time. A small chapel in Nantai (outside the walls and on the north bank) was rented, and the crowds surging by supplied an ever-changing congregation. The Chinese are fond of hearing public discourse, and connect audience-rooms with their restaurants in which public talks are invited. Of these rooms the missionaries took advantage; but it was not until 1855 that the first church-building was erected, the churches of New York and vicinity giving \$5,000 to aid the project. The church was named "Ching Sing Tong"—Church of the True God—which title, ever inviting the attention of the passing throngs, was carved on a tablet of porphyry over the door. Another church (called "Heavenly Rest") was built close to the homes of the missionaries, where there was a large foreign community, they contributing \$1,500 on the condition that an audience-room should be added for English speaking. This church was dedicated October 18th, 1856, and the English part December 28th, 1856.

Mr. Collins's health rapidly declining, soon after his appointment to the superintendency he set sail for the United States (April 23d, 1851), and went to California, wishing to establish a mission among the Chinese of that State, being impressed with the incalculable reflex power upon China of a Chinese mission in California. But his strength rapidly declined, and he died on May 13th, 1852, in the thirtieth year of his age.

Though the mission was reinforced, yet, in consequence of the Taiping rebellion, sickness, and other troubles, it suffered a period of great depression. The schools were deserted; the missionaries scattered; death had been relentless, and all was dark and unpromising; but the Board courageously said in their report to the Church: "Let us hold fast our faith in the China mission, and trust in God."

July 14th, 1857, was a memorable day at the Tienang church. Ting Ang, 47 years of age, having a wife and five children, was received as the first convert, and was baptized. For two years he had been carefully instructed at the mission. Messrs. Maclay and Gibson found his home stripped of idols, blessed with religious books, and their examination of him was scrutinizing and satisfactory. On October 18th Ting Ang's wife and two of their children were baptized. During the year 13 were baptized. Converts increased in number, a surprising proportion being of mature age. Some of these endured persecution, losing all things for Christ's sake, but to a man they remained steadfast.

The Foundling Asylum was established in 1858, friends in Foochow contributing \$670. In 1859 the work of the mission began to extend westward. Fifteen miles northwest of Foochow the To-Cheng (Peach Farm) appointment was begun. This year, also, native helpers were licensed and employed. Hu Po Mi became pastor at the Peach Farm, and the first native itinerant in China. At a visit to To-Cheng (February, 1859) nine of the Li family gave their names for baptism. Alarm at the success of the new work spread through all the valley, and though personal violence was proposed, the better class of people discountenanced all resorts to open persecution, and converts multiplied. In 1859 the mission was reinforced by the arrival of Rev. and Mrs. S. L.

Baldwin, the Misses Willston and Miss Potter, and on November 28th a female school was opened.

After the circulation among the churches in Baltimore of a powerful appeal by Dr. Wentworth, emphasizing the debased condition of females in China, the need of Christian wives for the male converts, the influence of Christianized and educated young women returning to their homes, the liberal readiness of English and American residents at Foochow to assist, the funds were promptly forthcoming, and the "Waugh Female Seminary" and the "Baltimore Female Academy" were succeeded permanently by "The Girls' Boarding-school." The year 1861 was marked by the still further extension of the work to the westward. After years of collisions between China on the one hand and England and France on the other, treaties were ratified in which the Chinese Government agreed to receive resident ministers from other nations, to tolerate Christianity, to protect missionaries, to open other ports, and to make the Yangtz River free to all nations. Foreign intercourse with the interior received a powerful impulse, and the way was thus opened for the advancement of the gospel. At this time a class (of 13) was formed at Kang Chia, ten miles west of Ngu Kang, hitherto our most westerly outpost, and a chapel was built. A press was obtained, and a font of Chinese type, and important tracts and parts of the Scriptures were printed and put into circulation—reaching 500,000 pages annually.

In 1862 the first annual meeting of the mission assembled. A course of study for the native helpers was ordained, examinations established, appointments regularly announced as at conference, and statistics were reported.

The appointments included eight fields never before occupied.

A membership of 87, mission property worth \$30,115, and collections amounting to \$70,000, including \$20,000 for the poor, were reported.

A signal triumph marked the year 1863. After many attempts a station was finally secured within the walls of Foochow, a house and lot having been purchased on East Street; but the following year persecution raged, the East Street Church was destroyed by a mob, and also the house of the missionary (Rev. C. R. Martin), who with his wife and children effected a marvellous escape. In 1865 Bishop Thomson visited the mission. In the same year the new Reference Testament of Mr. Gibson was completed, and became the standard from Canton to Peking. Preparations were also made for a similar version of the Old Testament. A colloquial New Testament was also begun, and new editions of the hymn book, ritual and catechism, and many valuable pamphlets, were issued. The work rapidly advanced in 1866, and 1867 was a great revival year. The harvest was seen in 451 members reported; yet literary labors were not interrupted. The dictionary of the Fokien dialect, in the Anglo-Chinese alphabet, was rapidly advanced (since that time it has been completed, and is a standard work); the issues of the press increased to 5,000,000 pages.

Pekin and Kiukiang.—On December 1st, 1867, Revs. V. C. Hart and E. S. Todd entered Kiukiang, an important city in the Kiang Si province. They opened a chapel 40 miles north of the city, and extended their labors 60

miles to the westward and 70 miles to the eastward. Converts were gathered rapidly in.

Pekin, occupied at a later date, is the capital of the empire, having a population of about 2,000,000, and the field north of the Yangtz comprises an area half as large as the United States, and contains a population of about 200,000,000, nearly all of whom can be addressed in the Mandarin or court dialect. (This is also understood in Tibet, Mongolia, and Manchuria.) The great plain lying northeast of Peking forms the richest and most productive part of the empire, girt about by mountains in which are buried coal and iron without limit, with lead, silver, and gold in abundance. It is traversed on its whole eastern part by the Grand Canal, and is for many reasons one of the grandest mission fields on earth.

These inland people everywhere regarded the missionaries with intense curiosity. "I stopped," writes Mr. Hart, "at a large trading-place over Sunday, and called upon an officer for a little quiet and rest; but crowds pressed into the building, making holes through the paper windows to secure a look at me."

Mr. Wheeler with his family sailed for the north, and reached Tientsin early in March, 1869. Thence they made their way by mule-carts to Peking, and were hospitably received by the missionaries of the American Board. Exposure and hardships of travel caused the death of Mr. Wheeler's only son. On April 10th Mr. Lowry and family arrived to share in the work. Premises were secured just inside one of the city gates, not far from the foreign legations.

Bishop Kingsley upon his visit (1869) divided the work into three missions, appointing Dr. Maclay superintendent at Foochow, Mr. Hart at Kiukiang, and Mr. Wheeler at Peking. Self-support was systematically provided for, and, with the advice of the mission, Bishop Kingsley ordained from the native helpers 7 deacons, 4 of whom were also ordained elders. At this time the board sent out six single young ministers. The year 1870 brought severe trials. A plot originated with the gentry of Canton to drive all foreigners from the land. Many were massacred under circumstances of atrocious cruelty. At Tientsin (80 miles from Peking) 100 native Catholics, several Protestants, and 22 foreigners were killed. The first violent blows caused a reaction, and the plot could not be carried out.

The mission having been re-enforced, the system of itinerating was put in practice. Thus has the gospel been preached and Christian literature been scattered in hundreds of cities and villages from the steppes of Mongolia on the north, to the city of Confucius, 400 miles to the south, and from the sacred mountains of Shansi on the west, to where the Great Wall of China reaches the sea on the east.

As from time to time the missions received new laborers from the United States and raised up helpers from among the native converts, the work was extended. New preaching-places were secured, new stations established; native congregations arose upon their feet, voting in favor of self-support. In 1874 four districts supported their presiding elders, and one circuit their bachelor preacher. Hu Po Mi, presiding elder of Hok Chiang district, presented to the annual meeting deeds of eleven chapels, all paid for and vested in the Methodist Episcopal Church.

Medical mission work was entered upon and carried forward with most gratifying results.

Bishop Wiley upon his first episcopal visit (24 years after he left the field as a missionary) uses such language as the following: "Then not a soul had been converted. We were simply met with prejudice and opposition. We did not dare to venture five miles from the city of Foochow. Now our work extends through five districts, over many hundreds of miles in length and breadth. I confess I would feel alarmed at the very magnitude of this work if I did not see the most satisfactory evidence of its genuineness and thoroughness in every respect."

As at present arranged, the missions of the Methodist Episcopal Church in China are four in number: the Central China Mission, established in 1868, including the districts of Kiukiang, Nanking, Chinkiang, and Wuhu, with a total of 11 missionaries and a church-membership of 339; North China (1869), including the districts of Peking, Tientsin, Shantung, Tsunhua, and Lanchow, with 15 missionaries and a church-membership of 782; Foochow (1877), with the districts of Foochow, Hokchiang, Hinghwa, Ingchung, Kucheng, Yongping, and Haitang, under the care of 6 missionaries and with a church-membership of 2,441; West China (1881), with a station at Chunking, where still 2 missionaries are holding the outpost in the hope that with increased means and reinforcements they shall be able to go forward and enlarge their work. (See also article China.)

*Japan.*—The General Missionary Committee at its annual session in New York (November 1872) authorized the establishment of the Japan Mission. Rev. Dr. R. S. Maclay (formerly of the mission in Foochow, China), Rev. J. C. Davison, Rev. Julius Soper, Rev. M. C. Harris, were appointed to Japan. Dr. Maclay and family arrived in Yokohama June 11th, 1873, having been accompanied from San Francisco by Dr. J. P. Newman and wife, who remained for weeks aiding in opening the mission. Bishop Harris, accompanied by Rev. Messrs. Waugh, Houghton, and Spencer, as visiting brethren, arrived in Yokohama July 9th, 1873.

The meeting for formal organization convened August 8th, 1873, in the rented Mission House at No. 60, Bluff, Yokohama; Bishop Harris was chairman, and some fifteen others, including the wives of the missionaries and several visitors, were present. It was proposed that the mission proceed at once to establish stations at Yokohama, Yedo (Tokyo), Hakodati, and Nagasaki, which proposition was unanimously adopted, and missionaries were appointed to the work.

There was no Protestant mission as yet on the Island of Yesso, so in occupying Hakodati the missionaries of the Methodist Episcopal Church were the first to preach the gospel to the nations of that region.

The second year was marked by the beginning of missionary work in Japan by the Woman's Foreign Missionary Society of the Methodist Episcopal Church (q.v.). Rev. John Ing, from the mission in Kiukiang, China, began his labors in Hirosaki, Japan.

The first chapel occupied by the mission in Yokohama was rented by Mr. Correll, through his teacher, August 11th, 1874, in the native portion of the town, and was first opened for public preaching on the 16th, when the audi-

ence-room was filled with attentive hearers, Mr. Correll speaking in Japanese, from Matthew 1: 18-25.

The first baptisms in Tokyo occurred in 1875. The first purchase of land in Yokohama for the use of the mission was made in 1875, when lot No. 222 on the Western Bluff was obtained. Outside the Foreign Concession Mr. Soper began holding Sabbath services in a portion of the city called Kanda.

The third year was marked by the beginning of public day-schools, the organization of church-classes, the introduction of quarterly meetings, love-feasts, and quarterly conferences, the erection of suitable dwelling-houses for the members of the mission resident in Yokohama and Tokyo, the erection of an excellent chapel in Nagasaki, and other work that showed the advance of the mission.

In Nagasaki, upon an eligible lot donated by the government, a mission chapel was erected in a portion of the city called Desima, and was opened for religious services in 1876. In the same year, after two years of faithful labor, Mr. Davison baptized his first approved candidates in Nagasaki—Mr. Asuga Kenjiro, together with his wife and two children.

The work advanced in the several stations. In Tokyo a handsome mission chapel was built in 1876; also a handsome Home by the Woman's Missionary Society; out-stations were commenced, and tours to the interior cities begun. In January, 1877, another neat chapel, built on a portion of the lot owned in Tokyo by the Missionary Society, was completed and occupied, at a cost of \$1,600.

In the sixth year of the mission the Satsuma Rebellion broke out in the southern portion of Japan, which during the closing part of 1876 and the former half of 1877 depressed business, suspended commerce, devastated the fairest portion of the country, and was one of the most formidable dangers that had ever confronted the civil authorities of Japan. In the autumn of 1877 the severe prevalence of the cholera in Yokohama caused the suspension of the public work of the mission in that city. At other stations, where the disease was less violent, the labors of the missionaries were not interrupted. All the missionaries escaped the pestilence.

On Mr. Correll's tour (October, 1877), the inhabitants of Matsumoto described themselves to him as being a people without a religion. They had destroyed their idols, pulled down their temples, had removed all traces of their former faith (Buddhism), and had determined to live destitute of any system of religion. But finding such a life without satisfaction, they expressed an earnest desire to receive Christian instruction. About 300 persons gave their names as candidates for Christian baptism. Mr. Correll arranged at once to send a native helper to instruct these eager and ready people.

In some places, as in Hirosaki (population 33,631), so eager are the people to hear the gospel that crowds will stand outside in winter snows to catch the words as they may be heard through the windows and doors and over the heads of the crowds within.

On Bishop Wiley's visit to Japan (1878) he dedicated the new church edifice, (completed by Mr. Harris), and ordained the Rev. Yoitsu Honda at Hakodati. He is now president of the Anglo-Japanese College at Tokyo.

Within five years the missionaries established mission stations at five important centres of population and political influence; procured church buildings, school and dwelling houses, the estimated value of which is \$25,000; translated into Japanese the Catechism, portions of the Discipline, about 50 hymns, and prepared an original tract; planted out-stations extending from about 25 miles northeast of Tokyo to 220 miles west of Yokohama; established a first-class seminary for young ladies in Tokyo; organized five flourishing day-schools for boys and girls; matured plans for a mission training school and a theological seminary; and gathered under their care a native church of 200 members, of whom 10 are candidates for the Christian ministry. (See Japan.)

*Mexico.*—The commencement of the work of the Methodist Episcopal Church in Mexico was at an auspicious time. Louis Napoleon had been defeated and was dead. Austrian schemes had failed. The temporal power of the Pope had been denied, and the Juarez Government had expelled from the country, as enemies and conspirators against the government, the various orders of nuns, Jesuits, sisters of charity, and had confiscated their properties.

On February 6th, 1873, Rev. Dr. Wm. Butler (whose work in India is elsewhere recorded) arrived at Vera Cruz, and journeyed to the city of Mexico over the railway which had just been opened. There he found Bishop Haven, who had preceded him to the capital.

In addition to the appropriation made by the General Committee in November, the Hon. Washington C. De Pauw had placed at the disposal of the Missionary Society the sum of \$5,000, to aid in the purchase of property, to enable the mission to secure two or three centres in which to begin its work.

The bishop had visited Puebla, where he examined a property which was formerly part of the Romish Inquisition. This property included the chapel, and also the cells where the victims of the Inquisition were confined or walled in to die. These premises passed into the possession of the Missionary Society by purchase from a Jew, for the sum of \$10,000.

The bishop, returning with Dr. Butler to Mexico City, opened negotiations for the purchase of what was called "The Circus of Charinic."

Romanism had seized the great palace of Montezuma, and in it founded the vast and wealthy monastery of San Francisco. The monks held it as their headquarters for about three hundred years. Such was its extent that it was capable of luxuriously accommodating 4,000 monks, rich revenues being wrung from a people who were kept in ignorance, debasement, and superstition.

Notwithstanding the efforts of the Romanists to prevent the transfer of the property, the Methodist Episcopal Church acquired her title by honest purchase from the Mexican people, through their government, at a cost of \$16,300.

Four months of toil transformed the costly court from its theatrical condition into a beautiful church. Thus on the site of Montezuma's paganism and the institutions of Romanism evangelical Methodism entered, and holds the place as the headquarters of her missions in the Republic of Mexico. Within these premises the church room was dedicated on Christmas, 1873, 600 persons being present. The premises

extend 180 feet by 100, and are in the best part of one of the widest streets in the city of Mexico. Besides the church edifice, there are class-rooms and vestries, a book-store, a printing establishment, two parsonages, and a school-room; also the orphanage and school of the ladies' mission, and a home for their missionary, with room still to spare. It forms to-day one of the most complete mission establishments in the world.

By the arrival of Rev. Dr. Thomas Carter, who had a knowledge of the Spanish language, the mission was able to begin divine service, and also to start a school, in March, 1873. At the end of the first quarter the mission was able to report four Mexican congregations in the capital and two English services; also both day and Sabbath scholars, numbering 55.

Dr. Cooper of the Protestant Episcopal Church (April, 1873) formerly of Spain, more recently sent by the American and Foreign Christian Union for Spanish work in Mexico, concluded to unite his English congregation with the Methodists, and give himself wholly to Spanish work in connection with the mission. Invitations poured in upon the mission from various parts of the country from earnest inquirers, urging the missionaries to visit them, and preach the gospel, marry them, baptize their children, and give them the Word of God. The fruit of three hundred years of Catholicism was everywhere seen in the degradation, ignorance, and immorality of the people, living without lawful marriage, their children growing up in illegitimacy and shame.

Near the close of 1873 the Romish clergy were peculiarly excited and sanguinary in temper. Threats were made and intimidation tried. Nine of the leading Protestants, as was alleged, were marked for assassination. Elsewhere their plots were in a degree successful. At Ahualulco, Mr. Stevens of the Presbyterian Mission and his native preacher were murdered. Then followed assaults upon the Methodist Mission: some were wounded, and the churches at Mixcoac were burned. On January 26th, 1875, followed the horrible assassination (in their chapel, and during public worship) of nine of the congregation at Acapulco, Rev. Mr. Hutchinson escaping and finding refuge on board a United States ship-of-war then in the harbor. Within a few months followed the deadly assault on Rev. Mr. Phillips in Queretaro, violence on the missions in Guanajuato and Puebla, the plundering of some of the places of worship, and the murder of other missionaries near the City of Mexico. The public journals of the country denounced, in concert, these religious murders and outrages of Romish fanatics, and boldly held the Church responsible for these violent acts of persecution.

Reinforcements arrived, and the work was carried on at Puebla, Miraflores, Orizaba, Guanajuato. At the last-named place the persecutions were most bitter and violent; infuriated and drunken mobs of thousands of men again and again assailed the mission house and premises, but they were dispersed through the energy of the police and the determination of the authorities.

In 1876, upon his visit to the United States, Dr. Butler obtained subscriptions to the extent of \$13,000 to enable the mission to provide itself with a complete outfit for a printing establishment, including a steam-press and stereo

type machinery. During 1877 it issued over 700,000 pages of evangelical truth in the Spanish language. It prints the beautifully illustrated and highly successful "El Abogado Cristiano Ilustrado."

Bishop Merrill having inspected, in 1878, the entire work in Mexico, concluded his report as follows: "We have in all 17 congregations in Mexico. . . . We are preaching the gospel regularly to from 2,000 to 2,500 people. We have several hundred children under training in day and Sunday-schools, and circulating religious tracts, books, and papers far beyond the range of our congregations and the reach of our ministry. We have seven English-speaking missionaries and ten Mexican preachers, besides a few local preachers. The ladies have two representatives. Besides a school in Amecca, the Woman's Foreign Society of the M. E. Church (q. v.) have a complete establishment in the city of Pachuca for the education of girls, valued at \$6,000, and in the capital is the Girls' Orphanage.

At present the Mission is divided into four districts: The Central district including the circuits of Mexico City, Ayapango, Pachuca, Tezontepec, Tulancingo, Miraflores, San Vicenti, Santa Ana, and Zacualtipan. The Coast district including the circuits of Cordoba, Tehuacan, Orizaba, Oaxaca, Tuxtla, and Tuxpan. The northern district with the circuits of Guanajuato, Salamanca, Cortazar, Queretaro, Cuernamero, and San Juan del Rio. The Puebla district with the cities of Puebla Tetela, Tezuitlan, and the Xochiapulco circuit.

*Malaysian Mission.*—This youngest daughter of Methodism in foreign lands was born on April 29th, 1889, when Bishop Thoburn read the appointments and closed the first annual meeting of the Malaysian Mission.

The territory covered by it is wide, populous, needy, and presents some features that are unique and most interesting. For the present but one point is occupied—Singapore; but this is the strategic point of the archipelago, and England, with her keen eye for the nerve centres of the commercial world, is happily the mistress of this key to the trade of Southern Asia.

The work at Singapore comprises the following branches: First, an English church, which gathers at its services many English-speaking residents, American visitors, and ship-captains as they pass through the port. Second, a Chinese mission consisting of—first, a medical and evangelistic mission, and, second, the Anglo-Chinese school. The former is in its infancy, but is already giving promise of great good. Hundreds of cases have been treated, and much access gained to the hearts of the people. The Anglo-Chinese school is already the largest of the Chinese schools, with an average of three hundred and fifty boys on the rolls. Third, the Malaysian Mission. A work among the Malays of Singapore is particularly difficult, for they are Mohammedans, and largely believe that the white man is godless. Still they are more or less accessible, and some of the ladies have succeeded in visiting the Malay women in their homes. They need a man to go and live in their midst, and itinerate among the villages outside. Fourth, the Tamil Mission. Thousands of these people are employed on the sugar estates of the peninsula; many of them, nominally Christians when they leave their homes, lapse into heathenism on these unfriendly shores.

The missionaries of the A. B. C. F. M. have sent a Tamil local preacher from their school in Ceylon, and there is now a small Tamil church and a school, and the mission promises well. The woman's work is very successful, some fifty households being regularly visited and taught the Scriptures. The other points will soon be opened. In Borneo and in Java several stations have been tentatively selected in consultation with the Dutch missionaries.

*Bulgaria.*—During the meeting of the General Committee in November, 1852, the corresponding secretary reported voluminous correspondence concerning a mission to Bulgaria, and among the Greeks in Constantinople; whereupon it was

"Resolved, that a fund be created and placed at the disposal of the Board and bishops superintending foreign missions, for the commencement of a mission in Bulgaria, to the amount of \$5,000." An appropriation was made from year to year, till the mission was actually opened in 1857.

Rev. Wesley Prettyman and Rev. Albert L. Long were appointed with joint authority to institute the mission, and conduct it until a superintendent should be appointed.

Upon their arrival at Rustchuk, on the south side of the Danube, they found the country was beautiful, fruitful, and populous. The Turkish authorities were kind and tolerant, and the Protestant population everywhere gave them a cordial reception. They fixed upon Varna and Shumla as their mission stations. After advice they determined to occupy but one central location, Shumla, a city of 40,000 population, 8,000 of whom were Bulgarians. Rev. F. W. Flocken was added to the mission. November, 1858. September 17th, 1859, Tirnova was occupied as a mission station. The missionaries were received with special favor, as it was understood that they came not to displace anything that was good, but to vitalize and purify the dead formalism of the Bulgarian Church.

On December 24th, 1859, in his home at Tirnova, Mr. Long began regular public religious services exclusively in the Bulgarian language. He was not left without encouragement. Two Bulgarian priests called, one of whom had at a previous visit complained with tears of the lapsed condition of Christianity among his people: "They call themselves Christians, but they do not love God: they neither love the Saviour nor keep his commandments."

He now begged the loan of a Bible, for the senior or superior priest had refused him one, asking what business he had with a Bible, and declaring that the Bible was not a book for him to read.

At this juncture Gabriel Elieff, a devoted Bulgarian, the first Protestant convert of the land, who was converted through the reading of a Bulgarian Testament, joined Mr. Long as colporteur and assistant.

The work of the missionaries was everywhere largely one of personal effort, and in such labors their chief successes were found.

Mr. Prettyman, at Shumla, was surprised at his own constantly increasing influence. Even the Bulgarian priests were not slow to manifest their good will. From fifty miles around they called upon him, often inviting him to go with them to the sick, having more confidence in a little of his medicine than in their own holy oil and other sacerdotal rites.

The Molokans of Tultcha had a most singular origin. Some ninety years ago, they told Mr. Long, there were with a Russian ambassador a young Russian man and woman, who, during their stay in England, attended religious services, and upon their return to Russia informed their nearest friends of the modes of worship in England; of those who met, not in temples, but in dwelling-houses, and had at their places of worship no sort of images, not even a cross or candle; who did not fast or cross themselves, yet were pious and earnest people. These communications led their friends to adopt similar modes of worship, though retaining their membership in the Russo-Greek Church. They abolished images, cross-making, weekly fastings, etc. Their use of milk on fast-days (the Russian word for milk being *moloko*) induced their enemies to call them Molokans. Persecution broke out against them, and when summoned to appear before the Emperor, Alexander I., they begged to be permitted to conduct their worship in his presence. He consented and permitted them to return unmolested, and they continually increased in numbers until they have reached about a million. Mr. Flocken was immediately invited by the Molokans of Tultcha to attend their simple services, they then expressing their earnest desire that he would instruct them more fully in the truths and forms of the gospel. In April, 1860, he removed to Tultcha.

The lack of a printing-press left the mission powerless against the assaults of the Bulgarian organ of the Greek patriarchate and Russian embassy, and the Jesuit organ, which was ably edited. These journals poured forth, through the year, a torrent of falsehood and abuse, while the mission had no means with which to respond.

Mr. Prettyman slowly concluded that the task of reviving the ancient and corrupt church was hopeless, and that a separate church organization was necessary.

Constantinople being the centre of Turkish influence, it was thought best to remove the superintendency of the mission to that city. In 1864 the publication of the "*Zornitza*"—The Day Star—was begun, and was received with great favor by the Bulgarians.

Persecutions and discouragements followed; the mission passed through many vicissitudes, and the missionaries through a great variety of severe trials because of the Russo-Turkish war, and by reason of pestilence and other causes which resulted, for a time, in greatly weakening and almost destroying the work. Yet in 1873 the mission was re-enforced; complete separation from the Greek Church was effected in Bulgaria; fifteen Bulgarian bishops occupied the frontier Greek dioceses and 500 Bulgarian priests conducted the services of the land; yet dissatisfaction was widespread, and circumstances did not favor the missionary work.

The last report (1888) uses the following language: "Bulgaria has long been the battleground for sharp contests in the General Missionary Committee, as well as for contending hosts on her own soil. It has been a hard field to cultivate under the great difficulties it has had to meet. It has so often seemed to be on the eve of abandonment that the few workers have had to contend with the depressing effects of uncertainty as to the continuance of the mission, as well as with the complicated difficulties of

the field itself. The reports of this year, however, are more filled with encouragement and hope than ever before."

*Korea.*—The work in Korea was begun in the year 1885, and is under the supervision of Bishop Niide, H. G. Appenzeller being the superintendent.

A small house was purchased in the southern part of Seoul to be used for church work. Within this building, in a room 8 feet by 8, and 6 feet high, with but four persons present, was the first formal service held by Methodism in Korea. On October 9th, 1887, a woman was baptized, being the first baptism by a Protestant missionary in that land. A week later, at night, in the same room, Dr. Scranton and Mr. Appenzeller, with five communicants, celebrated the Lord's Supper. In this quiet way Methodism began her public work in the Hermit nation.

A few weeks later the house adjoining was purchased, and regular services were held there every Sabbath until May, when they were stopped by a royal edict.

During the fall of 1887 two colporteurs were sent out to travel in the northwestern part of the peninsula. The first one was absent about a month, was robbed by highwaymen, but met a few who listened to his words. The other brother was gone three months, and for telling the people to "cease to do evil and learn to do well" he was arrested and cast into prison. After confinement for three days in a cold, damp room, he was brought before the magistrate, who, when he heard the charges preferred against him, promptly dismissed him.

In the spring of 1887 the superintendent, with the Rev. H. G. Underwood of the Presbyterian Mission, started to visit the work in the north of Korea. Medicines, books, and tracts were sold. They were everywhere cordially received; some inquirers being found, they were provided with books.

Notwithstanding the edict prohibiting public religious services, the work went forward. Some of the best men in the school spent their vacation in visiting their friends with the view of bringing them to Christ. Their efforts were successful in leading a number of inquirers to the mission.

The *Pai Chai Hak Dang* (school for rearing useful men) had (report of 1888) a very successful year. Sixty-three students were enrolled. The new college hall is completed. In the fall an industrial department was established, and after that no aid was given to any one unless he earned it by work. The students proved themselves willing laborers.

About the same time Dr. Scranton opened a school for medical students, the young men working in the dispensary, being taught the theory and practice together.

With July 1st, 1887, closed the third year and a quarter of medical work in Korea, and the second of the hospital. There is no doubt that the medical work of the two societies has had marked effect upon the reception foreigners have received in Korea. Schools, as they now stand, could not have effected a like result.

The first quarter of 1887 the number of cases was 481, the same quarter in 1888 the number rose to 1,427, and for the year, reckoning the last two quarters of 1887, was 4,930.

All classes accept medical aid with readiness, among them being patients from the highest

orders in the land who count themselves among the friends of the mission.

*Italy.*—Methodist mission work for Italy found an early and zealous advocate in the Rev. Charles Elliott, D.D., who began the public agitation of the subject in 1832. It was not, however, until January 18th, 1870, that the Board appointed a committee to consider and report upon the proposition to institute a mission in that country.

At the St. Louis Conference (March, 1871) Bishop Ames appointed Rev. Dr. Leroy M. Vernon missionary and superintendent of the mission work of the Methodist Episcopal Church in Italy. He was directed to make a thorough and extensive canvass before fixing upon a place in which to locate a permanent centre for operations. In August Dr. Vernon and family arrived in Genoa, and early visited twelve of the chief cities of Italy, and made his report as directed. Bologna was fixed upon (December, 1872) as headquarters, but subsequently Rome was chosen in its place.

Vigorous prosecution of the work excited the opposition of the Romish priesthood. In June, 1873, the church in Bologna was inaugurated. A pamphlet against Protestantism was directed against the chapel, and Protestantism was charged with being atheistic, immoral, and retrogressive.

Public meetings were immediately appointed for confutation of the libels, and the priesthood was challenged, but no representative appeared. People came in crowds, the charges against Protestantism were shown to be true of Romanism, and the tables were turned.

A valuable acquisition was gained in the person of Signor Teofilo Gay, who had graduated from the Genevan Theological School, the last year of Dr. Merle d'Aubigné's presidency. He was a man of talent, activity, and culture, who had served at The Hague, afterwards in London at the French Church, and then returned to Italy. Also at this time a successful work among the Italian soldiers in Rome came into the hands of the superintendent.

With the close of 1873 Methodism entered Florence; a hall was rented, and the Rev. A. Arrighi, who had been educated in America, was put in charge and began the public services. The building was attacked, the doors broken in, the lights extinguished, the sexton assaulted, and an attempt made to harm Mr. Arrighi. Next day six of the rioters were lodged in jail.

The most important advance of 1874 was the occupancy of Milan. Two places of worship were opened in different parts of the city, and five or six services were conducted weekly.

Converts now began to come from distinguished ranks. Prof. Alceste Lanna, D.D., Ph.D., was then (1874) professor in the Appollinare, the most popular Catholic college in Rome, and two years previous, in the face of strong remonstrance, had resigned his chair of philosophy in the Vatican Seminary. He had been in a state of agitation and religious inquiry. He frankly recounted his struggles to Dr. Vernon, was encouraged and aided; then he resolved to forsake Romanism, to give up his professorship and associations, and give himself henceforth to Christ and His work.

In January, 1875, followed, in Milan, the conversion and introduction into the church of Prof. E. Caporali, LL.D., son of a Viennese baroness. An industrious student of wide range,

he was engaged in writing an elaborate encyclopedia of geography and all its cognate sciences, to number about 30 volumes. He abandoned all his worldly prospects, and entered upon the work of preaching salvation to his countrymen.

In April, 1875, a station was opened in Perugia; from the first the work met with favor. In May, Rev. Vincenzo Ravi of Rome, and his entire congregation, united with the M. E. Church. Mr. Ravi had taken a full course of theology at Florence, and afterward had studied a year in Scotland, where he married a Scotch lady.

Dr. Vernon (April 5th, 1875) in the city of Rome secured an eligible site for a church edifice, and the Missionary Society promptly appropriated the funds necessary for the erection of a small church and mission residence. And on Christmas day, 1875, St. Paul's M. E. Church, on Via Poli, Rome, was dedicated.

The work went on; converts were added, new stations were established. The uprising and firmness of the liberals disconcerted and defeated the violence of Romish devotees. The Woman's Foreign Missionary Society entered the field (1877) and began their work. In January, 1878, "The Torch" ("La Fiacola") began its issue, and Sunday-schools, in face of many and formidable obstacles, were established in the principal stations.

*Germany.*—In the year 1844 Rev. Wm. Nast was authorized to visit Germany and inspect its condition, with a view to the founding of a mission there by the Methodist Episcopal Church.

In a providential manner the way was being prepared by the zealous and successful labors of a Mr. Müller, who, in order to escape military service, had fled at twenty years of age, to England, where he was converted and became a local preacher. After twenty-five years' absence (1830) he returned to his native Württemberg, and at Winnenden began to preach the necessity of the new birth. Such success crowned his labors that in 1833 he reported to the Wesleyan Missionary Society that there were villages where all the inhabitants came to the meetings, that in places he was detained until ten and eleven o'clock at night, after the meetings, for religious conversation, and that new doors were everywhere opening to him which he could not enter.

By 1839 the membership had increased to 600, and 60 assistants were employed. From this period the statistics appear in the British minutes.

In 1844 Mr. Nast found the crowds at Müller's meetings so great that there was no room for kneeling, and their shadows darkened the rooms in which they met. Worn out by his excessive labors, Müller died (March 17th, 1858), and in 1859 Dr. Lythe was sent out as his successor.

At the annual meeting (May, 1849) the Board of Managers and the General Committee of the Missionary Society of the Methodist Episcopal Church made arrangements for the establishment of the mission. Mr. Ludwig S. Jacoby was appointed, and was directed to begin work in either Bremen or Hamburg, two of the four free cities of Germany. He selected Bremen, and preached his first sermon on December 9th, 1849, 20 miles distant from Bremen, and on December 23d he occupied in the city a rented hall, called *Krameramthus*.

Preaching was also begun among the lowest classes of a suburb of Bremen, and Mr. Jacoby also went to Baden, there addressing large congregations. Great numbers were converted at these services, many of whom remained in the churches to which they already belonged, making, however, public confession of the new life they had experienced.

On Easter, 1850, the first class was organized, the Lord's Supper administered for the first time, and the first love-feast was held the next evening, and on May 21st the first Quarterly Conference was held. Mr. Jacoby considered this the birthday of the mission.

Even as early as this 1,000 Methodist hymn-books had been sold in Germany, besides tracts and copies of Wesley's sermons, and on May 21st, 1850, a Methodist religious journal, "Der Evangelist," began its issue, the prominent house of J. G. Heyse undertaking the publishing for the mission. About this time Christian Feltman, hoping to spread a knowledge of Evangelical Christianity, opened a library, and loaned books free of charge.

June 7th, 1850, the mission was reinforced by the arrival from the United States of Rev. C. H. Doering and Rev. Louis Nippert. The latter preached his first sermon in the mission at a country place two miles from Bremen, on the open floor of a farm-house, great crowds, anxious to hear, filling all the vacant space. On one side were horses and pigs, on the other were bellowing cows, while overhead were flying and cackling hens; but the congregation listened with the greatest attention.

Rev. Dr. John McClintock, who had accompanied these brethren, preached in the parlor of the American Consul, probably the first English Methodist sermon ever preached in Bremen, while Mr. Doering preached on the same Sabbath to crowds in the Krameramthus.

On June 16th, 1850, a Sabbath-school (such as heretofore had not been introduced into Germany) was opened in Bremen, 80 children being present at the first session. It met with favor, and soon there were 300 present.

A circuit was now formed in and around Bremen, having 15 appointments. Letters from converts in the United States, sometimes read in public assemblies and even from State Church pulpits, served to fan the flame and quicken the work. Converts were active; some were engaged as colporteurs, and Wessel Fiege (August, 1850) was licensed as exhorter.

Persecutions met the missionaries in the Grand Duchy of Saxe-Weimar and in the Kingdom of Hanover and the Duchy of Brunswick. In the latter place the congregations were especially large and the conversions numerous, but many times the missionaries barely escaped imprisonment. They were assailed and abused through the press, and accused of foul heresies and absurd abuses. At Vegesack (a town of Bremen) a crowded hall was attacked by a half-drunken mob, instigated by the State clergy; every window was broken by flying stones, yet no one was hurt.

The work grew rapidly, and the prosperity was more than equal to the opposition. Crowds attended upon the ministry of the Word. In some places persecution was exceedingly bitter. Erhardt was forbidden to preach. He persisted and was fined; was brought before magistrates, banished from some places and imprisoned in others. In one jail he found three infidel

fellow-prisoners, who thought it strange indeed that they should be in prison because they did not pray, and he imprisoned because he prayed too much.

Only in the Grand Duchy of Oldenburg and the free cities of Germany were the missionaries at full liberty to preach the gospel and to form congregations.

Prohibition of meetings was so general that Mr. Riemenschneider's labors were confined chiefly to Frankfort and its environs. Mr. Nippert, though greatly embarrassed by the State Church authorities, without whose consent he could do nothing, had access to eight places.

The year 1858 was notable for the origination of the Book Concern of Germany, called "Verlag des Tractathauses," also for an institute for Biblical instruction which was the germ of the Martin Mission Institute, founded by the centennial gift of John T. Martin, Esq., of Brooklyn, N. Y., of \$25,000, to which he afterwards added \$1,000 for a library, built at Roederberg, an elevated suburb of the city of Frankfort.

In 1860 the mission, having bought types and press, began to do its own printing, and the "Evangelist" and "Kinderfreund" became self-supporting.

At the conference in Basle (July 7th-12th, 1864) it was found that the work had so expanded that there were not enough preachers to supply the demand.

Enlargement and development continued in every direction. In 1886 Switzerland was formed into a separate conference. The best results are those indicating that not only are the Methodist churches themselves growing in spirituality and strength, but the State Church itself is awakening to its duty, and its pastors are taking to heart Dr. Christlieb's reminder—"The best method against Methodism is to do the same as it is doing." This, however, does not indicate that Methodism is no longer necessary. It stands as a help to the State Church and a constant witness for aggressive Christianity unbound by State relations.

*Scandinavian Missions.*—The successful work carried on in Sweden, Norway, and Denmark owed its origin and impulse to fruitful mission work done among the Scandinavian sailors and immigrants in the United States, beginning in New York City in 1845, under the superintendency of the zealous Olof Gustaf Hedstrom.

The Bethel Ship, "John Wesley," in which Pastor Hedstrom held the first service, May 25th, 1845, became the headquarters of the mission in the United States. Here the work was carried forward with great success.

The ship became an asylum for destitute immigrants, supplying for them, at once, bed, table, wardrobe, and sanctuary, and also a labor agency for hundreds. There was a constant work of grace going on among the mingled Germans, Belgians, Swedes, Finns, Norwegians, English, and Americans.

Wherever these converts went they testified to what God had done for them in New York. In one year (1847) 3,000 were directed to homes in the West, societies were formed, and the work rapidly extended.

In 1850 about 12,000 Scandinavian seamen visited the port of New York and 15,000 Bibles and Testaments were distributed from the ship.

Besides the formation of churches and build-

ing of edifices in the West, great interest began to spring up in Sweden and Norway, excited by letters written and visits paid by converts to their friends at home.

Mr. O. P. Petersen left New York for Norway (May, 1849) bent upon an evangel to his kindred. A wide awakening followed the work of Mr. Petersen, and he remained nearly a year. He was appointed a missionary to Norway and returned, arriving at Fredericks-hald in December, 1853. Opposition was encountered. Methodists were looked upon as a low and despised people. The State Church and its priests left nothing untried to annoy and hinder them and their work.

Many souls were saved, and the interest spread so rapidly that Mr. Petersen soon felt the need of help, and Rev. C. Willerups was sent out in the summer of 1856.

In Sarpsborg (1857) an excellent church building was erected without aid from the Missionary Society, and a second edifice, the same year, was built at Fredericks-hald.

Christiania was occupied in 1864 by S. A. Steensen; but the work continued feeble for some time for want of a suitable building.

One thing became patent to all, namely, that these Methodist intruders had excited the Lutherans to work. They were aroused to the building of chapels and meeting-houses, besides their churches, in almost every town. They took to sending out colporteurs, with a warning, it is true, against Methodist books and preachers; but through them, after all, Christ was preached. It was a new life for Lutheranism.

In 1872, poor as the members were, they gave on an average \$5 each to the benevolent objects of the church; one lady offering \$4,500 to build a church at Christiania. This church, with a seating capacity of 1,200, was dedicated in 1874, when, as a result of A. Olsen's labors, there were 177 probationers and 120 persons in full connection with the church. The mission was organized (August 17th, 1876) by Bishop Andrews into an annual conference; at which time the membership numbered 2,798, who, amid the greatest financial embarrassment, gave for benevolent objects \$1,500 more than they had done the preceding year.

"I am compelled to believe," said Bishop Andrews, "that the Lutherans of this land urgently need the aid which Methodism can give and is giving. The coming of Methodism has been the signal for discussion and strife. It has encountered the most violent opposition, and has advanced with difficulty. But far beyond its organized and numerical success, it has quickened religious thought; has made manifest the defects of existing church life; has stirred the pastors to greater activity; has introduced, in many places, better measures for the religious improvement of the people (the prayer-meeting societies are an evidence), and thus, beyond its own limits, has done great good. I believe that this result is of incalculable value, and amply repays all our efforts."

*Sweden.*—In the year 1857 the king, greatly in advance of his people, made an earnest effort to obtain more liberal legislation on the subject of religion, but the State Church officials were too strong for him. All Sweden rocked with the agitation of this subject of granting the privileges of religious worship to others than the members of the State Church.

In the year 1865 Rev. A. Cederholm went

over from the mission in Norway and unfurled the banner of Methodism in Gotland, an island in the Baltic. The work rapidly grew, and aid was required.

Persecutions and troubles, similar to those experienced in Norway, were encountered in Sweden, but the triumphs were many and the fruits encouraging.

In 1868 Bishop Kingsley on his visit made this a separate mission, appointing Victor Witting superintendent. The year was one of general and constant revival. Large societies sprung up at Gotland, Stockholm, Gottenburg, Orebro, and Carlskrona. At the latter place a chapel was built, many of the people living on two meals daily and others pawning clothing and furniture in order to give. The chapel at Carlskrona was the first Methodist church in Sweden.

The whole country seemed to open to this new faith. In 1871 eight chapels were built and dedicated, eight more were in process of erection, and four had been built.

Bishop Foster, upon his visit (1872), found fifty ministers employed, and the work in every department prosperous.

In 1874, at the annual meeting, Bishop Harris presiding, it was decided, with great unanimity, to withdraw from the state church under the new law for dissenters. A petition, signed by 1,400, was presented to the king, who received the deputation with great consideration, was much moved, and dismissed them with his blessing, saying, "God be with you, my people."

A training-school for candidates for the ministry was originated and located at Orebro, having 11 to 17 students.

The Swedish Conference was organized at Upsala August 2d, 1876, by Bishop Andrews.

*Denmark.*—Mr. Willerup, a Dane, removed to Copenhagen in 1857 from his labors in Norway and Sweden.

The great want of the mission was a church building, but an early convert surprised all Scandinavia by proposing to give 3,000 rix-dollars (about \$1,500) toward building an edifice. The General Committee of 1861 appropriated \$5,000, and Harold Dollner, a merchant of New York, offered to add \$1,000 more.

Political troubles and the war cloud delayed the work, but by January 6th, 1866, the church was dedicated. In 1872 a church was dedicated at Hørsyld, which was built and presented by Niels Simonsen. Since then a good church has been built and dedicated at Viele, without aid from abroad.

Similar inspiring effects were exerted by the mission upon the state church in Copenhagen, as in other parts of Scandinavia. They began Sunday-schools, and in a section of the city where, for a hundred years, no church had been built, they at once began to provide church accommodation for the people.

At Langeland a wealthy farmer donated a hall for public worship, and then gave himself to the church.

**Methodist Episcopal Church (South), U. S. A.—Board of Missions.** Headquarters, Nashville, Tennessee, U. S. A. The beginning of the work of this Society is coincident with that of the Methodist Episcopal Church (North) (q.v.), until the separation of the two churches in 1844. Up to that time each branch had a share in all the missions, but

subsequent to that date the Southern churches organized their own board and carried on separate missions.

At its first General Conference, held in 1846, a Home and Foreign Missionary Society was organized. Its operations were committed to a Board of Managers, who, in conjunction with the bishops, determined the fields that were to be occupied, selected the missionaries, and distributed the amount to be collected among the annual conferences. The home and the foreign fields were under the management of the same Board. In 1866 the General Conference placed the work of the Missionary Society under two, one having charge of the foreign, and the other of the home field. In 1870 the missions of the church were again placed under one Board. In 1874 the constitution was again changed, giving to the work its present organization. The General Board has charge of the foreign missions, and all others not provided for by the Annual Conferences. It consists of a president, vice-president, three secretaries, and twenty-five managers. The bishops and treasurer are *ex officio* members of the Board. The Board meets annually, to determine what fields shall be occupied, and the number of persons to be employed in each; to estimate the amount that may be necessary for its missions; and to divide the same among the Annual Conferences. The revenue of the Board is derived from annual collections in every congregation and Sunday-school, and from such other plans as may be adopted by the church and congregation, by the Sunday-schools and by such societies as may be formed to raise money for this object, and by special collections by the secretaries and bishops, and from donations and legacies.

Each Annual Conference is required to provide for the mission work within its bounds. Each one is authorized to organize a Board of Missions auxiliary to the General Board. Said Conference Board appoints its own officers, regulates its own affairs, and has control over the missions it may establish, with the consent of the president, within its bounds, and of the funds raised for their support.

The first work of the Board was among the colored people and Indians of the United States. The latter was especially important, but is treated of under the article Indians.

### *Foreign Missions.*

CHINA.—The offer made by Charles Taylor in 1843 to go to China as a missionary of the Church was the origin of the action of the first General Conference, held at Petersburg, Va., in May, 1846, when it was decided to commence a mission to China, and Charles Taylor was appointed missionary. It was deemed best that he should have an associate, and during the year and a half which elapsed before one could be secured, Mr. Taylor studied and took a degree in medicine. In April, 1848, Dr. Taylor and his colleague, Mr. Jenkins, sailed for China with their families.

Shanghai was the place selected, after much thought by Dr. Taylor, as the best location for the mission. On arriving at Hong Kong after a four months' voyage, the illness of Mrs. Jenkins prevented Mr. Jenkins from going any farther, and Dr. Taylor began work in Shanghai, in September, alone. Nine months later, May, 1849, Mr. Jenkins arrived, and so soon as

a sufficient knowledge of the language had been acquired, the two missionaries opened a preaching place and talked and preached to the many who came, attracted more by the strange appearance of the foreigners than by any desire to learn. Few Christian books were published in Chinese at that time, and the work for quite a while was entirely oral; but as the language was acquired more perfectly and intelligibly, converts were made and the nucleus of a church was formed. Liew-seen-sang and his wife were the first converts, and the man's name has been familiar to Southern Methodists ever since, until his death in 1866, as the eloquent and useful native preacher, whose vigorous mind, quick apprehension, ready and fluent utterance, and noble piety made him so universally beloved and heeded.

The mission was strengthened in 1852 by the arrival of Rev. W. G. E. Cunningham and his wife; but the work and the climate began to tell on the pioneers, and in that same year ill-health caused the return of Mrs. Taylor in the spring, and in the fall Dr. Jenkins took his wife and family for a visit home, hoping to restore Mrs. Jenkins' health by the change, but she died at sea. In September, 1853, Dr. Taylor joined his family in the United States, as his wife was still in bad health, and the mission was left in the care of one inexperienced missionary. Then was the time of the Taiping rebellion, and in that year Shanghai was captured, and remained in the power of the insurgents for eighteen months. During all this time little work could be done. Fire and the ravages of the contending armies were fatal obstacles to the spread of the gospel, and the only chapel, together with two mission houses, was burned.

Dr. Jenkins returned in 1854 with a large reinforcement of three married missionaries, and the hope was that the cessation of the war, the increased number of workers, and the new strength thus given the mission would result in a great degree of prosperity. But the war continued, and the missionaries were attacked by sickness. The following year one left the field and died soon after reaching home, and in the next year another of the missionaries was forced to leave. But in spite of difficulties arising from lack of suitable buildings and lack of means, amid bodily weakness and privation, the work was carried on, inquirers increased, and several were received into the church.

In 1860 two more missionaries were sent out, but in 1861 Mr. Cunningham and his family were forced to leave, after nine years' work in that trying climate. Another of the workers was forced to take a furlough in 1861, and in 1862 Dr. Jenkins withdrew from the mission; so that in 1869 the record of the mission during the twenty one years of its existence showed that eight missionaries with their families had been sent out. Death had removed one missionary and two missionaries' wives; one had withdrawn from the work, four returned, and two were left in the field. About sixty natives had been baptized, and among them were two native preachers of great gifts and usefulness. In 1870 three stations had been occupied—Shanghai, Soochow, and Nantziang, of which Shanghai remained the principal station, having good mission houses, and two chapels. Good earnest work was beginning to have its effect, and the mission was as strong and aggressive a power for good as any other of the

missions in China. Rev. Y. J. Allen took charge of an Anglo-Chinese school under the patronage of the Chinese Government, and gave up his support from the Board for the benefit of the work. In addition to his work of instruction, two papers, one religious, the other scientific and literary, were edited by him, and were patronized by missionaries and native Christians of all denominations. The lack of good periodical literature for the Chinese has been largely remedied by the indefatigable and valuable efforts of this missionary.

Until 1875 Rev. Y. J. Allen and Dr. J. W. Lambuth carried on the work. Bible-women and native assistants were trained and put to work, itinerating tours were made in the surrounding country, a church was gathered together at each of the three stations, boarding and day-schools were opened, the work grew in importance, and the circulation of the papers published by Dr. Allen was greatly enlarged.

In 1875 another missionary was added to the force, and in 1877 Bishop Marvin visited Shanghai, and presided over the quarterly Conference. That same year a missionary and his wife arrived at Shanghai. The Women's Board entered the field in 1879, and sent two female missionaries. From this time on the history of the mission has been one of steady and encouraging growth along all the lines as laid down in the beginning, with most encouraging results. Trials and reverses have been met with, but have only been temporary. In 1889 the report showed the following statistics: 18 missionaries and wives, 14 female missionaries, 6 stations, 7 sub-stations, 468 church-members, 3 Anglo-Chinese schools, 205 pupils, 1 boys' boarding-school, 78 boys, 3 girls' boarding-schools, 63 girls, 31 day-schools, 579 pupils, 20 Sunday-schools, 666 scholars, 2 hospitals, 10,427 patients.

**CENTRAL MEXICAN MISSION.**—The conversion of an educated Mexican, Alijo Hernandez, was the providential beginning of the work in Mexico. Under the appointment of Bishop Marvin, Hernandez labored one year on the Rio Grande River, bordering on Mexico. He was re-appointed to the same field for 1872. "Bishop Keener, who presided at the West Texas Conference, which convened in Victoria in the month of December, 1872, was favorably impressed with Hernandez, and became much interested in view of establishing a mission in the city of Mexico; consequently, early in the year 1873 the bishop visited the city, purchased property suitable for a house of worship, made arrangements for the organization of a mission, and sent Hernandez to enter at once upon the work in this new field of toil." Later the bishop appointed Rev. Joel T. Dawes, of the Louisiana Conference, superintendent of the mission in the city of Mexico. He pushed the work with energy. Bishop Keener visited the city and his judgment was confirmed as to the opening for mission-work presented to the church. In 1879 the work had extended from the city of Mexico to the cities of Leon, Cuernavaca, Cuautla, Toluca, and Orizaba. Guadalajara and the region about it was taken under the care of the mission in 1883, as a missionary who had been working independently in that region united with the mission. The Central Mexican Mission Conference was organized in 1886. The latest statistics, (1889) show that

missions are now carried on in the States of Mexico, Hidalgo, San Luis Potosi, Morelos, Puebla, Vera Cruz, Oaxaca, Guanajuato, Mech-oacan, Aguas, Calientes, Colima, and the territory of Tepic, with a total of 17 local preachers, 1,633 members, 55 Sunday-schools, 1,245 attendants. There is a theological seminary at San Luis Potosi, and the mission press issues regularly "El Evangelista," the organ of the mission, besides lesson-leaves and, during the past year, 800,000 pages of tracts.

**MEXICAN BORDER MISSION.**—This mission was also an outcome of the work of Hernandez in the valley of the Rio Grande. The mission district was established in December, 1874, with missions at Brownsville and Rio Grande City. In 1881 there were four missionaries, and the mission was divided into two districts—the San Diego and the San Antonio districts. Two schools were opened in 1882 under the charge of missionaries of the Woman's Board, one at Concepcion and the other at Laredo. By 1889 the work had extended two hundred miles into Mexico, and of the 23 missions, 9 were in Texas, 4 were on both sides of the Rio Grande, and 10 were in Mexico. In 1886 the mission was formed into an Annual Conference, which reported in 1889, 20 local preachers, a membership of 1,819, 14 church-buildings, 76 Sunday-schools, 1,860 scholars, six day-schools: Laredo Seminary, 83 scholars; Monterey Institute, 18 students; Nogales Seminary, 57 scholars; Saltillo Colegio Ingles, 60 scholars; Chihuahua School, 18 scholars; Durango school, 36 scholars. The work is carried on in five districts: Durango, including the states of Durango and Chihuahua in Mexico and part of Texas and New Mexico, has a population of 1,000,000, and is 700 miles long by 300 wide; Sonora includes the states of Sonora, Sinaloa, and Lower California, and part of Arizona, with a population of 500,000 in its area of 200,000 square miles; Monterey, with mission stations at strategic points along the Texan border; Tamaulipas, and Monclova.

**BRAZIL MISSION.**—In 1875 the Mission Board constituted Rev. J. E. Newman, for some years a resident in Brazil, its first missionary in that country, and early in the following year Rev. J. J. Ransom joined him. The province of São Paulo was first occupied, but in 1877 work was commenced in Rio de Janeiro. Two missionaries went out under the Woman's Board in 1881. In 1887 the conference was organized, and in 1889 the statistics were: 9 foreign missionaries, 359 church-members, 10 Sunday-schools, 257 scholars, and a college and seminary at Juiz de Fora.

**JAPAN.**—At the annual meeting in 1885 the following resolution, offered by Bishop Keener, was adopted by the Mission Board:

"Resolved, That we establish a mission in Japan, and that we appropriate therefor the sum of \$3,000."

By request of the authorities at home Dr. J. W. Lambuth visited Japan, and reported favorably respecting a mission. April 20th, 1886, Bishop McTyeire, in charge of the China Mission, appointed J. W. Lambuth, W. R. Lambuth, and O. A. Dukes to Japan. On the 25th of July Dr. J. W. Lambuth and wife and Dr. Dukes landed in Kobe, Japan. Dr. W. R. Lambuth followed as soon as his duties in China would permit, and on the 17th of September, thirty-two years after the landing of Dr. J. W.

Lambuth in China, they held the inauguration meeting of the Japan Mission in Kobe. A field of most inviting character around the great Inland Sea of Japan was found open, and with apostolic zeal our missionaries entered on their work. Their first Church Conference was held in Kobe December 3d, 1886. In 1887 they reported 6 foreign members, 1 Chinese, and 1 Japanese. Rev. W. B. Palmore, visiting Japan, had contributed \$100 annually for a supply of sound religious literature, and the Palmore Institute, having that end in view, was projected. A Sunday-school with 20 scholars was opened. A weekly collection for a church-building was started. The wives of the three missionaries entered fully into the work. Sixty women of good families were gathered for Bible-reading and study. The whole length of the Inland Sea was visited. Inquirers had increased to 27; three circuits—Lake Biwa, Kobe, and Hiroshima—were mapped out and manned by O. A. Dukes, J. W. Lambuth, and W. R. Lambuth in the same order. From the lower end of the great island of Shikoku came appeals for instruction which were answered in 1887. In 1888 a native missionary society and a church extension society were formed, and in the same year resolutions were adopted favoring an organic union of the various Methodist bodies in Japan. A "Basis of Union" was subsequently drawn up and referred to the home Board. At the third annual meeting of the mission held in Kobe September 4th, 1889, the report gave the following statistics: 5 stations, 12 out-stations, 5 missionaries and wives, 3 single men, 1 single woman; 232 church-members, 12 theological students, 18 Sunday-schools, 485 scholars, 250 pupils in various schools, and 1 church.

### **Methodist New Connexion Missionary Society.**—Secretary, Rev. W. J. Townsend, Richmond Hill, Ashton-under-Lyne, England.—The Methodist New Connexion, the earliest offshoot from the stem of the parent Wesleyan body in 1797, was for some years occupied in laying its own foundations and organizing its forces, but in 1824 it took its first steps in missionary enterprise. It looked with pitying eyes to the sister-island of Ireland, and the Conference passed a resolution to the effect that: "Sincerely deploring the ignorance, superstition, and misery prevalent in Ireland, an effort be made to diffuse the blessings of Protestant Christianity in that island." The plan was developed at the Conference of 1825, and the following year the mission was established in Belfast and contiguous towns. Since that time important and useful operations have been continued with considerable success.

In 1835 the attention of the Conference was directed to Canada as an urgent sphere for missionary operations, and in 1837 the Rev. John Addyman went as the first agent of the Connexion to the Dominion. He was joined in 1839 by Rev. H. O. Crofts, D.D., and great prosperity attended their labors. The mission expanded until in 1875 it united with the other Methodist bodies in Canada, and became the one powerful Methodist Church of that country. When the union took place the Mission comprised 396 churches, 7,661 church-members, 167 Sunday-schools, and 9,259 scholars.

In 1859 a long-cherished wish of the Connexion was realized by the formation of a mis-

sion to the heathen. China was selected as the field of labor, and Revs. John Innocent and William N. Hall were the first agents of the Society sent there. They worked at Shanghai, until they had opportunity to choose deliberately their location, and eventually they settled in Tientsin, the great seaport of North China. Here they opened several stations and met with encouraging success.

In 1862 a mission to Australia was commenced and churches were raised in Adelaide and Melbourne. In 1887, these churches not having developed resources to make them independent, and the energies of the Society being demanded by the increasing claims of the Chinese work, they were given up. The church in Adelaide united with the Bible Christians, and that in Melbourne with the Wesleyans.

The Society is managed by a committee, consisting of a president, a treasurer, and a secretary, with 16 ministers and 16 laymen, appointed annually by the Conference.

The mission in China is its only foreign sphere, but it actively pursues its work in Ireland, and also in opening fresh stations in large manufacturing centres in England. In China it has three circuits. The first and earliest, in Tientsin, has a fine establishment in the British Compound, consisting of a college for the training of young men for the native ministry and which is complete, with residences and appliances for the principal, the native tutor, and 18 students; also a female college for the education and training of 12 native girls and 4 women for Christian work, with residence for a lady principal and native helpers. There are two chapels in the city where daily preaching of the Word is carried on, and the English church, in which united services are held, stands on ground owned by the Society. In addition to these there are a chapel and native church in Taku, and the same in Hsing Chi, a city to the west of Tientsin. This society was the first to enter this great city, but it has been joined since by the agents of several other societies.

In 1866 an aged man took his seat in the principal chapel of the Society in the main street of the city, and listened with earnest attention to the address of the missionary. He remained after the service as an inquirer, and told a wonderful story. He was a farmer from the village of Chu Chia Tsai, in the Shantung province, 140 miles south of Tientsin. Under the influence of a marvellous dream he had travelled to the great city to listen to the foreign teachers of religion. He became an earnest believer in Jesus, and went to his home carrying with him Bibles, hymn-books, and other Christian publications. He invited his neighbors to his house, announcing to them his conversion and reading to them the Bible. A great awakening took place in the village, which spread by degrees over the district, with the result that a pressing appeal was sent to Tientsin for a missionary to come down and take charge of the great work. Thus a second circuit was formed by the Society which now spreads over about 300 miles of the province and consists of more than 40 native churches.

In recent years a third sphere of labor has been occupied in the neighborhood of Kai Ping, north of Tientsin. Near this city extensive mines are being worked by a syndicate of Chinese mandarins, who applied to the Society for a medical missionary, offering to afford

facilities for the teaching of Christian doctrine amongst the workmen. An extensive circuit is now being worked round the neighborhood of the Tang San collieries, extending to Yung Ping Fu, an ancient and important city near the old wall. These are the particular localities at present occupied by the agents of the Society.

It has been a special aim of this Society to work the mission as much as possible by native help. The number of foreign agents has been small, but it has been blessed with and owes much of its success to a large number of faithful and devoted native helpers. It numbers at present 52 chapels, besides smaller preaching places, 6 foreign ordained missionaries, 40 native preachers and catechists, about 3,000 adherents, 1,268 church-members, 227 candidates for membership, 19 schools, and 178 scholars. In addition to these, in Tientsin it has a lady agent in charge of the college for training women and girls, in Shantung it has a medical missionary who has charge of a dispensary, and a hospital, with beds for 30 in-patients. This institution is crowded with patients, who come on the appointed days from all parts of the district, often to the number of 120 or more, and it is exercising a very happy influence on the success of the mission.

The missionaries have no methods of work peculiar to themselves. The chapels are open daily for reading the Scriptures and preaching the gospel, and generally in the large cities and towns, large audiences assemble to listen to the foreigners. After the public service audience is given and conversation held with inquirers who may remain for further information. In the Shantung circuit the area covered by the mission is so wide that the foreign missionaries have to take frequent tours round the churches, exercising a general superintendence over them, and directing the native agents in charge of them. In connection with the work in this circuit several pious native women have been employed for some years in ministering the gospel to women with great success. These have not been able to read or write, but having retentive memories, they are able to repeat the principal portions of the New Testament, hymns, catechisms, etc., and so are well prepared to speak to congregations of women with great effect. It is to cultivate this branch of essential mission work that the college for women and girls has been opened in Tientsin, and it is intended to prepare females there who may carry the gospel to their own sex in all portions of the mission.

The organ of the mission is "Gleanings in Harvest Fields," which is published every other month, and is edited by Rev. W. J. Townsend, the general secretary of the Society. The income of the Society for 1889 was £6,038, the expenditure was £6,206.

**Methodist Protestant Church, Board of Foreign Missions.** Headquarters, Easton, Maryland, U. S. A.—The organized missionary work of the Methodist Protestant Church began in 1882. Previous to that time the money received by the church for foreign missions was given to other Boards, at the direction of the pastor who secured it. Some of this money went to Japan, where Miss L. M. Guthrie was employed by the Woman's Union Missionary Society of New York. By

this means Miss Guthrie learned of the Methodist Protestant Church, and subsequently when she was in this country she put herself in communication with some ladies of the church in Pittsburg, Pa., through whom she had received funds for her work. Before her return to Japan she had an interview with these ladies, which resulted in the organization of the Woman's Board of the Methodist Protestant Church. Soon after the General Conference of the Church elected a Board of Missions, Rev. F. C. Klein of Baltimore being appointed superintendent of the mission work in Japan. Under his management the work developed to its present proportions. Rev. F. T. Tagg, being elected corresponding secretary, organized methods for the collection of funds, and the church became more interested in the work, and it became possible to send more workers into the field.

*Development of its Foreign Work.*—The organization of a Board of Missions was due to the interest aroused by Miss Guthrie, and Japan, her field of work, was most naturally chosen. Yokohama was the first station opened by the Board. The work at Fugisama and Nagoya was organized in response to the call from the natives for Christian teaching and evangelistic work.

*Constitution and Organization.*—The Board of Missions is organized under the discipline of the church, which provides for the collection of funds, the employment of missionaries, the establishment of missions, the erection of schools and church buildings, etc. The Society is permitted to do all that its finances will permit, but it cannot go into debt. It has no special lines of work; its general methods are like the Boards of other churches, in the organization of schools for the education and churches for the evangelization of the natives.

**Methods of Missionary Work.** Under this head it is proposed to give a brief survey of missionary work as it is actually being conducted, with special reference to the methods used. Under the head "Organization of Mission Work" the agencies employed in the conduct of these methods will be considered.

The first thing to be clearly stated is the object of missions. A missionary society is formed, funds are collected, missionaries are appointed and sent out to some foreign land. What is it that these men and women seek to accomplish? Have they any definite thing in mind, or do they go out under some great, if rather vague, impulse of doing good and obeying the last command of the ascending Saviour?

Ordinarily the constitution of a society gives the answer to such a question. In the case of missionary societies many make no reference to it at all, or mention it in only the most general way, e.g., "the diffusion of the knowledge of the religion of Jesus Christ;" "the diffusion of the blessings of education and Christianity;" "to preach Christ and Him crucified, and as an after result to lift the natives to a higher level," etc.

Scarcely more particular on this point are the instructions to the missionaries as they go to their fields. So far as published statements are concerned, there is little or no precise definition of the work of the foreign missionary. It is undoubtedly partly for this reason that so many

are skeptical of the value and results of missions. Were a clearer statement made and widely known, there might be less misapprehension. It does not, however, follow that the actual work of missionary societies is vague or scattering. Except in rare instances, it is sharply defined and steadily directed to a well-understood end. That end is twofold: first the conversion, second the sanctification and development, of individual souls. The second, indeed, involves their relations as members of the Church of Christ, as component parts of society and the nation, but the basis is always the individual. Missionaries go, not to Africa, but to the Africans; not to Persia, but to the Persians. The Church of Christ in Japan is made up of men, women, and children, in each one of whom the missionary is interested and for whom he labors, that the likeness of Christ may be developed in them. Undoubtedly other ends are sought: the spread of the comforts of civilization, the emancipation of thought from the thrall of false systems of belief, the establishment of better social conditions, government, etc. But these are subsidiary, and in a degree accidental. Wherever they seem to take the precedence, a more careful examination will in almost every case reveal the fact that they are means to an end, and that the end is the individual soul to be converted and built up in likeness to Christ. And this is not mere theory, but actual fact. Let any one look carefully at the reports of the societies, and whether or not he approves of their general organization, he will find that their methods tend always toward individual, personal work.

According to this, the methods adopted in missionary work may be considered as, 1st, Evangelistic; 2d, Pastoral. The first has primary reference to the conversion of men, the second to their development into a likeness to Christ.

As expressed in a letter received from the secretary of the Church Missionary Society, we have: 1. The preaching of the gospel to the unconverted; 2. The building up of the native church as it is pictured to us in the concluding chapter of St. John's Gospel, where Christ's servants are represented in figure, first as fishers casting the gospel net, and then as shepherds feeding and tending the flock. Education is a part of each. For the heathen and the Mohammedan it is undertaken solely as a means of evangelization. For the Christian population, whether elementary for the children or professional for the future pastor or teacher or evangelist, it is a department of pastoral work. So, too, publication is a department of each. Medical work is primarily evangelistic, its benefit to converts is rather incidental."

We will therefore consider first these two classes more fully and then take up the particular methods—first, those that really belong to both; second, those that are distinctive of each.

1. **Evangelistic.**—The missionary as an evangelist meets with four classes of men: 1st. Those who are greatly dissatisfied with themselves and their condition, and are not only ready but anxious for a change. 2d. Those who are bitterly opposed to change because of their relation to the existing order of things. 3d. Those who are willing enough to change but wish to have the advantage of change made evident. 4th. Those who are absolutely indifferent, content to let well enough alone. The first constitute a very small minority, and the classes in-

crease in number to the last, which includes in every case the immense majority of every land where missionary work is undertaken.

The problem of the evangelist missionary is to find the first, disarm the second, convince the third, arouse the fourth, and bring all to an acceptance of the gospel of Christ as a Saviour from sin, and their repentance and conversion.

2. **Pastoral.**—The evangelist having accomplished his work, that of the pastor commences. First, the individual Christian is to be established in the faith, to be guided and assisted as he endeavors to throw off old habits of thought and of life and put on new ones; to be instructed, that he may be enabled to recognize and overcome temptation now meeting him under entirely unaccustomed forms; to be strengthened, that he may become an aggressive power to bring others to Christ.

He is then to be associated with his fellow-Christians, to be looked upon no longer merely as an individual but as a member, first, of the organic church, and, second, of a community and nation which he is to help to bring into accord with the precepts of the gospel.

The church is to be established as a permanent institution for the work of Christ. It must first be organized in all its different departments, placed on a firm foundation of faith, self-support, activity; be provided with the various means essential to its continued existence and growth. The community is to be permeated with Christian ideas, its social life freed from its evil associations, brought into accordance with the spirit of the gospel, its customs purified, its aims enlightened, its national life made to include a genuine and true patriotism. And so on in all the endless lines that open up before us as we look out over all that is involved in the establishment of the kingdom of God upon earth.

Each division is a mighty task, more perplexing even than the corresponding duty of the churches at home. And retrospect only makes its difficulties stand out more prominently. No one can travel in the Levant, over the roads where Paul led the way in Christian work, recall the story of those first centuries of growth, remember the subsequent centuries of stagnation, decay, and almost death, and not wonder whether the story is to be repeated in the churches now gathering in every city and town, and almost in every village. Modern Christians are no more sincere or devoted than those of earlier ages; modern missionaries no more earnest or skilled than the apostles and fathers. The problem of the missionary, especially in his pastoral work, is one of permanency and growth. The question he is constantly striving to solve is that of how to hold the vantage-ground gained, and make it the point of departure for new achievements. Here certain essentials must be kept in mind: 1. The development and growth of the individual church and community must be natural, not forced. The genius of the people must be studied, and that line of development found which will bring out the best that is in them. South Sea islanders cannot be transformed into Europeans or Americans, and every effort to so transform them results in harm. At the same time they must be something different from what they have been. While it is doubtless true that the Asiatic must remain an Asiatic, it is also true that the Christian Asiatic must be as

different from the heathen or Mohammedan Asiatic as the modern Englishman is from his Norman-Saxon progenitors. 2. The element of time is very essential. Occasionally a sudden transformation will come; but this is the exception rather than the rule, and he works best who is not disturbed if he has to work slowly. 3. The methods adopted must be primarily constructive, not destructive. Their object is to build up rather than to tear down. They do not attack systems, but seek to help individuals. It is not that Islam, Hinduism, Shin-tism, or Fetichism is to be overthrown, but that individual Moslems, Hindus, Japanese, Africans, are to be guided and assisted into a higher life. It is not so much that corrupted, degenerate Christian churches, as churches, are to be brought back to a pristine, or even better than pristine, purity; but individual Armenians, Nestorians, Copts, Roman Catholics, Bulgarians, Greeks, are to be helped to lead Christian lives, to understand better the full force of the truths that their lips profess, the full love of the God that they so often ignorantly worship. Undoubtedly the false systems will fall, the old churches be purified; but that is not the end in itself. Attacks are at times necessary. Fearless exposure of false teaching has its place, but missionary polemics as a rule are directed not against false thought so much as against sinful life. There is no shirking in the declaration of the truth, but the truth attractive, not repellent, is the great theme.

1. Taking up now the different methods, we mention first those that are common to both evangelistic and pastoral work, not undertaking to be exhaustive in the statement of them, but rather to indicate the lines along which the missionary works.

1. *Personal Conversation.*—The prime element in all missionary work is the personal. Men are drawn to men. Just as it was Christ's personality that drew men to Him, so it is largely the personality of the missionary that draws men to him, and through him to the Saviour. This has been most markedly shown in the lives of the great leaders Henry Martyn, Judson, Livingstone, Goodell, Hannington, and others. Indeed, almost all who have had success in missionary work have found their greatest power in the close, intimate relation of personal conversation, personal contact, where the needy soul felt the touch of the full soul, drew strength from it, and was satisfied; where the hard soul felt the power of the magnetic soul, and despite itself was drawn away into a higher life; where the cold, indifferent soul felt the heat of a soul on fire with the love of God, and expanded into a nature purer far than it had dreamed of.

It is no easy thing for an Occidental to come in contact with Oriental ideas, prejudice, and habits, and seek to exert such influences as shall bring about change without doing harm. It is easier to create repulsion than attraction, to harden than to soften, especially in public. Men, too, are swayed by the power of association with their fellow-men. A single soul in a multitude may be overwhelmed, in private conversation it may be developed.

Thus the fundamental method of missionary work in every land is intercourse with persons. Not only is this true of the historical inception of any work, but also of its continuance. It is just as important and universal to-day as when mis-

sion work was commenced. It is employed by every different agency, foreign and native, missionary, pastor, catechist; especially by zenana-workers, and almost exclusively by Bible-readers; it is adapted to every class, and is almost the only means of reaching some.

In the pastoral division of missionary work the element of personal influence is, if anything, stronger than in the evangelistic—certainly so far as the missionary himself is concerned; and it is here that personal genius makes itself felt most markedly. It not infrequently happens that to a passing traveller the missionary appears to be doing little missionary work. He seldom preaches, he may not be an educator or a translator. Hour after hour and day after day he is in his study, or among the people, talking, talking, talking. Could the observer hear and understand the conversation, he would marvel at the range of topics, covering every department of human life and every phase of religious doctrine. Shall tithes be given? How shall a church be organized? What is a Christian's duty toward an unjust, tyrannical government? The following, jotted down in a few moments by a missionary, will give an idea of the keenness of the questioners: "Why has Christian civilization not accomplished in America what you preachers claim that it is fitted to accomplish?" "Why are your Indians so bitter against you, and repressible only by force?" "If friends pray for us on earth, why should their hearts be dried up and their mouths be stopped when they go to heaven?" "Can a man be a believer who has not been an infidel? Must he not first challenge, then establish, then believe?"

Any one can give instance after instance where he has had to call up every line of study that he has ever pursued, to meet the difficulties that occur to the minds of those he seeks to help. But not only does he have to meet personal queries. The missionary must be a statesman. Church quarrels occur on mission ground as well as in Christian lands, and it is often owing chiefly to the missionaries' personal power that they are overcome. Conflicts with persecuting relatives furnish some of the most difficult cases. But instances need not be repeated to show that personal individual influence is one of the mightiest forces of modern as of ancient missions.

2. *Public Preaching.*—This is the development of personal conversation—is, in fact, personal conversation on a somewhat extended scale. It is not oratorical, but conversational; not instructive, so much as hortatory. And it is universal. Not a few have the idea that preaching is taking a secondary place in the importance of modern mission work. In the large cities, schools, colleges, Bible houses, printing-presses, are often more prominent than the preaching places, and many a traveller passes through and reports that mission work, which is primarily concerned with saving souls, has become a means of diffusing education and civilization—all good in its way, but a departure from fundamental ideas. Thus a Christian man visited the city of Constantinople, saw Robert College, the Bible House, the American College for Girls, the school and dispensary of the Scotch Free Church Mission, etc., and said he was glad to see such good work being done, but was sorry to see so little preaching! The missionary said: "Come with me on Sun-

day." Then he took him from one end of the city to another, and in Stamboul, Scutari, Galata, Hasskeuy, showed him gathering after gathering, where preaching to audiences numbering from 75 to 300 was going on in Turkish, Armenian, Greek, Spanish, and English. The traveller went away, satisfied that missions had not made a new departure in that line. The same thing is true of every mission station in the world. Comparatively few of the missionary societies report the number of preaching places, partly for the reason that accurate statistics are almost impossible, partly because there is such a wide divergence of usage. If we take the term preaching place to mean a place where divine service is held regularly, whether conducted by a pastor, preacher, evangelist, or catechist, it is probable that the number will somewhat exceed the number of stations and out-stations. Thus, the A. B. C. F. M. reports 1,058 stations and out-stations, and 1,402 preaching places. Other societies, however, make the term station synonymous with preaching place, so that the proportion of the A. B. C. F. M. would not hold through the whole list. We may estimate the whole number of stations and out-stations at about 12,000. (The statistical tables of the "Missionary Review," December, 1889, give 10,609; but there were a number of societies from which no returns were secured, so that the above estimate is probably not far out of the way.) If we increase that by 10 per cent, it is probable that we shall strike a fair estimate as to the number of places where there is regular preaching, and this would give 13,200. In addition to these there are a large number of places where preaching services are held in connection with evangelistic tours, and in many sections of India and China there is not a little of public street-preaching. The fact, too, that there are fully 1500 to 1600 ordained preachers, and a very much larger number of unordained evangelists, catechists, etc., whose chief work is preaching, shows that it is relied upon as the great means of bringing the knowledge of the gospel within the reach of men.

Passing to the pastoral division, we find the preaching assuming more the character of that in our home churches. It is less conversational, more rhetorical; less hortatory, more educational. Its range of topics widens, and it touches upon every and all the various needs of society and the nation, as well as of individuals. Yet always and everywhere it is intensely personal: the man is never lost sight of in the community.

3. *Sunday-schools.*—These need no special description. They are carried on in much the same way as in home lands, exert much the same influence, and hold much the same general position, both in their evangelistic and pastoral use. An idea of the universality of their use is gained in the fact that in the report of the A. B. C. F. M. they are not classified apart from the churches and attendance, the rule being that wherever there are services there is a Sunday-school, with not far from the same average attendance. The American Baptist Missionary Union shows 521 Sunday-schools, with 9,072 pupils; the Methodist Episcopal Church (North), 1,944 Sunday-schools, with 112,928 pupils (including 710 schools and 43,569 scholars in the European missions, being 1,234 schools and 69,359 scholars in their dis-

tingtively foreign work). Of the British Societies the London Missionary Society reports 381 schools with 22,415 scholars; the Wesleyan Methodist, 694 schools, 35,698 scholars (in their foreign work as distinct from the Colonial and Continental); the Baptist Missionary Society does not give the number of schools, but reports 3,746 scholars. The Basle and Rhenish Societies report large numbers. The fact that they do not appear in most of the reports is by no means an indication that they are not widely used as an evangelizing agency. The chief hindrance lies in the lack of competent teachers, but that is constantly diminishing in force.

4. *Education.*—This is a broad term, and as used indefinitely creates not a little misapprehension. As used in regard to missions, it comprehends the whole system of schools, from the primary to the college, in which (except in the case of the theological seminary) the instruction is general, and covers the same subjects as are covered in the public schools, academies, and colleges of America and Europe, but always including some direct religious instruction. In the earlier stages of missionary enterprise this form of work was, at least in most cases, not thought to be consistent with its distinctive character as evangelistic. As the pastoral element increased, it became readily recognized as an essential, especially for those who were to take up the work that so increased upon the missionary's hands that he simply could not do it. Converts implied churches; churches needed pastors, and the contrast between pastor and missionary must not be so great that the people should not be willing to look to the former as their leader. And so on in all the grades of active work and church development. Education as a direct means of evangelization has come, however, to hold a more and more prominent place in the minds and plans of missionaries.

1st. It is an essential to the reading and understanding of the Bible, and upon the knowledge of the Bible conversion must depend in a great degree. Illiteracy in mission lands is extreme, and involves not merely ignorance of letters, but of words, as expressive of ideas. The child in a primary school who has learned to read has a higher grade of knowledge of Bible truth than his parent.

2d. It is a great assistant in the correction of false ideas, thus opening the mind to receive the truth. In many cases it is almost an absolute prerequisite to such appreciation of truth as must precede conversion.

3d. It secures a certain time during which positive religious influence can be brought to bear upon the individual, whether child or adult. This element of time, in which the old prejudices may be softened and new ambitions and hopes aroused, is one of the most important elements in the influence of education as an evangelizing agency, especially as it takes chiefly the young at a period when they are under formative influences.

Looking now at education as it is actually conducted, it is so similar to that in Christian lands as to scarcely need description. The concomitants of rooms, seats, floor, walls, windows, etc., are often different; but the textbooks are much the same, the methods are very similar. The kindergarten has not been confined to the Occident, but helps the Orient

as well; and every form of modern advance in style of instruction is adapted to the needs of Arabs, Hindus, Japanese, and Kafirs.

Grading is conducted on much the same principle as in other lands. Small villages have little more than the primary school, where children (and sometimes grown people) learn to read and write, and get some idea of the great realm of knowledge that opens before them. The larger towns and the cities have every grade up to the high-school. Boarding-schools are established for those who, having passed the lower grades in village schools, are anxious for higher education, or may be fitted for work as teachers. Colleges, too, with courses of study that may be most favorably compared with those of England and America, are founded everywhere, and exert not a little influence among those classes that do not attend the lower grades of schools.

In the same general line is the movement for industrial education carried out so fully by the Basle Missionary Society, and at Lovedale, South Africa (q.v.), by the Presbyterian churches of Scotland.

It is, however, in the second division of missionary work that the value of education is seen in its fullest degree, and in which it is carried to its highest grade of efficiency; and it is here that there has been the most discussion as to the wisdom of allowing it so prominent a place in missionary work. Without entering into the discussion, or even undertaking to give a detailed statement of the extent to which higher education is carried by the different societies, it is sufficient to say that it has been developed in direct proportion to the appreciation of this second part of missionary work. As long as it was felt that the work of the missionary proper ceased when a man was converted, so long it was felt and held that the higher education, while advantageous in itself, formed no legitimate part of the missionary society's work, but must be left to local organization or individual effort. When, however, it became more and more evident that the only salvation for the convert himself lay in his opportunity and ability to grow, and that that opportunity could not and would not be given or the ability developed unless the society lent a helping hand, then the high-schools and colleges sprang up on every side, until there is scarcely a society that has not one or more, while many have several. These are in many cases semi-missionary, i.e., they are under missionary auspices and general missionary direction, though supported partly if not entirely by distinct funds.

Looking at the special objects in view in this second division of pastoral work, we note especially—1. The furnishing of an educated ministry, which not only takes the place of the missionary, leaving him free for the work of superintendence, but enables the churches to be placed upon a more substantial basis of self-development and fits them for aggressive work. 2. It supplies an element of support to the ministry in the form of an educated laity, able to hold its own in matters of faith, resist any undue desire for ministerial authority (very natural in lands where the hierarchical idea has held a most prominent place), and exert a powerful influence in the community. 3. It helps to solve the question of social customs

by bringing the community in contact with the best results of society in other lands. This has its dangers as well as its advantages, yet it is a positive necessity. Customs of social life a people must have. If heathen ones are discarded, something must be provided to take their place. It is chiefly through the higher education that the best of Christian usages in social intercourse reach the people of non-Christian lands. 4. It places women in their proper relation in the home, the church, and the community. The occasion for the development of one of the finest institutions for girls on mission ground (the American College for Girls at Constantinople) was the feeling, as expressed by parents of the wealthier classes, that they wanted a Christian education for their daughters, which should fit them, not only for teaching, but for presiding in their homes. Any one who would accurately judge of the effects of this line of missionary work should follow those young ladies not only to the village life of Asia Minor and Bulgaria, but to the more pretentious homes of the cities. 5. It gives a proof unexcelled by any other, to the great mass of the indifferent in mission lands, that the gospel takes in the whole man and develops the best that there is in him. In these days of the telegraph and quick and easy communication, Christianity is judged by its ability to develop as well as to impart. Islam, Buddhism, etc., are losing their hold upon men largely by reason of their failure in this very regard, and Christianity is being watched most closely to see whether it meets the need. Robert College at Constantinople, the Syrian Protestant College at Beyrout, the Doshisha in Japan, the almost numberless institutions in India, are testifying to an element of power in Christianity before which old systems must soon give way.

5. *Publication* (see also Bible Distribution).—As an evangelizing agency the preparation and dissemination of Christian literature has always held a foremost place, and need not be discussed here. Its object is: 1. The presentation of Christian truth in such form as to attract the notice, stir the thought, and arouse the conscience of those who for one reason or another do not come under the personal influence of Christian workers. 2. To guide the thoughts of those who are already inquiring. Here especially the constructive spirit rather than the destructive is kept prominent. To put into the hands of a Moslem a tract attacking the character of Mohammed or the truth of the Koran would in most cases do more harm than good. Such tracts are indeed powerful instruments in the hands of those who know how to use them. The sledgehammer will do what nothing else can, but it must not be allowed to work indiscriminately, without special direction. The lines of publication followed by missionaries with a special view to evangelistic work are: 1. Tracts, setting forth in simple and attractive style some gospel truth, often in the form of narrative, so as to bring out forcibly the personal element. 2. Books explanatory of the Bible and Christian doctrine, emphasizing such points as have special relevancy to the needs of that particular people and place. 3. Periodicals, weekly and monthly. These latter are in many cases in the form of illustrated child's papers. The weekly papers have more of secular matter, but are always not merely evangelical, but evangelistic

in tone, and reaching, as they do, multitudes who hold aloof from direct missionary influences, are powerful means for Christian work.

In pastoral work missionary publications include the higher lines of theological and other text-books, and some general literature. There is not as much of this as there ought to be, chiefly because, in the great strain upon the time and strength of missionaries, only that is done which at the moment is most essential. As, however, higher education provides mature minds among the natives, this want is being supplied more fully.

II Turning now to those methods which are distinctively evangelistic or pastoral, we notice, as belonging to the former class,—

*Attention to physical and social needs*, including especially medical work. The relief of physical suffering, the supplying of social wants, is a department of missionary work where, except in the single item of medical work, classification is impossible. Acting upon the general principle that the state of the body affects most vitally the condition of the mind, missionaries in every land have adopted the various means now used so freely and successfully in the large cities of Europe and America. "The gospel of a clean shirt," or even of any shirt at all, has proved in many cases a most powerful one in lands where social customs were of the lowest. But even in communities where that particular form of evangelization was not called for there has almost invariably been need of more or less attention to these wants, in order to secure entrance to and appreciation of divine truth.

In the earlier history of missions, far more than now, persecution took a form that left the convert without even the means of subsistence. An excommunication that forbade the baker to sell him bread, meant more than trial: it meant starvation to the man who was bold enough to accept the new faith. In such circumstances the missionary was compelled to meet the emergency in such way as he best could. Of recent times that has not been so true; but the need has come in the form of widespread distress from deluge, famine, and pestilence. India, Turkey, Persia, and notably China, have repeatedly furnished instances where the supplying of material food has prepared the way for the reception of the spiritual, and hunger, cold, and nakedness have unbarred many a door hitherto held tight closed by prejudice and hostility.

Undoubtedly there is danger in this, and none are so quick to recognize it as the missionaries. How to give help without pauperizing, how to avoid the appearance of a bribe to accept Christianity, has required the most careful judgment.

Medical missions have of late come to the front as a direct element of missionary evangelization with a rapidity that makes one wonder that the church was so slow to recognize their value and power. Their general character is noted elsewhere (see Medical Missions); here we have simply to mention the varied forms in which they effect their work.

1. The most important end that they meet is the alleviation of physical pain, so that the soul can comprehend the force of the divine message. No one who has been in mission lands can have failed to see instance after instance where preacher and teacher have failed, but the doctor has succeeded, primarily by re-

moving the obstacles inherent in a diseased body, and by the positive attraction of gratitude for the kindness rendered.

2. The medical missionary is often a pioneer, securing entrance and acceptance where a preacher or teacher would be immediately rejected. This is especially true in such countries as China, where the prejudice against foreign influence is so strong as to yield to almost nothing else. Another notable example is found in the history of missions in Korea (q. v.).

3. The physician is often able to exert an indirect influence in favor of evangelical work by the prevention of hostility on the part of influential men. Notable instances of this have occurred in Persia, where the personal influence of such men as Dr. Asahel Grant and later of Dr. J. P. Cochran with the wild chiefs of the Koordish Mountains have undoubtedly availed much to prevent bloodshed, secure gratitude, and disarm prejudice.

The distinctively pastoral methods of mission work are chiefly connected with organization and superintendence, and cover the church, the family, and social and community life.

*Church organization* is one of the first of the distinctively pastoral duties of the missionary. The new converts cannot stand alone. For their own growth they need mutual support, and for their position in an unfriendly and often hostile community they need organization. It is not only natural but inevitable that that organization should take the form to which the missionary himself has been accustomed; and thus it happens that mission churches are in most cases the extension of the denominational differences of the home lands. It is, however, to be said that those differences are seldom if ever as sharply defined in foreign fields as at home; and except in case of divisions in the churches resulting from rival teaching, the members look upon them as formal rather than substantial. There are some cases where the form of church organization has been left almost entirely to the choice of the native community, with the result of an occasional departure from the denominational usage of the missionary. This is especially true of the missions conducted by the Congregational Churches of England and the United States. As a rule, however, the idea of the missionary has prevailed, not because he has felt tied to it, but because in it he can work to better advantage for the best growth of the church. The question of church organization has come up with some sharpness in reference to the work among the Oriental churches and in Papal lands. When missions were commenced in the Levant among the Armenians, Nestorians, Greeks, etc., there was no plan for a separate church organization. The old one, it was thought, was good enough, and it was far better to utilize that, introducing whatever of reform was necessary or practicable, but not severing historic associations, especially in view of the fact recognized by all, that their creeds were essentially in accord with modern faith. This, however, was found to be impracticable (see especially article Armenia); and as a matter of fact Protestant church organizations have been formed wherever Protestant missionaries have gone.

*Family life* on mission ground has always received the attention which has only recently been given to it in Christian countries as a

direct method of exercising Christian influence. This is true in almost every land, but is especially marked in those sections where the change has been from a complete paganism. The relations and mutual duties of husbands and wives, parents and children, form not only the theme of much earnest thought on the part of the missionary, but of much careful counsel. To raise the wife from the position of a slave to that of an associate; to develop in the husband and father the sense of responsibility for something more than the provision of the physical needs of those dependent upon him; to educate the children to a genuine reverence rather than an unthinking obedience; to give the home an identity as a centre of Christian life,—these are some of the problems which can only be met by the recognition of family life as a distinct method of pastoral work. The mere statement of them indicates their broad scope, but gives very little idea of the perplexity attending them. The transition from the old to the new must not be too abrupt or do too much violence to established customs. However much the missionary may deprecate the marriage of a Christian man to a heathen woman, it may be better to allow, or even to encourage it, than to give occasion for the charge that Christianity disregards the sanctity of the betrothal vow entered into before conversion. Even polygamy has to be treated carefully, lest the impression be given that the marriage relation itself is of light moment in the missionary's eye compared with the observance of customs with which he is familiar, but which seem to the convert unnecessarily harsh, especially in view of the biographies of the Old Testament. And so on in all the numerous relations which come out in bold relief when seen in the light of unaccustomed habits. Here we can merely indicate, not discuss or even explain in detail the different forms in which missions must work as they seek to confirm the new churches in their works as well as their faith.

*Social life*, or the relations of families with each other, may perhaps be considered as one of the problems rather than a method of missionary work or influence. It is, however, gaining increased importance in the eyes of those who are watching the development of Protestant Christianity in foreign lands. A man leaves his old faith and accepts the new one. He cannot, however, break away entirely from his old associations, which may include those dependent upon him—certainly those to whom he has duties. He meets them daily in home, in business, in the social circle, is bound together with them in many ways. He cannot if he would isolate himself from them. It is the old question of the times of the apostles, and creates as much perplexity now as then. To meet it wisely, and place the settlement on a firm, enduring basis, requires that the missionaries make a specialty of its study in all its bearings, and be able not merely to show where the old is wrong or weak, but to present something that shall commend itself to all as taking its place. That this is being done increasingly is evident to all who watch carefully the progress of thought as indicated in the discussions of missionary methods.

*Community and national life* are in most cases but the development of the social. There are fields, however, where they involve ques-

tions of still greater perplexity. Instances of this occur in Africa and the islands of the Pacific, and even in the Levant, wherever church and state are united, and political privileges depend upon ceremonial observances. In some cases practically new states have been formed, with their entire paraphernalia of offices and officers. When this has not been the case, still the new Christian community has invariably had a distinct if not a corporate existence, which has come to be recognized as an important element in rendering the position of the church complete and permanent. Here the missionary meets the questions of accord to unjust laws and the demands of unchristian governments. Each case cannot be settled merely upon its own merits: the very idea of a Christian's relation to the "powers that be" must be thoroughly thought out and clearly stated. Most marked instances of this have occurred recently in connection with the French and Spanish occupation of islands in the Pacific, where the firm, patient influence of the missionaries has been the only thing that prevented hostilities, which would inevitably have ended in loss of life if not of national existence. The Christian state, not so much as an accomplished fact, but as an ideal, is a most practical and important element in the methods by which Christianity is to be ultimately established.

That this statement of the methods of missionary work is complete, is not claimed. Many things will occur to those intimately acquainted with the subject which should have been mentioned. If, however, the impression shall have been given that missionary work is no mere haphazard carrying out of a vague although noble impulse, but a calm, determined, well considered effort on the part of the churches through their representatives to establish Christian faith, worship, and life on a sure foundation in every section of the globe, the chief end of the writer will have been attained. Some special items, such as the work of laymen, the community life, etc., will be mentioned under the head "Organization of Mission Work."

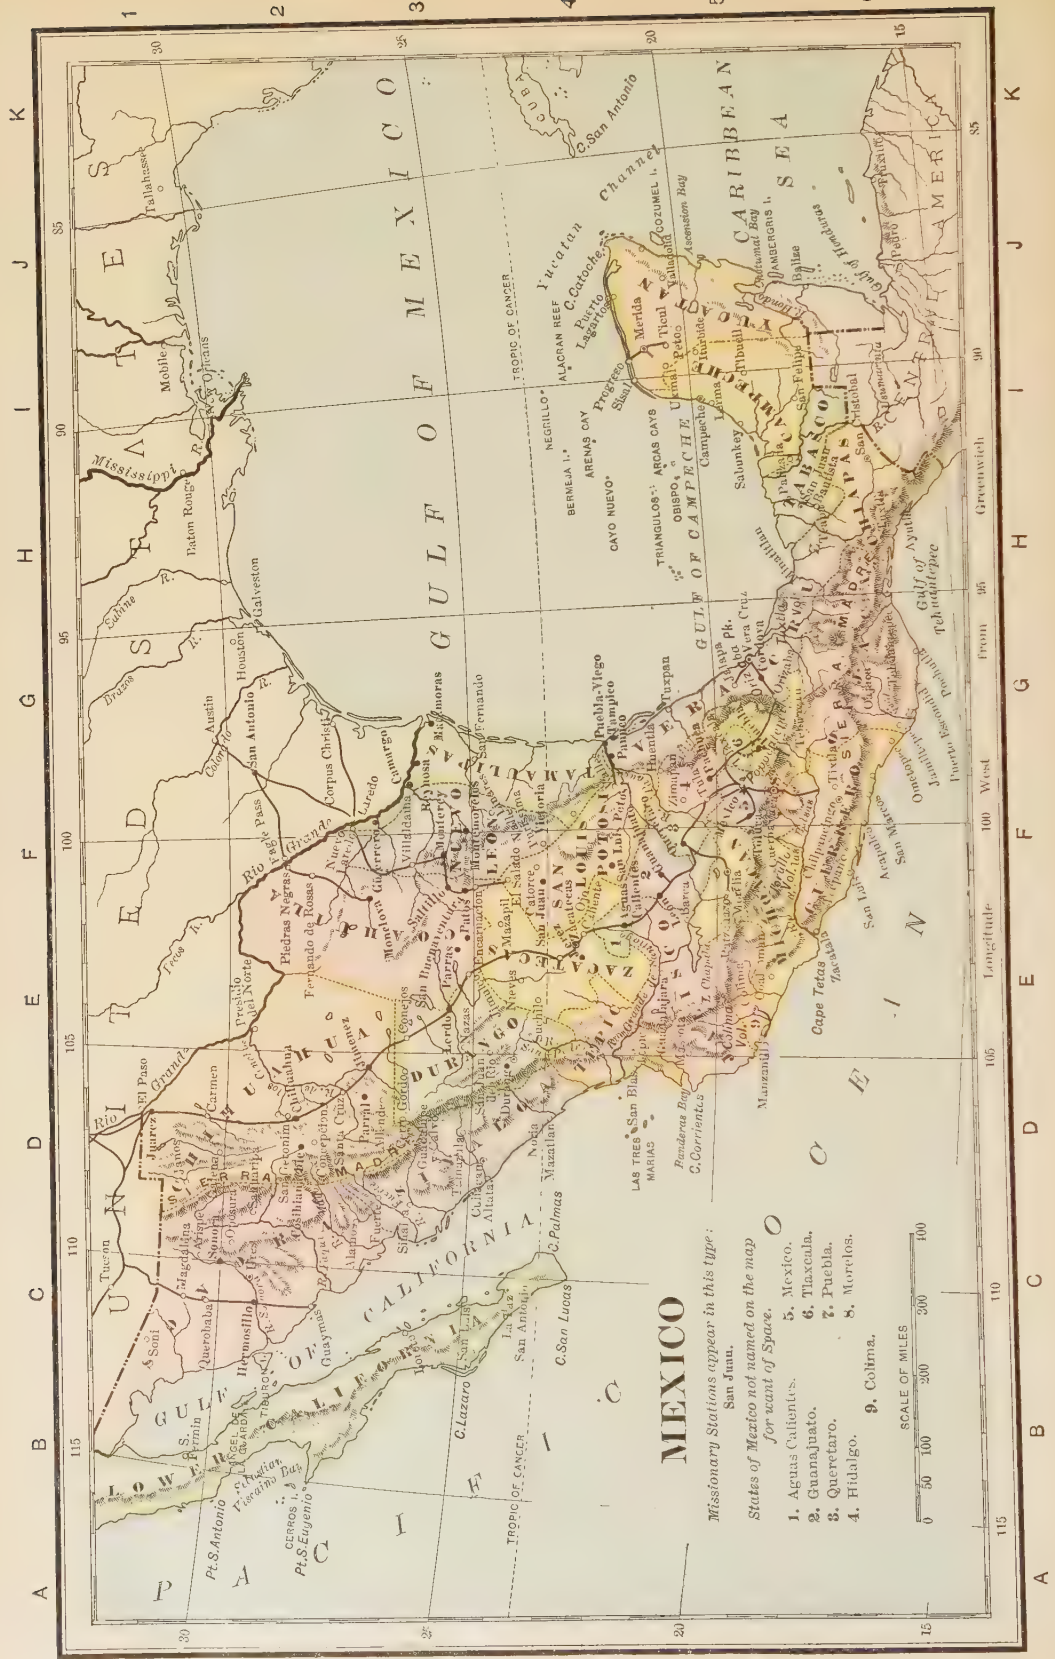

**Metla Kahtla**, northwest coast British Columbia, 30 miles south of Alaskan boundary. Fairly healthy, though damp and very changeable. Population chiefly Indians. Language, Zimshian. Religion, pagan. Condition of natives low. Mission station C. M. S. (1862); 6 ordained missionaries and wives, 1 bishop, 5 unordained missionaries, 17 native helpers, 8 out-stations, 7 churches, 250 church-members, 1 theological seminary, 6 students, 8 schools, 310 scholars.

The mission was begun by Mr. Duncan, a C. M. S. teacher at Fort Simpson, in 1857. The Zimshians are a very simple-minded, single-hearted people, a little credulous, very superstitious, and therefore very open to the seductive influences of the whiskey and vices of the white man. In order to protect his flock, Mr. Duncan moved with his converts in 1862 to Metla Kahtla, where he led them in the pursuit of agriculture, deep-sea fishing, etc. Good artisans of his acquaintance were induced to join the colony, which was at that time a well-ordered, progressive, and prosperous congregation of about 1,200.

guages, and is used by the Mexicans, for whom some priests are said to have translated portions of the Scripture at a very early period. But nothing is known of these translations. A version of the Gospel of Luke was made by Dr. Pazos Kanki, under the care of Mr. Thomson, the agent of the British and Foreign Bible Society, and printed in 1832. Latterly a fresh demand having arisen for the Scriptures in Mexico, a reprint was made by the American Bible Society in Mexico.

**Mexico.**—*Physical Geography.*—In form Mexico is shaped like a cornucopia, whose mouth opens toward the United States. As seen on the map it hangs as a receptacle below the great sister republic, and not as a ripening fruit above, destined to fall into its possession.

Mexico anticipated the United States as a European colony by about a century. Yet seventy years ago it was glad to copy our national institutions, and from that time to this, in spite of the restrictions of papal bigotry, it has continued to receive some of its choicest blessings from this country,—at the same time, as must be confessed, yielding up some of its most valuable territories by the arbitrament of war.

Mexico, as it now stands, is a country with nearly 6,000 miles of coast-line, more than two thirds of which are on the Pacific and the great Gulf of California. It has no navigable rivers. The east coast is peculiarly lacking in good harbors. It is, moreover, low-lying, and as a rule insalubrious. Mexico can boast but few islands, and those are insignificant in character or extent. The mountain ranges, which seem to form a sort of vertebral column throughout this hemisphere from Alaska to Patagonia, are prominent in Mexico, though cut off from the South American chain by the low-lying Isthmus of Darien. The high table-land intervening between the eastern and western branches of this great mountain range constitutes an admirable highway for railroad development and for international traffic—a fact which did not escape the eye of the great explorer and philosopher Humboldt. There is a vast portion of land in the country that can never become arable, but for this deficiency there are partial compensations: first, in the prevalence of mineral resources; and, second, in the fact that the coast is everywhere easily reached. With the establishment of artificial harbors and breakwaters, access can be found for maritime commerce, both on the Pacific and on the Gulf of Mexico. Yet the whole situation indicates that the chief commerce of the country must be carried on with the United States.

In the northern portions of the republic there are great barren expanses, which, though sufficiently level for tillage, are so lacking in fertility as to promise but a slender reward to agriculture. Farther south, and along the east coast, however, there is an affluence of fertility; and although the climate is often unhealthy, the fruitfulness of the country is such as to supply a large population, if need be, and a

lucrative commerce. In Michoacan and other still more southern States there are extensive forests of all the most valuable timber-trees.

The great lacustrine basins of Anahuac and Chihuahua, lying at elevations of from 4,000 to 7,000 feet, undergo great vicissitudes from alternate floods and droughts. But a general process of desiccation, due, undoubtedly, to the destruction of forests on the mountain tops, has gone on until in the valley of Mexico what was once an extended lake or a series of lakes is well-nigh dry.

The country is in many places volcanic, and from an elevated position in the city of Mexico one can behold several greater or smaller cones which are manifestly of volcanic origin, and near them extended plains of flinty lava. About the middle of the last century the mountain known as Jorullo, in the State of Michoacan, was thrown up about 1,600 feet above the plain by volcanic action.

A great transverse range running nearly at right angles with the northern and southern trend, and presenting the great peaks of Popocatepetl, Orizaba, and Ixtaccihuatl, though very old, is thought to be of more recent origin than the general ranges extending north and south.

The mines of Mexico, especially those of silver, have long been regarded as the richest in the world. It is said that for two or three centuries Mexico has produced at least one half of the entire yield of silver possessed by mankind. From 1537 to 1880 the total yield of this metal is said to have been nearly three thousand millions. The yield of gold in the same time has been nearly one thousand millions of dollars.

**Population.**—The entire area of the country is 763,804 square miles. The population was reckoned in 1880 to be 9,577,279. It has undoubtedly now reached 10,000,000, and may be divided as follows: Persons of pure Spanish lineage, 1,000,000; descendants of aborigines, 5,500,000; persons of mixed blood, 3,500,000; total, 10,000,000. In speaking of the Indian population, an able writer has justly said: "A wide difference exists between the Indians of the United States and British America and the so-called Indians of Mexico. They are a different race. The Mexican Indians are docile and industrious; they engage in agriculture, in mining, and in such rude arts as are practised in countries which do not enjoy the advantages of modern transportation. In all the wars in which Mexico has been engaged the Indians have constituted largely the rank and file of her armies. They are now enfranchised citizens under the laws of their country, and to the extent to which they are taxed they enjoy equal political rights with those of the Spanish race. While the Indians and the inhabitants of mixed blood comprise the menial class, yet from the ranks of the aborigines have sprung men of mark—men who have risen to distinction in science, in arts, in letters, in educational employments, in the church, in military life, and in the conduct of state affairs. Benito Juarez, the deliverer of his country from the Austrian usurper, was an Indian of full blood, and as a statesman and military leader he stood peerless among his countrymen. Morelos, who achieved fame in the early efforts of his countrymen to secure their liberty from the Spanish yoke, was also an Indian of full blood."

*The Ancient Inhabitants.*—The Toltecs, who preceded the Aztecs in the valley of Mexico, are supposed to have migrated from the north. Like other Indian races on the Western Hemisphere, they probably passed over the narrow channel known as Behring's Straits from northern Asia, and were attracted southward by more friendly climates and more abundant supplies of food. Ebrard has given good reasons for supposing that other migrations also occurred—perhaps in some instances by accidents—from Japan across the Pacific, and from Europe and Africa across the Atlantic. The Aztec civilization and that of the Mayas of Yucatan have many things in common with Eastern cults, and particularly with the hieroglyphic inscriptions of ancient Egypt.

The Toltecs were in some respects more highly civilized than the Aztecs, who finally conquered them. Their strength lay in the arts of peace as that of the Aztecs was developed by war. The terrible system of bloody sacrifice was established in connection with the warlike spirit of the Aztec conquerors. The Tezcucans, who entered into a triple league with the Aholcuans and the Aztecs, and were finally betrayed and conquered by the latter, presented the highest perfection of the ancient Mexican civilization. One of their kings was one of the grandest figures in history.

The Aztecs were characteristically a warlike race; and, like the Lombards in the Roman Empire, they took on the culture of the vanquished peoples. Like the Venetians, who, when driven by northern barbarians into the Adriatic, built upon the very lagoons and marshes a mighty dominion,—more invincible because built upon the marshes,—so the Aztecs, harassed at first by other tribes, took refuge upon a small island in the shallow lake of Tezeuco. This, gradually enlarged by driven piles and the dredging of their canals, became the impregnable stronghold from which they at length dictated terms to all their neighbors, till they had built up a great empire, extending from sea to sea.

At the time of the Spanish conquest this little island had become another Venice, intersected by numerous canals, having 300,000 inhabitants, and subsidizing the best civilization of all the tribes of Anahuac. And but for the onesanguinary blot of their religious system, we should think of the Aztecs with unmingled wonder and admiration. There is not space to speak of their early industries and skill, their agriculture and ingenious floating gardens, their jewelry and feather-work, their aqueducts and architecture, their chronology and their marvellous calendar whose intercalations quite equal our own in accuracy, their picture language and poetry, their humane laws and local courts, their kindness toward women, and their hospitals for their wounded soldiers; and after all the long history of bondage, many of these elements still remain in the character of their Indian descendants. No chapter of history is more pathetic than that which describes the invasion of Cortez and his followers in the early part of the 16th century. The combination of prowess and treachery, and the heartless cruelty inflicted in the alleged service of the Cross, have left an indelible blot upon the Christian name, and the Aztecs, in spite of their bloody religion, have the sympathy of mankind.

The three centuries which followed the conquest are historically a barren waste.

Cortez became an object of mean jealousy, and was misrepresented at the court of Spain, was baffled and persecuted till he had drunk the dregs of the very cup of ingratitude and heartlessness which he had given to the generous monarch of the Aztecs. The Indians were reduced to peonage on the great estates of the Spanish planters. Foreign bishops amassed fortunes, while the lower clergy of the native priesthood were allowed a pittance.

Immense estates were gathered into the hands of the church, which finally became the chief creditor of the nation. By deed or by mortgage one third of all real property was thus held, and the nation came under the thrall of the Church. This state of things existed till the spirit of liberty and independence was awakened within a comparatively recent period.

#### THE DAWN OF POLITICAL LIBERTY.

It seems wonderful that Napoleon I. should have been the man to strike at last the keynote of liberty among all Spaniards on both hemispheres; but so it was. There had been in all the colonies a sort of chivalric loyalty to the sovereigns of Castile, however severe their oppression. But when in 1808 Napoleon sent his armies into Spain and dethroned Ferdinand VII., placing the sceptre in the hands of a Bonaparte, the spell of loyalty was forever broken. In 1810 the standard of independence was raised, a patriotic priest leading the movement. By the year 1821 the independence of Mexico and several other Spanish-American states had been won, and by the year 1828 all the Spanish colonies on the Western Hemisphere had become free republics. But the work of reform was as yet only partial—religious liberty had not been achieved. The people had not learned that republicanism and ultramontaniam cannot co-exist; that the one encourages the enlightenment and free thought of the people, and cannot exist without them; while the other must exist by authority and repression. The result has been a succession of pronunciamientos, and a general insecurity.

But we come to another series of providences in relation to Mexico, and those too which have to do with our own history and with the general advancement of civilization.

In the year 1835 Santa Anna, then President of Mexico, brought about a *coup d'état*, by which the governments of the different States were abolished, and all the power was concentrated in the central government under his dictatorship.

Yucatan on the south and Texas on the north at once rebelled; and so grave was the Texan rebellion that Santa Anna himself was compelled to take the field. His armies attacked and dispersed the Texan Legislature; and prisoners of war whom they captured were mercilessly shot by his orders, thus rendering the reconciliation of the people of Texas forever impossible.

At the battle of San Jacinto, Santa Anna was vanquished and taken prisoner by General Houston, and for nine years Texas maintained her independence. In 1846 Texas applied for admission to our union and was admitted, and Mexico thereupon declared war upon the United States. The oppressive acts of the Mexican dictator were considered a first-rate pretext.

And besides, the fashion of our English cousins in making conquered nations pay the expense of conquering them was also thought to be the right thing to do; and so we concluded to defend Texas all the way from the Gulf of Mexico to the Pacific.

General Taylor appeared on the battlefields of Matamoras and Monterey. General Scott marched triumphantly from Vera Cruz to Mexico city. General Kearney was heard from in Arizona, and Fremont in California.

**THE ADVENT OF RELIGIOUS FREEDOM.**—Up to the year 1867 there was no religious liberty in Mexico. It is true that the Liberal party had in 1857 drafted a constitution demanding liberty of faith, abolishing conventual establishments, and confiscating church properties in mortmain; but they were not able to enforce them. Juarez, the president of the republic, was a fugitive, and the Reactionists were in arms against him.

How, then, was religious freedom at length established, and what were the influences which finally united the discordant political elements of the country, and achieved the more stable government of the present time? As Napoleon I. had unconsciously promoted the political independence of all the Spanish-American states a half-century before, so Napoleon III. became the unconscious leader in this later movement for religious freedom and political consolidation. He also attempted the dispensing of crowns and sceptres; and he also saw his efforts overruled for the very opposite results. The War of the Rebellion in the United States had furnished the opportunity. A Swiss banker had an exaggerated financial claim against the Mexican Government, which by the adoption of the banker as a citizen of France furnished the emperor with a pretext. England and Spain also had claims, and an alliance was formed for an armed intervention.

In 1862 the united fleets appeared at Vera Cruz with their contingents of men. But England and Spain soon withdrew from the enterprise and returned home. The French army under Generals Forey and Bazaine fought their way over the Cordilleras to the capital, where they established a provisional government known as the "Regency of the Empire." This virtual French Assembly submitted the choice of a ruler to the patronizing French emperor, who was politic enough to give it to the house of Austria, which he had defeated on the plains of Lombardy.

In the beautiful palace of Miramar, on the shores of the Adriatic, resided an Archduke of Hapsburg with his young and accomplished wife, daughter of King Leopold of Belgium and granddaughter of Louis Philippe. There the evil genius of French ambition sought him, and thither strange ambassadors, half Spanish and half Indian, came to offer him a crown. On the 10th of April, 1864, amid all the pomp of royalty, this ill-starred couple left their charming abode and embarked for Mexico. Stopping at Civita Vecchia, they paid a visit to the Holy City, where they received the communion and the Papal benediction, and were honored with a private breakfast with Pius IX. and Cardinal Antonelli.

They arrived in May at Vera Cruz. Their journey to Mexico City was one series of ovations from the clerical party. Having proceeded first of all to the great cathedral to

celebrate mass, they were escorted to the old Vice-regal palace, amid the ringing of bells and the rejoicing of the Reactionists that the republic was dead, and an empire was once more established.

But General Sherman was already on his march to the sea; and within four months General Grant received a sword presentation at Appomattox, which attracted the attention of France, and of all the courts of Europe. From that day everything went wrong with the French power in Mexico. It was patent to all men that the empire would prove a failure; and the French people especially were vexed at the stupendous blunder of their ambitious and meddling emperor.

Meanwhile, Maximilian and Carlotta had both sincerely endeavored to conciliate the people—he by special franchises, she by indefatigable charities.

But in July, 1866, matters had assumed so grave an aspect that the young empress, then only twenty-six years of age, set out with a few attendants to visit the court of France and remonstrate with Napoleon against the withdrawal of his support.

Receiving only discouragement, she passed on to her deserted castle of Miramar, which she reached in the midst of a dismal storm, as if the very skies would point the contrast of her return and symbolize the ruin of her fortunes. She next sought solace in a visit to the Pope; but even before she reached Rome her reason began to sink under its heavy burdens, and her wild fancy was that Napoleon had bribed her friends to poison her.

Meanwhile no means were left untried to reconcile the people to the empire. Efforts were made especially to excite jealousy toward the United States. The ravings of a subsidized Roman Catholic press on this subject were sometimes tragic and sometimes amusing. A favorite line of argument was that the United States were only impeding the imperial cause in order to secure the country for themselves. "You will soon hear," said one of these papers, "of schemes of annexation. The sordid and aggressive Yankees will overrun your land with their railroads and their sharp speculations. Your mines will be exhausted by adventurers, and all positions of profit will be monopolized."

Meanwhile the republic, which for ten years had existed, we might almost say in the person of a single man,—Benito Juarez,—had returned from its exile at El Paso to San Luis Potosi, and it became apparent that the final conflict would centre at Queretaro, half way between the latter place and the capital.

During all the years of the struggle with France this man, with a cabinet composed of Lerdo, Iglecias, and Mareschal, and with Senor Romero as his Minister at Washington, kept alive the cause of liberty among the people. Even when they were driven to El Paso on the northern border, they still held their organization as President and Cabinet of the Republic; and sending letters through the United States to friends in all lands, they assured them that their republican cause was not dead, but would certainly triumph in the end.

Their sublime faith and devotion doubtless had great influence in shaping diplomacy at Washington and in creating a reactionary sentiment against the empire even in Europe.

The spring of 1867 brought the beginning of the end. Maximilian's chief forces, with himself among them, were at Queretaro under siege. In an attempt to escape he was betrayed by one of his generals, placed under arrest, tried by a military tribunal, and with Generals Miramon and Mexia was sentenced to be shot.

In the trying scenes which followed, the character of this typical Indian president was well illustrated. Efforts were made by the United States and by the European consuls to secure a change of sentence. And when the wife of Prince Salm Salm, a member of Maximilian's staff, threw herself at the president's feet and clung to his knees as she poured out her entreaties, he wept in sympathy, while he declared himself powerless as a mere executive under the behests of the law.

It is a strange spectacle, a European princess at the feet of an Indian patriot pleading for the life of an emperor, and both weeping as the solemn fiat is uttered. And this is the man—this full-blooded American Indian—this is the man who for ten years of hard struggles had carried a republic in his head and heart, and who, both before and after that solemn hour, did more than any other to restore order to his distracted country. When, in a public reception, a captured French tricolor was spread for him to walk upon, he stepped aside. "No," he said, "the French are not our enemies—it is only their emperor. The French are our friends, and depend upon it that flag will yet wave over a republic." A prophecy which Juarez lived to see fulfilled!

With the establishment of the republic under Juarez in 1867 that religious liberty which had been proclaimed in 1857 was fully realized, and notwithstanding the efforts and the bitter persecutions of the Roman Catholic clergy, it has been maintained till the present time.

**THE RECORD OF THE PAPACY IN MEXICO.**—Even by the judgment of candid Roman Catholics, the religion of Mexico from the very beginning of the Spanish conquest has been a mixture of Christianity and heathenism, the latter often predominating. Abbe Dominic, chaplain of the Emperor Maximilian, a native of France, did not hesitate to pronounce the religion of the country a baptized heathenism, a mixture of superstitions, unworthy of the name of Catholic. Some of his utterances against the ignorance and immorality of the priesthood and their degrading ceremonies, as quoted in Abbott's "Mexico and the United States," are quite equal to the strongest denunciations which have been expressed by even the most prejudiced Protestant writers. For ages no religion except that of the Roman Catholic Church was known in Mexico. When the republic was established in 1823, and thence onward to the proclamation of religious liberty in 1857, an express provision in the constitution declared that the Roman Catholic faith was the religion of the state, and that no other could be tolerated.

One third of the real property of the republic came at length into the possession of the hierarchy. Conventual establishments for either sex were greatly multiplied. Mexico City might almost have been said to be a city of convents at the time when religious liberty was established. The people, wearied with the long dominion of an unscrupulous hierarchy, and

remembering that the church had been implicated in all the measures designed to overthrow the popular liberty, carried reform to an opposite extreme of intolerance. It confiscated a large portion of the church property, silenced the clangor of convent-bells which the public patience had so long endured, ordered the long robes and shovel-hats and other insignia of the priesthood and other sacred orders to be laid aside when appearing upon the public streets, and suppressed all public processions and various childish pageants. The Jesuits were banished from the country, as they had been at various times from so many nations of Europe. It is difficult for any who desire to be entirely candid, to decide whether the papacy, as it existed in Mexico fifty years ago, was on the whole a blessing or a curse.

It can hardly be doubted that although the Virgin Mary was almost made to take the place of Deity, yet enough of Christ was communicated to many souls to save them from sin and death. Yet the influence of the priesthood was declared by many who were residents in the country to be positively corrupting to the public morals. The licentiousness of their lives was scarcely disguised, and their exactions for the performance of the marriage ceremony were so oppressive, that to a large extent the masses dispensed with the sacred rite altogether, and with the poor, concubinage became the rule. The Bible was strictly kept from the people, or if found in their possession was burned as a poisonous and pestilent thing. In the desecration of the Sabbath the priesthood, by example at least, might be said to take the lead. The perfunctory ceremonies of the morning mass once over, they were among the promptest and most enthusiastic at the bull-fights. Gambling was a favorite pastime within the monasteries, and that excessive wine-drinking took the place of vigils and of fasting was too plainly indicated by the rotund figures and sodden faces of the padres whenever they appeared in public.

This easy-going life was not inconsistent with the most fiery zeal for dogma, and the bitterness that could persecute even unto death.

The priesthood of Mexico was in touch with the priesthood of Spain in the palmy days of the Inquisition. This institution was established in Mexico by Philip II., and the spirit of the infamous Torquemada did not fail to stamp itself upon the new continent, as upon the old.

When the Northern Methodist Mission purchased a confiscated monastery in Puebla in 1872, and proceeded to adapt it to their missionary uses, they found in the substructure skeletons of Christian martyrs who had been walled into their cells to perish from the sight and memory of men.

The people of Mexico, two thirds of whom were of Indian blood, were on the whole easily managed in matters of religion. The race had been thoroughly quelled and cowed by the bloodthirsty Spaniards, and after three centuries of oppression and toilsome bondage, coupled with dense ignorance, submission had become hereditary. Although revolts were frequent enough after the establishment of the republic, they were generally instigated by those who were wholly or in part of Spanish blood. The masses of the Indian population were spiritless, though there were noble exceptions, as in the

person of Juarez, who was of pure Indian blood. The old superstitions of the people were largely countenanced and utilized. To these were added the pleasing effects of the Catholic pageantry, of which the Spanish Mexican Church was so complete a master. Enlightenment was the last thing thought of, and truth was invariably sacrificed whenever circumstances required. An example is furnished in the legend of Our Lady of Guadalupe, whose miracle-working image is still seen in a church situated three miles from the city of Mexico. Candid Mexicans do not hesitate to relate how, when the Indians of the early day still bore a grudge against the conquering and oppressive Spaniards, against their religion and all that belonged to them, even against their fair-faced Queen of Heaven, the happy device was planned of miraculously producing the image of an Indian Virgin Mary. Through all changes this dusky goddess has remained one of the most popular of all images. She has performed no end of wonders, all of a merciful type. One apartment of the church above named bears witness to the miracles which she has performed for the distressed. Her picture is on the wall, and around it many other pictures illustrative of her wonderful works. In a corner is a stack of crutches said to have been left by cripples whom she had instantly healed. The whole scene is almost an exact counterpart to an apartment in the Buddhist Temple of Osakasa, in Tokyo, Japan, where an image of Quan Yen, the Buddhist Goddess of Mercy, is surrounded by similar trophies of her miraculous power. Meanwhile, even before the proclamation of religious liberty in 1857, the more enlightened statesmen of Mexico had come to feel the degradation which papal superstition had brought upon the country; and when upon the death of Maximilian the republic was restored under Juarez as president, the general protest of enlightened men became outspoken. Juarez was from the first in favor of the more enlightened influence of Protestantism, and every president since 1867 has exerted his influence for freedom of opinion. Among those of liberal sentiments there have been two classes—some undoubtedly more freethinkers, who cared for no religious faith, but were staunch supporters of freedom. Others, even though Catholics, have advocated liberty of thought, and welcomed Protestantism, not only because such freedom is the dictate of wise government, but because they believe that the disintegration of the one dominant mass of the papacy is more favorable to national liberty. Of this class was General Esquibedo, who in 1879 was heard to express his satisfaction at the introduction of Protestantism, because he believed that its influence, even its rivalries, would prove a benefit to the Mexican Catholic Church, and make it more like the Catholic Church in the United States.

**THE POLITICAL ATTITUDE OF THE PAPAL CHURCH.**—A Mexican's estimate of the part taken by the church in the achievement of political independence is as follows. While speaking of the past struggle for liberty he says: "Over against the leaders of the national uprising, bigotry reveals to us the haughty clergy united most intimately and firmly with our would-be oppressors, hurling their anathemas against the defenders of independence, and making their own the cause of the throne and of foreign do-

minion during the second decade of this century.

"It shows us also the real secret of that sudden desire for the independence of Mexico which in 1821, at the last moment of the struggle, seized upon our infuriated enemies. It was the hope of transferring hither the persecuted dynasty (of Castile) which was on the point of disappearing entirely amid the revolutionary convulsions of Europe; the intention of strengthening still more the dependence of the ancient colony upon the mother-country, converting it into a fief of the Spanish crown. Then came the war with the United States, a nation eminently Protestant,—more so then than now,—representing in 1847 in religious matters the most marked contrast with our country, which had not even yet rid itself of its uniformity of creed and of worship. What efforts, what diligence, what sacrifices were manifested in that epoch, a thousand times to be deplored, by these jealous partisans of religious uniformity!

"Did they summon their compatriots to arms in defence of the sacred cause of religion and their native land? Did they fly to the battlefields and fight heroically against the invader and the Protestant? No; the only thing which they did was to seduce to revolution the battalions of the National Guard, who, as the result, fought many days in the effort to overthrow the Liberal administration which was at the head of affairs, and these battalions actually were fighting in the streets of Mexico, covered with shame, at the very time when the North American squadron was bombarding night and day the port of Vera Cruz, that noble city which covered herself with glory in this struggle.

"Afterward came the French invasion, invited to our land by these same zealous partisans of religious uniformity who to-day figure as champions of national independence; and while the true and constant defenders of this noble and divine cause of the nation's liberty succumbed before the invader on the battle-field, or under the terrible sentences of court-martial, or amid the unspeakable horrors of exile, these false defenders of independence were receiving under a gorgeous canopy, at the gates of the capital, Marshal Forey, and were being appointed as regents by the invader, and were crowding their newspapers with the praises of the enemy. . . ."

Referring to the constant efforts of the church party in recent years to arouse the patriotism of the Mexican in the interest of the papacy, that historic foe of patriotism in all the struggles of the past, the same writer says:

"A party of this sort, which has always opposed the national independence, which has always sympathized with invaders, which indeed has united itself with them, even if it did not defend intolerance, has no right to invoke a cause so sacred and noble as that of national liberty. Let it set forth, at the right time and in the right place, its private interests, its opinions with reference to sect and its animosities; but let it not invoke that which it has never loved nor defended, not even when to do so would have been to defend also religious uniformity, as in 1847. For the rest, they have as absolute a right to defend their religious beliefs as the Protestants have to diffuse their principles."

THE PRESENT STATUS OF THE REPUBLIC. —A great advance in industrial and commercial resources has been made since the more complete establishment of the republican government in 1867 at the close of the Maximilian empire. The cause of public education has also greatly advanced since the separation of church and state. It certainly is not creditable to the Roman Catholic Church, which for more than three centuries had held dominion over the country, that the breaking of its dominion was the signal for a great advance in the education of the people. In the year 1857 the University of Mexico was abolished, and was replaced by special schools of law, medicine, letters, agriculture, mines, science, and a military college. There are now said to be 200 schools of the lower class in the capital alone, where formerly there were innumerable pageants and the constant din of church and convent bells, but very little that could promote the intelligence of the people. All this is changed.

In 1886 there were in the republic 11,000 primary schools with 600,000 pupils. Of these schools 9,236, with 470,000 scholars, were sustained by the federal or state governments, or by municipalities. The Lancasterian Society had 39 schools with 5,000 students; the Catholic parishes maintained about 1,000 schools with 100,000 children; the Protestant societies and missions were credited with 260 schools with 12,000 pupils, and there were 731 private schools in the republic with 26,000 pupils. There are not far from 2,500,000 persons in Mexico who can read and write. Mexico can now boast a larger proportion of her whole population in school than Austria, Greece, Portugal, or Brazil.

In an article entitled "Europeans in Mexico," published in November, 1882, by Señor Romero, Mexican Minister to the United States, he says in regard to his country: "From a bigoted, intolerant country, it has been changed into a liberal, progressive nation, and this could not have been effected without great effort, and without commotion and bloodshed to some extent. Neither England, nor France, nor other countries standing now at the head of the civilized world, could establish civil and religious freedom without revolution and bloodshed; but, once accomplished, all the purposes of revolution—freedom of religion, freedom of education, equality before the law, trial by jury, etc.—established, there is no political reason for revolution."

In an official report to the State Department of the United States, dated December 23d, 1882, Hon. David H. Strother, United States consul-general at the city of Mexico, said: "After fifty years of almost continuous wars and revolutions, the party of liberal opinions has at last definitely triumphed. The results of this triumph have been the complete separation of church and state, and the absolute subjection of the ecclesiastical to the civil authority; a political constitution based on the broadest republican principles; a free press, free schools, and universal religious toleration. Indeed the laws of the reform proclaimed in 1857, under Comonfort, and executed by Benito Juarez in 1867, after the downfall of the empire, are more thorough and radical in their character than those promulgated by any government of modern times."

All that was said of the stability and pros-

perity of the country in 1882 has been more than verified in the subsequent years. The railroad systems which had then connected the chief cities with the great lines of international traffic have been extended in all directions, and have given decided impulse to commerce, mining, and manufactures.

The country has so long been exempt from serious political disturbances, that the confidence of capitalists has been fully established, and the wealth which springs up with stable government has of itself become a strong conservative factor, and a new warrant for future prosperity.

The capitalists of the country cannot afford the luxury of the old-time pronunciamiento, and they are now a more influential class than the impecunious adventurers who follow political revolution as a profession.

The Catholic party have not ceased to re-echo the old cry of "patriotism" as a means of opposition to Protestant missions and all American influence, but the most enlightened statesmen have learned long ere this, that Protestantism is a better friend to Mexico than the Papacy. Nothing is more foreign to the purpose of Protestant missions than to promote annexation to the United States. The more free thought and general enlightenment of the people are promoted, the better are they prepared to maintain their independence. Such a result is the desire and hope of all Protestant missionaries for Mexico.

**The Era of Protestant Missions.**—For the beginning of the Protestant movement, we must go back to a period anterior to the proclamation of religious liberty. The seed-sowing of the truth followed immediately the rude ploughshare of the so-called Mexican war. The Bible was borne into the country by General Scott's army. This divine talisman, that had wrought such marvels in the civil and religious institutions of the Northern republic, was a stranger on Mexican soil. It was as novel as a falling meteor from another planet. The simple truths of the gospel were received by the people with a sort of hunger.

The American Bible Society had from an early period cherished a deep interest in Mexico, but almost nothing could then be done for the spread of the truth. But after the Mexican war direct effort was made to introduce the Word of God.

Rev. Mr. Thompson was employed as a Bible agent in Brownsville in 1860. Bible distribution was carried on in connection with the missionary work of Miss Melinda Rankin in Brownsville, Texas, in 1854. In 1866 she established a school in Monterey, Mexico. As an example of the way in which this word found its way and began to work like leaven, we may cite Ville de Cos, a mining community, in the State of Zacatecas.

An "ecclesia" like those of New Testament times was formed in a private house, where people met to read the Word of God in secret. The proclamation of liberty of thought in 1857 gave them courage, and the little company grew in numbers and in knowledge. Sending to Monterey for a clergyman, they received the rite of baptism, and organized themselves into a church.

They appointed one of their own number to conduct services and administer the sacraments. They were instructed and variously assisted

from time to time by Dr. G. W. Provost, an American physician of Zacatecas. By the year 1872 they had erected a church, and the number of communicants had risen to over a hundred.

A similar example of the leaven of Bible-distribution was found years later in Zitacuaro, in the State of Michoacan. A Presbyterian native preacher, Rev. Mr. Forcada, on commencing missionary work at that point in 1877, learned that a Bible depository had been opened there by a Mexican six years before, and that four hundred Bibles and many religious tracts had been sold. Thus the way had been prepared for an unexpected welcome to the missionary, and a most gratifying success. At present, within a radius of forty miles, there are sixteen congregations of Protestant Christians.

*Undenominational Missionary Work.*—Through the influence of Miss Rankin at Monterey the attention of Rev. Henry A. Riley was called to Mexico as a promising missionary field, and in 1869 he proceeded to the capital, where he found the harvest ripe beyond his expectations. He began his labors under the auspices of the American and Foreign Christian Union, and he succeeded in purchasing at a low price a valuable confiscated church property. Meanwhile an important movement had already begun in the city of Mexico, where a few prominent priests openly avowed their renunciation of the Roman Catholic dogmas and corruptions.

The first was Francisco Aguilar, a man of great fervor and eloquence. Alarmed at his boldness and success, a fellow-priest, Manuel Aguas, set out to prepare himself to refute the teachings of Aguilar, who had already been joined and encouraged by Mr. Riley. While Aguas pursued his investigations in search of arguments, he himself became a convert, and a most successful preacher of the gospel. Unfortunately for the cause which they had espoused, both of these eloquent men died after a brief career. The converts who were gathered by Father Aguas were organized into a church based upon the doctrines and order of American Episcopacy, and known as the Church of Jesus.

This church now reports "29 mission stations, served by five ministers (of whom 4 are natives) and 9 teachers (of whom 6 are natives). It embraces about 700 communicants and 2,700 members. In the mission schools there are 68 boarders and 121 day scholars. Mrs. M. J. Hooker is in charge of the girls' orphanage, and Mr. Hernandez in charge of the training school."

The Advisory Committee in the United States, appointed by the Right Rev. H. C. Potter, D.D., L.L.D., Bishop of New York, consists of Revs. Henry Y. Satterlee (president); Geo. F. Flichtner (secretary); G. Williamson Smith, J. H. Eccleston, David H. Greer; lay members, Thos. P. Fowler, Alexander Orr, E. P. Dutton and John H. Boynton (treasurer).

*The Missions of the Presbyterian Church (North).*—In 1872 the Presbyterians sent three men and four ladies to establish stations at San Luis Potosi and Zacatecas. While stopping at the capital they were requested to adopt and assist a congregation then worshipping under the care of a convert from Romanism, Senor Palacios.

This led to the establishment of a station in

Mexico City. In January, 1873, Rev. M. N. Hutchinson and wife were sent to take charge of the station. Rev. Henry C. Thomson was in the beginning stationed at San Luis Potosi, and Rev. Messrs. Paul Pitkin and Maxwell Phillips and their wives established themselves at Zacatecas, where a prosperous work had already been begun by Dr. G. W. Provost. The Presbyterian Mission in Mexico has had a checkered history, often diversified by persecution, mob violence, and martyr deaths. In two instances the lives of missionaries have been attempted, but in both the mob failed of their purpose. Many native Christians, however, and three or four native preachers, have fallen as martyrs to their faith. In all cases the ignorant murderers have been instigated by the priests, who were only careful to accomplish their murderous purposes in such a way as to save themselves from the hands of justice.

Characteristic features of the Presbyterian Mission have been the large number and the ability of its native ministry. A prosperous theological seminary is now conducted by Rev. Messrs. Thomson and Brown at Tlalpam, twelve miles from the capital. Two flourishing girls' seminaries are also in full operation—one in Mexico City under the care of Misses Bartlett and De Baun, the other conducted by Wheeler and Elliott at Saltillo. This institution has sprung from the germ planted by Miss Melinda Rankin at Monterey. It was placed by her under the care of the American Board of Foreign Missions, by which it was subsequently transferred to the Presbyterian Board.

The present statistics of the Presbyterian Mission in Mexico are as follows:

Ordained missionaries, 7; lady missionary helpers, 4; ordained natives, 25; licentiates, 25; native preachers and helpers, 53; churches, 90; communicants, 5,165; added during the year, 388; boarding-schools, 2, with 88 pupils; day-schools, 40, for boys and girls, with 1,270 pupils; theological seminaries, 1, with 15 students; pupils in Sabbath-schools, 1,709; contributions, \$3,627. The press, under the able management of Dr. J. M. Green, has issued 13,000,000 pages during the year, and the bi-weekly paper, "El Faro," has been widely read. The missions of the Board extend to 12 States.

*Mission of the Methodist Episcopal Church (North).*—This mission was established in 1873 in Mexico City. Fortunate purchases of property were secured at an early day in the capital, at Puebla, Cordova, Pachuca, and at other important points. The policy pursued has been the always wise one of laying strong and permanent foundations. Great attention has been paid to education and to the work of the press. An attractive illustrated Christian paper has been among the most effective agencies. The Mexican report of the Missionary Society of the Methodist Episcopal Church (North) for January, 1890, gives: foreign missionaries, 10; assistant missionaries, 9; missionaries of the Woman's Foreign Missionary Board, 8; native ordained preachers, 10; native unordained preachers, 27; foreign teachers, 3; native teachers, 26; workers of the Woman's Foreign Missionary Society, 27; other helpers, 27; communicants, 1,286; probationists, 757; adherents, 4,599; converts during year, 120; adults baptized, 143; infants baptized, 123; theological seminaries, 1, with 2 instructors and 5 students; high-schools, 3, with 12 teachers and 147 pu-

pils; day-schools, 36, with 2,199 pupils; churches and chapels, 19. The press has issued over 3,000,000 pages. The estimated value of churches and chapels is \$89,200; there are 35 places of worship and 15 parsonages. Parsonage property is reported at \$100,800; property in orphanages, hospitals, schools, etc., \$106,240; making a total of nearly \$300,000; 8 different states are occupied.

*The Methodist Church (South).*—This branch of the Methodist Episcopal Church began missionary work in the city of Mexico in 1873, under the general direction of Bishop Keener. Olijó Hernandez, a converted Mexican, was an active laborer. Rev. J. T. Davis was soon appointed. In 1878 W. M. Patterson, D.D., was appointed superintendent of the mission. Evangelistic work has been pushed forward with great vigor. It has greatly multiplied its stations, and the number of its evangelists—not without corresponding results. Its roll of communicants is relatively large. The reports of 1888 show in the Central and the Border Mission: missionaries, 10; native preachers of all grades, 89; communicants, 3,095; Sunday-schools, 90; 17 States are occupied.

*The American Board Mission.*—The opening history of the work of this Board in Mexico was marked by sad disaster. Its first missionary, Mr. Stevens, was killed by a mob at Almaluco in 1874. One of his first converts shared his martyr's crown. Nevertheless a strong mission has grown up from that sanguinary beginning. The American Board has 16 missionaries, 10 churches, 323 communicants, of whom 74 were received last year, 6 schools, with 176 pupils.

*The Southern Baptist Convention* reported in its missions in Mexico in 1889, 15 missionaries including wives of missionaries and unmarried ladies. Its stations are located in the States of Coahuila, Zacatecas, Aguascalientes and Jalisco. The statistics of the work show 16 churches, with 572 communicants, and 102 pupils in schools. This mission has not escaped the fires of persecution. Many assailments have been made with a view of breaking up its religious services, and in December, 1881, Rev. J. D. Westrup, a newly appointed missionary, was murdered by the Indians. On the other hand, this mission has received some special encouragements. The governor of Coahuila has shown much sympathy with its efforts in the line of female education. A large and flourishing girls' school is now maintained at Saltillo.

*The Presbyterian Church (South)* has a mission in Mexico in which, according to the report for 1889, there are 6 missionaries, including ladies—communicants, 400; native ministers, 8; pupils in day-schools, 150; Sunday-school pupils, 250; contributions, \$875. Its chief work is on or near the northern border. The stations are Brownsville, Matamoras, Montemorelos and Linares.

*The Society of Friends* established a mission in Mexico in 1871. It is now carrying forward work in the state of Tamaulipas.

*The Associated Reformed Presbyterian Synod of the South* has also a mission extending to two of the Mexican States.

There are in all 150 foreign Protestant missionaries in the country, 360 native laborers, 400 congregations, 15,000 communicants, 4,000 pupils in schools, and 6,000 Sunday-school pupils.

Mexico, is beautifully situated on a plateau 7,500 feet above the level of the sea, in the Tenochtitlan valley, not far from the lake Tezcuco. Population, 241,100 (1880), comprising Spaniards, Aztec Indians, and all gradations of mixed races. In the midst of lofty mountains, the climate is temperate and healthy. The streets are well-paved, broad, and well-lighted, and raised paved roads, called *paseos*, which lead out into the country, and are shaded on either side by fine trees, add much to the natural beauties of the place. The Roman Catholic religion is the state religion, but other religions are tolerated. In addition to the many churches, monasteries, convents, and other religious or benevolent institutions are plentiful. Schools and colleges, theatres, and the buildings for the government offices give the city the usual modern appearance. Street railways are in operation. Of the railroads, the Mexican Central, Mexican National, Mexican, and Morelos railroads run into the city. Protestantism is represented by the following missions: Methodist Episcopal Church (South) (1886); 3 missionaries and their wives, 21 out-stations, 17 churches, 445 communicants, 18 Sunday-schools, 337 scholars, 7 other schools, 269 students, 1 theological seminary, 10 students, 5 girls' schools, 110 scholars. Methodist Episcopal Church (North), 1873; 1 missionary and wife, 2 other ladies, 219 church-members, 145 Sabbath-scholars, 128 day-scholars. Presbyterian Church (North); 2 missionaries and wives, 2 other ladies, 2 native preachers.

**Meyer, Philip Lewis Henry**, b. at Newwied-on-the-Rhine, Germany, November 13th, 1826, of earnest Christian parents. At his confirmation in 1840 the love of Christ mightily took possession of his heart. Successively a cabinet-maker, a school-teacher, a student of medicine, he was thus variously qualified for mission service, and received a call to South Africa in 1854. He was ordained July 16th, 1854, married Louisa Gregor, daughter of a missionary, and reached Cape Town November 3d the same year. He found the mission stations at Shiloh and Goshen in ashes by a recent Kafir war, and commenced rebuilding at once, studying the Kafir language, teaching the natives handicraft, and inculcating gospel truths. In 1859 he built a new station, not far from Shiloh, in a plain watered by the river Engoti, and called it Engotine. "The desert was changed into a beautiful village surrounded with gardens and fields, and the outward change was a type of the spiritual transformation." Now he might be seen at the hardest manual labor, now hastening to a Kafir kraal to tell the glad tidings of salvation. Disease and drought brought great hardship to the natives, in which the missionaries gladly shared, seeing that the Lord used these means to open the hearts of the people to their influence, and the reception of the gospel. In 1869 a call came from Zibi, chief of the Hlubi Kafirs, 240 miles from Engotine, to come and teach his people. Receiving this as a call from the Lord, he set out with Samuel and Luke, native Christians. They went through great dangers and hardships to settle with him. War followed, and its worst perils threatened them. The chief and people, after being routed, forsook the region, and for two years the missionary and his family dwelt in solitude, except as Mr. Meyer went

**Mexico**, the capital of the republic of

from time to time to preach to the chief and his people in their mountain fastnesses. A great work of grace followed, and when peace was restored many from neighboring tribes came to listen to the gospel. A church-building was erected, a church formed, a school followed; in all things the missionary was friend and counsellor, and his house was thronged with people seeking advice in things spiritual and temporal. Mr. Meyer was permitted to found one more mission, but his health failed, and he was obliged to return to Europe. After severe suffering he received his release at Marburg, Germany, August 2d, 1876.

**Mhow** (Mhau), city in Malwa, Central India, 13½ miles from the city of Indore. Population, 27,227. Hindus, Moslems, etc. Mission station Methodist Episcopal Church (North); 2 missionaries, 11 native helpers, 2 schools, 95 scholars, 19 church-members. Presbyterian Church in Canada; 1 missionary, 2 ladies, 300 Sabbath-schoolers, 320 day-schoolers.

**Micronesia**, a section of Australasia, north of the equator and between 130° and 180° east longitude, including the Gilbert (Kingsmill), Marshall (Mulgrave), and Caroline Islands, the Marianas (or Ladrões), and Bonin Island, the Radack and Ralick chains, and many other small atolls and groups. These latter have been colonized by the Spaniards, and the native races are nearly extinct. With few exceptions the islands are low atolls of coral formation. The groups vary in extent—from the single islet half a mile long to the extensive archipelago enclosed by a coral reef 200 miles or more in circumference. The depth of the island-studded lagoon thus enclosed varies from 5 to 100 fathoms. Some islands are accessible to the largest ships, having good channels through breaks in the reef, and furnishing commodious harbors; while some have channels which cannot be entered with the prevailing winds, and others are entirely enclosed by reefs and have no anchorage. Ocean currents with frequent calms render navigation very uncertain and often dangerous. The area of land in any of these atolls is insignificant compared with the size of the lagoon or the extent of the supporting reef. The land, ranging in elevation from 5 to 20 feet above high-water mark, is composed of coral rocks and sand washed up by the waves, and forms a series of islets resting at varying distances from one another upon the reef. At high tide the waves roll over the reef at a depth of 4 to 10 feet and between the islets into the lagoon, while at ebb tide the reef is bare, and furnishes a connecting pathway from islet to islet, except where it is broken by a channel. (Ebon, of the Marshall Islands, for example, is a ring of reef 25 miles in circumference. Upon it rest 18 islets, the longest being about 6 miles and the shortest but a few yards in length, while the width of land averages about one half mile, and the fringe of reef on either side is 1 or 2 furlongs more.) Some of the islets are 20 miles in length, and in some cases there are long stretches of reef with no land upon it. The average area of land in the atolls is probably from 5 to 10 square miles.

The flora of the atolls is exceedingly poor, but varies according to situation with reference to the belt of precipitation. The cocoa-nut palm abounds everywhere, and thrives even where the roots are washed by the sea-water.

It furnishes the natives food, shelter, and sometimes clothing. It is the principal article of commerce, copra being shipped in large quantities from all the islands. The pandanus is also found everywhere, and furnishes food in its season; while the leaf, green and ripe, is used for braiding mats, hats, sails, etc., and is the principal roofing material on the atolls. Except on the Gilbert Islands, the bread-fruit is plentiful, and bananas are cultivated. The timber of the bread-fruit is valuable for the construction of canoes and for some building purposes. A coarse kind of taro is also cultivated. The islands are all wooded, and those within the belt of constant precipitation have a dense growth of (mostly) low trees and shrubs. On some there are wells rising and falling with the tides, but foreigners depend upon rain-water, there being no fresh-water streams.

The high islands of volcanic origin are Kusaie (or Strong's Island), 2,300 feet; Ponape (Ascension), 2,800 feet; Ruk (Hogolu); and Yap. These have the physical peculiarities of the atolls, only that the lagoon is replaced by elevated land. Ruk is an immense lagoon about 100 miles by 40, with 10 large islands (some nearly 300 feet high), and many islets. These are very fertile, and are well supplied with food. Besides the flora already enumerated, we find on the high islands yams, taro, pine-apples, sweet potatoes, sugar-cane, and a great variety of bananas. Many tropical trees and plants have been introduced, and all the tropical flora would flourish. On Ponape and Kusaie are many beautiful streams and cascades, furnishing abundance of pure water. The fauna of the atolls consists of a few birds (mostly aquatic), lizards, and rats. Pigs and chickens have been introduced, and everywhere thrive. The fauna of the high islands is much richer, including many varieties of birds, some of beautiful plumage and some good for food. Pigs and chickens have there relapsed into the wild state. Dogs and cats have been introduced, but deteriorate rapidly. Goats thrive and cattle to some extent, but only on the high islands. The temperature ranges from 72° to 90°. (On Apaiang, 80° to 90°; Ebon, 75° to 87°; Ponape, 74° to 87°.) Fish are taken in great abundance in their seasons, and the most beautiful shells in the world are found on the reefs. The people are of the brown Polynesian race, but bear traces of a constant addition from a variety of sources. The languages are quite distinct in the different groups, but have some peculiarities pointing to a common origin. They are simple in construction, easily acquired, yet quite difficult to reduce to writing because of the shading of sounds, and also on account of the presence of close consonants at the end of words. Five of these languages have been reduced to writing. Portions of the Bible, hymn-books, and various school-books have been printed. Some of the dialects are very expressive, and though not having extended vocabularies, are rendered flexible by the use of pronominal suffixes, verbal directives, and terminations to indicate place and to express comparison. Degraded in past usage, the introduction of Christian ideas means resurrection to the language no less than life to the people.

The religion of the islanders was not greatly unlike modern spiritism, and their social usages imposed no family ties. Polygamy was tolerated among the chiefs, but not very exten-

sively practised. No marriage ceremony was known. Men and women lived together until the caprice of one or the other separated them. The children belong as much to all the sisters of the mother and brothers of the father as to their own parents; and the children of brothers or of sisters continue to be counted brothers and sisters through all generations. The chiefs received their rank from the mother. On Ponape and some other islands the language varies in its use, according to the rank of the one addressed.

The forms of government varied, but were all founded on the idea of the aggrandizement of the chief rather than the good of the subject. Human life was lightly regarded, and even petty chiefs sent many a victim to the executioner.

Licentiousness prevailed, and chastity was almost unknown. The seeds of disease planted in such soil by vile white men resulted in such a spread of disease that none escaped, and the taint reappears in the successive generations. Cannibalism was not practised, except on rare occasions in time of war.

The people were little if any clothing, though the habits of different groups show great variety. In the Gilbert Islands men had no covering of any kind; the women wore a fringed skirt 10 or 12 inches long, the children being nude. In the Marshall Islands men wore a fringe skirt 25 to 30 inches long, and the women two mats, about a yard square each, belted about the waist. Upon the Caroline Islands some covering was used. The dwelling-houses were mere shelters of simple construction, though the council-houses were large. Their canoes vary greatly in construction. Those of the Marshall and Mortlock Islands are large, and adapted to making long sea-voyages. An outrigger is always used. These sea-going crafts were all of hewn timber, the pieces fitted together and fastened with cord made of the cocoa-nut fibre. Ropes were made of the same and the sails of matting. The natives were skilful navigators, some of them seeming to have an intuitive perception of locality, and an instinct of the proximity of land while yet many miles out of sight of it; yet whole fleets have been often lost, and canoes sometimes drift about for days and weeks to reach land at last hundreds of miles from home. Such occurrences suggest how the islands may have been peopled at first, and account for the mixed character of the population. Missionary work was begun on Ponape and Kusaie (Caroline group) in 1852 by three American missionaries (L. H. Gulick, A. A. Sturges, and B. G. Snow) with their wives. They were accompanied by two Hawaiian missionary helpers with their wives. The first five years were discouraging. Many times the enterprise seemed ready to fail. Opposition of foreigners (self-exiled and more degraded than the natives), small-pox on Ponape, insurrection on Kusaie, disastrous results of contact with the whaling fleets, and the dense paganism of the natives themselves had all to be overcome by the faith of earnest men. Three more missionaries (G. Pierson, E. T. Doane, and H. Bingham) with their wives joined the mission, and the first "Morning Star" was built. The year 1857 saw Apaiang (Gilbert Islands), Ebon (Marshall Islands), and Kusaie and Ponape (Caroline Islands) occupied by six mission families with two Hawaiian helpers.

During the next five years (1857 to 1862) the harvest began. Three churches were organ-

ized. The one on Kusaie, with 30 members, was left in care of a native helper. The missionary force was reduced to three men with their wives and five Hawaiian assistants. During the next nine years the work of teaching, translating, and laying foundations went on. The churches on Kusaie and Ponape witnessed a steady growth. Five of the Marshall and five of the Gilbert Islands were occupied by Hawaiian missionaries under the direction of the Board of the Hawaiian Evangelical Association (see Hawaiian Board). In 1870 the number of church-members was as follows: Ponape, 250; Kusaie, 226; Marshall Islands, 140; Gilbert Islands, 51; a total of 667. There had been printed for these missions nearly 2,500,000 pages of Scripture, hymn-books, etc. (2,408,218; viz., Ponape, 381,600; Kusaie, 223,200; Marshall Islands, 381,726; and for Gilbert Islands, 1,050,192).

From 1869, when the second "Morning Star" was wrecked, till 1871, there was only one white missionary in the field (Rev. E. T. Doane, Ponape). This was a time of preparation for the advance to be made during the next decade.

In 1871 the third "Morning Star" carried as passengers from Honolulu the three veterans, Messrs. Sturges, Snow, and Bingham, one new family from America (F. T. Whitney and wife), and three Hawaiians—these last for Gilbert Islands. In 1873 the "Morning Star" visited the Mortlock Islands and stationed three Ponapeans with their wives, inaugurating that movement which in later years yielded such wonderful results.

In 1874 three more men (H. J. Taylor for Gilbert Islands, R. W. Logan and F. E. Rand for Ponape) with their wives joined the mission. More attention was given to establishing training-schools and developing the native agency. In 1877 E. M. Pease, M.D., and wife were sent to take the place of Mr. Snow, who was taken from the work by a paralytic stroke; and in 1880 A. C. Walkup and wife accompanied Mr. Taylor, returning to his work on the Gilbert Islands. The same year the Marshall Islands training-school was removed to Kusaie. The reports for 1880 give nearly 2,000 church-members, 45 pupils in the two training-schools, and 1,500 in other schools.

During the last decade there has been a constant increase of both hearers and converts. The training-school for the Gilbert Islands was removed to Kusaie. Girls' schools were established at Kusaie and Ponape under the care of lady missionaries sent out by the various women's boards. Political changes during this period greatly affected the missions. In 1885 Germany annexed the Marshall Islands. She attempted at the same time to take possession of the Caroline Islands, but was prevented by Spain's claim of long standing. The Spanish occupation of Ponape resulted in such acts of injustice and persecution that the natives arose in self-defence. The governor had already sent one of the American missionaries (Rev. E. T. Doane) to Manila under arrest. When he was released and returned to Ponape it was found that the governor and many of his soldiers had been slain, and the natives were in possession of the Spanish quarters. A new governor was sent out, who, after investigating the matter, recognized the injustice of his predecessor, and proposed terms that the mission was able to indorse, and thus peace was restored without further bloodshed. The scattered churches

were gathered again, and the schools opened; some of the converts under pressure renounced the truth, but the steadfast faith of many of them greatly encouraged the missionaries.

In the Marshall Islands the German rule is oppressive. The heavy taxation is impoverishing the people, while frequently the assertion of their rights by the people is regarded as an offence, and punished with heavy fines. The result so far of foreign intervention has not been beneficial to the natives. The sale of liquor, tobacco, and firearms by unscrupulous foreigners, both before and since annexation, has fostered old and developed new vices among the people.

The latest reports of the mission (January, 1890) give a total membership of 4,509; three training-schools with 79, and 48 other schools with 2,035 pupils.

The estimated population of Micronesia is 84,000: Gilbert Islands, 25,000; Marshall Islands, 15,000; Ponape and adjacent islands using the same language, 5,000; Ruk and Mortlocks, 15,000; islands lying between Ruk and Yap, 7,000; Yap, 10,000; Palau, 7,000. Of these perhaps 50,000 have heard the gospel; about 8,000 have become converts, and twice as many more call themselves Christians. This work has been accomplished in less than 40 years. There have been employed of American missionaries and assistants a total of 40, viz., 15 ordained missionaries, 17 wives of missionaries, and 8 single women. Three missionaries and 5 wives of missionaries have died; 6 missionaries, 6 wives of missionaries, and 1 single woman have withdrawn. The present force (May, 1890) is 20, of whom 2 are at the Hawaiian Islands, and 6 others are in America on account of failure of health.

The changes which have been wrought through the efforts of the missionaries are truly wonderful. The transforming power of the Word of God has never been more manifest than in this field. There has been a marked development of stability in the character of the natives. Formerly they were dishonest and untruthful. There was a belief among them that the Great Spirit used deceitful means for the accomplishment of His plans or for maintaining His authority, and the people accordingly cultivated deceit. Ships were often pillaged and the crews murdered. But the gospel has in many islands effected a complete revolution. Social ideas have been changed. The family has been built up, and the ceremony of marriage is becoming more and more common. The practice of family worship has done much to purify and crystallize social ideas, and a strong sentiment of his duty to guard the household and defend his family from the lust of even the chiefs is rising in the mind of the head of the household.

Drunkenness has prevailed to some extent on all the islands—more on the Gilbert Islands than elsewhere. On the Marshall Islands this vice was unknown until the advent of foreigners, and became prevalent only after many years of contact with them. Prohibitory enactments have been made by some of the chiefs of the Marshall Islands against the traffic in ardent spirits. These still serve a salutary purpose, though they have been greatly modified and weakened under German rule. Some of the disputes with the German authorities have

grown out of the desire of the natives to stop the traffic in fermented as well as distilled liquors.

Better dwellings, greater personal cleanliness, and tidiness have also followed the moral reformation. Intellectual progress is quite marked. The schools are well attended. Native teachers have done very efficient work. The mother-tongue has become the vehicle of blessing. From the first a missionary spirit has been cultivated, and the young convert has been taught to keep in view the prospect of becoming a teacher of the new doctrine on his own island, or, if need be, on other islands. When the work was to be pushed westward from Ponape it was done by native missionaries, furnishing one of the most interesting chapters in the annals of missionary work. Going forth to a people of diverse tongue, these men and women prepared themselves for the work, and soon gathered in large numbers of converts.

The type of Christianity on the islands is eminently biblical. The Word of God is held in great reverence. The instability of native character is often exhibited by the converts, and large numbers have retrograded, usually, however, to return with a juster estimate of their weakness and a humbler and more tenacious trust in God.

The "Morning Star," provided by the Sabbath-school children of America and thrice rebuilt, has been an invaluable aid to the missionary work.

**Midnapur**, a town of India, 70 miles west of Calcutta. Climate hot. Population, 23,624. Race and language, Bengali Santhal. Religion, Hindu. Social condition of the masses, corrupt, ignorant, very poor. Station of the Bengal Mission American Free Baptists, occupied 1844, reopened 1863; 3 missionaries and wives, 2 other ladies, 4 out-stations, 462 adherents, 6 churches, 245 communicants, 17 additions in 1888, 2 preaching places, 150 average attendance, 2 ordained preachers, 5 unordained, 6 Sabbath-schools, 2,268 scholars, 1 theological seminary, 1 female school, 516 scholars, 1 other school, 73 scholars.

**Midyat**, a town of Koordistan, in the Jebel Tur district, about 50 miles northeast of Mardin. The people are a hardy, energetic race, belonging to the old Jacobite (Monophysite) Church, and speaking both Arabic and Koordish. Mission work among them, conducted by the missionaries of the A. B. C. F. M. at Mardin, has been very successful. Schools have been established and a flourishing church formed.

**Mier**, a town of the Tamaulipas district, Mexico. Mission station of the Methodist Episcopal Church (South).

**Mikmak Version**.—The Mikmak belongs to the American languages, and is used by the Mikmak Indians of Nova Scotia. The Gospels of Matthew and John were published by the British and Foreign Bible Society in 1854. Two years later the Gospel of Luke, prepared by the Rev. S. T. Rand, was published at Halifax; and in 1871 there were printed at the same place the Book of Exodus, the Epistles to the Romans, Galatians, and Hebrews, by the same person.

(Specimen verse. John 3:16.)

**Mildmay Missions.** Headquarters, the Conference Hall, Mildmay Park, London, England.—The work of the Mildmay Mission radiates from the "Conference Hall," near Mildmay Park, the corner-stone of which was laid, 4th August, 1869, by the founder and superintendent of the work, the Rev. William Pennefather, Vicar of St. Jude's, Mildmay Park. The first "Conferences," which led to the formation of the mission, assembled at Barnet in 1856. The "Iron Room," in which they were held, was afterwards removed to London, and used as a conference hall for many years, giving place in 1870 to the larger hall. The main object of this hall, which seats 2,500 people, is to provide a place for holding conferences, but it is also designed to be a centre of union for Christians of all denominations, and to facilitate the prosecution of a variety of evangelistic and missionary enterprises.

The large hall is used for preaching every Sunday afternoon and evening throughout the year, and for many public and evangelistic meetings; the five basement rooms are used for Bible-classes and special services, including one for deaf-mutes on Sundays, and for unceasing efforts during the week to benefit the poor, both temporally and spiritually. Adjoining the hall, on the west, is the Deaconess House, the centre for an extensive field of "woman's work." The deaconesses reside on the premises, and without taking vows give their whole time to ministry among the poor and ignorant, their work comprising house-to-house visitation, mothers' meetings, night-schools, and classes of many kinds, conducted in some room or house set apart for the purpose; these missions are at Bethnal Green, Hackney Road, Hoxton, Pentonville, Caledonian Road, St. James's, Islington, Stratford, West Ham, Lambeth, Bermondsey, Old Kent Road, etc., etc. Others, south of the river, are worked in connection with a Branch Deaconess House at Brixton, established in 1879, in response to appeals from ministers in South London; it is on the same plan and under the same supervision as that at Mildmay. An important branch of the Mildmay work is the home for nurses in Mildmay Road, whence trained nurses are sent to hospitals in London and provincial towns, and to private cases and other work, as directed.

Opposite the Nursing Home is the Cottage Hospital, with ten beds for the reception of patients from the parish of St. Jude. Other branches of work are the Home for Invalid Ladies, the Orphanage, Invalids' Kitchen, Dorcas Society, Servants' Registry, and Mothers' Meeting.

A Men's Night-school is held in one of the rooms in the Conference Hall. The 46 classes are taught by ladies; the branches taught range from the most elementary to the higher branches of general and practical knowledge. Coffee and bread and butter may be purchased by scholars before leaving. A Lending Library is attached to the school. The highest attendance in 1888 was 570, the lowest 443. In

connection with the work carried on by the deaconesses in one of the poorest parts of Bethnal Green is the Medical Mission, opened in 1875. Its hospital contains 30 beds, and out-patients are cared for two days weekly. Attached to this mission are a coffee-house and a lodging-house for men, which is almost always full. In other localities, too, coffee-houses have been opened, with comfortable sitting and reading rooms, library, etc.

Missions to cabmen and to railway employes are carried on. "Special Teas" are provided for policemen, postmen, cabmen, etc. The Bible Flower Mission, established in 1876, has now four depots in London. From the depot at Conference Hall from 1,500 to 2,000 bouquets, with Scripture texts, are sent out weekly to the hospitals and infirmaries assigned to it. The Mildmay Mission to the Jews was commenced in 1876; it embraces a medical mission, services in Hebrew twice a week, sewing-meetings for Jewesses, a night-school for Jewish children, etc. An itinerant mission to Jews living in towns and cities of Great Britain is a distinct feature of the mission. Hebrew New Testaments are distributed in Russia, Austria, Hungary, Galicia, Morocco, etc., and grants are made to missionaries of other societies in all parts of the world.

The Medical Mission at Jaffa is under the care of Mildmay (see Jaffa Medical Mission and Hospital). The Mildmay Association for Female Workers has now 1,400 members, many of whom reside in distant parts of the earth.

From £22,000 to £24,000 is required annually for the whole work of the mission, of which Jas. E. Mathieson, Esq., is the present superintendent.

**Mills, Cyrus Taggart**, b. Paris, N. Y., U. S. A., May 14th, 1819. From the day of his conversion, at the age of nineteen, he dedicated himself to the missionary work. He graduated at Williams College 1844, and Union Theological Seminary, New York, 1847. While pursuing his theological course he was active in mission work among the poor of the city. He also studied the Tamil language a year with a returned missionary from Ceylon. In September, 1848, he was married to Miss Susan Tolman of Ware, who had been for six years in Mount Holyoke Seminary with Miss Mary Lyon as pupil and teacher. Sailed October 10th, the same year, as a missionary of the A. B. C. F. M. for Ceylon. He was appointed, by the Jaffna Mission, Professor in the Batticotta Seminary in 1848, and in 1849 succeeded Mr. Hoisington as president, which position he filled till 1853, when utter failure of health compelled him to resign and return home. He spent two years in the service of the board among the churches; was settled as pastor in Berkshire, N. Y. His health again failed, and resigning his charge, he spent two years in business in Ware, Mass., in which he was successful. Dr. Mark Hopkins having suggested him as a suitable person for the presidency of Oahu College, Honolulu, Hawaiian Islands, he was appointed, and in 1860 sailed for that field. This position he held for four years, when ill-health obliged him to resign, and he returned home. In 1865 he purchased Miss Atkins' school at Benicia, California, with which he was connected for seven years. Having purchased land in Oakland that rapidly

appreciated, and generous contributions having been made by friends of education to induce him to remove to that city, he decided to erect buildings there, and in 1871 the seminary was reopened in Oakland. In 1877 the seminary was incorporated and deeded by Dr. Mills to a Board of Trustees. He made additions of buildings and improvements until the property increased to the value of \$275,000.

About two months before his death he had a severe pain in his right arm, and it was found to be necessary to amputate it to save his life. When the preparations were going forward he was perfectly tranquil, saying to his physician: "I cannot think just now, but I can trust; I am simply clinging to the cross." He seemed to rally for a while after the operation, but soon began to fail, and died April, 1884. The Trustees of Mills Seminary passed the following resolution: "We record our appreciation of the true Christian character and manliness of our deceased friend. Associated with him in our official relations, we bear testimony to the wisdom of his counsels, the soundness of his judgment, his financial skill, his clear foresight, his genial manners, his earnest purposes, and his transparent rectitude." The Presbytery of San Francisco also testified in the highest terms to Dr. Mills' long and useful life in the "active work of the ministry in both the home and foreign mission fields of the church, and an honored career in the grand work of woman's education."

Dr. Mills was honored with the degree of D.D. from Williams College in 1870.

**Mills, Samuel John**, b. at Torrington, Conn., U. S. A., April 21st, 1783, was the son of a minister. He was a subject of earnest Christian instruction and of early deep religious impressions. In childhood he heard his mother say to a friend, "I have consecrated this child to the service of God as a missionary;" and from the time of his conversion he cherished the desire to go to heathen lands to make known the gospel. He entered Williams College in 1806 and graduated in 1809. After entering college he was accustomed to meet with a few students in a grove for prayer and religious conference, and on a memorable afternoon, when driven by a thunderstorm to continue their conference under a haystack, he first suggested the idea of sending the gospel to the benighted portions of the earth, and declared that they could and ought to send them the gospel. They formed a society, whose object was stated to be "to effect in the persons of its members a mission to the heathen." In 1810 he entered Andover Theological Seminary, where he found Hall, Newell, Judson, and Nott deeply interested in the same subject, and with them he united in a memorial to the General Association of Massachusetts soon to meet at Bradford. This memorial led to the formation of the American Board. He was licensed to preach in 1812, and spent two years in the Southern and Western States, distributing Bibles, and organizing Bible and other benevolent societies. On his return he was ordained, June 21st, 1815, and spent the next two years in New York and other cities, laboring to promote the missionary cause. In behalf of the American Colonization Society, in whose organization he largely shared, he was appointed to visit England, and to explore the western

coast of Africa for a site for a colony of colored people from America. Having had extensive intercourse with chiefs, and collected much important and encouraging information, he embarked for home May 22d, 1818. Having taken a severe cold, which was followed by fever, he rapidly declined, till on the 16th of June he ceased to breathe. His body was committed to the ocean near the west coast of Africa.

Though not permitted to engage personally in a foreign mission on which his heart was set, he accomplished much for the conversion of the world. Dr. Griffin, president of the college, speaking of the society formed by him and his associates at Williams College, says: "I have been in situations to know that from the counsels formed in that sacred conclave, or from the mind of Mills himself, arose the American Board of Commissioners for Foreign Missions, the American Bible Society, the United Foreign Missionary Society, and the African School under the care of the Synod of New York and New Jersey; besides all the impetus given to Domestic Missions, to the Colonization Society, and to the general cause of benevolence in both hemispheres." He then adds: "If I had any instrumentality in originating any of those measures, I here publicly declare that in every instance I received the first impulse from Samuel John Mills."

**Millsburg**, town in Monrovia, Liberia, west coast of Africa, on the St. Paul's River, northeast of Clay-Ashland. Mission station Methodist Episcopal Church (North); 2 native workers, 60 church-members.

**Milne, William**, b. Aberdeenshire, Scotland, in 1785. He was converted at the age of sixteen, and joined the church in Huntley. His fixed purpose to engage in missionary work was formed in 1805, at the age of twenty. After this he spent five years in securing a support for his mother and sisters. His early opportunities for education were meagre. Entering the missionary college at Gosport, he went through the regular course of study, under the direction of the Rev. David Bogue. He was ordained in July, 1812, received his appointment to China, married, and sailed for China, arriving at Macao July 4th, 1813, where he was welcomed by Dr. Morrison. China being closed against missionaries, and the Portuguese, who controlled the neighboring islands and points on the mainland, being hostile, he was ordered in ten days to leave Macao.

Leaving Mrs. Milne with Mrs. Morrison, he went to Canton, almost the only place in China where he could remain in safety. Here he remained six months, engaged in the study of the language. The next eight months he spent in a tour through Java and other points of the Indian Archipelago, distributing among Chinese residents copies of the New Testament, and some tracts and catechisms Dr. Morrison had translated into Chinese.

At the end of the eight months' tour he rejoined Dr. Morrison at Canton, September 27th, and spent the winter of 1814 in studying Chinese, and at the same time holding religious service in his own rooms for the foreign residents and sailors. As preaching was prohibited, and little could be done to circulate religious literature in China at that time, it was decided to open a mission to the Chinese in Malacca. Dr.

Milne was appointed to this work, and in 1815 he and his wife went to Penang, taking up their residence at Malacca, where they were received by the Dutch residents, to whom he preached every Sunday. He obtained from the government land for a missionary establishment at Malacca. Soon a free school was established, Christian books were cautiously introduced, and the pupils induced to attend religious service. He began now to publish "The Chinese Monthly Magazine," which was continued till his death, and thousands of copies were circulated through the Chinese communities in the Dutch East Indies and in China also. In 1817 he began to issue an English Quarterly, "The Indo-Chinese Gleaner." He also gave much time and thought to the founding of the Anglo-Chinese College. Dr. Morrison in 1818 gave £1,000 for this object, and a yearly gift of £100 for five years thereafter. But the entire work of planning and executing the details fell to Dr. Milne. The corner-stone was laid at Malacca, November 11th, 1818, and in 1820 the first class was formed. The main work of Dr. Milne from 1815 to the close of his life was the preparation of religious literature. He aided Morrison in the work of translating the Bible into Chinese, the Books of Deuteronomy and onward to Job being translated by him. He prepared also a Commentary on the Epistle to the Ephesians, an "Essay on the Soul," in two volumes, and fifteen tracts, all acceptable to the Chinese. He had great skill and readiness in the use of the language, and in addition to his literary labors performed much evangelistic work. His first convert, Leang-Afa, whom he baptized, was the first ordained Chinese evangelist, and was in the service of the London Missionary Society for many years. The University of Glasgow conferred upon him the degree of doctor of divinity in 1820. Mrs. Milne died in March, 1819, leaving four children, one of whom, William, became a missionary to China in 1839, and labored some years at Ningpo and Shanghai. Dr. Milne's health failing, he took a voyage to Penang, but returned weaker, and died in 1822, at the early age of thirty-seven, and but ten years in the missionary work.

Besides the works mentioned, he published "Retrospect of the Protestant Mission to China."

**Minas Geraes**, town in Brazil, S. A., not far from Rio de Janeiro. Mission station of the Southern Baptist Convention, recently started; 2 missionaries and wives, 1 native preacher.

**Minchinpatna**, a town of Bengal, India, 25 miles from Cuttack. Mission station of the General Baptist Missionary Society (England); 1 native preacher, 31 church-members, 63 scholars.

**Mingrelia**, a district of Asiatic Russia, in the lieutenantancy of the Caucasus, lying between Tiflis and the Black Sea. Area, 2,600 square miles. Surface generally mountainous, sloping towards the south. Climate warm and damp; fevers are prevalent; soil exceedingly fertile, and vegetation rapid. The mountains are covered with magnificent forests, and much good land lies waste. The district is without external improvement, and has a savage and deserted appearance. Population, 240,000,

most of whom belong to the Georgian race, but are generally inferior in appearance to the mountaineers of the Caucasus. The dominant religion is that of the Greek Church. Mingrelia corresponds with ancient Colchis. It was long a part of the kingdom of Georgia, was afterwards independent under a long line of native princes, and became subject to Russia in 1804, but its prince remained nominally sovereign till 1867, when he sold all his rights to the emperor of Russia for 1,000,000 roubles.

There is no distinctive mission work carried on among the Mingrelians, though colporteurs of the British and Foreign Bible Society go through the country occasionally.

**Minuangoda**, a town in Kandy district, Ceylon. Station of the Wesleyan Methodist Missionary Society; 1 missionary, 27 church-members, 374 scholars.

**Mirzapur**, city in Northwest Provinces, British India, on the Ganges River, 45 miles west of Benares, 56 southeast of Allahabad. As viewed from the river, the city presents a very striking appearance, exhibiting numerous mosques, Hindu temples, and dwelling-houses of the wealthy merchants, all of which make the town better than many in India. Population, 56,378, Hindus, Moslems, Jains, Christians. Mission station London Missionary Society; 4 missionaries, 3 missionaries' wives, 2 native helpers, 20 church-members, 2 schools, 48 scholars.

**Missionary Conferences.**—When the revival of missions commenced at the close of the last century, the great effort at home was to find enough of those interested in the work to justify making a beginning, and the great aim abroad was to find a field where missionaries could labor unmolested. The whole undertaking was then so novel that those engaged in it had not yet begun to know their ignorance. For to carry on the work of missions with success requires not merely a spirit of obedience to Christ, but some knowledge of the difficulties to be met and the best method of overcoming them, and only an actual advance could indicate the points on which they needed light. They found, moreover, that the further they went on the more the questions multiplied. Even success only furnished new problems to be solved, that had not occurred to them before. For the solution of these they went, first of all, to the Lord Jesus, and then as in apostolic times, when an unlooked-for emergency arose, "the apostles and elders were gathered together to consider the matter" (Acts 15: 6), so now in the constantly recurring inquiries, "How can we remove this evil, and secure that result?" each group of laborers felt the need of counsel from others who encountered similar obstacles. Hence missionary conferences came into existence naturally and unavoidably—now among those laboring in the same heathen land, and now among the societies at home; the former seeking to discover the best ways of presenting the truth to heathen minds, and the latter how to secure the greatest interest in the work among the churches. At first a few deprecated such conventions lest some utopian scheme should be broached by unpractical men, or some impracticable organic union of different societies. Instead of the cordial co-operation of independent bodies. These fears happily proved groundless, for those interested in missions are too

earnest to be satisfied with anything that does not push forward the work.

The first union missionary conference was held in the United States May 4th, 1854, the various missionary societies then existing there being moved by the presence of the celebrated Dr. Alexander Duff among them to propose such a convention in order to manifest the real unity of Christians, increase interest in the work, and secure a more intelligent co-operation in carrying it on. So 11 missionaries, 18 officers of missionary societies, and 150 persons in all, met in the chapel of Dr. Alexander's church in New York, and continued together a day and a half. They considered the comparative advantages of concentration and diffusion in missionary work on the field, and came to the conclusion that the best way was to equip commanding centres of operation thoroughly, and then operate from those centres by itinerating in the regions round about.

They expressed their satisfaction also that so little interference with each other had occurred among different societies, and recommended that it be understood that as soon as an evangelical society had occupied any field it should be left in undisturbed possession of the ground.

In the matter of raising up candidates they were unanimous in the opinion that much depended on pastors taking an intelligent interest in the work.

The next conference met that same year in London, October 12th and 13th, and was somewhat limited in the range of its discussions, for unfortunately at that time only a few secretaries of missionary societies were able to be present.

**India.**—Another form of missionary conference was inaugurated at the close of that same year. At that same time the American Board sent out its senior secretary, Rev. Rufus Anderson, D.D., with Dr. A. C. Thompson, a member of its Prudential Committee, as a Deputation to consult with the missions in India and Turkey. They discussed with the several missions such topics as "The governing object of missions," and this they found to be the preaching of the gospel. Then "Preaching,"—how is this connected with schools, and how can they be made most promotive of evangelization? Next, "Native churches and pastors,"—how can they be brought into existence and made most efficient for good? Also, "Caste and Polygamy," "Schools of all grades for both sexes," "Native helpers," other than pastors and teachers; "Correspondence," "Printing establishments,"—should they be owned and managed by the mission, or by natives independently? "Provision for invalids, for children and widows of missions,"—how can this be made most effective, and at least cost? "Medical missions and instruction of natives in medicine," "Visits home,"—how can these be made most subservient to success in the work? and "Mission property,"—how much? how managed? and in whose name invested? "Government grants," "Estimates and appropriations," "Aid to poor converts," etc.,—were also considered. The results of these discussions appeared in the form of papers drawn up by the missionaries, and letters commenting on them by the deputation, and the whole form a volume of 600 pages, full of most valuable information in these details of missionary work. The title is "Reports

and Letters connected with Special Meetings of the India and Syria Missions of the American Board in 1855. Printed for the use of the Prudential Committee, Boston." See also Dr. Anderson's Missions to India, pp. 240-265.

About the same time E. B. Underhill, Esq., Secretary of the Baptist Missionary Society (England), rendered a similar service to their missions in India. The title of the volume recording the results is "Minutes and Reports of the Baptist Missionaries in Bengal, the Northwest Provinces, Behar, and Ceylon, in 1885-6. Printed for the use of the Committee and the Missionaries." Mr. Underhill was a fellow-passenger with Drs. Anderson and Thompson from England to India.

More than a year before this, the Executive Committee of the American Baptist Missionary Union had deputed Rev. Solomon Peck, D.D., and Rev. J. N. Granger to visit their mission in Burmah and consult with the missionaries. They met at Moulmein April 4th, 1853, and continued in session till May 17th. Their proceedings were printed for the use of the Executive Committee in a volume of 116 pages.

Dr. Anderson left copies of the printed minutes of the conferences with Dr. Mullens (L. M. S.) at Calcutta; and the latter, in his "Brief Review of Ten Years' Missionary Labor in India. London, 1863," states that the idea of a general conference of missionaries of all societies for consultation sprung from these meetings of the Deputation in India.

The Bengal Missionary Conference met in Calcutta September, 1855. It was composed of nearly 50 missionaries of various societies, sat four days, held eight sessions besides meetings for prayer, and discussed "The progress and the peculiar difficulties in Bengal," "Preaching in the vernacular," "Education in English," "Influence of the Indigo and Zemindary Systems on the Work in Rural Districts," "Vernacular Literature and Schools," and "Female Education." Each topic was set forth in a paper, and after discussion the opinions of the brethren were embodied in resolutions, and the whole published in a volume entitled "Proceedings of a General Conference of Bengal Protestant Missionaries held in Calcutta, September, 1855. Dalton, London."

Another Conference of missionaries in the Northwest Provinces was held in Benares January, 1857. Thirty missionaries were present from seven societies. A sketch of the proceedings appeared in the "Calcutta Christian Observer," March, 1857; but the records of the Conference were destroyed when the Allahabad Mission press was burnt during the mutiny, June, 1857.

A third Conference of South India missionaries was held at Ootacamund, in the Nilgiri Hills; thirty-two missionaries met, and spent a pleasant fortnight in comparing notes. The results were published in "The Proceedings of the South India Missionary Conference held at Ootacamund, April, 1858. London." This volume contains twenty-seven narratives of missionary labor, and thirty papers on different themes, followed by resolutions embodying the general views of the Conference on "Native Agencies," "Education," "Vernacular Preaching," "Village Congregations," "Industrial Institutions," "Caste," "Government and Morality," and "Government Education," with a

number of valuable statistical tables. See "Conference on Missions at Liverpool, 1860," pp. 365-374.

Next in order comes the Conference on Missions at Liverpool, March 19th to 23d, 1860, where 25 British societies were represented by their officers. Two missionaries from America were present, and nearly one hundred other members took part in the proceedings. Two sessions of three and a half hours each were held daily, preceded by a meeting for prayer in the morning, and followed by a soirée in the evening. The whole ended in a large public meeting in Philharmonic Hall. Two stenographers reported the discussions, and the whole proceedings were published in an octavo of 428 pages; of these the index alone fills 38. Papers were read on "European Missionaries abroad," "Best Means for producing and maintaining a Missionary Spirit." Three papers were read "On Missionary Education." The next topic was "How to call forth Liberty at Home." "Native Agency" followed; then "Candidates for the Work," "Indian Converts in the Mutiny," and "Native Churches." Addresses supplemented these papers, with others on "The Missionary Lectureship," "The Peshawar Mission," "Missions in South Africa," "Missions in Turkey," "Education of Woman in the East," and "Medical Missions in China and Japan." The discussions are also summarized in "minutes" on the several themes.

The "Proceedings of the Conference at Lahore, in the Punjab, December, 1862, and January, 1863," fill 398 octavo pages.

At Allahabad, where the records of a previous Conference were burned in 1857, another was held in 1872-73, at which 136 missionaries were present from nineteen societies. Among these were 21 Presbyterians, 18 Methodists, 4 represented the American Board, 2 the United Presbyterian Church, and 1 the Reformed—all these from the United States. The English Baptists sent 10, Church Missionary Society 25, London Missionary Society 13, Free Church 12, Church of Scotland 3, Irish Presbyterians 3, United Presbyterian Church 3, and Gossner's Mission 2; 96 foreigners and 28 natives.

Several missionary Conferences have been held in China. The first important one was at Shanghai in 1877. This is often quoted as authority in matters pertaining to missions in that empire. (See below.)

Eighteen years passed away after the Conference at Liverpool before another was held in England, in the large hall of Mildmay Park, on the north side of London, October 21st to 26th, 1878. The Conference at Liverpool represented only 25 British Societies, but this one 37 in all—26 British, 6 American, and 5 from the continent of Europe. This one not only dealt more thoroughly with particular fields, but also viewed each in its relations to the whole world, noting what had been accomplished, and searching to see what might be brought to pass in the near future. Besides a general review of missionary education, Christian literature, and Bible translation, it gave a list of recent versions of Scripture covering 15 pages. There was a looking forward to the completion of the work in some fields, and a passing on to the regions beyond. It inquired for the readjustments that would secure the largest aggressive evangelization. The topics discussed were such as these: Increased Co-operation of all Agencies, by Rev.

Dr. Mullens; Results of Emancipation, by E. B. Underhill, LL.D.; Discovery and Missions in South Africa, by Sir T. Fowell Buxton, Bart.; Lovedale, South Africa, by Rev. Dr. Stewart; Medical Missions, by Rev. Dr. Lowe; Claims of Foreign Missions, by Rev. Daniel Wilson and Rev. Dr. Herdman; the Missionary Character of the Church, by Rev. Dr. A. C. Thompson; the Gospel in Turkey, by Rev. Dr. N. G. Clark; Growth of Christianity in India, by Rev. M. A. Sherring; Education in India, by Rev. Dr. Murray Mitchell; Dutch India, by Rev. Dr. Schreiber; Netherlands Missionary Society, by the Secretary; Islam and Hinduism as related to the Gospel, by Rev. E. E. Jenkins; The Work in China and its Future, by Rev. Dr. Legge; Work in the Zenana, by Mrs. Weitbrecht; The Karen Mission, by Rev. Dr. Murdock; Dr. Maxwell, Rev. J. Hudson Taylor, and Rev. W. F. Stevenson spoke on Missions in China, and Rev. Dr. Legge on the Opium Traffic; The Bible Work of the World was set forth by the Assistant Secretary of the British and Foreign Bible Society; Missions in Japan, by Rev. Dr. Ferris; The Provinces of China, by Rev. J. H. Taylor and others; Polynesia, by Rev. S. J. Whitmee; The Influence of Colonization on Native Races, by Rev. G. Blencowe; New Guinea, by Rev. W. G. Lawes; Madagascar, by H. Clark and Rev. J. Sibree, Jr.; New Hebrides, by Rev. J. Inglis; Education of Woman in the East, by Miss E. J. Whately of Egypt, Mrs. Urnston of North India, Mrs. Ferguson of Bengal, Mrs. Etherington of Benares, Rev. J. E. Payne of Calcutta, and Miss M. A. West of Turkey; Missions among the Moslems, by Rev. T. P. Hughes, B.D., of Peshawar; English Mission Schools at Cairo, by Miss E. J. Whately; Mission Work in Egypt, by Rev. Dr. Watson; Mission Work among the Afghans, by Rev. T. P. Hughes; Foreign Work of the Religious Tract Society, by its Secretary; British Syrian Schools, by a sister of Mrs. Bowen Thompson; The American Mission in Syria, by Rev. Dr. H. Jessup; Sabbath-schools on the Continent, by F. J. Hartley, Esq.; Continental Missions, by Rev. R. S. Ashton; Mission Work in Paris, by Rev. D. M. Berry; The McAll Mission, by Pastor Dumas; Missions to the Jews, by Rev. J. C. Brennan. Interspersed among these were many short addresses on the topics presented. And in almost every case both the paper and the address were from men who had been on the ground, and could speak from personal observation. The Conference closed with a general meeting in Exeter Hall, which seemed to gather into a focus the interest and energy that had been steadily increasing during all its ten sessions.

But these previous conventions only prepared the way, and rendered possible the Centenary Conference on Foreign Missions that met in London June 9th to 19th, 1888.

For years men had been asking, What is the result of so vast expenditure? What lessons are taught by a century of missionary experience in all parts of the world? What victories have been won among savage races, and what among those whose civilization and literature antedates our own? For the first time Protestant missionary societies gave an authoritative answer to these questions, having devoted fifty meetings to a searching scrutiny of every department of missionary work, and to the public record of the results. The great object was to encourage

the churches to press forward in obedience to the last command of Christ, by setting forth the experience of evangelical missions during the last hundred years, and to confer together on those numerous questions which the large expansion of the work had brought into the foreground. The Conference made no attempt to legislate for the churches, nor to stir up temporary excitement by a mass meeting. The work of Christ is not to be carried forward in either of these methods. But the kingdom of truth advances by the spread of information concerning the principles of that kingdom and the facts connected with its progress in the past.

The Mildmay Conference was a great advance on that at Liverpool, but this was a still greater advance on that. Even though it accomplished nothing else, the great number of men and women that it drew together from all parts of the world was a grand testimony to the advance that had taken place in the work. In 1860 about 129 met together; in 1878 about 158; and in 1888, 1,576—nearly ten times as many. In 1860 there is not one name of a woman in the entire list; and in 1878 only two appear, though more than that number (5) took part in the proceedings; but in 1888 the names of 429 women appear on the roll—much more than the entire membership of previous Conferences. In 1860 none were present from the United States. In 1878 one attended from the United States and one from Canada. In 1888, 183 names appear from the United States and 30 from Canada. Indeed, the numbers were so large that two simultaneous meetings were held in the forenoon and evening, and generally three at the same hour in the afternoon. The Conference being divided into sections for that purpose, nine meetings were devoted exclusively to prayer; twenty-four meetings of members in section, for the discussion of important principles; six meetings for open Conference; and, including the opening meeting, eighteen public assemblies. The published report of the Conference fills two octavo volumes of 560 pp. and 634 pp., the Indices alone filling 46 pages with double columns. In the first volume is a Missionary Bibliography of 48 pages, prepared by Rev. S. M. Jackson of New York, giving the works published on Missionary Ethnology, Heathen Religions, Miscellany, History of Missionary Societies, Jewish Missions, Papal Missions, Missionary Biography general and individual, Missionary Biography of Converts, Travels in Missionary Lands in general and in each one severally. This last occupies 28 pages.

The number of missionary societies represented in the Conference was 139; of these, 57 belonged to the United States, 9 to Canada, 18 to the continent of Europe, and 2 to the colonies; leaving 53 to the kingdom of Great Britain.

Many topics discussed at previous Conferences were also discussed at this, but with much greater thoroughness; e.g., Missionary Comity was the subject of two papers, and a prolonged discussion filling 59 pages. Instead of repeating these again, some new topics are more worthy of mention, such as, The Increase and Influence of Islam; Buddhism compared with Christianity, by Sir Monier M. Williams; Papal Foreign Missions; Reaction of Foreign Missions on the Church; The State of the World a Hundred Years ago with Reference to the Missionary Work as compared with the Present; Mission-

ary Methods, (1) The Agents, (2) Modes of Working, (3) Dealing with Social Customs, (4) Dealing with Religious Beliefs. The entire two volumes are full of both very interesting and instructive reading.

The "Allgemeine Missions Zeitschrift" for November, 1889, contains a report of the Third Scandinavian Missionary Conference July 2d to 5th, at Christiania, Norway. The next meeting is appointed for 1893. At this session 553 members were present—400 from Norway, 105 from Denmark, 61 from Sweden, and 1 from Finland. Scandinavian societies support over 100 missionaries, and spend annually \$200,000. The same class of topics discussed in the London Conference were prominent here; and so the work goes on till there shall remain no more lands to be won for Christ ("Missionary Herald," 1890, 28).

Even in Japan, though it was not accessible to Christendom till 1854, and missionaries were unknown there till 1859, and even then could only employ themselves in learning the language, a missionary Conference was held at Osaka on the large island of Nippon, April 16th to 21st, 1883.

It is interesting to note the progress of the work in those islands up to that date. The first convert, Yano Riñ, was baptized in October, 1864. The first church of nine young men was organized at Yokohama, March 10th, 1872. In 1876 the converts numbered 1,004; in 1879, 2,965; in 1882, 4,987; and in 1883, the year of the Conference, 6,598. Twenty-two societies were represented in it by 106 delegates, 48 of whom were women. The A. B. C. F. M. had 32 representatives, the largest number from any one society. Next to that came the American Presbyterians with 12. The Church Missionary Society, The American Episcopal Church, and The Reformed (Dutch) Church had 8 each; and other societies had smaller representations. The opening sermon was preached by Rev. James H. Ballagh, from Acts 1: 8; and a History of Protestant Missions in Japan, by Rev. G. F. Verbeck, D.D., fills 163 of the 566\* pages of the volume of Proceedings of the Conference, which was printed and published at Yokohama. Other topics discussed were: The Obstacles to the Reception of the Gospel in Japan; among which were specified, The Influence of Buddhism, on which Rev. M. L. Gordon, M.D., read an instructive paper; The Influence of Confucianism, on which Rev. H. Waddell read another paper; and the Influence of Modern Antichristian Literature,—Rev. D. C. Greene, D.D., read on this topic, and divided it into (1) that which gives expression to an atheistic philosophy, (2) that based on objections to the Bible, and (3) that which opposed the gospel on political grounds.

Education was considered (1) as to the object of missionary education in Japan, (2) its methods, (3) the training needed for native pastors and evangelists, and (4) the distinctive claims of education for women. Two papers on this last topic were read by women—Mrs. L. H. Pierson and Mrs. E. R. Miller.

The self-support of the native church was discussed, with special reference to some extreme views on this subject entertained by one of the missionaries.

\* The pages number only 468, but are duplicated from 88 to 186 to make room for the first paper.

Medical missions came in for their usual share of attention; and a unique paper by J. C. Berry, M.D., on Missionary Health, Vacations, and Furloughs, gave a great deal of valuable information on that subject, and on the practice of the different societies in that regard. Another paper on a subject unusual though practical, viz., The Health of the Missionary as affected by his Work, by Rev. W. Taylor, M.D., took up the various causes of ill-health in Japan, and gave counsel which, intelligently carried out, may greatly promote missionary health and usefulness in that interesting field.

Other topics were also discussed, such as: The Preparation of a Christian Literature for Japan; The Principles of Translation into Japanese; The Matter and Method of Preaching to the Heathen; How best to conduct Sunday-schools in that Field; etc.

On two evenings the topics that had been discussed during the day were further elucidated by papers read by the native Japanese pastors, Rev. T. Matsuyama, J. T. Ise, P. Sawayama, and P. Kanamori, though no Japanese name appears on the roll of the Conference. Perhaps in the next Conference the natives will have it all to themselves.

In the paper on missionary health is a large colored chart of temperature and humidity, giving the elastic force of vapor in inches for the twelve months of the year, at Sapporo, Kiyoto, Hakodate, Tokyo, Kobe, Nagasaki, and Yokohama in Japan, and the mean annual temperature and relative humidity of fourteen other cities in various parts of the world, four of them in the United States of America.

**China.\***—I. The first Conference of the missionaries laboring in China was held in Shanghai, May 10th-24th, 1877. The origin of this meeting was at a meeting of the Presbyterian Synod of China, held at Chefoo in August, 1874, at which many delegates of other Presbyterian bodies were present; and so beneficial were the meetings, so much good was accomplished by the mutual interchange of views and the discussion of methods, that the desire for a meeting of representatives of all the missionaries in China took form in the appointment of a committee to confer with the missionaries and secure a universal opinion on the practicability and advisability of holding a general Conference. This committee consisted of Rev. J. L. Nevius, D.D., Rev. A. Williamson, LL.D., and Rev. J. B. Hartwell. A circular was issued by the committee, stating the object of the Conference, and asking opinions as to the time, place, subjects for discussion, writers, and delegates to such a conference. Amid the variety of opinions received the committee were unable to decide, and a new circular was issued, giving the results of the first circular; when replies to this were received the result was published in the "Chinese Recorder" for May-June, 1875, the holding of the Conference was advised, and the following committee of arrangements was appointed:

A. Wylie, Esq., representing Hong Kong and Canton Province; Revs. C. Douglas, LL.D., Formosa and Fokien Province; J. Butler, Chekiang; W. Muirhead, Kiangsu; G. John, Yangtz Ports; C. W. Mateer, Newchwang and Shantung; J. Edkins, Chihli.

\* The conferences in China have been so important that a special and somewhat enlarged statement of them is appended.)

This committee met at Shanghai, October 25th, 1875, and finding that fully two thirds of the missionaries were in favor of the meeting, called the Conference for the 10th of May, 1877.

The attendance on the Conference was very gratifying to those who had labored for its success. There were in all 126 members—74 gentlemen, 52 ladies. Five of this number had arrived in China in 1847. Twenty different missionary societies were represented: 10 American, 1 German, and 9 of Great Britain, besides the British and Foreign Bible Society. Ten different provinces claimed the delegates, and Presbyterians, Baptists, Congregationalists, Episcopalians, Methodists, and Lutherans united in fraternal discussion and worship. Papers were read and discussed which dealt with the practical details as well as the general policy of the missionary work, such as: The Field in all its Magnitude; Buddhism and Taoism; Itinerancy; Medical Missions; Woman's Work for Woman; Schools; Christian Literature; Self-support; Opium; Ancestral Worship; Treaty Rights of Native Christians; Principles of Translation; and the Training of a Native Agency. In addition to those who were at the Conference, papers were prepared by such well-known missionaries as Dr. James Legge, Rev. A. P. Happer, D.D., Rev. W. A. P. Martin, D.D., and J. G. Kerr, M.D., who were unable to be present.

A delightful spirit of harmony and brotherly kindness prevailed throughout all the meetings of the Conference, so that subjects likely to create spirited and perhaps unpleasant discussion were harmoniously considered in a calm and Christian way. The influence of this meeting was felt in greater harmony between the different missionaries; in a spirit of unity which pervaded the whole body, not only those who had been in attendance upon the Conference, but among their associates, and in the resulting friendships, the mutual encouragement, the increased wisdom, and the greater zeal in missionary work which was the inevitable result of such a meeting.

The tabulated results of the Conference of 1877 were a full table of statistics and the publication in a volume of the papers read, together with the discussion which followed them; and this formed a valuable treasury of facts in regard to mission work, as well as the views held in regard to methods of work.

A summary of the statistics will be found on the next page.

The work thus tabulated was done by a force of 473 missionaries, divided thus: married men, including wives, 344; single men, 66; single women, 63; total, 473. This large number was connected with 11\* American societies, 13† British, 2‡ Continental, 3§ Bible Societies, and 7 were unconnected with any society.

\* A. B. M. U., South. Bap. Conven., Seventh Day Baptists, A. B. C. F. M., P. E. Mission, M. E. (North), M. E. (South), Presbyterian (North), Presbyterian (South), Reformed (Dutch), Woman's Union Mission.

† Baptist, China Inland, Church Missionary Society, S. P. G., London Mission, Methodist New Connexion, United Methodist Free Church, Wesleyan Mission, Canadian Presbyterian, English Presbyterian, Irish Presbyterian, Scotch United Presbyterian, Society for Promotion of Female Education.

‡ Basle Mission, Rhemish Mission.

II. *The Conference of 1890* met at Shanghai May 7th-17th, pursuant to a resolution of the Conference of 1877 calling for another conference. Over 400 representatives of the various missions from almost every province of China were assembled at the meetings. Nearly seventy papers were prepared for presentation. In most cases the papers were printed beforehand, and each member of the Conference was supplied with a copy, so that intelligent discussion could take place after a brief résumé of the essay had been given. The subjects of these papers embraced almost every topic that was relevant to mission wants or work. The Bible, the Church, Education, Literature, Relation of Christian Missions to the Chinese Government, Hospitals, Orphanages, Opium, Aboriginal Tribes, Woman's Work, Self-support, Ancestral Worship, and other subjects were treated of in a manner varying from a brief synopsis of general principles to an exhaustive treatise. The meetings were characterized by the greatest harmony and unanimity of opinion, such dangerous topics as the Term Question having been excluded from consideration. Forty missionary societies were represented, and almost all Protestant denominations, yet the key-note of the whole Conference was unity. Diversity of opinion there was, of course; but kindly Christian forbearance dominated the entire meeting.

A wide range of experience was represented in the Conference. Side by side sat the hoary-headed veteran of over thirty years' service in China, and the recruit who had but just landed. Fourteen members had served over thirty years, the Nestor of them all, Rev. A. P. Happer, D.D., of the American Presbyterian Church, having seen forty-six years of service. This group of seniors represented a combined service of more than five hundred years in the mission field. Such being the case, one of the most interesting meetings of the whole session was the inquiry and experience meeting, where practical questions were asked and answered

out of the fulness of the experience there represented. Many of these questions were of universal interest, as the following: "The safety and advisability of adopting the Chinese costume: It is perfectly safe, and expediency alone is to be considered." "The length of time necessary for acquiring the language: that depends on individual gifts,—at least a year is considered necessary." "Is a slight amount of medical training beneficial or otherwise?—'a little knowledge is a dangerous thing,' but used with common-sense it would be of great help, especially in the interior, when separated from physicians." "Is the need of a greater number of foreign missionaries a real one?—the present need can only be met by foreign workers."

The practical results of the Conference were:

1. The crowning work was the agreement upon a union version of the Sacred Scriptures, in three styles—the high classical, the easy classical, and the Mandarin; this version to supersede the various translations which have been made during the last forty years. Committees were appointed to elect the translators and superintend the entire work. Thus the question of Bible translation in China has been simplified, unified, and perfected.

In addition to this chief action, committees were appointed with reference to the rendering of the Scriptures into the various vernaculars of China, and for the publication of editions for the blind, and deaf and dumb. The use of the Roman letter was indorsed, and recommended for the vernacular translations.

2. The wealth of information contained in the papers and the discussions of the Conference form a most valuable result of the meeting: as an argument for foreign missions it is unanswerable.

3. Steps were taken for securing a Bible in Chinese, with summaries, chapter headings, and brief explanations, the need of which has long been felt.

4. A committee was also appointed to prepare

a union annotated Bible; this ranks next in importance to the union version.

5. A resolution was adopted, expressing in well-chosen, temperate language a protest against the growth and use of opium (and the abuse of anti-opium pills containing morphia), calling upon the Christian Church to make more earnest efforts against this great evil.

6. The use of alcoholic liquors among the native Christians was made the subject of inquiry for a committee who will report at the next Conference.

7. The Educational Association of Practical Teachers, which has been formed in China for the promotion of educational matters, especially the matters of text-books and scientific terminology, was recognized by the Conference, and the work and material assets—books, maps, blocks, etc., of the school and text-book committee of the last Conference—were turned over to it.

8. Harmonious working in literary effort is desired, and a permanent committee was elected with a great many important duties to perform in regard to the classification, storage, and sale of standard books at important centres.

9. In order that Christianity should not appear to be inimical to government and those in authority, a committee was appointed to present to the Chinese Government a statement as to what Christianity is, and what its aims are; and while thanking the government for the protection of the past, to ask for the suppression of libellous charges against Christian missions.

10. Strong appeals for reinforcements were issued by the Conference, not in the enthusiasm of the moment, but as a measure made necessary by the results already accomplished, by what is now in hand, and by the needs of the future. One appeal was framed on behalf of the two hundred lady-members, asking for more lady missionaries for China. An appeal for more lay missionaries, and another appeal which called for large reinforcements of ordained workers, were drafted into one grand appeal for a thousand more men in the next five years.

11. Comity between missions and a division of the field was made the subject of the work of a permanent committee, whose object is to promote harmony between individuals as well as societies.

12. A permanent committee of correspondence was elected to serve as a medium of communication on subjects of interest common to missionaries, and to provide for the next Conference.

13. The importance of periodical literature was recognized, and a resolution passed urging upon all missionaries to support and spread the publications already in existence.

14. Full statistics were gathered together, but as yet only abstracts are available. At the close of 1889 the number of missionaries in China was 1,295, belonging to 42 different organizations. The increase of 1889 over 1888 was 172. At the end of 1889 the number of native communicants was 37,287, an increase of more than 286 per cent since 1876. The contributions of the native Christians (only) for the year 1889 were \$36,884.54, which lacks a little less than \$403 of being an average of one dollar a member for all the native communicants in the empire.

Organized churches numbered 520, 94 of which are wholly self-supporting, 49 others

partly so, while 61 hospitals and numerous dispensaries treated a total of 348,439 patients.

In the short space at the disposal of this article the above summary of the results of this most important Conference must suffice. Acknowledgment is due to the "North China Herald," whose full reports of the meetings have been availed of, and its closing comment on the Conference is well worthy of repetition: "Whatever it may have done or left undone, the Shanghai Conference of 1890 is both a prophecy and a promise of the day hinted at in the Latin verse found in some editions of Bagster's Testament: '*Multe terricolis linguæ celestibus una,*'—To the dwellers upon earth there are many tongues; to those in heaven, but one."

### Missionary Leaves Association.

Headquarters, 20 Compton Terrace, Upper Street, Islington, London, N., England.—The work of the Association originated in the needs called forth by the success vouchsafed to the Church Missionary Society. The organization of native churches resulted in the formation at each missionary station of a sort of parish with all the wants of any poor out-of-the-way English parish, with some needs peculiar to itself. While these mission stations were comparatively few, private friends were able to meet their wants; but with the growth of the work of the Society came the need of organized help. Thus, in 1868, by the advice of Rev. Henry Venn, Honorary Secretary of the Church Missionary Society, was formed the Missionary Leaves Association for the purpose of furnishing information to friends at home, and of conveying their aid to recipients abroad. It is the object of the Association to supply the missionaries and stations of the Church Missionary Society with help in money and material towards such requisites as it is not the province of the Society to supply, but which aid nevertheless is found to be most helpful in the various works undertaken by the missionaries.

*Organization.*—To insure, as far as possible, that the administration of the Missionary Leaves Association shall be in harmony with that of the C. M. S., it has been arranged that some members of the committee of the former shall be nominated by the committee of the latter. As a matter of fact, all the present members of the Association committee are members of the Society committee. The Association possesses an organization peculiarly adapted for placing private gifts where they are most needed, and affords advantages in acknowledging gifts, which the C. M. S. has not been able to do, owing to the immense amount of correspondence and other work involved in the general management of the missions.

**Mizpah**, a Moravian Brethren station in Jamaica, West Indies. Formerly an out-station of Bethany, known then as Cheapside. It lies about ten miles northeast of Bethany, on the Blue Ridge Mountains. It is pleasantly situated 1,800 feet above the level of the sea, surrounded by a well-wooded district. In 1866 a formal separation from the mother-church was effected, and an independent congregation organized. It is one of the most promising of the Jamaica congregations. Moravia and Bohemia, with schools and regular preaching services, are two flourishing out-stations belonging to Mizpah.

**Mkunazini**, town in Zanzibar, Africa. Station of the Universities Mission; 2 missionaries, boys' school, 43 pupils, dispensary, and medical work among the natives.

**Moab Mission**, or Methodist Mission to Palestine. Established 1884. Conducted by Mr. and Mrs. Lethaby. Supported by Wesleyan Methodists in England. Secretary, Rev. George Piercy, 267 Burdett Road, London, E.—Much courage and determination were needed to effect an entrance into the town of Kerak in Moab, and to maintain the position when it had been won. Mr. and Mrs. Lethaby have been subjected to personal violence, robberies, insults, and intimidation of every kind. The two missionaries have now to a great degree lived down opposition, and their work has so far developed as to render further assistance absolutely necessary. The difficulties of the work are still very great, owing to the isolation of the place, the dangers attending communication with Jerusalem and the outside world, and the lawless character of the people. There is one great advantage—Kerak is still a purely Arab state, independent of Turkish control. From its position on the top of the mountains of Moab it may be plainly seen from Jerusalem, which is in a direct line only fifty miles away; the actual travelling distance is about ninety miles. The journey from Jerusalem occupies four days of hard travel, and is attended with considerable danger of pillage or worse treatment at the hands of the Bedouin who infest the way. Kerak is a very old town, is elevated 3,500 feet above the sea, and must have been before the invention of gunpowder almost impregnable. All the fortifications are now in ruins. There is a population of 8,000. About one sixth of this number are Greek Christians.

Day and Sunday-school teaching form a very important part of the work of this mission, because it is only through the children that the parents can be reached. The Moslem school has enabled Mrs. Lethaby to gain access to twelve Moslem homes, where she conducts evangelistic services. The medical work and house to house visiting are also important agencies.

The present attendance on the day-school is 30; on the Sunday-school, 40.

**Modimolle** or **Waterburg**, a town in North Transvaal, East South Africa, not far from Ga Matlale. Mission station of the Berlin Evangelical Missionary Society (1867); 2 missionaries, 12 native helpers, 237 communicants.

**Modjovarno**, city in Java, East Indies, northwest of Malang. Mission station of the Netherlands Missionary Society, Rotterdam, with 10 churches and 2,816 members; also a medical station.

**Moffat, Robert**, b. Ormiston, East Lothian, Scotland, December 21st, 1795, of humble parentage. His mother had carefully trained him in the Bible, and told him much of the early Moravian Brethren. He learned the craft of gardening. While in England he saw a placard on the wall announcing a missionary meeting. He attended, listened with great interest, and that night in his quiet chamber he prayed that if it were God's will He would send him forth to preach the gospel to the heathen. Having resolved to be a missionary, he offered himself at the age of nine-

teen to the L. M. S.; was accepted, and after spending some time in special study, was ordained; sailed from England for South Africa October 31st, 1816, and arrived at Cape Town in 1817. His request to proceed inland being refused by the Governor of Natal, he remained several months at the Cape, studying in the meantime the Dutch language with a Christian Hollander. This tongue was chiefly spoken at that time by Europeans in South Africa. At length permitted to proceed, Moffat set out from Cape Colony, through the territory of the Boers, for Namaqualand, in the Orange River country, and especially for the district controlled by Africaner. This chief had been outlawed for barbarous crimes, and his name had been a terror to all the region. But he had become a convert to Christianity. The farmers did not believe the reported conversion, and predicted Moffat's destruction. After incredible perils and difficulties he reached a mission station called Warm Baths, where the native Christian teacher and the people insisted on his remaining, the women declaring that they would block the wheels of his wagon with their own bodies, when a party from Africaner's men appeared and carried him off to the kraal of Africaner, beyond the Orange River. He arrived January 26th, 1818, and was cordially received by the chief, who ordered some women to build a house for the missionary. In this hut he remained six months, exposed to the sun, rain, dogs, snakes, and cattle, doing his own sewing and cooking, and often having nothing to cook, consoling himself with his violin and the Scotch Psalms, but with all his hardships maintaining regular day-schools and preaching services. Africaner was a regular attendant, and proved himself to be a true Christian, very docile, a firm friend and efficient helper of the mission. In 1819 Moffat visited the Cape for the double purpose of getting supplies and introducing Africaner to the governor. The chief hesitated to go, since he was an outlaw; but when assured of safety he consented. The presence of Moffat was a surprise to the people, who supposed he had long since been murdered by Africaner, and even his testimony to the entire reformation of the chief was utterly disbelieved. On Moffat's arrival at Cape Town the governor received Africaner with great kindness, and expressed his pleasure at seeing one who had been the "scourge of the country, and the terror of the border colonists." He was also much struck with this result of missionary enterprise. As a testimony of good feeling he presented to Africaner a wagon worth £80. The people who had been for twenty years familiar with Africaner's deeds were struck with the mildness of his demeanor, also with his knowledge of the Scriptures. Mr. Moffat had intended to return at once to his station with the purchased supplies, but was prevailed upon by the deputation from the L. M. S., Rev. J. Campbell and Dr. Philip, who had just arrived, to accompany them in their visits to the mission stations. While at Cape Town he was married to Miss Mary Smith, to whom he had long been engaged, and who had come from England to meet him. In 1820 he left the Cape with his wife for Griqua Town, and eventually was appointed to the Bechuana tribes lying west of the Vaal River. In 1821 he commenced a mission at Kuruman, where for many years he labored, preaching, teaching,

translating Scripture, composing hymns and books, without seeing the people converted. In 1829 he visited the Matabele tribes lying south of the Zambesi, and in 1835 established a mission there. The results of these journeys were published in England. About 1830 he completed a translation of Luke, and printed it at Cape Town. He returned with this and a hymn-book in the native language, a printing-press, type, paper, and ink, having learned to print while at the Cape. After this the mission greatly prospered. He made frequent excursions into the interior to visit other tribes, where, amid great perils and strange adventures, he made known the gospel, and prepared the way for other laborers. By 1838 the entire New Testament was translated, and in 1839 he went to England to get it printed. He made there a deep impression by his addresses. He published also in 1842, while at home, "Missionary Scenes and Labors in South Africa." Returning to his station in 1843, he says: "Many were the hearty welcomes we received, all appearing emulous to testify their joy. Some whose hearts had sickened with deferred hope would ask again and again, 'Do our eyes indeed behold you?'" In 1857 he completed single-handed the translation of the whole Bible into Bechuana, which was printed at Kuruman. In 1858 he went to Cape Town, returning with a reinforcement for the new Matabele Mission. His son was at Matabele, and afterwards took up his father's work at Kuruman, where his sister was engaged in teaching. The first church was formed in 1829, at Kuruman. His eldest daughter was married in 1844 to Dr. Livingstone. In 1870, enfeebled by age and work, Mr. Moffat returned to England. Mrs. Moffat, who for more than a half-century had been a sharer of his labors and trials, died in 1871. In 1872 he received from the University of Edinburgh the degree of doctor of divinity, and a testimonial of about £6,000. He died at Leigh, near Tunbridge Wells, August 9th, 1883.

Moffat sought not only to Christianize the natives, but to induce them to abandon their savage modes of life, and adopt the arts of civilization. By precept and example he succeeded in turning murderous savages into a "people appreciating and cultivating the arts and habits of civilized life, with a written language of their own." "The discouragements and dangers which Moffat met were overcome by his strong will, heroic faith, and genial humor."

**Mofuss**, town in East Sherbro country, West Coast, Africa, southeast of Mambo and northeast of Toungkoloh. Mission station of the United Brethren in Christ (U. S. A.); 33 church-members, 21 scholars.

**Mogadore**, a city of Morocco, Barbary States, North Africa, on the Atlantic coast, 130 miles southwest of Morocco City. Substantially built: houses large, flat-roofed; some of the mosques fine; the harbor is the best on the coast of Morocco. Population, 20,000, many of them Jews. Mission station of the London Society for the Jews; 1 missionary.

**Mograhat**, town in Bengal, East India, 32 miles southeast of Calcutta, 12 from Barripur. Mission station S. P. G. with Barripur.

**Moge-Mirim** or **Mogy Mirim**, town in Southeast Brazil, northwest of Campinas and

Sao Paulo, southwest of Espirito Santo. Mission station of the Presbyterian Church (South), U. S. A.; 1 native pastor, 1 church, 80 members.

**Mohammedanism.** — I. *The Problem.*—Islam is the greatest organized opponent of Christianity. Geographically it has an unbroken field from the Philippine Islands in the Pacific to Sierra Leone on the Atlantic, and from the snows of Crimea to the Equator. It has been successful with every race type—Semitic, Aryan, Turanian. It has won to its banners polytheists, pantheists, Jews, and Christians. It has steadily grown in war and peace for over a thousand years, and to-day controls the religious life of two hundred million human beings. It has a common religious language (Arabic), which is rich and expressive, and which is the medium of a literature of wide range and enduring power. It is the language of commerce throughout two thirds of the continent of Africa, and is preparing the way for the extension of a Moslem civilization. There is a simplicity of practice in Islam which easily adapts itself to its environment wherever it has gone. Although politically Mohammedanism has always tended toward despotism, there is running through it all a democratic spirit, which recognizes the brotherhood of man, and which places all believers on a common level. Its ethical and doctrinal code is lofty and pure as contrasted with all other extra-biblical religions; and even when contrasted with many degraded forms of Judaism and Christianity, it does not take a secondary place. It develops strong individuality, and yet binds the faithful together as few religions have been able to do as effectively. In the earlier days Islam was a political as well as a religious unit. As a type of the ancient life which fashioned the nation on the war principle, Islam was a success for centuries; but under the new conditions, when nations are being more and more fashioned on the industrial principle, it can never succeed politically. Moslem powers are steadily weakening as civilization advances. In the endeavor to keep in line with the progressing nations, Moslem rulers invariably impoverish their lands to the last degree and make industrial progress impossible. Moslems flourish best under Christian rule or under a controlling Christian influence. Syria under the Sultan is growing poorer every day, while Egypt under English guidance is growing richer. The tendency to revert to a nomad civilization in Mohammedan countries has about reached its limit.

But while the political power of Islam is weakening, and as far as civilization is concerned may be counted as dead, the last few years have witnessed a great religious revival in the Moslem world, especially in Turkey, Russia (Caucasus and Central Asia), India (Bengal), Australasia (Java and Sumatra), and Africa. Steamship lines make Mecca more accessible, and religious zeal, fanned to a white heat at the pilgrim festivals, is making surer and even more rapid conquests than did the sword. In 1888 Sumatra alone had 50,000 Moslems who had made the pilgrimage to Mecca. Loss of political power seems to bring unity of religious life to the Mohammedan world, the like of which has not been witnessed since the Ommeiads from Damascus ruled an unbroken territory from

the Indus to the Atlantic. Islam is throwing itself with all its combined forces upon the inferior races of Asia, Australasia, and Africa, and is winning them to its faith. It is its last opportunity. Another century must see vast transformations, and a Christian civilization is sure to win.

Mohammed, by accepting Jesus as the promised Messiah of the Old Testament, allied himself with Christianity rather than with Judaism. He gave all credit to the original text of the Scriptures, and claimed to have been predicted by Christ as the fulfiller of the New Testament dispensation. His rejection of the crude tri-theistic Christianity about him shows the vitality of his religious instinct. The minutiae of detailed ceremonial in Islam undoubtedly was the result of Jewish influence, while its missionary fervor was Christian. The genius of Mohammed coined the metals at his hand and put his own image and superscription on the mixed resultant. His admissions as to Jesus and the original Scriptures will in the coming struggle be the open door for the Christian apologetic. In 627 A.D. Mohammed sent from Medina the following letter to Heraclius, Emperor at Constantinople. It was his first strictly foreign missionary effort, and speaks of peace.

"In the name of God the Compassionate, the Merciful. Mohammed, who is the servant of God, and is His apostle, to Heragl the Qaisar of Rum; peace be on whoever has gone on the straight road. After this I say, verily I call you to Islam (resignation or submission). Embrace Islam, and God will reward you twofold. If you turn away from the offer of Islam, then on you be the sins of your people. O people of the Book (Christians), come toward a creed which is fit both for us and for you. It is this—to worship none but God, and not to associate anything with God, and not to call others God. Therefore, O ye people of the Book, if ye refuse, beware! But we are Moslems, and our religion is Islam.

(Seal.) Mohammed, The Apostle of God."

This letter reveals the sober sense of Moslems to-day as they look over into the Christian camp. It is not unlike the letter sent by the Mahdi to Emin Pasha a short time ago. We must prove to these 200,000,000 votaries of Islam that we do "worship none but God," and that we do not "associate anything with God" and "call others God." It was a misconception from the first (natural enough when we consider the phase of Christianity presented to Mohammed), and it is a misconception emphasized by a thousand years of contact with half-idolatrous Christian sects in a state of decadence. The problem before the Christian Church is to take away this misconception, to present the gospel in its simplicity, and to lead this great unitarian disaffection back to the truth. The doctrine of the Trinity is vitally involved, and the Arian controversy must be fought all over again. The Incarnation must be shown, even more clearly than the thought of a millennium and a half has been able to do, to be not only a fact, but a reasonable fact, though still a mystery.

Recent controversy over the usefulness and power of Islam has called attention away from the true issue. Moslems can never be won over to Christianity by a series of wholesale maledictions, nor by a weak yielding of the vital facts of a true faith. The truths contained in

the Koranic creeds should be readily granted, but it must be understood by way of caution that truths may be so connected that the result may be a great falsehood. Good bricks may be used in putting together useless structures. Islam has happily been characterized as a "broken cistern,"—so badly broken that it must be all torn down, and many new bricks added before it may hold water; but it is a cistern still. The historic relations of Islam with Judaism on the one hand and with Christianity on the other will be considered later on, but there cannot be a question but that Mohammed and his early followers looked upon the Abyssinian Christians as their religious neighbors and kinsmen. From the first that peculiar relationship has been noted. Dean Stanley calls special attention to this when he says: "Springing out of the same Oriental soil and climate, if not out of the bosom of the Oriental church itself, in part under its influence, in part by way of reaction against it, Mohammedanism must be regarded as an eccentric heretical form of Eastern Christianity. This, in fact, was the ancient mode of regarding Mohammed. He was considered not in the light of the founder of a new religion, but rather as one of the chief heresiarchs of the church." Döllinger agrees with this, and says: "Islam must be considered at bottom a Christian heresy, the bastard offspring of a Christian father and a Jewish mother, and is indeed more closely allied to Christianity than Manichæism, which is reckoned a Christian sect." (Lect. "Reunion of Churches," p. 7, translated by Oxenham, 1872). Ewald calls it "the last and most powerful offshoot of Gnosticism." John of Damascus, who did his work early in the eighth century, at the very seat of the Ommeiad dynasty, did not consider Islam a new religion, but only a Christian heresy. The same was true of Samonas of Gaza, Bartholomew of Edessa, Peter Abbot of Clugny, Thomas Aquinas, Savonarola, and most of the mediæval writers. Radulfus de Columna, who wrote about 1300 A.D., says: "The tyranny of Heraclius provoked a revolt of the Eastern nations. They could not be reduced, because the Greeks at the same time began to disobey the Roman Pontiff, receding, like Jeroboam, from the true faith. Others among these schismatics (apparently with the view of strengthening their political revolt) carried their heresy further, and founded Mohammedanism." The very errors in this statement are instructive. Dante consigned Mohammed to the company of heresiarchs in the "Inferno" (canto 28). Turning to the early Protestant confessions, we find similar notions. The Augsburg Confession condemns as heresies Manichæism, Valentinianism, Arianism, Eunomianism, Mohammedanism, "and all similar to these." The second Helvetic Confession condemns Jews, Mohammedans, and all those heresies teaching that the Son and the Spirit are not God.

Doubtless there has been a tendency to carry this idea of the identity between Islam and Christianity too far, and we are in a reactionary period just now. But without a certain sympathy and an open acknowledgment of the truth in Mohammedanism, the missionary can never hope to win Moslems. When once the principles of higher criticism are understood in the Mohammedan world, Mohammed's admissions as to the inspiration of the original Christian Scriptures will be used with effect, for we

have manuscripts of the New Testament older by several centuries than the rise of Islam. His admission of the miraculous birth of Jesus, of His miraculous power, of His deathlessness, and that He will be the Judge at the last great day will also play an important part in the controversy.

The great difficulty is that Islam has not preserved its early simplicity, and tradition plays a prominent part in Moslem belief and practice. Any movement like that of the Wahabees is a good symptom. A larger number of sects have arisen within the pale of Mohammedanism than can be found in Christendom. Saint-worship has sprung up in many forms, and monastic orders have been established. Fanaticism crops out at frequent intervals. It is death for any but Moslems to visit Mecca, and except under Christian law, it is death for a Mohammedan to change his religion.

It is into this vast field that the Christian Church is sent by its Master. Already the field has been cultivated a long while, and the harvest is as yet insignificant. The problem is as various as the sects and nationalities in the Moslem world. Patient labor, instruction in fundamental questions of philosophy and religion, the cultivation of an historic sense, the example of pure lives and a Christlike self-denial must at last give effect to the striving of the Spirit upon these hearts of flint.

**II. Pre-Islamic Arabia** (see Arabia).—Arabia, cut off from the rest of the world by deserts and seas, unconquered by Assyrian, Babylonian, Persian, Egyptian, Greek, or Roman, was the last place to which a prophet would have looked for the rise of such a phenomenon as Islam. It was not always thus isolated, for the latest research gives evidence of a very ancient civilization, which was the connecting link between Egypt and Babylonia in the earliest periods. But up to the time of Mohammed the Arabs had remained free. The peninsula, together with adjacent regions, inhabited by Arabs, covered about 800,000 square miles, or an area as large as the United States east of the Mississippi. Throughout the early centuries its inhabitants probably averaged from 9,000,000 to 10,000,000 people, divided up into tribes, some of which were nomadic, while the large majority were settled. The southern portion of the peninsula was well cultivated, and furnished many valuable articles of commerce. The tribes were for the most part independent, or were loosely bound by confederacies. There was no nation of Arabs until the genius of Mohammed welded together the heterogeneous mass and gave Arabia a distinct mission, which harmonized with a latent pride and love of conquest.

In the earliest days commerce seems to have been a predominant occupation in Arabia. The caravan trade furnished occupation to a large proportion of the inhabitants. At that era commerce was almost entirely confined to the land. The influence of Rome, and the development of a merchant marine under government protection and patronage, and the disturbed condition of the Persian frontier, broke up the monopoly of the Arabs, and many tribes were compelled to betake themselves to a nomad life. We have traditions of great emigrations from the more crowded south northwards, which occurred before the historic

period, which removals were doubtless caused by the interruption of the caravan trade.

The story of Arabia until the period of Mohammed is confused. Putting aside conjecture, which has taken great license with the mysterious peninsula, we learn of a number of kingdoms which wielded considerable power. The Himyarites in the southwest formed the most prominent political combination in Arabia. Their king, Abd Kelâl, who reigned about 275 A.D., is said to have been converted to Christianity by a Syrian stranger, and was murdered by his subjects. His son, Marthad, was famous for his religious toleration. He is reported to have said: "I reign over men's bodies, not over their opinions. I exact from my subjects obedience to my government; as to their religious doctrine, the judge of that is the great Creator." Constantius, the Byzantine emperor, about the middle of the fourth century sent an embassy to the Himyarites, wishing to strengthen his alliance with them and to attract them to Christianity. Two hundred Cappadocian horses of the purest breed were sent as a present, and Bishop Theophilus undertook the mission work. Churches were built at the capital, Tzafar, at Aden, and one on the Persian Gulf. Arabian historians make no mention of this mission. A little later the Himyarites began to decline, and became a sort of dependency of Abyssinia, a Christian kingdom across the Red Sea. Between 490 and 525 A.D. Dhu Nowas, in the district of Najran, took the reins of power in his hands. He was a recent convert to Judaism, and persecuted Christians bitterly in that region. They were offered Judaism or death, and twenty thousand are said to have perished. One intended victim, Tholaban, escaped to Hira, and holding up a half-burnt copy of the Gospel, invoked, in the name of outraged Christendom, retribution. Justin I. sent a message to the Abyssinian monarch, asking him to inflict punishment on the usurper. Dhu Nowas was defeated, and the Najran became an Abyssinian dependency. A zealous Christian, Abraha, had become Abyssinian viceroy somewhat later in Yemen. Bishop Gregentius was sent by the Patriarch of Alexandria to assist in pushing the interests of Christianity. A cathedral was built at Sana, and an attempt made to make it the Mecca of the peninsula. The Meccans were displeased, and killed one of the Christian missionaries. A Koreishite from Mecca defiled the cathedral at Sana, whereupon Abraha set out on an expedition, about 570 A.D., to destroy the Kaaba. His army was destroyed, and the episode has come down in Mohammedan story as the affair of "The Elephant." Mohammed was born a few months after. By the aid of the Persians the Abyssinians were finally expelled, in 603 A.D., and Southern Arabia became thereafter loosely dependent upon that eastern rival of the Byzantine empire, until it was absorbed, in 634, by Moslem conquest.

Along the Persian frontier was another considerable political power—the kingdom of Hira, founded in the second century of our era, and having political autonomy until the spread of Islam. It looked to Persia for help in its various wars, and tended more and more towards a dependent condition. Along the Syrian border, and more or less under Byzan

tine influence, was the kingdom of the Ghassanides, which early came under the influence of the western civilization. Christianity had a strong following in this region from the first, and the whole kingdom was under Christian influence. The kingdom of the Kindites, in Central Arabia, was another political unit, but much weaker than the other three. At Mecca we find the powerful Koreish tribe, which had control of the Kaaba, the religious centre of native Arabian religion.

The religion of Pre-Islamic Arabia may be called heathen, with constant tendencies in the nobler minds toward a conception of one supreme God. Mohammed speaks of the era before him as "the times of ignorance," which he came to do away with. At the Kaaba there were said to have been three hundred and sixty-five images of the gods, who were looked upon as the children of Allah, the creator of all. The wife of Allah was Al-hat, or Al-Ozza, and the Meccans looked upon their local gods as daughters of this union. Sexual dualism thus was the fundamental religious notion of the Arabs. Idols were found in every house, and formed an important article of manufacture. Religion was a sort of barter, which the individual carried on with the gods or goddesses whose aid he desired or whose vengeance he wished to avert. Festivals and pilgrimages, punctiliously attended to, made up a large part of religious life and worship. There was a considerable stir of literary life, and renowned poets contested at the annual fairs for pre-eminence. The successful poems were displayed on the walls of the Kaaba. These poems, some of which have come down to us, show the lowest grade of morals. Drunkenness, gambling, gross love intrigues, vengeance, theft, the loosest possible family ties, the degrading of woman to a mere animal existence—all these traits, common throughout Arabia, make plain the utter inadequacy of the prevailing faith to elevate the life. Add to this the widespread tendency toward atheism and indifference.

Such a state could not last long. Serious minds turned in every direction for help. There arose an ascetic fraternity who called themselves Hanifs (penitents). They sought to go back to the simple faith of Abraham, whom they styled the first Hanif. They proclaimed themselves as seekers after truth, and adopted the life which had been set before them for centuries by Christian hermits, whose rigid vigils had impressed the Oriental mind. Among these Hanifs were Obaydallah, own cousin of Mohammed, Waraqah and Othman, cousins of Khadijah; all three of whom found their way to Christianity. Zaid ibn Amr, an aged Hanif, was seen leaning against the Kaaba, and sadly stretching his hands upward, and praying: "O God, if I knew what form of worship is most pleasing to Thee, so would I serve Thee; but I know it not." Mohammed was touched when this was reported to him, and said: "I will pray for him; in the resurrection he, too, will gather a church around him." It cannot be said that these Hanifs were Jews or Christians, yet they could not have arisen without these two religions as fore-runners. They anticipated the central idea contained in the word "Islam" (resignation), and their conception of God was summed up in the word "Judgment." We shall see later

how Mohammed became a Hanif, and gave shape, proportion, and continuity to a half-faith which was floating about Mecca and Medina (Yathrib), and how he originated a church polity in closest union with a political organization, the combination of which was destined to make him the moral ruler over more human beings than have ever been controlled by any other man.

The whole question of Christianity in Arabia is very obscure. Christians fled for refuge from the Roman persecutions to the fastnesses of the Syrian desert in the early days of Christianity. Paul himself spent three years among Arabs, whether on the Sinaitic peninsula or along the border of the desert south of Damascus. A local church council at Bostra shows a large growth of Christianity east of the Jordan before the close of the third century. The Ghassanides were first reached, and bishops were appointed to follow the wandering tribes in their migrations. The faith penetrated the desert south and east along caravan routes, and we may be sure that by the middle of the third century Christianity was well known in many parts of Arabia. We have seen how the Himyarites were reached in the succeeding century. Hira and Kufa, along the Persian frontier, about the same time learned of Christianity through Nestorian missionaries. A king of Hira was converted in the sixth century. Other tribes, such as the Beni Taghlib of Mesopotamia, the Beni Haris of Najran, the Beni Tay, and various tribes about Medina (Yathrib) became nominally Christian. Ali Saad sneeringly said, "The Beni Taghlib are not Christians; they have borrowed from Christianity only the custom of drinking wine." In the first wars between the Persians and the rising Moslem power the Christian Arabs of the northeastern frontier joined the Persians. But in spite of this spread of Christian knowledge throughout the peninsula it did not seem to take any vital hold. It was swept away at the first onset of Islam. The nomad life in the desert was not conducive to Christianity. Hostile Judaism to some extent neutralized its efforts. Northern Arabia was the battlefield between Persian and Byzantine. The form of Christianity which penetrated into Arabia was of the most inferior type. The apocryphal gospels were held as of equal value with the real gospels. The doctrine of the trinity was travestied by a crude tri-theism, in which the three persons of the Godhead were God the Father, God the Son, and the "Virgin Mary." This sounded to Mohammed like the sexual dualism of the "times of ignorance." Jacobite and Nestorian influences predominated. It is doubtful whether the Bible or any portions were put into the vernacular. The haughty nature of the Arabs could with difficulty accept the humble and forgiving spirit of the gospel. The Abyssinians, although making up a powerful Christian kingdom, were of negro blood, and hence uninfluential. "In fine," says Muir, in summing up this subject, "viewed thus in a religious aspect the surface of Arabia had been now and then gently rippled by the feeble efforts of Christianity; the sterner influence of Judaism had been occasionally visible in a deeper and more troubled current; but the tide of indigenous idolatry and of Ishmaelite superstition, setting from every quarter with an unbroken

and unebbing surge towards the Kaaba, gave ample evidence that the faith and worship of Mecca held the Arab mind in a thrall of rigorous and undisputed. Yet, even amongst a people thus enthralled, there existed elements which a master mind, seeking the regeneration of Arabia, might work upon. Christianity was well known; living examples of it were amongst the native tribes; the New Testament was respected, if not revered, as a book that claimed to be divine; in most quarters it was easily accessible, and some of its facts and doctrines were admitted without dispute. The tenets of Judaism were even more notorious, and its legends, if not its sacred writings, were familiar throughout the peninsula. The worship of Mecca was founded upon patriarchal traditions believed to be common both to Christianity and Judaism. Here, then, was a ground on which the spiritual fulcrum might be planted; here was a wide field, already conceded by the inquirer at least in close connection with the truth, inviting scrutiny and improvement. . . . The material for a great change was here. But it required to be wrought, and Mohammed was the workman."

Jews had made their homes in the Arabian peninsula in the earliest times. From the days of Solomon the Red Sea was the avenue of a thrifty commerce, and Hebrews had probably located at the trading ports. Later the conquests of Palestine by Assyrians, Babylonians, Persians, Egyptians, Greeks, and Romans had sent waves of Jewish immigration into the desert. The fall of Jerusalem and the rebellion of Bar Cochab had driven thousands of Jews in the footsteps of their brethren. A number of native Arab tribes embraced Judaism, and in the time of Mohammed we find this people scattered all over the peninsula, in small compact colonies. There were a large number of colonies near Medina, and from their teachers Mohammed drew much of the material found in the Koran. At first he hoped to win them to Islam, and contemplated making Jerusalem the Kibla. Their obduracy changed his temper, and in the conflicts that ensued thousands of Jews were butchered, and most of the others submitted to Islam. Communities of Jews are still to be found in Southern Arabia who have clung to their faith all these centuries.

III. *The Life of Mohammed.*—Into this world of conflicting dogmas Mohammed was born in the year 570 A.D., at Mecca. This city, situated on the caravan route between Yemen and Syria, had for centuries been famous for the Kaaba, which contained the sacred Black Stone and formed the centre of the Arabian peninsula. The leading tribe had for years been the Koreish, and Mohammed sprang from the Beni Hashim, a noble though somewhat waning branch of this tribe. His father's name was Abdallah. Returning from a mercantile trip to Syria, Abdallah was taken sick at Medina, and died some months before the birth of Mohammed. His mother, Amina, according to the prevailing custom, put the infant out to nurse with Halima, a woman of the Beni Sád, one of the Bedawin tribes, where he remained four or five years, acquiring the free manners and the pure tongue of the nomads. His Bedawin nurse was more than once alarmed by epileptic symptoms in her charge, and at the age of about five years he was given back to the keeping of Amina. The following year,

while travelling toward Medina with her boy, Amina died, and the orphaned Mohammed was taken up by his uncle, Abu Táleb, who became his faithful guardian. At the age of twelve years Mohammed accompanied his uncle on a mercantile trip to Syria, when he first came in contact with the rites and symbols of Oriental Christianity. As a youth he lived for the most part quietly, keeping the flocks of Abu Tálib, and at the age of twenty-five, his uncle being poor, he entered the service of a rich widow named Khadija. He was sent by her on a trading journey to Syria, and superintended the caravan. Khadija was delighted with her agent's service, and though almost double his age, soon became his wife. She bore him four daughters and two sons. Both sons died. The youngest daughter, Fatima, married Ali, and thus became the ancestress of all the Moslem nobility.

When approaching his fortieth year Mohammed began to retire from his family for the purpose of meditation. The gross idolatry of Arabia oppressed his mind. He was aroused but not satisfied by his slight knowledge of Judaism and Christianity. For days at a time he would continue in a lonely cave on Mount Hira. Ecstatic reveries accompanied his meditations, and he finally came to believe himself called to be the reformer of his people. After a period of silence known as the *fatrah*, these revelations continued with more or less frequency till the end of his life.

Khadija was his first convert. The first three years of his preaching resulted in the conversion of some forty of his relatives and friends, among whom were Ali, Zeid, Abu Bekr, and Othman. His teaching against idolatry developed fierce opposition, in which Mohammed was safe under the protection of Abu Táleb, but others suffered persecution, and in 615 eleven men fled to Abyssinia. In 620 Abu Táleb and Khadija died. Mohammed afterward married other wives, nine of whom survived him. Proceeding to Táif, he was unsuccessful in his appeal to the people there, but returned strengthened by a dream of a journey to heaven. In 621 his cause was greatly advanced by the addition of twelve pilgrims from Medina, and the following year the band was increased to seventy, who were pledged to receive and defend the prophet in Medina. His brightest hopes now centred about the northern city. Abandoning Mecca, he and 150 followers in little bands fled to Medina. This date marks the era of the Hégira (migration), A.D. 622.

At Medina Mohammed built a mosque, instituted rites of worship, and declared war against unbelievers. The Jews rejecting his claims, he became their bitter foe. In 623 the battle of Bedr resulted in a signal victory for the Moslems over the Meccans. A year later he was defeated by the Koreish at Uhod, and Medina was unsuccessfully besieged by 4,000 Meccans. About this time the Beni Koreitza, the last of the Jewish tribes in the neighborhood, surrendered to the power of Mohammed, and over 600 men were beheaded by his order. In the sixth year of the Hégira Mohammed, with 1,500 followers made a pilgrimage to Mecca, but was refused admittance. A truce was signed at Hodeibia, near the city, suspending hostilities for ten years, and granting permission for a pilgrimage the following year. Discontent was allayed among the Moslem con-

verts by an expedition against the Jews of Kheibar, yielding rich booty.

His plans now widened, and the same year he sent written demands to the Persian king, Chosroes II., Emperor Heraclius, the Governor of Egypt, the Abyssinian king, and several Arab tribes.

Chosroes tore up the letter and Muta killed the envoy. To revenge this insult Mohammed fought a losing battle at Muta, on the Syrian border, where his friend Zeid was killed.

A breach of the truce at this time by the Koreish gave grounds for attack, and Mohammed at the head of 10,000 men entered Mecca in triumph in 630.

In the course of the year Tâif submitted, and this ended opposition in the peninsula. In 632 Mohammed with his wives and 40,000 adherents performed the "Farewell Pilgrimage" to Mecca. The rites of this pilgrimage are still scrupulously followed. Three months after Mohammed fell sick and died in the house of his favorite wife, Ayesha, after having liberated his slaves and distributed alms to the poor. He was buried in the room where he died, which is now included within the Great Mosque.

The person of Mohammed was attractive. Though little above the ordinary height, his presence was stately and commanding. His expression was always pensive and contemplative. His eyes and hair were black, and a beard reached to his breast. His gait was quick, and is said to have resembled a man descending a hill.

As to his character, up to the end of his life in Mecca his sincerity cannot be doubted, and his conduct seems beyond reproach. He believed himself to be the divinely appointed messenger for the overturning of idolatry, and he suffered for years the taunts of a nation with apparently no ulterior motive but the reformation of his people. Secular history can furnish no more striking example of moral courage than Mohammed bearing patiently the scorn and insults of the Koreish. From the beginning of life in Medina temporal power and the acquisition of wealth and glory mingled with the Prophet's motives. Cruelty, greed, and gross licentiousness were justified by special "revelations." His conduct during the last ten years of his life seems to bear out this estimate of his character, "that he was delivered over to the judicial blindness of a self-deceived heart."

**IV. The Korân.**—Like Christianity, Islam centres about a book. This book is the Korân ("reading" or "that which is to be read"). This title is applied by the Moslems to the whole book or to such selections as may be used at one time. The Korân is the foundation of Islam. The faithful believe that the original text existed in heaven as a "concealed book," "a well-guarded tablet." By a process of "sending down," one piece after another was communicated to the Prophet, who in turn proclaimed them to his immediate circle of followers, and so to the world. The Mohammedan idea of God excludes the thought of direct intercourse between God and the Prophet, and this rendered necessary a mediator, who is sometimes known as the "Spirit" and again as "Gabriel," who dictated the words directly to Mohammed. This being the origin and nature of the Korân, all Moslems hold to its absolute

verbal inspiration, and regard it as the rule of faith and practice, from which there can be no appeal.

The Korân as given to the Moslem world is in Arabic, a volume slightly smaller than the New Testament. It is divided into 114 chapters or *suras*, of very unequal length, a *sura* literally meaning a row or series. This collection constitutes the Revelation proclaimed by Mohammed as received during the last twenty-three years of his life. The heading of each *sura* indicates whether it was revealed at Mecca or Medina, though it must be noted that these headings are the work of commentators, and form no part of the inspired text. Every *sura* is in turn divided into verses, though it is doubtful if these subdivisions are actually numbered in any manuscript copies.

The 114 chapters are arranged seemingly in a most artless manner, without regard to chronology or doctrine, the only order discernible being that the longest are placed first, with the notable exception of *Sura I.*, called the *Fâtihat*. So far as is known, Mohammed himself never wrote anything down, and if he was acquainted with the arts of reading and writing (which some have disputed), it seems that he found it more convenient to employ an amanuensis whenever he had anything to commit to writing. At the time of his death the revelations existed only in scattered fragments, on bits of stone, leather, and thigh-bones. The great repository of truth was in the minds of his followers. With the marvellous tenacity of the Arab memory, large numbers of Moslems at the time of their Prophet's death could repeat the principal *suras*, and soon after some are mentioned who could recite the whole without an error. With Mohammed's death the canon was closed, but up to this time no attempt had been made to systematically arrange or even to collect the contents. In the second year after this event a vast number of the best reciters of the Korân were slain at the battle of Yemâna, and Omar became convinced that the divine revelation ought to be put on a less precarious footing. The attention of Abu Bekr being called to the matter, he speedily appointed Zeid, the chief amanuensis of the Prophet, to make the collection.

Zeid worked diligently, and brought together the fragments of the Korân from every quarter, gathering them from "palm-leaves, stone tablets, the breast-bones of sheep and camels, from bits of leather, but most of all from the breasts of men." The tablets of the Arab memory were at that time the reliable source of much of the revelation. The manuscript thus formed was given into the keeping of Haphsa, one of the Prophet's widows, and remained during the caliphate of Omar the standard text.

As transcripts of this original were made variety crept in, and in the caliphate of Othmân, sometime a little later than 33 A.H., Zeid was appointed to make a recension of his former text. With a committee of three Koreish to act as final judges in disputed cases, the new collection was made in the pure Meccan dialect, which Mohammed himself used. The former copies were called in and burned, and the recension of Othmân has remained down to the present day unaltered. All the facts warrant us in supposing that the Korân as now existing contains the very words

as delivered by the Prophet. Various readings are practically unknown.

One source of the Korân's power is the simplicity of its doctrine. The unity of God, Judgment, and Islam (that is, submission to His will) are the fundamental teachings. The whole substance of the religion is comprehended under two propositions, which are sometimes spoken of as the Mohammedan "Confession of Faith," viz., "There is no God but God, and Mohammed is His Prophet." The former sweeps away idolatry, and the latter at once lends divine authority to every precept of Mohammed. The portion of confession pertaining to faith embraces six branches: Belief in God; in His angels; in His scriptures; in His prophets; in the resurrection and the day of judgment; in God's absolute decree, and predestination of both good and evil.

Relating to practice, there are four points: prayer, alms, fasting, and the pilgrimage to Mecca.

Salvation depends on belief, and "the believer is at the same time bound to do good works, and, in particular, to observe the ordinances of Islam." Large portions of the Korân deal with the narratives of the Jewish and Christian Scriptures, showing that Mohammed had come in contact with the corrupt forms of these religions then in Arabia. The Old Testament characters, especially the Patriarchs and Prophets, and Our Lord Himself, are regarded with the greatest reverence. His narratives taken from the Jewish and Christian sources are, however, often garbled, and many are drawn from later apocryphal accounts. The Korân prescribes an ethical code, dealing with the relation of the sexes, inheritance, the indulgence of appetites, etc. If we may trust the opinion of some of the most learned of modern scholars, the Korân is to-day the most widely-read book in existence.

**V. The Hadeeth or Traditions.**—All Mohammedans regard the Koran as the only divine book, but along with it they place what they consider to be the well-authenticated sayings of the prophet, which they call "an unread revelation." The utterances that have in this way come down purport to be authoritative declarations on religious, ethical, and ceremonial subjects, "uninspired records of inspired sayings." They inform us not only what Mohammed said and did, but what he allowed others to say and do unrebuked. Mohammed was much afraid that he would be misreported, and commanded his adherents as follows: "Convey to other persons none of my words except those ye know of a surety. Verily he who represents my words wrongly shall find a place for himself in the fire." How poorly this injunction was followed is evident from the fact that Abu Daud received only 4,800 traditions out of 500,000. Thus it appears why there is such a diversity of opinion among Mohammedans. Various canons of criticism have been laid down by learned Moslems by which these traditions may be sifted—such as the integrity of the persons transmitting the saying, the number of links in the chain of narrators, the style of composition, etc. The first attempts to collect these traditions were made in the 8th century. The work of Imam Malik is held in the greatest esteem. The six standard collections (out of 1465 in all) are by (1) Mohammed Ismail al Bukhari, A.H. 256;

(2) Muslim ibnu'l Hajjaj, A.H. 261; (3) Abu 'Isa Mohammed at-Tirmizi, A.H. 279; (4) Abu Da'ud as-Sajistani, A.H. 275; (5) Abu 'Abdi'r-Rahman an Nasa'i, A.H. 303; and (6) Abu 'Abdi'llah Mohammed Ibn Majah, A.H. 273.

All the Moslem sects receive the traditions, although the Sunnites arrogate to themselves the title of "Traditionists." The following are a few characteristic sayings of Mohammed:

"I am no more than a man, but when I enjoin anything respecting religion, receive it, and when I order anything about the affairs of the world, then I am nothing more than a man."—"I have left you two things, and you will not stray as long as you hold them fast. The one is the book of God, and the other is the law (Sunnah) of his prophet."—"Some of my injunctions abrogate others."—"My sayings do not abrogate the Word of God, but the Word of God can abrogate my sayings."

The following is a specimen of the way a tradition was handed down in the collection of at-Tirmizi:

"Abu Kuraib said to us that Ibrahim ibn Yusuf ibn Abi Isahq said to us from his father, from abu Isahq, from Tulata ibn Musarif, that he said, I have heard from Abdu'r-Rahman ibn Ausajah that he said I have from Bara ibn 'Azib that he said I have heard that the prophet said, 'Whoever shall give in charity a milch-cow, or silver, or a leathern bottle of water it shall be equal to the freeing of a slave.'" (See "Tradition" in Hughes' Dict. of Islam, and Muir's Life of Mahomet, Vol. I., Intro., p. xxviii.)

**VI. Islam and the Bible.**—Mohammedans profess to receive the Old and New Testament Scriptures, as well as the Koran, as the revealed Word of God. Mohammed and his immediate followers seem to have considered the Koran as being in perfect harmony with the Bible. When the discrepancies were pointed out somewhat later, the learned Moslem doctors claimed that the current Scriptures had been corrupted since Mohammed's time. They claimed that the Koran was in perfect accord with the original Scriptures to which their prophet had access. The modern discovery of texts of the New Testament older than Mohammed's times has seriously weakened that argument. When once they are compelled to admit the genuineness and antiquity of the uncial manuscripts, they will be compelled to show reason for the discrepancies.

The Koran gives a large part of the Old Testament history in a garbled form. Adam, created out of earth, the "chosen one of God," was the first man. Eve, his wife, was created by God from a rib of Adam's left side. Iblees (Satan) tempted them, they fell and were cast out of Paradise. The story of Abel and Cain is embellished with rabbinical additions. Noah, "the Prophet of God," is a prominent person in the Koran, and the narrative of the flood is told with many amusing details. Abraham, "the Friend of God," is mentioned very freely, together with Ishmael and Isaac. The story of the conversion of Abraham is of a high order. "When the night overshadowed him he saw a star and he said, This is my Lord. But when it set he said, I like not those that set. And when he saw the moon rising he said, This is my Lord; but when it set he said, Verily if my Lord direct me not I shall assuredly be of the erring people. And when he saw the sun rising,

he said, This is my Lord. This is greater. But when it set he said, O my people, I am clear of the objects which ye associate with God. Verily I turn my face unto Him who hath created the heavens and the earth; following the right religion I am not of the polytheists." The story of his sojourn in Babylonia is given elaborately. His journey to Palestine, his dealings with corrupt Lot, the half-miraculous birth of Isaac, the destruction of the cities of the plain, the attempted sacrifice of Isaac, together with apocryphal incidents, are tediously set forth. Abraham gives direction to his children as to Islam, the true religion, and is accounted the first "Hanif," the founder of the Moslem faith in its present form. The stories of Isaac, Ishmael, Joseph, the life and bondage of the Hebrews in Egypt, Moses and the wanderings in the desert, Joshua (slightly mentioned), Samuel, Saul, David, Solomon, Job, Elijah, Elisha, Isaiah, Jonah, Ezra, are given in a prolix fashion. Turning to the New Testament we find mention of Zacharias, with John the Baptist, his son, and Gabriel. There is no evidence in the Koran that Mohammed ever saw a copy of the New Testament, but he constantly mentions it as the "Injil which was given to Jesus." The Koran says: (57: 27) "We caused our Apostles to follow in their (i.e. Noah and Abraham) footsteps, and We caused Jesus the son of Mary to follow them, and We gave him the Injil, and We put into the hearts of those who followed him kindness and compassion, but as to the monastic life, they invented it themselves." Again (3: 2): "He has sent thee a book (Koran) confirming what was sent before it, and has revealed the Law and the Gospel before, for the guidance of men." (See also 7: 156; 3: 43; 3: 58; 48: 29; 9: 112; 5: 50, 51, 70, 72, and 110; 19: 31.)

Very full statements are made concerning Jesus Christ. He is called Jesus (Isa), Jesus the Son of Mary, the Messiah, the Word of God, the Word of Truth, a Spirit from God, the Messenger of God, the Servant of God, the Prophet of God and illustrious in this world and the next. Mohammed taught that Jesus was miraculously born of the "Virgin" Mary (Sura 3: 37-43; 19: 16-21) who was the sister of Aaron. The infant vindicated the chastity of its mother miraculously by speaking in its cradle (19: 22-34; 23: 52). Jesus performed miracles in his youth (Apocryphal Gospels) and in his maturity (3: 43-46; 5: 112-115). He was commissioned as a Prophet of God to confirm the Law and reveal the Gospel (57: 26, 27; 5: 50, 51; 2: 81, 254; 61: 6; 6: 85; 4: 157; 3: 44). The Koran affirms that Jesus did not die, but ascended to heaven miraculously, and another victim was, unknowingly to the Roman soldiers, substituted for Jesus on the cross. (3: 47-50; 4: 155, 156.) After he left the earth his disciples disputed as to whether he was a prophet, like Moses or Isaiah, or a part of the Godhead, making up the Trinity as "The Father, the Mother, and the Son." (19: 35, 36; 3: 51; 52; 43: 57-65; 9: 30; 3: 72, 73; 5: 19; 5: 76-79; 4: 169; 5: 116, 117). The Traditions teach that Jesus will come a second time, and that he will be the Judge at the last great day, and that even Mohammed will be judged by him. Jesus, it is claimed, was more than a prophet or an apostle, he was a Spirit of God. He predicted one that should come after him who should carry out his mission, and Moslem theologians affirm that Mo-

hammed was that person. Mohammed himself calls himself "Ahmad," (Sura 61: 6), "The Praised," to adapt his name to the title used by Christ which Moslems claim had been perverted from "Paracitos" to "Paracletos," the former meaning "the Praised" and thus designating Mohammed ("The Praised").

Sir William Muir says: "After a careful and repeated examination of the whole Koran I have been able to discover no grounds for believing that Mohammed himself ever expressed the smallest doubt at any period of his life in regard either to the authority or the genuineness of the Old and New Testaments as extant at his time. He was profuse in his assurances that his system entirely corresponded with both, and that he had been foretold by former prophets; and as perverted Jews and Christians were at hand to confirm his words, and as the Bible was little known among the generality of his followers, those assurances were implicitly believed." (Muir's Life of Mahomet; Lond. ed. Vol. 1. p. lxx.)

**VII. History of Mohammedan Conquests.**—At the time of Mohammed's death (June 8th, 632 A.D., in the 11th year of the Moslem era) the whole of the Arabian peninsula had embraced Islam, with the exception of a few southern tribes which preferred Moseylemah, the "false prophet" of the Nejd. The few hours that succeeded the death of Mohammed were critical ones for Islam. Ali, the nephew and son-in-law of the prophet, a young man, and Abu Bekr, the old staunch follower of Mohammed, and the father of Ayesha, the prophet's favorite wife, were the natural candidates for the leadership. Abu Bekr was at last proclaimed caliph ("successor"), and the wisdom of the election was made plain by the vitality which characterized his reign of two years. The rebellious tribes of Arabia were subdued, the government was thoroughly organized and centralized, and the long career of victory was begun. Under Khaled the armies crossed the Syrian frontier, occupied Bosrah, overran the Hauran, defeated the Byzantine army on the plains of Eznadin, and invested Damascus. After a seventy days' siege this capital of Southern Syria fell August 3d, 634 A.D. (13 A.H.). Sweeping eastward and northward, Khaled defeated a second Byzantine army at Yamook. In the meanwhile Omar succeeded to the caliphate, August 23d, 634 A.D. Jerusalem was conquered, and all Syria was in the hands of Moslems. In the mean time an army was pushing across the Persian frontier. At the battle of Kadiasiya the initial failure of the Arabs was retrieved, Ctesiphon and Susa fell, Mesopotamia was gained, and on the field of Mahavend (641 A.D.) the Sassanid dynasty of Persia received a death blow. The whole of Persia, Khorasan, Kerman, Mekran, Seistan, and Balkh were conquered and assimilated. The century had not passed before the Oxus was the eastern boundary of the caliph's empire.

In 641 A.D. Amr invaded Egypt, which fell with hardly a struggle, the Monophysite Christians throwing in their lot with the Arabs as against the orthodox Byzantines. Othman succeeded to the caliphate in 644 A.D. The armies steadily pushed westward. Libya, Tripoli, Tunis, Algeria, and Morocco fell successively. A Christian civilization made a firm stand at Carthage, but in the battle of Utica (698 A.D.) the Byzantine power was broken, and Musa

rode to his saddle-girths into the Atlantic, and with raised sword took possession of the regions beyond in the name of Allah.

Othman had been assassinated in 656 A.D., and Ali, Mohammed's nephew, was at last raised to the caliphate. A rebellion was put down at the battle of the Camel, fought at Basra, November, 656 A.D. The murder of Othman aroused the Koreishite faction. Mo'awiya of this tribe, the Syrian governor, did not recognize Ali as caliph, and Ali saw it was a hopeless task to subdue him. The strength of Ali was in Kufa. The Syrians gained the battle of Siffin by fastening copies of the Koran to their lances (657). Disaffection arose among the caliph's forces, and he was murdered in January, 661 A.D., becoming a martyr in the eyes of a large part of the Moslem world, and occasioning that great split in the faith which has ever since divided Shiite (Ali's faction) from Sunnite (traditionists). Mo'awiya was proclaimed caliph by his soldiers. Moslem Persia proclaimed Hassan, a son of Ali, as caliph; but on being defeated in battle, Hassan retired from the struggle. Hossein, another son of Ali, was not so tractable. The Syrian caliph showed great statesmanship in the management of his empire, which was expanding in every direction. Armenia, Cyprus, Cos, and Crete were conquered, and even Constantinople was invested. Mo'awiya died at Damascus, which he made the capital of the Ommeiad dynasty, of which he was the founder, 680 A.D., and was succeeded by his son, Yazid I. This voluptuous caliph ordered the prefect of Medina to strike off the head of Hossein, a son of Ali, if he would not yield. Hossein fled toward Kufa with all his family. The Ommeiad army met him in the plain of Kerbela, near Kufa, and surrounded his little company. Hossein declared himself ready to renounce all pretension to the caliphate, but on October 9th, 680 (9th of Moharram, A.H. 61), on his refusal to surrender his person to the enemy, he and all his followers were cut to pieces. The Shiites observe the 10th of Moharram as a day of public mourning. The news of this bloody ending of the son of Ali spread consternation far and wide. Revolts were with difficulty put down. Ali, son of Hossein, wisely refused to put himself at the head of the opposition. Medina was plundered, and Mecca was in a state of siege, when news came of the death of the caliph at Damascus (November 11th, 683). Mo'awiya II., Merwan I., Abd al Melik, al Walid, and the other caliphs in the Ommeiad dynasty saw Islam extending in every direction. Tarik crossed the strait, ever after called from him Jebel Tarik (Gibraltar), into Spain in 711 A.D.; Roderick, the last of the Visigothic kings, lost his crown and life in the battle of Xeres; Malaga, Granada, Cordova, Seville, Toledo, Saragossa, Barcelona, and the whole Spanish peninsula, except a few mountain retreats, were rapidly conquered. In 731 Abder-Rahman crossed the Pyrenees and swept up as far as Tours, where his host was defeated by Charles Martel in 732.

In the meanwhile the Ommeiad dynasty at Damascus began to decline. Ibrahim, great-grandson of Abbas, the uncle of the Prophet, of the house of Hashem, put himself at the head of a revolt, which under his son Abd Allah Abu-Abbas, the "Blood-shedder," was successful. The Ommeiad dynasty gave place to the Abbassides, and the newly-built city of Baghdad became the capital of the Moslem world.

The year 750 A.D. was the turning-point in Islam. There were still further conquests to be made in Central Asia, India, and Central Africa, but the unity of the Moslem world was broken politically forever. The Abbassides controlled affairs in the east, but the Ommeiads held on in Spain. In 755 Abder-Rahman founded the caliphate of Cordova, which ran a brilliant career until 1013 A.D., when Moslem power in Spain was broken up into various factions. Christians were treated with great leniency, universities were established, libraries collected, literature, science, and art fostered, and from these centres went forth light which hastened the dawning of modern civilization. The "Mozarabes" ("Arabs by adoption") were Christians living under this mild rule, who were the instruments of this wide diffusion of Arab learning throughout Europe.

The Saracens did not long remain in France. In 760 Pepin the Short drove them over the Pyrenees. Charles the Great (Charlemagne) drove them back in Spain beyond the Ebro. By the year 1030 A.D. the kingdom of Leon was well established. Navarre, Aragon, Castile, and Portugal were gathering headway. Sardinia in 1017 was reclaimed from the Arabs, and Corsica in 1050. The Balearic Islands were won by Aragon. By the middle of the fourteenth century the Saracens had nothing left in Spain but the little mountainous kingdom of Granada. In 1492 the combined forces of Castile and Aragon under the lead of Ferdinand the Catholic extinguished this last faint glimmer of Moslem rule in Southwestern Europe, at the close of a crusade lasting eight centuries.

With the downfall of the Ommeiad dynasty at Damascus Arabia lost political power in the Moslem world. The Abbassides at Baghdad were non-Arab in tendency. The subtle scepticism of Persia brought a looseness and indifference in sharp contrast with the strict and fanatical Arab type. Founded in 750, this dynasty existed until 1258. For a hundred years it ran a brilliant career. Baghdad was the resort of learned men from every region. Greek letters and philosophy were cultivated. Haroun er-Rasheed (788-809 A.D.) gathered at his court an assemblage of the wisest and wit-tiest minds in his empire. Arabic literature expanded under his patronage. He sent an embassy to the court of Charles the Great, and gathered information from every quarter. But the first century of Abbasside rule was followed by four centuries of decay. The Karmathian revolt in Arabia greatly weakened the central organization. Turkish mercenaries at Baghdad, called in as a body-guard of the caliph, acquired more and more power, and the last caliphs were mere puppets in their hands. Province after province was dismembered. In 1258 Holagoo, grandson of Genghis Khan, overthrew Baghdad and extinguished the Abbasside rule.

In 909 A.D. the Fatimite dynasty was founded in Egypt by Obeidallah, a supposed descendant of Ali and Fatima. The story of this mystic rule in Egypt is revolting to the extreme. Cairo was founded and made the capital. Saladin put an end to this dynasty in 1171 A.D.

In the mean time Islam had been pushing steadily eastward. Large bodies of Mongols were converted, among them several tribes of Turks, members of which served in the body-guard at Baghdad and learned the arts of civilization. The Seljuk Turks appeared as an inde-

pendent body of marauders as early as 1035 A.D., and pushed south and west to the Mediterranean. After conquering Armenia, they set up a powerful kingdom in Central Asia Minor, threatening destruction to the Byzantine empire. Their discontinuance of the mild treatment of Christian pilgrims to the holy places about Jerusalem excited the Crusades, which held the attention of Europe from 1095 to 1291, and which resulted in the checking of the onset of the Seljuk Turk, but left Syria a prey to discord. A little later the Ottoman Turk appeared, and by 1300 A.D. had a firm position on the border of the Byzantine empire. After absorbing all the Greek territory in Asia, the Ottoman armies entered Europe in 1354; Constantinople fell a century later (1453), and the whole Balkan peninsula was under the crescent. The armies of the sultans pressed up the Danube as far as Vienna, but from the last part of the 17th century the Ottoman has been receding, until he has only a precarious foothold in Europe.

Islam obtained a firm foothold in India as early as 1000 A.D. An attempt to conquer Sindh in the eighth century had failed. It was not until the Moslem Turk appeared that Islam made headway. Seventeen invasions and twenty-five years of fighting under the leadership of Mahmud of Ghazni (1001-1030) had reduced only the western portions of the Punjab. Bengal was conquered in 1203. By 1306, as a result of the barbarous conquests of three centuries, there was a powerful Mohammedan rule in Northern India. The story of Islam in India is one of constant revolts, or uninterrupted invasions and steady aggrandizement. There were a large number of independent Mohammedan states when the Mogul dynasty (1526-1761) put in appearance. Babar (1482-1530), having gathered headway on the Afghan side of the Indian passes, pushed through in 1526 and conquered right and left, until at his death his empire stretched from the river Amu in Central Asia to the delta of the Ganges. This vast power began to decline as early as 1707. Independent Moslem kingdoms were detached from the main body. The Marhattas grew in power until they were able to break the Mogul Empire into pieces. The English East India Company was already at work in India, backed by the British army. The first governor, Lord Clive, took the helm in 1758. The Company grew until nothing less than a great military power could properly care for the immense territory and the millions under its control. Since 1858 the Mohammedans of India have been directly under English rule.

The spread of Islam in China, Australasia, and Central Africa cannot be traced historically. During the last hundred years its extension has been promoted very largely by peaceful measures. Having conquered the Mediterranean coast of Africa Mohammedanism pushed up the Nile valley and across the Sahara. Abyssinia alone has been able to withstand the Moslem civilization, and remains like an island in a sea of Islam. The native terminology of the geography of all Northern Africa as far south as the equator is Arabic. Misr (Egypt), Sahara, Soudan, Bahr el Abyad (White Nile), Bahr el Asrak (Blue Nile), Bahr el Ghasel, are specimen names. The Arabic has penetrated south beyond the Zambesi River, as is shown in "Kafir" (Caffre), which means infidel or unbeliever. In Zanzibar and throughout Central Africa the

Swahili dialect of the Arabic is the language of commerce. Islam has spread in Africa by three agencies—the sword, commerce, and the missionary.

#### VIII. *The Extent of Islam To-day.*—

It is impossible to estimate accurately the numerical strength of the Mohammedan world. For many years it was reckoned at 160,000,000, but the latest investigations push it up to 200,000,000. The following table is drawn from the most recent data (see Statesman's Year Book, 1890):

EUROPE.		
Roumania .....	2,000	
Bulgaria .....	668,173	
Servia .....	14,569	
Bosnia and Herzegovina .....	492,710	
Montenegro .....	10,000	
Greece .....	24,000	
Turkey in Europe....	2,000,000	
Russia in Europe....	2,600,000	
Total for Europe..		5,811,452

ASIA		
Turkey in Asia (including Arabia).....	22,000,000	
Persia .....	7,560,600	
Bokhara .....	2,500,000	
Russia in Caucasus....	2,000,000	
Khiva .....	700,000	
Russia in Central Asia.	3,000,000	
Siberia .....	61,000	
Afghanistan.....	4,000,000	
India .....	50,121,595	
Ceylon .....	197,775	
Baluchistan.....	500,000	
China .....	30,000,000	
Australasia .....	15,000,000	
Total for Asia....		137,640,970

AFRICA.		
Egypt.....	6,000,000	
Zanzibar.....	200,000	
Morocco.....	5,000,000	
Tripoli .....	1,000,000	
Tunis.....	1,500,000	
Algeria.....	3,000,000	
Bornu (Lake Tsad)....	5,000,000	
Wadai.....	2,600,000	
Baghirmi.....	1,500,000	
Egyptian Soudan.....	10,400,000	
Sokoto and feudatory states... ..	14,000,000	
Sahara and scattered...	10,000,000	
Total for Africa..		60,200,000
Total for Europe....	5,811,452	
Total for Asia.....	137,640,970	
Total for Africa....	60,200,000	
Total Moslems...		203,652,422

It is believed that these figures will fall below rather than above the facts. Let us examine more in detail the various countries. Roumania, Servia, Montenegro, and Greece have nearly rid themselves of the Turk. Those who remain are scattered about as land-owners and merchants. It is said that they are moving towards Asia Minor slowly, and before long will not be an appreciable part of the population. The same is true of Bosnia, Herzegovina, and Bulgaria, although over a million Moslems still remain in these lands. Turkey in Europe has two million Mohammedans, scattered from the

Adriatic to the Bosphorus. These are more stationary, although it is a common feeling among the Turks that Anatolia (Asia Minor) is their true home, and there is a constant movement that way as European civilization more and more pervades the Balkan peninsula. It should be remembered, however, that by far the greater number of the Moslems of European Turkey, etc., are not Turks, but natives of the land who accepted Islam, and have always identified themselves with the Turkish government. What course they will take is by no means certain.

Mohammedanism in European Russia has of late attracted considerable attention, especially since the last census. It is largely confined to Southern and Eastern Russia—territory which for centuries has been occupied by Tartars, Mongols and Turks (synonyms). In 1886, 50,955 roubles were dispensed by the Russian Government to the Mussulman clergy. There are said to be 20,000 muftis, mollahs, and other teachers in European Russia. A majority of the population of the Transcaucasus district are Moslems, as might have been expected. As Russia has pushed down toward the Persian and Afghanistan borders she has taken in more and more tribes of Mohammedans. Professor Arminius Vambéry, a witness of the highest intelligence, in writing of these Moslem portions of the Russian Empire, has said ("Nineteenth Century," February, 1890, pp. 203-4): "In the cities of Central Asia, where Islam has taken much firmer root than in the Caucasus or the other parts of the Mohammedan world, there can be no probability of the old and knotty trunk of religious education being soon shaken. On the whole, Islam stands everywhere firmly on its feet, nor can Christianity succeed in weakening it. Indeed, when subjected to Christian rule it seems to become stronger and more stubborn, and to gain in expansive force. This we see in India, where, in spite of the zeal of the Christian missionaries and the millions spent in their support, the conversions to Islam become daily more frequent. We see this too in Russia, where statistics prove that the number of mosques has considerably increased in the course of this century, and that the heathen among the Ural-Altaic people are more easily converted by the Mollah than by the Pope. . . . Bokhara will still long continue to boast of being the brightest spot in Islam, and her colleges will not soon lose their attraction for the studious youth among the Moslems of Inner Asia."

The British Empire is the greatest Mohammedan power in the world, in that it rules over more followers of the Prophet than does any other one sovereignty. The statistics for India are elaborately worked out. The figures given in the table were those for 1881, and probably several millions should be added (one authority putting the number of Moslems in India as 80,000,000). They are massed in Bengal (22,000,000), Punjab (12,000,000), Northwest Provinces, including Oudh (6,000,000), Bombay (4,000,000), Madras (2,000,000), Assam (1,000,000), Hyderabad (1,000,000), Rajputana (1,000,000), Central India (50,000), and the others are in Ajmere, Berar, British Burmah, Central Provinces, Coorg, Baroda, Cochin, Mysore, and Travancore. Mohammedanism has considerable influence in Ceylon. In speaking of the growth of Islam in India, Sir William Hunter says: "Islam is progressing in India neither

more quickly nor more slowly than the rest of the population. If you take a hasty view of India and add up totals, you will find that Islam now has a great many more followers than it had 10 years ago. But you will find that the whole population has increased." He places the increase of Mohammedans at 10½ per cent. during the nine years for which we have comparative statistics.

The extent of Islam in China must remain conjectural for many years. Thirty millions may seem too high a figure (see *Statesman's Year-Book*, 1890, p. 412). Moslems are found in dense masses in the Province of Yunnan and in Western Chinese Tartary, and they are also scattered in communities throughout the Empire. The Mohammedan name for China is Tung Tu ("Land of the East"). There stands a Mohammedan mosque in the southwestern angle of Peking, in the midst of the Moslem quarter, where are found 200,000 Mohammedans. Hangchau is also a stronghold of Islam. Between 1865-73 there was a bloody insurrection among the Mohammedans of the Kansuh Province. According to Dr. S. Wells Williams ("The Middle Kingdom," rev. ed. 1883, vol. ii. p. 268), the introduction of Islam into China was very gradual. It began at the sea-ports of Canton and Hangchau. "The number throughout the region north of the Yangtz River cannot be stated, but it probably exceeds 10,000,000. In some places they form a third of the population. A missionary in Sz'chuen reckons 80,000 living in one of its cities." This being so, it is probable that 30,000,000 of Moslems is a conservative estimate for China.

The wide spread of Mohammedanism in Australasia is becoming more and more evident. It is spreading rapidly among the whole Malay race, and assumes a peculiar type. It established itself in the Malay Peninsula in the 14th century, and crossed into Sumatra, Java, and adjacent islands in the 15th century, thus anticipating the Portuguese by only a few years. There are a large number of Malay Moslems on the Malay Peninsula, in the native states, and under the English flag. Sumatra (128,560 square miles) has a population of 2,000,000, nearly all of whom are strict Mohammedans. Java before 1478 A.D. was Hindu in religion. In that year Islam overthrew the chief Hindu principality of Majapahit, and the conversion of the whole island to Mohammedanism followed within the century. The census for 1886 shows on this island of 50,000 square miles a population of 21,997,560 (see *Statesman's Year-Book* 1890, p. 770), and of these only 11,229 were Christians. Mohammedanism claims the majority of the remainder. The Celebes, with a population of over 800,000, is largely Mohammedan in religion. Islam had just been introduced when the Portuguese landed in 1525. It spread in a hundred years over all the districts it now occupies. The south peninsula is divided into nine native Moslem states, which form a kind of Bugis confederacy. They are in alliance with the Dutch. North of this is a smaller Mandar confederacy of states, only partly Mohammedan. There are Moslems also along the north coast of Celebes. Concerning Islam in the Dutch possessions, the Rev. Dr. Schreiber of the Rhenish Missionary Society says: "Wherever Mohammedans and heathen are in contact, Islam is winning ground,

sometimes slowly, sometimes more speedily. . . . Only a small portion of the whole population remains still heathen, and those only small and insignificant tribes scattered in the forests of Sumatra and Borneo. There are some strong and unmistakable signs of the increasing vigor of Islam in Dutch India. According to the official statements there were in 1886 not less than 48,237 Hadjis (pilgrims to Mecca) in Java alone, against 33,802 in 1874; thus an increase of 40 per cent within 12 years. In Sumatra—not including Atcheen—there were 8,342 Hadjis in 1874 and 15,287 in 1886; thus an increase of 83 per cent. In Borneo and Celebes they increased from 3,019 to 5,074; thus 66 per cent. . . . Those Mohammedan sects whose well-known hostile and aggressive tendencies make them so dangerous, are more and more supplanting the more placable-spirited folks, formerly so common amongst the Mohammedans of Dutch India, especially of Java. Another hardly less ominous sign is the astonishing growth of Mohammedan schools. In 1882 there were in Java 10,913 of those schools, numbering 164,667 pupils; in 1885 we are told there were 16,760 schools, with not less than 225,148 pupils: thus within 3 years an increase of not less than 55 per cent. Even in the residency of Tapanoei in Sumatra, where the whole of Mohammedanism is of comparatively recent date, we find 210 such schools and 2,479 pupils." (Report of the Missionary Conference, London, 1888, vol. i. pp. 21-2.)

Turning eastward from the Dutch possessions, we find Mohammedanism constantly pushing forward. The large islands of Bouton and Moona are inhabited by Moslem Malays. The coast villages of Bouru, west of Ceram, are inhabited by semi-civilized Mohammedans. In Ceram we have villages nominally Mohammedan. In Amboyna, Banda, Goram, Manowolke, Ké, Mysol, Lombok, and Sumbawa there are considerable numbers of Moslems. Bali and Lombok are the only islands in the Malay Archipelago which maintain their old Hindu religion. The Sulu Archipelago, still further eastward, comprises 150 islands, inhabited by Mohammedans of the Malay race, speaking a peculiar language, which they write with the Arabic character. They are ruled over by a sultan, who claims sovereignty over part of western Borneo. Piracy is prevalent in this region. The Philippine Islands have 7,500,000 inhabitants, 4,000,000 of which are unsubdued Mohammedan and pagan tribes. The Moslems are mostly in the southern portions of this group. Taking all these facts into consideration the figures set down in the table for Islam in Australasia are probably too small. There are at least 150,000 Moslems in Asia alone.

Turning to Africa, we find ourselves in still greater difficulty. The data for Egypt, Zanzibar, Morocco, Algeria, Tunis, and Tripoli are correct enough. For the interior we are obliged to use the estimates of travellers (see *Statesman's Year-Book*, 1890). We can get even these rough estimates for only a few of the tribes. It does not seem exorbitant to put down 10,000,000 for those unaccounted for. Crossing the Atlantic to South America, we find the Protestant missionaries asking for Arabic Bibles to use with Moslems who have immigrated for purposes of trade.

**IX. Sects in Islam.**—It is related that Mohammed said, "Verily it will happen to my

people as it did to the children of Israel. The children of Israel were divided into seventy-two sects, and my people will be divided into seventy-three. Every one of these will go to hell except one sect." If the number was put too low for the Christian sects (probably confused with the Jews), the corresponding number is far too low for the Moslem world, and the bitterness of feeling indicated by the traditional utterance of the prophet holds true to-day in the fanatical world of Islam. Shaykh Abdu 'l-Qadir says there are 150 sects in Islam; but there are infinite shades between them which make them practically innumerable. The two grand divisions of the Moslem world are Sunnites ("traditionists"), who account Abu Bekr, Omar, and Othman legitimate caliphs; and the Shiites ("followers"), who consider the first three rulers after Mohammed as illegitimate rulers, and account Ali, the prophet's nephew and the husband of Fatima, the first true caliph. The Sunnites embrace by far the larger part of the Moslem world, the Shiites being mainly confined to Persia. Upon the death of Mo'awiya (A.H. 60), Yazid obtained the position of Imam or caliph without the form of election, and hence arose the great schism, which is as strong to-day as ever. The Shiites trace the true Imam down through Ali, Al-Hassan, Al-Hussin, Ali Zainu'l-Abidin, Mohammed el-Baqir, Ja'far as-Sadiq, Musa al-Kazim, Ar-Raza, Mohammed at-Taqi, Ali an-Naqi, Al-Hassan, Al-Askari, and Mohammed, the Imam al-Mahdi. This last Imam is believed by the Shiites to be still alive, although absent for a time, and they claim that he will appear in the last days as the Mahdi ("Director"), after which the judgment day will soon follow. Many of the Shiites carry their veneration for Ali so far as to account him a divine being, and even greater than Mohammed. Besides these differences as to the doctrine of Imams and the person of Ali, the Shiites differ from the Sunnites in observing the ceremonies of the Muharram in commemoration of the cruel death of the sons of Ali, Hassan and Hossein, while the Sunnites observe only the tenth day of Muharram as the day on which God created Adam. The Shiites receive the "fire-worshippers" as a people who have received an inspired record from God, while the Sunnites acknowledge only Jews, Christians, and Moslems as such. The Shiites allow pious fraud when in danger of persecution. The other differences have to do with liturgies and civil law.

Although the Shiites number only about fifteen millions out of two hundred millions, they have about as many subordinate schisms and sects as the Sunnites. It is hard to account for this except on the principle that Persia is the nationality which holds the influential Shiites. The Persians are Aryans, and it may be the outcropping of peculiar Aryan tendencies, and that Persia is the Germany of the Moslem world. The Persians have always had sceptical tendencies, and have demanded a high order of religion. The Sunnites are divided into many sects, the following of which are the most important: (1) the Hanafiyahs (in Turkey, Central Asia, and Northern India); (2) the Shafi'iyahs (Southern India and Egypt); (3) the Malakiyahs (Morocco, Barbary, and other parts of Africa); (4) the Hambaliyahs (Eastern Arabia and some parts of Africa).

In India we find Sikhism (Sikh = "a disci-

ple" or "pupil"). It is confined to the Punjab, and is a strange mixture of Hindu and Mohammedan ideas, and is pantheistic in its tendency. Nanak seized the idea of the unity of God, and reduced the Hindu gods to the subordinate position of angels. The soul of man is a ray of light from the divine Light, and hence naturally sinless. Sin and misfortune are the result of delusion. The object before the believer is to attain the total cessation of individual existence. There are five leading sects among the Sikhs.

In Persia we have a powerful and growing sect, the Sufi, which are subdivided into innumerable divisions or sub-sects. They all inculcate blind submission to an inspired guide. Sufism is Mohammedanism engrafted on the primeval mysticism of Persia. God only is existent; all things are an emanation from Him; religions are matters of indifference; there is no real difference between good and evil; the will of man is fixed by God; the soul existed before the body; and meditation is the method by which the soul may progress along the journey of life so as to attain unification with God.

In Arabia we find the Wahhabees, founded in 1691 A.D., by Mohammed, son of Abdu 'l Wahhab. This sect grew out of the Hambaliyah sect. Its founder was the Luther of Mohammedanism, calling Moslems back to the original Scriptures of Islam. He proposed to do away with saint-worship, which permeated the Moslem world. The Wahhabees call themselves "unitarians," and claim that any man who can read the Koran and sacred traditions can judge for himself in matters of doctrine. They forbid prayers to any prophet, wali, pir, or saint. They hold that at the judgment-day Mohammed will obtain permission of God to intercede for his people. They forbid the illumination of shrines, or prayers and ceremonies in or about them, not excepting Mohammed's shrine. Women must not visit graves, because they weep so violently. This sect has always been fanatical. The sword was appealed to. Abdu 'l Aziz, the leader after 1765 A.D., pushed his conquest to the limits of Arabia. He was assassinated in 1803. His son Sa'ud carried the victorious banner beyond the peninsula, and threatened the Turkish empire. Mecca was conquered in 1803. All sorts of ornaments and pipes were burned. Tobacco was prohibited on pain of death. Sa'ud sent commands to Mohammedan sovereigns in every direction that pilgrims to Mecca must conform to these puritan regulations. Missionaries were sent out. Disturbances were occasioned in Northern India. A little later, Mahomet Ali of Egypt sent a strong force into Arabia under Ibrahim Pasha. The Wahhabees were thoroughly subdued, and Mecca released from the strict rule of this Protestant phase of Islam. The sect since that day has made little if any progress.

**X. Agencies in use to reach Mohammedans.**—Such being the state of the Moslem world, what means are being used to win these millions to Christ, and what success has up to this time attended the efforts of the church? We must believe that God has some beneficent aim in view even when He allows Islam to arise and spread from the Pacific to the Atlantic. Could we fully understand, we should probably see some underlying scheme of Providence which is being worked out before our

eyes, even though the conversion of idolaters and fetich-worshippers to Islam seems to fill them with a gloomy fanaticism which resists Christianity far more successfully than does heathendom itself. Mohammedanism has undoubtedly an elevating influence upon the heathen it wins. It develops a strong individuality, it theoretically and most frequently practically frees from drunkenness, cannibalism, gambling, and the more degrading heathen practices. It elevates womanhood and the family to a certain degree. It gives a regular order of life, and has introduced letters everywhere it has gone. Its use of the sword recalls the method by which Christianity has made its largest territorial conquests (Germany, Spain, South and Central America, Siberia, etc.). With the exception of the Mahdi movement on the upper Nile, its method of propaganda to-day is peaceful and successful. The startling fact is that, although Christian missions have been in contact with Islam for so many years, so little real progress has been made in winning individual Mohammedans to Christ. The task has appeared so formidable, that no great missionary society has been organized with the special object of reaching them, although we have several societies for the conversion of the Jews, who number at most eight millions as contrasted with two hundred million Moslems. We are dealing with Islam incidentally. The best that can be said is that up to this time we have been laying foundations, and perhaps this is all that could have been done. At any rate some of our foundation-stones will be abiding. In the first place, we have put into the sacred language of the Koran the Christian Scriptures. The Arabic Bible, translated by Drs. Eli Smith and Van Dyck, and published at Beyrout, Syria, is accounted one of the finest translations in existence, and is being distributed all over the Moslem world from Sierra Leone to Java. When Mohammedans can be convinced that this Bible is practically the original Scriptures which Mohammed considered to be inspired records, a great deal will have been gained. In lands where Arabic is not the vernacular this Arabic translation is read more freely by Mohammedans than in countries where that language is in common use, for they do not appear to be yielding a point to the Christian missionaries, who do their main work with the masses by means of a local vernacular translation. The Arabic Bible is far more effective than any missionary society we could organize, and which might send forth an army of missionaries.

The second great agency for reaching Islam is the Christian schools and colleges scattered now all over the Mohammedan world. Robert College on the Bosphorus, Anatolia College at Marsovan, Euphrates College at Harpoot, Central Turkey College at Aintab, Oroomiah College in Persia, the Syrian Protestant College at Beyrout, Assiout College in Egypt, and Jaffna College in Ceylon are a few of the list. In Western Africa at Sierra Leone and in Liberia, and in Eastern Africa at Mombasa, we have similar institutions. The great universities of India carried on by the government and by the missionary agencies are reaching Mohammedans. All of these institutions, and thousands of others, especially of a lower grade, are constantly adding to a Christian literature which is bringing a Christian civilization effectively

before the Mohammedans, who in the Middle Ages were leaders in science, philosophy, literature, and art.

A third agency to be mentioned is the personal influence of the Christian missionary, whose home is an example of what Christianity can do. Silent influences are sometimes the most effective. The medical missionary is especially successful in reaching all grades of society. Mohammedans rarely attend religious Christian services, but they are respectful on the streets, as a rule, and welcome the missionary to their homes. In many cases they are convinced that Christianity is the true religion, but are afraid to acknowledge Christ openly for fear of social ostracism, if not of legal persecution and martyrdom.

Without attempting to exhaust the catalogue of agencies in use in reaching Mohammedans, we will mention lastly Protestantism or evangelical Christianity as the only phase of Christianity likely to be successful in this great work. Pictures and images used in the service of the Greek Orthodox, Roman Catholic, Coptic, Nestorian, Abyssinian, and other decayed forms of Christianity are utterly revolting to followers of Mohammed, and churches using these can never hope to make headway among Mohammedans. The simple gospel simply proclaimed, must be the effective weapon.

The number of sincere Mohammedans who have been reached successfully is small. In the Turkish Empire it is still death to these religionists to embrace Christianity. In Africa a few individuals have become Christians. A few in Persia and still more in India have turned to Christ. The interesting successes that give us hope, have been achieved in Dutch India (Java and Sumatra). According to Dr. Schreiber, "Of the eleven thousand converted in Java, all of them, with very few exceptions, were won from amongst the Mohammedans. And in Sumatra also, where the number of Christians since 1878 has increased from 2,500 to 12,000, there are hundreds of Mohammedans who have been baptized by our missionaries during the past few years, or are under instruction for baptism just now (1888). I am not aware of any other country where so many converts have been won from Islam in our days as is the case in Dutch India, or where it seems more easy to win many more of them. Notwithstanding the increased vigor of Islam in this region, it is not growing in the same ratio as Christianity; and although the numbers of Mohammedans are swelled yearly, very considerably indeed by the natural increase of the population, the number of converts from heathenism to Islam is very probably far below that of converts made by the Christian missionaries; and whereas conversions from Christianity to Islam are almost never heard of, thousands of Mohammedans are coming over from the adherents of the False Prophet to Jesus Christ, our only Saviour." (See Report Miss. Conference, Lond. 1888, vol. i. pp. 22-3.)

Sir William Hunter, an authority on the statistics of India, says that while Mohammedanism is increasing in that peninsula at the rate of 10½ per cent in nine years, the Christian population has increased at the rate of 64 per cent in the same time.

In Persia Mohammedanism seems to be disintegrating through internal forces. That country stands midway in the Mohammedan

world. Over a hundred conflicting Moslem sects are found among the seven or eight millions of this Aryan race dwelling between the Caspian and the Persian Gulf. Russian and English influences are predominant. The naturally sceptical Persian mind is open to new influences. In some important respects Persia is a strategic point in Islam. If it could be won to Christ Islam would be cut in two. There are indications that great transformations may take place in Persia at a not distant date.

On the whole there is everything to encourage the Christian Church to move forward upon this its greatest organized enemy. In the near future the battle must be squarely joined. Civilization is slowly but surely opening the way. Before long all political opposition to the propagation of Christianity in Moslem lands will be over. The followers of Christ never had a more serious undertaking on hand when looked at from the theological, social, ethical, or political standpoint. It calls for the keenest minds and the most consecrated hearts. We shall succeed. "Deus vult."

**Mohawk Version.**—The Mohawk belongs to the languages of North America, and is spoken by Indians west of Niagara Falls. In 1700 the Rev. Mr. Freeman translated the Gospel of Matthew, and some chapters were printed by the Gospel Propagation Society, New York, 1714. In 1787 another translation of Matthew by Joseph Brant, a Mohawk chief, was printed in London at the cost of the crown; and another with English in parallel columns, by the New York District Bible Society, in 1829. The Gospel of John was translated by John Norton, a chief of the Mohawks, and published at London, 1805, by the British and Foreign Bible Society. Another edition was published by the American Bible Society at New York in 1818. In 1832 the three Epistles of John, translated by Rev. Mr. Williams, and the Gospel of Luke, translated by A. Hill, a Mohawk chief, were printed at New York by the Young Men's Bible Society, and in 1835 the Acts of the Apostles and the Epistles to the Romans and Galatians by the same translator. In 1836 the same Society published the Epistles to the Philippians, Colossians, Thessalonians, Timothy, Titus, and Philemon, translated by an educated Mohawk. The latter also translated the Book of Isaiah, which was published in 1843 by the British and Foreign Bible Society, and also by the American Bible Society in 1848.

(Specimen verse. John 3: 16.)

Iken ne Yehovah egh ne s'hakonoronghwa  
n'ongwe, nene rodewendeghton nene raonhâon  
rodewedon rohhâwak, nene onghka kiok teya-  
kaweghdaghkoi raophage yaghten a-ongh-  
tonde, ok denghnon aontehodiyendane ne eterna  
adonhêta.

**Molepolole**, town in the Transvaal, East South Africa, on a branch of the Limpopo, northwest of Pretoria. Mission station of L. M. S.; 1 missionary and wife, 174 church-members, 1 out-station, 2 schools, 208 scholars.

**Molokans**, a sect of Russian dissenters, many of whom, having been expelled from Russia, have settled in the Caucasus and Bulgaria. (See M. E. Church (North), Bulgarian Mission.)

**Moluccas or Spice Islands**, a group of the Indian or Malay Archipelago, scattered over the sea from Celebes on the east to Papua on the west, and from the Philippines to Timor. Area, 42,946 square miles. The number of these islands is said to be several hundreds. Many of them are small and uninhabited. The large islands are Ceram, Gilolo, and Booro. Nearly all are mountainous. The climate is hot, but not excessively so. Population (estimated 1888) 370,248 natives and over 2,000 Europeans. The native population consists of two races, the Malays and the Papuans. The Malay is the common language, and the Arabic character is employed in writing it. Mohammedanism is the prevailing religion, but some few profess Christianity. The laws are chiefly founded on the precepts of the Koran. The chief power is in the hands of the Dutch. Missionary work is carried on by the Netherlands Missionary Society, especially in Ceram (q.v.).

**Molung**, village of Assam, bordering on the plain of Assam, 35 miles south of Sibsagar. Climate cooler than usual for Assam. Population, 450 to 500, As-Nagas. Religion, demon worship. Social condition good; family relations distinct; woman respected. Mission station A. B. M. U. (1876); 1 missionary and wife, 13 native helpers, 8 out-stations, 3 churches, 69 church-members, 160 school-children. Contributions, \$28.90.

**Mombasa**, a small island on the east coast of Africa, 4° south latitude, which was the first station of the C. M. S. in East Africa (1844), and is now with two other stations the Mombasa district. A medical work is carried on among the slaves of the Swahili people, and the Arabs and rich Hindus are very willing to assist the doctor. There are 91 communicants, 2 schools, 280 scholars.

**Monastir**, city in Macedonia, European Turkey, in a valley 1,700 feet above the sea, 100 miles northwest of Salonica. Climate temperate. Population, 35,000, Bulgarians, Turks, Wallachs, Albanians, Gypsies. Social condition, civilized. Mission station A. B. C. F. M. (1873); 2 missionaries and wives, 2 other ladies, 8 native helpers, 5 out-stations, 112 communicants, 1 school, 35 scholars. (See Bulgaria and Macedonia.)

**Monclova**, town in Central North Mexico, southeast of Chihuahua, northwest of Bilbao. Mission station Methodist Episcopal Church (South); 1 missionary.

**Monghyr** (Mungir), a town of Bengal, India, on the Ganges. Being very old, it is not in a good condition; but its numerous temples, etc., give it a very pretty appearance, and its picturesque scenery and healthy climate make it a great resort for invalids. Population, 55,372, Hindus, Moslems, etc. Mission station Baptist Missionary Society; 3 missionaries, 1 evangelist, 81 church-members, 1 out-station, 340 school-children.

**Mongol Versions**.—The Mongol language belongs to the Mongol branch of the Ural-Altaic family of languages, and is spoken in Mongolia. There exist four different versions in the Mongol.

1. *The Literary Mongol*, used in Mongolia. A translation of the Old Testament into the Literary Mongol was effected by Messrs. E. Stallybrass and W. Swan of the London Missionary Society, and printed at St. Petersburg in 1840. A translation of the New Testament was made by the same scholars, and printed in 1846 at the expense of the British and Foreign Bible Society. The same Society published in 1880 an edition of the New Testament in Mongolian characters, under the editorship of Antoine Schiefner and Prof. Pozdnieff, and in 1881 an edition in Manchu character.

2. *The Northern or Buriat Colloquial*, which is used by the Buriats on Lake Baikal, to the number of about 150,000, of whom only some are Christians. At the beginning of the present century Dr. Schmidt, aided by two Buriat nobles, commenced a translation of the New Testament into the Buriat Colloquial, which was printed at St. Petersburg in 1824.

3. *The Southern or Kalkhas Colloquial*.—A translation into this dialect, which is spoken in Chinese Mongolia, was undertaken by the Rev. J. Edkins of the London Missionary Society, and J. J. Schereschewsky of the American Missions. The Gospel of Matthew was published at Peking in 1872.

4. *The Western Mongolian or Kalmuk*.—The Kalmuks or Western Mongols occupy a large steppe in the southeast of Russia in Europe. It stretches from the bend of the Volga at Sarepta westward toward the Don, and southward toward the Kuban. As early as 1808 the aid of the British and Foreign Bible Society in providing Scriptures in Kalmuk for the Moravian Mission at Sarepta was sought. The preparation of a version was entrusted to N. James Schmidt of the mission, and in 1812 the Gospel of Matthew was ready. It was printed at St. Petersburg in 1815 for the British and Foreign Bible Society, and was the first book ever printed in that language. A second edition followed in 1817, and in 1820 the Gospel of John was added, the Emperor Alexander I. sharing the cost of its preparation. In 1822 the Gospels and Acts were put to press, and conversions to Christianity were appearing as the fruit of the previous circulation of the two Gospels. The suppression of the mission brought all this good work to an abrupt end.

In 1877 a new edition of the above-named Gospel of John was greatly needed, but the necessary type and a competent proof-reader were no longer to be had. So an old copy was taken to pieces and photographed upon zinc plates, from which a new edition was printed and bound in a more attractive and serviceable form than before. This book has not been circulated in Siberia. However, a fresh version has been for some years in progress for the good of the Kalmuks. Prof. Pozdnieff, of the University of Petersburg, was authorized by the British Bible Society to prepare a translation of the New Testament. The four Gospels were published in 1887, and the entire New Testament in 1888. The edition was large, since according to statistics in 1869 the number of Kalmuks in European Russia should be 119,866, in Asiatic Russia 40,000, in China 253,000 souls, or a grand total of 434,366, possessed of a common language, not indeed devoid of dialectical peculiarities, but mutually intelligible, and having a common literature.

**Mongolia**, "the land of the Mongols," is a vast part of the empire of China (q.v.) lying in the interior of Asia, comprising 1,300,000 square miles of territory between latitude 37° and 54° north, and longitude 85° and 125° east. On the north it is bounded by Siberia, on the east by Manchuria, on the south by China proper, and on the west by East Turkestan and Jungaria. Its population is estimated at 2,500,000, one fifth of whom are Chinese. A high plateau 3,000 feet above sea-level occupies the greater part of the region. In the centre is the Desert of Gobi, where sand and stones, dust in summer and snow in winter, render habitation unbearable. The northern part is occupied by ranges of mountains forming part of the Altai chain. On its slopes rise the Selenga, the Kerlow, and Onon, which form the Amoor. In the south are rich meadow-lands, which afford food for cattle. Chinese have introduced agriculture to some extent. Mountain ranges are again found on the west. On the east is a strip of fertile land. On the southeast of the desert of Gobi is the mountain range of Alashan, which reaches in some places the height of 15,000 feet above the sea. Along its hills pasture-land is found. The climate is in general cold, subject to sudden changes, and in summer intolerably hot.

Mission work in Mongolia is carried on by the A. B. C. F. M. (See Kalgan.)

**Mongols**, the term given to a large branch of the human family, which has been designated Turanian by late ethnologists. It comprises, in its proper limitation, the hordes of Central Asia, the Buriats, Bashkirs, and Kalmucks and,

more widely, the Chinese, Indo-Chinese, Tibetans, Burmese, Siamese, Japanese, Eskimo, Samoids, Finns, Lapps, Turks, Tartars, and Magyars. In very ancient times they formed the Median Empire in Chaldea, though they are the characteristic nomadic people. Another offshoot settled in the plains of China at a remote period. To the Greeks the Mongols were known as Scythians, to the Romans as Huns. Under Genghis-Khan, in the 13th century, they overran and conquered the greater part of Asia, and Russia and Hungary in Europe. The Mongols proper are divided into three branches: the East Mongols, the West Mongols, and the Buriats. Of the East Mongols the Khalkas inhabit the region north of the Gobi, the Shara Mongols are found south of the Gobi along the Great Wall, and the Shairagut are found in Tangut and North Tibet. The West Mongols are found in Kokonor, Kansuh, on the eastern slope of the Thianshan Mountains, and many of them under the name of Kalmucks are under the rule of Russia. The Buriats are in the Russian province of Irkutsk, around Lake Baikal.

The original Mongols are thus described by Dr. Latham: "Face broad and flat; the cheekbones stand out laterally and the nasal bones are depressed. The eyes are oblique; the distance between them is great, and the carunculae are concealed. The iris is dark, the cornea yellow. The eyebrows form a low and imperfect arch, black and scanty. The complexion is tawny, the stature low. The ears are large, standing out from the head; the lips thick and fleshy, forehead low and flat, and the hair lank and thin." In the more civilized nations of Mongol origin these original characteristics have been modified more or less.

The language of the Mongols is found in three dialects corresponding to the division of the race as above given. It is written perpendicularly from above down and from left to right. Seven vowels and seventeen consonants are represented (see Mongol Versions). Buddhism is the most prevalent form of religion, though Confucianism and Mohammedanism have had their influence upon the races nearest to China and India.

**Mongwe**, East Central Africa, north of the Limpopo River, very near Inhambane. Mission station A. B. C. F. M.; 2 missionaries and wives. The headquarters of the East Central Africa Mission, with a training-school of 23 members. The organization of a church has been delayed, although there are a number desiring church-membership.

**Monrovia**, the capital of the republic of Liberia, west coast of Africa, so named in honor of President Monroe of the United States, stands at the foot of Cape Mensurado, in Monrovia Bay. The town is laid out in American style, but cocoa-nut palms and mango-trees give a tropical aspect to the place. The climate is not excessively hot; the mean annual temperature is not more than 81° F., with daily variations between 77° and 86°. In the dry season the intense heat of the day is followed by cooler nights. But the climate is considered very dangerous for Europeans, on account of the prevalence of marsh-fever. The population is estimated at 3,400, nearly all of whom are negroes. Mission station of the Methodist Episcopal Church (North); 2 missionaries, 353 church-

members. Protestant Episcopal Church, 4 missionaries, 2 ladies, 4 out-stations, 76 communicants. Presbyterian Church (North); 1 missionary, 53 communicants.

**Monte Allegre**, a city of Northern Brazil, in the district of Pernambuco. Station of the Presbyterian Church (South), U. S. A.; 1 native pastor, 20 church-members, 25 Sunday-scholars.

**Monte Christi**, station of the Baptist Missionary Society in San Domingo, West Indies; 2 evangelists, 24 church-members, 62 scholars.

**Montego Bay**, town in Jamaica, West Indies, on the north coast. Population, 6,000. Mission station of U. P. Church of Scotland; 1 missionary, 224 church-members.

**Montemorelos**, capital of a district of the same name, in the State of Nuevo Leon, Mexico, 2,000 feet above the sea. Climate hot, but healthful. Population about 9,000, chiefly mixed Spanish and Indian. Language, Spanish. Religion, Roman Catholic. Social condition, civilized. An out-station of Matamoros, Mexico, Presbyterian Church (South); 1 organized church (18 added during 1888), 4 preaching places, 11 Sabbath-school.

**Montenegro**, an independent principality in European Turkey. It is bordered on the south or southeast by Scutari and Kossovo, vilayets of Turkey, on the east by the Sanjak of Novi Bazar, and on the northwest by Herzegovina. A narrow strip of Austrian territory separates it from the Adriatic on the west, excepting where the newly acquired districts of Antivari and Dulcigno give it a seaboard of 28 miles in length. The entire area is estimated at 3,630 square miles, with an extreme length of 100 miles and a width of 80. The population is estimated at 236,000. The principal cities are: Cetinje, the capital; Podgoridza, Dulcigno, Danilograd.

The government is a limited monarchy, according to the constitution dating from 1852. The prince holds the executive authority, and a state council has the legislative power; practically the will of the prince is law.

The religion of the kingdom is the Greek Church, and that too is under the direct influence of the prince, who appoints the bishops. Nominally, church and state are independent. The number of adherents is 222,000; the Mohammedans number 10,000, and the Roman Catholics 4,000. Elementary education is compulsory and free, government supporting the schools. In 1889, 3,000 male and 300 female pupils attended 70 elementary schools.

The Montenegrins are Slavs of the Servian (q. v.) stock, and have many noble characteristics. A dialect of the Servo-Illyrian Slavonic is the language spoken. Agriculture is the leading occupation of the people, and live-stock of all kinds are reared.

There are no missionary societies at work in Montenegro. The British and Foreign Bible Society have translated the Bible into Servian and Croatian.

**Monterey**, capital of the State of Nuevo Leon, Mexico, 450 miles north-northwest from Mexico City, and 6 miles from the base of the Sierra Madre Mountains. Climate comparatively mild, but subject to sudden changes, and to extremes of heat and cold, drought and rain. Population (1869), 13,534, chiefly people

of mixed Spanish and Indian descent. Language, Spanish. Religion, Roman Catholic, in its most degraded form. Social condition not good, but improving; morals and manners very lax indeed. Principal station of the Mexican Border Mission, Methodist Episcopal Church (South); first touched by missionary influence in 1846-48, at the time of the Mexican war; occupied permanently in 1874. Including all the other stations and out-stations of the Mexican Border Mission, the statistics are as follows: 8 ordained missionaries, 1 unordained, 6 missionaries' wives, 24 other ladies, 36 stations and out-stations, 60 organized churches, 1,640 communicants (134 added in 1888), 144 preaching places, with an average attendance of about 3,600 for all; 21 ordained preachers, 7 unordained, 77 Sabbath-schools, 1,651 scholars, 6 female schools, 275 scholars, 3 other schools, 75 scholars, 6 theological students, 5 teachers.

**Montevideo, San Felipe de**, the capital of Uruguay, South America, is situated on the north bank of the River Plate, near its mouth, where it is 60 miles wide. It is said to be the cleanest and most healthy city in South America, though the water-supply is limited. A wall surrounds the city, with its one-storied, flat-roofed houses. A university and other schools for secondary and higher education are located here. In 1887 the population, including the suburbs, was 134,346, one third of whom were foreigners. With a fine bay, it has quite a trade—principally with Great Britain; but lines of steamers run also to the United States, Brazil, and Genoa; and France and Spain share in the traffic. Mission station of the Methodist Episcopal Church (North); 2 missionaries, 5 schools, 501 scholars, 203 communicants.

**Montgomery**, a town on the island of Tobago, West Indies, beautifully situated on an elevation of considerable height in the western part of the island, commanding a fine view over that portion of the country which is most thickly populated and best cultivated. Mission station of the Moravians, opened in 1789, but after one year closed on account of the death of the missionaries; reopened in 1827; now under the charge of 1 missionary and wife.

**Montgomery, Giles Foster**, b. Walden, Vermont, U. S. A., November 8th, 1835; graduated at Middlebury College 1860, Lane Theological Seminary 1863; sailed as a missionary of the A. B. C. F. M., and reached Aintab, December 23d, 1863. He was the first missionary to enter Marash after being driven away three times and almost killed in 1865, but was afterwards stationed at Adana. It was chiefly due to his courage, skill, and great personal influence that a division in the large church at Adana was healed, and the esteem in which he was held in the city could not be too highly rated. At the time of the famine in Adana he worked very hard, and his health was greatly impaired. The heat, too, was greater than was ever known before in Turkey, and he was too much reduced in strength to rally. He died at Adana December 4th, 1888. The native brethren, when permitted to come into the room to look upon his face a minute before the end came, wept like children. "Notwithstanding the rain and mud, 3,000 at the time of the funeral occupied the paved yard and verandas

of the house, and some 2,000 were on the house-tops and standing in the street. An Armenian priest made an address, in which he said: 'The Armenians as a community wished to express their thanks to God for giving such a man to the work here; that his life would still speak to us, and help us to live for others, and not for self.' A Greek priest wished to speak, but did not, as he knew no language but Greek, which the people do not understand." Most of the large crowd walked through the mud to the Protestant cemetery a mile distant. "Mr. Montgomery was one of the strongest men in Turkey, a good business man, a strong preacher, and unusually successful in the management of men."

**Montserrat**, one of the Leeward Islands, West Indies; 10,083 inhabitants. Mission station of the Baptist Missionary Society (England); 1 evangelist, 12 church-members.

**Moosh**, a city of Eastern Turkey, 83 miles southeast of Erzurum, in a large plain, one of the most populous of the whole section. The population is Koordish and Armenian. The Koords are very fierce, and treat the Christians most oppressively. This plain is the home of Moussa Beg, a famous Koordish chief, who attacked two American missionaries, and committed such assaults on the Armenians that he was called to Constantinople, and despite the most active efforts of his friends, was exiled. Mission out-station of the A. B. C. F. M., worked from Bitlis.

**Moradabad**, British India, a town in the Rohilkund district, Northwest Provinces. Mission station of the Methodist Episcopal Church (North); 1 missionary, 1 assistant missionary, 2 single ladies, 2 other European assistants, 76 native helpers, 3 churches, 237 church-members, 31 schools, 1,363 scholars.

**Moratumulla**, a town of Ceylon, in the district of Colombo. Mission station of the Wesleyan Methodist Missionary Society; 1 missionary, 12 local preachers, 336 church-members, 405 scholars.

**Moravian Hill**, a station of the Moravian Brethren in Cape Town, Cape Colony, South Africa. Owing to droughts and scarcity of employment, many of the members of the Moravian congregation at Gnadendal, Mamre, etc., wandered to Cape Town and settled there, finding shelter chiefly in Malay lodging-houses. Their spiritual life suffered much from the loss of church privileges, and the brethren determined to follow them. At first they visited Cape Town once a week; but this being found insufficient, one of the missionaries and his wife removed thither, and purchased a piece of property, which they named Moravian Hill, where they settled, and soon brought about the building of a church, which is well and faithfully attended by quite a large congregation.

**Moravian Missions.**—*History.*—The Unitas Fratrum, or the Moravian Church, as it is commonly called, was founded in the year 1457 by followers of John Huss, the Bohemian reformer and martyr. In spite of frequent and severe persecutions it flourished in Bohemia and Moravia for a century and three quarters, and was then forcibly overthrown by Ferdinand II., a bigoted Romanist, in the so-called Bohemian Anti-Reformation, at the beginning of the Thirty Years' War. Their episcopate, however,

was carefully preserved in the event of a resurrection of their church, and a "hidden seed" remained in Bohemia and Moravia.

In 1723 some descendants of the brethren belonging to the "hidden seed" emigrated to an estate of Count Zinzendorf in Saxony, and founded Herrnhut, which grew to be a flourishing settlement.

As early as the year 1715 Count Zinzendorf, while yet at the academy at Halle, had entered into a covenant with the friend of his youth, Fred. de Watteville, to establish missions, especially among those heathen tribes which were totally neglected by others. He had an opportunity, while at the house of Professor Franke, to hear accounts relative to the mission established by Fred. W. King of Denmark, among the Malabars at Tranquebar, in the East Indies; he became acquainted there with some missionaries whom Mr. Franke was preparing for their intended situation, for which they were soon to set out by way of Copenhagen, as well as with others who happened to be on a visit at his house. This excited in him an earnest desire to further, as far as he could, the increase of the kingdom of God by the conversion of heathen nations, as soon as a door should be opened for that purpose. This opportunity presented itself in the year 1731, when Count Zinzendorf undertook a journey to Copenhagen in order to be present at the coronation of Christian VI. For on this occasion some of the brethren who belonged to the household of the count became acquainted with a negro from the West Indies, named Anthony, who was then employed in the service of Count de Laurwig at Copenhagen. The brethren, and especially David Nitschmann (who in the sequel assisted in the commencement of the first mission, and was consecrated a bishop in 1735, chiefly with a view to the establishment and furtherance of the Brethren's missions among the heathen), were informed by this negro, that while yet on the island of St. Thomas he had often felt an ardent longing after a full revelation of the divine truth, in consequence of which he had prayed to God to give him an insight into the nature of that doctrine which the Christians professed to believe in. God had in His providence led him to Copenhagen, where he had received instruction in the Christian faith, and been added to the church by baptism. He then described in a lively manner the lamentable situation of the negro slaves on that island, both as to temporal and spiritual things; and deplored more especially the wretched condition of his own sister there, who, like himself, had entertained an earnest desire to become acquainted with God, but had neither time nor opportunity for obtaining instruction in consequence of her being in a state of slavery, and who frequently offered up prayers to God that he would send some messenger to instruct her in the way of salvation. He concluded his representations on this subject by expressing a confident hope, that if instruction could be conveyed to them, she, and many other negroes who were of the same mind with her, would be converted to Christianity. Count Zinzendorf being informed of this subject, deemed it of so much importance, that he wished to send David Nitschmann immediately to St. Thomas, to carry the consolatory tidings of the gospel to this distressed negro woman and her fellow-slaves. But as this was found to be impracti-

cable, he returned as soon as possible to Herrnhut, whither he desired the negro Anthony and David Nitschmann to follow him, in order that the former might himself make known his request. Soon after his return to Herrnhut, the Count related, according to his usual practice, July 23d, 1731, to the assembled congregation, the most remarkable incidents of his journey, and acquainted them particularly with what he had heard of the negroes in St. Thomas. His narrative excited in the hearts of two young and lively brethren, John Leonhard Dober and Tobias Leupold, an earnest desire to go and preach the gospel of Jesus Christ to these poor slaves. They were intimate friends, yet they did not, on that day, communicate to each other their sentiments and views.

It was Leonhard Dober's custom every evening to converse with Tobias Leupold concerning the day that was now passed, and to engage with him in prayer; and having fixed his mind on him as a suitable fellow-traveller and fellow-worker among the negroes in St. Thomas, he determined to mention to him the impulse he felt, and if he found him to be of the same mind to consider the affair as settled and to give it further publicity. How great then was his astonishment when he learned from his friend that he himself had felt the same impulse to go among the slaves in St. Thomas, and that he had not been able to fix his mind on any other than his intimate friend to be his companion and assistant in this undertaking.

July the 29th the negro Anthony arrived at Herrnhut; and soon after an opportunity was given him to make known his request to the congregation, on which occasion the count acted as his interpreter, for his address was delivered in the Dutch language. In this address he described, in feeling terms, the miserable condition of the blacks in the West Indies, who not only were groaning under the yoke of the most oppressive slavery, but lived in the commission of the most heinous vices, in consequence of that gross darkness in which they walked, not knowing anything of God and of His Christ. He expressed a hope that as soon as the crucified Saviour should be preached to the negroes many of them would be converted, and mentioned in this view his own sister more particularly; but added that it would be almost impossible for a teacher to have any intercourse with them, except he would himself submit to a state of slavery; for the negroes were so overwhelmed with labors that there would be no access to them with a view to give them instruction, except in the hours they were doomed to spend in their labors.

Leonhard Dober and Tobias Leupold, however, were not intimidated by this representation, but declared their willingness to sacrifice their lives in the service of our Saviour, and to be sold as slaves if they could win but one soul for Him. Their whole project, however, met with little encouragement from the congregation: in the first instance, most of them considered it as a well-meant but impracticable intention of youths who, being full of ardor and courage, did not sufficiently take into account the insurmountable obstacles connected with it. Leonhard Dober drew up a memorial addressed to the congregation, in which he says: "You require me to state the reason I have to assign for my proposed undertaking. I have therefore to make the following declaration: It was not my

intention for the time present to go from home, but rather to tarry, with a view to get more firmly rooted and grounded in our Lord Jesus Christ; but when the count returned from his journey to Denmark, and explained to us the condition of the slaves, so deep an impression was made on my mind that nothing could erase it. It was then I formed the resolution, that, if another brother should be found willing to accompany me, I would offer myself to be a slave in order to tell these poor beings what I knew and had experienced of the love and grace of our blessed Saviour; for I am fully persuaded that the word of the cross, though preached by the weakest and poorest of His followers, must have a divine influence upon the souls that hear it. As to myself, my earnest desire was that should I even be of benefit to none, I might thereby show my love and obedience to our Lord and Saviour. I leave my proposal to the decision of the congregation, and have no other reason to urge it but this—that I think there are yet souls on that island who cannot believe because they have never heard."

After a whole year's delay spent in weighing and examining the proposal of Leonhard Dober, it was finally decided to permit him to go. Tobias Leupold was unable at that time to accompany him, and the congregation feeling unwilling to let Dober travel alone, the latter requested that they would allow David Nitschmann, who had first become acquainted with the negro at Copenhagen, to accompany him. The congregation consenting, the proposal was made to this brother, and he willingly accepted it, though he had to leave a wife and children behind him.

At 3 o'clock in the morning of the 21st of August the count set out with Leonhard Dober and David Nitschmann, and accompanied them as far as Bautzen, where he commended them and their important undertaking to the grace of the Lord, and blessed the former in a solemn manner with imposition of hands. All the instruction he gave to him was comprised in the advice in all things to suffer himself to be guided by the Holy Spirit. At taking leave the count gave each of them a ducat (about \$2.50) for their journey-money, in addition to the sum of \$3, which they had before. And with this scanty provision they continued their route on foot, by way of Wernigerode, Brunswick, and Hamburg, to Copenhagen.

All along their journey and in Copenhagen they met with much discouragement and many difficulties and hardships; eventually they succeeded in securing a passage on board a Dutch vessel bound for St. Thomas, no captain belonging to the Danish West India Company being willing to take them. The voyage lasted upwards of 10 weeks, during which they encountered many difficulties and perils, but turned on all occasions to the Lord, whose help they constantly experienced.

They reached St. Thomas on the 13th of December. The next day after their arrival being Sunday, they began to put into execution the design which had induced them to leave their homes and cross the ocean to St. Thomas. In the afternoon of that day they went in search of Anna, the sister of Anthony. They found her and a second brother named Abraham, and delivered the letter received from Anthony for them. The letter contained an account of Anthony's baptism, and an admo-

nition urging them also to believe in Christ. This admonition gave the brethren an opportunity to begin there and then their labors by preaching to Anna and her brother, and some others who had gathered with them, the universal redemption wrought out by Jesus Christ.

This was the beginning of the mission work of the Brethren's Church, which has been owned and blessed of the Lord until the present time.

**The Government of the Foreign Missions.**—The General Synod.—The Foreign Missions are carried on by the Moravian Church as such, and constitute a cause in which all its three provinces are conjointly engaged. Hence the missions stand directly under the control of the General Synod, which meets every ten or twelve years, and consists of delegates from Germany, Great Britain, America, and the Foreign Missions.

The Unity's Elders' Conference.—The General Synod elects an Executive Council or Board of Bishops and other ministers, styled "The Unity's Elders' Conference," to superintend the general affairs of the Unitas Fratrum in the interval between two Synods. To this body is committed the entire control of the Foreign Missions, including the general management of the finances, and the appointment of the superintendents and other missionaries, who are all responsible to it. It has its seat at Berthelsdorf, near Herrnhut, in Saxony, and is divided into three Boards or Departments, as they are technically called, namely, the Department of Education, the Department of Finance, and the Department of Missions.

The Mission Board Proper.—The Department of Missions is the Mission Board proper, directing the details of the work and its finances. Matters of importance, however, such as the appointment of missionaries and the organization of stations, are brought before the whole body.

Agents and other Officers.—The Unity's Elders' Conference appoints a treasurer of missions, a secretary of missions in England, and agents of missions in Germany, England, and America. These officers are empowered to receive contributions, to draw on the mission treasury, and to represent the cause in other ways.

**Methods of Work.**—Long experience has taught the Brethren that the doctrine of Christ crucified is the power and wisdom of God unto salvation to every one that believeth. Without, therefore, first endeavoring to prepare the minds of the heathen for the reception of the gospel, by instructing them in natural religion, they at once declare unto them the record that God gave of His Son. This they have found, whenever received in faith, to be the most efficacious means of turning the Gentiles from darkness to light, and from the power of Satan unto God. Yet there is no part of revealed truth, whether of doctrine or practice, which the missionaries do not endeavor to inculcate on the minds and hearts of their hearers and converts. In a word, their constant aim is to humble the sinner, to exalt the Saviour, and promote holiness.

The internal regulations are the same in every mission. Besides preaching the gospel, the missionaries are diligently employed in visiting the heathen in their dwellings, or in receiving visits from them, for the purpose of dis-

coursing with them in a familiar manner on spiritual subjects, or administering comfort, advice, or reproof, as the case may require. If any heathen are led to serious reflection, and desire their names to be put down for further instruction, they are called New People, and included in the class of catechumens. If they remain steadfast in their resolution to forsake heathenism, and in their desire after baptism, they are considered as candidates for baptism: and, after previous instruction respecting this ordinance, are baptized. If their conduct afterwards proves that they have not received the grace of God in vain, they become candidates for the Communion, and are admitted to be present as spectators at the celebration of the Lord's Supper. Separate meetings are held with each of these divisions. This is likewise done with other divisions of the congregation, with the children, the single men, the single women, the married people, the widowers and widows. These meetings, besides affording the missionaries an opportunity of instructing them, in a practical manner, in those precepts of the gospel which have a more immediate reference to their circumstances, and in exhorting them to make their calling and election sure, have a pleasing tendency to cement the bond of brotherly love, and maintain the spirit of unity among all the members of the congregation.

In most missions, especially when the number of converts is very large, assistants are chosen, consisting of persons of both sexes, whose good understanding and exemplary conduct have made them respected by the whole congregation. In the discharge of their duty they have particular districts assigned them, in which they visit the people from house to house, attend to the poor, the sick and infirm, endeavor to remove dissensions and promote harmony, etc. They are occasionally employed to hold meetings on week-days, and to preach in the out-places. The assistants, at stated times, meet the missionaries in conference, to report to them and receive their counsel and advice. Servants are also appointed to have the care of the chapel, and attend to everything relating to external order. A council, consisting of a number of persons, chosen by the whole congregation, meets occasionally to confer on all subjects involving the general welfare of the congregation or settlement.

**Statement of Missions.**—**DANISH WEST INDIA ISLANDS.**—*St. Thomas.*—The island of St. Thomas, being the scene of the first labors of the Moravian missionaries, the history of the commencement of the mission on that island is necessarily included in the account of the beginning of the missions of the Moravian Church.

St. Thomas was the home of Anthony, the negro whose pathetic account of the condition of the slaves in that island, which he related to the congregation in Hernhuth, Saxony, moved the hearts of Leonhard Dober and Tobias Leupold to determine to preach the gospel to these destitute souls if God would permit them to carry out their desire.

St. Thomas was a place of considerable commercial importance at that time. Lying, as it does, between the Greater and Lesser Antilles, and having the advantage of a safe and magnificent harbor, it was a port of call for vessels of all kinds seeking cargo, and at the same time a depot for many of the neighboring islands.

It was at one time the rendezvous of the noted

Caribbean buccaneers, and there are towers still standing bearing the names of Bluebeard and Blackbeard, said to have been the homes of these pirates.

The moral and spiritual condition of the slaves was deplorable in the extreme. The missionaries, however, found them willing to listen to the gospel, and the poor creatures clapped their hands for joy when they understood the glad tidings that Jesus had died for them also.

*St. Croix.*—In the mean time a mission had been opened on the adjacent island of St. Croix, the largest of the Danish group, which is often called the Garden of the West Indies, on account of its rich, fruitful soil and fine vegetation. At the time when the Brethren first went there (1733), the island was covered with forests; a very small portion of it had been brought under cultivation, and the climate was exceedingly insalubrious, especially for a European constitution. Eighteen persons went out on the invitation of Count Pless; they were to settle down as colonists and managers of his estates there, and at the same time to avail themselves of every opportunity that would offer for carrying on mission work among the negroes. In less than a year nine were dead, and the rest, perplexed and disheartened, made their way back to Europe, with the exception of one man, Freundlich, who joined Frederick Martin in his work. It soon became evident that the attempt in this form had been a mistake, and that the seed of failure was in it from its commencement. A few years later (1740) Martin visited here and found entrance to many hearts, especially on the Great Princess estate, the property of the West India Trading Company, where the first church was built by the blacks in 1749. Some natives of his training proved, even at this early stage, very valuable helpers in the missionary work.

*St. Jan.*—In the neighboring small and mountainous island of St. Jan or St. Johns the gospel had found entrance by means of some Christian slaves who had been sold from an estate in St. Thomas, where they had belonged to Martin's flock. Visits of the missionary to his scattered members led to a spread of the truth here as elsewhere, and it was soon possible to receive converts into the church by baptism. With the exception of a small Lutheran congregation which is occasionally visited by the minister from St. Thomas, there are no churches besides the Moravian in St. Jan, and the whole population, which does not greatly exceed 1,000 persons, is under the care of the Moravian missionaries.

**GREENLAND.**—The occasion for sending Brethren to Greenland was nearly the same, and took place at the same time, with that which proved the cause of the commencement of the mission among the negroes in the West Indies. While Count Zinzendorf and some other Brethren were at Copenhagen in the year 1731, they saw there two baptized Greenlanders, and heard much of Mr. Egede's endeavors to preach the gospel to the heathen dwelling in that remote country. The count being informed at the same time of the many difficulties this pious man had already encountered, and of the small success which had as yet attended his zealous exertions, was much distressed to learn that serious thoughts were entertained of relinquishing the mission in Greenland altogether. He therefore resolved, if possible, to procure help for this

faithful servant of the Lord, and the missionary spirit which at that time began to manifest itself among the inhabitants of Herrnhut promoted his design. For when, after his return thither, the mission to St. Thomas was taken into consideration, the Brethren who had been with him related at the same time what they had heard at Copenhagen concerning the Danish mission in Greenland. The Brethren Matthew Stach and Frederic Böhmisch immediately felt a powerful impulse to go thither and preach the gospel to the Greenlanders. Matthew Stach himself gives us the following account of the impulse then excited in him, and the manner in which it was carried into effect: "While I was attending the meeting at which the letter of the two Brethren who offered themselves to go to St. Thomas was communicated, the impulse I had felt, when I heard for the first time the accounts received concerning the state of Greenland, was forcibly renewed in my mind, for hitherto I had entertained serious misgivings about making that impulse known to any one, in consideration of my disqualifications for such an undertaking; and my great inexperience, as having been only two years an inhabitant of Herrnhut. I was working at that time with Frederic Böhmisch in the new burial-ground on the Hutberg; to him I first unbosomed myself, and found that in him also a desire had been excited to promote the salvation of the heathen. We entered into a simple and confidential conversation on the subject, and each of us felt an uncommon desire to go to Greenland; yet we knew not whether we were to consider this inclination as produced by a divine impulse and should on that account make it known to the congregation, or ought rather to wait till a call should be given us. But being of one mind, and simply believing that our Saviour will at all times fulfil His promise, that if two agree as touching anything that they shall ask, it shall be done for them (Matth. 18:19), we kneeled down before Him in the little grove hard by, and entreated Him to fill our minds with clearness as to this important matter, and to lead us in the right way. We felt on that occasion an extraordinary degree of cheerfulness and alacrity, and we hesitated no longer to declare our mind in writing to the congregation, leaving it entirely undecided to what heathen tribe we should be called, though we ourselves had the greatest inclination to go to Greenland."

About five months after the departure of Dober and Nitschmann for St. Thomas—January 19th, 1738—the second missionary company left Herrnhut to proceed to Greenland. The little information about this land that had reached Herrnhut was anything but cheering and calculated to awaken hopeful enthusiasm; the country barren and unfruitful, the people indescribably repulsive in their savage barbarism, their language very difficult even for a man of learning and education. The few European colonists in the employ of a Danish trading company were about to be withdrawn, as the trade-returns proved far less than had been expected, and the heroic labors of the Norwegian clergyman, Hans Egede, and his noble wife, which had been carried on without interruption since the year 1721, had resulted in no real spiritual fruit, although a few children had been baptized. Those who knew most about Greenland were the most eloquent in

dissuading the two volunteers—Frederic Böhmisch and Matthew Stach—from adhering to their offer of service. But all in vain. When the church at Herrnhut gave its sanction to the attempt, the men were ready to start. Böhmisch was away on a long journey when the decision was given, and could not go till the following year, but his place was taken by Christian Stach; and with them went Christian David, the carpenter, whose axe had felled the first tree for the building of Herrnhut, and was now to be used in the construction of a missionary abode in distant Greenland, while his wisdom and Christian experience were for the first year or two to be a guide and support to the unlettered novices in the work. "There was no need of much time," wrote one of these men, "or expense for our equipment. The congregation consisted chiefly of poor exiles, who had not much to give, and we ourselves had nothing but the clothes on our backs. The day before our departure a friend in Venice sent a donation, and part of this we received for our journey to Copenhagen. Now we considered ourselves richly provided for, believing that He who had procured us something for our journey at the very critical moment, would also supply us with everything requisite for accomplishing our purpose, whenever it should be needful." Their instructions were to offer themselves as assistants to that apostle of the Greenlanders, Mr. Egede, in case he would and could make use of them; but if he did not want their assistance, then not to disturb him in the least.

At Copenhagen Count Pless, First Lord of the Bedchamber of King Christian VI., after a while pleaded their cause; and they received much kindness from many persons in high positions, including the royal family, the king giving them a letter in his own handwriting to Mr. Egede, in which he warmly commended them to his kind assistance.

By the 20th of May, after a voyage of seven weeks, they reached the coast of Greenland, and were warmly welcomed by Egede at Godhaab, the most northerly of the Danish colonies in South Greenland. (The sphere of labor of the Moravian Mission is restricted to South Greenland; in North Greenland there is only the Danish Mission.) An eligible spot, about a mile away, was selected, a sod-hut raised, and an old boat bought for the purpose of travelling along the coast, and fishing. By and by a wooden house brought from Denmark was put together, the place was called New Herrnhut, and the Moravian Mission in Greenland had begun.

In the year 1738 the first Greenlander was awakened by the preaching of Jesus' sufferings. They give the narrative of this pleasing event. "On the 2d of June, many of the natives of the South, passing by our dwelling, visited us. John Beck was just then employed in making a fair copy of part of a translation of the Evangelists. The heathen wished to know what were the contents of that book. He read part of it to them, and took the opportunity to enter into conversation with them. Having put the question whether they had immortal souls, they replied, yes. He further asked whither their souls would go when their bodies must die. Some said up above, others down below. After setting them to rights, he inquired who had made heaven and earth, mankind and everything visible. Their answer was that they did

not know, nor had ever heard, but supposed it must be some mighty and opulent lord. He then related to them how God had created all things good, and man in particular; and how man had rebelled against Him through disobedience, and thereby plunged himself into extreme misery and perdition: but, added he, God had pity on him, and was manifested in the flesh to redeem man by suffering and dying. In Him, said he, we must believe if we wish to be saved. The Holy Ghost, on this occasion, prompted this brother impressively to describe the sufferings and death of Jesus. He exhorted them, with great energy, to consider well how much it cost our Saviour to redeem us; and to give up their hearts to Him, as His reward so dearly gained by all that He suffered, and especially by the travail of His soul, which caused His sweat to be as it were great drops of blood falling down to the ground. He then read to them the history of our Saviour's sufferings on the Mount of Olives. It was then that the Lord opened the heart of one of these savages called Kajarnak, who stepped up to the table, and said with a loud voice that trembled with emotion: 'How was that? Tell me that once more, for I would fain be saved too.' 'These words,' says the missionary, 'which I had never heard from any Greenlander before, pierced my very soul, and affected me so much that with tears in my eyes I related to them the whole history of the sufferings of Christ, and the counsel of God for our salvation.' Meanwhile, the other brethren returned home from their occupations, and entered, full of joy, into a still farther explanation of the doctrines of the gospel. Some of the savages laid their hands upon their mouths, as is their custom when much surprised at anything they hear; others, who had no relish for the subject, sneaked away; but some desired that we would teach them also how to pray; and, when we did so, they repeated our words several times, lest they should forget them. In short, there was such an emotion amongst them as we had never seen before. At taking leave, they promised soon to repeat their visit, because they wished to hear more of this matter, and to tell it also to their acquaintance."

**THE NORTH AMERICAN INDIANS.**—The history of the Moravian Missions among the North American Indians is one full of sadness, of faithfulness, and of discouragement. From the year 1735 efforts were made to carry on missions in the north and west among the Delawares, Iroquois, Mahikanders, Nantioks, Shawanos, Monseys, Chippewas, and other tribes in Pennsylvania, Ohio, Canada, and the Western States, and also among the Creek and Cherokee Indians, first in Georgia, then in North Carolina, and finally in the far west.

In the year 1735 Moravian missionary work was commenced in North America. A colony of pious men from Herrnhut and neighborhood were sent out to Georgia, with the assistance of Count Zinzendorf and the Government of that State, in the hope that they might there obtain that religious liberty which was denied them at home. Some brethren resolved to go with them, in order to preach the gospel to the Creek, Chickasaw, and Cherokee Indians, who were understood to reside in the neighborhood of Savannah. Here the colony was soon successfully established, under the patronage of General Oglethorpe, and faithfully tended for a time by Brother Peter Böhler as its pastor. On an isl-

and in the river Ogeechee a school for Creek Indian children was commenced, and many natives listened with interest and pleasure to "the great Word" which was proclaimed. Three years later the demand that the colonists should take up arms in order to resist an attempt of the Spaniards to expel the English from Georgia, to which they conscientiously refused compliance, led them to abandon their flourishing plantations and retire to Pennsylvania.

In Pennsylvania a settlement was erected, which was called Bethlehem, and which soon developed into an important centre of Christian activity among nominal Christians, and especially among the aborigines. Spangenberg's account of the wretched condition of the Indians on his return from America awakened so great an interest on their behalf that several young men at once volunteered their services as missionaries. From these, Christian Henry Rauch was selected to commence the work. On reaching New York in the summer of 1740, he was quite in the dark as to the course and means he should adopt for executing his commission, but firmly assured by faith that the Lord would be his Guide and Counsellor. At that time successful missionary work among the Indians was deemed an impossibility even by Christian people. The Romanists had been attempting it with not a little self-denial and heroism from the year 1649; the Puritans had labored in it with such men as Eliot and Mayhew; but the results were anything but encouraging, and the work was regarded with little sympathy or hope. "Heathen they are, and heathen they must remain," was the sad exclamation of a missionary who had labored for six years among them.

One day Rauch met two Mohicans, Shabash and Wasamapah by name, who had come to negotiate with the government; and he requested permission to accompany them to their village and become the teacher of their tribe. Half intoxicated, they consented, but eventually slunk off to their village without him. Rauch at once followed them to Shekomeko, where his two acquaintances and the rest of the tribe listened to his message, and permitted him to visit them. Residing on the farm of a settler, to whose children he acted as tutor, Rauch continued his work, preaching and visiting from house to house; and by degrees, in spite of the most determined opposition of the white men in the district, the hard hearts became softened under the influence of God's Word and Spirit, and some of the worst characters in the tribe were converted. (Among the first converts was Wasamapah, commonly called Choop, who had been notorious for his violence, drunkenness, and profligacy. This word, pronounced Chôpe, is supposed to be a German corruption of the name Job, which the man appears to have borne among the European settlers round Shekomeko. At his baptism he received the name John.) Nor was the effect of a transitory character; on the contrary, the power of the grace of God was singularly manifested in the rapid growth to manhood in Christ Jesus, which marked the course of these first-fruits from among the Indians. On February 11th, 1742, the first three were baptized at Oley in Pennsylvania, and a few weeks afterwards Job (or Wasamapah) at Shekomeko. Under Rauch's faithful care the little church here grew in numbers and in grace, and natives from

a considerable distance came to hear his "good words of the God who died to save the Indians." By the close of the year there were thirty-one baptized converts, and Count Zinzendorf, who visited there in the month of August, was filled with wonder and amazement at the change which God had wrought in these degraded savages.

In this year, 1742, the Indian congregation was dispersed by the enemies of the gospel. About this time Count Zinzendorf made many heart-stirring visits among the Indians; but the white inhabitants showed their enmity towards the gospel so that the missionaries were driven from place to place. In the following years the Indian congregations endured great persecutions until their settlement in Fairfield, Canada, in 1792. Among the many noteworthy events during this period may be mentioned the following: In 1755, when war broke out between the English and French, the Indian tribes were more or less concerned in it. The missionaries and Christian Indians remained neutral, thus incurring the odium of both parties. On the evening of November 24th the mission-house near Gnadenhütten, on the Mahanoy (now Lehigh, Carbon County, Pa.), was attacked by the Indians, and individuals either shot or burnt to death in the house.

In 1772, under the lead of the venerable and devoted missionary David Zeisberger, the Christian Indians removed to the Tuscarawas valley, Ohio, and built two stations, Schönbrunn and Gnadenhütten. Here the congregations flourished for some ten years; many Indians were awakened, and brought to know Jesus as their Saviour; but in 1781 the peaceable Indian congregations were suddenly attacked by 300 Hurons, at the instigation of the English, who believed the Christian Indians to be allied with the Americans; the lives of the missionaries were endangered, and all the inhabitants were dragged for trial to Sandusky, and the missionaries to Detroit. In 1782 many of the famished Indians who had been brought to Sandusky returned to Gnadenhütten to secure the corn which they had left in their fields. They were surprised by a band of 160 armed Americans, imprisoned, and on the 8th of March cruelly massacred on the pretence of their being British spies; their bodies were then burnt. Of 96 Indians only one youth escaped to tell the ghastly tale. (A monument now marks the scene of this tragedy.)

In 1797 the American Government having offered land on the Muskingum (now called Tuscarawas), where Schönbrunn and Gnadenhütten had once flourished as a garden of the Lord, Zeisberger at once and for the last time took the pilgrim's staff in hand, and led a party of his Indians to the much-beloved spot. Here Zeisberger closed his pilgrimage, and his sixty years of mission work among the Indians, on the 17th of November, 1808. The weeping Indians stood round his death-bed, exclaiming, "Father, we will cleave to the Saviour, and live to Him alone." After his death many of the Indians returned to Fairfield, Canada; others migrated westward in 1837, and founded Westfield, on the river Kansas. Of the many congregations founded by the Brethren among the Indian tribes in New York, Connecticut, Massachusetts, Pennsylvania, Ohio, Michigan, Canada, Kansas, and Arkansas, the only re-

maining stations at the present time are Fairfield and New Westfield.

In the South renewed efforts were made to commence a mission among the Cherokees, and with this view several visits were paid from the Moravian congregation at Salem, in North Carolina, to the ancient seats of the tribes in the upper valley of the Tennessee River, and among the mountains of Georgia, Western Carolina, and Alabama. Here, in 1801, the brethren Steiner and Byban commenced a station, called Spring Place; the Indians gave the missionaries a kindly welcome, but lent a deaf ear to the gospel which they preached. The school proved useful in many respects, but years elapsed before visible results of the labor expended were granted. In 1819 a second station was opened at Oochgelogy. In 1830 the troubles began between the citizens of Georgia and the Indians, which resulted in the forcible expulsion of the latter from the State to the Indian Territory, west of the Mississippi. This took place in 1837 and 1838. The missionaries went with the emigrants, of whom many died on the arduous journey; but the missionary work was for the time ended, as regular systematic effort was impossible. After various vain attempts, stations were formed at Canaan (1840), and New Spring Place (1842), and the work revived and prospered.

The civil war between the Northern and Southern States again put an end to the mission, as the Cherokees from their geographical position were involved in the struggle. The nation was convulsed, old feuds were revived, lawless bands wandered through the country, plundering and murdering without restraint, and many of the inhabitants sought safety in flight. A native assistant, James Ward, was murdered by some Indians belonging to the Union party, and the missionaries were in considerable peril. The station at Canaan was entirely destroyed, New Spring Place greatly damaged, and all hope of a renewal of the Cherokee Mission seemed vain.

At the close of the war, however, in 1866, Brother Mack returned to New Spring Place, and subsequently another station was occupied at Tablequah, in the Parkhill district. These two are still maintained, and only these, as the result of seventy years of labor, hindrances, and trials, and have still been persevered in, often in hope against hope.

**SOUTH AMERICA.**—Between the 5th and 6th degrees of north latitude the territory of Guiana stretches in southeasterly direction from the mouth of the river Orinoco towards that of the Amazon. Formerly entirely a Dutch possession, a portion of it is now held by the French, and contains their well-known penal colony of Cayenne, and the largest part by the English, who gave the names of Demerara and Berbice to the two counties of British Guiana. The Dutch colony goes by the name of Surinam. In British Guiana only the flat land along the shore, extending from ten to fifty miles inland, is cultivated; in Dutch Guiana the swamp is on the coast, and the cultivated land generally follows the course of the rivers up to the border of the colonial territory; beyond that, in virgin forests on higher land, are the homes of the bush-negroes, or maroons, as they are called in Jamaica, and of some Indian tribes. For Europeans the climate is very unhealthy, and the death-roll of missionary brethren and sis-

ters in this land is exceptionally long. The sphere of the operations of the Moravian Church is almost entirely within the borders of the Dutch colony, as the work among the negroes in Demerara is as yet comparatively insignificant, and that among the Indians, although begun in English, had most of its stations in Dutch territory. For the sake of clearness it is well to distinguish four separate branches, which, although in more or less close connection with each other, and to some extent worked by the same men, have yet their own characteristic features and separate history.

I. *Arawack Indians*.—Of several Indian tribes resident in Berbice, the Arawacks, at the time the mission began, were the chief in point of numbers and influence. They occupied a considerable territory, and were under a sort of royal government, which, however, was materially limited by the untamed independence of the Indian nature. Their religion was distinguished by dark superstitions and revolting rites. Their character was marked by strong sensual tendencies, hypocritical deceitfulness, revengeful cruelty. The work among the Indians proved almost throughout its whole course a "sowing in tears;" with wonderful perseverance, and often with heroic endurance, it was maintained for seventy years, and then sorrowfully abandoned.

The following are some of the principal events in connection with this mission. In 1748 the gospel was already beginning to exercise its blessed influence on the poor heathen, when Theophilus Solomon Schuman, called the "Apostle of the Arawacks," arrived. His great talents rendered him, after an abode of four months among the Indians, capable of preaching in the difficult language of the natives; whilst a wonderful combination of wisdom and firmness enabled him to triumph over the opposition of the whites in Berbice. Three hundred converts were a proof of the success of his labors. But in 1757 difficulties of every description, and among the rest famine and epidemics, thickened around and almost dispersed this little flock. The Brethren therefore sought a more peaceful abode, which they found at Sharon on the Saramacca, about two hundred miles east from Pilgerhut in Berbice, and in Ephrem on the Correntyn, about forty miles east from Pilgerhut. In 1761 Sharon was burnt by the bush-negroes on a marauding excursion, and the converts dispersed for a time; and in 1779 it was given up, as continual incursions of the bush-negroes, combined with difficulty in procuring a maintenance, had compelled the Indians to emigrate.

As Ephrem was unfavorably situated, a new station about twelve miles higher up the river was commenced, and called Hoop (Dutch for Hope); but in 1808 this station was burnt to the ground by enemies, and thus ended the Brethren's mission among the South American Indians.

II. *Mission among the Negroes in Surinam*.—The river Correntyn separates Surinam from Demerara. The products and general aspect of the two colonies are alike, only that the latter has far outstripped the former in development. With an area of 60,000 square miles, the population is estimated at 70,000, including 17,000 bush-negroes. Paramaribo, the capital of Surinam, on the river Surinam, is a thoroughly Dutch town of 23,000 inhabitants, with

an atmosphere which is described as "like that of a hot-house and vapor-bath combined, having blown over the great moist plains, brimming river-marshes, and dense forests which constitute nine tenths of the Guianas and Brazil." Fifteen miles of swamp and forest separate the larger part of the cultivated districts from the sea-breeze. The town itself is said to be healthy. It contains a Lutheran, a Reformed, and a Roman Catholic Church, besides the large Moravian places of worship, and also two synagogues.

In the year 1735, when the first Moravian missionaries landed in Surinam, the town was not more than half its present size; it afforded convenient headquarters for those Brethren who soon afterward came out to commence a mission in Berbice. Four years later a company of five Brethren arrived, and began to work at their trades, in order by the labor of their hands to support both themselves and the mission in Berbice; for the latter their services as a kind of local agents were of great value. At first they had to face a good deal of opposition, but they gradually overcame ill-grounded prejudice, and were permitted to purchase a piece of land in the town. For a considerable time their missionary work continued very limited: indeed it was almost entirely restricted to those persons with whom business connections brought them into close and frequent intercourse. By slow degrees, however, they became more untrammelled in their evangelistic operations, and Paramaribo became a genuine mission station. In 1776 Christian Cupido, the first negro convert, was baptized; he was followed by eight more in the same year. Two years later a church was built in the garden surrounding the missionaries' abode: at that time fifty-two negroes and mulattoes were under the spiritual care of the brethren, of whom eighteen were baptized. Some influential white residents, including the governor, occasionally attended the services, and showed themselves favorably disposed towards the new work, but not a few proprietors punished their slaves for entering the church.

In 1779 it became necessary to enlarge the church, and at the same time a new sphere of usefulness was opened for the missionaries, which in years to come was destined to assume great importance as one of the most extensive departments of Surinam missionary work. The proprietor of the "Fairfield" estate on the river Commewyne, some 30 miles from Paramaribo, having requested the Brethren to supply his negroes with the gospel, the latter gladly accepted the invitation. For many years this was the only estate, out of some 400 then in cultivation, to which they had access with the gospel, but here it was received with joy.

With the year 1821 an era of more marked progress began. A few additional estates were thrown open to the missionaries,—by the year 1826, 6; in the following year, 13; during the next ten years, 90,—and the negroes on them were supplied with the gospel, as far as was possible, under very disadvantageous circumstances. The visits to the estates could only be paid about once in eight weeks, and the want of trustworthy native helpers made it very difficult for the missionaries to become thoroughly acquainted with their people, and to ensure their being well-grounded in Scripture truth. The negroes themselves complained that "they

could understand what the teacher said as long as he spoke, and that they heartily rejoiced over it; but that they were too dull to remember it or repeat it." This drawback was to some extent remedied by the publication and distribution in the Negro-English language of the "Harmony of the Four Gospels (1821);" but, although mitigated by the creation of central stations, at which missionaries reside, and to which the negroes have, of course, free access, it remains a serious obstacle down to the present day.

Up to this time no entire portion of the Scriptures had been printed for circulation among the negroes; indeed the number of those who were able to read was so few that it would scarcely have seemed worth while to publish an edition of the Bible or even the New Testament for them. The New Testament existed in manuscript in the Negro-English language, and was used in this imperfect form, but along with the preaching of the gospel education had made way among the slaves; wherever permitted, the Brethren commenced schools, in which, at all events, the first rudiments of learning were taught. Hence, when in 1831 the British and Foreign Bible Society sent out a supply of printed New Testaments in the Negro-English language, they at once came into the hands of such as could use them intelligently. Naturally much good resulted. In not a few instances older persons were brought to the knowledge of the truth as it is in Jesus, and became consistent Christians from hearing their children read out of the Testaments which they had learnt to read in the mission school. Thus the work rapidly expanded; at the close of the year 1831 the congregation at Paramaribo numbered 3,089 souls, while 264 persons on the plantations were under the spiritual care of the missionaries.

In the year 1862 the first step towards the emancipation of the slaves was taken by the passing of a law by the Legislative Assembly in Holland. On the 1st of July, 1863, proclamation was made that at the close of ten years of apprenticeship, to date from the passing of the Act of Parliament, all bondsmen in Surinam should become free, and there was great rejoicing in every humble home. Everywhere order and decorum were maintained. The effects of emancipation on the mission were awaited with feelings of anxiety, for it could scarcely be expected that of the 27,000 persons who professed church connection with the Moravian Church in the year 1863, all would prove stable against the temptation to convert liberty into license.

The anticipations of the Brethren were in part fulfilled when in 1872 the term of apprenticeship ended. A recent report sums up the position in a few words: "Social relations have greatly changed, and with them the aspect of the missionary work. Formerly the blacks, being attached to the soil, could always be found by the visiting missionary on the estate to which they belonged; now they are scattered abroad: some have become possessors of land themselves, and often reside at great distances, beyond his reach; others have no settled abode, but wander about from place to place. Under these circumstances pastoral intercourse and supervision, which constitute an important part of our missionary work, as well as preaching the gospel, are rendered very difficult."

### III. *Bush-negroes or Free Negroes in Suri-*

*nam.*—"Bushland," the home of these representatives of the negro race, comprises the more elevated tracts of forest land through which the rivers Surinam, Saramacca, and Marowynne wend their early course. The name merely distinguishes this district from the cultivated portion of the colony, which is itself, to a large extent, covered with forests. As early as the 17th century bands of fugitive-slaves ranged through these regions, but their permanent occupation on a large scale is to be traced to the following circumstances: In the year 1712 a detachment of a French fleet appeared at the mouth of the river Surinam, with hostile intentions towards the colony. The Dutch proprietors, as a matter of precaution, removed their slaves up the country out of reach of the enemy. But when the danger was over the slaves very naturally refused to return to bondage, and every attempt to compel them only drove them deeper into the recesses of the forest. Warlike operations proved not only useless but disastrous, as most of the European soldiers perished, struck down by the hardships of the campaign in the deadly climate of those forests and swamps, or by the poisoned arrows of unseen foes. After several years peace was concluded in 1761, and the independence of the Bush-negroes was formally proclaimed.

Soon after this settlement of affairs the colonial authorities requested the Brethren to extend their operations to the Bush-negroes on the river Surinam, and the invitation was at once accepted. Thus began a mission which is unique in some of its features. Unaffected by the obstacles which are inseparable from a state of slavery, this mission had to struggle against the darkest heathenism and to encounter the most violent resistance from the idolatrous priests and sorcerers; and this, too, under the depressing influence of a climate which proved fatal to a large number of missionaries, and disabling to almost every European who engaged in the service.

In the year 1813 Brother and Sister Mähr, who had labored at Bamby for 18 years, and were unable to continue in active service, were recalled, and no successor was appointed, partly in consequence of the urgent claims of other mission fields for all the available missionary resources of the church. During the 48 years of the mission's existence nine Brethren and six Sisters had sacrificed their lives in its service. The number of converts was only 50, and of these some were of doubtful character.

Among the Matuari tribe of Bush-negroes a remarkable work had begun in 1858, through the instrumentality of a man named King, who lived at Maripastoon. Led to inquiry by remarkable dreams, he visited the missionaries at Paramaribo, and on his return home at once stood forward as a bold antagonist of the dark horrors of heathenism. The impression made was very powerful indeed—so much so that no hand or voice was raised in opposition when he ventured to overthrow the wretched idol-temples and cast the idols with their paraphernalia into the river. Other branches of the tribe were visited, and even the chieftain Kal-koen listened respectfully to the eloquent protests of this singular "prophet." A goodly number of his countrymen, following his example, made their way to town to inquire further about the strange things they had heard. In 1861 (August 11th) King was baptized, re-

ceiving the name John. A church was built at Maripastoon, exactly suited to the people's means and notions—in fact a native house on an enlarged scale; John King acted as teacher and native helper, the missionaries visited there as frequently as they could, and the little band of converts grew in number and in grace. King seemed to feel it his calling to work as an evangelist among his countrymen, and undertook long journeys to the Auka, Matuari, and Bouy negroes, everywhere preaching Christ, and meeting with a very favorable reception for his message. When a missionary from Paramaribo or Bergendal, the station which is the “key of the bush-country,” travels up the river, it almost always happens that King brings some converts to be added to the church by baptism, who are the fruit of his own faithful testimony as a witness for Christ to his dark countrymen.

IV. *Demerara*.—In the year 1835 Brother and Sister Coleman were sent to commence a mission among the negroes on the Anna Regina estate, the proprietors of which defrayed the entire expense. Hopeful at first, the aspect of things seemed soon to change, and unexpected difficulties arose, which led to the withdrawal of Brother Coleman after two years of service. The effort was resumed by Brother and Sister Hamann, and the work appeared to prosper, but Sister Hamann's suddenly failing health necessitated a second abandonment of the field in the year 1838.

At the request of Quintin Hogg, Esq., in the year 1878 a similar mission was commenced at his expense for the benefit of the negroes on his estates. Brother Henry Moore and Brother A. Pilgrim occupied two stations,—Graham's Hall and Reliance,—and reported, in general, gratefully of the measure of success which marked the past and hopefully as to future prospects, although not concealing sundry very serious drawbacks.

In 1884 Mr. Q. Hogg informed the Directing Board that he could no longer continue to pay the full amount he had at first given for the support of the work, and in consequence Reliance, one of the newly-founded stations in Demerara, had to be abandoned.

SOUTH AFRICA.—Since the year 1869 this extensive sphere of labor has been divided into a western and an eastern province. The former used to be called the Oberland or Upper District, and embraced the stations near Cape Town, and also those in the vicinity of Algoa Bay. The latter was called Unterland or Lowlands; it embraces all the stations in Kaffraria. In the former the people are mostly a mixed race of Hottentots and negroes, the pure Hottentots being generally supposed to have dwindled down to a very small number; in the latter they are mainly Kafirs of various tribes.

I. *The Western Province*.—The work at the Cape of Good Hope began in the year 1737, when George Schmidt reached Cape Town as the first representative of the Moravian Church in the colony. Two and a half centuries earlier Christianity had begun to touch the country, as the Portuguese successors of the bold Bartholomew Diaz often paid short visits to its shores on their way to and from India. Crosses were reared here and there on the shore, but little more was done to bring Christianity to the notice of the inhabitants. In 1620 two English captains took possession of the country in the name of their sovereign, hoping that “the sav-

age inhabitants would soon become servants of his Majesty, and then worshippers of the true God.” Thirty years later the Dutch built a fort at the Cape, and claimed the land as theirs, and in their record of the transaction expressed the desire that “their rule might tend to uphold righteousness, and plant and further pure Christian teaching among the wild and savage natives of the country.”

When Schmidt arrived at the Cape, the condition of the natives, and their relations to the white colonists, who embraced French and German elements as well as Dutch, painfully showed that very little had been done to carry out the wishes of the early occupants of the colony. Both Hottentots and Bushmen had been disgracefully treated, robbed of their lands, regarded as beasts rather than as human beings, and reduced to hard servitude or the wild life of the brigand, hiding in rocks and caves, and preying on the white man as opportunity offered. The Dutch Boer or farmer, combining in his character the most contrary qualities, and strongly tinged with a peculiar puritan form of religion, persistently regarded the natives as doomed to destruction, like the people in Canaan in olden times, and treated them with contempt and loathing, and with terrible cruelty. To offer Christian teaching to these “zwarte schepsels” (black creatures), was not to be dreamt of: Christianity was intended for white people, but not for “black cattle.” To buy land, however absurdly low the price paid might be, was of course out of the question, if it could safely be taken by force. The curse of civilization they were welcome to, and they had become to a terrible extent slaves to the vice of drunkenness, with all its concomitant evils; diseases, too, previously unknown, raged with fearfully fatal effects, decimating the population of the country. Thus it came about that the colonists as they increased in number and power seized the whole land, while the poor natives were reduced to a condition of moral and physical degradation and wretched servitude. Christian churches existed in the country and Christian doctrine was preached—often, alas! by men who were mere hirelings; but woe be to the native who would dare to venture near the white man's house of prayer. Under these circumstances G. Schmidt entered upon his work.

Two gentlemen residing in Amsterdam, who had become interested in the natives of the Cape Colony by Ziegenbalg's account of them, and had been led to the duty of taking part in Christian missions by intercourse with some of the gospel messengers who had embarked for their destination at Amsterdam, suggested to the Brethren at Herrnhut the commencement of a mission among the Hottentots. The man selected for the office of pioneer was a devoted servant of God whose zeal and steadfastness had already stood a severe test. Although only twenty-seven years of age when setting forth for Africa, he had spent six years in chains in a Bohemian prison “for the sake of the gospel,” and one year (immediately on his release) in travelling on foot through several countries of Europe in order to become acquainted with awakened souls, and to proclaim, wherever he could find an opportunity, the glad tidings of salvation in Jesus. He was a poor man, earning his living by his daily labor; his education had been exceedingly limited, but his heart was

full of love and devotion, and he longed to be spent in the Master's service.

Arriving at Cape Town on July 9th, 1739, he and his projects soon became common topics of conversation: in all sorts of circles of society the missionary was sneered at and derided, or spoken of with angry scorn. Scarcely any one gave him credit for the most ordinary honesty of purpose, not to speak of lofty enthusiasm for his work and calling, and no one believed in his achieving any success. In two months' time, however, he was making his way to a Hottentot kraal on the river Zonderend, about fifty miles to the east of Cape Town, under the guidance of Afriko and Kybodo, natives from that place whom he had met there. The former was master of the Dutch language and of great use as interpreter. Having built himself a hut near Afriko's dwelling, round which a garden was soon laid out, he at once began to preach with the help of the interpreter. His attempts to learn the Hottentot language with its singular variety of "click" sounds and most peculiar intonations, which travellers compared with the "cries of turkeys, owls, or magpies," proving a failure, he wisely resolved to teach the people Dutch. In imperfect fashion he told the story of the cross; but before long a Dutch corporal living near was won for Christ by his testimony, and became his staunch friend and faithful helper in the work.

In the following year (1738) some hostile farmers procured an order transferring him to a spot some ten miles off, a wild locality, called Bavianskloof, or Ape Valley, from the large number of those animals which frequented the place. Eighteen Hottentots followed him, who were surprised to see how soon he had built himself a new hut and laid out a garden; at once he resumed his work of preaching and teaching, and training the natives to habits of industry and all kinds of agricultural pursuits. The people liked the only kindly white being they had ever seen; they had such confidence in him that even several of those who did not come to reside near him sent their children to school to him. The number of pupils soon grew to fifty, among whom the most promising was Willem (William), who was the first to be baptized (in the year 1742), and subsequently Schmidt's valued assistant. With the Hottentots' tendency to lead a roving life and to indulge in gross vice, the office of a faithful missionary was no sinecure; on the contrary, it required an inexhaustible supply of love and patience, and Schmidt appears to have possessed this. In a short time the Christian flock at Bavianskloof numbered seven Hottentots, and a considerably larger number of natives had become very warmly attached to the good teacher.

As soon as the tidings of the baptism of natives reached Cape Town, great opposition was excited; the chaplain of the fort summoned some of the candidates to an examination, and was amazed to find that they could read fairly well, and give sensible and even correct answers to his questions on Christian doctrines. His favorable testimony, however, had no weight with those who could not endure that these natives should be regarded and treated as human beings, and they succeeded in inducing the governor to forbid Schmidt to baptize. Thus obstructed in his work, he returned to Europe in 1744, in the hope that negotiations there would clear the way for missionary opera-

tions at the Cape. The hope was vain; no petitions availed with the government in Holland, and the small flock of converts, which had grown to forty-seven persons, after keeping together for a time in the hope that their teacher would return to them, gradually dispersed or died. Bavianskloof was abandoned and became a wilderness. Schmidt returned to his humble calling of day-laborer, but to the last day of his life never lost faith in the eventual success of the Mission in South Africa, and never wearied of frequent prayer for his beloved Hottentots. While on his knees the Master's welcome summons called the faithful servant home.

*Eastern Province.*—The Kafir Mission proper dates back to the year 1828, when, at the request of Lord Somerset, the Brethren consented to commence a mission in a tract on the north-east frontier of the colony, which owned the sway of the Tambookie Bowana as its chief. At that time the London Missionary Society, the Glasgow Missionary Society, and the Wesleyans were already at work among portions of the Kafir tribes. The brethren Lemmertz, Hoffmann, and Fritsch, some twenty Hottentots, and Wilhelmina Stompjes, a Kafir woman, who seems in God's providence to have been specially raised up as an invaluable help to the missionaries in their difficult and often perilous work, formed the little company, which set out from Gnadendal on February 21st, 1828. Not before May 20th did they reach their destination, and fix on a site for the new station on the river Klipplaat. (Its position is 120 miles northeast of Port Elizabeth, and 60 or 70 northwest of East London.) In a month's time building operations were so far advanced that services could be held in a room which served as a church, and the natives were surprised and delighted to see the happy effects of an irrigation scheme, which the brethren at once recognized as a necessity if good harvests were to be looked for. Spiritual work had hard rocky ground to deal with. Bowana and his Tambookies were by no means eager to hear the gospel, and very loath to accept it. "The Word of God is for the white people," they said, "not for us: it will not enter our ears and hearts." And their statement seemed only too true.

They would come, and listen stolidly, and beg most pertinaciously; yielding to the infectious example of the missionaries, whom they saw leading the way in hard manual labor in garden, field, or water-conduit, they would even handle a spade for a while in a dilettanti fashion, but the gospel appeared to make no impression. The missionaries labored under the great disadvantage of being obliged to carry on all communications through an interpreter. But Wilhelmina proved a host in herself, teaching a number of native girls, interpreting with great readiness, though frequently interspersing comments and additional remarks from her own warm heart, using all the gifts and graces she possessed with singular humility and earnestness for the furtherance of the Lord's work. Employed in the kitchen of the mission-house, she liberally dispensed the Word of Life along with the dole of bread to the throng of beggars which daily crowded round the door: there, too, she received the messengers of many a proud Kafir chief, who could not resist the powerful weight of her noble, upright, unself-

ish character, and her words of wisdom and discretion. At the close of the year things looked far from promising, however; locusts had devastated the gardens, thievish Fetkameas had stolen the herds, and most of the Tambookies had left the neighborhood.

In the following year Bowana and his savage son Mapasa, enraged at a well-deserved fine inflicted on them by government for an unwarrantable act of violence towards another tribe, and attributing the action of government to the advice of the missionaries, suddenly appeared at Shiloh at the head of fifty armed men with the intention of murdering all its inhabitants. Working in the garden, Wilhelmina at once recognized, from the war-costume of her countrymen, the object of the visit, and hastened to the rescue of her teachers. With undaunted courage she faced the fierce and cruel chiefs, and with scathing eloquence upbraided them with their abominable treachery and wicked designs. Instead of killing the missionaries and the woman who had dared to intrude in the assembly of men, they withdrew peacefully with their followers, and in a few days actually sent to apologize. Mapasa's hatred continued unabated, but so did the Lord's care for Shiloh and its people, and faithful Wilhelmina was often used by Him as the channel for His protection and blessing. Through many difficulties, hindrances, and trials the missionaries persevered until the work was fairly established on a solid foundation and began to spread to the surrounding tribes.

**BARBADOES (WEST INDIES).**—Except the force of Christian sympathy and compassion, there appears to have been no cause of a special character to induce the authorities of the Brethren's Church to commence a mission in this island. But its circumstances might well claim both. Churches and schools there were, but exclusively for the whites, who were more numerous in proportion to the black population than in any other West Indian island. Even the members of the Society of Friends, at that time numerous in Barbadoes, appear to have been mainly, if not exclusively, concerned with the improvement of the external condition of the slaves; these were at that time intellectually lower than in some other islands, but of a restless turn, which not unfrequently led to opposition against the ruling class, and severity of treatment by way of check or retaliation.

It was in the year 1765 that John Wood and Andrew Rittmansberger were sent to commence operations in Barbadoes. They reached Bridgetown in safety, but within a month of their landing Rittmansberger had died of fever, and before the end of the year Wood had lost courage, and abandoned his vocation. Another brother, sent out in the following year, fell a victim to fever a week after reaching the island. In 1767 Brother B. Brookshaw, who was subsequently in Antigua, arrived, and was permitted at length to lay a foundation to the spiritual building, which it was proposed to erect to the glory of God. Though not possessed of great learning, he was gifted with practical good sense, and above all was devoted to our Saviour, and full of eager zeal for the spread of His kingdom on earth. To his simple faith no obstacle proved insuperable, and his genuine humility and loving nature won the hearts of all with whom he came in contact. His first address to the slaves was delivered in the yard

surrounding the "great house" on an estate belonging to a Quaker gentleman, Mr. Jackman. A week later the spacious saloon of the residence was used, and several white persons were present. The proprietor was astonished at the attention of the negroes, who seemed eagerly to swallow the words as they fell from the preacher's lips. An effect was soon perceived, the work of evangelization had begun, and if there were opponents around who invoked vengeance on the ship's captain who had brought out "this Moravian preacher," or threatened to throw him into the water if they came across him, there were several staunch friends who rallied round him. Among the latter were several clergymen of the Church of England, of whom Brookshaw says in his diary that "their doctrine is more in accordance with the truth of the gospel, and the articles of the Church of England, than what one is accustomed to hear in churches at home."

**JAMAICA (WEST INDIES).**—It was at the request of two wealthy proprietors—the brothers William Foster and Joseph Foster Barham—that a mission was commenced on their estates in this island. Through the preaching of John Cennick in England they had been converted, and were desirous of conferring the blessings of the gospel on their slaves; hence they brought all their influence to bear on the missionary work which Brother Zacharias George Caries and two others went out to commence in the year 1754. For the attainment of this object they were willing to make no inconsiderable pecuniary sacrifice; but this was of small account to persons of their condition, in comparison with the loss of reputation, the ridicule and ill-will to which they cheerfully subjected themselves from relatives, friends, and fellow-proprietors. Their object was in the first instance to provide religious instruction, but then also to promote the temporal and social well-being of the negroes, for whom they held themselves responsible. In the case of some of the subsequent promoters, Christian philanthropic motives may have been tinged with a hope of improving their property, especially after it became known—as was publicly stated by a Jamaica proprietor in the House of Commons—that a "Moravian negro" by reason of his industry, obedience, and faithfulness was worth considerably more than an ordinary one. But it is fair to state that many Jamaica estate-owners, resident and non-resident, especially during the past fifty years, have been ready to make real sacrifices to secure the spiritual, moral, and temporal well-being of their negroes.

On the 18th of October, 1754, Caries reached the Bogue estate in the parish of St. Elizabeth. The negroes heard his message gladly, and the Word of the Cross soon found its way into some hearts, and proved itself a regenerating divine power. In April of the following year the first convert was baptized, and the preaching of Caries attracted white men as well as blacks, from a distance of twenty to thirty miles even, so that the faithful and truly humble servant of God began to be anxious concerning the favor he was obtaining from men. By the end of the year 1755 there were already 77 baptized negroes and 400 candidates or inquirers on the estates under the care of the brethren.

**ANTIGUA (WEST INDIES).**—Samuel Isles was the honored founder of the mission in this

island. He had labored for eight years in the island of St. Thomas, when he was sent on to Antigua with instructions to commence work there among the neglected black population, if an opening could be found. On April 1st, 1756, he landed at St. John's, alone, friendless, without introduction. Placing his trust in God, and seeking for His guidance, he straightway called on the governor, to whom he presented a copy of the Act of the British Parliament of 1749 recognizing the Moravian Church and encouraging its labors in the British colonies. Permission to commence work was at once granted, and on the 12th of January of the following year the first convert was baptized. But the work progressed very slowly. For the exercise of the public ministry among the slaves there was little scope, the opposition of most of the planters was strong and bitter, and the efforts of the missionaries were greatly impeded by having to labor for their own maintenance, which was the common practice among the early Moravian messengers. Isles died at his post in 1764, having seen but little fruit of his labor. In the years immediately following, the number of baptized members dwindled down from thirty-six to fourteen. This was the state of the mission when in 1769 Brother Peter Brown (or Braun), commonly known among the negroes as "Massa Brown," arrived from Bethlehem in Pennsylvania, through whose influence, with God's blessing, a wonderful change was soon effected.

Brown is described as "undistinguished by either shining abilities or superior knowledge, by dignity of manner or elegance of delivery; yet possessed of gifts and graces which the most talented among his fellow-servants would do well earnestly to covet." Brother Bennet Harvey, who followed him in his service after an interval of forty years and had ample opportunity of forming a just estimate of his character and labors, wrote of him as follows: "Simplicity and unction marked the genuine character and earnest labors of Brother P. Brown. Rightly discerning his call to be a disciple of the cross and a preacher of the gospel to the poor, he minded not high things, but condescended to men of low estate; even to those who were esteemed the weak, base, foolish, and despised of this world. Even by such he was himself at first despised; but he pitied and bore with their ignorance and the mockery of their children, until by the Christian meekness and gentleness of his demeanor he overcame their obstinacy, obtained from them a patient hearing, and prevailed with them to be reconciled to God. He visited them in their huts, followed them in their hours of rest in the field, ate with them out of their calabash, talked the gospel to them, and with equal grace and wisdom, as a father with his children, drew their hearts to himself as the negro's friend, and the messenger of the Church desirous of their salvation. His heart was in his work and in his words. . . . With a wisdom which the world counts foolishness, and a lowliness of mind which it despises, he suited himself to their capacity and condition; and thus by word and deed preached the gospel to the poor. . . . Truly blessed continues to be his memory."

ST. KITTS (WEST INDIES).—Tidings of the happy results of the mission in Antigua, easily transmitted to the adjacent island of St. Kitts,

soon awakened a desire on the part of some well-meaning proprietors in the latter to try the experiment of Moravian missions on their own estates. Self-interest was, no doubt, a leading motive with several of the intelligent gentlemen who promoted the scheme. But in the case of the main mover, Mr. Gardiner, an eminent solicitor and planter, there was a true desire to advance the Saviour's kingdom among the black population on his own property and throughout the island. On his invitation the Brethren Gottwalt and Birkby were sent out in the year 1777, and received a very kind welcome from Mr. and Mrs. Gardiner, who introduced them to some of the leading officials, including the governor and the commander-in-chief of the Leeward Islands. A house in the outskirts of the town of Basseterre was hired as headquarters, and the work of preaching began here and at Palmetto Point, the estate of Mr. Gardiner. Supported by this friend and the governor, the Brethren were able to successfully cope with the hostility of some ill-disposed whites, and they soon found that their words were beginning to take effect on the hearts of the negroes.

TOBAGO (WEST INDIES).—The whole population of this island is about 17,000 souls, considerably less than that of the single town of Bridgetown in Barbadoes. It lies about 24 miles northeast of Trinidad, and rather more than 50 miles from the South American Continent. Its landscapes are very picturesque, river-scenery frequently enhancing their beauty. A large portion of the central districts is still uncultivated. Situated nearer to the equator, its hot and damp climate is generally found to be more unhealthy for Europeans than that of the other islands; but it is stated that cases of yellow fever in its most dangerous type are of rare occurrence. Hurricanes, too, are seldom mentioned in the island records.

The missionary work of the Moravian Church in this beautiful tropical island may be dated from the year 1787; but permanent footing was not actually obtained until 1826. In the former year Brother and Sister Montgomery (the parents of the poet) proceeded from Barbadoes to Tobago on a visit to Mr. Hamilton, the proprietor of several estates, who was anxious to do more than he had done for his numerous slaves. Mr. Hamilton, at that time not the decided Christian he subsequently became, was a man of great benevolence, and an exception to the majority of the planters of that day, among whom the rule was to make as much money as possible out of the labor of oppressed and helpless slaves, and spend it in reckless profligacy and debauchery. He was deeply impressed by the consistent Christian words and work of the Brethren, whom he had learnt to know in London and Barbadoes, and became very urgent in his wish to have Moravian missionaries for his people. He was favored to see good fruits produced among his slaves, and several members of his family continue to the present day to manifest their interest in the mission work.

Montgomery returned to Barbadoes, with a report which was very hopeful of good results for a missionary effort in Tobago. But men were so scarce, and the requirements of the rapidly growing mission elsewhere so multiplied, that it was not till 1790 that the first missionary could be sent in the person of Brother Montgomery himself. His work was begun with great vigor, but was sadly hindered by a

formidable outbreak of soldiers and people on receipt of the tidings of the French Revolution, by a disastrous hurricane a month or two later, and the failing health of his wife which ended in her happy departure before the year closed. In March of the following year Montgomery, with his health completely shattered, had to return to Barbadoes, where, in the month of July, his brief missionary career was terminated by his death.

Twenty-four years later the mission was reopened by Brother Peter Ricksecker, from the congregation at Bethlehem in Pennsylvania, with prospects not less favorable than on the previous occasions. The son of Mr. Hamilton, who had inherited not only his father's estate, but also his ardent desire for the temporal and spiritual welfare of his slaves, was ready to give them every assistance, and the island seemed now to be permanently settled in English hands. At Riseland a building was soon arranged as a temporary church; and as the missionary became acquainted with the people, he was delighted to find that the fruits of the earlier missions had not altogether disappeared. At first the blacks came from all parts to see and hear him, but the charm of novelty soon wore away, and then it became needful for him, with patient and self-denying love, to seek them out and press the gospel on their attention: the children especially were objects of his warm interest and tender care. In 1827 twenty estates were visited and provided with services, and the need of a mission station with its own church became pressing.

**MOSQUITO COAST, CENTRAL AMERICA.**—About the year 1847 the Mosquito Coast was much spoken of in public papers in connection with an attempt of the Prussian Government to establish a colony there and to direct the tide of emigration to those parts. The project proved abortive, chiefly on account of the universally prevailing belief that the climate was unhealthy for Europeans. As a field for missionary labor this region was first commended to the consideration of the Moravian Directing Board by Prince Schönburg Waldenburg, a munificent helper in their missionary work in various climes, whose generous gifts were always characterized by practical wisdom and a very real and intelligent interest.

The country in question, comprising a narrow strip of coast, about one degree in breadth and two in length (west longitude  $83^{\circ} 31'$  to  $84^{\circ} 40'$ , north latitude  $11^{\circ} 45'$  to  $14^{\circ} 15'$ ), is bounded on the north by Honduras, on the west and south by Nicaragua. A reconnoitring visit was made in 1847 by the Brethren H. G. Pfeiffer and A. A. Reinke, at that time missionaries in Jamaica.

A four days' sail from Kingston brought the explorers to St. Juan de Nicaragua, on account of its harbor the most important town on the coast. It is now also called Greytown, after Sir George Grey, formerly governor of Jamaica. Colored Spaniards from Nicaragua and Costa Rica were the inhabitants of the place; the Christian religion was represented by a Roman Catholic Church in course of erection at the expense of the Nicaraguan Government, to which, however, as yet no priest was attached. Truly characteristic it was that the missionaries were forbidden to preach in public, and ordered to restrict their worship to the precincts of their own bedrooms. Greytown is still Nicaraguan, but such restrictions are happily no

longer enforced. Between this town and Blewfields, the capital of the Mosquito territory, early experience was made of the delays which often attend these coasting trips: it took four days to accomplish seventy miles, as the rough state of the sea obliged the travellers frequently to seek safety on shore. On May 2d Blewfields was reached, where the Brethren, on presentation of a letter of introduction from Lord Palmerston, received a cordial welcome from Mr. Walker, the British consul-general, who, during the whole visit, did all that lay in his power to aid them in the attainment of their object.

The town of Blewfields was found to contain about 600 inhabitants, the majority of whom were whites and colored men, with a good many negroes and a very small number of Indians. Of the whites about 80 were German immigrants. Most of the residents professed to be Christians, although there was very little pretence of Christian knowledge and still less of Christian life. A catechist of the English Church, recently arrived from Jamaica, read prayers and a sermon on Sunday, and conducted a school during the week; but these advantages were confined to the white and colored people, and no manner of provision was made for the moral and religious instruction of the blacks and Indians. Of the latter a considerable number often visited Blewfields to do homage to their chief or "king," or to sell turtle, tortoise-shell, deer-skins, and other articles of traffic. Under the general term of Moscos or Mosquito Indians, a number of tribes were included, Woolwas, Ramahs, Summoos, and others, differing from one another in outward features, in dialect, manners and customs, but all understanding the Mosco language, yielding willing obedience to the one chief, and inspired with a firm determination to defend their country against all efforts of Nicaragua to annex it.

Gross darkness covered the people; but while scarcely a semblance of religious belief was to be found, there existed a great dread of evil spirits, whose influence could only be controlled by the Sukias, or witch-doctors; these wily impostors therefore held unrivalled sway over the poor deluded natives. Polygamy was commonly practised, and the vice of drunkenness was terribly prevalent. Even a brief examination sufficed to show that there was here abundant scope for missionary effort, while the gentle, pliable, impressible nature of the Indians furnished ground for a fair hope of successful evangelization of the tribes who lived scattered along the coast. Before the two missionaries concluded their visit (July 10th), the king and his council of state begged them to commence a mission in the country, at the same time offering for their use a small island inhabited by Ramah Indians, and a plot of land in the town of Blewfields.

The General Synod of the Moravian Church, which met at Herrnhut in the summer of 1848, recognizing in a variety of providential circumstances an indication of the Lord's will that they should go forward to occupy fresh fields of heathendom for the Saviour, almost unanimously passed a resolution to send missionaries to the Mosquito Coast. Before the end of the year Brother H. G. Pfeiffer, who had spent twenty-two years in the service of the Jamaica Mission, was on his way to this

new sphere of labor, accompanied by the young Brethren J. E. Lundberg and E. G. Kandler as his assistants.

**LABRADOR.**—The first attempt to commence a mission among the Eskimos was made in the year 1752. The chief originator of the work was John Christian Erhardt, a sailor, who, by God's blessing on the faithful preaching of Frederick Martin, had come to the knowledge of the Saviour in the year 1741, on a visit to St. Thomas. Having visited Greenland in the Brethren's ship "Irene," under the command of Captain Garrison, and there heard of the Eskimos living on the western shores of Davis' Straits, he most persistently urged the Brethren at Herrnhut to send the gospel there. The request that missionaries might be allowed a passage on board of one of the Company's vessels to the territory of the Hudson's Bay Company, was not acceded to; but a London merchant, Mr. Nisbet, with two other gentlemen, volunteered to fit out a trading vessel for Labrador, in which, after some delay, Erhardt with four companions sailed from London on May 17th, 1752. A suitable spot for a station was selected, to which they gave the name of Nisbet Harbor, and a wooden hut was soon put up. Continuing his journey up the coast, Erhardt, with the captain and five of the crew, were treacherously murdered by the natives, and the other missionaries had to help to work the ship on her homeward voyage.

Deep sympathy with the fate of this brave Christian sailor, and the accounts received from the survivors of the party, stimulated to many prayers on behalf of these savage heathen, and a carpenter, Jens Haven, resolved to take up Erhardt's work as soon as the Lord would open the way. After spending two years in the Greenland Mission, where he learned the language, while assisting in establishing the station at Lichtenfels, he made his way to London in the spring of the year 1764, with the intention of getting to Labrador by working his passage out as ship's carpenter or sailor on board of one of the Hudson's Bay Company's vessels. Eventually he was allowed to sail with the British fleet to St. John, whence he succeeded in procuring a passage in a small coasting schooner to Labrador, landing in Chateau Bay (north latitude 52°) towards the end of August. On hearing the stranger speak in their own language, the Eskimos vociferously bade him welcome, and he trusted himself without any escort in their midst. They hailed him as their countryman, listened to his message with interest, and begged him to renew the visit.

The success of this attempt to open up friendly communication with the Eskimos induced the Brethren of the Directing Board to continue the effort. Three other Brethren were associated with Haven, one of whom, Drachart, before joining them had been a clergyman in the employ of the Danish Mission in Greenland, where he had displayed singular tact and power in the treatment of the natives—gifts which stood him in admirable stead during his service in Labrador. Drachart was then fifty years old, but full of youthful courage and enthusiasm—the very man for the work.

A British man-of-war conveyed them from St. John's, Newfoundland, to Pitt's Harbor, where by and by some 300 natives assembled, who were extremely friendly in their demeanor, and singularly attentive to the words of Haven

and Drachart, and open to their quiet Christian influence. In September they returned to London, to prepare for a permanent occupation of Labrador, by obtaining from the Board of Trade in England ensured possession of a piece of land on the coast. Four years elapsed before a decision was reached, as suspicion was entertained in certain influential quarters as to the real intentions of the Brethren. In the mean time Haven and Drachart lived in England, chiefly at the Moravian settlement Fulneck, in Yorkshire. Here they had the privilege of bringing the first Eskimo from Labrador to the knowledge of the truth, and seeing him baptized as the first-fruits from that nation. This was a youth of fifteen, named Karpik, who with other natives had been brought to England by Commodore Sir Hugh Palliser, and intrusted to the care of these two Brethren. On the day after his baptism, after having given satisfactory proof of his faith in Jesus, he died of small-pox.

In 1769 the obstacles were removed, and Haven, Drachart, and eight others went out in the "Jersey Packet," a small sloop of eighty tons, under the command of Captain Mugford, purchased and fitted out by the "Ship's Company," which consisted principally of members of the "Brethren's Society for the Furtherance of the Gospel among the Heathen." After touching at several points on the coast, a suitable place for a station was selected on Nunengoak Bay, which afforded the advantage of a fair harbor. There were about 700 natives here, who flocked round the ship in their kayaks, and were especially delighted to see their "little Jens," as they called him, his small stature, like their own, being a strong recommendation in their eyes; their affectionate familiarity did not, however, interfere with the respect and veneration entertained for him. On August 16th possession was taken of a plot of land in the name of George III., and presents were distributed. Two days later the ship was on her way home.

Communication between Europe and the mission stations in Labrador has been maintained since the work commenced, in the year 1770, by means of a vessel which makes annual voyages each way. During this long period (of 120 years) no fatal accident has been permitted to befall the favored bark, or those whom she was conveying across the boisterous and often ice-bound deep, and along a coast bristling with rocks, and abounding with peculiar perils; nor has the communication between the missionaries and their brethren in Europe been in a single instance interrupted. To the praise of God, the Society can record with grateful hearts that his preserving mercies have been graciously vouchsafed in rich measure and with unchanging faithfulness, in answer to many prayers of His children.

Since the year 1770 nine vessels have been employed in this mission service—the "Anity," the "Good Intent" (1776), the first "Harmony" (1788), the "Resolution" (1802), the "Hector" (1808), the "Jemima" (1809), the second "Harmony" (1819), the third "Harmony" (1831), the fourth or present "Harmony" (1861). The ship now in use is a bark of about 250 tons register, built at Yarmouth, and has proved a sound, strong vessel and a very good sailer. She has a slightly raised quarterdeck, by which additional height is gained for the cabins. The latter, though small, are neat and commodious.

Though furnished with every additional protection required in case of contact with the ice, the outline of the ship is elegant. Her usual crew consists of twelve hands, besides the captain. The present commander, Captain Linklater, fills his important post in such a manner as to enjoy in the highest degree the esteem and confidence of his employers, being thus a worthy successor to those whose names are recorded with grateful respect in the history of the Society, as "faithful, experienced, and energetic seamen, in whom a degree of confidence has been placed, which could only have been inspired by the belief that they considered themselves the servants of the cause, rather than of the Society; that they acknowledged their entire and continued dependence on that Lord whom winds and waves obey, and were disposed at all times, and especially in seasons of difficulty and peril, to seek His counsel, help, and blessing."

**ALASKA.**—1. *Bethel.*—On the 18th of May, 1885, a party consisting of the Rev. William H. Weinland and wife, Rev. J. H. Killbuck (a Delaware Indian who had been educated in the theological college at Bethlehem, Pa.) and wife, and Mr. Hans Torgersen, a mechanic and lay assistant, sailed from San Francisco, carrying with them lumber, sashes, doors, hardware, furniture, etc., for mission buildings. A spot had been selected on a previous exploratory tour on the Kuskokwim River, one hundred and fifty miles from its mouth, near the native village of Mumtrekhlagamute. On the 20th of June the little company landed on the shores of Alaska, and in the course of the month began their mission work at the station, which had been previously selected, and which was named Bethel.

The mission met with a sad loss on the 10th of August by the accidental drowning of Mr. Torgersen. The other brethren felt his loss keenly, as their house was only in the course of erection, and there was much to be done before they would be ready for the long and severe Alaska winter. Gradually they became acquainted with the people, and learned something of the language. The latest intelligence from this station mentions awakenings and conversions, and a general desire on the part of the surrounding heathen for religious instruction. In 1888 an unmarried Brother was added to the staff in Bethel, and in 1889 an unmarried Sister.

2. *Carmel.*—In 1886 the Moravian Brethren were requested by the Commissioners of Education to commence a station at Nushagak, near Fort Alexander. They were first to establish a school, but hoped and expected also to reach the adult Eskimos. The Rev. Frank Wolff, with his wife and two children and Miss M. Huber, arrived there in May, 1886. A school was established, and the missionaries have been much encouraged. The school is appreciated, and there are prospects of the work being enlarged and extended. In 1889 an unmarried Brother was added to the force at this station.

**AUSTRALIA.**—It was about the year 1834 that for the first time the attention of the Moravian Church was directed to the needs of the aborigines of Australia, especially in the "district of Port Philip," now the prosperous colony of Victoria. Missionary efforts had been undertaken by various churches or societies from the days of Samuel Marsden, of the Church Missionary Society, in 1795. But none had been maintained for more than a few years,

and the results were very trifling. It was, therefore, scarcely a matter of surprise that repeated calls addressed to the Church to enter this field of labor failed to move the Directing Board. They had the effect, however, of creating and fostering a deep, prayerful interest in the proposed work among various circles in the German congregations. Associations were formed to keep up constant intercession for the Australian blacks, and to provide a fund for the maintenance of the mission, whenever it should be undertaken. A repetition of the call in a letter addressed by the London Association in aid of the Moravian Missions to the General Synod assembled at Herrnhut in 1848, led to the unanimous resolution to enter upon this field without delay.

In the autumn of 1849 the Brethren Taeger and Spieseke sailed for Australia, and reached Melbourne in February, 1850. Here they received a cordial welcome from all classes, and not least from C. J. La Trobe, Esq., at that time superintendent of Port Philip and soon afterwards first lieutenant-governor of the Colony of Victoria.

The aborigines of Australia, called Austral-negroes or Papoos, are said to be a branch of the negro race; socially, morally, physically, they would seem to stand on the lowest stage of humanity. Their clothing at most an opossum-skin or a bit of grass-matting; their home a hut of branches, affording scarcely any shelter or protection; their food the flesh of kangaroo, opossum, wild dog, fish-grubs, lizards, snakes, rats, and occasionally that of a human foe, with scarcely any pretence of religion or worship,—they seemed to have no object to live for except to sustain gross animal life and indulge their sensual and cruel instincts. The women were slaves and beasts of burden; the children, if troublesome, were killed; if not, left to care for themselves as best they could. Wherever else the "noble savage" might be found—if to be found at all—in Australia he certainly did not exist.

In April (1850) the missionaries went up the country to Mount Franklin, the station of Mr. Parker, Assistant-Protector of Aborigines, where they sojourned for eight months, perfecting themselves in English, and studying the natives and their language. This place, about eighty miles from Melbourne, afforded good opportunities for reconnoitring the district in search of a suitable site for a station, and welcome facilities for intercourse with the blacks, who were induced to attend a small school, maintained at the charge of the government.

Eventually, at a distance of some two hundred miles from Melbourne, a piece of land on the shores of Lake Boga, south of the police-station, Swanhill, on the river Murray, was fixed on, and, after wearisome negotiations with government, and not a few perilous journeys to and fro, occupied by the missionaries in October, 1851.

**CENTRAL ASIA.**—At an early date in the history of the missions of the Moravian Church interest was manifested in the nations of the old world, and especially in the Mongolian race. Count Zinzendorf looked with a longing eye to the countries of Eastern Asia, and in one of his hymns speaks of the communication of the gospel to the Persians and Mongols as no improbable event. Several attempts were made in this direction, which may be regarded as in-

troductory to the mission now in progress in the Himalayan Mountains.

The memory of these past efforts of the church to convert the Mongol race, with their many details calculated to interest both mind and heart, was revived in the year 1850 by a prolonged visit of the well-known and zealous missionary to China, Dr. Gützlaff, at Herrnhut. Responding to his urgent representation of the desirableness and the hopeful prospects of a renewed attempt for the accomplishment of this great object, the Directing Board after much serious consideration resolved to take measures for the establishment of a mission to the Mongols inhabiting the northern provinces of the Chinese Empire, as soon as qualified candidates could be found, and the best mode of commencing the work ascertained. An appeal for volunteers for this missionary service brought forward several applicants, from whom J. E. Pagell and A. W. Heyde were selected to go forth as pioneers; both of them men of courage and endurance, with a fair education, but without theological training.

On August 1st, 1853, they set out for their field of labor by sailing-vessel to Calcutta. It had been their plan to proceed through Russian territory to Mongolia, but it was frustrated by the refusal of the Russian Government to provide the needful passports.

Early in April, 1854, the missionaries had reached Kotgur, a station of the Church Missionary Society, situated about a week's journey to the northeast of Simla, but separated from that delightful retreat by two or three lofty mountain ranges crossed by passes at an elevation of about 11,000 feet. The Rev. Mr. Prochnow gave them a warm welcome, and assisted them by all the means in his power in the work of equipping themselves for their difficult task. Hindustani had to be learnt for conversing with Hindus, and their knowledge of English perfected for negotiating with British officials; the study of the Mongolian language, of which a beginning had been made, was continued; but special effort directed to mastering the Tibetan, which is the language of a large portion of the people inhabiting the provinces adjacent to the Chinese frontier. A Tibetan lama, employed by Mr. Prochnow as interpreter, proved most serviceable as linguistic teacher.

In March, 1855, Heyde and Pagell set out on their first great missionary journey, which they hoped would take them right into Mongolia. At Sultanpur, the capital of Kullu, a stay of some weeks had to be made until the passes across the mountains were open. Then the Rotang Pass (13,600 feet) was crossed, and the province of Lahoul entered. Thence they proceeded on perilous paths to Leh, the capital of Ladak, and residence of the native potentate, Goolab Singh. To their great surprise not a single Mongol was to be found amongst its 4,000 inhabitants. Turning eastwards in pursuance of their mission, the missionaries then crossed the Kallas range (18,000 feet), and, after skirting the extensive Pangong Lake, reached the borders of the Chinese province of Ruduk. Entrance into Chinese territory was at once and peremptorily refused. Separating, in order to more effectually reconnoitre the unknown country, each renewed the attempt to cross the Chinese borders, and actually pushed forward through a few villages. But they were soon stopped, and compelled to return by the determined re-

fusal of the authorities to allow the people to provide any food for man or beast. By different routes they made their way back to Kotgur, where they arrived in October.

The result of the seven months' journey was disappointing as far as its main object was concerned. It was not possible to reach the Mongols from the side of British India, or the provinces of neighboring states standing more or less under British influence or protection.

In other respects the results of the tour were very satisfactory. The ground covered by the travellers embraced the provinces of Lahoul, Kunawur, Spitti, Kullu, Rupchu, which, with some extension to the north and west, have ever since formed the principal sphere of missionary operations. Much information was obtained respecting the country and its inhabitants, which proved of very great service when the question came to be discussed where they should settle down to work, pending the opening of Chinese Tibet to their advance. Ladak seemed to offer a good field, especially Leh and its neighborhood; but the ruler, Goolab Singh, had let them distinctly understand that he would not give his sanction to their permanent settlement under his rule. Eventually, on the advice of Mr. Prochnow, the province of Lahoul was selected, and a suitable site for a station fixed on in the village of Kyelang, situated on the banks of the river Baga, about 10,000 feet above the level of the sea. Although scarcely 150 miles distant from both Leh and Simla—a little to the west of a line joining these two towns—Kyelang is separated from both by such lofty mountain ranges that a journey to either is an undertaking of at least a fortnight. The population in the district is sparse; but as the village lies on the main commercial route between India, Yarkand, Ladak, and other regions to the north, it affords an opportunity for intercourse with representatives of a great variety of nations.

**BOHEMIA.**—Bohemia is the birth-place and original home of the Church of the Brethren's Unity (*Unitas Fratrum*; Bohemian, *Jednota bratrska*). The Ancient Church, begun in 1457 by earnest, peace-loving followers of John Huss, had, in spite of severe trials and bitter persecutions, spread over a large part of Bohemia and Moravia, and into Poland. Within fifty years she had some two hundred congregations with many thousand members.

After a period of one hundred and sixty years of much prosperity and influence, she was destroyed in the cruel and bloodthirsty triumph of the Roman Catholic power in the great Thirty Years' War. Then for one hundred and sixty years the darkness of popery held sway over the fair lands of her home.

Gradually some of the restrictions against Protestantism were removed. In 1781 the "Edict of Toleration" was issued, and in 1861 a kind of general religious liberty was introduced by the Austrian Government.

At once, on the door being thus partially opened, the missionary evangelists of the Renewed Church pushed in, and busily traversed the accessible parts of Bohemia and Moravia. They were gladly welcomed by the people at large, and found many traditions of the Ancient Unity still alive and held in loving reverence; many earnest appeals were made to them to come and renew its life and work. Owing to political considerations the work had to be

carried on with quietness and caution. At length the General Synod of the Church in 1869 took up the claims of Bohemia. Steps were taken for the evangelizing and forming congregations of the Brethren's Church in Bohemia wherever openings for the same should be presented.

Pottenstein, a village in the picturesque north-east of Bohemia, where four hundred years before there had been a congregation of the Unitas Fratrum, was the first to be occupied, and in 1870 a number of persons hitherto Roman Catholics, earnestly awakened, applied for admission and were formed into a congregation.

In 1872 the second congregation was begun at Dauba. These two places and congregations have continued to be the centres of the ever-growing and hopeful, ever-difficult and trying, but ever-devoted labors of the missionaries and their assistants.

Prague is now occupied by an agent, and services are held in a building secured for the purpose, with good hopes of progress.

At Landskron, Tschenkowitz, Leutomischel, and Reichenau hopeful work is opening out.

At Pottenstein a girls' orphanage is in a promising condition.

**UNSUCCESSFUL MISSIONS.**—Some of the Moravian Missions proved unsuccessful, and were abandoned from time to time.

*Lapland.*—In 1734 and 1735 an attempt was made by Andrew Grassman, Daniel Schneider, and John Nitschmann to establish a mission among the Swedish Laplanders, but relinquished because they were found to be under the supervision of the Lutheran state church.

*Shores of the Arctic Ocean.*—In 1737 and 1738 Andrew Grassman, Daniel Schneider, and Micksh proceeded to Archangel, in order to begin a mission among the Samoyedes on the shores of the Arctic Ocean. But the missionaries were arrested and thrown into prison, falsely charged with being Swedish spies, and after an imprisonment of five weeks conveyed to St. Petersburg, where they were examined, and their innocence having been established, sent back to Germany.

*Algiers.*—In 1740 Ehrenfried Richter, at one time a wealthy merchant of Stralsund, but subsequently a resident of Herrnhut, felt constrained, although far advanced in years, to undertake a mission among the Christian slaves of Algiers, where he labored with great zeal and some success, until he was carried off by the plague, five months after his arrival.

*Ceylon.*—In 1740 David Nitschmann, known as the Syndic, and subsequently a bishop of the church, accompanied by Dr. Eller of Berlin, inaugurated a mission among the natives of Ceylon, which work, however, just when it began to prosper, was relinquished on account of the persistent opposition of the colonial authorities and the Dutch clergy.

*Guinea.*—In 1737 Christian Protten, a converted mulatto and native of Guinea, together with Henry Hukuff, undertook a mission on that coast. Hukuff died, and Protten met with no success. Hence the work was abandoned in 1741. In 1767, however, it was renewed, and continued until 1770, in which period nine missionaries were sent out, who all died, so that the enterprise was finally given up.

*Persia.*—In 1747 Dr. Frederick William Hocker and Dr. J. Rueffer attempted a mission among the Guebres, or the so-called fire-wor-

shippers of Persia, which country they penetrated as far as Ispahan. They could, however, effect nothing, and abandoned the field in 1748. On their way home Rueffer died at Damietta, in Egypt.

*Egypt.*—From 1752 to 1783 three attempts were made by Hocker, George Pilder, John Danke, and John Antes to begin a mission in Abyssinia; but, in each case, they could penetrate no farther than Egypt, where some of them labored among the Copts, especially at Benesse, on the Nile. Owing to a want of success in this work, and political disturbances, the field was abandoned in 1783.

*East Indies.*—In this country a mission was carried on for thirty-seven years, from 1759 to 1796, and stations were established at the so-called "Brethren's Garden" near Tranquebar, at Serampore, at Patna, and on the Nicobar Islands. But the work did not prosper, the cost of it was enormous, and the mortality among the missionaries and Moravian settlers very great, nearly forty of them being carried off by disease. Hence this enterprise was finally given up in 1796.

*The Countries of the Kalmucks.*—For more than half a century, from 1768 to 1823, repeated attempts were made to begin missions among the Kalmucks, but they all proved unsuccessful.

### *Chronological Table of Moravian Missions:*

- 1732 Mission to St. Thomas, West Indies.
- 1733 Mission to Greenland.
- 1734 Mission to North American Indians.
- 1734 Unsuccessful attempt in Lapland.
- 1735 Mission to Surinam.
- 1736 Mission to South Africa. The work here had to be suspended in 1743, and was not resumed till 1792.
- 1737 Attempt among the Samoyedes, Arctic Ocean, lasting till 1741.
- 1738 Mission to the Arawack Indians, Surinam. Abandoned in 1816.
- 1740 Attempt in Ceylon, which proved unsuccessful.
- 1740 Unsuccessful attempt in Algiers.
- 1742 Unsuccessful attempt in China.
- 1747 Unsuccessful attempt in Persia.
- 1752 Between this date and 1783 three attempts were made in Abyssinia.
- 1752 Failure of attempt to commence a mission in Labrador.
- 1754 Mission in Jamaica begun (West Indies).
- 1756 Mission in Antigua begun (West Indies).
- 1759 Mission in the East Indies (Nicobar Islands, Tranquebar, and Serampore). Abandoned in 1796.
- 1765 Mission in Barbadoes begun (West Indies).
- 1768 Mission among the Kalmucks, repeated attempts up to 1823.
- 1771 Mission in Labrador begun.
- 1775 Mission in St. Kitts begun (West Indies).
- 1782 Unsuccessful attempt in the Caucasus.
- 1790 Unsuccessful attempt in Tobago (West Indies).
- 1792 Mission in South Africa renewed.
- 1818 Kafir Mission begun, South Africa.
- 1822 Work among lepers at Hemelen Aarde, South Africa.
- 1827 Tobago (West Indies) permanently occupied after three attempts.
- 1828 Shiloh, the first station in Kaffraria proper, South Africa, founded.

- 1835 Unsuccessful attempt in Demerara, South America.  
 1838 Training school at Gnadendal, South Africa, commenced.  
 1842 Training school at Fairfield (Jamaica) begun.  
 1846 Leper hospital transferred to Robben Island, South Africa.  
 1847 Training Institution at Cedar Hall, Antigua, begun.  
 1849 Mosquito Coast Mission begun (Central America).  
 1849 Australian Mission begun on Lake Boga.  
 1851 Training school at Beekhuizen, Surinam.  
 1853 Central Asian Mission begun.  
 1856 Suspension of work in Australia.  
 1859 Australia reoccupied.  
 1867 Leper Mission at Jerusalem commenced.  
 1869 Bohemian Mission begun.  
 1878 Demerara reoccupied (South America).  
 1885 Mission to the Alaska Eskimos commenced.

**Mordwin Version.**—The Mordwin belongs to the Finn branch of the Ural-Altaic family of languages, and is used by a tribe on the banks of the Oka and Volga, in the governments of Nijni-Novgorod and Kazan, Russia, supposed to number about 400,000. The Russian Bible Society published at St. Petersburg a New Testament under the care of the Archbishop of Kazan, in 1820. It has never been reprinted, though the Mordwins profess Christianity. The Gospel of Matthew was printed in 1865 for Prince L. L. Bonaparte.

(*Specimen verse*, John 3 : 16.)

Сѣкъ ишйя вѣчкизе Пазъ масшоронъ  
 эрицяшъ, мѣкъ максызе цѣранзо сонзѣ  
 скѣмонъ шачшуманъ, ишшобы эрвѣ кѣмицѣ  
 лангозонзо авбъ юма, но ѹлевель иивъ  
 гень эрѣмосо.

**Moresby, or Port Moresby**, a station of the London Missionary Society, on the southern coast of New Guinea, Melanesia, under English authority. It was founded in 1873, and has a college in which natives from Tahiti, Rarotonga, Samoa, etc., are educated, and from which 17 stations are provided with teachers. There are 2 missionaries, 14 native ordained preachers, 314 church-members, 927 scholars.

**Moriah**, a mission station of the Moravians on the island of Tobago, West Indies. It was begun in 1842, and the work has been blessed from the very beginning. Its situation is very picturesque, standing as it does on an eminence surrounded by a labyrinth of sharp ridges and deep ravines, over which grow the luxuriant tropical vegetation. It is ten miles from Montgomery.

**Moriaro**, town in Chota Nagpur, Bengal, India. Mission station of the Gossner Missionary Society; an out-station of Muzaffarpur.

**Morija**, a town of Cape Colony, South Africa, 160 miles east of Caledon. Population about 4,000. Mission station of the Paris Evangelical Society (1833); 5 missionaries. Is, since 1883, the chief seat of the missions, and has a normal school, with a theological class, and 853 church-members.

**Morioka**, a town in Japan, north part of Nippon, southeast of Honjo. Station of A. B. M. U.; 1 missionary and wife, 4 out-stations, 43 church-members, 70 pupils. Methodist Episcopal Church (North); 1 native pastor, 36 church-members, 2 Sunday-schools, 60 scholars.

**Morocco**, a country of Africa on the Atlantic and Mediterranean. Area about 266,000 square miles. Population, 5,000,000, chiefly of the Berber race, though there are large numbers of Arabs. Religion Mohammedan. Mission work is carried on by the North Africa Mission, with stations at Tangier, Tetuan, and Sifroo. (See Africa and North Africa Mission.)

**Morrison, John Hunter**, b. Wallkill Township, New York, U. S. A., June 29th, 1806; fitted for college at Bloomfield Academy with Dr. Armstrong; graduated at Princeton College 1834, and Theological Seminary 1837; ordained as an evangelist by the Presbytery of New York the same year; sailed as a missionary of the Presbyterian Board for North India and the Punjab 1838. He was stationed at Allahabad, Agra, and other places. He was characterized by great earnestness and boldness in the presentation of truth. On account of his fearlessness he was in mission circles styled "the lion of the Punjab." Yet no one was more affable than he, more genial in personal intercourse. Dr. Morrison made two brief visits to the United States, during one of which he was Moderator of the General Assembly at Peoria, Illinois. It was he who, after the Sepoy mutiny in 1857, proposed to the Lodianna Mission to call upon all Christians to observe an annual week of prayer for the conversion of the world. He died of cholera at Dehra Doon September 16th, 1881, aged 76, and in the 44th year of mission work. His dying words were, "It is perfect peace. I know whom I have believed." Dr. Morrison left a wife and several children, of whom a son and daughter are engaged in the work of the Lodianna Mission.

**Morrison, Robert**, b. Morpeth, Northumberland, England, January 15th, 1782, of humble Scotch parentage, his father being a maker of lasts and boot-trees. After receiving an elementary education he was apprenticed at an early age to his father. So eager was he to acquire knowledge, that he not only devoted all his leisure to close study, but had his book open before him while he worked, and removed his bed to his workshop, that he might study late into the night. At the age of fifteen he joined the Scotch Church. As early as 1801 he began the study of Latin, Hebrew, and theology with the minister of Newcastle, and after fourteen months' study entered the Independent Theological Academy at Hoxton, to prepare for the ministry. Soon after his admission he decided to become a missionary to the heathen. In May, 1804, he offered himself to the London Missionary Society, was accepted, and appointed its first missionary to China. Entering the Mission College at Gosport, he spent two years not only in special preparatory studies, but also in acquiring Chinese under a native teacher. He devoted also some hours daily to copying from a Chinese manuscript in the British Museum. He was ordained, and sailed for China January 31st, 1807, but the Chinese being hostile to the English on account of the opium difficulties, he was obliged

to go via New York instead of going direct from London. He received from Mr. Madison, Secretary of State, a letter of introduction to our consul at Canton, which was of great advantage to him. Reaching Canton September 7th, he secured lodgings in the basement story of an American factory used as a ware-room, but soon removed to a more comfortable and convenient French factory. At first he adopted the Chinese dress, diet, and habits, but soon resumed his usual mode of life. An edict being issued about this time by the Chinese Government prohibiting the printing of religious books and the preaching of the gospel, Mr. Morrison set himself at once to study the language and translate the Bible. His health having suffered from incessant study and too rigid economy, he went, June 1st, 1808, to Macao, a Portuguese colony below Canton, where he had to remain in seclusion because of the jealousy of the Roman Catholic priests. His health being restored, he returned to Canton. But difficulties having arisen between the Chinese Government and the British Government, he went again to Macao. He resided here a year with an English family named Martin, and in 1809 married the eldest daughter. On the same day he was offered the position of translator to the East India Company's factory at Canton. As it relieved him of pecuniary anxiety, secured for him a permanent residence in China, ready access to some of the people, and time for the translation of the Scriptures and preparation of his dictionary, he accepted the appointment. This office he held to the day of his death—twenty-five years. To the end he had the confidence of the E. I. C., and they advanced large sums at different times for the publication of his various works. Though much occupied with office-work, he found time for Bible translation and the preparation of religious books. In 1810 a revised and amended version of the Acts of the Apostles, based on his copy of the manuscript in the British Museum, was printed—the first portion of the Scriptures in Chinese printed by any Protestant missionary. In 1812 the Gospel of Luke was printed. Early in 1814 the whole of the New Testament was ready, and the E. I. C. furnished a press and materials, also a printer to superintend its printing. In this year he baptized his first Chinese convert, Tsai-A-Ko, the first Chinese convert to Protestant Christianity, who continued steadfast in his faith till his death in 1818. In 1815 a Chinese grammar of 300 quarto pages, prepared in 1805, was printed at the Serampore press. In 1815 Mrs. Morrison went to England for her health, remaining five years, and died in 1822, two years after her return to China. In 1816 Mr. Morrison acted as interpreter to Lord Amherst. In 1817 he published "A View of China for Philological Purposes." In this year the University of Glasgow conferred upon him the degree of doctor of divinity. In 1818 the translation of the entire Bible, in part with the aid of Dr. Milne, was completed, and printed in 1821. This version is said to be too literal, and not idiomatic. But it was the first attempt, and the difficulties were enormous. Dr. Morrison says he studied "fidelity, perspicuity, and simplicity," "common words being preferred to classical." He was convinced of the necessity of a thorough revision, and hoped to be able to revise the work. From 1810 to 1818 the British

and Foreign Bible Society appropriated £6,000 at several different times towards the printing and publication of the Chinese Bible. The Old Testament formed 21 volumes 12mo. In 1818 the Anglo-Chinese College at Malacca (removed in 1844 to Hong Kong) was founded for "the reciprocal cultivation of Chinese and European literature." Dr. Morrison gave £1,000 for the buildings, and £100 annually for its support. With Dr. Milne he established this year a monthly magazine in Malacca. His most laborious literary work was the Chinese dictionary, published in 1821 by the East India Company at an expense of £15,000. In 1824, for the purpose of recruiting his health and awakening an interest in the mission, he visited England, where he spent two years. Previous to his departure for home he ordained to the ministry Leang-Afa, having had eight years' experience of his fitness for the work. He was elected while at home a Fellow of the Royal Society. Everywhere he was received with distinction by civil and religious bodies. He had an audience with George IV., to whom he presented a copy of the Sacred Scriptures in Chinese, and a map of Pekin. In 1826 he married Miss Armstrong of Liverpool, embarked for China, and reached Macao the September following. Though not vigorous, he continued his public labors for nine years more. He devoted himself more than ever to the missionary work, preaching, translating, and distributing printed works among the Chinese. He conducted religious services on the Sabbath, both in English and Chinese. He baptized Choo-Tsing, a Chinese teacher once employed at the Malacca College. In 1832 he writes: "I have been 25 years in China, and am now beginning to see the work prosper. By the press we have been able to scatter knowledge far and wide." He was cheered by the arrival in 1830 of Messrs. Abeel and Bridgman from America. He accompanied Lord Napier as interpreter to Canton, and died there August 1st, 1834. His remains were taken to Macao, where they still rest, the site being marked by an appropriate inscription. "He endeavored," says his biographer, "in the employment of such expedients as he could command, to relieve the wants, to mitigate the sufferings, and heal the diseases of the poor Chinese around him. In order to secure to the natives the means of a liberal and religious education, as well as to furnish facilities to foreigners for prosecuting the study of the Chinese language, he projected the establishment of the Anglo-Chinese College."

Besides the works mentioned, he published "Horæ Sinicæ," being translations from the popular literature of the Chinese, and "Chinese Miscellany."

**Mortlock Islands,** a group in Micronesia, 300 miles west-southwest of Ponape. Mission station of A. B. C. F. M., with Ruk; 1 missionary, 2 ladies, 1 lay helper, 13 churches, 3 native pastors. A geography has recently been translated by Mr. and Mrs. Logan, and is now in use; and Genesis, Exodus, and "Story of the Gospels," translated by Mr. Logan, are now in the press. A population greater than at any other point in Micronesia awaits the efforts of the missionaries.

**Mortlock Islands Version.**—The language used in Mortlock Islands belongs to the

Micronesian languages. In 1880 the American Bible Society published at Honolulu the Gospel of Mark, translated by the Rev. R. W. Logan. (*Specimen verse.* John 3:16.)

Pue an Kot a tane fanufan mi rapur, ie mī a nanai na an Alaman, pue monison mi luku i'ra te pait mual la, pue ra pue uerai manau samur.

**Mosetla**, a town in South Transvaal, East South Africa. Mission station of the Hermannsburg Missionary Society, with 435 members.

**Mosquito Coast**, a territory on the Caribbean coast, Central America, extending from latitude 10° 30' to 13° N, with a width of about 40 miles, was for a long time an independent reserve of native Indians, under the protection of Great Britain, 1655-1850. By the Clayton-Bulwer treaty of 1850, England resigned all claims to the Mosquito Coast, and by the treaty of Managua, 1860, the territory was ceded to Nicaragua (q.v.), which country exercises a supervision over the native administration. A chief elected by the natives is assisted by an administrative council. Mission field of the Moravian Brethren, with stations at Blewfields, Magdala, Ramah, Bethany, etc.

**Mosquito Version** (Moskito).—The Mosquito belongs to the South American languages, and is spoken by the Mosquito Indians, a people dwelling along the coast from Blewfields northward to Cape Gracias à Dios, and thence to Truxillo. The Rev. Alexander Henderson of Belize, a Baptist missionary, resolved the language to writing and grammatical principles. Parts of the Bible were published at Stuttgart in 1864 by the Moravian Missionary Society of Herrnhut, the translation having been made by Mr. Grünwald. A translation of the four Gospels and the Acts of the Apostles, made by the Rev. W. Sieberge of the Moravian Mission, is now being carried through the press by the translator, for the British and Foreign Bible Society.

**Mossel Bay**, a town in Cape Colony, South Africa, on Mossel Bay, 25 miles west-southwest of Georgetown. Mission station of the S. P. G., with 2 missionaries, 365 church-members. Berlin Evangelical Society (1879); 1 missionary, 4 native helpers, 208 members, 77 communicants.

**Mosul**, a city of Mesopotamia, on the western bank of the Tigris, 160 miles southeast of Mardin. Just across the river are the ruins of Nineveh. The city covers a great extent of ground, but is poorly built, and large sections are almost uninhabited. Population about 50,000, Arabs, Jacobite and Chaldean Christians, Jews, Turks, Koords, etc. The summers are very hot, and those who remain in the city are compelled to live in the cellars. The result is that it is very unhealthy, except as great care is taken. Mission station of the A. B. C. F. M., at first belonging to the Assyria and now to the Eastern Turkey Mission. It was the point of departure for Dr. Asahel Grant in his journeys among the mountain Nestorians. So many of the missionaries died from the effect of the climate that it was given up as a station, and the force was transferred to Mardin. Of late years, however, as people have learned better to guard against the evil effects of the cli-

mate, it is being occupied again as a permanent station. The Protestant church is a strong church, and increasing in numbers and influence.

The Presbyterian Board (North), U. S. A., have taken Mosul also as their headquarters for their work among the Nestorians in the valleys of Koordistan.

Near Mosul is the chief shrine of the Yezidees (q.v.).

**Mota**, one of the Banks' Islands, the northernmost group of the New Hebrides, Melanesia, has 700 inhabitants, all Protestants. It was the first island of the New Hebrides which was visited by Christian missionaries, in 1857, from Melbourne. Infanticide and polygamy have entirely disappeared in Mota, and in 1884 the natives built a church of stone themselves, though none of them had ever seen a stone building before. They have sent out 12 teachers to the other islands.

**Mota Version**.—The Mota belongs to the Melanesian languages, and is used in Banks' Islands. A translation of the New Testament into the Mota was published in 1884 by the Society for Promoting Christian Knowledge.

**Motu or Port Moresby or New Guinea Version**.—The Motu belongs to the Melanesian languages, and is spoken in New Guinea. The first connected portion of Scripture that was printed was the Gospel of Mark, translated by the Rev. W. G. Lawes. It was printed at Sydney, New South Wales, under the superintendence of the Rev. J. T. Sunderland, and at the expense of the Sydney Auxiliary. In 1884 the four Gospels were also printed in Sydney, under Mr. Lawes' personal supervision.

**Motupatti**, in the Trichinopoly district, Madras, India, on or near the north bank of the Coleroon River, between Trichinopoly and Pudukottai. Mission station of the Evangelical Lutheran Society of Leipsic (1863); 1 native preacher, 282 communicants, 81 scholars.

**Moukden**, the capital of Shing-King, Manchuria, (called Shing-Yang by the Chinese), is situated on the river Shin, a tributary of the Liaou. It has a wall around it, pierced by twelve gates, and is a city of some grandeur. Broad streets, well laid out, and numerous shops for native and foreign goods, add to its commercial importance. It is distant 120 miles from the treaty port of Newchwang. The population is estimated at 200,000, and Koreans, Tartars, Manchus, as well as a large number of Chinese, give variety to the streets. Several Korean scholars helped Mr. Ross in the translation of the New Testament, which was made here. Mission station of the United Presbyterian Church of Scotland (1876); 3 missionaries and wives, 15 native helpers, 4 out-stations, 3 churches, 500 members, 257 communicants, 4 schools, 57 scholars.

**Moulmein** (Maulmain), a city of Burmah, at the mouth of the Salwin River. Population, 53,107, chiefly Buddhists, Hindus, and Moslems. Mission station of the American Baptist Missionary Union. It has been and is one of the most important stations of that Society. The work is carried on in three departments—Burman, Karen, and Telugu and Tamil. There are 3 missionaries and wives, 9 female missionaries,

1 physician, 15 out-stations, 17 churches (15 self-supporting), 10 ordained, 22 unordained preachers, 1,757 church-members, 1,070 scholars (see article American Baptist Missionary Union). S. P. G.; 1 missionary, 54 communicants, 230 scholars.

**Mount Olive**, town in Monrovia, Liberia, West Coast of Africa, on or near the Junk River, north of Fish Town. Mission circuit of Methodist Episcopal Church (North); 2 missionaries, 8 native helpers, 80 church-members.

**Mount Scott**, town in Maryland, Liberia, West Coast of Africa, near Cape Palmas. Mission circuit of Methodist Episcopal Church (North); 59 native helpers, 3 out-stations, 339 church-members.

**Mount Tabor**, a town in Barbadoes, West Indies, 10 miles from Bridgetown, on an elevated plateau 900 feet high, thus commanding an extensive and beautiful view over the surrounding country. Mission station of the Moravians (1825); 1 native missionary and wife. The site for this station was granted by the pious proprietor, Edmund Haynes, Esq., who also gave liberally towards erecting the mission buildings.

**Mozambique**.—1. A part of the east coast of Africa, between Cape Delgado and Delagoa Bay, nominally subject to Portugal. It contains 80,000 square miles, with a population of 600,000. It is administered by a governor-general and 9 district governors. Along the coasts are large tracts of fertile lands; but between Delagoa Bay and Cape Corrientes, and from Mozambique to Cape Delgado, the shores are steep and lofty. Ornamental woods, ivory, gold, and copper are the principal products. The climate is good in the highlands, but the coast is full of fever and malaria. From November to March is the rainy season, and the heat of summer is intense. The Arab traders visited the coast long before the first visit of the Portuguese in 1498, and carried on a brisk slave-trade, which was not entirely suppressed, even after Portuguese power was enforced, until 1857 and after.

2. The capital, on a small coral island in latitude 15° 2' south, was the original fortress of the Portuguese. It has three strong forts. The population consists largely of slaves and Arabs, with a few Christians and Hindustanis. Since the abolition of the slave-trade its export trade, principally with India, is of little importance. Education and religion are under the control of the Roman Catholics, and are at a very low ebb.

**Mphome**, a town in North Transvaal, Africa, south of Limpopo River. Mission station Berlin Evangelical Lutheran Society (1878); 2 missionaries, 20 native helpers, 12 out-stations, 604 church-members, 205 scholars.

**Mpongwe or Pongua Version**.—The Mpongwe belongs to the Bantu family of African languages, and is vernacular in the region of the Gaboon River. The Gospel of Matthew, as translated by the Rev. W. Walker, was printed by the American Bible Society at Gaboon in 1850. The Gospel of John translated by Rev. A. Bushnell, and revised by N. J. L. Wilson, was printed in New York. Proverbs, Genesis, Exodus, and the Acts, translated by Mr. Walker, were printed in New York under

the translator's supervision. Paul's Epistles appeared at New York in 1867. A third edition of the Gospels, the Epistles of Paul, Ecclesiastes, Song of Songs, the Minor Prophets, and Isaiah i-xxix., appeared in 1879 from the press of the American Bible Society, which also published the entire Bible in two volumes.

(*Specimen verse.* John 3 : 16.)

**Kánde Anyambié'arándi ntye yinlá nli ntandinlí mé avenlié Orwanli yé wikika, inlé om'edu o bekelíé avere, ndo e be doanla n'l'emēnla zakánlaká.**

**Mpwapwa**, town in Eastern Central Africa, inland west of Zanzibar, south of Mamboia, the starting-point of Stanley on his first expedition. Mission station C. M. S.; 2 missionaries, 1 missionary's wife, 1 out-station, 1 school, 51 scholars. A printing establishment is issuing the first books in Kigogo.

**Mudalur** (Moodaloor), town in India, in the Tuticorin district, Madras. Mission station of the S. P. G. (1835); 1 missionary, 22 native helpers, 2,745 church-members.

**Muden**, a town in North Natal; South Africa, northeast of Emakabeleni, and northwest of Hermannsburg. Mission station of the Hermannsburg Missionary Society.

**Muhlenberg**, town in Liberia, West Africa, on the St. Paul River, 20 miles northeast of Monrovia. Climate tropical. Religions, fetishism, devil-worship. Natives very low, degraded. Mission station Evangelical Lutheran General Synod (1860); 2 missionaries and wives, 6 other missionaries, 7 native workers, 2 churches, 175 members, 70 communicants, 2 schools, 100 scholars.

**Mukimvika**, town in West Africa, southwest of Underhill, at the mouth of the Congo. Mission station of the Baptist General Association of the Western States and Territories (U. S. A.), worked under the general direction of the American Baptist Missionary Union; 2 missionaries and a flourishing Sunday-school.

**Mulki**, town in South Kanara, Madras, British India, on an inlet of the sea, 19 miles north of Mangalore. Mission station Basle Missionary Society; 2 missionaries and wives, 28 native helpers, 329 church-members, 7 schools, 460 scholars.

**Mullens, Joseph**, b. London, England, 1820; entered Coward College 1837; graduated 1841 at the London University; ordained 1843, and embarked the same year for Calcutta as a missionary of the London Missionary Society. In 1858 he visited England, and returning to India remained till 1865, when, after visiting the missions in India and Ceylon, he sailed for England to be assistant secretary with Dr. Tidman. On Dr. Tidman's death he became sole foreign secretary. In 1870 he visited the United States as delegate of the London Society to the American Board. In 1873 and 1874 he visited Madagascar in the interest of the missionary work. Mr. Arthington of Leeds having made a liberal donation in 1875 for a new mission on Lake Tanganyika in Central Africa, Dr. Mullens accompanied several missionaries to assist in the organization of the mission. Starting from Zanzibar for the interior, he reached Mwapwa, where from ex-

posure and fatigue he died of peritonitis July 10th. There his remains were buried. He was a man of great earnestness, and an eloquent speaker. The degree of doctor of divinity was conferred upon him in 1851 by Williams College, Mass., and in 1868 by the University of Edinburgh. He published "Twelve Months in Madagascar," "A Brief Review of Ten Years' Missionary Labor in India between 1852 and 1863," "London and Calcutta compared in their Heathenism," "Privileges and Prospects."

**Multan.**—1. City in Punjab, India, 193 miles southwest of Lahore, with which it is connected by railway. One of the oldest cities of India, having some very interesting ruins, also many modern buildings of note. A very important commercial centre. Population, city and suburbs 57,471, Moslems, Hindus, Sikhs, Jains, etc. Mission station C. M. S. (1856); 1 missionary and wife, 1 native pastor, 24 communicants, 2 schools, 450 scholars, (with Bahawalpur).—2. (Mooltan), town in Mussoorie district. Bengal, India. Mission station Methodist Episcopal Church (North); 1 missionary, 20 church-members.

**Mundakayam,** a town in Travancore, Madras, India. Mission district of the C. M. S.; 4 Pukka churches, 19 preaching places, 497 communicants.

**Munger, Sendol B.,** b. Fair Haven, Vermont, U. S. A., October 5th, 1802; graduated at Middlebury College 1828, and Andover Theological Seminary 1833; was for a time agent of the A. B. C. F. M. in Vermont; ordained 1834; sailed May 21st the same year as a missionary of the same Society for Bombay. He was first stationed at Bombay, but in 1837 removed to Jalna. In 1842 he returned to the United States for his wife's health; re-embarked January 3d, 1846. Mrs. Munger died on the passage, and was buried in the Indian Ocean. Mr. Munger was then stationed for a time at Ahmadnagar, then for some years at Bhingar, and in 1855 removed to Satara, where he remained till 1866, when the wants of Bombay required his return to that, his first field in India. He made before this two other visits to the United States, in 1853 and 1860.

Mr. Munger was an able preacher, and continued to preach to the last. He held meetings but a few weeks previous to his illness at his own house Sabbath evenings for a few families that found it difficult to attend upon regular services. A few days before his death, when his strength allowed him to speak but one or two minutes, he was at the preaching place in front of the American mission house. The meeting of the mission, July 21st, was held at Bombay to secure the benefit of his counsels and prayers, and he was to have preached the sermon; but on the first day of the session he was partly paralyzed and not able to speak, and did not speak afterwards except once, when he was heard to say, "None but Christ." He died July 23d, 1868, and native Christians bore his body to the Scotch Cemetery at Bombay. A biographical notice in "Bombay Guardian" soon after his death, says: "While Mr. Munger was in Jalna and Ahmadnagar he spent much time in itineracies, traversing on horseback the whole region of country from Sholapoor to Nagpoor, and preaching in every village on the route. He delighted in the work of an evan-

gelist. He had an admirable command of the Marathi language, great facility, earnestness, and power in preaching, and a powerful voice. Men heard him gladly." In preaching to Europeans, an officer to whom the message had been blessed, desired, as a thank-offering to the Lord, to place in the hands of the Board a large sum of money for establishing a new mission at Nagpoor. The Board then not being able to avail itself of the offer, it was subsequently made to the Committee of the Free Church of Scotland's Mission, and they established the Nagpoor Mission. Mr. Munger had an extensive acquaintance with Marathi literature. He published several valuable books and tracts in the vernacular, and left others in manuscript.

**Mungeli,** town in Chattisgarh, Central Provinces, India, on the banks of the Shironath River, 200 miles northeast of Nagpur. Climate hot, dry. Religion, Hindu; Kabir, Perathi, Satwami sects. Languages, Hindu, Chattisgarhi. Natives poor, miserable, dwelling in huts of mud and grass. Mission station Foreign Christian Missionary Society (1888), worked from Bismampur; 2 missionaries and wives, 1 native preacher, 1 church, 6 members, 1 school, 15 scholars.

**Munkeu-liang,** town in South China, province of Kwangtung, near Swatow. Mission station American Baptist Missionary Union; 1 missionary and wife, 1 other lady, 2 ordained, 2 unordained preachers, 40 church-members.

**Munson, Samuel,** b. New Sharon, Maine, U. S. A., March 23d, 1804; graduated at Bowdoin College 1829, Andover Theological Seminary 1832; ordained October 10th; sailed June 10th, 1833, as a missionary of the A. B. C. F. M. with Rev. Henry Lyman, under instructions to explore the Indian Archipelago, especially Java, Sumatra, Borneo, Celebes, the Moluccas, and the neighboring islands, and reached Batavia September 30th. In April, 1834, they embarked for Pedang, on the island of Sumatra, and thence sailed for the Battas group of 122 islands. War raging in the interior, they were attacked by the Battas, and both fell, Mr. Lyman being shot, and Mr. Munson pierced with a spear. For an account of their expedition and death, see the article on Mr. Lyman.

**Murray Island,** an island in the Gulf of Papua, south of New Guinea, east of York Island. Mission station of the London Missionary Society; 3 missionaries, 2 missionaries' wives, 18 native pastors, 256 church-members, 1,148 catechumens, and a seminary with 93 scholars. It is the chief seat of the mission in the western districts.

**Murray Island Version.**—The Murray Island belongs to the Melanesian languages, and is used in Torres Straits, New Guinea. A translation of the Gospels of Mark and John, translated by the Revs. McFarlane and H. Scott, was published in 1865 by the Sydney Auxiliary, under the care of the Rev. J. P. Sunderland.

**Music and Missions.**—Missions touch music at two points: 1. The missionary as an intelligent man studies the poetry and songs of the people among whom he labors. Those investigations are carried on during the earlier

period of a mission, and contrary to what some might expect, among savage races, as well as in more civilized communities. 2. After a mission has become successful the newly formed churches must be helped in their worship, especially in the department of Praise, and this we shall see sometimes demands a very deep and thorough knowledge of the foundation principles of music.

**DAKOTA MUSIC.**—Rev. A. L. Riggs ("Gospel among the Dakotas," pp. 450-484) gives a very interesting *résumé* of Dakota music, with specimens of songs of love and war, songs of sacred mysteries, and social songs. They are extremely simple, and abound with the repetitions so natural to untutored minds. A widow's lament expresses the deepest heartweariness and despair.

Their music is also very simple. It consists of melody alone, with rude accompaniment, mainly for marking time. The men sing, while the women sound one single falsetto note *ai, ai, ai*, keeping time with drums. They do not appreciate harmony. The minor key is their favorite, though the major key occurs in their war songs. Their instruments are the drum, rattle, and pipe. The drum is more than a foot in diameter, and from three to ten inches deep. The rattle is made of segments of deer hoops tied to a tapering rod of wood. The conjuror uses a gourd shell with a few pebbles inside. The usual pipe is a sumac flageolet, nineteen inches long, with a diameter of five eighths of an inch. A peculiar partition forms the whistle. Six notes are burnt on the upper side, and a brass thimble forms the mouth-piece. The pitch is A Prime, changed to G Prime by a seventh hole. Sometimes the pipe is made of the long wing or thigh bone of a crane or swan. Dakota music is rude, but its power is measured by the adaptation of its wild melody to savage life in the wilderness, where in the misty moonlight the night air bears the plaintive sounds, with the hollow bass of the drum-beat, along the waste, full of possible war-whoops, and where each bush may hide an enemy.

**CHINESE MUSIC.**—Dr. S. Wells Williams ("The Middle Kingdom," new edition, vol. ii. 94-104) gives a graphic description of Chinese music and musical instruments. However small their attainments in both theory and practice, no nation gives to music a higher place. Confucius taught that it was essential to good government, harmonizing the different ranks in society, and causing them all to move on in unison. The Chinese have sought to develop instrumental rather than vocal music.

The names of the notes, ascending regularly from the first line of the staff to the third space above it, are as follows: first line, *ho*; first space, *sz*; then *i*, *chang*, *ché*, *kung*, *fan*, *liu*, *wu*; first space above, *i*; then *chang*, *ché*, *kung*, *fan*, the last being on the third space above.

The real tone cannot be represented by our staff. The second octave is denoted by affixing the sign *jín*, a man, to the simple notes. No chromatic scale exists—at least no instrument is made to express flat and sharp notes.

There are two kinds of music in China—the northern and the southern. The octave in the former seems to have had only six notes, while the eight-tone scale prevails in more cultivated circles. Music is written for only a few instruments, and the notation good for one is

useless for another, because marks meaning to push, filip, hook, etc., are added to denote the mode of playing; indeed, the combinations are so complicated that the Chinese usually play by ear. All music is in common time; no triple measures are used. Of harmony and counterpoint they know nothing. Marks to regulate the expression are unknown, nor are tunes set to any key.

No description can do justice to their vocal music, and few can imitate it. Some notes seem to issue from the larynx and nose; tongue, teeth, and lips having little to do with them. Singing is usually in a falsetto key, somewhere between a squeal and a scream, and yet it is plaintive and soft, and not without a certain sweetness.

Chinese musical literature is voluminous. A work on beating the drum dates from A.D. 860, and contains a list of 129 symphonies. Among 12 instruments described in the chrestomathy are 17 drums of various sizes, then gongs, cymbals, tambourines, musical vases in considerable variety. Stringed instruments are not so numerous. They have nothing that resembles the lyre. The *kin* or scholar's lute is deemed the finest. "Easy Lessons" for this lute is a work in two volumes, explains 109 terms, and has 29 pictures of the position of the hand in playing. The instrument itself is ancient, and is named *kin*, "to prohibit," because it restrains evil passions. It is a board, four feet long and eighteen inches wide, convex above and flat below, where two holes open into hollows. Seven strings of silk pass over a bridge through the board at the wide end, and are fastened by nuts beneath. They are fastened to two pegs at the smaller end. The sounding-board is divided by thirteen studs, so placed that the strings are divided into halves, thirds, quarters, fifths, sixths, and eighths, but no sevenths. The seven strings enclose the compass of a ninth, or two fifths, the middle one being treated like A on the violin, and the outer ones tuned one fifth from that. The interval is treated like our octave in the violin, for the compass of the *kin* is made up of fifths. Each of the outer strings is tuned a fourth from the alternate string within the system, so that there is a major tone, and interval tone less than a minor third, and a major tone in the fifth. The Chinese leave the interval entire and skip the half-tone, while we divide it into two unequal parts; so the mood of the music of the *kin* is different from our instruments, and for that reason none of them can do justice to Chinese airs. There are other instruments like the *kin*, one with 30 and another with 13 strings. Some resemble the guitar, lute, and spinet, with strings of silk or wire, but never of catgut. The *pípa*, a balloon-shaped guitar, has four strings, is three feet long, with twelve frets to guide the player. The strings are tuned to the intervals of a fourth, a major tone, and a fourth, so that the outer strings are octaves to each other. The *san hien* or three-stringed guitar resembles a rebeck in shape, but the head and neck is three feet in length. The strings are tuned as fourths to each other, and their sound is low and dull. The *yueh kin*, or full-moon guitar, has four strings in pairs that are unisons with each other, with an interval of a fifth between the pairs. It is struck briskly, and used for lively tunes.

The two-stringed fiddle is merely a bamboo split stuck into a bamboo cylinder, with two

strings fastened on pegs at one end of the stick and passing over a bridge on the cylinder to the other end. They are tuned at intervals of a fifth. As the bow passes between the two strings, much care is needed in playing not to scrape the wrong string. The harsh grating of this wretched machine is very popular among the natives. The *ti kin* (crowing lute) has a cocoa-nut shell for its body, and is even more dissonant than the last. The *yang kin* is an embryo piano, consisting of brass wires of different lengths, tuned at proper intervals, and fastened on a sounding-board. The sounds are very attenuated. The *sang*, in like manner, is an embryo organ, a cone-shaped box, with a mouthpiece to blow in, and thirteen reeds of different lengths, inserted in the top, the valves of some opening upwards and others downwards. They are provided with holes also that may be opened or closed by the player. It is very ancient. Some think it the organ invented by Jubal (Gen. 4:21). The Chinese think it more curious than useful.

Their wind instruments are numerous. The *hwang tih* (flute) is twice the length of our pipe, made of bamboo, and pierced with ten holes. The two near the end are not used. The mouth hole is one third of the way from the top. The *shu tih* (clarinet) takes the lead in musical performances. It has seven holes, but no keys. Its tones are shrill and deafening, and therefore popular. A street musician fits a flageolet, or small clarinet, to his nose, slings a small drum under one shoulder, hangs a frame of four cymbals on his breast, and with a couple of monkeys sallies forth, a peripatetic choir and orchestra.

The stem of the horn is retractable, like a trombone. There are other varieties, however.

The *lo* (gong) is the standing type of Chinese music. A crashing harangue of rapid blows on this, with a rattling accompaniment of drums, and a crackling symphony of shrillness from clarinet and cymbal, is their beau ideal of music. They have heard good Portuguese music for ages, but have never adopted either an instrument or a tune.

A Chinese band makes the European think of Hogarth's "Enraged Musician." Each performer seems to have his own time, and bent on drowning the noise of all the rest; yet they keep good time, only no two of them are tuned on the same key. (See G. T. Lay in "Chinese Repository," vol. viii. 30-54; Doolittle's "Social Life of the Chinese," ii. 216; "Mémoires concernant les Chinois," tomes i., iii., vi., etc.; "Barrow's Travels," 313-323; "Chinese Chrestomathy," 356-365.)

**ARAB MUSIC.**—Dr. Eli Smith of Beirut found that hymns composed in Arabic measures could seldom be sung in our tunes, and our musicians were puzzled by the intervals in Arab music. On the other hand, Arabs could not repeat our scale. A treatise on Arab music by Michael Mishakah of Damascus explained the difficulty; and from that, with Kosegarten's edition of Isphahany's "Book of Odes," and Faraby on "Ancient Arab Music," Dr. Smith wrote a valuable paper which was published in the "Journal of the American Oriental Society" (i. 171-210), with notes by Prof E. C. Salisbury.

He says that sounds are naturally divided into groups of seven, rising one above the other, each the response to the one below, and the base of the one above. The group is called an octave,

*diwan*, and the octaves are composed of tones, *burj*, pl. *buruj*. The first is called *yegáh*, then *ösheiran*, *arak*, *rest*, *dugáh*, *sigáh*, and *jehárgáh*. This is the first octave. The second is *nawa*, *huseiny*, *awj*, *máhur*, *muhaiyar*, *buzrek*, and *máhurán*. The last is the response to *jehárgáh*. The first of the third octave is *remel túty*, the response to *nawa*. The next octave is the response to the response of *nawa*, and so on ad infinitum. So in the first series below *yegáh* they say the base to *jehárgáh*, to *sigáh*, and so through the list, then the base to the base of *jehárgáh*, etc. The intervals between these notes are unequal. They are divided into two classes, one containing four quarters, and the other three. The former are from *yegáh* to *ösheiran*, from *rest* to *dugáh*, and from *jehárgáh* to *nawa*. The latter from *ösheiran* to *arak*, from *arak* to *rest*, from *dugáh* to *sigáh*, and from *sigáh* to *jehárgáh*. The first class then has three intervals with twelve quarters, and the second four intervals with twelve quarters. The modern Greeks divide the intervals into seconds, and make three classes. One class, corresponding to the first of the Arabs, divides the interval into twelve seconds; the second class divides it into nine seconds, and is from *dugáh* to *sigáh*, and from *huseiny* to *awj*. The third class, from *sigáh* to *jehárgáh*, and from *awj* to *máhur*, has seven seconds to the interval. So their octave contains seven intervals, and sixty-eight seconds. The Arab and Greek scales coincide only at four out of the sixty-eight seconds.

This is the substance of only four of the thirty pages of the paper. Chapter II describes Arab melodies now in use, and Chapter III is devoted to musical rhythm, and Chapter IV to musical instruments, describing stringed instruments like *el ud* (literally the wood, whence our word "lute"), the Arab guitar, the *kemenjeh*, or Arab fiddle, with a cocoanut shell for its body, like the Chinese *ti kin*; the *tambur*, a kind of mandolin, and the *kanún*, corresponding to the *yang kin* of the Chinese orchestra, only, it would seem, a better instrument. Then of wind instruments, the *nay* or flute, *kerift*, *mizmar*, *sunády*, *urghan* (organ, see Chinese *sang*), and *jenah*. For a full description of Arab musical instruments with illustrations, see Lane's "Modern Egyptians," vol. 2, in small edition, pp. 66-82.

**INDIA.**—In India music was formerly much more scientific than at present. There idolatry has degraded music, and the martial music of the country has changed with its government. Its religion now has little to do with music, except in connection with the dancing girls of the temples. Operas are unknown, and theatrical music is of a low order. Marriages furnish the chief occasions for musical display. There are many kinds of musical instruments, as drums, trumpets, horns, cymbals, hautboys, and violins, but the performers have little skill and less taste. The wedding orchestra varies from six to twenty performers. Singing is an accomplishment of women of doubtful morality, who are much employed for this purpose by the wealthy.

Christianity is changing all this, not generally, it is true, but gradually and permanently, for the native convert must give vent to his new joy in songs of praise, and they do this not only in the church, but also in their families and when alone. Even before conversion, music does much to prepare the way.

Miss Mary Leitch in visiting the schools in Ceylon used to take her little organ with her, as it could easily be carried by coolies, and sing translations of our best English hymns, in the soft Tamil tongue. One day she asked a teacher whether he taught English. "Why should we teach it? Sanskrit is the primitive language." "Are there not valuable books in English?" "English books are not true. The most valuable are in Tamil. The works of the greatest scholars are in Sanskrit." "But the most valuable books in science are in English." "What do we care for science? Our religious books are in Sanskrit." Meantime the coolies had brought in the organ, which soon became the centre of eager curiosity, and when she sang with the organ in Tamil, "There's a land that is fairer than day," she had the hearts of the children at least, who pressed up close to the singer in the fulness of their enjoyment. ("Life and Light," 1881, p. 322.)

A favorite and most successful mode of introducing the gospel in western India is the *kirtan*, i.e. solo singing by native evangelists with orchestral accompaniment. In September, 1880, Rev. Mr. Bruce of Satara visited Wai with his kirtan choir. The people crowded to hear, especially as the leader had been a Moslem. Hundreds stood outside of the building in the rain, and listened for the first time to the way of salvation through a Redeemer. The whole city was moved, and Christ was the great topic of conversation for many days. ("Missionary Herald," 1880, pp. 521, 526.)

Rev. H. Ballantine, called the Dr. Watts of the Marathi Mission, prepared a hymnal for the churches, and another for the children, which met with great acceptance among the people.

Rev. E. Webb was an enthusiast in his researches into the laws of Tamil poetry. It is extremely elaborate in its rhythmical construction. The whole Ramanayam is rendered into rhyme and sung throughout the country. Our tunes do not suit Tamil taste, nor are our metres adapted to the language. In 1853 he published a Tamil hymn-book, containing hymns in our metre, children's hymns, and chants with music, but the largest part of the volume was made up of hymns in native metres. Many copies were taken at once by the English missions in Tanjore and Tinnevely, and singing was introduced in congregations of the American missions in places where it had been unknown before. An edition of 2,000 copies was soon exhausted, and a new one was issued in 1858. Though the people hear listlessly the most important truth in prose, they give eager attention to the same truth when versified and sung. In October, 1860, Mr. Webb gave an account of Tamil versification to the American Oriental Society, defining the two kinds of syllables, then the feet and the stanzas in which they were combined. Though the natives could see no measure in our verses, or melody in our music, yet hymns written in their own metres, and set to their own melodies, were extremely popular. He read some of them in Tamil with elaborate rhyme assonance and alliteration. He described also the music of the Hindus, known all over India under the same Sanskrit titles, and indicated its relation to our own scale. ("Journal of the American Oriental Society," vol. 271, and "Missionary Herald," 1854, p. 150; 1858, p. 59.) Rev. G. T. Washburn carried on the work thus begun by Mr. Webb. In 1863 he

published two volumes of Tamil lyrics. They were hymns by natives in native metres. Ancient India excelled Greece in her cultivation of music; and though no new tunes have appeared for centuries, those of the best periods still exist, and for these the hymns were composed. Rev. W. W. Howland prepared the tunes for the Tamil hymn-book of Dr. Spaulding. ("Missionary Herald," 1870, p. 130.)

OTHER LANDS.—Though in other missions there may not have been the same zeal for native music, yet in them all, as soon as men receive "the light of the knowledge of the glory of God in the face of Jesus Christ," they feel impelled to praise the name of the Lord, and missionaries are glad to assist the effort to praise as soon as the spirit of praise appears.

It is interesting to look over the record of missions in this line. In Turkey, though at that time they had few hymns ready for use, yet they could not wait to prepare more, but in 1850 issued an Armenian hymn-book of only 55 pages. This was followed in 1853 by one in Armeno-Turkish, i.e. Turkish in Armenian letters, of 112 pages, and the next year saw an Armenian "Hymn and Tune Book" of 300 pages, so rapidly grew their hymnology. That same year (1854) the Greek hymn-book appeared, of 100 pages, though 16 pages of hymns had been printed as early as 1833. All these were 16mo, but in 1855 appeared a work on church music, in Armenian, of 44 pages 8vo. Then in the same language a hymn and tune book for children was published in 1860, 40 pages 8vo. This was followed by 24 8vo pages of additional hymns and music in 1863. It seemed as though good men kept on composing hymns, and, as fast as they did so, the churches could not wait, but had them printed for use at once. Next year (1864) appeared a hymn-book of 104 16mo pages in Arabo-Turkish, i.e. Turkish in Arabic type. The following year four hymns were printed on one 8vo sheet, and in 1866 a supplement to the Armeno-Turkish hymn-book, of 88 pages 16mo, made its appearance. Next came an Armenian Sunday-school hymn-book of 134 16mo pages, followed next year by a Sunday-school hymn and tune book in the same language of 128 8vo pages. The year 1869 saw a volume of Armenian hymns and prayers of 192 pages 16mo. The same year welcomed a Greco-Turkish hymn-book of 264 16mo pages, and a second edition came out ten years later. In 1869 the Armenian hymn-book had grown to 426 pages, and four years later a fresh edition contained 430 pages. This was followed by a supplement of 56 8vo pages to the Armenian hymn and tune book in 1877, and as though that was not enough, an appendix of 16 pages more was issued the same year. Such a list of publications indicates an abounding spiritual life that makes what would otherwise be the drier of statistics an occasion of great joy to all who love the prosperity of Zion. In Bulgarian, three pages of hymns and tunes were printed in 1861, the year following a hymn-book of 24 12mo pages, and in 1865 a hymn and tune book of 64 8vo pages. The hymn-book in 1872 had grown to 154 16mo pages. In Syria, while the mission was still under the care of the American Board, 200 pages of versified Psalms were printed about 1868. The same year gave 200 pages of children's hymns to the Sunday-schools, and before the mission passed into the

hands of the Presbyterians a hymn-book appeared first of 300 pages, and after that of 500. About 1874 a hymn and tune book was printed, containing an introduction teaching how to read our musical notation. This was afterwards printed separately, 30 pages 8vo. In 1882 the Psalms in verse were printed for the use of the United and Reformed Missions, hymns alone, 400 18mo pages; with tunes, 500 12mo pages; and with tonic Sol Fa notation, 600 12mo pages. In 1885 a new 8vo hymn and tune book, containing 327 hymns and 280 tunes, was prepared by Rev. Samuel Jessup and Rev. George Ford, and a second edition was called for in 1889. A hymn-book without tunes appeared in 1885, of 418 pages 18mo. This advanced to a second edition in 1887, and a third in 1889, showing a very encouraging demand for such a work.

In the Persian Mission the hymn-books have gone through several editions. The last, issued in 1886, has about 300 hymns, mostly translations, but adapted to the expression of Christian feeling in Persia, and also to the wants of the young in their Oriental homes.

Music has been taught by the missionaries. The popular tunes are those used in congregations in the United States. The chants of the Ancient Syriac are used in religious worship, and are very popular. The words, of course, are in the vernacular, and so the congregation can join in the responses. They are used especially in chanting the Psalms, and also some other portions of the Scripture, such as are found in books for responsive reading at home.

The writer has material for similar statements concerning other missions, but these may suffice to show how in our day those words of the Psalmist were fulfilled (Ps. 67:3): "Let the peoples praise Thee, O God. Let all the peoples praise Thee." And again (Ps. 145:10-13): "All Thy works shall give thanks unto Thee, O Lord, and Thy saints shall bless Thee. They shall speak of the glory of Thy kingdom, and talk of Thy power. To make known to the sons of man His mighty acts, and the glory of the majesty of His kingdom. Thy kingdom is an everlasting kingdom, and Thy dominion endureth throughout all generations."

**Muskoki, or Cree Version.**—The Muskoki belongs to the languages of America, and is spoken by the Indians in the United States. They were provided by the American Bible Society with several parts of the New Testament,—Matthew, John, the Epistles of John, of James, of Titus and Philemon,—which were published since 1867. In 1879 the same Bible Society published at New York the Acts of the Apostles, translated by Mrs. E. W. Robertson, and in 1885 the Epistle to the Hebrews. In 1886 the New Testament was completed by Mrs. Robertson, who also revised the version of Matthew which had been in use since 1867.

(Specimen verse. John 3:16.)

**Mussooree**, a town and sanitarium of Dehra-Dun district, Northwest Provinces, Bengal, India, 7,433 feet above the sea, on a Himalayan peak, among beautiful and

varied scenery. Population fluctuates with the season of the year, the maximum reached being 7,652; Hindus, Moslems, Christians, and Jews. Mission station of Methodist Episcopal Church (North); including Rajpore, 2 missionaries and wives, 7 native helpers, 2 out-stations, 2 churches, 21 church-members, 2 girls' schools, 28 scholars, 5 Sunday-schools, 100 scholars.

**Musquiz**, Mexico; two towns in the State of Coahuila, near Saltillo. Mission station of the Southern Baptist Convention; 1 missionary and wife. Methodist Episcopal Church (South); 1 native pastor.

**Muttra** (Mattrā), town in the Rohilkund district, Northwest Provinces, India, between Agra and Aligarh, east of Alwar. Mission station of the C. M. S.; 14 native agents, 28 church-members, 1 school, 8 scholars. Methodist Episcopal Church (North); 1 missionary and wife, 24 native helpers, 15 church-members, 12 schools, 300 scholars.

**Mutwal**, Southeast Ceylon, very near Colombo. Mission station of the S. P. G.; 1 missionary, 1 church, 77 church-members, 3 chapels, 9 native helpers, 3 schools, 162 scholars.

**Mutyalapad**, town in Madras, South India, near Secunderabad. Mission station of the S. P. G.; 1 missionary, 35 native helpers, 727 communicants.

**Muzaffarnagar**, town of Muzaffarnagar district, Northwest Provinces, Bengal, India; station on the Sind, Punjab and Delhi Railroad. Population (1881), 15,080, Hindus, Mohammedans, Jains, and a few Christians. Climate formerly very unhealthy and malarious, but lately, owing to modern sanitary improvements, it has been made much more salubrious. Station of the Bengal Mission, Methodist Episcopal Church (North); 1 foreign missionary, 1 missionary's wife, 2 out-stations with 10 adherents, 1 organized church, 6 communicants, 2 preaching-places with an average attendance for each of 65, 1 ordained preacher, 2 unordained, 1 Sabbath-school, 50 scholars, 1 female school, 20 scholars, 3 teachers.

**Muzaffarpur**, or **Muzufferpoor**, a town in Bengal, India, 35 miles north-north-east of Patna. Population, 38,223. It is well built and clean, with good schools, temples, court-houses, and other public buildings. Has a large trade. Mission station of the Gössner Missionary Society and of the Methodist Episcopal Church (North).

**Myingyan**, town in Burma, on the Irrawaddy River, 100 miles south of Mandalay. Healthy, hot, very dry. Population, 20,000 to 30,000, Burmans, Chinese, Hindus. Language, Burman. Religion, Buddhism. Social condition unusually good for Burma. Mission station of the A. B. M. U. (1887); 1 missionary and wife, 2 native helpers, 1 out-station, 1 church, 7 church-members, 1 school, 22 students, 1 Sunday school, 40 pupils.

**Mymensing** (Maimansingh), town in Dacca division, Bengal, India, same as Nasirabad. Mission station of the Baptist Missionary Society (England); 1 missionary, 5 evangelists, 44 church-members, 89 scholars.

**Mynpuri**, a town in the district of Furukhabad, Bengal, Northeast India, 40 miles west

of Futehghurh. Mission station of the Presbyterian Church (North) (1843); 1 missionary and wife, 2 foreign helpers, 8 native workers.

**Mysore**, a large and important native principality in South India. Its territory is entirely surrounded by the British dominions belonging to the presidency of Madras. It lies at the point where the ranges of the Western and Eastern Ghats come together, and most of its territory is on the elevated plateau lying between these ranges. Its limits of north latitude are 11° 40' and 15°, and of east longitude 74° 40' and 78° 30'. The area is 24,723 square miles and the population 4,186,188, according to the last census (1881). Its surface is much broken by rocky hills and ravines; the drainage of the country is almost wholly to the east; in the northwest one river falls in a fine cascade over the precipitous wall of the Western Ghats and seeks the Indian Ocean. Otherwise the streams all reach the Bay of Bengal through the Tungabhadra on the north, which itself is an affluent of the Krishna, the Kaveri on the south, and several smaller rivers between these two more important streams. These rivers, like almost all those of India, while useless for navigation, support large systems of artificial irrigation. Water is also stored in artificial reservoirs wherever the configuration of the country renders their construction possible. Of these tanks there are nearly 38,000. The rainfall of the wet season, stored up behind their walls, is slowly let out into the fields during the arid months of the year and insures the crops of the agriculturists. Mysore was included in the territories ruled from time immemorial by old prehistoric Hindu dynasties of South India, whose existence can dimly be traced in the uncertain light of early Indian times. The Mohammedan invasions of the 14th and 15th centuries subverted these and afforded opportunity for the rise of others; one of the most important of these newer kingdoms was that of Vijayanagar; this, of which the capital just mentioned lay to the north of Mysore, near the banks of the Tungabhadra, was overthrown by surrounding Mohammedan powers in 1565. During the feeble years of waning power which remained to this dynasty after the battle some of the local chieftains began to assert their independence; prominent among these was the representative of a family known as the Wodeyar of Mysore, who, in 1610, seized the fort of Seringapatam and became the founder of the present Mysore principality. This dynasty was most powerful in the 17th century. During the latter part of the 18th it suffered total eclipse by the rising power of a Mohammedan usurper named Haidar Ali, who displaced the Hindu line and made himself sole master of the state. The English arms in India have never had a fiercer, a more determined, nor an abler antagonist than he. But his son, Tippu Sultan, though animated with his father's spirit, had not the latter's ability nor success. After making the name of the Mysore dynasty a terror, and more than once ravaging South India with fire and sword, this usurping line came to an end in 1799, when the English laid siege to Seringapatam. Tippu Sultan was slain in the breach, and the English conquerors replaced the old Hindu line upon the throne. Between the years 1831 and 1881, owing to the incapacity of one Hindu prince and the minority of his successor, the English administered

the country in the name of the House of Wodeyar. But in the latter year, when the young chief came to his majority, the administration was handed back to him. The town of Bangalore, however, and a small area adjacent to it is assigned to the British for a cantonment, where the necessary troops are quartered and where the English officials have their headquarters. Bangalore is thus, to all intents and purposes, in British dominions, and as such is the natural starting-point of Christian missions within the principality.

Of the entire population the Hindus amount to nearly 95 per cent, Mohammedans to a little less than 5 per cent. The total number of Christians was returned as 29,249. Of these 21,021 were native converts. About one-fourth of the Christians are Protestants, the others Roman Catholics. The language almost universally used is Kanarese. The Jains were once very numerous in Mysore. Their tenets are in some particulars akin to those of the Buddhists. They are very scrupulous in their regard for all forms of animal life, do not follow the Brahmins, nor worship the usual gods of Hinduism, but pay reverence to certain deified saints of their own sect. An unorthodox sect of Hindus, known as the Lingaits, are numerous in Mysore, and are also found in adjacent districts of the Bombay presidency. They do not observe caste, nor adhere to Brahmanical rites; they worship the God Siva, and get their name from their custom of wearing upon their persons, usually in little silver boxes suspended from their necks, the *ling*, or emblem of their God. They are prominent in mercantile pursuits. Mysore is for the most part an agricultural country. Some iron is found, and of late years there has been no little excitement over the existence of gold in quantities which it is thought will make gold-mining profitable. The progress of education since 1854 has been fairly good. In 1880-81 the total outlay was £29,939. In 1883-4 there were in all 2,388 schools in Mysore with 63,490 pupils. Of the pupils 3,828 were girls, and female education is said to be growing in popularity.

The first Protestant mission in Mysore was that of the Society for the Propagation of the Gospel, established at Bangalore in 1817. In 1820 the London Missionary Society planted a station at the same city. The Hindu Government seems to have been unfriendly to the work of the missionaries, and opportunities for preaching in Kanarese--the vernacular of the people--were at first greatly curtailed by this fact. The first few years of the mission were not prosperous; but since its earlier difficulties have been overcome, it has had a career of much success. The Wesleyans also entered Mysore, planting their principal station in the city of that name, shortly after the London Society entered Bangalore. Both these missions have now many stations throughout the State. The cultivation of the Kanarese language is greatly indebted to the missionaries; grammars and dictionaries, as well as translations of the Bible, and a Christian literature generally are due to their labors.

**Mysore** (City), the capital of Mysore native state, situated in north latitude 12° 18' and east longitude 76° 42'. The population (1881) was 60,292. Of these 45,699 were Hindus, 13,288 Mohammedans (a much larger proportion than

throughout the State of Mysore as a whole), 1,289 Christians, and 46 unspecified. The Hindu prince or rajah has a palace here, though since 1831, when the English assumed control of the government on account of the incapacity of the then reigning prince, Bangalore has been

actually the capital, as it was the headquarters of the English officials, and the prince now resides there a portion of the year. The Wesleyan Missionary Society has a mission here, as well as at other points in the state.

## N.

**Nablous** (Shechem), town in Palestine, 30 miles north of Jerusalem. A very ancient town, noted now chiefly as the possessor of several valuable manuscripts, the most important of which is the copy of the Pentateuch known as the Samaritan Codex. Population from 10,000 to 20,000, Christians, Samaritans. Mission station, Church Missionary Society; 1 missionary and wife, 12 native helpers, 162 scholars. Baptist Missionary Society; 1 native missionary, 8 helpers, 4 out-stations, 48 school-children.

**Nagalapuram**, town in India, in the Tuticorin district, Madras. Mission station of the S. P. G.; 7 missionaries (5 of them native), 47 native helpers, 993 communicants.

**Nagarkoil** (Nagercoil), a station of the London Missionary Society, in Travancore, India (1809). It is one of the most important stations in India. With 60 out-stations, the gospel is carried by preaching, by distribution of handbills, and by personal visitation to the many heathen villages and to the coolies on the coffee plantations. On the first Sunday of the year a general meeting of Christians in the district is held at Nagarkoil, and at the last reported meeting 925 communicants were present—an imposing array and great contrast to the demon-worship of 100 years before. There are 3 missionaries, 5 native ministers, 32 preachers, 1,401 church-members, 59 boys' schools, 2,468 pupils, 13 girls' schools, 1,112 pupils.

**Nagasaki**, on the island of Kiu-Shiu, the principal seaport of the western coast of Japan, is picturesquely situated at the head of a small inlet four miles long and a mile wide. It has thus one of the finest harbors in the world. The surrounding hills, 1,500 feet high, and the numerous small islands with which the harbor is dotted, add greatly to its beauty. The city is laid out with great regularity, in rectangles. A stream of water flows through it. There is a foreign concession separated from the main city by an arm of the bay. A hospital was established here in 1861—the oldest now in Japan, and there is a fine government school, in which hundreds of young Japanese are instructed in European languages and sciences. The population numbers 40,187 (1887). The climate is salubrious, and the city is a pleasant one in which to live. Regular steamship communication connects it with Shanghai. Mission station of the South Japan Mission of the Reformed (Dutch) Church, U. S. A. (1872); 4 missionaries, (3 married), 2 female missionaries, 9 out-stations, 3 churches, 200 communicants, 10 Sunday-schools, 370 scholars, 7 theological students. Methodist Episcopal Church (North); 4 missionaries, 4 assistant missionaries; 4 missionaries W. F. M. S.; Cobleigh Seminary (W. F. M. S.), 185 pupils; 238 church-members, 1 theological

school, 11 students, 4 Sunday-schools, 242 scholars. C. M. S.; 1 missionary and wife, 45 communicants, 1 girls' school, 11 scholars.

**Nagoya**, a city on the main island of Japan, situated on the railroad midway between Tokyo and Kyoto. It is in the midst of a broad, fertile plain, surrounded by an innumerable number of thriving towns and villages, and is the fourth largest city of the empire, with a population of 360,000. Such a strategic position for missions was early availed of by the Reformed (Dutch) Church (U. S. A.), but there is no representative of that mission there at present. The Methodist Episcopal Church (North) have a flourishing mission. It is the central point of the Nagoya district, and its importance as a base of operations is fully recognized. A fine church building has been erected; 1 missionary, 1 preacher, 207 church-members. The Presbyterian Church (South) has a mission there since 1887 with 3 missionaries, 3 out-stations, 2 churches, 2 Sunday-schools, 100 scholars, 4 theological students, 141 church-members. The Methodist Protestant Church has occupied Nagoya since 1887; 3 missionaries, 3 ladies, 70 church-members, 1 girls' school, 20 scholars. The Cumberland Presbyterian Church has one female missionary in this centre of work.

**Nagpur** (Nagpore), city in Central Provinces, India, 42 miles east-northeast of Bombay. It is a large city, but not a very fine one, although there are many relics of its former greatness still to be seen, and the handsome tanks and gardens outside the city and the pretty scenery give the place a very attractive appearance. Trade is good and steadily increasing. Climate healthy. Population, 98,299, Hindus, Moslems, Christians, Jains, Kaberpanthis, Satnamis, Parsis, Brahmos, Buddhists, Jews, etc. Mission station Methodist Episcopal Church (North); 1 missionary, 1 native helper. Free Church of Scotland; 4 missionaries, 10 native helpers, 3 out-stations, 3 churches, 15 schools, 1,017 scholars. S. P. G.; see Chota Nagpur.

**Nain**, town in Labrador; the principal and oldest station of the Moravian Brethren in Labrador, on a good harbor on the east coast. Population, 270. Occupied by the mission since 1771; 4 missionaries, 3 missionaries' wives.

**Naini Tal**, town in Kumaon district, North-west Provinces, India, picturesquely situated on the banks of a lovely little lake which nestles among the spurs of the Himalayas. Favorite sanitarium and summer resort of Europeans from the plains. Population fluctuates; maximum, 10,054, Hindus, Moslems, Europeans, etc. Mission station Methodist Episcopal Church (North); 5 missionaries, 2 missionaries' wives, 2 other ladies, 34 native helpers, 15 schools, 665 scholars, 115 church-members.

**Nama Version.**—The Nama belongs to the Hottentot group of African languages, and is spoken in Great Namaqualand. The first parts of Scripture which were published in the Nama were the four Gospels, translated by the Rev. Mr. Schmelen of the L. M. S. and printed at Capetown in 1826 at the expense of the British and Foreign Bible Society. Twenty years later (1846) the Gospel of Luke, translated by Rev. Mr. Knüdsen of the Rhenish Missionary Society, was printed at Capetown. A new translation was undertaken by the Rev. G. Kronlein, also of the Rhenish Missionary Society, and when completed, the director of that Society, Dr. Fabri, addressed a communication to the British and Foreign Bible Society in 1863, of which the following extract is of interest:

"The Rhenish Missionary Society has its oldest and most extensive field of labor in South Africa. The stations stretch from Capetown to Walvisch Bay. The central part of this region forms (Little and Great) Namaqualand, peopled by the rest of those Hottentot tribes that were formerly living in the Cape Colony, but were afterwards dislodged by the Dutch farmers of that colony. The Rhenish Missionary Society is at present laboring among those Hottentots having the chief stations, so that this extensive though thinly-peopled country is already brought under the sound of the gospel. A considerable number of converts have already been incorporated into the church of Christ by baptism. Fifty years ago the London Missionary Society commenced work in that country, but afterwards committed its few stations to the Rhenish Missionary Society. Several very satisfactory revivals, followed by good fruits, have taken place there even up to the present time. But strange as it appears, the lingual labors in that mission field are still very little advanced. The chief reason for this is the difficulty of the language, containing four singular smacking sounds which can scarcely be mastered by any European; only a few have succeeded in acquiring them. To these few belongs Mr. Kronlein, missionary at the station Bersaba, in Great Namaqualand. He has at last, after many years' preliminary work, succeeded in translating the whole New Testament into Namaqua. Several conferences of missionaries have examined this translation and made the necessary remarks. The missionaries intend to meet ere long at the station Hoachanas, in order to examine it verse by verse. This will be the last revisal. Thus you see that this translation has been performed with all possible care and circumspection, as the importance of the matter and the difficulty of the language require."

After the British and Foreign Bible Society had consented to defray the expense of the printing of the New Testament, the translator left his station and betook himself to Berlin, where he carried his work through the press in 1866, the translation being based on the "Textus Receptus," with references made also to the German, English, French, and Dutch versions.

Mr. Kronlein, who prosecuted the work of translation, issued the Psalms at Capetown in 1872, and on October 25th, 1881, he completed at Stellenbosch the translation of the Old Testament, early portions of which had been begun on May 23d, 1873. The translator

is now revising into one harmonious whole the entire books of the New Testament.

(*Specimen verse.* John 3: 16.)

||Natigoseb gum Eloba !hüb-eiba gye Inamo,  
ob gye lleib di lguise !nai hä !göaba gye ma,  
lleib !na ra !gorn hoan gä-llo tite se, xawen  
nī lamö üiba ü-ha se.

**Namkyung**, a town in the province of Kwangtung, China. Station of the Berlin Missionary Society, with 2 out-stations under a native deacon; 3 native helpers, and 100 members.

**Nanchang**, capital of the province of Kiang-si, China, 285 miles southwest of Nanking. Mission circuit of the Methodist Episcopal Church (North).

**Nandial**, or **Kurnool-Nandyal**, is a prosperous town in Madras, India, surrounded by highly cultivated rice-fields. Population, 78,282. Mission station of the S. P. G.; 1 missionary, 5 native helpers, 108 communicants.

**Nangur** (Nangoor), India, in the Trichinopoly district, Madras, near Tranquebar. Mission station of the S. P. G. (1878), worked with Tranquebar; 1 missionary, 459 communicants, 1 boys' boarding-school, 10 boys, 1 girls' boarding-school, 15 girls, 2 day-schools.

**Nankang**, a town in the province of Kiang-si, China, between Kiu-kiang and Nanchang. Mission station of the China Inland Mission (1887); 3 female missionaries, 1 native helper, 1 church, 1 chapel, 28 church-members; also a station of the Kiu-kiang circuit, Central China Mission of the M. E. Church (North).

**Nanking**, "southern capital," so-called from its having been the seat of government during the Ming dynasty (1368-1644), is one of the principal cities of China. It is situated on the south bank of the Yangtze, which makes a right angle, and borders the city on the north and west, in the province of Kiang-su, 223 miles west of Shanghai, and almost midway between Canton and Peking. It formerly possessed one of the finest walls known, 20 miles in circuit, 70 ft. high, 30 ft. wide, and pierced with 13 gates. The interior of the city has much unoccupied ground. The famous Porcelain Tower, built by the Emperor Yung Lo (1403-28), was an object of the wonder and admiration of Europeans, until it was destroyed by the Tai-ping rebels during their occupancy of the city in 1853-6, at which time most of the public buildings were ruthlessly destroyed. It was formerly a literary centre, and was noted also for its industries. Cotton cloth, called nankeen, from the name of the city, satin, crêpe, and pottery were all manufactured. An arsenal is now located at Nanking under European superintendence, where fire-arms and vessels of war are manufactured. Sir Henry Pottinger signed here the famous Nanking Treaty in 1842.

Not far from the city are the tombs of the emperors of the Ming dynasty, with an avenue leading to them guarded by gigantic stone figures of men and animals.

By a treaty made with France in 1858, this port was thrown open, but practically no com-

merce is carried on with foreigners. The climate is warm and dry, and not unhealthy. Population, 150,000, with 100,000,000 who use the Nanking dialect. Its importance as a centre for educational work has been appreciated by the Methodist Episcopal Church, who have established here a university with an endowment of \$200,000. The Disciples of Christ are also about to erect a college. The medical work in connection with the Methodist Episcopal Hospital, said to be the largest in China, is most important. Mission of the Presbyterian Church (North), 1876; 2 missionaries and wives, 2 female missionaries, 1 native minister, 1 girls' boarding-school, 1 boys' boarding-school. Methodist Episcopal Church (North); 3 missionaries, 3 assistant missionaries, 2 female missionaries, 24 church-members, 1 Sunday-school, 60 scholars, 2 high-schools, 43 scholars, 2 day-schools, 35 scholars. Foreign Christian Missionary Society (Disciples); 2 missionaries, 4 church-members, 24 Sabbath-schools, 24 day-schools.

**Nanking Colloquial**, a dialect of the Mandarin, sometimes called the South Mandarin, in distinction from the North Mandarin, spoken in Peking. The New Testament has been published in this dialect by the B. and F. Bible Society. See Mandarin Colloquial.

**Nantai**, city in Southeast China, near the coast, south of Foochow. Mission station A. B. C. F. M. with Foochow.

**Nantziang**, city in Eastern China, in the Shanghai district, province of Chehkiang. Mission station of the Methodist Episcopal Church (South); 1 missionary, 2 native pastors.

**Narasaraopet** (Nursaravapetta), a subdivision of a district of Madras. Area, 712 square miles. Population, 128,791, Hindus, Moslems, Christians, etc. Town of Athern or Narasaraopet; population, 3,928. Mission station American Baptist Missionary Union; 1 missionary and wife, 59 native helpers, 157 out-stations, 12 churches, 4,268 church-members, 70 schools, 724 scholars.

**Nardupett**, a town in the Nizam's Dominions, India, 29 miles southeast of Hyderabad. Mission station of the Hermannsburg Missionary Society.

**Narowal**, a station of the Church Missionary Society in the Punjab, India, the centre of an important work among the villages near by. A medical mission is meeting with success. There are 5 native helpers, 40 communicants, 5 schools, 559 scholars.

**Narrinyeri Version**.—The Narrinyeri belongs to the Australian languages and is spoken by aborigines of South Australia. For their benefit parts of the Old and New Testaments were translated by Mr. Taplin, and were published at Adelaide in 1865 by the British and Foreign Bible Society.

(*Specimen verse*, John 3: 16.)

Lun ellin Jehovah an pornun an Narrinyeri :  
pempir ile ityan kinawe Bratwarate, ungunuk  
porn wurruwarrin ityan, nowaj el itye moru  
hellangk, tumbewarrin itye kaldowamp.

**Narsinghpur**, a maritime town of Madras, India, 40 miles east of Masulipatam. Population, 6,819. Mission station of the Swedish Evangelical National Society (1878); 2 missionaries, 2 native assistants, 2 schools, 153 scholars.

**Nasa**, a village on Speke Gulf, southeast corner of Lake Victoria Nyanza, Africa, occupied for a while by two missionaries of the Church Missionary Society, who left it in August, 1889, on an urgent summons to work elsewhere.

**Nasik**, an important town and district in Bombay, India. Occupied in 1832 by the Church Missionary Society; 2 missionaries, 12 native helpers, 107 communicants, 14 schools, 289 pupils.

**Nasirabad**, (1) town in Bengal, India, mission station of the Baptist Missionary Society (see Mymensing); (2) town and cantonment in Ajmere-Merwara, Rajputana, India, situated on a bleak, open plain, which slopes eastward from the Aravalli Hills. Population of town (1881), 18,482; of cantonment, 2,838, chiefly Hindus and Mohammedans. The people are poverty-stricken and in debt. Station of the Rajputana Mission, United Presbyterian Church of Scotland (1861); 3 missionaries and wives, 2 other ladies, 1 out-station, Ashapura; 2 churches, 77 communicants, 8 Sunday-schools, 335 scholars, 8 schools, 676 pupils.

**Nassau**, the capital of New Providence, one of the Bahamas, West Indies, with a population of 5,000. Station of the Baptist Missionary Society (1833); 1 missionary, 1 native assistant, 412 church-members (including entire island), 57 day-schools, 330 Sabbath-schools. The Wesleyan Methodist Missionary Society (1811) have on the island 6 chapels, 3 missionaries and assistants, 1 day-school, 1,000 church-members. Nassau is a diocese of the S. P. G. mission (1732), with a resident bishop. In the whole diocese there are 20 clergy, 80 stations, 4,000 communicants.

**Natal**, a section of the southeastern coast-country of Africa, lying between Kaffraria and Zululand, is, since 1856, a crown colony of Great Britain; formerly it was part of the Cape of Good Hope settlement. It has a seaboard of 200 miles, with an estimated area of 21,150 square miles; some of the districts are not yet accurately delimited. (See Natal, under Africa.)

**Nateta**, capital of Uganda, on the northern shore of Victoria Nyanza, and formerly a station of the C. M. S.

**National Bible Society of Scotland**. Headquarters, 5 St. Andrew Square, Edinburgh, Scotland.—The National Bible Society of Scotland was formed by the union, in 1861, of the Edinburgh and the Glasgow Bible societies, founded respectively in 1809 and 1812, together with other leading Bible societies of Scotland. Although these societies accomplished great work alone, yet the advantageous results of the union may be seen by the progress since 1861. Since that time the auxiliary societies have increased from 52 to 335, the total income from £8,000 to £33,000, the yearly issues from 103,610 to 562,151, and the total circulation since 1861 now reaches 10,673,126 copies.

The Society carries on a large work both at home and in foreign countries. The Home

Mission supplies large numbers of the Scriptures annually at reduced rates to the poor and to various missionary and benevolent associations; it circulates the Gaelic Bible throughout the Highlands and islands of Scotland and in the regions of North America where Gaelic is spoken; and aids the distribution of the Scriptures in Ireland. Over 9,000 Bibles, Testaments, and portions of the Bible in Gaelic are distributed annually. As a Colonial Mission it distributes the Scriptures throughout all the British colonies and dependencies. As a Continental Mission it works in nearly all European countries.

As a more distinctively Foreign Mission the National Bible Society of Scotland publishes in the vernacular and distributes by means of colporteurs the Scriptures in Africa, China, India, Japan, South America, and Turkey. In Asia it has begun work among the Bedouins of the Syrian desert; it has distributed thousands of Scriptures among the Tartar tribes of Mongolia; it was the first to establish regular colportage in Korea.

The Society has recently published the Bible in the Efik for Old Calabar, Africa; the New Testament in one of the Malay dialects and in Chinyanja, the language spoken by 500,000 in Central Africa, translations in the Tannese (New Hebrides), and Mandarin (China) are also in preparation, and the Society has had its share in the Japanese version of the Scriptures, and in the Wen-li version, an idiomatic translation intelligible to the great mass of the Chinese.

The Society takes its stand upon the two great Protestant truths that the Bible is God's message to all men, and that it is the right of every man to have it in his own language and judge of it for himself. It is impossible to estimate all the results of the Society's work, but, mainly through the influence of its colporteurs, not a few Protestant congregations have been formed in Roman Catholic countries and Christian churches in heathen lands.

This Society has not carried on its work chiefly through specially appointed agents, but has worked in connection with the various missionary societies, finding this method productive of good results, especially in view of the principle and practice of allowing its colporteurs to circulate unsectarian tracts together with the Scriptures in Roman Catholic and heathen countries. It was, however, the first Society to appoint a special agent for Japan, Mr. Robert Lilley, who served there for ten years.

The circulation for 1889 was as follows:

	Bibles.	Tests.	Parts.	Total.
Foreign .....	29,789	95,407	337,884	463,080
Colonies .....	18,564	11,766	2,328	32,658
United Kingdom.....	111,682	62,789	19,606	194,077
Total, .....	160,035	169,962	359,818	689,815

**Native States** (British India).—The collective term applied to those portions of India which are not under the direct control of the Anglo-Indian Government, but are still ruled by native princes and chiefs. These states are scattered over the whole of Hindustan. Some of them are large and important districts, covering hundreds and thousands of square miles, with millions of inhabitants, with military and civil departments of administration, with mints, postal establishments, educational systems,

courts, and all the machinery of modern government; some of them are hardly large enough to be noted upon an ordinary map, and consist simply of a village or so with a handful of inhabitants, under the control of some petty descendant of the old chief of an aboriginal clan. Between these two extremes the native states range themselves in all degrees of importance. They vary greatly with reference to their populations. Some of them consist almost wholly of Hindus, under a Hindu prince. In others, the ruling family will be Mussulman—though the population will consist of persons of all the races usually found in the districts of Hindustan. Others again are made up almost wholly of the aboriginal tribes, still owning the headship of the hereditary chieftain. The manner in which it has come about that, in the midst of territory under the authority of the Anglo-Indian Government, these islands of native rule should be left, may be briefly and generally explained as follows: The English acquired their territory in India little by little. As they were brought into contact and relation with the old native chiefs and princes, conflicts more or less bitter were natural. The result of these conflicts often was that the territory of the native prince passed wholly into the hands of the British. Some of these wars were waged by the English in self-defence; some of them, it is to be feared, were little else than wars of aggression. Sometimes the territories of a prince joining English districts would be so ill-governed and mismanaged that that fact of itself would be made by the English authorities the pretext for annexation. Thus by degrees the possessions of the English in India assumed their present far-spreading area, but among the native rulers with whom the English power has been brought in contact there have been those whose original authority over their hereditary domains there was no valid reason for disturbing. Some such reigning families have been allied to the growing British power for tens and even hundreds of years by treaty, and have always been faithful friends and allies. Some native principalities are too far removed from the march of British power to render interference with them at all natural. Some princes and chiefs have been confirmed in their possessions simply because in the absence of glaring reasons for annexation such a step would provoke hostility which it would be inconvenient to experience. Thus it has happened that while, as the result of conquest, almost all India has now passed under British rule, many native principalities still retain their existence, and many purely native governments still continue in enjoyment of their ancient power. Yet the English Government sustains very close and influential relations with all these states. They are all bound by treaty to that government, which in its relation to them is styled the "paramount power;" and which undertakes to guarantee to them all protection against foreign enemies. No one of them is permitted to enter into any treaty relations with any other power save through the English Government; and though some of the states maintain small military establishments, these are rather for display than for any serious purpose. In order to prevent the populations of these states from misgovernment, as well as to insure a due degree of subjection to the paramount power, they are all closely supervised

by the Anglo-Indian Government, acting through a class of officials designated to that duty. These officials are known as "residents," or "political agents," or "political superintendents." A resident is one appointed to reside permanently at the court of a native prince, and to be the medium of communication and influence between the prince and the paramount power. Political agents and superintendents usually have supervision over groups of smaller states not large and important enough to require each the services of a resident. There are many such groups of inferior states or chieftainships, connected with all the presidencies and lieutenant-governorships. The political superintendent will often be the nearest British magistrate, who discharges the duties of supervision in connection with the general duties of his official station in British territory. Under the supervision of these officers the internal affairs of the several states are usually left to be managed by their own princes. Continuous and incorrigible incompetence will generally result in the deposition of a prince by the English Government; in this case the government of his state will often be administered by the English until his successor—if a minor—be of age; or some successor will be at once placed upon the throne.

The most important native states—some of which have been made the subject of separate treatment in this work—are Cashmir, in the far north; Nepal, along the slopes of the Himalaya; Baroda, in the northern part of the Bombay presidency; the dominions of Holkar and of Sindia in Central India; of the Nizam of Hyderabad in the Central Deccan; of Mysore, in the midst of the Madras presidency; and of Travancore and Cochin at the extreme south of the peninsula.

In some of these states missionary operations are carried on successfully. This is notably the case with Travancore and Cochin; also with Mysore. In others the degree of independent action which the chieftain or prince is suffered to exercise, united with the fact that these princes are usually Hindus or Mohammedans who consider themselves set, as it were, for the defence of their respective faiths, is sufficient to prevent any large and effective exercise of evangelistic agencies. Of late years, however, the more important native states have become more and more tolerant. Missions have within recent years been begun in several of them, and though very discreet and cautious conduct is necessary on the part of the missionaries, their work is yearly becoming more secure and influential. Often some of the smaller states will be found the most backward, the most difficult to enter, and the most impervious to all new influences of enlightenment.

**Navuloa**, on the Fiji Islands, Polynesia, has a training institution under the Wesleyan Methodist Missionary Society. From it in 1875 nine young men of Navuloa went to New Britain to carry the gospel. In 1889 four students came to the institute from New Britain—one result of the labors of the nine Navuloans. In the district there are 5,000 local preachers and 28,000 full members.

**Nazareth**.—1. Town in Palestine, 65 miles north of Jerusalem. It is beautifully situated in a valley surrounded by hills on all sides. The houses are mostly well built of stone. The popu-

lation has a more prosperous appearance than in most parts of the country, and the women of Nazareth are famous for their beauty. Population, 4,000, Greek Catholics, Moslems, Latins, Maronites. Mission station of C. M. S.; 1 missionary and wife, 1 native pastor, 12 helpers, 8 schools, 365 scholars. Edinburgh Medical Mission; 1 physician.—2. A town on the island of Jamaica, West Indies, near Fairfield. One of the most healthy locations on the whole island, and is much used as a sanitarium by missionaries whose health has been impaired by residence in the lower and less healthy stations. Mission station of the Moravians before 1838; an out-station of Fairfield, but now has a large and flourishing congregation under one missionary and his wife.—3. District in Madras, India, which contains 44 villages. Climate tropical. Hindus, Moslems, demon-worshippers. Language, Tamil. Mission station S. P. G. (1798); 2 missionaries, 1 missionary's wife, 1 other lady, 145 native helpers, 1,698 communicants, 35 schools, 1,484 scholars.—4. A town in South Transvaal, Africa. Mission station of the Hermannsburg Missionary Society, with 136 members.

**Neemuch**, a town of the Indore State, Central Provinces, India, near Mhow and Indore. Mission station of the Presbyterian Church in Canada; 1 missionary and wife, 2 female missionaries, 1 Anglo-vernacular school.

**Neesima, Joseph Hardy**, b. Japan, February, 1844,—ten years before Commodore Perry's fleet awaited in the Bay of Yeddo the opening of Japan to the world. When in his teens, having never seen a Christian nor heard of the gospel, Neesima had some conviction of His presence who is not far from any one, and of the vanity of idols. When he met in a Chinese book the words, "In the beginning God created the heaven and the earth," he said: "This is the God for whom I am looking;" "This is the true God," and secretly determined to know more of that God, even if he left all to find him. These words from the Bible as he understood were brought by an American, and to America he must go. To leave his country was unlawful, and punishable with death. But this he risked, concealed himself among some produce in a boat, and reached Shanghai and ultimately America, working his way as a sailor. A prayer, which he committed to paper, after an Oriental usage, shows his state of mind. It was: "O God, if Thou hast got eyes, please look upon me. O God, if Thou hast got ears, please hear for me. I wish heartily to read the Bible, and I wish to be civilized with the Bible." The owner of the vessel in which he sailed was the late Hon. Alpheus Hardy of Boston, who, on his reaching America, received him into his family, and provided for his education, giving him nine years in Phillips Academy, Amherst College, and Andover Theological Seminary. The elevation of his countrymen became his absorbing purpose.

While in his course of study, the Japanese Embassy that visited this country and Europe in 1871, to observe the condition of education in western countries, summoned Mr. Neesima to act as its interpreter. He replied that he was an outlaw from his country, and was subject to no ruler save the King of kings. He thereupon received formal pardon for leaving his country. He visited with the embassy the principal colleges and universities of the United

States, Canada, and Europe: Not only was he thus brought into close and friendly relations with Japanese officials of high character and position and of enlarged views, but his wish to devote his life to the Christian education of his countrymen was greatly strengthened. He was ordained, September 24th, 1874, in Mount Vernon Church, Boston. In response to his modest but moving plea at the meeting of the American Board in Rutland, nearly \$4,000 were pledged for the school which he proposed to establish in Japan. After ten years' absence, he arrived in his native land, in November, 1874, "cherishing," as he says, "in my bosom this one great purpose, i.e., the founding of an institution, in which the Christian principles of faith in God, love of truth, and benevolence towards one's fellow-men" should "train up not only men of science and learning, but men of conscientiousness and sincerity." In the following January, Mr. Neesima writes in a paper prepared by him, and published simultaneously, November 10th, 1888, in twenty of the leading periodicals of Japan, "I met Mr. Kido, counsellor to the cabinet, and told him of my purpose, who approved of it, and gave me much aid. I also received much aid from Mr. Tanika, minister of education, and from Mr. Makimura, governor of the Kyoto Fu. On November 8th, 1875, I opened the school in Kyoto, which was the beginning of the present Doshisha College. There were only six pupils in a room little better than a shed. Against much prejudice on the part of the people the school won its way." Mr. Neesima employed foreign teachers, himself taught daily classes in philosophy and theology, acted in person in all the critical relations of the school with the government, where his utmost wisdom, patience, and skill were often taxed. With the teachers he was courteous adviser, mediator, and friend; with the students, as a father or elder brother. In ten years there were two hundred and thirty pupils in commodious buildings. He was almost equally interested in evangelistic work, planning for its extension, and preaching wherever he went. A remarkable revival occurred in the Doshisha in 1884, during which the strain upon his health was such as obliged him to leave the country for a while. "My heart burns," he wrote, "for Japan, and I cannot check it." He revisited the United States in 1885. On returning to Japan in 1886, he formed a plan for the enlargement of the Doshisha, so that it might have the rank of a university. Not in any wise concealing his purpose to make it a Christian institution, he yet appealed for aid to the non-Christian statesmen and influential men of Japan. He so won their confidence that he secured contributions from those in high social and official positions amounting to nearly \$60,000, and also the gift of \$100,000 from an American gentleman for the same purpose. In 1889 he received from Amherst College the degree of Doctor of Laws.

In the fall of 1889 he was in Tokyo working to interest leading men at the capital, and secure funds for his enlarged plans. He took a severe cold, and, renewing his efforts too soon, was prostrated. His wife and other friends were summoned, and pastors, teachers, and students flocked from east and west to catch some farewell word. Maps were brought at his request to his bedside, and eagerly, almost

with dying breath, he pointed out places which ought at once to be filled by the Christian teacher. He passed away, January 23d, 1890, saying, "Peace." "Joy," "Heaven." A booth capable of holding three thousand persons had to be built to accommodate the crowds who came to his funeral. All classes united to show him respect. The governor, the chief-justice for the district, and many other officials were present. The students from one government school and one private school were in the procession. One banner from Tokyo was inscribed with one of Mr. Neesima's own sentences: "Free education and self-governing churches: if these go together, the country will stand for all generations." Another was inscribed, "From the Buddhists of Osaka."

**Negapatam** (Nagapatnam), Snake-town, city and port in Madras, India, on the Bay of Bengal, 162 miles southeast of Madras city. It is a large, irregularly built place, containing many fine public buildings. Climate healthy, 66° F. in shade. Population, 53,855, Hindus, Moslems, Christians. Mission station S. P. G. (1835); 1 missionary, 4 native helpers, 3 schools, 93 scholars. Wesleyan Methodist Missionary Society; 1 missionary, 63 native helpers, 2 out-stations, 87 church-members, 16 schools, 942 scholars, 1 college. Evangelical Lutheran Society of Leipsic (1864); 150 communicants, 5 schools, 121 scholars.

**Negombo**, a town on the west coast of Ceylon, 20 miles north of Colombo. Mission station S. P. G.; 1 missionary, 10 native helpers, 5 out-stations, 4 churches, 4 schools, 216 scholars. Wesleyan Methodist station of Tamil Mission; 4 church-members, 1 school, 52 scholars.

**Negro Race.**—Much ignorance and confusion attend the use of the word Negro, and there is much trouble in properly classifying the race. In its widest sense the term is applied to those sections of the human race who have black or distinctly dark skins as opposed to those who have yellow or brown complexions. In this somewhat ill-defined use it designates the inhabitants (1) of Africa south of the Sahara, (2) of the peninsula of India south of the Indo-Gangetic plains, (3) of Malaysia and the greater part of Australasia. In this wide dispersion the peculiar characteristics of the pure Negro have been modified by contact with the Mongol on one side and the Caucasian on the other.\*

In a more restricted sense, the Negro race includes two classes: the true Negro of African type, and the Papuan or Melanesian type.

**I. African Negro.**—While it is true that all Negroes of this class are Africans, it is not true that all Africans are Negroes, and the two terms should not be used synonymously. The geographical distribution of the true Negro race includes all of the West Coast lying along the Niger, the Senegal, and Gambia rivers, and the country between them, together with parts of the Soudan. This area is thus a thin belt of territory along the centre of Africa, not all of which is inhabited solely by Negroes, and forms but a very small part of the whole continent. Here and there, scattered through other sec-

\* In the preparation of this article use has been made of the "History of the Negro Race in America" by G. W. Williams.

tious, especially to the south, occasional tribes of Negroes may be met with, but the limits above given are in the main correct. The home of the race in its purity is in the district between the Volta and Niger, the Kong Mountains and the coast, where are found the Negro kingdoms of Benin, Dahomey, and Yoruba, while just west of the Volta is Ashanti. Different tribes are found throughout this whole territory, such as the Jolofs and Mandingoes in Senegambia, the Susu on the Rio Pongas, the Temne inland from Lagos, the Ibo on the Lower Niger, the Hausa north of the Niger confluence, besides the tribes about Lake Tchad and in the parts about Darfur.

*History.*—It is the generally accepted opinion that the Negroes were the aborigines; or, at least, the first settlers in the region they occupy. If, as seems plausible, they belong to some branch of the Hamitic family, the indications are that they were among the first to come from Asia into Africa. The Bantu race followed, crowding the Negro to the south and west, and pushing the Hottentot Bushmen ahead until the three divisions of the African races occupied their respective localities as now defined. Within these limits, however, the negroes have been subject to much unrest and change. The slave trade diminished their numbers, and in later years the return of the descendants of former slaves has perhaps modified in a slight degree their racial characteristics.

*Racial Characteristics.*—*Physical.*—The true Negro is marked by an unusual length of arm; projecting jaws; small brain; black eye; flat, short nose; thick, red, protruding lips; thickness of skull; weak legs, prehensile great toe, and projecting heel; black or brown skin, thick and velvety, with a strong odor; and short, woolly hair.

*Mental.*—In their native home the race is regarded as naturally inferior in mental development to many of the races of the world. The possibilities of development are affirmed and denied by writers of equal weight. In the aboriginal state the Negro is a mere savage. His nature is sunny and childlike; inordinately susceptible to flattery, he can easily be influenced. While rendered cruel by the lust for gold, he is naturally gentle. He appreciates the beautiful, and is fond of songs and mirth. The victim of gross superstition, he retains the belief in a supreme being. He is indolent, slothful, and improvident; if his animal wants are satisfied, he is content. He knows how to conceal his real feelings, and can be an enigma hard to solve if he so chooses.

He responds quickly to kindness, and will prove his gratitude by great devotion. Morally, his standard is very low. Polygamy is practised, and marriage ties are almost unknown. The women are the slaves of the men, and in Dahomey are cruel and bloodthirsty soldiers. Cannibalism is sometimes indulged in, and human sacrifices have been offered to the fetich objects of their worship, some of which are most hideous (see Fetichism). Some of the tribes have a great degree of skill in the arts of life and in the manufactures. Buildings, manufactures in iron and other metals, clothes made of skins,—all show a degree of civilization which is proof of the capabilities of the race. Mungo Park found Sego, the capital of Bambasa, a city of 30,000 people, with two-story houses, containing mosques in every quarter, with ferries over the

Niger for men and beasts. To sum up, in the words of Dr. Cust: "Many great races in ancient times have had their day of greatness, exhausted the power that was in them, and have been completely broken up, trodden down, or utterly effaced by younger and more powerful races. But this cannot be said of the Negro race; they are not broken, fewer in number, or poorer in resources: though pressed upon from without, they have proved to be the only race suitable to the climate. Their soil is wonderfully fertile, their minerals abundant, their power of reproduction exceeding calculation. We know now from the instances of men who have had the advantages of culture, that they are not deficient in intelligence, probity, and even genius, yet they have left absolutely not a monument to tell of the material greatness of any particular tribe, or of any ancient civilization, as in Central America and Asia; not a written or sculptured document; they have but a scant store of proverbs and traditions."

*Language.*—The zone occupied by the Negro presents a greater diversity of tongue than is to be found elsewhere in the world, except perhaps in parts of America, in Melanesia, or Caucasasia. In the Cust-Müller classification of African languages the Negro is one of six divisions, and in it are included four sub-classes such as the Atlantic, Niger, Central, and Nile; in the entire group 195 languages are recognized, and 49 dialects. They belong to the agglutinating type, and are often characterized by an intricacy of structure and delicate alliterativeness. The Grebo language on the coast of northern Guinea is monosyllabic, and is spoken with great rapidity. The Mandingo language, spoken in Senegal and Gambia, is a smooth tongue, with a predominance of vowels, and a remarkable minuteness in defining the time of an action.

*Missions.*—In the latter part of the 15th century Roman Catholicism was propagated in Benia by the Society of Jesus, but its hold on the people was soon relaxed. Protestant missions were commenced by the Moravian Brethren on the Gold Coast in 1736, but on account of the unhealthfulness of the climate the field was abandoned after thirty years of patient labor. The Church Missionary Society commenced their work in West Africa, and now have missions in Sierra Leone (q. v.), together with a strong native church. In Yoruba their work was commenced in 1843, and the stations and the date of their occupancy are: Badagry, 1845; Abeokuta, 1846; Ibadan, Lagos, Ota, 1852; Leke, 1875; Ode Ondo, 1876. The Niger Mission was commenced in 1857, and the stations are Onitsha, Lokoja, Bonny, Brass, Asaba, Kipo Hill, Gyebe, Okrika, and Ida.

The Wesleyan Methodist Missionary Society soon followed the C. M. S., and have now four missions among the Negroes: Sierra Leone, with 10 stations; Gambia, 4 stations; Lagos and Yoruba Mission; and the Gold Coast, 7 stations. Numerous other societies have also conducted missions among them, for an account of which see article on Africa, under Slave Coast. In the interior very little work has so far been attempted.

*II. Papuan Negro.*—The name Papua is a Malay term meaning "frizzled," and points at once to the mark which distinguishes the frizzly-haired Negro from the straight-haired Malay. The purest type of the Papuan is found on the western part of the island of New Guinea or

Papua, but their influence is felt throughout the whole of Melanesia and parts of Polynesia, where they mingle and amalgamate with the Malay or Mongoloid race. In the words of Mr. Wallace: "The Papuans are well-made, have regular features, intelligent black eyes, small white teeth, curly hair, thick lips and large mouth, the nose is sharp but flat beneath, the nostrils large, and the skin dark brown." The Polynesians are considered by some ethnologists as differing in no fundamental particular from the Papuans, while others class them with the Malay, as an intermediate type between the Malay and the Negro.

In their temperament and customs the Papuans show many traits similar to those of the African Negro. Their belief in sorcery, their superstitious in regard to bits of wood and stone as causes of disease, their easy-going, listless life, light-hearted and boisterous moods, all point to similarity of origin. In their architecture, rude as it is, they follow the Malay fashion of building on piles. They show a great degree of skill in agriculture. The men build the houses, hunt, and fish, leaving the heavier work to be done by the women. The latter are more modest than the rest of the Polynesian races. The Papuan languages form a class by themselves, differing widely from the Malayo-Polynesian languages. (See Papua.)

**III. Mixed Races.**—The slave-trade has scattered the Negro race throughout the globe. In most countries of the eastern hemisphere they do not assimilate. The Negro is lost in the general population, and although a trace of black blood is seen in Morocco, in Arabia, Malabar, and Ceylon, and in the various races lying between India and New Guinea, where the Papuan type is met with, they have left no distinctive mark, and no statistics are available to indicate the number of Negroes, or the proportion of the population which they form.

The degree of intermingling which has gone on in the western hemisphere has given rise to many mixed races, with more or less of Negro blood in them. The terms Creole, Quadroon, Octoroon, or Mulatto are well known and generally understood, but there are other less common terms, such as: *Mestizo*, half-breed, of either white and Negro, or Indian and Negro; *Creole*, in addition to the common meaning of one born in Spanish America, of European parents, is also applied in Peru to the children of *Mestizoes*; *Zambo*, half-breed, but usually the issue of Negro and Indian, or Negro and Mulatto; *Zambo Preto*, progeny of Negro father and Zambo mother. In the South American countries these terms are multiplied until almost every shade of mixture has its appropriate term.

Though the slave-trade is carried on in a few places still, yet practically slavery is extinct, and the many Negroes who are in the countries to which they have been taken as slaves are now freedmen.

**The Negro in America.**—1. *In the United States.*—From the time of the first arrival of Negroes as slaves in the colony of Virginia in 1619 till the Emancipation Act in 1865, Negro slavery has been identified with and has greatly influenced the history of the nation. The final solution of the great question of slavery left the country with a greater question confronting it, which is called the Negro Question. During the first half of the present century the number

of Negroes brought to the United States was from 60,000 to 70,000 annually, and the number multiplied until in 1880 the Negro or colored element numbered 6,581,000, or 13 per cent of the whole population. Comparatively few of this number are of unmixed blood, while many retain but a trace of Negro origin, and are in their mental and physical characteristics almost entirely Caucasian. In the Southern States, the purer type of Negro is found, and they exhibit the same characteristics already described. A jovial, light-hearted race, fond of a laugh, living only in the present, contented with mere animal pleasures, full of superstition which in some has taken the form of religious fervor, not strict in their ideas as to the rights of property, possessing a low order of cunning rather than intelligence, full of moral sentiment and lofty emotions, but prone to immoral actions and low crimes; fearing the Voodoo woman with her fetiches, and yet shouting amen in Christian services with much unction—the Negro, as modified by his environment in the United States, presents a mixture of good and evil, of childlike simplicity and shallow cunning, of deep feeling and weak character, of hopelessness and of possibility, which may well stagger the faith and try the patience of those who are trying to educate and Christianize him. Notable instances of full-blooded Negroes there are who have shown an intelligence, a strength of mind and executive ability, a steadfast faith and upright life, equal to that of the Caucasian; and these instances, when viewed in connection with their as yet meagre opportunities, may fairly be placed in comparison with the great majority which seem to give weight to the opinion that the Negro is mentally and morally inferior to and can never be on an equality with the white race which surrounds him.

It has been suggested that the Negro is not so much immoral as non-moral, for there seems to be such a lack of the perception of right and wrong that a Negro will stop on his way to or from a prayer-meeting, at which he takes a fervid part, to lift a chicken from a neighbor's hen-roost. The Rev. Dr. Tucker, at the American Church Congress in 1883, brought out this side of the American Negro character when he spoke of Negro missionaries who were earnest and successful, unconscious of hypocrisy, but who were guilty of lives of the grossest immorality, were addicted to lying and thieving, and yet were respected and heeded by their flocks.

The Negro question is looked at in two distinct ways, not only by the politician but by the Christian, and the difference is due mainly to presence or absence of perspective. By those who live away from the daily contact with the Negro, who look at him idealized, as a man entitled to the rights of men, to all the privileges of citizenship, and to all the yearning love which a fallen image of God should excite in the Christian heart, the practical difficulties in the way of civilizing, Christianizing, and elevating the Negro to the lauded plane of equality are oftentimes overlooked, and theory takes the place of practice, sentiment of common-sense, and faith and hope overpower "works." To those who live among the Negroes, who daily see the deficiencies in their character, in their capabilities, in their morals, there is an absence of perspective, and they take the other extreme view, that there is little that can be done for them, that liberty and

equality should for some time, at least, be mere words without any practical meaning so far as they are concerned. This is not only true of upright and honorable men who are not distinctively Christian, but men who are anxious to save the souls of the Negroes are just as averse as their political neighbors to contact with Negroes on terms of equality, or to recognition of their political rights. Among the men who are ready to keep the Negro from the polls by violence if necessary, are men who are active in Christian work; (this the writer knows from actual conversation with such a one). Between these two widely divergent views of the Negro there is, without doubt, as in all things, a middle ground, and to that men the opinion of wise men is turning; but as yet it cannot be clearly defined, nor is the question yet solved.

While the political part of the Negro question is taxing the thought of the statesmen, the Church is doing her part to aid in the solution. (See article on United States.) In addition to the missionary work of the different churches, and that of the American Missionary Association (q.v.), there is a large and flourishing church among the Negroes themselves. The African Methodist Episcopal Church was organized in 1816, and in 1880 it had a total membership of over 400,000, and supported a missionary society which was organized in 1844 as the Parent Home and Foreign Missionary Society. In 1888 nearly 800 missionaries were engaged in the home work of the church, though it has been only within the last ten years that any successful mission has been established in foreign lands. (See article African Methodist Episcopal Church.) In addition to their own church, the Negroes form fifteen conferences of the Methodist Episcopal Church (South). Of the Baptists, a large proportion in the Southern States are Negroes, and many of the ministers have been men of great power and of great zeal in religious life.

2. *In Mexico.*—It is difficult to calculate the number of Negroes in Mexico, for there the mixture is so blended that Negro ancestry is hard to trace. Of the population of nearly 10,000,000, the Negro element is put at 60,000, and by the constitution of 1824 all distinctions of race were abolished, and they are virtually amalgamated with the rest of the people. About 43 per cent of the people are of mixed race, Negroes and Indians.

3. *Central America.*—The number of the colored or Negro population in Central America has been estimated at 50,000. In this section of the country intermingling with the Indians and other races is very great, and there is little social distinction between them.

4. *South America.*—Brazil was the last country in America to abolish slavery. In 1850 the slaves were estimated at 2,500,000; in 1887 the slaves were given on the official returns as numbering 723,419, and by a law passed in 1888 slavery was abolished. The Negroes are found principally in the provinces of Pernambuco, Bahia, Rio de Janeiro, and Minas, and according to the census of 1872 numbered 1,951,452. In the other countries of South America the Negroes are so mixed with the other races (as in Peru), or form so small an element in the population, that no definite statement as to their numbers can be attempted.

5. *West Indies.*—The number of Negroes in

the West Indies is about 3,000,000. Slavery was abolished in the British West Indies in 1834, in the French possessions in 1848, and in Cuba in 1886. (See article West Indies).

The vitality of the race is surprising and is unaltered by their location, except when they leave the tropics or sub-tropics. The farther north they go, the greater the mortality, and their stability as a race, in constitution and numbers, depends upon the restriction of their habitation to the warm climates.

**Nellore.**—1. The capital of a district of the same name, Madras, India, stands on the Tenner, and has been since 1840 a station of the A. B. M. U.; 5 out-stations, 3 missionaries, 10 native preachers, 2 churches, 605 church-members, 5 Sunday-schools, 165 scholars, 7 day-schools, 217 pupils. Out-station of the mission of Free Church of Scotland at Madras (q.v.).—2. A pastorate in the Jaffna district of the C. M. S. Mission in Ceylon (1818), where there are 557 communicants, in the 4 pastorates. A girls' boarding-school at Nellore has an attendance of 54, of whom 39 are Christians. There is 1 married missionary.

**Nembe,** an inland town in the Niger Valley, West Africa, 55 miles from the sea, and 1,500 miles from Sierra Leone. Climate humid; quite unhealthy for foreigners. Population, 10,000 of mixed races, principally Ijo. Language, Ijo. Brass dialect. Religion, seven eighths heathen. Social condition very degraded. Government, hereditary monarchy. Political condition very distressing. Mission station of the Church Missionary Society (1876); 1 unordained missionary, 1 church, 283 church-members. 1 school, 78 scholars.

In 1876 King Arkija surrendered his idols and built a church. His children were educated by the missionaries, and he was baptized and gave up polygamy. He died in 1879. Since that time Christianity is speedily spreading, and, as a rule, the chiefs of the households come to the church. Nevertheless in 1885 one instance of cannibalism occurred.

**Nepal,** independent kingdom, lying along the southern slopes of the Himalayas, in North India; it is not one of the so-called "protected" or feudatory states, ruled by its own chieftain, but supervised by British officials, and so practically a part of British India; but it is still independent, under its own sovereign, and though there are treaty stipulations between its government and that of British India, it is outside of the immediate circle of British influence. To the north its territory extends up the sides of the Himalayan range until it meets that of Tibet along an unsurveyed and indefinite frontier. Its southern boundary is usually about 30 miles from the foot of the Himalayas. On the west a small stream separates it from the sub-Himalayan British province of Kumaon; and its eastern limit is the small mountain state of Sikkim, north of Calcutta. Its greatest length northwest and southeast is 512 miles; its breadth varies from 70 to 150 miles. The total area has been computed at about 54,000 square miles. No census of population has ever been taken. The Nepalese estimate is about 5,500,000; the soberer, and probably more correct, opinion of Anglo-Indian officials places the population at 2,000,000. There are many aboriginal tribes in Nepal, most of whom seem to

be of Tartar or Chinese origin. But the regnant tribe is that of the Gurkhas, who are descended from the Rajputs of Northwestern India, and who migrated in the 12th century from the original home of their people during the early ascendancy of one of the invading Mussulman dynasties. In process of time they intermarried largely with the women of the mountain tribes where they took up their new abodes, though still adhering tenaciously to the Hindu religion. Most of these aboriginal tribes are Buddhists, but Buddhism is gradually disappearing before the stronger Hinduism of the ruling race. Rice is the staple food of the people. The highest known mountain in the world,—Mt. Everest, 29,002 ft. high,—as well as many Himalayan peaks inferior only to that, lie within the limits of Nepalese territory. Since the subjugation of the country by the Gurkha dynasty, several bloody revolutions, marked by the true Oriental features of assassination and usurpation, have occurred. The last was in 1885, when the prime-minister and two other prominent men were murdered by the head of a rival faction. The murderer at once made himself prime-minister. Violent as the revolution was, it was considered a probable step towards much-needed reforms within the kingdom. Nepal has never been open to the entrance of Europeans, though the Indian Government has usually maintained a resident there. Accordingly missionary operations have not yet been begun. The capital is Khatmandu, north latitude  $27^{\circ} 42'$ , east longitude  $85^{\circ} 12'$ . Population supposed to be about 50,000.

**Nepali Version.**—The Nepali belongs to the Indic branch of the Aryan family of languages, and is spoken in the kingdom of Nepal. A translation of the New Testament into this language was made by Serampore missionaries, and published at Serampore in 1821. This version has never been reprinted. A new translation was undertaken by Rev. W. Starb, and the Gospel of Luke and the Acts were published at Calcutta in 1850, 1871, and 1877. Of the translations made by Scotch missionaries at Darjeeling, Genesis, Exodus, Proverbs, the Gospels, and Acts have been published.

(*Specimen verse.* John 3 : 16.)

क्याहा ईश्वरले दुनियालाई एको पिपारो गम्या कि उनले बाइन  
रक्षपेदा होएलाई दियो कि जो हरेक मानिस उम्मापो पिथ्यास  
गईदन् सो नाश न होवन् तर अनन्तनिन्दो पाउन । :

**Nestorians**, a people living in the mountains of the Perso-Turkish frontier and on the plain of Oroomiah in Northwestern Persia. They are akin to the Jacobites of Eastern Turkey and Mesopotamia, and are sometimes spoken of as the Assyrian Christians. (See articles Persia; A. B. C. F. M.; Presbyterian Board (North); Archbishop's Mission; Historical Geography of Missions; and China.)

**Netherlands Missionary Society.** Headquarters, Rotterdam, Holland.—The Netherlands Missionary Society was established in December, 1797, at Rotterdam, Holland, through the influence of Dr. Vanderkemp, a celebrated missionary of the London Missionary Society to South Africa. On a visit to his home he translated into Dutch and published

an address to the religious people of Holland, which led to the establishment of the Society. The members are confined almost entirely to the Established Church. The General Synod, however, has no control over the missionaries or the funds collected, yet the missionaries sent out are examined and ordained by a committee of ministers appointed by the General Synod. The Society is supported by regular subscriptions, donations, and legacies. A body of directors, both lay and clerical, is annually appointed from among the subscribers to control the affairs of the Society. The Society has a college of its own for the preparation of candidates for the missionary work, a large number of whom are not Dutch, but German and Swiss. For a time the funds of the Society did not permit the sending out of missionaries, but were expended in home work, especially in publication, the establishment of Sunday-schools, etc. In the year 1800 they began to turn their attention more especially to foreign lands. Their funds increased rapidly, and numbers of young men offered their services. Political complications, however, at that time rendered it wiser for them to enter into a friendly agreement with the L. M. S., by which missionaries supported by the N. M. S. were under the general direction of the L. M. S. The first missionaries, Vos, Erhardt, and Palm, were sent to Ceylon, but they were unable to accomplish very much in that field, owing perhaps to the hostility of the Dutch Consistory of the island. In 1812 three missionaries, Kam, Supper, and Bruckner, were sent to Java. Mr. Kam established himself at Amboyna, in the Molucca Islands, Mr. Bruckner at Samarang, and Mr. Supper at Batavia. Two years later, Holland having regained its independence from France, the N. M. S. commenced its operations independently, reorganized the seminary, and sent out five missionaries to work with Mr. Kam. These established themselves at Celebes, Ceram, Ternati, Banda, and Timor, and found abundant opportunity for labor. In 1833 Mr. Kam, who had endured much exposure in his efforts to travel from island to island, and had been often employed, even by the government, as a peacemaker among the tribes, died from the effects of overwork. In 1826 the same Society sent out Mr. Gutzlaff to China (see biographical sketch). A mission was also established at the Dutch colony of Surinam in Guiana, and Alphonse F. Lacroix was sent to the Dutch territory in India (see biographical sketch). When in 1825 the Dutch settlements on the continent of India were ceded to the Dutch Government, their four missionaries connected themselves with the different English societies, thinking it better not to render their time and labor and knowledge of the languages of the people of no avail. At present the N. M. S. carries on its work in Java, Amboyna, and Celebes, and reports 18 missionaries, 184 native workers, 136 schools, with 20,000 communicants.

**Nevis**, one of the Leeward Islands, West Indies, is a colony of Great Britain. Area, 50 square miles. Population (1881) 11,864. Formerly a station of the Wesleyan Methodist Missionary Society. It is now under the care of the West Indian Conference. Congregations of the Anglican and Moravian churches are also the fruit of former missionary labors.

**New Calabar**, town in West Africa, in the valley of the Lower Niger, on the Bight of Biafra. Climate mild, somewhat unhealthy. Population, 12,000. Race and language, Ibo. Religion, Fetichism. Government, native kingdom. Mission station of the C. M. S.; 1 missionary and wife, 1 church, 1 out-station.

**New Caledonia**, together with its dependency, the Loyalty Islands, is a French penal colony, lying about 720 miles northeast of Australia, in latitude 20°-22° 30' south, and longitude 164°-167° east. It is 200 miles long, 30 broad, with an area of 6,000 square miles, and a population (1887) of 62,752; 41,874 natives; the remainder are colonists, soldiers, and convicts. The natives belong to or resemble the Papuans. The Roman Catholics have established missions at various points on the island, but so far no Protestant work has been commenced. It was occupied by the French in 1853, and has been a penal settlement since 1872.

**Newchwang**, called also Ying-tze, one of the treaty ports of China, in the Manchurian province Shing-king, is situated on a branch of the Lian-ho, 35 miles from the Gulf of Lian-tung. The real port is Ying-tze, farther down the river, to which the name of Newchwang is also applied. The port is closed by ice for four or five months in the year. The product of pulse (beans) is the principal export. Population, 60,000. Mission station of the Irish Presbyterian Church (1868); 4 missionaries and wives, 1 female missionary, 12 native helpers, 6 out-stations, 76 church-members, 1 school, 11 scholars. United Presbyterian Church of Scotland; 1 missionary works in harmony and union with the Irish Presbyterian Mission.

**Newell, Samuel**, b. Durham, Me., U. S. A., July 24th, 1784; graduated at Harvard College and Andover Seminary; one of those whose memorial called the American Board into existence. He married Harriet Atwood, and sailed February 19th, 1812, as a missionary of the American Board for Calcutta. Forbidden by the East India Company to remain in its territory, he sailed with his wife for Mauritius to establish a mission for that island and Madagascar. After a long and perilous voyage they reached Port Louis, where Mrs. Newell died soon after their arrival. Mr. Newell went to Ceylon, the opening there for a mission being favorable; but in January, 1814, he joined his brethren Hall and Nott at Bombay. He died of cholera May 30th, 1821, being violently attacked while ministering to the sick, and was buried in the English cemetery. He was greatly endeared to the friends of missions by his devotedness and his peculiarly amiable character.

**New England Company**. Headquarters, 1 Fumival's Inn, Holborn, London, E. C., England.—In the early part of the 17th century the English colonists of New England, headed by the renowned John Eliot, "the Apostle to the North American Red Men," began the work amongst the Indians which laid the foundations for the New England Company. The accounts of the work among the Red Men, circulated throughout London in writings called "tracts," aroused so much interest in the great city that the needs of the Indians were brought before Parliament, and on July 27th, 1649, an Act was passed with this title: "A Corporation for the Promoting and

Propagating the Gospel of Jesus Christ in New England." In this Act was recognized the necessity of work amongst the Indians for the purposes of evangelization and civilization, and provision was made for the expenditure involved in the furtherance of such work. The Ordinance enacted that there should be a Corporation in England consisting of a president, treasurer, and fourteen assistants, and invested the Corporation with power to acquire lands, goods, and money.

*History*.—Soon after the action of Parliament and the appointment of the members of the Corporation, a general subscription was directed by Cromwell, the Lord Protector, and nearly £12,000 was raised for the purposes of the Corporation. Commissioners and a treasurer were appointed in New England, and work was carried on by itinerant missionaries and school-teachers, chiefly near Boston. On the restoration of Charles II. in 1660, the Corporation created by the Long Parliament became defunct, but through the efforts of the Hon. Robert Bryle a new charter was granted by the king. This charter was completed in 1662. By it the Company was limited to forty-five members; the first forty-five named; the object defined; the name decided as "The Company for the Propagation of the Gospel in New England and the parts adjacent in America;" the duties and powers of the officers defined; and in fact the complete constitution was made and adopted.

The work progressed in the New England states until the outbreak of the War of American Independence, when the Company was obliged to cease its labors there. The field was therefore transferred to New Brunswick, but after a fair attempt was found unprofitable, and was again changed to British America, where since 1822 the work has been permanently maintained.

*Present Work*.—The funds of the Company are derived from three sources, the original charter fund and two legacies. The money coming from two of these sources may be used only for work amongst the American Indians and work in American dependencies of the British crown, while that from the third may be used for spreading the gospel in any British colonies. The work carried on now by the Company is evangelistic and educational amongst the Indian tribes of Canada and British America. Between the years 1823 and 1840 large sums were contributed toward aiding the Missions in the West Indies, but the increase of the work in North America of late years has necessitated the withdrawal of funds from that quarter, and all have been devoted to the missions of the Company. The principal stations at the present time are:

1. Among the Mohawks, Oneidas, Onondagas, Cayugas, Senecas, and Tuscaroras, settled on the banks of the Grand River between Brantford and Lake Erie.
2. Among the Missasaguas of Chemong or Mud Lake and Rice Lake, in the county of Peterborough, Ontario.
3. On the banks of the Garden River in the district of Algoma, near the rapids between Lake Superior and Lake Huron.
4. On Kuper Island in the Strait of Georgia, British Columbia.

**New Fairfield**, a town among the Delaware Indians, Ontario, Canada. The oldest

station of the Moravian Brethren in this region (1792); 2 missionaries and wives.

**Newfield**, a mission station of the Moravians in Antigua, West Indies. It was opened in 1782, when the numbers of hearers at Gracehill increased so largely that it was impossible for the missionaries to exercise the needful supervision, or for the negroes to be accommodated. So it was very desirable to establish an out-station near by; and as the Moravian Brethren were too poor to do this, the planters gave them a grant of land, a considerable sum of money for building materials, much help in the way of lending them slaves who were skilled as masons and carpenters, and promised a yearly salary for a missionary, while the slaves gave all their leisure time to the work. Under these circumstances the station was begun, and is now continued under the care of a missionary and wife.

**Newfoundland**, a British North American colony, comprising an island of that name and the coast of Labrador from Blanc Sablon bay, at the west entrance to the Strait of Belle Isle, to Cape Chudleigh, at the east entrance of Hudson Strait, a distance of about 750 miles. The island lies at the mouth of the Gulf of St. Lawrence, and is separated from Labrador on the northwest by the Strait of Belle Isle, 12 miles wide, and is rugged and for the most part barren. The principal range of hills is the Long Range Mountains, which run in a northeast direction from Cape Ray to the Humber River, which with the Exploits, Terra Nova, and some other streams, are the principal rivers of Newfoundland, and are navigable by canoes or flats. The soil is not very productive, and poorly cultivated; but it is rich in minerals, and there are fine quarries of building stone and marble found. The climate, being tempered on the one hand by the Gulf Stream and on the other by the Arctic Current, is neither so cold in winter nor hot in summer as might be expected, but the weather is very variable; dense fogs are prevalent, and fierce and sudden gales render navigation along its coast dangerous, and bring into use the many good harbors which its rugged coast line affords. Population, in 1874, 161,455, chiefly made up of English and French colonists and a few Indians. The aborigines, a tribe of Indians called Beoths, are extinct. The chief occupations are fishing and trapping. Religion, Protestant and Roman Catholic. The executive power in Newfoundland is a governor appointed by the British crown, and a council of not more than 7 members appointed by the governor. The legislative power is vested in a council of not more than 15 members and a house of assembly of 31 members. The chief towns and commercial centres are St. Johns, the capital and emporium, on the southeast coast, Harbor Grace and Carbonear on Conception Bay.

**New Guinea**: see Papua.

**New Guinea Version**, or South Cape dialect.—This dialect belongs to the Melanesian languages and is vernacular at South Cape, New Guinea. A translation of the Gospel of Mark into this dialect, made by one of the teachers and revised by the missionaries, was published by the British and Foreign Bible Society at Sydney in 1885 under the care of the Rev. J. P. Sunderland.

**New Halle**, town in South Central Transvaal, East South Africa, southeast of Waterburg, northeast of Kana. Mission station of the Berlin Evangelical Lutheran Society (1873); 1 missionary, 7 other helpers, 11 out-stations, 506 church-members, 206 communicants.

**New Hanover**, a town in Natal, East South Africa, on a branch of the Umvoti River, north of Pietermaritzburg and south of Greytown. Mission station of the Hermannsburg Missionary Society.

**New Hebrides Islands**, a group in the South Pacific, part of Melanesia (q.v.), lying between latitude 21° and 15° south, and longitude 171° and 166° east, about 1,000 miles north of New Zealand, 400 miles west of Fiji, 200 miles east of New Caledonia, and 1,400 miles northeast of Sydney, Australia. There are about 30 islands of volcanic origin, mountainous, with wooded ridges and fertile valleys, nearly all of them inhabited. Santo, the largest and most northerly of the group, is especially beautiful and picturesque. The principal other islands are Aurora, Eromanga, Tanna, Fotuna, Aneityum, Pentecost, Mallicollo, Ambrim or Lopevi, and Efate or Vati. Lopevi has a conical volcano 5,000 feet high. Tanna has the mountain of Yoswa, the largest and most active volcano in the group. Cocoa-nuts and other magnificent trees grow in profusion, and the soil, like that of most volcanic islands, is very fertile, and fruits and vegetables are raised in abundance. A small group lies to the north of the above islands, and is called the Banks Islands or North New Hebrides. The population number perhaps 50,000, and belong in general to the Papuan race (q.v.). The general type is rather ugly: below the middle height, fairer than the typical Papuan, with low, receding foreheads, broad faces, and flat noses. Bracelets, ear-rings, and nose-rings made out of shells are very often their only clothing, though oil and red clay is smeared over the body in some of the islands. Kava, a kind of intoxicating drink made from the pepper-plant, is drunk by the men, but women and boys are not allowed to drink it. The characteristics and habits of the people differ greatly in the various islands; at Aneityum and most of the southern islands the people have become Christianized, while on some of the other islands cannibalism is prevalent. The languages of the islands are about twenty in number, and sometimes two or three are used on the same island, so that the missionaries laboring at opposite sides of the island are unable to use each other's books for their respective congregations. These languages are alike in grammatical construction, and belong to the Melanesian class. The natives are very superstitious, and worship idols. Large carved images are found in the north, while rude, uncarved stones of all shapes and sizes were the objects of worship in Aneityum and Tanna. The fear of the taboo prevails, and their sacred men are supposed to be able to bring rain, wind, disease, and death. The cruel, treacherous, and savage characteristics of the people,—who believe that strangers are the cause of storms, disease, and death,—the exigencies of the climate, and the utter remoteness from the world's traffic, unite to make the New Hebrides one of the most dangerous of all mission fields. Mission work is carried on in the main islands by the New Hebrides Mission. The Banks Islands are

visited by missionaries of the Melanesian Mission, with schools at Santa Maria and the other islands.

**New Hebrides Mission.**—This is a synodical union of missionaries of several different Presbyterian Boards carrying on mission-work in the New Hebrides Islands. **I. HISTORY.**—The New Hebrides Mission was begun in 1848 by a solitary missionary settled on the island of Aneityum, but the origin of the mission antedates that event by a good many years. The islands were named by Cook in 1774, though they had previously been discovered by Spanish sailors, who named Santo “Espiritu Santo;” and Bougainville, in 1768, had proved it to be but an island instead of a great southern continent, as the Spanish supposed. Cook’s “Narrative” of his voyage was the source of the great missionary zeal manifested at that time in England. William Carey (see biographical sketch) was anxious to go to Polynesia, but went to India. The L. M. S., which was formed through his influence (see article), sent its missionaries to the Tahiti and Samoan Islands. John Williams longed to extend the work to the New Hebrides, and expressed this desire as early as 1824 to the directors of the L. M. S. The United Presbyterian Church of Scotland (then the United Secession Church) placed £500 at his disposal to take the gospel to New Caledonia (q.v.) and the New Hebrides. His tragic death at Eromanga is part of the martyr history of the church, and the funds were used in Africa instead. Between that time and the arrival of Mr. Geddie (1839–1848) the missionary ship of the L. M. S. visited the islands several times, and left native Samoan teachers on some of them, many of whom suffered persecution and even death.

Since 1848 the mission work has been distinctively Presbyterian. In that year the Presbyterian Church of Nova Scotia sent out the Rev. John Geddie of Prince Edward’s Island. (See biographical sketch.) The United Secession Church made over to the Nova Scotian Church their claim to the South Seas, so this mission is the legitimate successor of the attempt of John Williams.

**II. DEVELOPMENT OF THE WORK.**—**1. Aneityum.**—This, the most southerly island of the group, was not visited by Cook, but he saw it from Tanna. It is very picturesque, and has a good harbor. The climate is somewhat humid, but in general agreeable, and, to those who exercise care, not unhealthy. It was visited as early as 1830, and soon after that became quite a resort for traders who sought sandalwood. Their ill-treatment by these traders had much to do with the hostility shown to strangers by the savages. The native teachers left by the L. M. S. ship “Camden” had to flee for their lives at one time, and were always in jeopardy, but they prepared the way for the work of Mr. Geddie when he arrived in 1848. Two years after his arrival, forty-five natives assembled for worship on the Sabbath, and the first convert afterwards went as missionary to Fotuna. In May, 1852, the first church was formed, and in July of that year Rev. John Inglis and wife arrived and shared the work. Mr. Geddie had labored at Anelgahat, on the south side of the island, but Mr. Inglis commenced work at Aname, on the north side, where he labored for twenty-three years. In

1854 there were 30 schools, and 2,600 people attended worship. Mr. Geddie translated and printed at Aneityum the Gospel of John, the Acts and the Epistles of Paul; the Gospel of Mark was printed at Sydney, and Luke was sent to England to be printed by the British and Foreign Bible Society. Mr. Inglis took the whole New Testament to England to be printed (see Aneityum Version). The history of the succeeding years at Aneityum is summed up in the inscription on the memorial tablet to Mr. Geddie in the church at Anelgahat: “When he landed in 1848 there were no Christians here, and when he died in 1872 there were no heathen.”

In 1872 Rev. J. D. Murray joined the mission, but was forced to leave it in 1876, on account of the health of his wife. Mr. Inglis left the station in 1877 after the arrival of a new missionary, but continued his work by superintending the publication of the Old Testament at London. So wise was he in counsel, so generous in friendship, liberal in help, pacific in manner, so trusted by all, and so charitable in his dealings with other missions, that his absence was much lamented, and his memory is ever living in the hearts of his people. He has since published attractive and interesting narratives of his work, which crown an able and honorable career as missionary for thirty years. The Rev. J. H. Lawrie, from Scotland, joined the mission in 1879, and after a furlough at the end of ten years is now at this post.

**2. Fotuna.**—The Rev. John Williams visited Fotuna, and succeeded in conciliating the natives, but his death prevented his carrying out his purpose to send teachers to them. Samoan teachers were left by the “Camden” in 1841, but they were killed and eaten or thrown in the sea two years later. Two Aneityumese were the pioneers from the work at Aneityum, and they were taken to this island by the “John Williams” in 1853. In the face of persecution, they stuck to their post, were joined later on by another teacher from Aneityum, and one from Rarotonga, and in 1866 the Rev. Joseph Copeland and his wife arrived at this island, where work has been carried on faithfully ever since, though it is still one of the most difficult fields. A medical mission has been established.

**3. Aniwa.**—In 1840 Christians from Samoa settled here as teachers, but little progress was made, and the arrival of reinforcements from Aneityum was the cause of an outburst of long-smouldering hatred on the part of the natives, who held a grudge against Aneityum on account of former cruel practices. The two Aneityumese teachers were attacked, and one was killed but the other escaped and fled to Aneityum. Other native teachers took up the work, undeterred by the fate of Nemeian, as the fallen teacher was called, and in 1866 the Rev. J. G. Paton found on his arrival that the people were in some measure prepared for his teachings. The mission house stands on a spot long used for cannibal feasts. After eight years of labor the island was completely Christianized.

**4. Tanna.**—The “lighthouse of the Southern Pacific,” as this island has been called, was a very hard and trying field, and the work here was accompanied with unusual disaster and death. John Williams’ native teachers had to flee, and Turner and Nesbit of the L. M. S. were also forced to escape for their lives in 1843. From that time till 1858 Samoan teachers repeat-

edly tried to introduce the gospel. Once in 1853 an outbreak of an epidemic of small-pox, carelessly introduced by a Californian ship, incensed the natives against foreigners, and the Samoan teacher with his family fled in an open boat to Aneityum. In 1854 the visit of a party of Tannese to Aneityum, where they noted with wonder the improvements of Christian civilization, gave a favorable turn to the work, for they requested teachers, and two were sent; many listened to their instruction and it seemed as though heathenism would be given up. But the recurrence of an epidemic led to the old superstitious fears of the baneful influence of the teachers, and for a time the lives of the teachers were in danger, but they remained faithfully at work. In 1858 Rev. John Paton and Rev. Mr. Copeland landed on the island; Rev. J. W. Matheson and the Rev. S. F. Johnston and wife joined them soon from Nova Scotia. In 1859 Mr. Copeland left to take Mr. Inglis' work in Aneityum, and within three years Messrs. Johnston and Matheson, Mrs. Paton and child, Mrs. Matheson and child, were dead, and Mr. Paton, distressingly ill himself, after passing through harrowing scenes of death and in peril from the natives, was forced to flee from the island. The Rev. Thomas Neilson resumed work here in 1868, and by his medical skill, and the exercise of common-sense and Scotch caution, he has been able to continue in the work, and encouraging results are seen.

5. *Eromanga*.—Not only by the blood of Williams was this mission field watered: it is the scene of other martyrdoms as well. Christian teachers from Samoa placed here in 1840 suffered much persecution, and were forced to leave the following year. Eight years later some young men were taken from this island to Samoa, and there instructed in Christianity. They returned in 1852 to work among their people; one went back to heathenism, but the others remained faithful till their death. The Bishop of New Zealand, who spoke the Eromangan language and felt deeply interested in the work, secured several natives to study in the training-school at Auckland, who were Christianized and sent back to labor for their countrymen. Christian influence was exerted from Aneityum as well. In 1857 Rev. G. N. Gordon of Nova Scotia was stationed at Eromanga. For four years he labored with untiring zeal and devotion. He translated Jonah, the Gospel of Luke, Acts, and a catechism and hymn-books. But a hurricane swept over the island, doing great damage; the measles, introduced by a trading-vessel, caused the death of hundreds of the people; and the old superstitions in regard to the evil influences of foreigners took possession of the natives, and stirred up by an enemy of the mission, the angry people murdered Mr. and Mrs. Gordon on the 20th of May, 1861. Some of the Christians fled to Aneityum and told the tragic story. Bishop Patteson, himself a martyr afterwards, was the first to visit the island after the murder. He felt the loss of his friend very deeply. He was accustomed to stop and visit him, as he made his annual visits to the islands. Now all he could do was to read the burial-service over the grave where the mangled remains had been buried by the faithful Christians before they sought safety in flight.

The Rev. J. D. Gordon came out from Nova Scotia in 1864 to take up the work of his

brother. He found a scattered but still faithful flock of Christians, who had been brave enough to keep up the services on the Sabbath. In 1868 Mr. J. McNair joined the mission from Scotland, but he died in 1870, and after a few years Mr. Gordon severed his connection with the mission. He still remained in Eromanga, and hoped to establish a mission to Santo, and perhaps New Guinea, before he died; but in March, 1872, while revising the translation of the seventh chapter of Acts, where the martyrdom of Stephen is recorded,—the same passage which occupied Bishop Patteson on the morning of the day he fell a martyr at Nackapu,—he was murdered by a native who had come to him upon an apparently friendly errand. In the same year Rev. Hugh Robertson and his brave young wife arrived from Nova Scotia. Knowing well the danger, they deliberately chose Eromanga as their field of labor. Since then the blood of the martyrs has borne rich fruit, for the report for 1889 says: "The work on Eromanga was never more encouraging; the converts are doing all in their power to help on the work of the mission, and under constant training they are growing in liberality and other graces with gratifying rapidity."

In the church at Dillon's Bay is a tablet whose brief record is a fitting close to this slight sketch of the work at Eromanga:

Sacred to the Memory of Christian Missionaries  
who died on this island:

JOHN WILLIAMS,

JAMES HARRIS,

Killed at Dillon's Bay by the Natives, 30th November,  
1839;

GEORGE N. GORDON,

ELLEN C. GORDON,  
Killed on 20th of May, 1861;

JAMES McNAIR,

Who died at Dillon's Bay, 16th July, 1870; and

JAMES D. GORDON,

Killed at Portinia Bay, 7th March, 1872.

They hazarded their lives for the name of the Lord  
Jesus.—Acts 15:26.

It is a faithful saying and worthy of all acceptance,  
that Christ Jesus came into the world to save sinners.  
—1 Tim. 1:15.

The other islands are visited by means of the "Dayspring," a vessel given by the Sunday-school children of Nova Scotia. The tragic history of the mission has interested many in it, and at present there are eight branches of the Presbyterian Church represented in the New Hebrides Missions, with 18 missionaries and 130 native teachers.

III. *Organization*.—The eight churches supporting this mission are: the Presbyterian Church in Canada (formed by the union in 1876 of the various branches of Scotch Presbyterians in Canada and the Maritime Provinces); the Free Church of Scotland, including now the Reformed Presbyterian Church of Scotland; and the Presbyterian Churches of Victoria, New Zealand, Otago, Tasmania, South Australia, and New South Wales. The Established Church of Scotland also renders support in connection with the church in Canada.

The representatives of these various branches of the Presbyterian Church have formed themselves into one Synod, called the "New Hebrides Mission Synod," which meets annually, and is the supreme authority in the mission in all general matters, each missionary being under the Synod in a general way, while personally responsible only to the church by which he is supported. Although each man is translating

the Bible into and preaching in a language as different from that of any other man as English is from French or French from German, unity of method is aimed at and achieved. Old associations are forgotten in the New Hebrides; "Establishment" men and "Voluntaries," men from the mother-church and the colonies, work together with one interest, and form indeed a "United Presbyterian Church" in reality and practice.

**New Herrnhut.**—1. A town on the island of St. Thomas, West Indies, which was the scene of the earliest direct effort made by any Christian community for the conversion of the ignorant, debased, and enslaved West Indian negro. New Herrnhut is pleasantly situated on high ground, backed by hills of yet greater elevation. Its distance from the town of St. Thomas is nearly four miles in a northeasterly direction. For several years the missionaries on St. Thomas occupied a very humble and unhealthy tenement in the village of Tappas, now the town of St. Thomas, and preached the gospel here and on the neighboring estates; but in 1737 they purchased a small plantation on an elevated and healthier locality, to which they gave the name of Pozaunenbergh, which was shortly after formed into a settlement, and in 1753 received the name of New Herrnhut. It has at present only a small congregation, the majority of the inhabitants having removed nearer to the town.—2. A town on southwest coast of Greenland, south of Umanak. Mission station of the Moravians. Originally a group of huts built by Moravian missionaries, which now has grown to be quite an extensive settlement. Occupied 1733 by Matthew and Christian Stach, the first missionaries to Greenland. Has 1 missionary.

**New Providence Island,** Bahamas, West Indies, 17 miles long, 7 broad. More hilly than most islands of the group. Has fertile lands and produces good fruit. Population, 10,000. Chief town, Nassau. Mission field Baptist Missionary Society; 1 missionary, 2 evangelists, 5 out-stations, 412 church-members, 57 day and 430 Sabbath-scholars. Wesleyan Methodist Missionary Society; 2 missionaries, 73 native helpers, 962 church-members, 6 chapels, 1 school, 26 scholars.

**New Rotterdam,** an out-station of the Moravian station of Waterloo, in Surinam, South America, built on a narrow peninsula north of the river Nickeris, in the village of New Rotterdam. The sea has made such encroachments on this peninsula that the church and mission buildings have been twice removed farther inland.

**New Zealand.**—The colony of New Zealand consists of three islands, viz., North, South, and Stewart's Islands, together with certain small islets. The North Island is 44,000 square miles, the South Island 55,000, and Stewart's Island 1,000 square miles. Thus the area of the three islands in round numbers is about 100,000 square miles. The principal islands are separated by Cook's Straits, and Stewart's Island by Foveaux Straits. The entire length of the colony is 1,100 miles, and resembles Italy in form, while in size it is somewhat less than Great Britain and Ireland. In the North Island the mountains occupy one tenth of the surface, and vary in height from 1,500 to 6,000

feet in height. There are a few loftier volcanic mountains, as Tongararo (6,500 feet), which is occasionally active; Ruapehū (9,100 feet), and Mount Egmont are extinct volcanoes above the snow-line. In the South Island Mount Cook rises to about 13,000 feet in height. New Zealand is situated in the South Pacific Ocean, 1,200 miles south of the Australian continent, and about 8,000 miles from San Francisco. The entire group lies between 54° and 48° S. latitude and 166° and 179° E. longitude.

The climate of New Zealand is unquestionably one of the finest in the world. "The climate's delicate, the air most sweet, fertile is the isle." The mean annual temperature of the different seasons for the whole colony is, in spring 55°, in summer 63°, in autumn 57°, and in winter 48°. In future it will become the favorite resort of persons seeking health from all parts of the world, possessing, as it does within a limited area, the most charming scenery and most desirable climate. The death-rate is only 10.29 per 1,000.

The natives are of Malay origin, and superior to other inhabitants of the Pacific, intellectually and physically. The Maori is the average size of a European, viz., 5 ft. 6 in., but not so well developed. Mentally the natives are capable of very considerable development, and may hereafter fulfil Lord Macaulay's prediction of them.

The government is administered by a Governor appointed by the crown, and a Ministry, a Legislative Council nominated by the crown, and a House of Representatives elected by the people. Though the provincial system of government is abolished, the colony is divided, as heretofore, into the following provincial districts:

Auckland, population 130,379; Taranaki, population 17,999; Wellington (seat of government), 77,536; Hawke's Bay, 24,568; Marlborough, 11,113; Nelson, 30,203; Westland, 15,931; Canterbury, 121,400; Otago, 140,154; Chatham Islands, 199; total, including Chinese and half-castes, 578,482. A census is taken every three years. The last census, in December, 1888, estimated the population in round numbers, exclusive of aborigines, at 607,380. The Maoris, estimated in 1835 at 2,000,000, now number about 40,000, divided into many tribes, and scattered over an area of 45,156 square miles. They are chiefly located in the North Island. Only some 2,000 are found living on the reserves provided by the government in the South Island. The king (nominal) resides in Waikato, in the provincial district of Auckland. His influence is paramount within a limited radius. Occasionally he emerges from his solitude and reaches the confines of civilization, and learns European vices. He donned the blue ribbon some years ago, and the outside world has not heard much of him since. Recently, too, there has been a disposition to resort to pagan forms of worship. Gradually, however, the barriers are giving way before the rising, advancing tide of Christian influences, and though the social condition of the aborigines is far from satisfactory, there is an undoubted movement upward in some districts of New Zealand. It is a wise provision of government to give them power to elect members to represent them in the legislature, which meets yearly to make laws for the peace, order, and good government of the colony.

New Zealand was first discovered by Tasman in 1642, and surveyed by Captain Cook in 1770. Thereafter it was frequently visited by whalers; and eventually the first missionary of the cross landed in 1814, and entered upon his labor of love at the close of that year. The apostle of the Maoris is the Rev. Samuel Marsden, and to him belongs the honor of having publicly unfurled the banner of the cross in the "Greater Britain" of the South.

Marsden was the chaplain at the penal settlement of Port Jackson, and he was greatly struck by the Maoris, who used occasionally to visit Sydney as working hands in whalers and small merchantmen. He built a hut in his parsonage grounds for their reception, and had as many as thirty staying with him at one time. He was greatly impressed by their superiority over other savages, and in 1807, when he visited England, he persuaded the Church Missionary Society to undertake the establishment of a mission in this colony. Delays of various kinds took place. Just as the mission party were about to leave Sydney on one occasion, news arrived of what is known as the "Massacre of the Boyd" at the harbor of Whangaroa. The natives attacked the vessel out of revenge for indignities suffered by one of their chiefs at the hands of the captain, the vessel was burned, and the crew and passengers, amounting to nearly seventy persons, were killed, only eight having escaped. The general horror caused by this event was greatly increased by the "o'er true tale" of cannibalism connected with it. In 1814 Marsden purchased the brig "Active," of 110 tons burden, to be mainly used for the purpose of the mission. After she had paid a preliminary visit to New Zealand to reconnoitre, Marsden, on the 19th November, 1814, embarked on board to formally open the mission. He took with him three lay missionaries, Kendall, Hall, and King, with their wives and children, an adventurous friend named Nicholas, and eight Maoris, including a chief named Ruatara, whom he had befriended in Sydney, and his uncle, the far-famed Hongi, destined ere long to become the most powerful man in New Zealand. The "Active" first went to Whangaroa, the scene of the Boyd massacre, where Marsden succeeded in winning the confidence of the natives, and afterwards to Rangihoua, Ruatara's village in the Bay of Islands. We have a graphic account of the first service, which was held on Christmas Day. Ruatara enclosed about half an acre of land with a rough fence, erected a reading desk and pulpit in the centre, and covered the erection with some black cloth he had brought from Sydney for the purpose. He also arranged some old canoes on each side of the pulpit as seats for the English; the native portion of the congregation was to sit, according to custom, on the ground. Finally he rigged up a flagstaff and ran up the English colors. The service was begun by singing the Old Hundredth Psalm. While the service was being read the natives stood up, and sat down at the signals given by Korokoro's switch, which was regulated by the movements of the Europeans. Marsden preached from the text, "Behold, I bring you glad tidings of great joy," and at the end of the sermon Ruatara told the natives in their own language what the missionary had been talking about. "In this manner," says Marsden in his journal, "the

gospel has been introduced into New Zealand, and I fervently pray that the glory of it may never depart from its inhabitants till time shall be no more." The whole scene must have been as dramatic and affecting as anything recorded in the romance of missions.

The work thus inaugurated by Mr. Marsden and his coadjutors under the auspices of the Church Missionary Society advanced through various vicissitudes until in the year of grace 1841 Bishop Selwyn was consecrated Bishop of New Zealand (see Melanesian Mission). He was a prince of missionaries, and with apostolic zeal and fidelity consecrated his noble talents to the cause of his divine Lord. There are many at this hour in the colony whose lives have been influenced for good by his wise and truly Christian counsel. He was a true friend to more than one missionary outside the pale of the Church of England. The next to enter the field were the Wesleyans.

It was in 1822 that the pioneers of Methodism first set foot in New Zealand. In February of that year the Rev. Samuel Leigh commenced a mission in the North Island, under the auspices of the Standing Committee of the Wesleyan Methodist Church in London. The first station was planted at Kaeo, Whangaroa, in the northernmost part of what is now the Auckland Provincial District. Here the Rev. Nathaniel Turner, father of Mr. C. W. Turner of Christchurch, took charge in 1823. For over four years the work was carried on; but the soil was stubborn, little progress was made, and at last disaster overtook the mission. On January 9th, 1827, Hongi Hika, the famous chief of the Ngapuhis, "The Napoleon of New Zealand," advanced on Whangaroa, and the station was destroyed. Mr. Turner and his family, alarmed in the night, fled through the bush for twenty miles, to Keri-Keri, the Church of England mission station on the Bay of Islands. The fugitives were in serious peril during their flight, but their lives were saved by the chief Patuone, known afterwards in colonial days as Edward Marsh, and near Keri-Keri they were met by the Episcopalian missionary, the Rev. Mr. Williams, who with a party of natives went out to succor them. On January 31st the members of the Wesleyan Mission left for New South Wales. They did not long allow the ground to lie idle, however, for towards the end of the year they had re-established a mission in New Zealand. The station was at Hokianga, and was under the charge of the Revs. John Hobbs and Stack. The progress of the work was at first slow. Up to the middle of 1830 the missionaries had obtained no success, and were apprehensive that orders would be received from England to break up the station. Under this impression Mr. Hobbs wrote home requesting permission to be allowed to remain alone. But a reaction was at hand. Later in the year the missionaries were able to report that twenty-eight young men and boys and six young women were living in the station under instruction. By the end of 1831 there were some converts, and the first class, of five men, was formed. The Rev. John Whiteley, who met a martyr's death in the last war, arrived at the Bay of Islands on May 21st, 1833. The mission work was now extending, and needed more laborers. In the school there were four hundred scholars, chiefs, old and young men and women, and even slaves. The first great success of the

mission occurred in 1834. On one Sunday in that year eighty-one converts were baptized, and fourteen couples married in the mission chapel at Mangungu. In December of the same year there arrived at Hokianga the Rev. James Wallis, still living at Auckland, after more than fifty years' service in the Wesleyan ministry. In 1835, with Mr. Whiteley, he founded a station at Kawhia. In 1836 the Rev. J. Buller, well remembered in Canterbury, came to New Zealand as tutor to Mr. Turner's family. At the end of 1837 there were fifteen chapels or out-stations in connection with the parent chapel at Mangungu and on the Hokianga River. A printing-press had been set up at the mission station, and thousands of small books, in Maori, were issued therefrom. In 1838 the mission house and store at Mangungu were accidentally burned, their inmates escaped with difficulty, and but little of their contents was saved, despite the gallant efforts of the Maoris. This year the worshippers at the mission chapel at the same place had increased to a thousand.

*The Wesleyan Church in the Colony.*—On March 19th, 1839, the Rev. J. H. Bumby, who was drowned little more than a year later in the Waitenata, arrived from England to take charge of the mission. He was accompanied by Miss Bumby and by the Revs. C. Creed and S. Ironsides. Next year it was announced that there were connected with the mission 1,300 communicants or accredited church-members, and 600 catechumens or persons on trial. In 1844 the Rev. Walter Lawry landed at Auckland, and was instrumental in establishing a college in that town, and a native model school at the Three Kings. In 1855 the Australian Conference was formed, the first session being held in Sydney, under the presidency of the Rev. W. B. Boyce. This Conference undertook the control of the New Zealand Missions. By that time the Wesleyan Church in this colony had 16 circuits or stations, 20 European ministers, 508 European and 3,070 Maori members, 2,514 European and 7,590 Maori adherents, 733 European and 4,418 Maori Sunday-scholars, 19 churches for Europeans and 74 for Maoris, 21 other preaching places for Europeans, and 121 for Maoris. The history of the English Wesleyan Church, under the Australian Conference, is one of steady progress; that of the Maori Church one of disaster. Through the spread of the Hau-hau (a tribe living in the Waikato valley south of Auckland) superstition, and the diminution in the numbers of the native race, the membership fell from thousands to a few hundreds. The brave Whiteley was shot at Whitecliffs in 1869, by the men to whose welfare he had devoted a lifetime, and for a time the Maori Wesleyan Church, like the other native churches, in the North Island at all events, seemed in danger of being almost swept away.

It is a strange coincidence, and yet not strange, that both societies should have almost analogous experience. Early in the field, and enjoying signal blessing in their work, we find the Wesleyan missionaries full of gladness; anon they were, in 1869, filled with sorrow and dismay at the disasters brought on by war and superstition. Very similar was the ordeal through which the Church Missionary Society had to pass. The first bishop of that Society (Selwyn) traversed the colony by land and sea, and wrote home: "Everywhere I see the people eager for instruction, meeting for daily prayers, keeping

the Sabbath, learning to read portions of God's Word translated into their language: in short, I seem to see a nation born in a day." Then followed the war and its attendant evils, which seemed for a time to completely arrest missionary operations in New Zealand. It was not until 1841 that the Presbyterian Church entered upon this field of labor. The Reformed Presbyterian Church of Scotland sent out two saintly men, Messrs. Duncan and Inglis. The former is the patriarch minister of Foxton, who takes a warm interest in the evangelization of the natives; the latter is the ex-missionary of the New Hebrides who has translated the New Testament into the language of that interesting people. Both the Presbyterian Church of New Zealand and the Church of Otago and Southland take a deep interest in the aborigines, and for many years have employed agents specially among them. The Rev. Mr. Blake, M.A., labored successfully in the South, while Messrs. Honoré and Milson have toiled in the North Island amid many discouragements, but not without some measure of encouragement. Mr. Honoré, in 1889, reported to the committee that "the moral and religious life of the Maoris in some parts of his district would compare favorably with that of an equal number of Europeans." From many directions prayers ascend in behalf of the Maoris that they may be saved. The Baptists of New Zealand were not unmindful of the Maoris, but could not well overtake the work. However, a Christian friend communicated with Mr. Spurgeon and succeeded in having a missionary sent from the Pastor's College to labor in the North Island. The Salvation Army also has penetrated into the dark places of heathenism, and in its own way arrested the attention of the natives. How far it has influenced the native mind and heart it is difficult to conjecture. Enough has been stated to make it evident that the gospel through diverse agencies has been brought within the reach of all classes of society, both European and native. The desideratum in the colony at this moment is the moving of God's Spirit upon the people. Meantime the work of organization progressed steadily. The Church of England, under the able guidance of Bishop Selwyn, had its foundations laid firmly. The Free Church of Scotland in its infancy turned its thoughts to the "Brighter Britain of the South" as a suitable field for emigration. Hither, therefore, her wise sons came under the pastoral care of Dr. Burns, and under the serene southern sky unfurled the blue banner of Presbyterianism. Hence Otago and Southland bear the impress of Knox on the educational and ecclesiastical systems formulated in the southern part of the colony. Happily from one end of New Zealand to the other the leading Presbyterian churches of the world are blended into one brotherhood, and the antipodes present to the world an undivided and sacred oneness, except in so far as Otago and Southland are geographically and otherwise a distinct and separate synod for a time. The Wesleyan Church, as already indicated, developed marvellously. From being an outpost it began to assume the form of a duly constituted organization.

In 1874 the Wesleyan Church in this colony had grown to such dimensions that the New Zealand Conference was formed, with administrative but not legislative functions. The first

session was held in Christ Church, and the late Rev. Thomas Buddle, a veteran of the early days, was elected president. There were then 114 European and 12 native churches, with 148 other preaching places. The ministers, including supernumeraries, missionaries, and probationers, numbered 56. There were 198 local preachers, 170 class-leaders, 2,937 church-members, 23,793 attendants at public worship, and 8,460 Sunday-scholars, with 900 teachers.

Since the establishment of the New Zealand Conference the church has more than doubled its membership, and the work among the Maoris has shown signs of revival. According to the statistics presented to the last Conference, there were, at the end of 1888, 192 European and 16 native Wesleyan churches, 274 European and 33 Maori other preaching places, 85 ministers, 343 European and 46 Maori local preachers, 236 European and 13 Maori class-leaders, 7,121 European and 294 Maori church-members, 5,059 persons on trial for membership, 47,999 European and 2,766 native attendants at public worship, and 18,633 Sunday-scholars with 2,039 teachers. What a contrast these figures present to those of 1855, when the European Church members were but 500, while those of the Maori race numbered 3,000.

The principal feature of Wesleyan Church history of recent years has been the movement for separation from the Australasian General Conference, and for the establishment of a conference with legislative powers in New Zealand. A proposition to effect this was rejected at the meeting of the General Conference in Christ Church in 1884. The principal reforms which the advocates of separation wished to effect in the church were two—firstly, the extension of the term of the itinerancy, so as to enable ministers, with the consent of their congregations, to remain at one station for more than three years; and, secondly, the recognition as church-members of godly persons who do not meet in class. After the rejection of the proposals for independence in 1884 it was hoped that the General Conference would grant these reforms to the whole of the Wesleyan Church in Australasia. The last meeting of that conference, however, passed over without this being done, and it remains to be seen what action will be taken by the New Zealand Wesleyans in consequence.

Nor did the Congregationalists and Baptists fail to organize themselves into unions. The manifold advantages of these unions and conferences are recognized specially in relation to work in other parts of the world. It is a pleasing feature in the colony to find the missionary spirit universally diffused through all the evangelical denominations. In every instance aid is given to missions in other parts of the world while eagerly prosecuting evangelistic work and building up the cause of Christ in New Zealand itself. Home-mission work is best fostered by evangelizing the regions beyond.

The churches of New Zealand have sought from the beginning to make the adjacent islands of the Pacific the chief centre of evangelization. Bishop Selwyn not only attended to the spiritual wants of the colony, but established successfully an important mission in Melanesia, with Norfolk as headquarters. In 1855 the martyr Bishop Patteson was appointed to take the oversight thereof. It is now a diocese of New Zealand,

and the present bishop (son of Bishop Selwyn) has a seat in the General Synod.

The Presbyterian Church has devoted its attention specially to work among the aborigines of the New Hebrides. This field is sacred, not only by the blood of Williams, but also by the blood of the devoted Gordons. The Rev. W. Watt and his wife have labored there on the island of Tanna for twenty-one years, and at length the cheering intelligence reaches the colony of spiritual quickening. The island of Ambrim was occupied by the faithful missionary Charles Murray and his devoted wife, who was taken from his side. This island is now to be occupied by another laborer. Besides these Messrs. Milne and Michelsen are toiling at Nguna and Spi, and Mr. Smail was recently ordained and appointed to this promising field of labor. The group of islands which bear this name are situated to the northeast of New Caledonia and to the west of the Fijis, in south latitude between 14° and 20°, estimated at 2,500 square miles. The group embraces Espiritu Santo, Mallicollo, Ambrim, Aneityum, Eromanga, Tanna, etc. The inhabitants, variously estimated at from 50,000 to 150,000, are largely savage, though a goodly number are in touch with the gospel. There are in all 17 European missionaries connected with the mission. Besides these more than 100 native teachers perform the offices of preachers, evangelists, and teachers on twenty different islands.

Thus the churches of New Zealand co-operate with the Free Church of Scotland and the Presbyterian Churches of Canada and Australia in evangelizing the New Hebrideans. The Word of God has been translated in the languages of several islands. The climate is trying in some parts, and the French for a time menaced the mission, but hitherto the Lord has blessed and protected His work in these islands of the sea.

The Wesleyan Church dispatched the Rev. G. Brown to New Britain, with some helpers from Tonga and Fiji. Unfortunately four of these men were murdered. Still the work was prosecuted with zeal and firmness, and now solid progress has been made.

The Congregationalists have co-operated with the London Missionary Society, and in a general way gave monetary help, though they have no distinct organization otherwise of their own in the Pacific, nor do they employ any missionaries of their own. The Baptists, on the other hand, are specially interested in India, and have sent two ladies to engage in zenana work. Considering the limited membership of this church, they have done noble service for the Lord in establishing this important mission.

From the above outline it will appear that New Zealand is not unmindful of her duty to the heathen in the South Sea Islands. The results achieved may not appear to critics commensurate with the treasure and blood expended, nevertheless real progress has been made by the various organizations employed in preaching the gospel to the heathen. The church, however, is only now fully awakening to the magnitude and urgency of the work to be done in the Pacific for the Lord Jesus. Meanwhile the wonder is to see so many islands which a few years ago were the habitations of horrid cruelty now enjoying the light and love of heaven. The results cannot be tabulated by pen and ink. There shall come from these

southern seas an innumerable company which no man can number, of all nations and kindreds and people and tongues. Even so, come, Lord Jesus, and reign over these lovely isles of the sea!

Missionary societies at work in New Zealand: C. M. S., with 38 stations in the three dioceses of Auckland, Waipatu, and Wellington; 15 ordained missionaries, 2 unordained, 515 church-members. Their work is among the Maoris. Wesleyan Methodist Missionary Society, with a large number of stations; 204 churches. Primitive Methodist Missionary Society, with stations at Auckland, Dunedin, Oamaru, Waimate, South Invercargill; 279 church-members, 33 native workers, 10 schools, 901 scholars. United Methodist Free Churches, with stations at Addington, Auckland, Christchurch, Malvern, Napier, Oxford, Rangiora, Reefton, Richmond, Wellington, Westport and Charleston, and Woodville; 80 native workers, 898 church-members. Colonial and Continental Society. North German Missionary Society, Seventh Day Adventists (America).

**Newton, John, Jr.**, b. Lodiana, India, 1838. He was the eldest of the four sons of Rev. John Newton, Sr., who were all born in India and educated in America. John, the subject of this sketch, graduated at the medical college in the University of Pennsylvania, went to India independently of the Board, became a member of the mission in 1860, and was afterwards ordained to the ministry by the Presbytery of Lodiana. His first regular work as a doctor was at Kupoorthula, but from 1866 to 1880 he was stationed at Sabathoo, where he had a dispensary. After Dr. Newton was posted there, the poor-house, established forty years before, became the Leper Asylum. As a physician, he took special interest in the lepers, and experimented with the view of discovering some medicine that might arrest the progress of the disease. He built several houses near the mission-house that he might the more effectively minister to his patients. Considering them not as medical patients only, but as the poor who needed the gospel, he had a small building erected, which served the double purpose of a dispensary and a chapel, and there the lepers assembled daily for worship, on the Lord's Day holding special services. Dr. Newton was an earnest preacher, skilful physician, and an excellent writer. Though of scholarly turn, he was much engaged in itineration, bazaar preaching, and labor among the soldiers of the local garrison. His most responsible charge was that of the Leper Asylum, having 89 inmates. A missionary associate thus speaks of him after his death: "No love in this dark world has ever seemed to me so much like the Saviour's as that of Dr. Newton for his lepers." A correspondent of one of the Indian newspapers says: "He was a true missionary, obeying in the letter and in the spirit the command given to the first missionaries, not only, 'preach, saying the kingdom of heaven is at hand,' but, 'heal the sick, cleanse the lepers.' He did this so far as medical skill and sanitary science enabled him."

Dr. Newton died July 29th, 1880, of cancer of the stomach, after a period of great suffering. The funeral was numerously attended by Europeans and natives. Soldiers who loved him carried the coffin from the house to the cemetery.

His father, who had been fifty years a missionary in India, read a part of the Episcopal service, closing with an address. The hymn, "Home at last, my labor's done," was sung. The mission says: "His fine endowments, thorough knowledge of the language, great devotion to the work, make his removal a severe loss to the missionary cause."

**Neyoor**, a city in South Travancore, India, 300 miles south of Madras. Hinduism, Mohammedanism, devil worship, and various forms of degrading superstitions are met with among the Hindus, Pulars, and aborigines who compose the population. The caste system prevails, and the marriage ties are very loose. The climate is hot, and in some parts very unhealthy; average temperature 80° F.; annual rainfall, 50 inches. Mission station London Missionary Society (1828); 1 missionary, 1 lay-worker and wife, 1 female missionary, 60 out-stations, 4 native ministers, 1,112 church-members, 47 Sabbath-schools, 2,140 scholars, 42 day-schools, 2,678 scholars.

**Nez Perces Version.**—The Nez Perces belongs to the languages of North America, and is spoken by the Indians of Idaho. A translation of the Gospel of Matthew was made by the Rev. H. H. Spaulding of the Oregon Mission of the A. B. C. F. M., was first printed in Oregon in 1845, and was reprinted by the American Bible Society in 1871. A translation of the Gospel of John was made by the Rev. George Ainslee, and printed by the Presbyterian Board of Publication at Philadelphia in 1876.

(*Specimen verse.* Matthew 28 : 19.)

Kunki, <sup>1</sup>wiwiñnath, <sup>2</sup>awitaaishkaiikith, <sup>3</sup>uyi-kashliph, <sup>4</sup>wiwatashph, <sup>5</sup>Awibaptainaiikith <sup>6</sup>immuna Pishitpim wanikitph, wah Miahspim. Wanikitph, Wah Holy Ghostnim wanikitph.

**Ng'anga or Chinyana Version.**—The Ng'anga belongs to the Bantu family of African languages, and is spoken by tribes living around Lake Nyassa. In 1886 the National Bible Society of Scotland published the New Testament in that language.

**Ngkangphui**, in the province of Kwangtung, China. Station of the English Presbyterian Mission among the Hakkas.

**Ngombe**, town in the Congo, West Africa, between Lukolela and Equator station. Mission station Baptist Missionary Society; 3 missionaries, 15 church-members, 36 scholars, 38 Sabbath-schools.

**Nguna**, a volcanic isle among the southernmost New Hebrides, Melanesia; has 800 inhabitants. Station of the New Hebrides Mission, supported by the Church of Otago. A congregation of 40 church-members, among whom is the chief, who had to dismiss 9 wives before baptism.

**Nguna Version.**—The Nguna belongs to the Melanesian languages, and is spoken in the New Hebrides. In the year 1870 the Rev. Peter Milne from the Presbyterian Church of New Zealand settled there. In 1882 he published his translation of the Gospels of John and Matthew at the expense of the British and Foreign Bible Society. Besides these two Gospels, the same Society published in 1886 the other two Gospels, and the Acts, also translated

by Mr. Milne, who claims that his translations are intelligible to about 7,000 people. Of the Nguna version about 2,020 portions of the Scripture have thus far been disposed of.

**Nias Islands**, a small group lying to the west of Sumatra, in latitude  $1^{\circ}$  north, is composed of one large island and several islets, and is part of the Dutch Residency of east coast, Sumatra. Area, 2,523 square miles. The Rhenish Missionary Society has 2 stations on the main island, at Gunong Sitoli and Fagulo, both on the east coast of the island. The population is estimated at 230,000, who speak a distinctive language, into which portions of the Bible have been translated.

**Nias Version.**—The Nias belongs to the Malaysian languages, and is spoken in the island of Nias, near Sumatra. Rev. J. Deminger recently undertook a translation of the Scriptures into this language. He was especially fitted for such a work, for he had committed the language to writing, and had prepared a grammar in Nias. At the request of the Rhenish Missionary Society, the British and Foreign Bible Society printed at London, in 1874, an experimental edition of the Gospel of Luke. The Book of Genesis has also been prepared for the press by the same translator.

(*Specimen verse.* Luke 22 : 70.)

Ando wa lawá'o ira ma'afefu: Ya'ugō hūlō  
 aā sogi O'no Lōwaláni? Ba mañuá'o la hōrā  
 ando : Iāmi ande mañuá'o, mē la'ōdō ande sō  
 la andō.

**Nicaragua**, a republic of Central America, bounded north by Honduras, east by the Caribbean Sea, south by Costa Rica, and west by Pacific Ocean. Area, about 49,500 square miles. The principal mountains are in a range from 10 to 20 miles back of the west coast, and running parallel to it, sometimes rising in high volcanic cones, sometimes subsiding into low plains or places of slight elevation; it seems to have been the principal line of volcanic action, and Nicaragua is marked by some very high volcanoes. The Coco River, which rises in the Segovia Mountains, is the longest of Central America, its course being about 350 miles. The San Juan River, 120 miles long, is the only outlet of the beautiful lakes of Managua and Nicaragua. The country is rich in minerals, especially gold and silver. Climate, except in the very highest portions, is essentially tropical; the northeast part is very damp, rainfall is moderate. The soil is very rich, particularly on the Pacific slope, where all tropical fruits and plants thrive abundantly. Population is about 350,000, consisting of aborigines, mulattoes, negroes, and mixed races. The full-blooded Indians, who are civilized, are a sober and industrious race, but the half-breeds are lazy, vicious, and ignorant. Education is at a low ebb. The state religion is Roman Catholic, and other religions are not publicly tolerated. The chief industry is cattle-raising.

The capital, Managua, has 8,000 inhabitants. Other cities are: St. Leon, the former capital, 25,000; and Nicaragua, 8,500. The constitution was proclaimed 1858. It provides for a congress, the members of both houses to be elected by universal suffrage. The President is elected for four years. The Nicaragua Canal, when

completed, will add greatly to the importance and prosperity of the republic.

Mission work in Nicaragua is carried on by the Moravian Brethren in the coast region called the Mosquito Coast (q.v.), which was formerly an independent territory under the protectorate of Great Britain, but is now, by treaty of 1860, a part of Nicaragua. Recently (1890) permission has been given the Moravians by the Nicaraguan Government to follow their converts into the interior, from which the missionaries have been jealously excluded.

**Nicobar Islands** are a small group of islands attached to British India, lying in the Bay of Bengal, northeast of Sumatra, and south of the Andaman Islands. There are 8 large islands and 12 small ones. Great Nicobar is 30 miles long, and from 12 to 15 miles wide. The islands are well wooded and fertile. Cocoa-nuts are raised in great abundance. The aborigines are allied to the hill-tribes of Formosa. The Nicobar swallow is the builder of the edible birds' nests, so highly prized by the Chinese, and they are the principal exports together with bêche-de-mer, tortoise-shell, and ambergris.

Mission work is carried on in these islands by the Danish Mission Society.

**Nicobar Version.**—The Nicobar belongs to the Malaysian languages, and is spoken in the Nicobar Islands, Bay of Bengal. The Rev. F. A. Ralpstorff of the Moravian Brethren Missionary Society is preparing for the British and Foreign Bible Society a translation of the New Testament.

**Nicomedia**, a city of Bithynia, Western Turkey, 60 miles from Constantinople, at the head of the gulf of the same name. It was the ancient capital of Bithynia, being built by Nicomedes I. in 264 B.C.; and during the Roman Empire it was frequently used as an imperial residence. Under Turkish rule it decreased very much in importance, but has grown again since the extension of the railway from Constantinople into the interior of the province. Its Turkish name is Ismidt.

Mission station of the Western Turkey Mission of the A. B. C. F. M. (1840). It is a number of years since any missionary families have resided there, largely on account of the prevalence of malaria; Bardezag, just across the bay, and Adabazar, about 30 miles inland, being more healthy. There is a successful work in Nicomedia, and a church with a native pastor.

**Niigata**, a seaport and the place of greatest commercial importance on the west coast of the main island of Japan; population, 44,470 (1887). The city is neatly laid out; the streets levelled, paved with gravel, well drained, cleaned, and lighted with coal-oil obtained in the neighborhood. It has a flourishing inland trade, and contains national and private banks, a government hospital, and a school of foreign languages. Mission station of the A. B. C. F. M. (1883); 5 missionaries, 4 missionaries' wives, 5 other ladies, 15 native helpers, 7 out-stations, 2 churches, 226 church-members, 3 schools, 385 scholars. Reformed (Dutch) Church, U. S. A. 15 church-members.

**Ninghsia**, prefectural city in extreme north part of province of Kan-suh, Northwest China,

situated on the Yellow River. Mission station China Inland Mission (1885); 5 missionaries.

**Ningkwoh**, prefectural city in the province of Nganhwui, Eastern China, northwest of Hangchau and south of Nanking. Mission station of the China Inland Mission (1874); 4 missionaries, 2 native helpers, 1 church, 43 church-members, 5 chapels, 4 out-stations, 1 school, 10 scholars.

**Ningpo**, one of the five treaty ports of China, opened to foreigners by the treaty of 1842, is one of the most important cities of the empire, and the principal emporium of the Chekiang province. It stands east of the mountains, in a plain on the left bank of the Takia or Ningpo River, 16 miles from its mouth. The old wall surrounding it, 25 feet high and 16 feet broad, is in a good state of preservation. There are the usual gates of all Chinese walled cities, north, east, south, and west, and two others, besides two passages for boats, in the 5 miles circuit. The principal striking buildings are the large ice-houses; the Ningpo pagoda, 160 feet high; and the Drum-tower, built earlier than the 15th century. Temples and monasteries are numerous, and very handsome. The houses are mostly built of brick, and are usually of but one story. The city suffered from the ravages of the insurgents during the Tai-ping rebellion, when it was occupied for six months (1864).

The foreign trade of Ningpo is quite considerable. Silks, cottons (Nankeen takes its name from this city), straw hats, white-wood carvings, are the principal products. It was occupied by the English forces on the 12th of October, 1841, after the fort at the mouth of the river, Chinhai, was successfully stormed.

The climate of Ningpo is variable: the usual range of temperature is from 20°–100° F. The rainfall is excessive. The population of the city and surrounding plain is estimated at 500,000. A distinctive dialect is spoken, called the Ningpo.

Mission station of: A. B. M. U. (1843); 1 missionary and wife, 2 physicians and wives, 3 other ladies, 14 out-stations, 15 native preachers, 7 churches, 248 church-members, 3 Sunday-schools, 160 scholars, 9 schools, 125 scholars. Presbyterian Church (North), 1844; 2 missionaries and wives, 2 other ladies, 37 native assistants, 21 out-stations, 10 churches, 5 self-supporting, 760 communicants, 9 schools, 141 scholars. C. M. S. (1848); 3 missionaries, 2 female missionaries, 4 native ministers, 100 Christians, 1 college, 3 schools, 71 scholars. China Inland Mission (1857); 2 out-stations with a total of 107 communicants. Free Methodists, 2 itinerant preachers, 10 local preachers, 279 church-members, 4 chapels, 9 preaching places, 3 Sunday-schools, 23 scholars.

**Ningpo Colloquial Version.**—The Ningpo belongs to the languages of China, and is spoken in Ningpo and vicinity. An edition of the Chinese New Testament in the Ningpo colloquial was published at London in 1863 under the care of the Rev. Messrs. F. F. Gough and Hudson Taylor. The American Bible Society published a re-revised edition in 1880. An edition in Roman characters, prepared by the Rev. E. C. Lord of the A. B. M. U. Mission (who had previously issued a translation of Isaiah in 1870), was published in 1874. In

1871 the American Bible Society published the Books of Genesis and Exodus, both translated by the Rev. H. V. Rankin. The American Bible Society, which had already published the New Testament between 1853 and 1859, intends to publish the Old Testament in this dialect. At present a representative committee is at work revising the New Testament.

**Ningtaik**, district in the province of Fuh-kien, China. Station of the C. M. S.; 376 communicants, 91 scholars.

**Nisbet, Henry**, b. September 2d, 1818, at Laurieston, Glasgow, Scotland; studied at Glasgow University, Relief Divinity Hall, Paisley, and Chesunt College; sailed August 11th, 1840, as a missionary of the L. M. S. to Tanna, one of the New Hebrides Islands. The natives were so hostile that he went to Upolu, where he settled soon at Fasitoonta, and had the charge of ten villages. He spent much time in visiting the out-stations, and was one of the missionaries who accompanied the Nova Scotia brethren to select their station in the New Hebrides, on the island of Aneityum. He was one of the revisers of the Samoan Bible.

On the death of Mr. Stallworthy in November, 1859, he removed to Malua and took charge of the mission seminary during Mr. Turner's absence. When Mr. Ellis left Samoa in 1862, in addition to the work of the seminary he took charge of the station and mission press. During his residence at Malua he prepared for the students many lectures, sermons, notes of Scripture, etc., which were subsequently published in England under his supervision. He spent some eight years longer in the mission field in various departments of usefulness, and died at Malua May 9th, 1876. He received the degree of LL.D. from the University of Glasgow.

**Nishiwo**, a city in the Nagoya district, Japan. Mission station of the Methodist Episcopal Church (North), U. S. A.; 1 native ordained pastor, 21 church-members, 20 Sabbath-schoolers.

**Nisky** (Niesky), a town on south coast of St. Thomas Island, Virgin Group, West Indies,  $1\frac{1}{2}$  miles from St. Thomas town. Mission station of the Moravians (1753); 1 missionary and wife. A theological seminary for the natives was opened here in 1886.

**Niue or Savage Island**, one of the Tonga group, Eastern Polynesia, between the Hervey and Samoan Isles. Climate hot; temperature 75°–98° Fahr. Population, 4,726 stationary, and 363 away in ships, etc. Race, light copper-colored Malays, Polynesians, "Hawaiiori." Language, a combination of Tongese and Samoan. Religion, Protestant. Government, a kingdom, ruled by head of clans under the king. Social condition now civilized, and very comfortable. The people are peaceable and good subjects, live in good houses, and are neatly clothed. Mission field of the L. M. S.;

1 missionary and wife, 11 native pastors, 25 other helpers, 11 stations, 11 churches, 1,450 church-members, 1 theological seminary, 20 students, 11 schools, 1,599 scholars.

**Niue Version.**—The Niue belongs to the Polynesian languages, and is vernacular to the people of Savage Island, who number about 5,000; of these 1,500 are now professing Christians. In 1861 the Rev. W. G. Lawes of the L. M. S. settled on the island, together with the Rev. George Pratt. Parts of the New Testament were printed at Sydney in 1863 by the New South Wales Auxiliary to the British and Foreign Bible Society, and in 1867 the entire New Testament was printed at Sydney in an edition of 3,500. The Book of Psalms was published in 1870. In 1873 a revised edition of the New Testament, and Psalms, Genesis, and Exodus, were carried through the press in England by Mr. Lawes; another edition of the New Testament and Psalms, and an edition of the Pentateuch was published by the British and Foreign Bible Society in 1881. Mr. Lawes continued the work of translating the Old Testament, and during the year 1888 Genesis to 2 Kings, with Isaiah, Jeremiah, and Jonah, were printed at Sydney, Mr. Pratt reading the proofs.

(*Specimen verse* John 3: 16.)

Nukua pihia mai e fakaalofa he Atua mai ke  
he lalolagi, kua ta mai ai hana Tama fuataba,  
kia nakai mate taha ne tua kia ia, ka kia moua  
e ia e moui tukulagi.

**Nizam's Territories** (British India), one of the largest and most important of the so-called "protected" or feudatory states of India, governed by its own native prince (in this case a Mohammedan, the descendant of the "Nizam-ul-Mulk," or viceroy of the Decan, who ruled the country as viceroy of the Mogul emperors of Delhi nearly two centuries ago, but in the decadence of the Delhi power rebelled and set up as an independent prince). A British resident is maintained at the Nizam's court (see article Native States). This state is officially known as the Haidarabad State—from the name of its chief city and capital. Among the people it is popularly spoken of as "the Mogalai,"—in allusion to the Mogul origin of its rulers. It lies in the centre of the great table-land which occupies almost all of India south of the Vindhya Mountains. The limits of the state are north latitude 15° 10' to 20° 4', and east longitude 74° 35' to 81° 25'. This does not include the district of Berar (which see), which is under British control, though nominally belonging to the Nizam's state. The area of the state without Berar is about 80,000 square miles. The population (1881), 9,845,594. Of this number about 10 per cent are Mohammedans; and as the ruling dynasty is Mohammedan, persons of that faith occupy not only the principal positions of trust and authority, but also pervade the lower ranks of both civil and military employment. The state lies just where several language areas meet; accordingly there is a great diversity of dialect within its borders. Marathi is spoken by the Hindu population of the west and north-west; Kanarese by the Hindus of the south-west; Telugu by those of the eastern districts; Hindustani by the Mohammedans throughout, though Persian is the court language; and the ab-

original tribes (Gonds, etc.) have, as elsewhere, each its own tongue. The chief city and capital is Haidarabad (north latitude 17° 22', east longitude 78° 30'), with a population, including suburbs, of 231,287, largely Mohammedan, though hardly any other city in India presents so great a variety of race. The people of the city are very warlike, and have the habit of going armed with an imposing number and variety of weapons, some of which, it is true, are antiquated, though on occasion capable of effective use. The same habit of carrying weapons is quite universal among Mohammedans throughout the state; to some extent Hindus also adopt it. It is not unusual to see, in some village bazaar, a man with a long match-lock musket over his shoulder, a curved sword in his hand, two or three daggers and knives of different patterns stuck into his girdle, and a shield of ancient pattern hanging down his back. The presence everywhere of these walking arsenals, together with the violent and bitter fanaticism of the average Mohammedan, and the feeling prevailing in the minds of the Moslem inhabitants of the Haidarabad state that it is a territory sacred to their faith and power, often renders missionary work there difficult, not to say dangerous; no Christian preacher has ever been actually assailed, though sometimes threats of violence are made. It is not considered safe for Europeans to venture into Haidarabad City without the permission of the authorities, or without adequate protection. In other parts of the territory life and property are usually safe. Secunderabad, a city closely adjoining Haidarabad, is assigned to the British as the headquarters of the Haidarabad subsidiary force,—furnished and officered by the British Government and paid for from the revenues of Berar. Secunderabad being thus directly under British control is a perfectly safe place for missionary operations, which have been for some time in progress under the care of the Wesleyans. The American Methodists also have stations in the Nizam's dominions, as well as the S. P. G. The American Board's Mission among the Marathas has extended its operations into some of the villages in the western part of the state, adjacent to the British districts in which the work of that mission chiefly lies. Their work in the Nizam's territory has been largely done by native itinerants and pastors, and has affected principally persons of the Mang caste—one of the lowest of the outcaste classes of the Maratha country. Education in the Nizam's State is rather backward, and the general condition of the country, as shown by its roads, postal system, and other appliances of civilization, attests the inefficiency and carelessness of Oriental rule. Yet the constant example of the British Government is not lost upon the leading men in the Haidarabad state, and the government is striving, not altogether without success, to pattern its operations after the model thus set before it. The railway uniting Bombay and Madras passes through the Nizam's state, and about 15 years ago a branch line to Haidarabad City was constructed by the Nizam's Government,—though not without opposition from some of the older and more bigoted Mohammedans,—and thus his capital city is brought into direct communication with outside civilization. On the whole, although this Mohammedan area in the midst of territories under the control of an enlightened

Christian nation is still to a degree benighted, yet rays of light are beginning to dawn over it, and civilizing influences are slowly penetrating it from all sides.

**Njemo or Wonoredjo**, a station of the Netherlands Missionary Society, Evangelical Church, in Java, East Indies. It has 257 church-members. (See Wonoredjo.)

**Njenhangli**, a station of the Basle Missionary society in the province of Kwangtung, China; 3 missionaries, 16 native helpers, 453 church-members, 197 scholars.

**Nogai Turki**, also called the Karass Turki, a dialect spoken by the Tartars in Ciscaucasia and on the lower Volga in Russia. The Pentateuch and New Testament have been translated and published by the B. and F. Bible Society.

**Nongkhylliem**, station of the Welsh Calvinistic Methodists, in the Shillong district, Assam, India; 3 churches, 68 communicants, 176 Sunday-scholars, 56 day-scholars.

**Nongrymai**, a village in the Khasia Hills, Assam, India, containing only 40 houses. Together with Nongrang it is a mission station of the Welsh Calvinistic Methodists; 2 churches, 46 communicants, 154 Sabbath-scholars, 63 day-scholars. One missionary and his wife are in charge of the district, which includes eight villages.

**Nongsawlia**, a station of the Welsh Calvinistic Methodist Church in the Cherra district, Assam, India; 2 native preachers, 131 communicants, 296 Sabbath-scholars.

**Nongtrai**, mission station of the Welsh Calvinistic Methodists, in the Shella district, Assam, India; 1 church, 1 preacher, 13 communicants, 35 Sabbath-scholars, 46 day-scholars.

**Nongwah**.—1. Station of the Welsh Calvinistic Methodists in the Shillong district, Assam, India; 3 churches, 45 communicants, 194 Sabbath-scholars, 67 day-scholars.—2. Station of the Welsh Calvinistic Methodists in the Shella district.

**Nongwar**, station of the Welsh Calvinistic Methodists in the Shella district, Assam, India; 1 church, 1 preacher, 31 communicants, 56 Sabbath-scholars, 29 day-scholars.

**Nononti**, one of the Gilbert Islands, Micronesia. Mission station of the Hawaiian Evangelical Society (1887). Population, 2,500; 2 native teachers.

**Nonpareil**, a station of the S. P. G. in British Guiana, South America, with 171 Chinese and 172 Hindu Christians.

**Norfolk Island**, a dependency of New South Wales, Australia; the largest and finest of a small cluster of islands consisting of Norfolk, Nepean, and Philip Islands. Area, 14 square miles; elevation, 400 feet. Population, 500. Mission station of the S. P. G.; 1 missionary. Headquarters of the Melanesian Mission (q. v.).

**North Africa Mission**. Headquarters, 19 and 21 Linton Road, Barking, England.—With the fall of the French Empire and the establishment in its place of the French Republic, religious liberty was granted not only to France, but also to Algeria, which was sub-

dued by her in 1830. Thus was North Africa opened for the introduction of the gospel. Mr. George Pearce, who was providentially led to visit Algeria in 1876, revisited it in 1880, and returning to England aroused considerable interest in the Kabyles, a portion of the Berber tribes inhabiting the mountains a little to the east of the city of Algiers. A mission to these interesting people was started. Mr. Grattan Guinness, who paid a brief visit to Algeria, and Mr. Edward Glenny, who had independently been making investigations as to the condition of Morocco and Algeria, united in forming a committee for its management. In November of 1881 Mr. Pearce accompanied by Mr. Glenny returned to Algeria, taking with them two young brethren to work under Mr. Pearce's direction. They settled at Djemmâa Sahrij, but met with so much difficulty through the suspicion and opposition of the French local administrator, that one of the young men, a Syrian, retired from the work, and the other returned in the summer of 1882 to Europe to seek a fellow-laborer with a French diploma who might be more favorably received by the local authorities. After encountering many difficulties, which threatened again and again to destroy the whole work, the mission was reorganized in 1883. Several other friends joined in forming a council, and a fresh band of workers was taken out by Mr. Glenny, who then proceeded to Tangier, the council having determined to widen its sphere to the other aboriginal or Berber races of North Africa. Since then it has step by step extended its work, establishing stations in various places in Morocco, Algeria, Tunis, and Tripoli, and a branch mission to the Bedouins in Northern Arabia. It now no longer confines itself to the Berbers, but seeks to evangelize among all the Moslems, and is hoping to do definite work also among Europeans and Jews. There are seven fields into which the work is divided, which though they are small are each worked under distinct direct control from London.

The character of the mission is, like that of the Young Men's and Young Women's Christian Associations, evangelical, and embraces members of all denominations who are sound in their views on fundamental truths. The missionaries seek, by itinerant and localized work, to sell or distribute the Scriptures far and wide; and by conversation in the houses, streets, shops, and markets, in town and country, to teach Christian doctrine, encouraging to profession of faith and baptism.

Educational work is not a prominent feature in this mission, but is subordinate to evangelistic work. Medical aid has been found most useful in removing prejudices. A hospital and dispensary are established at Tangier and a dispensary at Fez, but in Algeria much difficulty has been experienced through the law forbidding the practice of medicine without a French diploma. Stations have been formed at Tangier, Tetuan, and Sifro, in Morocco; Tlemcen, Oran, Mostaganem, Akbou, Djemmâa Sahrij, and Constantine, in Algeria; Tunis and Tripoli, and at Homs, in Syria, northeast of Beyrout. This is the only mission seeking to fill the great field of Northwest Africa.

**North German Missionary Society**. Headquarters, 26 Ellhorn Street, Bremen, Germany.—From the early years of this century

missionary unions have existed in North Germany. The first one—not to speak of a loosely organized company, the “mustard-seed,” in East Friesland—was formed in Bremen in December, 1819. Their first collections were sent to Janicke in Berlin, and to Basle; during the very first year of the organization two men presented themselves to be sent as missionaries, and this led to vigorous work to support them. The establishment of this union is attributed to the interest awakened by Janicke's work in Berlin, and the visit of Missionary La Roche to Bremen on his way from Basle to London.

In the following years unions were formed in Lübeck (1820) and in Hamburg (1823), both sending their contributions to Basle. In these early years great opposition was experienced from the authorities and mockery from the people. No church could be secured for their annual meetings, and notices of them could not be inserted in the papers in connection with other religious announcements.

The first movement towards a work in common was an invitation extended by the State Bible and Missionary Union to the neighboring Hanover and Hanseatic Unions to attend its annual meeting in 1834. An organic union was not contemplated, but it was hoped that the conference would be repeated in subsequent years. A young theological student resolved at the time to go as a missionary, stated his determination, and expressed the wish that he might in some way retain close connection with the unions. This led to consultation as to the advisability of forming a society for independent work. In June, 1835, a preliminary conference in Stade decided to make the proposal to the various unions to assemble for the sake of organizing into a society. This occurred April 9th, 1836—the date of the organization of the North German Missionary Society. The unions that thus united were Stade, Bremen, Hamburg, Lauenburg, Ritzebüttel, Lehe, and Bremerhaven. Before October, when the next meeting took place, Elmshorn and Holstein had joined the number. In this October meeting the permanent form of government was adopted, whereby the current affairs of the Society should be carried on by the committee in Hamburg, but its direction should remain in the hands of the unions that comprised the Society; these should assemble yearly, and all decisions should be by majorities. This confessedly clumsy form of management is thus accounted for by the history of the organization of the Society, as a federation of independent unions.

A second noticeable feature of the early period of the Society, and one destined to involve it in serious difficulties, was its confessional position. By § 2 of the statutes both Lutherans and Reformed were recognized as its supporters; the existing relations of the two churches were to be in no way prejudiced; denominational differences caused by the historical development of the two home churches were not to be propagated in the mission churches, but they were to be left to develop in their own ways. This section was adopted in October, 1836, in lieu of a statement agreed upon in April that the Augsburg Confession should be the norm. The Stade Union (Lutheran) objected to the earlier, as it might give offence to the Reformed. Such was the liberal spirit of the Lutherans at that time.

In 1837 the Missionary Institute was determined upon, and was established in Hamburg. Five years later the first men were sent out to New Zealand; in 1843 a temporary mission was started in India; in 1847 Western Africa was entered by missionaries of the Society.

We conclude first the sketch of the work at home. Before 1850 the unions in Altona, Rostock, Celle, Ludvigslust, Glückstadt, Neustrelitz, and Heide had joined the Society. The thirteen supported this organization exclusively, and had a vote in the general assembly. In addition, about thirty others sent contributions, extending from the Russian Baltic provinces westward, including Danzig, Leipsic, and Cassel, to East Friesland, and reaching northward to Alpenrade in Schleswig. Especially in Holstein and Schleswig, in Hanover and Bückeburg, did the Society find support. The year 1846 was perhaps the summit of the prosperity under the old régime, when the income reached 8,210 thalers, and West Africa was determined upon as the chief field of activity.

The confessional question from the first developed differences of opinion among the unions. As early as 1838 it was feared that the attitude of the statutes might be interpreted as one of indifference, and might allow doctrinal caprice on the field, and the assembly of that year directed two men to prepare an interpretation of the section. The discussion in 1839 was a friendly one, and resulted in the following resolutions: Section 2 was to remain unchanged; it was to determine the instruction in the institute, and the ordination of the missionaries; further, it was declared that confessional questions were not to be discussed in the Society. In spite of this, in 1841, similar questions arose. The Altona Union insisted that at one station there should be men of but one confession. In 1844 the Augsburg Confession of 1530 was adopted as the basis of work and of doctrine. But these concessions to the Lutherans failed to ward off the division. In 1849 a reorganization of the institute was resolved upon. The next year the situation at home was such, complicated as it was by discouragement in the field, that the very continuation of the Society became a matter of debate. While the possibility of maintaining it on the existing basis was unanimously conceded, the Mecklenburg Union announced that they would have to withdraw on confessional grounds. After their withdrawal, with the express statement that it was not on account of the leaders, but out of regard to other friends of missions in their territory and that of Harms, though in this case on other grounds than the confessional question, chiefly because of the peculiar character of the man, the Society's headquarters were removed to Bremen. The Union there assumed the direction, only on condition that the form of government be altered; the committee have now full powers. Only in case of closing or opening a mission field are all the unions to be consulted. Soon after the Stade and Hanover Unions withdrew, and the constituency gradually assumed its present character.

The radical change in the constituency of the Society is due partly to personal causes, partly to the clumsy democratic mode of government, that precluded the predominance of a single energetic man as an executive, but chiefly to the gradual growth, marked all over Germany, of an ardent confessional sentiment

among Lutherans. The Society did not, however, become exclusively Reformed: it still "combines members of the Lutheran and of the Reformed Church, for the spread of the gospel among the heathen." Accordingly Lutheran members are on the committee as well as Reformed.

The school at Hamburg suffered by reason of these conflicts. In 1848 it was transferred to Bremen, but was even then ready to expire. Louis Harms had in 1837 been chosen as Inspector, but he declined the call because of his work in Lauenburg; in 1842 he was called as second teacher; but he again declined, as he could not leave his aged father. He now proposed to undertake at Hermannsburg the education of the missionaries; this proposal was accepted, but in 1850, as has been said, he left the Society, and the relation was abandoned. So the Society is without a school. In 1851 the decision to prosecute the work in Western Africa was occasioned by the offer of the Basle Society to supply men from its Institute; since then the men have been educated at Basle—an arrangement not entirely satisfactory, because of the lack of local sympathy between Society and men. So far as possible, however, North Germans are selected for the work.

In 1832 the office of Inspector was created, and F. M. Zahn was elected to fill it; he still holds the position.

The organ of the Society is the "Monatsblatt der Norddeutschen Missionsgesellschaft" (from 1846 to 1851 under the title "Mittheilungen der Norddeutschen Missionsgesellschaft").

After careful examination of various proposed fields of work, it was decided to begin in India among the Telugu tribes. A man was sent out in 1843, followed by two more in 1846; but it was thought necessary to have university trained men in India; the difficulties at home decreased the income; other missions must be continued; so very soon it was decided to give up the work there. Rajahmundri (Rajamahendri) was assumed by the American Lutheran Society, and since then numerous other organizations have continued the work.

Two young men who were intended for India at the first were unable to go there on account of poor health, and were sent instead to New Zealand, to which there was at that time much emigration. A share in the New Zealand Colonization Company was bought for the missionaries, which should furnish location for the station in the northern part of South Island; but the work there in Nelson, so far as any was practicable, was in the hands of other societies; so one of the men went to Taranaké in North Island, where he stayed until 1861; then the revolt of the Maoris drove him away, and he worked at Otago on South Island till his death in 1866. The second missionary went to the little island of Ruapuké, just south of South Island, where he is yet located. Money is still sent him, but the work is not any longer among the heathen, but among natives already nominally Christians.

Further detachments of men were not needed; so in 1846 Western Africa was decided upon, and in the following year four men were sent out. The location assigned them was in the French possessions, just under the equator. The French Government refused to give them permission to work, and they returned, disappointed, to Accra, farther north and west, on

the Gold Coast, where was a station of the Basle Society. Here they learned that missionaries were desired by the king of the Peki, an Ewe tribe east of the Volta River, some distance from the coast. The work soon began, but with only one of the four men sent out; three had died of the fever. This sad experience of sickness and death has been constantly repeated through the history of this mission. In 1886 it was stated that out of 110 missionaries sent to the coast 40 had returned broken in health, 56 had died from the effects of the climate, and 30 of the 56 children born to the missionaries on the field had died.

Other men were sent out, but discouragement and sickness was so great that in 1851 all suddenly returned to Germany; one of the number died in the harbor of Hamburg. Encouraged by the Basle Society, a second attempt was made to occupy Peki, but this also failed. One man remained in Accra, waiting for permission to alter the plan and begin first at the coast; this was not deemed advisable in Bremen, and work was again begun in the interior. After but a few months all were driven out by a war. This led finally to the adoption of the plan suggested by the missionary, and a station was opened in 1853, on the coast at Keta, which was then simply a harbor, where a large settlement was planned. The plan was slow of execution, and in order to reach the natives a second station was opened in 1856 at Waya, about 50 miles in the interior. In 1857 a third, Anyako, was begun between the two. A fourth was opened in 1859-1860 at Ho, formerly Wegbe. In addition to hindrances from climate, other causes have brought great tribulation to the mission: the language was utterly strange, and must be learned and reduced to writing; wars have been frequent—one especially, that lasted from 1869 to 1874, caused the temporary abandonment of Waya, the total destruction of Ho, and much damage to Anyako. Ho was entered again in 1875, and the year 1889 witnessed the formal completion of the station. Keta has been less unfortunate; it is the seat of a seminary, a middle school, and of a newly organized deaconess' foundation.

The state of the mission as given in the report for 1889 is as follows: There are two central stations already occupied, Ho and Keta, and a third, Amedschovhe, just begun in the north, on higher and healthier land. At Ho, which is since 1888 in German territory, ten Europeans are stationed,—6 men and 4 women,—and 21 native helpers. At Keta are 10 Europeans and 63 native helpers. These number an increase of 12 workers during the year. In the Keta parish are 201 members, with 125 communicants. At Ho, 516 members, with 283 communicants. The numbers are small, but the rapid increase of the last few years is full of promise. In 1880, after 32 years of work, there were 203 Christians. Ten years before that, 126. The 717 members at the present time are distributed in 10 parishes, varying from 4 to 142 in number.

In connection with the central stations are 12 out-stations, with native helpers, schools, and chapels; the great liability to sickness among European missionaries has led the Society to emphasize the training of natives to the work. Some are being trained in Germany, others at the schools in the field. The number of schol-

ars in the seminary at Keta is 5 at present; 25 are in the middle school there. The total number of pupils in all classes of schools—the above mentioned, the regular station schools, those of the out-stations, and the evening schools—is 315.

The receipts during the year were 82,000 marks, an increase of nearly 4,000 over those of the preceding year.

In 1880 the Society started a General Missionary Conference of the different organizations of Germany, Scandinavia, the Netherlands, and France. It meets at Bremen every three or four years, to consult upon topics of general interest. The decisions of the Conference are in no way binding, but its influence is of greatest value to the cause of foreign missions.

**Northwest Provinces** (British India), one of the great divisions or provinces of the Anglo-Indian Empire, and one of the five provinces which go to make up the Bengal presidency. Its ruler is the lieutenant-governor of the Northwest Provinces, who is appointed by the viceroy and governor-general of India, to whom he is directly subordinate. The province (formerly the kingdom) of Oudh is almost wholly surrounded by the territories of the Northwest Provinces, of which it is practically a part, since the lieutenant-governor of the provinces is also chief commissioner of Oudh. The judicial administration of the two provinces, however, is separate, but they are sufficiently one to be considered together here. Their territory extends from north latitude  $23^{\circ} 52'$  to  $31^{\circ} 7'$ , and from east longitude  $77^{\circ} 5'$  to  $84^{\circ} 41'$ . It reaches from Bengal on the south-east to the Jumna River on the northwest (which is the boundary between the Northwest Provinces and the Punjab). On the northeast the independent kingdom of Nepal forms part of the boundary, while farther west the area extends clear up into the Himalayas themselves, and impinges at last on Tibet. Near the southern edge runs the great Ganges, though some of the territory of the province lies south of that river. Thus a vast extent of the Upper Ganges valley is included in these provinces, and the great tributaries of that river flow through it. The area of the provinces is 106,104 square miles. The population of the Northwest Provinces is 32,720,128; of Oudh, 11,387,741; in all, 44,107,869. The country is largely flat, sloping gradually towards the southeast. In the extreme northwest, however, it becomes mountainous as it approaches the Himalayan region, and several mighty peaks of that great range lie within the limits of these provinces, the highest being Nandi Devi (25,661 feet). In this vicinity are located several sanatoria and favorite places of European resort and residence. In this same region also, at the locality known as Haridwar, far among Himalayan defiles, the Ganges takes its rise. This is a famous point of Hindu pilgrimage, as being the source of their most sacred river. On the mountain-slopes hereabouts tea is grown in large quantities; this industry is mainly in the hands of Europeans, and supported by European capital. The Jumna River has its rise like the Ganges in the Himalayas; and, after describing a southerly, takes a southeasterly course, nearly parallel to the Upper Ganges, though gradually approaching it, and farther west it joins the

greater river at Allahabad, which is now the capital city of the provinces. This point of union is another famous place of Hindu pilgrimage. The district enclosed between these two rivers (known as the "Doab," or Two Waters), is described as the granary of the Northwest. The rainfall of the whole territory is only twenty-five inches a year, and confined within three or four months. This fact renders artificial irrigation necessary to ensure the fertility of the soil. The government has supplemented the smaller labors of the native husbandmen in this direction by establishing large canal systems fed by the great rivers of the provinces, and large enough often to be of use for navigation as well as for irrigation. Besides wheat and the other cereals usual to Indian agriculture, large quantities of opium are grown near Benares, and in other parts of the provinces, and in Oudh. Two hundred and fifty thousand acres, or six per cent of all the land under cultivation, was reported a few years since as devoted to opium. It is a government monopoly here as elsewhere in India.

The population may be thus summarized: 86 per cent are Hindus, 13 per cent Mohammedan. The small remainder contains nearly 80,000 Jains, nearly 48,000 Christians, and a sprinkling of Parsis, Jews, Buddhists, Sikhs (a sect which has separated from Hinduism, but which still presents most of the traits peculiar to Hinduism), etc. The Christian population included in 1881, the year of the enumeration, over 13,000 natives, the results of missionary work. Of these 1,782 were Romanists, and the rest Protestants of the several denominations sustaining missions in the province.

Historically, these provinces present many points of great interest. Of the very earliest inhabitants few remnants now are left; the aboriginal tribes (Kols and others of this and adjacent regions) are almost certainly their representatives. The Aryan invasion pouring in from the northwest through the Punjab dispossessed the former dwellers on the soil, founded great cities, of which the ruins of some remain (such as Hastinapur and Kanauj), and established kingdoms and dynasties, whose wars and achievements form the basis of fact for the great Hindu poem of the Mahabharat. At Kapila, in Oudh, Gautama Buddha was born early in the 6th century before Christ, and at Kasia he died half a century later. The territory of this province formed a part of the realms of the great King Asoka, who in the third century before Christ gave his political support to Buddhism and made it the prevailing religion of Hindustan. In the 11th century after Christ the Mohammedans began to invade the land, through the same northwestern door as the Aryans before them. The upper portion of these provinces became a few centuries later the central seat of their power; though the city of Delhi, their greatest capital, once just within the northwestern boundary of the Northwest Provinces, has more recently been transferred to the Punjab. Late in the last century, when the great Mogul power had sensibly declined and was disintegrating into weak and petty principalities, the English authority, then firmly established in Bengal under Warren Hastings, began to creep up the Ganges. Benares became theirs in 1775; a part of Oudh was ceded in 1801; other districts followed; but the details we need not here repeat. A British

cantonment was established at Cawnpur as early as 1778, which became the nucleus of the present great city (see Cawnpur). The districts thus annexed to the English territory were first governed from Bengal; but in 1833 the plan was formed of erecting them into a fourth presidency; this plan was abandoned two years later in favor of that still in force, by which they constitute a province of similar rank to the province of Bengal, and like that governed by a lieutenant-governor, subject to the governor-general. In 1856 the continued misgovernment of the King of Oudh caused that territory to be annexed and placed under the charge of a chief-commissioner, as above explained.

The great Indian mutiny of 1857 raged more fiercely within the borders of this province than elsewhere in all India. It was at Mirat in its northwestern part that a native regiment of cavalry broke into open and violent rebellion on the 10th of May, 1857. After massacring their officers and many others, they started for Delhi. There the native infantry joined them. The city was seized by them, the old Mogul Empire was proclaimed, and the fire of rebellion spread rapidly over the whole province. In September of the same year Delhi was recaptured, and Lucknow was relieved the next March. The rebellion was wholly quelled before the end of 1858. But the siege of Delhi, the defence of Lucknow under Lawrence and his little band, with its subsequent relief by Havelock, and the massacres at Cawnpur, are destined to perpetual memory.

Besides the cities already mentioned, all of which are famous on account of the great events just mentioned in connection with them, these provinces contain the city of Agra, celebrated as the capital of the later Mogul emperors, and adorned by Akbar in the 16th century, and Shah Jehan in the 17th, with architectural works which are the admiration of mankind. The Taj Mahal (built by the last-named emperor) is said by some to be the most beautiful structure standing on the earth. Allahabad, the capital of the provinces, is a city of nearly or quite 150,000 population. Benares, the most sacred place in Hindustan in the Hindu's esteem, is also within the limits of these provinces.

Hindi is the principal language, subject in different localities to marked dialectic variation. The Mohammedans mostly use Urdu or Hindustani, as they do generally throughout India,—a fact which constitutes that form of speech the *lingua franca* of India. The following description of the people may be quoted from Rev. Mr. Sherring's history of Protestant missions in India: "In place of the stunted, dark races of Bengal, of great vivacity, and of considerable keenness of intellect, you have a fine, stalwart people, tall, strong-limbed, often powerful, of noble presence, ready to fight, independent, of solid rather than sharp understanding, and of somewhat duller brain than their neighbors of Bengal. By reason of the contrariety between the two nationalities there is no friendship between them, nor is ever likely to be. The Bengali is proud; but it is because he is subtle and quickwitted, and thinks he is capable of overreaching you. The Hindustani is proud; but it is because of his trust in his strong arm, because of his long pedigree, because of his well-cultivated manly habits. The

Bengali has no royal tribes to be compared for a moment with the Rajput clans of the northwest, with lineages stretching back for a thousand or even two thousand years."

Christian missionary work dates back to 1807, when Rev. Mr. Corrie, chaplain of the East India Company, was stationed at Chunar, and undertook a little evangelistic work in addition to his regular duties; and to 1809, when Henry Martyn, also a chaplain, residing at Cawnpur, made full proof of his ministry among the natives. But no regular missionary work by any agency specially existing for that purpose was undertaken until 1811, when the Baptist Society undertook to occupy Agra, sending thither Rev. Messrs. Chamberlain and Peacock from Serampore. The opposition of the government interfered, and the station was broken up, and not resumed by the Baptists until 1834. In 1813 Rev. Mr. Corrie, who had removed to Agra, gave the Church Missionary Society a hold there which it has never relinquished. The Baptists occupied Allahabad in 1816 or 1817, but abandoned the station after a few years, only to resume it still more recently. The same Society began work in Benares in 1816, and was followed in due time by others (see Benares). The Church Missionary Society has stations at Gorakpur, Azimgarh, Benares, Chunar, Allahabad, Agra, Aligarh, Mirat, Dehra Dun, Fyzabad, Lucknow, and Bareilly, and at a few smaller places. The American Presbyterians occupy Allahabad, Fatehpur, Fatehgarh, Mainpuri, Etawa, Muzaffaranagar, Saharanpur, Rurki, and Dehra Dun. It sustains at Allahabad a theological school. The American Methodists began their work just before the mutiny. Lucknow is their chief station. Others are at Amroha, Bijnour, Moradabad, Budaon, Shajehanpur, Sitapur, Baraich, Rai Bareilly, Gonda, Naini Tal, Paoori, and Cawnpur. The London Missionary Society, besides its station at Benares, has work at Mirzapur, Almora, and Rani Khet in the hill region. There is a German Mission at Ghazipur. Ladies' missionary societies co-operate with the missionaries at many of these stations, attending specially to work in the zenanas and schools. Education, promoted both by the missions and by government, is making fair progress.

**Norway.**—The missionary activity of the Norwegian people began with Hans Egede. But as Norway at that time was united to Denmark, and as Egede was supported and controlled by the mission department of the royal government in Copenhagen, it is proper to refer his labor to the Danish Mission. Entirely national both in origin and operation are the three Norwegian Mission Societies now at work,—the Norwegian Mission to the Finns, the Norwegian Mission Society, and the Mission of the Norwegian Church by Schreuder.

**The Norwegian Mission to the Finns.** Headquarters, Stavanger, Norway.—The Finns, who occupy the northernmost part of Norway, from Roraas to North Cape, are allied to the Tshudi and Samoyedes of Russia, to the Magyars and the Turks, and belong to a race entirely different from the Scandinavian. A distinction is made between the Sea-Finns, located along the fjords and the ocean, and engaged in fishing and a little agriculture, and the Flik-Finns, who, with their herds of reindeers, roam about on the inland plateau;

but neither the former nor the latter understand the Norwegian language well enough to follow a Norwegian sermon, and even if they did, a visit to a Norwegian place of worship would, for most of them, mean a journey of from 50 to 100 miles over tracts of wild and weird land. Since the beginning of the 17th century they have been Christians, but only nominally; and for the last two centuries it has been a heavy task for the Norwegian Church—during the union with Denmark poorly supported by the royal government, yet never given up by the Norwegian clergy—to awaken a truly Christian life among them. Many venerable names are connected with that labor, but not until very recently has the problem been attacked in a systematic and effective way. February 28th, 1888, Bishop Skaar of Tromsø, to whose diocese the Finns mostly belong, sent out an appeal to the Norwegian people, that missionaries or itinerant preachers who could speak the Finnish language should be sent out among them. This appeal was promptly taken up, and by means of a yearly subscription of about 4,000 crowns it has already been possible to set two Finnish-speaking Norwegian preachers to work among them.

**The Norwegian Mission Society** (Det Norske Missions Selskab). Headquarters, Stavanger, Norway.—In the third decade of the present century, after Norway had become an independent state by the separation from Denmark in 1814, there were formed all over the country, but more especially among the followers of the great revivalist, Hans Nilsen Hauge, a number of minor mission associations, the first and the largest among which was that of Stavanger, 1826. These associations sent their money and their missionaries, if any they had, to Basle; the Stavanger Association, however, placed its first missionary, Hans Christian Knudsen, in the service of the Rhenish Mission Society. As a striking sign of the energy of the movement may be mentioned, that the "*Norsk Missionsblad*," which in 1852 became the organ of the mission to the Jews, was founded at Christiania in 1827, and in 1845 followed "*Norsk Missionstidende*," which still is the organ of the mission to the heathen. Then, in 1841, Jon Hougvaldstad, a small tradesman from Stavanger, but a personal friend of Hauge and seventy-one years of age, went to Germany to see with his own eyes what mission societies and missionary schools really were; and the result of his journey was, that August 8th, 1842, all the minor associations in Western Norway consolidated into one society. In 1843 they were joined by all the minor associations of Eastern Norway, and thus was formed the Norwegian Mission Society. It should be noticed, however, that the movement was carried on almost exclusively by laymen, while the Norwegian church, in its official position as a state institution, assumed a very cool and reserved attitude towards it—a circumstance which later proved of importance for the formation of the Mission of the Norwegian Church by Schreuder.

The Norwegian Mission Society is, as might be inferred from its origin, thoroughly democratic in its organization. The minor associations, numbering 900, besides 2,300 woman's societies, still exist, and have retained a considerable proportion of autonomy. They form eight circles, with their administrative centres respectively in the following cities: Christiania,

Hamar, Drammen, Christianssand, Stavanger, Bergen, Trondhjem, and Tromsø. Each circle holds a conference two years in succession in June or July, and the third year the General Assembly meets, deciding all the more important questions for the following three years. The central administration, consisting of the director of the Mission School, a secretary and eight members elected by the Conferences, has its seat in Stavanger. It must consult the Conferences on all important business, and it must carry out the decision of the majority of the General Assembly, irrespective of its own opinion.

In 1887-88 the revenue of the Society amounted to 349,514 kroner, its expenses to 337,464 kroner. It receives an annual support of about 30,000 kroner from the Norwegian churches in the United States. It owns a fund of 200,000 kroner, a donation from Mr. P. von Möller at Helsingborg, Sweden, from which it pensions old and worn-out missionaries, or missionaries' widows and children; but its missionaries are not allowed to marry without the permission of the Central Board. It maintains a mission-school at Stavanger, founded in 1843, closed in 1847, but reopened in 1858, and is now in a flourishing condition, with 14 pupils, and now and then visited by Zulus and Malagasses. It also owns a mission-steamer, presented to it by special subscription, and usually stationed at Madagascar.

The denominational character of the Society is strictly Lutheran. According to its laws its missionaries must receive ordination from a bishop of the Lutheran State Church, and in order to obtain that they must, curiously enough, first have a license from the king, which, still more curiously, is valid only for a certain field. No harm, however, appears to have been caused by this requirement.

The Society is engaged in two different fields: (1) Zululand and (2) Madagascar.

(1) The Zulu Mission was begun in 1844 by Schreuder. To the Norwegians, as to other missionaries, Zululand proved a very hard, but after the first hindrances were overcome, a very promising field. The first station was founded there at Umpumulo, in 1850. In 1858 the first convert, a Zulu girl, was baptized at Umpumulo. When Bishop Schreuder in 1876 transferred his services to the Mission of the Norwegian Church, he carried with him a part of the field already under cultivation, namely Entumeni. But the Society continued its labor with great energy and considerable success. In 1887-88 the full members of the congregations numbered 500, church-visitors 2,000, children in the schools 448, catechumens 110, stations 11, ordained Norwegian pastors 14, unordained native preachers and teachers 16.

(2) The Madagascar Mission was begun in 1866, and soon assumed very large proportions, including now not only the Hovas in the inland, with a station in the capital, Antananarivo, a city of about 100,000 inhabitants, but also, since 1874, the Sakalavas, "wild-cats," on the western coast, and since 1888 some points on the southern coast never before visited by Europeans. In 1887-88 the full members of the congregations numbered 16,555, church-visitors 44,000, children in the schools 37,500, ordained native pastors 16, native teachers and evangelists 900. There are in the inland 20 stations with 17 ordained Nor-

wegian pastors, among the Sakalavas 5 stations with 4 ordained Norwegian pastors, and on the southern coast 4 stations with 4 Norwegian pastors.

**The Norwegian Church Mission by Schreuder** (Den Norske Kirkes Mission ved Schreuder). Headquarters, Christiania, Norway.—Hans Palludan Smith Schreuder, b. at Sogndal, Norway, June 18th, 1817; d. at Untumjambili, Natal, Africa, January 27th, 1882, consecrated bishop in the Cathedral of Bergen 1866, was the father of the Norwegian Mission. His "A few words to the Church of Norway," 1842, had an effect throughout the whole country as if a mighty lamp had been lit. He started the Zulu Mission under tremendous difficulties, and it is indebted for its success to his eminent energy, his lofty enthusiasm, and powerful personality. During the war between the English and the Zulus most of the English and German mission stations were disturbed or fully destroyed. But Entumeni was not touched; King Cetewayo had too deep a respect for Schreuder to dare such a thing. The Madagascar Mission he also directed and superintended at its beginning. Nevertheless, although he served the Norwegian Mission Society for thirty years, it was always his wish to be the missionary of the Church of Norway, of the official state institution, and not the missionary of any private association. In 1873 he separated from the Society and a committee was formed, with Bishop Tandberg at its head, and representing the Church of Norway. He took Entumeni with him, and shortly after a new station was founded at Untumjambili in Natal, where a church was built and consecrated in 1881. After his death the mission was continued by his pupils, among whom are several natives, under the direction of the above-mentioned committee, which has its seat in Christiania. In 1888-89 its revenue amounted to 7,072 kroners, and its expenses to 8,864 kroners.

**Norwegian Version.**—The Norwegian belongs to the Teutonic branch of the Aryan family of languages, and is spoken in Norway, whose population numbers 1,925,000. Under the patronage of King Hakon V. Magnussons (1294-1319), parts of the Old Testament, with notes, were translated into the old Norwegian (Pentateuch-Chronicles were edited by Prof. Unger, Christiania, 1853-1862). In late times the Danish Bibles were used. Since the formation of the Norwegian Bible Society in 1816, the New Testament, edited by Bishop Beck, Professors Hersleb and Steverson, and the court-preacher (afterwards Bishop) Pavols, was published. A revised and corrected edition prepared by Prof. Hersleb was published in 1830. A new translation of the Old Testament was also undertaken by Prof. Hersleb 1842-1873. In 1873 an edition of the New Testament revised by Professors Dietrichson, Johnson, and Esseldorp was also published by the Norwegian Bible Society. Some change was made in the language of this edition in order to conform to modern usage. The Old Testament was also revised in the same form and was completed in 1888. An edition of the entire Bible in this revised form was issued in the same year.

**Norwegian-Lapp or Quanian Version.**—The Quanes, a wandering people for

whom this version is made, inhabit that most northerly part of Lapland which is called Finmark or Norwegian Lapland. This dreary region, having for its northern boundary the Arctic or Frozen Ocean, is the habitation of about 6,000 Quanes who until the beginning of this century were left without any version of the Bible in their vernacular dialect. The Bible Society of Finland sent them copies of the Finnish New Testament, but they could not understand it, nor could they read intelligibly the Lappish Testament, though they speak a dialect of Laplandish. In 1822 the British and Foreign Bible Society voted a sum of money for a Quanian version, and at last in 1842 the Norwegian Bible Society published at Christiania a translation of the New Testament, made by a missionary among the Laplanders. The Psalms were published in 1856. In 1875 a revised translation of the 1842 version, prepared by Lars Haotta, with the aid of Bishop Hersleb and Prof. Friis, was published by the Norwegian Bible Society. The British and Foreign Bible Society has of late years undertaken the publication of a version of the Bible, to be prepared by Prof. Jens Andreas Friis, for the Lapps, who number about 30,000, of whom 17,000 live in Norway, and have never had the Bible in their own tongue. They do not understand the Bible of the Swedish Lapps. The Book of Genesis in this new version was printed by the local Bible Society in 1887, and Isaiah in 1888.

(Specimen verse. John 3:16.)

Dastgo nuft rakkasen ani Ibmel mailme, atte barnes sãn addi, dam aino, amas juokkaš, gutte su ala ăssko, lapput, mutto vai agalaš æller-sãn ăžuši.

**Nott, Henry**, b. England 1774; sailed 1796 for the South Seas as a missionary of the L. M. S.; stationed at Tahiti, Eimeo, and Huahine. Early in 1802, he with Mr. Elder made the first missionary tour of the island, and in thirty days he preached in nearly every district. During the war of rebellion in 1808 Mr. Nott remained at Eimeo. In 1825 he visited England, married, and returned to Tahiti in 1827. Having after twenty-seven years' labor completed the translation of the Scriptures into the Tahitian language, and being in ill-health, he returned to England in 1836. He there revised the translation and had it published at the expense of the British and Foreign Bible Society. In 1838 he re-embarked for Tahiti, and soon after his arrival in 1840 retired from active service. He died at Tahiti, May 2d, 1844.

**Nott, Samuel**, b. Franklin, Conn., U. S. A., 1788; son of Rev. Samuel Nott of Franklin, and nephew of Rev. Dr. Eliphalet Nott, President of Union College; graduated at Union College 1808, Andover Theological Seminary 1810; ordained 1812 with Newell, Judson, Hall, and Rice, the first company of missionaries sent out by the American Board; embarked with Gordon Hall February 24th. After some delays from the East India Company, they reached Bombay, where they commenced the first mission of the Board in India. In 1815 Mr. Nott was taken seriously ill, and the physicians decided that he could not remain in that country, and that he should return to his native land or to Europe. He embarked for America by the way of England. He died, July 1st,

1869, at the residence of his son in Hartford, Conn., aged 81.

**Nowgong**, a town of Central Assam, south of the Brahmaputra, between Gauhati and Tezpur. Mission station of the American Baptist Missionary Union; 1 missionary, 2 ladies, 26 native helpers, 1 church (self-supporting), 89 church-members, 12 schools, 251 scholars.

**Nuba-Fulah Race.**—A very considerable number of tribes, some in Egyptian Soudan, and some over against them on the west coast of North Central Africa, are found to differ so much, both linguistically and ethnographically, from the several races into which the Africans have been heretofore divided, that some of the ablest recent writers on these subjects, such as F. Müller and Dr. R. N. Cust, have added a new class or group, with two sub-groups which they call Nuba and Fulah. This twofold race, Nuba-Fulah, is evidently very ancient,—doubtless aboriginal in the lower basin of the Nile, which still continues to be the headquarters of the Nuba portion of the general group. As the old Egyptian race was doubtless divided by the incoming of the Bantu family at an early age (see articles on the Bantu and on the Hottentot), and a part of it carried southward until it came to the extreme south angle of the continent, and there took the name of Khoi-Khoi and then Hottentot, so the same incoming family doubtless proved an entering wedge, on its way up the Nile valley, to split the original Nuba race, through which it passed, on the south of Egypt, causing a portion of it to move first southward, then westward, till it lodged, a part of it on the sources of the Nile, part east of Lake Nyanza, and a part on the Niger, while another part moved on till it finally came to have its headquarters in the lower basin of the Senegal, and there came to be known as the Filatah, Fuladu, Pulah, or Fulah people, being so called because they were of a light brown, and thus in strong contrast with the Negroes of a pure black around them. The present scattered or fragmentary condition of the Nuba-Fulah race, a portion of it being found on the east of Lake Nyanza, as the Kwafi and Masai, other portions on the sources of each of the two Niles, and yet other portions in different parts of Nigritia, all the way from Dar-Fur to the Senegal, as in groups here and there among the Hausa and other mid-African tribes, all goes to support the idea that the original Nuba-Fulah race was broken and scattered, as already indicated, by the divisive and propelling force of another powerful race, as the Bantu, at an early age of African history.

One important branch of the Nuba stock still has its home in the original abode of the race—the basin of the Nile from the first to the second cataract. The earliest account we have of them represents them as a powerful, superior race, of good features, not so dark on the northern border as farther south, and quite distinct from both the Egyptian and the Negro. They were once Christians, but now, like all their neighbors, profess the Islam faith, and speak, some the Arabic, and some their own vernacular language. Some live as nomads in tents, and some as a settled, industrious, thriving people, in well-built houses. There is also a tribe or group of tribes, evidently related to the Nuba

family in both blood and language, in Kordofan and Dar-Fur. They differ from the Negroes around them, believe in Islam, and speak, some of them, what is called the Koldagi dialect, some of them the Tumale, and some the Konjara. Other tribes of this class, as the Kwafi and Masai, who call themselves Loikob, and designate their language as the Enguduk, are found on or near the equator. The Kwafi have the Victoria Nyanza on their west and the Masai on their south. Both tribes, differing materially, as they do, from the Hamitic race on the north, and from the Bantu on other sides, are counted as belonging to the Nuba-Fulah group. They are represented as the most savage of all East African tribes. Still another group of tribes, as the Berta and Kamail, belonging to the Nuba-Fulah race, has its home on the Blue Nile, north of the Galla and west of Abyssinia. In this race are included also the Nyam-Nyam, together with the Golo and the Monbutto on the sources of the White Nile and the Shary.

Turning now and going westward between the 10th and 15th degrees of north latitude, we come upon several families of the sub-Fulah group, scattered here and there all along from Dar-Fur through the Hausa and Mandingo countries, till we come to where they abound in Bundu, Futa Jalo and Futa Toro, south of Lower Senegal, where “they dominate,” says Dr. Cust, “as Mohammedan foreign conquerors. They have placed their foot firmly down in the land of the Wolof, and the people of the coast have come under their influence as far as the river Nunez. They are numerous and powerful in Mandingo-land and in the kingdom of Massina, south of Timbuktu. In Hausa-land the kingdom of Sokoto and Gando is their creation, including the whole of the Hausa territory. Far to the east we find them in Bornu, Mandara, Logon, Baghirmi, Wadai, and even in Dar-Fur. Their tendency to expand is not on the wane, and they have made a powerful impression on the Negro population: from the union of the two races a mixed population has sprung up, called Torodo, Jhalonki, Toucouleur, and other names.” It is unnecessary here to detail their history or speculate on their origin. Their movement has been comparatively of late date, by force of arms, and coupled with the spread of the Mohammedan religion. They are spoken of by a recent writer as “an interesting Mohammedan people of the Western Soudan in Africa, remarkable for their enterprise, intelligence, and religious zeal. They are a race, and not a nation; have many tribes, several shades of color and varieties of form, probably from the fact that they have blended with various subject races. They cultivate Mohammedan learning with much enthusiasm. Their history is quite obscure. Saccatoo is their principal state, but they are the predominant people of many countries in the Soudan.”

Very little mission work of a Protestant Christian character has been as yet done or even attempted for this race; but the eyes of not a few are on the great region they occupy, with high purpose and hope of reaching them soon. (See article on “The Soudan” in this work; also article on “Mahdism and Missions,” in “Missionary Review of the World,” New Series, vol. iii.)

**Nuba Version.**—The Nuba belongs to the Nuba-Fulah group of African languages, and is vernacular in Nubia. For the Mohammedans about Dongola, East Africa, the British and Foreign Bible Society published in 1884 the Gospel of Mark, which the late Prof. R. Lepsius of Berlin had translated into the Fadidja dialect of the Nubian. Prof. Lepsius prepared his translation originally for his Nubian grammar, from which it was republished in Roman characters and edited by Prof. Rheinisch of Vienna. Steps are now being taken, according to the Report for 1888, by Rev. R. H. Weakley to have a part of the Society's version translated into the Arabic character, and to have its value tested by the Nubians resident in Alexandria and Cairo.

**Nubia**, a country of Eastern Africa, south of Egypt, and forming a part of the Egyptian or Eastern Soudan (see Africa and Soudan).

**Numadzu**, town in Japan. A mission station of the Methodist Church of Canada, in Southeastern Nippon, not far from Shidzuoka; 1 native pastor, 105 church-members. Protestant Episcopal Church; 1 church, 4 communicants, 11 Sabbath-schoolers.

**Numpani** (Nimpani, Nipani), British India. A town in the Belgaum district, Bombay, 40 miles north of Belgaum. Population, 9,777, Hindus, Moslems, Jains, Christians. Mission station of the Swedish Evangelical National Society (Swedish Fatherland's Association).

**Nundi Gopee, Nath.**, b. in Calcutta, India. While a student in Dr. Duff's school he became a Christian, and was baptized by Dr. Duff in 1832. He afterwards, at the recommendation of Dr. Duff, went to the Northwest to become a teacher in the orphan-school at Futtehpore, supported by the British residents. He was licensed to preach by the Presbytery of Furrukabad in 1843, and the following year was ordained to the work of an evangelist. In the Sepoy mutiny he escaped with his family from Futtehpore, to fall into the hands of the insurgents, and suffered much before he was finally released. He died in 1861, while pastor of the church at Futtehpore, under a severe surgical operation. When the hour of trial came, he said: "I am not afraid to die; I can trust that Jesus whom I have so often preached to others." Dr. Duff wrote, on hearing of his death: "I mourn over him as I would over an only son, till at times my eyes are sore with weeping. When shall we have scores and hundreds clothed with his mantle and imbued with his spirit?"

**Nupé Version.**—The Nupé belongs to the Negro group of African languages and is spoken by the Nupé tribe on the Niger, West Africa, for whom the Revs. Messrs. C. Crowther and J. F. Schön translated the first seven chapters of Matthew, which the British and Foreign Bible Society published in 1860 at the request of the Church Missionary Society. Since 1884 the four Gospels have been published as translated by Archdeacon Johnson, and edited by Rev. J. F. Schön of the C. M. S. In 1886 an edition of 500 copies each of the Gospels of Luke and John as translated by Mr. Johnson was published in the new orthography as rendered by Dr. Schön.

(Specimen verse. Matt. 5:16.)

*Lugo ebayetinye un nán atsi eye ezabo, a-a-le etun wangi 'yeye, a-fe dżin yebo ndaye nan dan alidżana nan.*

**Nusairiyeh, The.\***—The origin of the Nusairiyeh people seems lost in the obscurity of antiquity. In asking one of their chiefs concerning their origin the most he could say was that it was very ancient. Another says that they descended from the Persians; others, from the Philistines, or from the tribes that Joshua drove out of Palestine. They have dwelt for hundreds of years where they now are, and it is probable that ethnologists and historians have taken little or no notice of them because of their political insignificance and low state of civilization. However, their religious practices sustain the theory that they are descended from some of the ancient heathen tribes of Palestine. At present they are a mixed race, just like many other races bordering on the Mediterranean, owing, no doubt, to the Crusades, when many thousands of Europeans were lost and became mingled with the inhabitants of the country, and this fact probably accounts for the existence of so many blonde complexions among the swarthy aborigines. They receive their name from Nusair, who, with his son Abu Shaeab, was a renowned leader and teacher among them, and who flourished some centuries ago. They inhabit Northern Syria and Cilicia, and number about three hundred thousand souls. As to their religion, they are a branch of the Shiites who broke off under the leadership of Nusair, and their religious system was brought to perfection by one of his descendants named Khusaib. They are practically pagans, although they claim to be followers of Mohammed. They reject the caliphate of "Abu Bekr" and his successors down to "Abd ul Hamid," the present incumbent, and claim that the succession belonged of right to Ali. The contest for the caliphate was between these two after the death of Mohammed. Ali was Mohammed's son-in-law, having married Fatima, his daughter by Khadijah, his first wife; and Abu Bekr was his father-in-law, Mohammed having taken Ayesha, the daughter of Abu Bekr, as one of his fourteen wives. Tradition says that Abu Bekr compassed the death of his rival by strategy, the circumstances being that Ali was praying in a mosque, and Abu Bekr learning of it, sent two of his retainers to simulate a deadly quarrel outside of the mosque, knowing that Ali, hearing the disturbance, would rush out to separate the combatants, when they were to fall on him and kill him. The result was as anticipated, and the deadly feud which continues to this day was then precipitated. The followers of Ali devised a religion of their own, and being in the minority, and fearing persecution, they bound themselves by the most horrid oaths to keep it secret. None are initiated into its mysteries under 18 years of age, and women not at all, except that they are taught one short prayer to purify them. The applicant for initiation to the secrets of the Nusairiyeh religion must bring twelve men as security, and these must

\* This article is based largely upon an Arab book entitled "A Revelation of the Secrets of the Nusairiyeh Religion," by Suleyman Effendi of Adana.

be secured by two others; and not satisfied with this, the applicant is required to swear by all the heavenly bodies that he will never reveal the mysteries he is about to receive under penalty of having his hands, head, and feet severed from his body, and this same penalty will be visited upon him should he fail to complete what he has now begun. Consequently all the Nusairiyeh are extremely reticent, and will never converse on the subject of their religion. Some years ago one of their number, Suleyman Effendi of Adana, revealed their mysteries, at least in part, and after a time mysteriously disappeared, and no doubt he suffered the penalty. Their religion is a conglomeration of almost all religions, ancient and modern, false and true. They have introduced the beliefs and the ceremonies of the Jews, the Greeks, the Egyptians, the Phenicians, the Mohammedans, and the heathen in general. They worship Ali Ibn Abu Taulib, the prophet Mohammed, and Suleyman the Persian. They consider Ali the Father, Mohammed the Son, and Suleyman the Holy Spirit,—a perfect Trinity; but they pay their chief adoration to Ali, ascribing to him the divine nature and attributes and also creative power, and the devout worshipper is represented as supplicating "his Lord, Ali Ibn Abu Taulib, with a reverent heart and a humble spirit, to deliver him from his wickedness." They teach that Ali created Mohammed, and that Mohammed created Suleyman, and that Suleyman created five great angels, and that the angels created the universe, and that each angel is entrusted with the management of some particular part thereof, viz.: One has charge of thunder, lightning, and earthquakes; another, of the heavenly bodies; another, of the winds, and receives the spirits of men at death; another has charge of the health and sickness of human beings; and another furnishes souls for the bodies of men at birth. They assign to Fatima a place very much like that assigned by Catholics to the Virgin Mary. They consider that the moon is Ali's throne, and that the dark part commonly called the man in the moon is Ali with a veil thrown over his form, but in the hereafter the veil will be removed and all true believers will see him as he is. Hence they worship the moon. They believe that the sun is Mohammed, and pay divine honors to it. They worship fire, the wind, the waves of the sea,—anything that manifests power; the shades of the dead, the living, even men of influence and renown among them. These last they consider to be possessed of the spirits of the prophets, it may be of Ali himself. They profess to have a warfare, and it consists of two parts. The first is to revile and curse Abu Bekr, Omar, Othman, and all others who believe that Ali or any of the prophets ate or drank, or married, or were born of women, because the Nusairiyeh believe that the prophets descended from heaven without bodies, and that the bodies in which they appeared were not real, but illusory. The second part of their warfare consists in keeping their religion secret from strangers, and in refusing to reveal it under any circumstances whatever, even in the face of death. They believe in the transmigration of souls, and hold that the Moslem sheikhs enter the bodies of asses at death, that the souls of Christian priests enter the bodies of swine, that the souls of Jewish rabbis enter the bodies of apes, that the souls of the wicked among

themselves enter the bodies of clean animals. Those among themselves who disbelieve their religion enter the bodies of apes. Those who are part evil and part good enter the bodies of those who belong to sects other than the Nusairiyeh, while all good Nusairiyeh enter the bodies of Nusairiyeh each one according to his grade and station. If one of another belief should unite with them, they claim that in past generations he was of them, but for some sin he was compelled to enter a strange sect and remain a stated time as a punishment, when he was allowed to transmigrate to his own religion. Formerly they received no proselytes except from the Persians, and they were thus favored because they confess the divinity of Ali. Should one backslide from their religion, they declare that his mother committed adultery with one of the sect with which he has united, and that he has returned to his source. They have numerous feasts, and some of their religious rites are vile and abominable. The Nusairiyeh easily distance all competitors in lying and hypocrisy. They always accommodate themselves to their surroundings, provided they are not able to overcome them. For example, should one enter a mosque with a Moslem, he performs the prostrations and genuflexions just as his companion; but instead of praying as does the Moslem, he inwardly curses Abu Bekr and all his successors, and likewise him who bows at his side. He argues that the Nusairiyeh religion is the body, while all other religions are clothing to be worn and thrown aside at pleasure; and it matters not what a man wears, it does him no injury; and he who does not dissemble thus lacks good sense, for no sensible person will walk through the streets naked. The unpardonable sin with him is to reveal his own religion, for to reveal it is equivalent to forsaking it. In regard to women, they teach that Ali created the devils from the sins of men, and that he created women from the sins of devils; and that is the reason why they do not teach women their religion. They believe that Ali has appeared in human form at various times during the history of the world. As a people, the Nusairiyeh are revengeful, and practice blood atonement in righting wrongs among themselves. They are thievish, and consider stealing, especially from infidels, a virtue. Nevertheless they are cowardly, and will not attempt either revenge or theft unless assured of personal safety. Their deep deceitfulness is no doubt due to the fact that they are sworn to eternal secrecy in regard to their religion. They will not acknowledge that they believe in Ali, for to acknowledge it is to reveal a part of their religion. They will rather deny it with an oath. Considering this fact one can imagine the difficulty of carrying on mission work among them. Socially they are semi-barbarous, and there are many feuds among them, tribe against tribe. They often have bloody encounters, and the hyenas and jackals feast upon the bodies of the slain. Their morality is low. All classes practise polygamy. Social purity is disregarded among the upper classes—as when one chief becomes the guest of another of like rank the host sends his wife to share the bed of his guest. This abomination is not practised among the common people. Politically they are a nonentity, being under the absolute sway of the Turk, and are therefore much oppressed; and were it not that the Turkish Government

places every available obstacle in the way of their enlightenment and advancement in civilization, the rising generation would soon be brought under the influence of the gospel.

**The Mission of the Covenanters Church of America to the Nusairiyeh People.**—As early as 1818 the Covenanter Church of America began to consider the expediency of establishing a Foreign Mission. But various providential dispensations hindered the realization of their hopes until 1856, when the cause of missions was again revived, and Syria was selected as the field of operations. The Rev. R. J. Dodds and Mr. Joseph Beattie, licentiate, accepted appointments as missionaries. The latter was ordained, and both set sail for Syria with their newly married wives in October, 1856. After they had spent some time in Damascus studying the Arabic language, Mr. Dodds settled in Zahleh, a large town in Mount Lebanon, while Mr. Beattie continued to pursue his studies in Damascus. In May, 1858, Mr. Dodds was compelled to abandon Zahleh because of the hostility of the Catholic priests, who instigated persecutions against him, and the people threw his goods into the street. Mr. Beattie then joined him, and they spent the following year in B'hamdûn and Beirût. After several explorations, Latakia, a town of about 15,000 inhabitants, situated on the shore of the Mediterranean, 36° north latitude, was chosen, and there the mission was permanently established in October, 1859. It was intended to operate principally among the Nusairiyeh people, consisting of a number of semi-barbarous tribes who occupy the neighboring Nusairiyeh mountains; but the Moslems and the nominally Christian sects were all found to be legitimate subjects of missionary operations, because of the ignorance and superstition that prevail among them. The Moslems however, were practically inaccessible because of the bigotry and intolerance of their leaders, and so remain to this day. Three native teachers were employed, and a school opened with a bright outlook. But little opposition was encountered until the effects of their teaching began to be apparent, when the prejudices of the people began to loom up in the pathway of the missionaries. The Rev. Mr. Lyde, an English missionary, a gentleman of high attainments and great benevolence, was operating in this field when Mr. Dodds went thither on a prospecting tour, and his health having failed, he presented the property that he had acquired to Messrs. Dodds and Beattie for missionary purposes, and withdrew from the field. The first convert, Hammâd, a Nusairiyeh, was baptized by Mr. Dodds in December, 1861, and then it was felt that the mission had not only been planted, but had taken root. The first convert from any of the Christian sects was Salim Saleh, a youth who was in attendance on the mission school, and whose parents were members of the Orthodox Greek Church. This young man suffered shameful persecution from the members of his own family, and was compelled for a time to take refuge with the missionaries. On account of sickness Mr. Beattie and family visited America in 1863, and having recuperated returned in 1864, accompanied by David Metheny, M.D., and family, who had in the mean time been appointed as a medical missionary. The mission was making steady progress, striking deeper root and stretching out

its branches, and about this time four schools were established in the mountains among the Nusairiyeh, manned by native teachers. The Medical Department added much to the efficiency and influence of the mission by introducing the healing art. Mr. Dodds and family visited America in 1865, in order to recruit their failing energies, and returned the following year with Miss Rebecca Crawford, who took charge of a newly established girls' school. Much difficulty was encountered in persuading the Nusairiyeh to patronize this school. Two influences worked against it: they hold peculiar ideas in regard to women, considering them inferior creatures, and consequently not susceptible of instruction; and again, they were suspicious of the designs of the missionaries thinking that they wished to gain possession of the girls, and after a time to transport them. A building for a girls' boarding-school was erected in 1868, and by this means the girls were separated more from their heathen surroundings, and were brought under the influence of Christian home life, and much more efficient work was done. In May, 1867, Mr. Dodds took charge of a mission station in Aleppo. It had formerly been under the care of the United Presbyterian Church of Scotland. The station consisted of two schools and one hundred pupils. Other schools were opened in various places,—notably in Idlib, a small town in a fertile plain, a day's journey southwest of Aleppo, where there is still a small congregation of Protestants. Dr. Dodds died in December, 1870, and the field was abandoned, the mission not having the force to occupy it. Latterly the Rev. James Martin, M.D., of Antioch, has occupied Idlib, and is meeting with flattering success. Dr. Dodds was admirably adapted to be a successful missionary. He was a classical scholar, and became very proficient in the Arabic tongue. In his day he was ranked with Dr. Van Dyck, who has since become the accomplished author and translator. He was habitually cheerful, possessed of great equanimity of temper, and of a sympathetic disposition; of keen intellect, retentive memory, and great ability of concentration. He died at the early age of forty-six, in the midst of his usefulness, and his loss was deeply felt, both at home and abroad. In the autumn of 1871 the Rev. S. R. Galbraith and his wife and Miss Mary E. Dodds, daughter of the lately deceased missionary, departed for Latakia. They had been there but a few months when Mr. Galbraith fell a victim to fever, and his wife and child returned to America. It was a severe trial for the mission—two deaths following one another in such quick succession, one a veteran and the other a fresh recruit; but one had no sooner fallen than another stepped forward into the ranks, and in 1872 the Rev. Henry Easson accepted an appointment to this field, and arrived on the ground with his family in January, 1873. Dr. Metheny visited America the same year, was ordained a minister, and returned in the autumn. While at home the missionaries were not idle, but did some very effective work by way of instructing the people, and stirring them up to a higher appreciation of mission work. The mission was not without its troubles, since a number of the Nusairiyeh converts were cruelly treated by the Turkish authorities because they had the effrontery to change their religion. Some of them were imprisoned and

others sent to the army, the authorities thus hoping to destroy the germs of Christianity that had taken root among the Nusairiyeh; and in this they were aided and abetted by the chiefs of the people themselves, who began to fear for the consequences. But the result showed that it was the planting of the Lord, and when He plants, who shall pluck up? One of the converts, David Makhloof, was very sorely tried. He was in the army during the Turco-Russian war. His Bible was taken from him. He was flogged and imprisoned in a dungeon with the design of forcing him to deny Christ; but with all the fortitude of the early Christian martyrs, he stood firm and remained true, holding fast the profession of his faith without wavering. He was wonderfully preserved, having several horses shot from under him while in action. He was in the siege of Plevna, but was providentially spared to return to his family, and he is now a burning and a shining light in his own native mountains. And thus the work continued to grow apace. God had brought to naught the machinations of evil men against the spread of His glorious gospel. In the autumn Miss M. R. Wylie went to Latakia as a teacher in the girls' school. The following year the Rev. Dr. Beattie and family visited America to arrange for the education of the children. The girls' school was now enlarged to meet the growing need, and Mrs. Emma G. Metheny also erected a handsome chapel on the mission premises. Shortly after—December, 1875—she was called to rest, and the chapel is now her memorial. In April, 1875, Suadea was included in the mission field. This station is 60 miles north of Latakia, at the mouth of the Orontes, and had been operated by Dr. William Holt-Yates and his wife. The Doctor having died, Mrs. Holt-Yates desired to return to London, her home; and having erected a commodious building upon the mission premises, she donated the entire property to the Latakia Mission, who have since operated the post, Mrs. Yates furnishing £200 a year to sustain a boys' boarding-school there, and a very successful work has been prosecuted. Shortly after Dr. Beattie's return to Syria in June, 1878, he received telegraphic news of the death of his wife, and he immediately sailed for America to take charge of his motherless children. He resigned his connection with the mission, and remained in America. About this time two more vacancies were created in the mission by the marriage of Miss Mary E. Dodds to Rev. D. Metheny, M.D., and Miss Rebecca Crawford to Rev. James Martin, M.D., of Antioch. In 1878 Dr. Metheny and family visited America in search of health. He returned in November, 1879, accompanied by Rev. William J. Sproull and wife, and Miss Mary E. Carson. An effort was then made to expand the work, and eight or ten new schools were opened in the mountain districts. These schools are preaching stations as well, and form centres whence light is shed on the surrounding communities. The nature of the instruction given is intensely evangelistic, and whenever a school is visited by a missionary or a district superintendent, a short religious service is held. In favorable weather the people usually assemble under the shade of some friendly tree, but in foul weather the school building is utilized, and ordinarily every available spot is occupied, while on special occasions the doors and windows are adorned

with eager, expectant faces. Every year adds converts to the Protestant body, and the mission has acquired a strong and beneficent influence throughout the entire field. Miss Carson's health failed, and Miss Wylie returned with her to America in the summer of 1880. Dr. Beattie was persuaded to return to Syria in December of the same year, and opened a theological school for the training of a native ministry. Miss Wylie also returned in May, 1881, and steps were then taken to enlarge the curriculum of the girls' boarding-school, and render it more efficient. The school had grown so much in public favor that many applicants for admission were turned away for lack of accommodations. A boys' boarding-school was also being conducted in Latakia on a small scale, and the need of an industrial department for their benefit was sorely felt. In the autumn of 1881 A. J. Dodds, M.D., and Miss Evadne M. Sterrett, having accepted appointments on the mission staff, repaired to Latakia. Dr. Dodds had recently been graduated from Jefferson Medical College, Philadelphia, with high honors. He was a son of the late Dr. Dodds of Aleppo, and was born in Damascus. He resided in Syria until he was fourteen years of age, and having considerable knowledge of the Arabic language, he entered immediately upon his labors as a physician. He was united in marriage with Miss Mizpah E. Metheny September 26th, 1882. In December, 1882, Rev. D. Metheny, M.D., and Miss E. M. Sterrett were transferred to Cilicia to establish a mission, and they opened schools in Tarsus, Adana, Mersine, and Alexandretta. In 1886 a building was erected in Mersine, and the efforts put forth have met with encouraging success. The population of this section consists of Nusairiyeh, Turks, Armenians, and Greeks. Considerable opposition has been manifested by the authorities, and one teacher was thrown into prison on pretence of having violated the school law—and a Turkish prison is not to be judged by prisons in Christian lands. In October, 1883, the mission was sorely tried by the death of Dr. Beattie. His loss was deeply deplored by all. He was a model missionary, amiable, urbane, and keenly sympathetic, and will always occupy a chief place in the hearts of those who knew him. He was an effective preacher, and in him the last of the pioneers was laid in the tomb. At his demise the theological school was discontinued for a time. During the years 1883 and '84 the boys' boarding-school was enlarged, and a normal department added with the design of training teachers, and commendable progress was made toward the plane of a higher education. In April, 1885, Mrs. A. J. Dodds departed this life, necessitating the return of her husband to America with their child. And now the saddest calamity that ever befell the mission occurred in the loss of Dr. Dodds, who on his return to Syria went down with the steamer "Sidon," that was wrecked off the coast of Spain October 26th, 1885. He was an amiable gentleman, a proficient scholar, well read in general literature, and thoroughly conversant with the various departments of medical science. He was a devoted missionary, a conscientious worker, and eminently successful in the Master's cause. In May, 1886, Rev. William J. Sproull, having resigned his position on the mission staff, sailed for America with his family. In the following November Miss Maggie B.

Edgar arrived in Latakia as a teacher, and Miss Lily B. Joseph in Mersine April, 1887; and in September of the same year the Mission at Latakia was still further reinforced by the arrival of J. M. Balph, M.D., and family, thus supplying the vacancy created by the death of Dr. Dodds, and Miss Willia A. Dodds arrived at the same place in November, to engage in zenana work among the Moslem population. An addition was made to the ministerial force by the appointment of licentiate J. S. Stewart, who was subsequently ordained, and he landed at Latakia with his family in the autumn of 1888. In the mean time the work of the mission was flourishing most encouragingly, and it was becoming more firmly fixed in the affections of the people. A wall of dense prejudice met the pioneer missionaries at the outset; but as the continued dropping of water will wear away the adamant rock, so persistent effort, personal contact, uniform kindness, and patient forbearance for Christ's sake wore away the prejudices of the people, and if the mission were blotted out of existence to-day it would be considered a public calamity. By aiding the destitute, by healing the sick, by sympathizing with the sorrowing, a way was made for the gospel of peace, and, notwithstanding the dogged, determined, persistent opposition of the authorities in closing the schools and otherwise hindering the work, last year (1889) the mission enjoyed more encouraging success than any year since it was founded. The statistics show an increase of 51 communicants,—almost double that of any previous year,—an increase of 27 per cent. The Suadea station, which has not had a resident missionary since it came under the control of the Latakia Mission, is now amply provided for in this respect. Miss Martha Cunningham, M.D., of Belfast, who formerly labored in Antioch, Syria, 20 miles inland, now occupies this important post. Her salary is paid by the

Scotch and Irish Covenanters, and she operates the station in connection with the Latakia Mission. Her presence and energy have given the work a fresh impulse, and bright hopes are entertained for the future of that field where Paul once preached and whence he sailed on his first missionary tour.

The statistical report of the mission for January, 1890, gives the following facts: Number of out-stations 3, ordained missionaries 9, unordained 6, physicians 2, missionaries' wives 4, other ladies 5. Native workers: 6 evangelists, 47 male and female teachers, 11 male and female helpers; preaching places 7, organized churches 2, communicants 230, added during the year 51, Sabbath schools 29, scholars 843, girls' schools 5, scholars 216, other schools 20, scholars 759 (see Ref. Presb. Church of America).

**Nyanja** (sometimes called Chinyanja), a dialect of East Equatorial Africa, spoken on the borders of Lake Nyassa. The New Testament has been translated and published by the National Bible Society of Scotland.

**Nylander, J. C.**, sent out by "Church Missionary Society" to West Africa, from Germany; embarked for Sierra Leone, February 12th, 1806. Here Mr. Nylander became chaplain of the colony till about 1816, when he went to Yongroo Pomah, opposite Free Town, and seven miles from it, where he commenced a mission among the Bulloms. He labored among this superstitious people with unremitting zeal, teaching and preaching. He translated into the Bullom language the four Gospels, the Epistles of St. John, morning and evening prayers of the Church of England, hymns, and elementary books. The mission was abandoned on account of the slave-trade, but Mr. Nylander transferred his flourishing school to the colony, taking his scholars with him. He died in 1825.

## O.

**Oaxaca**.—1. A state on the coast of Mexico. The physical features of this country include some of the grandest scenery on the globe. Stately, picturesque mountains, beautiful plains, deep gorges, roaring cataracts, and luxurious vegetation are everywhere found. Area, 33,582 sq. miles. Population, 761,274. There are 26 towns and cities of over 10,000 inhabitants. Eleven distinct families of Indians are found, among whom an important work is carried on by the Methodist Episcopal Church (North).—2. The capital of the state. It is a live, progressive city of 30,000 inhabitants. An important station and circuit of the Methodist Episcopal Church (North), at present without any missionary; 1 native pastor, 1 assistant, 47 church-members, 1 day-school with 40 scholars.

**Odaiputty Puthur**, a station of the Madras Mission, India, of the S. P. G.; 17 villages are included in this field; 1 clergyman, 100 communicants, 1 boys' school, 3 mixed schools, 111 scholars.

**Ode Ondo**, town in Yoruba, Africa, near Abeokuta. Mission station of the C. M. S. (1876); 2 out-stations, 1 native pastor, 2 other

native workers, 80 church-members, 1 school, 34 scholars.

**Odonga**, a region north of Herero, West Africa, very fertile but full of fever, inhabited by the Ovamboes, a negro race. In 1870, 10 Finnish missionaries were allowed to settle here, and formed three stations at Omandongo, Olukonda, and Omulonga. The king liked them better than his own medicine-men, and when in 1883 they translated Luther's Catechism and some extracts from the Bible, and converted six young men, he decided to investigate the affair thoroughly, the result of which was, that he ordered the Finns to instruct his whole people. In the same year he died, but his successor proved also favorable to the missionaries, and for their sake he ordered that the dead king's wives and councillors should not be killed.

**Odumase**, a town on the Amu or Volta River, Gold Coast, West Africa, in the extreme northern part of the district of Adangme, north-east of Akropong. Mission station of the Basle Missionary Society. In 1856 two of the king's sons were converted, and now the station has 461 members, 236 communicants.

**Ogbomoshaw**, town in Yoruba, West Coast Africa, 200 miles inland from Lagos, on the Gulf of Guinea. Climate tropical, though not oppressively hot; unhealthy, but better than on the coast. Population, 75,000. Religions, idolatry and fetichism; a few Moslems. Many gods, but few carved idols; certain trees, nuts, shells, rocks, etc., used as symbols. Social condition very low, but improving. Polygamy and domestic slavery common. Mission station Southern Baptist Convention (1851); 2 missionaries and wives, 1 church, 18 church-members, 1 school, 20 scholars. Missionaries of the C. M. S. from Ode Ondo visit it occasionally.

**Ohneberg, George**, a missionary of the United Brethren to St. Croix, West Indies. He was one of the first of the United Brethren who succeeded in establishing himself on this island. He went from the island of St. Thomas to St. Croix in April, 1751. The Christian negroes welcomed him with open arms, for since the mission was suspended in 1742 they had received only occasional visits from the missionaries at St. Thomas. He was hardly settled there before both himself and the Christian slaves had to endure many persecutions from the pagans by whom they were surrounded. The huts of the negroes were set on fire, and sometimes entirely destroyed. Mr. Ohneberg's house was burned, but his furniture was saved by the efforts of the Christian negroes. When these pagan people found they could do nothing to unsettle Mr. Ohneberg, and that he went on with his work, they gave up their persecutions and left him in peace. An estate of four acres was soon purchased by the Brethren, where they built a church and dwelling-house, and named the place "Freidensthal." The work increased more and more till the little church at Friedensthal could not contain the hearers, and service for nearly twelve months was held in the open air. As many as a hundred negroes were annually baptized into the church.

**Oita**, a town of the Matsuyama circuit, in the district of Hiroshima, South Nippon, Japan. Mission station of the Methodist Episcopal Church (South); 1 missionary and wife, 10 communicants, 2 Sunday-schools, 37 scholars.

**Ojibwa Version.**—The Ojibwa belongs to the Indian languages of British North America and the United States. The first part of the Scriptures published for the Ojibwa Indians was the Gospel of John, issued by the British and Foreign Bible Society in London in 1832, translated by John and Peter Jones, two Ojibwas in the service of the Methodists. In 1838 the American Bible Society issued an edition of the same Gospel, and in 1844 the same Society published the entire New Testament. A revised edition under the superintendence of the Rev. Sherman Hall followed in 1856. At the expense of the Society for Promoting Christian Knowledge, the Psalms, translated by Dr. O'Meara, were published at Toronto in 1854. The British and Foreign Bible Society published in 1874 the Minor Prophets, translated by the Rev. R. McDonald of the Church Missionary Society, and in 1886 the Book of Genesis.

This tribe is sometimes confounded with the Chippewas of Athabasca, an entirely different tribe

(*Specimen verae.* John 3 : 16.)

**Gaapj shauendv sv Kishemanito iu aki, ogion jimigiuenvn iniu baiezhigonijin Oguisvn, aueguen dush getebeuieinimaguen jibvnatizisig, jiaiat dush iu kagige bimatziziun.**

**Okahandya**, a town in Hereroland, West Africa, east by northeast from Ojimbingue, and north of North Barmen. Mission station of the Rhenish Missionary Society; 2 ordained missionaries, 3 salaried and 5 volunteer native helpers, 180 church-members.

**Okayama**, a town in South Japan, 100 miles west of Kobe, on the highway thence to Hiroshima, 5 miles from Inland Sea. Climate mild, humid. Population, 35,000. Mission station A. B. C. F. M.; 2 missionaries and wives, 3 other ladies, 43 native helpers, 48 out-stations, 6 churches, 1,122 church members, 6 schools, 401 scholars.

**Okrika**, town in West Africa, on an island near the mouth of the Niger River, 30 to 35 miles northwest of Bonny. Climate unhealthy, owing to the surrounding dense mangrove-swamps. Population, 15,000. Race and language, Ibo or Idso. Religion, fetich-worship, now declining under the influence of Christianity. Government in the hands of a king and chiefs. Mission station of the C. M. S. (1885); 1 unordained missionary and wife, 1 out-station, 1 church, 10 communicants, 1 school.

**Ombolata**, a station of the Rhenish Missionary Society in Nias, Sumatra, East India, founded in 1873; 1 missionary, 4 native helpers, 283 church-members, 81 communicants.

**Omburo**, a town in Hereroland, Southwest Africa. Station of the Rhenish Missionary Society; 1 missionary, 3 native helpers, 145 members, 50 communicants.

**Ongole**, a town of 9,200 inhabitants in the Nellore district, east coast of Madras, India, half-way between Nellore and Masulipatam. Mission station of the A. B. M. U. The mission in the Nellore district was begun in 1842. From 8 members in 1867 it increased to 3,269 in 1877. Then the famine came. Idols were prayed to, but in vain. The missionaries came to the rescue, and with the aid of English money a canal was built, which will prevent the recurrence of any similar famine. The grateful Ongolites then came in large numbers to listen to the preaching of their benefactors. The station has now (1890) 2 missionaries, 3 female missionaries, 143 native helpers, 236 out-stations, 16 self-supporting churches, 17,159 church-members, 242 schools, 2,130 scholars, 1 high-school, 101 students.

**Onitsha**, a town on the upper course of the Niger River, West Africa, northeast of Alenso. Mission station of the C. M. S.; 4 native workers, 200 church-members, 1 school, 80 scholars. In 1882 the king ordered that Sunday should be kept holy in all his dominions.

**Onomabo** (Anamabu), a circuit of the Wesleyan Missionary Society in the Gold Coast, West Africa, which contains 30 chapels, 84 preaching places, 4 missionaries and assistants, 1,928 church-members, 5 Sunday-schools, 598 scholars, 5 day-schools, 488 scholars.

**Oodeypore**, a town in the Merwar district, Rajputana, North India, northwest of Neemuch and south of Todgurh. Mission station of the United Presbyterian Church of Scotland; 1 missionary, 2 native workers, 14 church-members, 4 schools, 12 teachers, 421 scholars, medical mission.

**Oodoopitty**, town in Jaffna district, Ceylon. Station of the A. B. C. F. M. (1816); 1 missionary and wife, 1 native pastor, 1 church, 109 church-members, 1 girls' school, 25 scholars. The educational work carried on here and in other parts of the Ceylon Mission is almost independent of aid from the Board. In all departments of church work "there is genuine progress in Ceylon."

**Oodooville**, town in Jaffna district, North Ceylon,  $5\frac{1}{2}$  miles north of Jaffnapatam. Hot, but healthy. Population, 2,354. Race and language, Tamil. Religion, Sivaism. Natives, half-civilized farmers. Mission station A. B. C. F. M. (1831); 1 ordained missionary, 1 female missionary, 54 native helpers, 2 out-stations, 3 churches, 380 church-members, 15 schools, 1,013 scholars.

**Ooshooia**, a town in Terra del Fuego, South America, on the north shore of the Beagle Channel. Mission station of South American Missionary Society (1869); 1 superintendent, 2 assistant missionaries, 1 female missionary, 3 native helpers. The work in these islands was commenced by Captain Allen Gardiner, who visited the place in 1851. Not only have the natives been improved morally, but the cause of civilization in general has been aided; for shipwrecked crews are now taken care of and guided to places of safety, instead of being massacred—a direct result of missionary labor.

**Ootacamund** (Utacamund), a town in Madras, South India, in the Coimbatore district, in the hill country, near Coimbatore, and southeast of Tillicherri. Mission station of the C. M. S. (1870); 1 native pastor, 5 other agents, 391 church-members, 9 schools, 425 scholars.

**Opium in China.**—In the millennium one of the most incomprehensible facts of history will be the way in which opium was forced upon the Chinese Empire. If heathen had done it, it had not been so strange, nor would it excite such surprise had it been the work of a papal power, for under that the Word of God is not allowed to mould the national character; but that England should be the guilty one—that source whence the gospel flows to so many lands, that home of Bible-societies—will be the wonder of that day.

One of her own citizens, Archdeacon Moule of Shanghai, says: "British authorities in India, well aware of the attitude of the Chinese Government, deliberately prepared and sent opium to China, with only two years' intermission, for sixty years" ("Missionary Review," 1889, 36). The Shanghai Conference of 1877 says emphatically: "We know that opium is a curse, both physically and morally, to the Chinese. We must appeal to the great heart of England, and when her heart beats warmly on this question this foul blot on her fair name will be wiped away." Mr. Alexander Wylie of the British and Foreign

Bible Society says: "Unless some means be found to check the practice, it bids fair to accomplish the utter destruction of that great empire." Rev. George Piercy, for thirty years a missionary, says: "No one can fully comprehend all the evil that the English nation has done by manufacturing and supplying this death-dealing poison to the millions of China." Rev. Howard Malcom, of U. S. A., says: "No one can describe the horrors of the opium trade. That the government of British India should be the prime mover in it is one of the wonders of the 19th century. The escutcheon of England is made to bear a blot darker than any other in the Christian world" (Report of London Missionary Conference, 1888, vol. i. p. 472). Rev. J. Hudson Taylor says: "In China are tens of thousands of villages with small trace of Bible influence, but hardly a hamlet where the opium pipe does not reign. It does more harm in a week than all our missionaries are doing good in a year. The slave-trade was bad, the drink is bad, but the opium traffic is the sum of villainies. It debauches more families than drink, and it makes more slaves than the slave-trade."

Such testimonies might be multiplied, but we want facts; and from an article by Rev. G. L. Mason of Huckow we glean the following ("Missionary Review of the World," 1889, pp. 36-40):

Previous to the 18th century opium was used in China only in small quantities as a medicine. Till 1767 the trade with India was through the Portuguese, who imported annually about 200 chests, each weighing 140 lbs. Even as late as 1830 a large city like Hangchow had no opium-dens. Now it has 2,000. The rapid growth of the evil dates from 1773, when the East India Company entered on the business. In 1790, 4,054 chests were imported; in 1799, 5,000; in 1826, 9,969; in 1830, 16,800. In 1834 the East India Company closed its factory, but British officials continued the traffic, bringing 34,000 chests in 1836. After that, piculs of 133½ lbs. each were substituted for chests, and in 1850 52,925 piculs were imported, the number steadily increasing to 75,308 in 1880; in 1887 it reached 96,746 piculs, thus growing from 12 tons in 1767 to 5,312 tons in 1887 (London Missionary Conference, 1888, vol. ii. 546).

Let us try to catch a glimpse of the work of death wrought by this immense amount of opium. The opium-smoker can be detected in a crowd by his hollow eyes, sunken cheeks, emaciated frame, and sallow complexion. He needs three hours a day to inhale the drug, and then he cannot work more than two hours before he must repeat the dose. If he has not time for his vice and opium, he chooses the last. If he has not money enough for both, he buys only opium. If he has no money he pawns his clothes. If they are already pawned, he steals. He even sells his children into slavery, or his daughters to a life of shame, that his accursed appetite may be fed. Often wives are sold that the husband may have his opium. If he cannot get the drug, water flows from his eyes, his throat burns, his extremities are cold, and he dies in agony (London Missionary Conference, 1888, vol. i. 128).

One missionary reports that in three years he was called to attend thirty-six attempts at suicide caused by opium ("Missionary Herald," 1889, p. 255).

An opium-smoker came to another missionary from a distant city to be cured of the habit. Soon he became so sick that the missionary feared he would die, and told him so. He thought it all over, and said, "Teacher, I take the responsibility: live or die, do for me what you can;" and by the blessing of God on the means employed, and in answer to prayer, the poor wretch was brought back from the very gates of death (London Missionary Conference, 1888, vol. i. 136).

The traffic has doomed to death as many as would repeople London were its four millions to leave their houses empty to-day (Id., vol. ii. 546).

Up to 1860 opium was smuggled into China. In 1780 (because they could not take it on shore) it was stored on two vessels anchored near Macao, and thence taken in charge by Chinese smugglers. The Abbé Raynal (Tract i. p. 424) writes in 1770: "The Chinese emperors have condemned to the flames every vessel that imports it." It was prohibited in 1796, 1799, 1809, 1820, 1836, and 1837, and always on moral grounds. In 1828 the severity of the laws almost destroyed the trade. In 1831 and 1834 England sent men-of-war to Canton and armed the lorchas of the smugglers. In 1830 strangling was the penalty for selling the drug, and an offender was thus executed at Macao in 1832, in the presence of a crowd of foreigners. Still Chinese prohibition did not prohibit; but this was no excuse for England, for the Chinese did what they could to defend their country from this onslaught. A crisis came in 1839. The imperial commissioner, Lin, wrote to Queen Victoria, imploring her to put an end to the traffic, and for twenty days committed to the flames 20,283 chests of British opium, thus destroying \$10,000,000 worth of the drug in the vain effort to save their country from English rapacity. This brought on the war of 1840, and at its close, besides ceding the island of Hong Kong, China paid \$12,000,000 for the expenses of the war, besides the price of the opium. But when Sir Henry Pottinger demanded the legalization of the trade, the Emperor Ko Twang replied: "True, I cannot prevent the introduction of the poison, but nothing will induce me to raise a revenue from the vice and misery of my people." It would seem as though a Christian nation would have thanked God for such words from a heathen monarch, and rallied to his help. Instead of that, for fourteen years England stubbornly pursued her course of ruin, till in 1857 a smuggler bearing the British flag was fired on, and this was made the pretext for bombarding Canton, while England and France advanced together up the Peiho toward Peking, and the emperor was forced to legalize the destruction of his people by British opium in the treaty of 1860, negotiated by Lord Elgin, besides paying \$10,800,000 to England and \$6,000,000 to France. This opened five ports to opium and the gospel; and in 1887, eighty years after the arrival of Robert Morrison in China, there was a total of 32,000 converts to Christianity in the empire, and 150,000,000 who were victims of opium either in their own persons or in their families ("Missionary Review," 1888, 678; and London Missionary Conference, 1888, vol. i. 131). If any ask for the secret of so great wickedness on the part of a Christian nation, let a member of its own Parliament give

the answer. The late Mr. Henry Richards said in the House of Commons: "It might be true that England spread among the Chinese demoralization, disease, and death; but there was the Indian revenue. The traffic might create an enormous amount of hatred against England; but there was the Indian revenue. The traffic might constitute a most formidable obstacle to the evangelization of China; but there was the Indian revenue. It might prevent the development of all legitimate commerce, and dishonor England before the world, but there was, etc., etc." ("Missionary Review," 1888, p. 679; London Missionary Conference, 1888, vol. i. 473).

The second opium war only intensified the evil. The government after 1860 made few efforts to discourage the cultivation of the poppy; for if opium must be used, they preferred not to enrich those who had so persistently fastened the plague upon the country. In the province of Sichuan government interference with raising opium ceased in 1865. In July, 1861, the government made a pathetic appeal to England, and in October a supplementary convention was signed at Peking, allowing China to raise the import duty from 30 to 50 taels; but even this England refused to ratify, lest her Indian revenue should suffer.

In 1876 the Chefoo convention opened four more ports to trade, in return for which England agreed that the inland transit duty on opium should differ from that on other goods, so as if possible to check the trade. The additional ports were opened, but this other clause was not ratified. After seven years of evasion China proposes 80 taels transit dues, in addition to the import duty. Earl Granville proposes 70, and insists that China must guarantee not to hinder the trade by further taxes. Next year (1884) the Marquis Tseng claims that China may tax it as she pleases after it has passed into Chinese hands. The agreement, such as it was, was not signed till July, 1885, and went into effect February 1, 1887. By this a total revenue of \$1.10 per lb. brings a little more money into the treasury, but intensifies the evil. The cancer strikes deeper into the heart of the nation. The customs reports for 1887 tell how the new rule "benefits the trade." The trade "acquires stability" and "increased facility." One commissioner reports: "The native dealers send it to markets more distant than before." Forty-five million dollars spent in one year (1887) for foreign opium, half of it by those unable to buy both opium and good food, means immense suffering. In that part of Shanghai under European control more than 1,200 opium saloons were licensed in 1887, and a burglar would be received into the church as soon as a smoker of opium. A missionary preaching on a street in China mentioned the word hell. "Yes," replied a respectable elderly man, "since you foreigners came China has become hell." Some may claim that the concessions of China to England in this matter have been voluntary. Yes, in the light of these facts, as voluntary as the giving up of one's purse to a midnight highwayman.

God grant that England may not persist in this evil course. The United States of America put slavery in the Constitution, and seemed to prosper for nearly eighty years, but retribution did not sleep, and three billions of national debt, 300,000 wounded men, and 500,000 graves

bear witness that it is not safe for a nation to persist in wrong.

**Orange Free State**, one of the Boer republics in South Africa, north of Cape Colony, west of Natal, and south of the Transvaal. (See Africa.)

### Organization of Missionary Work.

—The methods of missionary work are much the same wherever or by whomever they are carried on. Personal influence, public preaching, education, pastoral supervision, do not vary greatly whether found in Africa, Japan, or Turkey, or conducted by Moravians, Episcopalians, Baptists, or Methodists. The agencies by which the methods are conducted do, however, vary not a little, and differences of organization merely, not infrequently seem to imply differences of method and even of aim and purpose.

The purpose of this article is to furnish a statement of the different forms of organization used in mission work, and the agencies employed both at home and on the foreign field.

1. *At Home*.—Into the question of the degree of organization needed, it is not necessary to enter here. It is sufficient to say that the present forms have been the direct outgrowth of the pressing needs of the situation. 1. Missionaries in foreign lands must be supported (the instances of self-support being so few and so exceptional as to be practically ruled out of the question), and money must be raised and forwarded to them. 2. It is not every man or woman who, however willing, can advantageously work in foreign lands; there must be some means for selecting those who are best qualified. 3. In the conduct of foreign work two things are essential: first, that expenditure be proportioned to receipts; second, that different sections of the great work shall not clash, or one assume relatively undue importance over another. It thus becomes necessary that there be some central authority to keep, so far as practicable, an even hand over the whole wide extent. 4. Those who give for the support of missions have a natural and righteous desire to know what is accomplished by them, and there must be the means of collecting and imparting that information. 5. As mission work in most instances involves the holding of property, there must be some corporate body having a recognized existence before the law.

The necessity of meeting these demands has resulted in the formation of Missionary Societies or Boards, so organized as to provide for these varied departments.

As full a list of these as it has been practicable to secure is printed in Appendix C. For convenience there they have been divided into sections.

I. Those societies which are engaged directly in general foreign missionary work by sending out missionaries, and which are not confined by their constitutions to any particular phase of that work or to any special country. They are either interdenominational, i.e., drawing their support from different churches, or represent some one of the different denominations.

II. Woman's Boards. Societies organized by women, with special reference to work among women, and either independent, i.e. sending out their own missionaries, or acting in connection with some general society.

III. Special Societies which are confined by their constitutions to specific forms of work or to

distinct territories. These include: (a) Aid societies, which merely collect funds to assist other societies, especially from people who are interested in their work, but are not naturally included in their constituency. (b) Bible and Publication Societies, which engage directly in foreign work by the employment of colporteurs and distributing agents. (c) Seamen's Societies, which undertake foreign work for seamen. (Many local organizations are not included in this list.) (d) Medical Missionary Societies, whose object is to train and furnish physicians (male and female) who shall enter the foreign work, either independently or in connection with some general Society.

IV. Individual efforts and miscellaneous organizations, including many of the "Faith" missions.

All of these with regard to which it has been practicable to secure any statement either from headquarters or from published accounts, will be found described under their several headings. We are concerned in this article chiefly with the general statement of the organization and agencies.

ORGANIZATION. I. *Organized Missionary Societies or Boards*.—These may be classed under three general heads: 1. Those directly controlled by some ecclesiastical organization. 2. Those ecclesiastically connected with some denomination, but not controlled by it. 3. Those independent of any ecclesiastical connection.

1. Those directly controlled by some ecclesiastical organization. Among these are the Presbyterian Boards; the Missionary Society of the Methodist Episcopal Church (North), U. S. A.; the Domestic and Foreign Missionary Society of the Protestant Episcopal Church in the United States; the Missionary Society of the Moravian Church; and most of the Lutheran Boards of America and Europe. In them the society or board is a committee appointed by and responsible to the general governing body of the church or denomination. These are: The General Assemblies of the various Presbyterian Churches; the General Conference of the Methodist Episcopal Church (North); the General Convention of the Protestant Episcopal Church in the United States; and the General Synod of the Moravian Church. Whenever there are so-called members, directors, etc., the term is merely honorary, indicating that such persons have by virtue of certain grants of money been allowed certain privileges, e.g. of receiving regularly the Society's publications, or attending certain regular meetings. They do not indicate any right to vote upon any action of the Society or Board. Officials are required to be long to the denomination, and missionaries must have received ordination from authorities recognized by the Church. In case of difference between the missions and the Board there is an appeal to the General Assembly, etc.

2. Those ecclesiastically connected with some denomination, but not directly controlled by it. Among these are the Church Missionary Society, the Society for the Propagation of the Gospel, and the various Baptist, Methodist, and Wesleyan Societies of England, the United States, and Canada. In these the societies or boards are composed of members of the denomination which they represent, either by virtue of grants of money, or by appointment to represent certain churches. Their officials and

missionaries are members of the denomination, and are required to conform to its customs and discipline. So far as the direction of the affairs of the society or mission is concerned, the authority of the board itself is final—there is no appeal.

3. Those independent of ecclesiastical relations. Among these are the American Board of Commissioners for Foreign Missions, the London Missionary Society, the Paris Evangelical Society, the Basle and Berlin Missionary Societies, the British and Foreign and American Bible Societies, and most of the special societies. Here, however, we find again two classes: (1) Those which are general in their membership; and (2) those that are self-perpetuating, or close corporations.

The first class includes the London Missionary Society, the Bible Societies, and most of the special societies. In them the membership is absolutely unlimited in number, and any person can become a member by acceding to certain conditions. He then has the right to vote in the annual or general meetings of the society when the special committees or boards are elected.

The second class includes the A. B. C. F. M., the Paris Evangelical Society, and the Basle and Berlin Missionary Societies. In them the membership is restricted in number, and the right to vote at any meeting of the society is confined to the actual members of the society, who alone have the right to elect other members.

In neither class is there any restriction of denominational connections or of special ordination and discipline, though, as a matter of fact, both the A. B. C. F. M. and the London Missionary Society have become Congregational societies.

The decision of the general society in every case is final—there is no appeal.

II. *Faith Missions.*—These in general are mission enterprises, in which the missionaries go to the foreign field without the assurance of any definite or continued support from the home land. They usually claim to put forth no efforts to secure such support, beyond the offering of prayer to God. In some cases they seek to support themselves by some occupation on the ground; but as a rule they give themselves entirely to their work, relying solely upon whatever gifts may come to them from friends at home, or may be given by travellers and others who visit them. In most instances they are carried on by individuals, but occasionally they have a more or less elaborate organization. The most prominent instance of these is the China Inland Mission. (For a full statement see article.) There is no formal organization, but a committee or council receives and forwards funds, publishes reports, and renders accounts. The same thing is practically done by individual friends for all the smaller Faith Missions. Public appeals are seldom made, as in the case of the organized societies, and the missionaries are absolutely independent (in most cases) of any ecclesiastical direction, though they are always connected with some religious body.

AGENCIES.—The agencies employed by the organized societies in the prosecution of the work of the five departments, viz., collection and forwarding of funds, selection of missionaries, direction of the foreign work, furnishing

reports, and holding of property, are, 1. A committee; 2. Executive officers.

1. *The Committee.*—In the case of the societies of the first class enumerated above, viz., those directly under the control of an ecclesiastical organization, the committee and the board are identical. In the other classes they are generally appointed by the general society, though in some cases, as in the American Baptist Missionary Union, the society appoints a Board of Managers, which in its turn appoints an Executive Committee. However appointed or however named,—Board of Managers, Executive Committee, Prudential Committee, Advisory Committee, etc.,—its duties are to conduct the affairs of the society under the general direction of the society or the church. All matters pertaining to the particular policy or active operations both at home and abroad, are discussed and decided in its meetings, and it is rarely the case that an appeal is taken to the general society or church, or, if taken, sustained. In fact these committees are, for all practical purposes, the societies, the latter doing, as a rule, little more than mark out general lines of policy. Each committee appoints sub-committees for the special departments. These vary greatly in their form, according to the differing customs of each society.

2. *The Executive Officers.*—These are the secretaries, treasurers, agents, etc. Scarcely any two societies apportion their duties in the same way, but those duties are so familiar that they need no special mention. They are never voting members of the committee, but merely executive officers. The definition of a few of the terms in general use among such of the societies as make a distinction between the different officers will suffice.

A *foreign* secretary has charge of the correspondence with the missions, presents to the committee all questions relating to the conduct or interests of the foreign work, and the estimates for the missions. A *home* secretary has general charge of the home department, with special reference to the raising of funds, and the relations of the committee or board to the churches. In some cases all applications for appointment to the foreign field pass through his hands, in other cases they go to the foreign secretaries. An *editorial* secretary has general charge of the publications of the society, edits the periodicals and the annual reports, and superintends, when he does not prepare, the various leaflets, tracts, etc., by which the knowledge of the society's operations is disseminated. A *field* secretary is one whose special work it is to visit the churches, attend meetings of ministers, and arrange plans for public presentations of the needs of the society. This work of visiting is shared by all the secretaries, according to their time and ability. In some cases there is a *recording* secretary, as a permanent official whose special duty it is to keep the record of all the transactions of the committee. In other cases that work is divided up among the other secretaries. Some societies also employ *district* secretaries, who have special charge of certain sections of country, gather the subscriptions, arrange for visits and addresses, and reports to the committee, generally through the home or the recording secretary. The *treasurer* has charge of all moneys and accounts. He receives all remittances, makes all payments,

keeps all accounts, and receives and disburses the appropriations after the estimates have been passed upon in committee. He furnishes to the monthly periodicals full statements of moneys received, and his accounts are submitted to auditors for careful examination. In some instances the office of treasurer is honorary, the regular work being conducted by an assistant treasurer or a financial secretary. Usually there is also a general or business agent, who has charge of the publishing department, and the purchase and forwarding of outfits, supplies, etc., for missionaries.

The term *honorary* secretary, etc., is at times applied to persons who serve in the office, but without receiving any remuneration.

The executive officers are the only persons connected with the society who receive salaries. Members of committees or of boards invariably serve gratuitously.

In the case of some of the smaller societies, where the duties are not numerous or heavy, they are performed freely by some minister or layman, but in all the large societies, where the duties require the whole time of the officers, salaries are paid.

Taking up now the different departments as carried on by the boards in their home work, we notice:

1. The collection of funds and their remittance to the foreign field.

The income of a missionary society includes (a) all donations, collections, subscriptions, whether by individuals, churches, Sunday-schools, auxiliaries, bands, etc. These are sent either direct to the treasurer, or through some local or church organization, and are, as a rule, applied to the general purposes of the board.

(b) Legacies. These are usually payable in full by the executors of a will, but are in some instances subject to conditions of annuity or application to some distinct purpose.

(c) The income of invested funds (usually legacies). In some cases these funds have been by their donors set apart for special objects, e.g., the payment of the salaries of the executive officers, or the support of certain departments of mission work. Here also may be classed the income from certain buildings owned by the societies. It has become increasingly the custom for the societies to own the premises where their offices are located. The original erection or purchase of these has been in almost if not in every case from moneys contributed for that special purpose, and entirely apart from the ordinary donations to the missionary work of the society. Heavy rents have thus been saved, and in some instances the additional income is sufficient to meet the ordinary expenses of home management.

The remittance of money to the missionaries on the field is generally through some well-known banking-house of New York or London which has commercial dealings with the country where the mission is located, and is in the form of bills of exchange or letters of credit such as are issued to travellers. These are sold on the field either to representatives of the banking-house that issues them or to local traders who have dealings with England or America.

2. The selection of missionaries. This is one of the most difficult duties that devolves on a mission board. The peculiar elements that enter into foreign life, the strain of changed

climate, food, habits of life, unaccustomed forms of thought and language, the necessity of very close and intimate relations with associates, the demands of sudden emergencies, etc., all enter into the consideration. Then, again, the strange misconceptions as to the nature of missionary work, the idea that personal consecration is all that there is to be considered, often cause great perplexity to the officers of the board. Without entering into the discussion of the qualifications necessary for missionaries, it will be sufficient here to indicate the course pursued in their selection and appointment.

This course varies greatly in different societies, and even in the same society there is no iron-clad rule. There are, however, certain points of examination that are common to all. The most important of these are: 1. Examination on doctrinal beliefs and ecclesiastical relations. In certain denominations this amounts to no more than the ascertaining of the antecedent action of church authorities (Episcopal or Presbyterian ordination is accepted as final), and in all it is in the great majority of cases more formal than minute, with a view to securing that the missionary shall be in substantial harmony with those whose representative he is, and with those who are to be his associates. 2. Physical examination. This is with a view to secure those only whose physical health is such that there is a reasonable probability that they will be able to endure the strain of life in a foreign land, and not be obliged to return home after all the expense incidental to their being sent out is incurred. 3. What may be called a general examination, including the circumstances of the candidate. Are there relatives who may be compelled to look to him for support? Is there ability to acquire with comparative ease a foreign and difficult language; such a temperament as will make it easy to co-operate with others; the faculty of adapting one's self to circumstances, etc. These examinations are conducted with great courtesy, kindness, frankness, and thoroughness, as is instanced by the small number of failures on the foreign field, and the few examples of those who have felt aggrieved by the refusal of the board to grant an appointment.

The examinations finished, the appointment is given, and preparations are made for the departure. In the case of some societies, especially in England and Germany, there comes then a period of special training and preparation with a view to fitting the missionary for the special work that is before him. In America there is often something of the same kind done by the appointee's taking special courses in language, medicine, etc. The whole question of the preparation of missionary candidates is under discussion.

3. The conduct of the foreign works. It is in place here to make a brief statement of the general scope of the business included in the foreign work of a Missionary Society, as indicated in the article on Methods of Missionary Work. It is (1) a great evangelistic agency, employing hundreds of men and women whose chief, almost sole, duty it is to preach the gospel. (2) A bureau of education supplying every grade of instruction to thousands who would otherwise be absolutely ignorant of the most ordinary truths of religion and science. (3) A publishing society with all its different departments of translation, editing, publication, and

distribution. (4) A building society for the erection of churches, colleges, hospitals, etc. (5) An aid and charitable society for the assistance of the suffering poor, the diseased, the widowed and orphaned. All the various departments that in Europe and America are divided among a dozen different organizations are here combined into one.

As a rule, the decision in regard to the detailed conduct of the missions is committed into the hands of the missionaries on the field. Questions, however, are constantly arising which can only be decided by the home authority. Such are: 1. The question of expenses to be incurred in different departments, and the accounting for payments made. 2. The beginning of new work. 3. Relations between different missions and different societies in the same field. 4. General questions of policy in regard to the conduct of the work in its different departments. These are all perplexing questions, and questions in regard to which there is much division of opinion even among those best informed on the field. Perhaps the most difficult one is the first. Each mission prepares every year an estimate of the amount of money needed for the ensuing year. These estimates, while varying greatly in form, may in general be classed under three heads: (a) Expenses absolutely necessary, e.g., salaries of missionaries and certain native pastors and teachers, rental of buildings, etc.; (b) expenses that may possibly be curtailed, though needful to the best progress of the work, e.g., travelling expenses, publications, certain helpers and teachers; (c) new work. With these estimates comes a detailed statement explanatory of the different items. Then all from the various missions go to the foreign secretaries, are examined by them, and then presented, with their comments, to the committee. The committee, making a careful estimate of the probable receipts of the board from donations, legacies, etc., or else acting under general instructions from the Society, fixes a limit of the sum total to be appropriated, and then sets itself to the work of "cutting the coat to fit the cloth." New work, however attractive, must not be allowed to supplant the old, even if the churches are a little anxious "to see or hear of some new thing." At the same time old work cannot claim to itself such a monopoly as shall close the doors opening into new fields. At last the apportionment is made, and the appropriations are returned to the field. Then arise emergencies. "It is the unexpected that is always happening" on mission ground as well as elsewhere, and items of expenditure are always coming up that require immediate action. In these days of the telegraph consultation with the home board is far more frequent than formerly, but still there are many cases where the missionaries simply must take the responsibility of action. Then comes the question of allowing the expense. The rule is, of course, to stand by them as agents, yet there are times when the board is compelled to refuse certain items, and throw the responsibility back upon the missionaries.

To enter into detail more fully is beyond the limits of this article. Enough has already been said to show that the position of the committee is no sinecure, and that the men who meet weekly or oftener to consider and decide these varied questions are no less earnest and conse-

crated in their labor than those who go to the foreign field.

4. The imparting to the churches of the information that they call for in regard to the foreign work, its ends, successes, difficulties, etc., is becoming more and more an important branch of the home work of the societies. There is a marked difference between them in every particular. Some societies publish very full reports, some very meagre. Some most carefully arrange and index everything; others give interesting general statements, but are not explicit in details.

5. The question of property-holding has assumed increasing importance in the prosecution of missionary work. The fact that it is in most mission fields simply impossible to rent premises suitable for the work has necessitated the purchase and erection of such buildings. The laws relating to the holding of property are very different in different lands; but whatever be the form of title, the actual ownership rests with the committee at home.

**II. On the Foreign Field.** Turning now to the organization of mission work abroad and the agencies employed, we find that the organization is: 1st. Territorial; 2d. Ecclesiastical. The agencies are: 1. Missionaries; 2. Native Helpers.

**ORGANIZATION.** 1st. *Territorial organization.* 1. Missions; 2. Stations; 3. Out-stations or sub-stations.

**Missions.**—The word "mission" is used in a great variety of senses, denoting sometimes a single undertaking, but as found in the majority of the reports of the missionary societies it indicates an organized (or simply associated) body of missionaries occupying a certain territory, e.g., the North Africa, the Mid-China, the Japan Mission. It includes a number of stations, with their out-stations and fields, and its extent is usually regulated by the ease of communication between the different parts. Thus the A. B. C. F. M. divides its general mission in Turkey between four distinct missions: the European, Western, Eastern, and Central Turkey Missions. The Church Missionary Society has its West Africa, Yoruba, Niger, and Eastern Equatorial Africa Missions. The American Baptist Missionary Union combines territorial and racial divisions, having the Japanese and Chinese Missions, but also the Burman, Karen, Shan, etc., missions in Burma. In the usage of the Methodist Episcopal Churches of the United States the term mission has the same meaning as in the A. B. C. F. M. until the formation of a regular ecclesiastical organization, when the mission becomes a conference. The Wesleyan Methodists of England limit the use of the word so that it is practically synonymous with district, having (e.g.) four missions in the island of Ceylon. The Society for the Propagation of the Gospel uses the term in the most restricted sense, combining its individual missions in dioceses.

Speaking now of missions in the general sense, as organizations or associations of missionaries occupying a certain territory or working for a special race, we find them, in the majority of cases, including the Baptist, Congregational, Presbyterian, Methodist, and most of the Episcopal Societies, having a more or less complete form of organization. They have regular meetings, conferences, or councils annually or semi-annually, with permanent officers, treas-

urer, secretary, or presiding elder. Action affecting the mission as a whole is transacted in these meetings, and transmitted to the home department through the appropriate office. Thus the estimates arranged (see above) at the annual meeting are transmitted by the secretary of the mission to the foreign secretary of the board; the appropriations made by the board return to the treasurer of the mission, who keeps all the accounts. This does not prevent personal correspondence or relations between the missionaries and the home officers, but it is found to be essential that matters of general importance should pass through regular stages, both that there may be no confusion and that clear record of action may be kept.

**Stations.**—This word also has varied meanings. Usually it denotes some city or large town occupied by one or more missionaries, from which the work extends to the surrounding territory. Sometimes it includes the whole field worked from that place as a centre, but the restricted use is the more common, and is that usually adopted in this *Encyclopædia*. In the stations too there is, as a rule, some organization, especially when there are a number of missionaries, an extended field, and many departments (see below).

**Out-stations or Sub-stations.**—These are places—sometimes an important city, more often a town or village, where there is mission work carried on. Usually there is a church or congregation ministered to by native preachers, and the schools are under native teachers. It is seldom the case that an out-station is the residence of a missionary. In the usage of the Methodist and some Baptist boards there is really no distinction between stations and out-stations, except as the most important centres of work are called principal stations and the remainder stations; the missionaries frequently reside at the different stations in turn. They also use the term circuit in the foreign field as at home, to indicate what other societies mean by station field.

**2d. Ecclesiastical Organization.**—This varies greatly with the different societies, is governed by the rules of the denominations at home, and follows the lines of the three classes mentioned above. Wherever the missionary societies are organically connected with the church, the missions, whether as Presbyterian Synods, Conferences, etc., are organic parts of the church. They are thus entitled to representation in the governing body of the church, and as a matter of fact are usually so represented.

In the second class, where the relation of the board to the church is not organic, the missionaries are under the ecclesiastical discipline of the church or churches at home, by the laws of the Society. In the third class individual missionaries are free to arrange their own ecclesiastical relations, entirely independent of the board.

With regard to the native churches, there is a wide difference of custom. As a rule they follow the lead of the missionaries, though except in the Episcopal churches there is no law governing them; and there is a large liberty left by almost all the societies to their representatives in the field in regard to the details of formal organization.

**AGENCIES.**—These are foreign missionaries and native workers.

**1. Foreign Missionaries.**—These are ordained, lay, female, and medical.

The great majority of foreign missionaries are, and except in special instances always have been, ministers, regularly ordained according to the laws of the churches to which they belonged. Specific instances in the history of the early missions of the London Missionary Society and the Moravians of the sending out of entirely or comparatively uneducated persons, to encounter the perplexities, trials, and hardships of missionary life, made it all the more evident that the rule must be that a man to be a successful foreign missionary must be a man of education and special training. This was for many years synonymous with preparation for the ministry, and probably it was due as much to this as to the special work of preaching that it became so decided a rule that all missionaries should be ordained preachers. There were instances where laymen went out as printers, but that was considered exceptional, and in some instances they afterwards received ordination. Another element in the case was the fact that the people of many foreign lands could not understand how a man who was not a "priest" could administer spiritual help and counsel, and they were somewhat unwilling to apply to any one whose ministerial status was not of the highest. As, however, missionary work has developed its different departments, as education in the home lands has become more general and in foreign lands more exacting; as medical work opened up; as the general work has extended to include many lines of business, such as publication, treasury work, etc.; as also the supply of ministers at home available for foreign fields did not equal the increasing demand,—the question of other agencies came up, and the lay element in mission service became more prominent.

At the present time, in all the organized societies, lay missionaries are employed chiefly as business agents, printers, instructors in the higher schools and colleges, and in medical work. It is increasingly the custom to put a layman in charge of the treasury, the accounts, and the publication work of the different missions. The lay element in education is enlarging constantly; and in medical work it is becoming increasingly evident that a physician who prepares himself for his profession thoroughly has no time to study theology, and in his practice he finds less and less need of it: indeed, it is in many cases a positive hindrance to be known as a preacher or priest.

Female missionaries have taken an increasingly important position, both in their numbers and in the amount of work that is done by them. Whether as wives or as single ladies, they have done and are doing some of the best work, both pioneer and constructive, that is found. They are not always mentioned in the tables of statistics, unless they carry separate commissions, though it is increasingly the custom in the annual reports to indicate them, either in separate columns as "wives" or "assistant missionaries," or by the letter (*m*) placed after the husband's name. Their work is threefold. First in order of time, and in the judgment of many, of actual importance, is that of furnishing and exhibiting a Christian home. The power of this no one can realize who has not had occasion to study into it, and note its relation to the establishment of a Christian community on a firm foundation.

Many a missionary wife and mother who has had little or no opportunity to go out among the villages or homes of the people has exerted through her home an influence that cannot be easily calculated. Second comes the work of visiting in families, reaching the women in their own homes, or as it is called in some countries, *zenana work*. Third in order of time is the special work of female education, conducted by women who have themselves received the best that modern education can provide. (See also article *Woman's Work*.)

It is in place here to speak of the association and manner of life adopted by the missionaries in the field.

1. It has been the custom in most countries to send and locate two or more missionaries and their families together. The reasons for this are so obvious that they only need to be mentioned: Mutual consultation in cases of perplexity, sympathy in trial, support in anxiety, social relief from the strain of work, division of labor. In much the same way as it has been found to be wise for missionaries, as a rule, to be married, so it is wise for families to be associated. When female missionaries, whether as teachers or *zenana workers*, are sent out, they also, as a rule, go "two and two" together, and establish a home of their own, or else join with the families of the stations. Thus a mission station almost invariably calls to mind a social circle of educated, refined Christian people, whose individual labors are scarcely more important than their combined power as a Christian community. Since the increase in numbers and importance of lay workers, there has risen a "community" method of life which is somewhat peculiar. Without being in any sense monastic, it seeks to reap the advantage of association. This is primarily economy, both of funds and of men. Under the community method a number of lay workers can be supported for the same sum that it costs to maintain a single missionary family. Another advantage lies in the possibility it offers of utilizing agencies that otherwise would hardly be available. The China Inland Mission and the Salvation Army have largely adopted it; and other societies, notably the Church Missionary Society, are considering it.

2. *Manner of Life*.—It is the universal custom in foreign missions to provide for the missionaries, so that their manner of life shall differ as little as possible from their home life. The limitations of surrounding customs, etc., are of course considered, and great expense is avoided; but so far as is practicable it is the policy of the societies to enable their missionaries to have such comforts as a family in moderate circumstances is accustomed to have at home. These are: a substantial, healthy dwelling, comfortably furnished; clothing and food adapted to the climate and their habits of life; service sufficient to enable them to give their whole time to the mission work, so much of adornment of the home as shall make it home-like. It is primarily a question of economy. To send a man or a man and wife to Africa, India, or Japan, and compel them to live as the natives do, would, in the immense majority of cases, doom them to early death, or at least to permanent disability. It pays for a mission board to keep its missionaries in good health. But there is an additional reason. With rare exceptions, a missionary has influence in proportion as he

preserves his own individuality. In pioneer work it may be wise to conform to the customs of the land, and sink the foreigner in the native; but after his position is once established, the rule is that his own national and racial individuality should assert itself. This is matter of experience, as well as of theory; and notwithstanding the constant reappearance of the other idea, it has a stronger hold to-day than ever before. But the subject is too wide a one for discussion here. It should be said that in some cases missionaries have funds of their own or receive additional help from friends, and in this fact would be found the explanation of much adverse criticism.

3. *Method of Support*.—This is usually by a fixed allowance, arranged either by or in consultation with the missionaries themselves, and graded according to circumstances of location or of family. Some experience will show the actual cost of comfortable living, and then a unit is often adopted. That is increased according to the size of the family, and the demands upon it. In the large cities it is often imperative that the missionary maintain a certain social position, and carry an attendant expense which his associate in a smaller place does not need. The basis is an adequate support from year to year for the missionary and his family. In most instances it becomes essential for the children of missionary families to go to the home-land for education, in some cases for the preservation of health. For such, as also for those who are left widows or fatherless, the board are under obligation to provide, at least in a good degree, in case there are no other resources from which they can draw.

4. *Vacations*.—It is the custom in most if not all missionary societies to allow the missionaries to return to the home land once in a certain number of years. This, too, is the result of experience, and is found to be economy in the long run. It is needful for the missionaries: first, for rest from the unintermitting strains of missionary life; second, for recuperation by contact with the life of our rapidly advancing countries, and for the purpose of retaining a sympathetic relation with the growth of the churches whose representatives they are; third, for the strength that comes from free intercourse with friends and relatives; fourth, for the care of children and arrangements for their education. It is advantageous for the churches, too, to come face to face with those who know the problem of mission work from experience.

II. *Native Workers*.—These constitute naturally the great body of the working force. Not only is it impossible, but it is undesirable, for the missionary to undertake to do all the work of his field. His chief aim, next to the conversion of individual souls, is the establishment of the Christian Church on its own distinct basis, with all its different departments. As soon as there are converts they are utilized as workers, each with some responsible share in the work of the missionary,—at first as Bible-readers; then as catechists, teachers, preachers; and at last as pastors, in full charge of the general work of an organized body of believers. The relation of each of these to the missionary force is, as a rule, that of assistants, not subordinates. The missionary is the organizer and superintendent, and thus, in a degree, director; yet those who in a sense work under him

still work with him, and follow rather than obey him. It has been the custom of many missionary societies to keep the missionary and native force entirely distinct. This has been due not to any lack of appreciation of the value of native work, or to any desire to exalt the missionary, but rather to the feeling that it was not advantageous from the point of view of the best development of the native churches to a position of independence of all missionary direction and assistance. In those societies where the work is but the extension of the home church this becomes less noticeable, and in them it is frequently the case that native clergy are placed on the same official basis as the missionary. A marked instance of the success of this is the great work done by Bishop Crowther of the Church Missionary Society in Africa. In every case there is the fullest mutual consultation, not only in regard to plans, but estimates; and it is very seldom a step is taken by the missions without the full concurrence of the native workers.

The question of their support is one of varying difficulty in different fields. At first it is usually assumed by the mission, but as the churches grow they are urged to take the entire support of their preachers and teachers, and also of those who do the aggressive work. In some missions the custom is adopted of requiring that a certain proportion of the pastor's salary be met by the people before they can have a distinct organization. There is, however, no rule, different arrangements being made according to circumstances of time, place, and condition of the people. In the older-established communities in many cases the entire running expenses of preaching and teaching are met by the native churches, the mission only assuming the support of those engaged in distinctively mission work, e.g., Bible, book, and tract translation, colportage, etc. Even this work is in some cases assumed by native organizations, such as the Bulgarian Evangelical Alliance, the Church Councils of Travancore under the auspices of the Church Missionary Society, etc. In some countries, notably in Japan, the churches commence their life with a good degree of self-support, and such an organization as the United Church of Christ in Japan is a wonderful power for good by reason of its development of native workers, identified with the native church.

Innumerable questions come up in this connection with regard to the amount of education to be given, the salaries to be paid, etc., which can only have a mention here, with the simple statement that whatever rules are adopted by different societies working in different fields, they all have one specific end in view—the training up, as rapidly as possible, but not too hastily, of a body of workers native to the land and in perfect sympathy with their churches, so that in due time the foreign element may retire and take up other work, confident that the church thus left dependent upon itself will grow stronger rather than weaker, until it becomes able to itself cope with the problems of Christ's kingdom in its own land.

The classification of native workers is not essentially different from that of Christian workers in America or Europe. Pastors, preachers, evangelists, catechists, colporteurs, Bible-readers, teachers, are essentially the same, and have similar duties and relations, wherever they are found.

As in the article on Methods of Missionary Work, so in this, there has been no attempt to give more than an outline of the organizations and agencies upon which the representatives of the churches rely for the great work committed to them. Special attention is called to the articles on the China Inland Mission, Moravian Missions, and Salvation Army, where many of these points are treated somewhat fully.

**Orissa** (British India), one of the four subdivisions of the lieutenant-governorship of Bengal; the other three being Bengal Proper (or Lower Bengal), Behar, and Chota Nagpur. The administration of each of these divisions is through a commissioner under the jurisdiction of the lieutenant-governor. It constitutes the southwestern part of Bengal; and its territory is thus limited: The divisions of Chota Nagpur and Bengal Proper touch it on the north; the Bay of Bengal bounds it on the east and south-east; south, it impinges upon the Madras Presidency, and west upon the Central Provinces. Its extent as defined by latitude and longitude is from 19° 28' to 22° 34' north latitude, and from 83° 36' to 87° 32' east longitude. The area is 9,053 square miles, and the population (1881) 3,730,735 souls. Several tributary states (see the general character of these defined in article "Native States") lie adjacent to the territory now described, and are under the political supervision of the Orissa officials. The area of these is 15,187 square miles, and the population about a million and a half, largely consisting of Aborigines, Kandhs, and others. This native district occupies the northwestern part of the territory, a hilly region, with a sparse population as indicated by the figures just given. British Orissa consists largely of fertile alluvial plains formed out of the deltas of three large rivers—the Mahanadi on the south, the Baitarani on the north, and the Brahmani between them. The people are almost exclusively agricultural; rice is the staple food. Over 95 per cent of them are Hindus, and only 2½ per cent Mohammedans. The number of aborigines in British Orissa is over 130,000, most of them being included among the Hindus; only about 7,000 still practice their ancient aboriginal religion; nearly 4,000 were returned as Christians. These include 3,246 natives, most of whom are connected with one or other of the missions in the province, hereafter to be noticed. The million and a half in the tributary states consists of a fraction less than 75 per cent of Hindus, and a fraction less than 25 per cent of aborigines, many of whom have professed Hinduism, though still ethnically distinct. The most important of these aboriginal tribes are the Kandhs, the Savars, the Gonds, the Bhumijis, the Bhuiyas, and the Pans; there are also some Kols and Santals who are more numerous elsewhere. Some of the larger tribes also spread beyond the borders of Orissa into adjacent districts of the Central Provinces or Madras Presidency. A few Mohammedans, Buddhists, and Christians make up the fraction of 1 per cent left unaccounted for in the division of the population just made into Hindus and aborigines. The aborigines—it need hardly be said—for the most part cling to the hills, while the Hindus inhabit the valleys lying between. It was among the Kandhs that the practice of semi-annual human sacrifices to their earth-god prevailed, until the entrance of

the British authority into these districts in 1835 put a stop to it. Kidnapping for this purpose—for the victims were usually obtained by violent raids among the quiet inhabitants of the valleys—was then made a capital offence; and the Kandh priests were induced to substitute buffaloes for human beings in their sacrificial rites. The Kandhs are described as finely developed and intelligent specimens of humanity, possessing capabilities of civilization which it may be confidently believed will before long be fully brought out by the agencies of Christianity and education. The language of Orissa among the Hindus is the Uriya, an Aryan dialect, closely related to the Bengali; sometimes it has been classed simply as a dialect of that tongue; but the latest scholars regard it as distinct. Among the aboriginal tribes different languages prevail; those of the Kandhs and the Gonds belong to the Dravidian family of South India (like the Tamil, Telugu, and Kanarese). The Kols, Santals, and Bhumijis speak languages of still another family, now called, from the name of the Kols, the Kolarian family. Many dialects are in use by as many distinct tribes inhabiting Orissa and other regions.

A word as to the history of this province will be sufficient. Brahmanical records in the Great Temple of Jagannath profess to trace the chronology of the earliest Hindu kings to the year 1807 B.C. Little reliance can be put upon these dates; but this much they make clear, that for many centuries before Christ Orissa was governed by Hindu rulers. Doubtless it was under these kings that the Kols, and the Gonds, and the Santals, and the Kandhs were pushed back from the plains to the mountains. Then from about 500 B.C. to the Christian era is the period of Buddhist development and dominion. Buddhist caves, dug out during this period (probably, though some assign a date as low as 1000 A.D.) still exist at Raninur. Then followed the period of the Yavana invasions, though just who the Yavanas were, is a problem not fully settled. They came, however, from some northern quarter. They were at last expelled, and Orissa was governed by two successive Hindu dynasties from the fifth century of our era until well on into the sixteenth. The worship of Jagannath, which according to tradition had long been practised in Orissa, was restored, after the Buddhist and Yavana eras, by the one of these dynasties, and the present Great Temple at Puri built by the other, in the twelfth century. During the sixteenth century the Mohammedans came, and Orissa became a part of the Mogul Empire of Delhi. In the eighteenth century, when the Mogul power faded before the rising Marathas, the latter ruled for a time over this province. From them it was taken by the English in 1803, by whom it has since been governed as a part of Bengal, as before explained.

The Hindus of Orissa are excessively religious. Temples and shrines abound. But the chief one, and one of the most famous in all India, is the one already named, sacred to Jagannath ("Lord of the World," one of the titles of Vishnu), at Puri. To this temple 300,000 pilgrims have been known to come in one year. The great Car Festival alone sometimes draws to it as many as a third of that number. The excessive crowding of these persons, under the most unsanitary conditions, has often given rise to cholera, and their dispersal to all parts

of India has disseminated it. It is estimated that from an eighth to a fifth of the pilgrims die from exposure, exhaustion, and similar causes on the home journey. The government has done all in its power to prevent the outbreak and spread of disease, and to enable the pilgrims to reach home safely. But nothing short of an absolute prohibition of the pilgrimage would wholly prevent suffering, and such a prohibition could not be enforced. It would be too great an interference with the religious customs of the people. The popular thought of this great festival is associated with that of the self-immolation of devotees under the ponderous wheels of Jagannath's car as it is dragged along from the temple to the "Summer-house" of the god, a mile away. Doubtless the descriptions of these religious suicides have been exaggerated. The cult of Jagannath is opposed to the sacrifice of life; though it is probably the case that some devotees in moments of religious frenzy have caused themselves thus to be destroyed. Doubtless also many have perished through accident. But self-immolation during recent years may be said to be almost wholly unknown; and under the more careful police regulations introduced by English rule, accident is less frequent than formerly. The long traditional connection of Jagannath with Orissa helps to make his worship popular within the province itself; the popularity of it beyond the limits of Orissa is maintained, and within the province is still further helped by the fact that he is represented as a god of the people, without reference to caste or sect: he is the "Lord of the World." Prince and peasant are alike at his shrine; caste lines disappear there. The holy food, prepared at the great festival within the temple, is given without distinction to all pilgrims of whatever caste, race, or even alien faith. His worship is made to include every species of divine homage which any Hindu pays to any manifestation of the deity by whatever name addressed. This wide catholicity still further promotes the widespread devotion to him. Still another cause may lie in the fact that of late years a theory of sensuous worship has been advocated by the followers of Vallabha Swami (North India, 1520), who held that God was to be sought and honored in the enjoyment of the good things of the flesh. Vishnu or Jagannath was to be adored under the incarnation of Krishna, leading a life of sensuous pleasure. In the wake of such teaching, licentious and obscene rites easily followed and incorporated themselves in the system of permitted observances at Puri. In short, the religious history of Orissa is of the utmost interest; the Jagannath worship in which it has culminated involves some of the noblest as well as some of the most corrupting features of Hinduism; and its historic development is associated with the memory of some of the noblest souls in all the annals of Hindustan.

Education, at least in British Orissa, is making good progress. One boy in every three of school age is under instruction. The province is destitute of rail communication, though in 1885 a line was projected from Benares to Cuttack. It would be of great help to the pilgrim traffic. Traffic by sea is difficult, as the coast-line has no good harbors, and passage from the shore to the vessels is dangerous during the rainy season. It is therefore difficult to

supply the province with food when famines occur, and much suffering has been the consequence of this state of things in times of scarcity. Owing to the exposed situation of Orissa it also suffers occasionally from inundations from the sea; vast tidal-waves, impelled by the tremendous cyclones which sweep at times over the Bay of Bengal, accompanied often by heavy falls of rain which aggravate the disaster by swelling the rivers, will devastate several hundred square miles of low-lying territory, and cause enormous destruction of life and property.

The Baptist missionaries at Serampore undertook, previous to the year 1820, evangelistic work in Orissa, but they withdrew in favor of the General Baptist Society (formed in England in 1816), which began work in this province in 1822. Cuttack, the chief city, was first occupied, and later Puri, the seat of Jagannath's temple and worship. The American Freewill Baptist Missionary Society (dating from 1835) sent its first missionaries, Revs. Eli Noyes and Jeremiah Phillips, to Orissa in 1835. Their stations are at Balasore (1836), Jellasure (1840), Midnapur (1863), Blimpur (1873), and at seven other principal points. Their work is both among Hindus and Santals—evangelistic, educational (through both schools and printing-press), and medical. They have a training-school, a Bible-school, and an industrial school, as well as others of the usual character.

**Orizaba**, a large city in the heart of the mountains in the State of Oaxaca, Mexico; is the centre of an important work among the Indians, carried on by the Methodist Episcopal Church (North); has 1 missionary, 168 church-members, 1 school, 20 scholars. Methodist Episcopal Church (South); 1 local preacher.

**Oroomiah** (Urmia), a city of Persia, in the plain and west of the northern part of the lake of the same name. Population about 35,000, chiefly Moslems and Nestorians, though there are some Armenians. It is the centre for the Nestorians, who are found in large numbers in the city and the villages of the plain, and has been the seat of mission work among them for many years. (Sec A. B. C. F. M.; Presbyterian Board (North); and Persia.) The city itself is much like other cities of Persia, but the surroundings are especially beautiful. The extensive irrigation of the gardens and fields render it very malarious, and for many years the missionaries suffered a great deal from sickness. The village of Seir (q.v.), about six miles from the city, on the mountain, was chosen for a summer residence, and for the theological school during the whole year. Within a few years, however, advantageous sites have been secured nearer the city, and the general health has been better. Oroomiah was the scene of the great Koordish insurrection under Sheikh Obeidullah. The city itself was not taken, but the surrounding villages were pillaged and in many cases destroyed.

The present (1890) missionary force consists of 4 ordained missionaries and their wives, 1 lay missionary, 1 medical missionary, 6 female missionaries, 34 ordained native preachers, 29 licentiates, 126 teachers and helpers, 20 organized churches, 1,941 communicants, 2,021 scholars. Oroomiah is also occupied by repre-

sentatives of the Archbishops' Mission to the Assyrian Christians (q.v.).

**Osaka**, one of the large cities of Japan, is situated on the main island, 25 miles southwest of Kyoto. It is one of the three imperial cities, is well built and clean, and is the centre of large tea-districts. A government college and academy are located here. The climate is mild. Population, 432,000. Its importance as a centre of influence has been fully recognized by the missionary societies, of which there are seven represented. A. B. C. F. M. (1876); 1 missionary and wife, 1 physician and wife, 3 single ladies, 20 out-stations, 7 churches, 1 girls' school, 403 scholars, boys' school, medical work. Methodist Episcopal Church (South), Osaka circuit; 6 stations. Protestant Episcopal Church, U. S. A.; 2 missionaries and wives, 1 physician and wife, 5 female missionaries, 2 churches, 100 communicants, 115 Sunday-scholars, 20 out-stations. Presbyterian Church (North), 1881; 6 missionaries and wives, 4 female missionaries. Cumberland Presbyterian (1878); 2 churches, girls' school, 65 pupils. C. M. S. (1874); 5 missionaries, 4 female missionaries, 2 native ministers, 220 communicants, 2 schools, 81 scholars.

**Osgood, Dauphin William**, b. Nelson, N. H., U. S. A., November 5th, 1845; studied medicine at Brunswick, Me., and Lowell, Mass., graduating at the University of New York in 1869; sailed as a medical missionary of the A.B.C.F.M. for Foochow, China, December, 1869. He soon mastered the intricacies of the Chinese language, acquiring a knowledge of both the Mandarin and local dialects. One of his earliest efforts was the establishment of the Foochow Medical Missionary Hospital. During the ten years of its existence medical aid was given gratuitously to 51,838 patients among the poorer classes. He established also in connection with the mission an asylum for the victims of opium, and in two years 1,500 patients received treatment, a large number of whom were cured. He was frequently called as a consulting physician by his medical confrères.

Dr. Osgood died at the Sanitarium, near Foochow, August 17th, 1880. The funeral was attended by many foreign residents, as well as by Chinese.

Dr. Baldwin thus writes of his worth and labors: "His mind was strong and active. He possessed good common-sense and a clear, practical judgment, not caring to spend much time in discussing theories. He seemed to be engrossed in his profession as a healer of bodily ailments. But to his missionary and native Christian friends he was well known as a devoted Christian worker, placing the good of the souls of patients far above bodily health." The "Foochow Herald" contained an article written by an English gentleman connected with a banking institution in Foochow, closing thus: "The energy, skill, patience, and never-ceasing care manifested by Dr. Osgood in the management of his hospital and asylum, and the value of his good work, compelled the admiration of the whole community of Foochow, and gained him the sympathy and support of every one."

Every hour he could spare from the active duties of his profession for the last four years of his life was devoted to the translation into Chinese of a standard work on anatomy. The

finishing touches were put to it only on the day before his departure. The work has been published in five volumes, illustrated by numerous plates. It is the first of its kind in the Chinese language, and has been much used in China.

**Osmanli-Turkish.** Turkish printed in Arabic characters as distinct from Turkish printed in Armenia or Greek characters. See Turkish.

**Ossét Version.**—The Ossét belongs to the Iranic branch of the Aryan family of languages, and is vernacular in the Caucasus range, Russia. A translation of the four Gospels was made by a certain Jalgusidse, a nobleman who in 1821 joined the Greek Church with about 30,000 of his former co-religionists, and published by the Russian Bible Society at St. Petersburg in 1824, with the aid of the British and Foreign Bible Society. In 1869 the Psalms and in 1882 the Epistle of James were added.

(*Specimen verse.* John 3:16.)

Цæгæдæридтæ Хуцау æрæ бауарæ дæгæ, æмæ  
 Јæ јуæггæрдæ Фæргæдæрдæ рагæ æмæ, цæгæ јæ  
 урæ, јæ на æсæгæ, æмæ и јæ æвæсæп цæрдæ.

**Ostyak Version.**—The Ostyak belongs to the Finn branch of the Ural-Altaic family of languages, and is spoken by the Ostyaks, who live in the province of Tobolsk and Toms, Russia, and number about 24,000 souls. There is a translation of the Gospel of Matthew extant in the famous collection of Prince Louis Bonaparte. Very recently the Rev. William Nicolson, the agent of the British and Foreign Bible Society at St. Petersburg, has called the attention of the Society to the Ostyaks, and a Gospel is now being prepared for them.

**Otaki,** a town on the southwestern coast of New Zealand. Station of the C. M. S. The "Book of Mormon" has recently been published in the Maori language, and a majority of the inhabitants of a small village in this district have gone over to the Mormons. This Mormon movement has interfered somewhat with the success of the Church Mission. Has 1 missionary, 150 communicants.

**Otaru,** a town in the Hakodate district, in the south part of the island of Yezo, Japan. Mission station of the Methodist Episcopal Church (North); 42 church-members. Worked by the two missionaries at Hakodate. Money is being collected to build a church.

**Otshi or Ashanti Version.**—The Otshi belongs to the Negro group of African languages, and is spoken on the Gold Coast and in Ashanti. As early as 1846 missionaries of the Basle Missionary Society undertook a translation of the Scriptures into this language. Parts of the New Testament were prepared. Since the year 1855 the work of translation has entirely devolved on the Rev. J. G. Christalles of the Basle Mission, and in 1871 the entire Bible was printed at Basle by the British and Foreign Bible Society.

(*Specimen verse.* John 3:16.)

Nà senea Onyankõpõn "dò wiase ni, se oðe  
 ne ba a ɔwoo no koro mãe, na obiara a ogye  
 no di no anyera, na wanyã dã ùkwã.

**Otyikango,** a town in Herero-land, Southwest Africa, a little northeast of North

Barmen, south of Okahandye. Mission station of the Rhenish Missionary Society; 1 missionary, 1 single lady, 3 native helpers, 406 members, 171 communicants.

**Otyimbingue,** a town in Herero-land, Southwest Africa, northeast of Salem, and southwest of North Barmen and Okahandye. Mission station of the Rhenish Missionary Society; 2 missionaries and wives, 2 single ladies, 7 native helpers, 380 members, 182 communicants.

**Otyosazu,** a town in Herero-land, Southwest Africa. Mission station of the Rhenish Missionary Society; 1 missionary, 9 native helpers, 140 church-members.

**Oua,** a station of the Micronesian Mission, on the island of Ponapi, Micronesia (1872). Of the 200 people on this island 124 are church-members, and their contributions for 1889 averaged \$1.00 per member.

**Oudh** (British India), a province of the Anglo-Indian Empire, governed by a chief commissioner, who is directly subordinate to the Governor-General of India. Formerly an independent native kingdom, annexed by English in 1856. Practically a part of the Northwest Provinces, which see. Chief city, Lucknow, the fifth city in India. Population (1881), 261,303. Missions since 1857 mostly under direction of American Methodists.

**Oudtshoorn,** a mission station of the S. P. G. in Cape Colony, Africa. The mission field covers 1,780 square miles, with a population of 21,000; has 2 missionaries, 242 communicants.

**Owen, Joseph,** b. Bedford, New York, U. S. A., June 14th, 1814; graduated at Princeton College 1835, and theological seminary 1839; ordained as an evangelist by Presbytery of Westchester October 2d, 1839; sailed as a missionary of the Presbyterian Board for the Northern Provinces, India, August 5th, 1840. Most of his life was spent at Allahabad (1840-68). His labors, like those of most missionaries in India, were various—preaching, teaching, translating, and revising former translations of the Scriptures, and preparing commentaries on different books of the Bible. He was president of the Allahabad Missionary College, and professor in the Allahabad Theological Seminary. After 28 years of continuous labor he left in ill health for America via Scotland, intending after spending a few days in Edinburgh to visit his native land, and then return to India, but died in Edinburgh December 4th, 1870. He took high rank as a scholar. Of him an English resident wrote: "One of the most learned missionaries the American Societies have sent to India." When he left India he had just completed a second revision and edition of the Old Testament in Hindi, and a commentary on Isaiah in the Urdu language for the American Tract Society. He wrote a new translation of the Psalms in Hindustani, and several commentaries in the same language.

**Oxford,** a circuit in New Zealand, of the United Methodist Free Church Mission; 4 native workers, 2 chapels, 31 church-members, 2 Sunday-schools, 114 scholars.

**Oxford Mission to Calcutta.** Headquarters, 9 Keble Road, Oxford, England.—

The mission was founded in 1880 in answer to an appeal from the Bishop of Calcutta to the University of Oxford to "send out men to work among the natives of that city who have received or are receiving the advantages of the system of education provided by the English Government." The form selected for the mission was that which was suggested by the late Bishop Douglas of Bombay—that of a "missionary brotherhood." It was decided, therefore, that the Oxford Mission should form a community under a superior, although its members would not be bound by any vows for life, but would be allowed to withdraw at pleasure. The rules of the community were tested by two years' work in Calcutta; after which the bishop incorporated the first members of "The Oxford Brotherhood of the Epiphany."

*Foreign Work.*—The mission now consists of a head and three other members, all Oxford University men, who carry on work in three lines:

1. Interviews with the natives, lectures, and discussions. 2. The conduct of a school for

native Christian boys. 3. The editing of a weekly paper called "The Epiphany," in which free discussion of all religious questions is carried on between members of the mission and inquirers.

The work is carried on at present only in Calcutta, but it is desired to start branches at Dacca and Patna.

An association has been started in connection with the mission under the name of the "Oxford Mission Association," which endeavors to aid the mission by any means in its power.

**Oye**, a district of Asaba, Upper Niger, Africa; is reached by the mission of the C. M. S. Owing to their influence, the market-day, which usually comes every five days, is postponed a day whenever it will come on the Sabbath, and thus the native Christians are enabled to keep the fourth commandment.

**Oyo**, a station of the C. M. S. in the interior district of the Yoruba mission, Africa. Has 1 native pastor, 29 communicants, 1 school, 16 scholars.

## P.

**Padang**, town on the west coast of Sumatra, East Indies. Population, 10,000. Mission station of the Rhenish Missionary Society; 1 missionary, 1 native helper, 31 church-members.

**Padre-Polli**, town in North Madras, British India, northwest of Berhampur. A purely agricultural village. Mission station of the General Baptist Missionary Society (1849); 1 native pastor, 1 chapel, 69 church-members.

**Pakhoi**, a city at the head of the Gulf of Tonkin, Kwantung, China, is a treaty port, with a population of 25,000. Mission station of the C. M. S. (1886); 2 missionaries and wives, 23 communicants, 1 school, 28 scholars.

**Pakur** (Pakour), a town of the Calcutta district, Bengal, India, is a centre of influence for many villages. Mission station of the Methodist Episcopal Church (North); 1 missionary and wife, 10 church-members, 5 schools, 120 scholars, 6 Sunday-schools, 130 scholars.

**Palaballa**, a town in the Congo country, West Africa, at the foot of Livingstone Falls, 110 miles from the mouth of the Congo River; is a commercial station of some importance, where the goods required for all the surrounding stations are received, stored, and sent out by caravans and carriers. Mission station American Baptist Missionary Union; 4 missionaries (2 married), 2 female missionaries, 1 church, 8 church-members, 2 schools, 127 pupils, 1 Sunday-school, 25 scholars.

**Palmanur**, town in North Arcot, Madras, India, near the summit of the Magli Pass, 2,247 feet above the sea, 26 miles west of Chittoor. A healthy station, 10° cooler than the rest of the district. Population, 1,931. There is a busy trade. Mission station Reformed (Dutch)

Church in U. S. A.; 1 missionary and wife, 5 native helpers, 11 church-members, 1 school, 22 scholars, 1 theological seminary.

**Palamcottah**, town in Tinneveli, Madras, India, 45 miles north-northeast of Cape Comorin, 2½ miles east of Tinneveli. Climate healthy. Population, 17,964, Hindus, Moslems, Christians. Mission station C. M. S. Is the seat of a bishop since 1877, and has very large educational institutions, especially the Sarah Tucker Institute, a normal school, male and female, established 1860. The Palamcottah Church council includes 132 villages with 9 native pastors, 2,185 communicants, 69 schools, 1,963 scholars. The Salvation Army has here its headquarters for South India.

**Palestine**, see Syria.

**Pálghát**, city in the Malabar district, Madras, 30 miles south-southwest of Coimbatore, 68 miles east of Calicut, in a famous pass of the Western Ghats. Has a large trade and active manufactures. Population, 36,339, Hindus, Moslems, Christians. Mission station Basle Missionary Society; 2 missionaries (1 married), 19 native helpers, 4 out-stations, 5 schools, 2,060 scholars.

**Pali Version.**—The Pali belongs to the Indic branch of the Aryan family of languages. It is the sacred and learned language of the Buddhists in Ceylon, the Burman Empire, Siam, Laos, Pegu, Ava, and the eastern peninsula of India. Messrs. Don Abraham de Thomas, Mohandiram of the governor's gate, and Tolfray of the Colombo Bible Society, translated the New Testament, which, after having been revised by the Rev. Benjamin Clough of the Wesleyan Missionary Society, was published in Burmese characters at Colombo in 1835.

**Palmur**, town in Northwest Provinces, India, half-way between Secunderabad and Kurnool, 63 miles southwest of Hyderabad. Hot, but quite healthy. Population of town and adjacent country included in the mission field, 1,000,000, Hindus, Moslems. Languages, Telugu, Hindustani, Tamil, Marathi, Kanarese. Mission station American Baptist Missionary Union (1885); 1 missionary and wife, 1 other lady, 13 native helpers, 5 out-stations, 1 church, 303 church-members.

**Palnadu**, a district along the lower course of the Godaveri, Madras, India, where the Evangelical Lutheran General Synod, U. S. A., began a mission in 1842, and now has 11 missionaries, 2,986 communicants, 2,358 pupils, and a theological seminary with 23 students.

**Palpa Version**.—The Palpa belongs to the Indic branch of the Aryan family of languages, and is spoken in the small states north of Oudh, below the Himalayas. The New Testament was translated by the late Dr. Carey, aided by some pundits, and published at Serampore in 1832, but never republished.

**Pamban**, a town in the Madura district, Madras, India. Population, 4,833. Half the year the Ceylon Government have their immigration depot fixed here, and this, with the conflux of pilgrims from every part of India, gives the place an appearance of great activity. Mission station S. P. G.; 8 villages, 99 communicants, 8 schools, 226 scholars.

**Panditeripo**, a town in the Jaffna district, Ceylon, 9 miles northwest of Jaffnapatam. Mission station of the A. B. C. F. M.; 1 native pastor, 21 native workers, 1 out-station, 1 church, 74 church members, 8 schools, 531 scholars.

**Pangaloan**, a town in Northwest Sumatra, on the East Batang River, southeast of Sigompulan. Mission station of the Rhenish Missionary Society; 1 missionary, 1 female missionary, 3 salaried and 7 volunteer native helpers, 285 members, 19 communicants.

**Pangasina Version**.—The Pangasina belongs to the Malaysian languages, and is spoken by 1,000,000 persons in the isle of Luzon, Philippine Islands. In 1885 the British and Foreign Bible Society published an edition of 500 copies of the Gospel of Luke. The manuscript of the version was presented to the Society in 1873 by Señor Alonzo of Seville, who was for a considerable time in the Philippine Islands. Chiefly through the interest taken in the version by a gentleman long resident in Luzon, it has been thoroughly revised and re-written by Señor Alonzo, who also carried the edition through the press. Señor Alonzo also translated for the British Bible Society the other three Gospels and the Acts, and one of the Epistles of John, which he also carried through the press in 1887. The whole of the New Testament is now translated, except Revelation.

Thus far 8,508 portions of the Scriptures have been disposed of.

**Pang-chuang**, a town in Shantung, China, 13 miles from Tung Cho, 185 miles south-southwest of Tientsin, and 6 miles southeast of Grand Canal. Natives poor, low, crowded for room in which to live. Mission station A. B. C. F. M. (1880); 3 missionaries, 2 missionaries' wives, 2 other ladies, 10 native helpers, 9 out-stations, 350 church-members, 1 school, 15 students. The opening of this station was the immediate result of the benevolence of the mission to the starving people during the famine of 1878.

**Pangkoh**, a station of the Rhenish Missionary Society in Borneo, East Indies, on the Kahayan; 1 missionary, 4 native helpers, 100 members, 62 communicants, and 30 pupils.

**Panhala**, a town in Bombay, India, 14 miles north of Kolhapur. Mission station of the Presbyterian Church (North), 1877; 1 missionary and wife, 1 female missionary, 6 native helpers, 3 out-stations.

**Panneivilei**, a town in Madras, India; a station of the Tinnevely Mission, C. M. S., containing in the church council 12 Pukka churches, 55 villages, 4 native pastors, 942 communicants, 28 schools, 988 scholars.

**Pannikulam**, a station of the C. M. S. in the Tinnevely district, Madras, India. In the church council here are included 104 villages, 5 Pukka churches, 5 native pastors, 1,141 communicants, 41 schools, 976 scholars.

**Pantjur na pitu**, a town in Northwestern Sumatra, in Butakland, on the upper course of the Bantang River. Mission station of the Rhenish Missionary Society; 2 missionaries, 2 female missionaries, 7 native helpers, 825 members, 171 communicants, 57 school-children.

**Pao-ning**, a prefectural city of Szchuen, China. Mission station of the China Inland Mission (1886); 1 missionary and wife, 13 native helpers, 1 out-station, 1 church, 14 communicants.

**Pao-ting-fu**, a city in Chihli, China, 100 miles southwest of Peking, on the Honan and Shansi road. Mission station of the A. B. C. F. M. (1874); 3 missionaries and wives, 1 female missionary, and an important medical work.

**Papiti**, the capital of Tahiti, the largest of the Society Islands, Polynesia, situated on the northwest coast, and is the chief town and port. Mission station of the Paris Evangelical Missionary Society. The population of Tahiti is Protestant; the whole of the island was converted in 1819, and Queen Pomare was baptized. After the French protectorate was established in 1872 the missionaries of the L. M. S. were withdrawn, and Protestant work was carried on by the Paris Society, which has its headquarters at Papiti, with 2 missionaries, 2 female missionaries, 22 congregations, and 19 pastors in the whole district.

**Papua**, or **New Guinea**, is the largest island on the globe, except Australia. It is very irregular in its outline, but extends for about 1,300 miles, between latitude 0° 30' to 10° 40' south, and longitude 131° to 150° 30' east, and contains an estimated area of 300,000 square miles. Very little is known about Papua, as it has not been fully explored and surveyed. In

general it is a mountainous country in the northern part, while the southern coasts are low and wooded. Vegetation is very luxuriant, tropical fruit-trees are found in abundance, while the woods of the interior produce fine timber-trees. In the cultivated portions sugar-cane, tobacco, and rice are raised. The climate is healthy, though great changes in temperature occur during a very short time. The inhabitants, so far as they have been classified, belong to the Negro race (q. v.), though there are several varieties of Polynesians represented. In number they are estimated at 800,000. Of their language the only knowledge we have is gained from the researches of the Dutch missionaries, who collected a vocabulary of the Myfore language containing 1,200 words. This seems to show that the Papuan languages belong to a separate class from the Malayo-Polynesian languages. The western part of the island to 141° east longitude is under the Dutch Government, and belongs to the Residency of Ternate, Molucca Islands. The southeastern part of the island was proclaimed a possession of the Queen of England in September, 1888, and is governed by an administrator, but little has yet been done to develop the resources of the island. Port Moresby, with a population of 1,500, is the principal settlement.

Mission work in New Guinea was commenced at Port Moresby by the L. M. S. (1871), and there are now 6 missionaries at work in Port Moresby, Kerepunu, Motumotu and Fly River, and Suau. In the Dutch portion of the island the Rhenish Missionary Society has a station at Bojadjin, and the Utrecht Missionary Society has 5 stations.

**Paraguay**, one of the South American republics, is situated between 22° and 27° 35' south latitude, and 54° 35' and 61° 40' west longitude, southwest of Brazil and northeast of the Argentine Republic. Area, 91,970 square miles. The country in general consists of a series of plateaus with wooded slopes and grassy plains. The climate is very fine, though at times the heat is excessive. Summer lasts from October to March, and May, June, July, and August are the coldest months. The mean temperature for winter is 71°, and for summer 81°.

According to the Constitution of November, 1870, the government consists of a president, and a Congress of two Houses, a Senate, and a House of Deputies. The senators and deputies are elected directly by the people, and the president holds office for four years.

The population is 329,645, according to an imperfect census of 1887, besides 60,000 semi-civilized and 70,000 uncivilized Indians. There are twice as many females as males. The prevailing language is Spanish, but large numbers speak the Guarani; the mixture of Indian blood is stronger in Paraguay than in other states.

The principal cities are Asuncion (24,838), the capital, rapidly growing in population and importance; Concepcion (11,000); Villa Rica (11,000); San Pedro (12,000); and Luque (8,000). One third of the inhabitants live in the central districts, containing the capital, one third in the districts of Villa Rica and Cuasapa, and the remainder in the cultivated portion of the country. Agriculture and the raising of cattle are the principal occupations of the people, and Italians, Spanish, and German colonists are

developing its resources in both these directions. There is a railway from Asuncion to Villa Rica, and telegraph and telephone lines are in operation. Roman Catholic is the established religion of the state, but other religions are tolerated. Education is free and compulsory. In 1888, 28,526 pupils attended 160 primary schools. Asuncion has a national college. The only Protestant mission in Paraguay is that of the Methodist Episcopal Church (North), which has in the Asuncion circuit 5 foreign teachers, 1 native preacher, 106 church-members, 1 day-school, 80 scholars, 1 Sabbath-school with 60 scholars.

**Paramaribo** is the chief town of Surinam, South America. Population, 22,000. In the year 1835 the first Moravian missionaries landed in Surinam. The object was at first to commence a mission in Berbice, making Paramaribo the headquarters. Here a company of five brethren worked at their trades in order to support themselves and the mission in Berbice. Their attention was soon directed to the negroes in Paramaribo. At first they had to face a good deal of opposition, but they gradually overcame ill-grounded prejudice, and were permitted to purchase a piece of land in the town. For a considerable time their missionary work continued very limited, but gradually it expanded and Paramaribo became a genuine mission station, which prospered so greatly that in 1882 it numbered nearly 10,000 souls. Has 20 missionaries, 18 missionaries' wives, 1 other lady.

**Parey-chaley**, a town in Travancore, India, 32½ miles northwest of Cape Cormorin. Climate good, moist, 80°-85° F. Race, Dravidian. Languages, Tamil, Malayalam. Social condition good. Mission station L. M. S. (1845); 1 missionary, 124 native helpers, 77 out-stations, 8 churches, 1,264 church-members, 59 schools, 3,772 scholars.

**Paris Evangelical Society**, headquarters, 102 Boulevard Arago, Paris, France.—The Paris Society for Evangelical Missions among non-Christian Nations (Société des Missions Évangéliques chez les Peuples non-chrétiens, établie à Paris) was formed in November, 1822. Before this time several missionary committees had been organized in Alsace, the "Midi," and in Paris, which now joined the Paris Society as auxiliary associations. Among the founders of the Society were some of the most prominent of the French Protestants. Its first president was Admiral Count Verhnel; Jean and Frederick Monod, Baron A. de Staël, and other celebrated men were on this first committee. Its first general assembly was held in 1824, and in the same year an institution for training future missionaries was established at Paris. It is interesting to note that in this, its first year, the income of the Society amounted to 13,061 francs.

Until 1840 the work of the Society went steadily forward; from this time its funds began to diminish, and after the Revolution of 1848 the want of money forced the Society to close the training institute. Of the 82 pupils who had joined it, 34 were laboring as missionaries in heathen countries, 17 as pastors in France, and 6 as teachers; the mission work in Basutoland, South Africa, was still carried on in spite of difficulties.

One of the Society's first missionaries, the Rev. E. Casalis, returned to France in 1849. His missionary addresses delivered in most of the churches all over the country were crowned with most remarkable success, and a new love for missions seemed to spring up everywhere. The yearly income soon amounted to 180,000 francs. In 1856 the Training Institute was reopened with M. Casalis at its head, and new spheres of labor were soon added to that in South Africa. Missionaries were sent to China (1859), to Senegambia (1862), and to Tahiti (1863). From the year 1866 the annual income was always more than 200,000 francs, excepting during the Franco-Prussian War. In 1879 it rose to 300,000 francs. In 1885 additional work was undertaken among the Kabyles, a Berber tribe living in North Africa, and in 1886 a long hoped for mission was begun on the Upper Zambesi (Evangelical Mission to Upper Zambesi, q. v.). In 1889 mission work was begun in the French territories on the Ogove and Congo Rivers. Until 1887 the training-school, being dependent on hired rooms, had migrated from one end of Paris to the other; in that year a mission-house admirably adapted to its purpose was erected at 102 Boulevard Arago.

The Paris Society is undenominational. Its management is in the hands of a council composed of a president, two vice-presidents, two secretaries, two auditors, a treasurer, and twelve assessors. This council makes its own laws, and also the regulations to be followed by the auxiliary committees formed outside of Paris. The services of the council are rendered gratuitously. A general assembly of the whole membership of the Society is held annually.

**Mission Fields.**—The first three missionaries, Revs. Bisseux, Lemne, and Rolland, trained by the Society were, by the advice of Dr. Philips of Cape Town, sent to South Africa in 1829. One of them, Mr. Bisseux, settled in Wagenmaker's Valley, about 40 miles northeast of Cape Town, and preached the gospel to the slaves of the farmers, the first one of whom was baptized in 1835. Eight years afterward the mission removed to Wellington, from which centre the work developed. In 1875 there were in the church at Wellington 350 members, and 200 children in the schools. This faithful missionary labored on for a few years more, completing fifty years of work, the results of which cannot be told. Then, on account of Mr. Bisseux's age, the mission was made over to the Cape Dutch Church, Mr. Bisseux holding the position of honorary pastor. Mr. Lemne and Mr. Rolland went to Kuruman to take for a time Dr. Robert Moffat's place, and to learn the Bechuana tongue. In 1831 work was attempted among several Bechuana tribes, but progressed slowly, because of the opposition of the chiefs of neighboring tribes, and the nomadic habits of the people. In 1832 a station was established at Motito, and two years afterwards the first baptism took place. In 1848 there were four out-stations around Motito, and a station had been established in what is now the Transvaal. On account of the diminished revenue of the Paris Society, the mission at Motito was resigned to the London Missionary Society, and that in the Transvaal to the Berlin Society in 1866, while the efforts of the Paris Society were concentrated upon Basutoland.

The first station was planted in Basutoland

in 1833. The first convert was baptized in 1839. At the station of Morijah Christian refugees collected from all points, and the report of 1840 shows already 378 Christians at the station. In 1848 there were in this mission 10 stations, with many out-stations or preaching-places, and the mission staff consisted of 10 ordained missionaries, 1 medical missionary, and 4 lay European teachers or helpers. The total number of native communicants was 1,216. The series of wars between the British troops, the Boers, and native tribes hindered the progress of the work. Many of the converts returned to their old pagan customs, and the missionaries were beset with trials and difficulties of every description; but after 10 years of patient, persevering effort they found their reward in seeing the mission begin to flourish once more. Between 1858 and 1864 six new missionaries were sent out, and for some years the work progressed rapidly until again interrupted by wars. In 1883 Basutoland became a crown colony, and from that time the mission has prospered. There is now at Morijah a training-school for teachers, and a Bible-school for preparing evangelists and preachers. There is also an industrial school at Lelvalong.

**Tahiti.**—The French occupation of Tahiti in 1845 induced the Paris Missionary Society, at the request of the London Missionary Society, to send some workers thither. The whole work was taken by the Paris Society in 1865. The Society Islands are Christianized, and therefore this mission is now rather a "home" than a foreign work to the heathen.

The Society began work in Senegambia, west coast of Africa, in 1862. The deadly climate and other trials have held back this mission; but in spite of all the difficulties, the station at St. Louis has been maintained, and a new one established 80 miles inland, on the Senegal River, and it is hoped that the work may soon take a real start and make rapid progress.

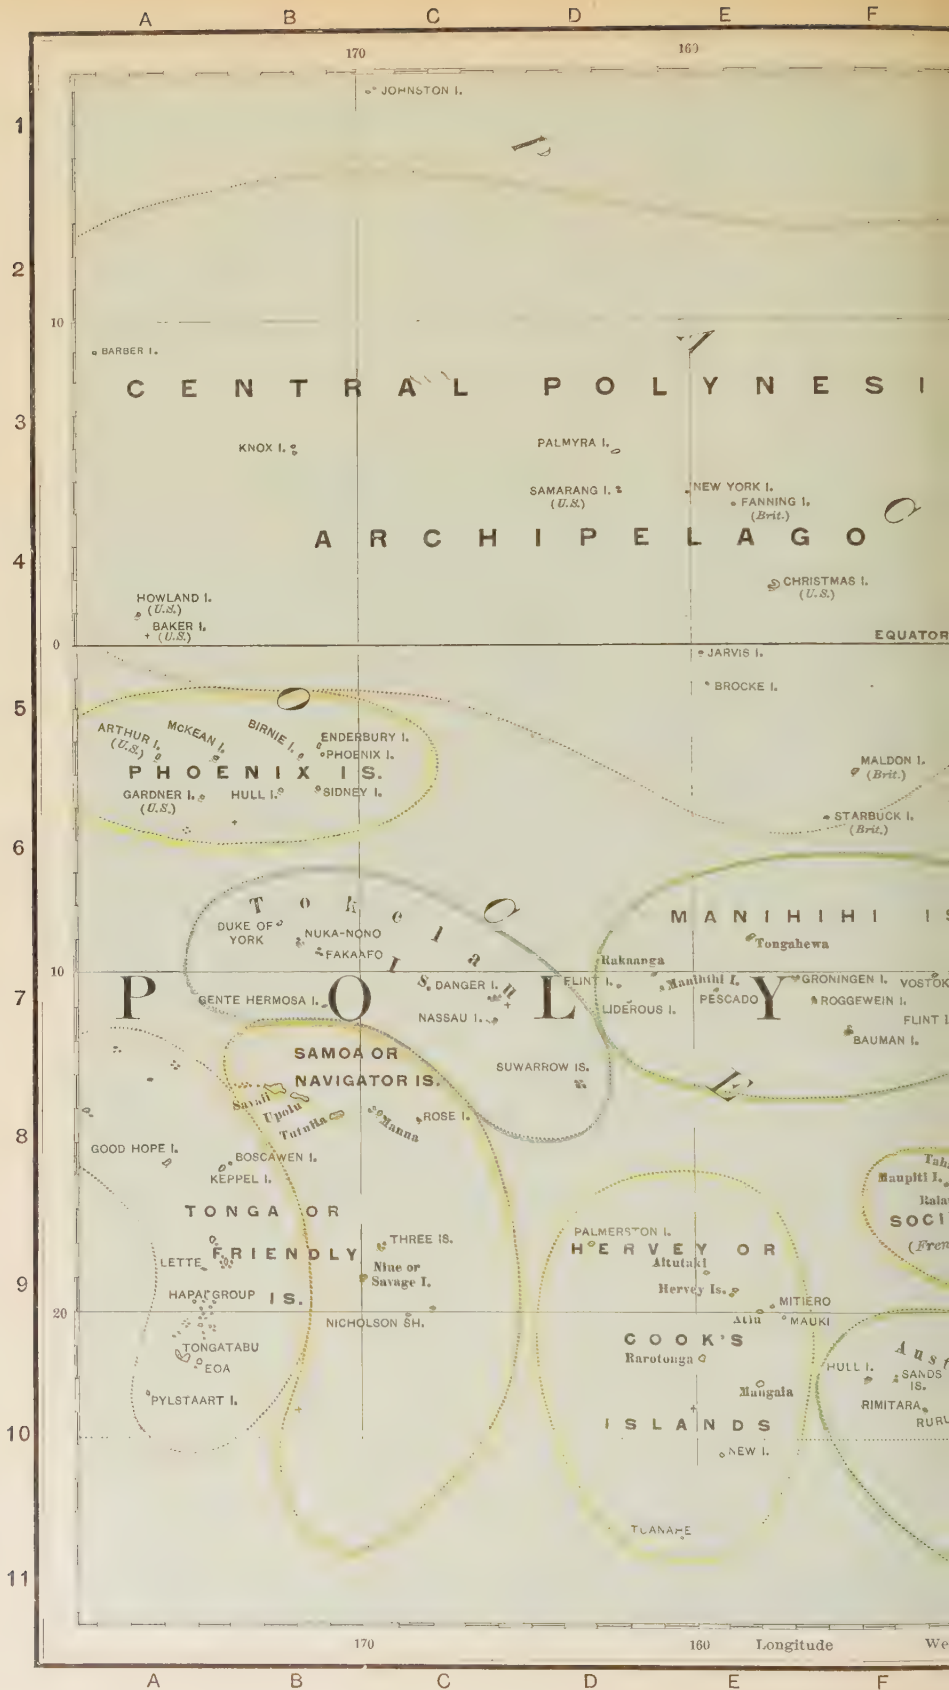

In 1887 the American Presbyterian Board of Missions asked from the Paris Missionary Society some French teachers to help in their school work on the Gaboon and Ogove Rivers, the French Government having forbidden the instruction of the natives in any language but French. Accordingly three teachers and one industrial assistant were sent out in 1888. In 1889 two young ordained missionaries were sent to the Ogove River to visit the American stations. Their report will be submitted to the Council, and work will probably be undertaken in what is now called the French Congo.

The entire number of ordained missionaries now in the field is about 41.

**Parker, Benjamin,** b. Reading, Mass., U. S. A., October 13th, 1803; graduated at Amherst College 1829; Andover Theological Seminary 1832; sailed November 21st, the same year, as a missionary of the American Board, for the Sandwich Islands. Soon after his arrival he sailed for the Marquesas Islands with Messrs. Armstrong and Alexander. Returning with them from the unsuccessful attempt to establish a mission on those islands, he was stationed at Kaneohe, on Oahu, where he labored as a missionary of the Board until the change which placed the Hawaiian churches under the care of native pastors, when he removed to Honolulu, and was principal of the

Native Hawaiian Theological School. In 1876, after an absence of forty-four years, he revisited his native land. He died at Honolulu March 23d, 1877, aged 73.

**Parker, Peter, b.** Framingham, Mass., U. S. A., June 18th, 1804. In his youth he worked on his father's farm, and when of age began to study for the ministry, teaching to earn money for his expenses. He entered Amherst College in 1827; graduated at Yale College in 1831; spent two years in Yale Divinity School, and took a course of medical study, receiving the degree of M.D. in 1834. He was appointed medical missionary to China by the American Board; was ordained at Philadelphia May 26th, 1834, and sailed the next month for Canton. In 1835 a hospital was opened for the gratuitous relief of the sick, which contributed greatly to disarm prejudice, and furnished opportunities for making known religious truth. In 1836 his Eye Infirmary had received 1,912 patients at a cost of \$1,200, all of which was given by resident foreigners. In 1838 Dr. Parker had four Chinese students in medicine and surgery, one of whom became an expert operator. They were supported by the Medical Missionary Society, organized in February, whose president was the British surgeon at Canton. He visited the United States to promote its objects. The outbreak of the opium war with the English in 1840 making it necessary to close the dispensary, Dr. Parker visited the United States, reaching New York December 10th. In 1841 he was married in Washington to Miss Harriet C. Webster, and the next year returned to Canton, Mrs. Parker being the first foreign lady to reside in Canton. In 1844, with the hope thereby of aiding the missionary work, he accepted the appointment of Secretary and Interpreter to the United States Legation to China, and his connection with the American Board was soon after dissolved, though he did not cease missionary work, and his labors in the hospital continued till he resigned his secretaryship on his return to America in 1855. He often acted during these years as *chargé d'affaires ad interim*. Soon after his return he was appointed United States Commissioner to China, with plenipotentiary powers for the revision of the treaty of 1844. This service being completed in two years, he returned to America with health impaired, owing to the effects of a sunstroke. He resided in Washington, and in 1868 was elected Regent of the Smithsonian Institution. He died in Washington January 10th, 1888, aged 83. He published "A Statement respecting Hospitals in China," and an account of his visit to Loo-Choo Islands and Japan.

**Parral**, a town in Northern Mexico, 200 miles east-southeast of Chihuahua. Climate even, healthy. Population, 11,000, Spanish, Indian. Language, Spanish. Religion, a corruption of Roman Catholic. Mission station A. B. C. F. M. (1883-84); 1 missionary and wife, one other lady, 2 native helpers, 2 schools, 55 scholars.

**Parras**, a town in the State of Coahuila, Mexico, near Saltillo. Mission station of the Southern Baptist Convention; 1 missionary and wife, 1 single lady, 1 native pastor, 18 church-members, 15 Sabbath-schools.

**Parsi-Gujarati Version.**—A dialect

of the Gujarati is the Parsi, which belongs to the Indic branch of the Aryan family of languages, and is used by the Parsis in the Bombay presidency. A translation of the New Testament was made by the Rev. Dunjeebhoy Nouroji, and published under the editorship of Dr. Wilson, at Bombay, in 1864. For the educated natives the British and Foreign Bible Society also issued polyglot editions of the Gospel of Matthew, viz., Parsi-Gujarati with English, Marathi, and Sanskrit, and Parsi-Gujarati with English, Marathi, and Hindustani.

(Specimen verse. John 3 : 16.)

કેમકે ખોદાએ દુનિઆ પર એવો પીઆર કરીધો  
કે તેણે પોતાનો એકાકીજનીત બેટો એ  
વાસતે આપીઓ કે, જે કોઈ તેના ઉપર  
એતકાદ લાવે તેહલાક જંથાએ, પણ હુમેરાની  
ઇંછી પાને.

**Parsons, Justin Wright, b.** Westhampton, Mass., U. S. A., April 26th, 1824; graduated at Williams College 1848; sailed April 24, 1850, as a missionary of the A. B. C. F. M., for Turkey. He was stationed at Nicomedia and Bardezag doing general missionary work in Northern Bithynia. For thirty years he labored with unflagging zeal, "never so well contented as when upon those tours among the hills and valleys of the district he traversed so often, that he might preach Christ to those who knew Him not." "Brave enough and cool enough to lead an army, he carried with him no weapon save the gospel of peace, and with this he had successfully disarmed, through a long series of years, all the opposition he met." He was on his return from a missionary tour with Dudukian, a church-member, when they stopped near an encampment of Yuruks, a nomadic tribe of herdsmen. While Mr. Parsons and his companion were asleep they were attacked by three Yuruks and shot. The men were arrested, and the leader sentenced to imprisonment for life; it was found to be impracticable to secure the execution of a Moslem for the murder of a Christian. Mr. Parsons died August, 1880, leaving a wife and four children. The scene at the funeral bore witness to the power of the man, and the success of his methods of resisting evil. In a region where a few years ago the missionaries were hooted and stoned, there was at his burial an outpouring of the whole population. The immense crowd listened, amid their tears, to tender words of eulogy spoken by native Christians. The vicar of the Armenian patriarch, a native of Bardezag, was present from Constantinople, and made an address, bearing witness, after a friendship of more than twenty years, to his "spotless life."

**Parsons, Levi, b.** at Goshen, Mass., U. S. A., July 18th, 1792, graduated at Middlebury College 1814, sailed November 3d, 1819, with Pliny Fisk for the East, under the American Board. He arrived at Jerusalem February 17th, 1820, the first Protestant missionary who ever entered that city to make it the permanent field of his labors. He sailed with Mr. Fisk from Smyrna for Egypt, for the restoration of his impaired health, but died at Alexandria, February 10th, 1822. Great respect was shown

him at his funeral by many persons from different nations.

**Pascoe, James.**—Work in Mexico; or The Gospel in Mexico. An individual mission, carried on in Toluca and other towns of Mexico, by James Pascoe from 1863 till his death in 1888, and then entrusted to a son and daughter. Present headquarters: San Telmo. It has no regular organization, but receives funds through Mr. John Mercer, Clitheroe, Lancashire, England.

James Pascoe, b. in Hellston, Cornwall, England, 1841, was educated in the Nautical Academy, where he was converted. In 1858 he went as midshipsman on a sailing-vessel to Madras and Burmah, and through his efforts the ship, which left England, "a very floating hell," so vile and blasphemous were captain, crew, and passengers, was so changed that it returned "a floating Bethel."

In 1865 he went to Mexico in connection with a silver-mining company, hoping that this would prove the long-desired opening for missionary work. After various vicissitudes he was able to sow, in 1868, the first gospel seed by giving to his employees, in turn, a Spanish Bible, furnished him by Mr. John Mercer, an old friend in England. The depressing effect on business of the Franco-Prussian war gave him opportunity for evangelical work, which aroused the hostility of his employers, and resulted, in 1873, in the commencement of his distinctive mission work. His first public service was held in Toluca, February, 1873. Three years later there were hundreds of Protestants there, active in spreading the gospel. Mrs. Pascoe gave her husband invaluable help. Printing-presses were set up at Toluca and San Telmo, and tract-publishing was begun. In adjoining towns and villages many persons received the truth in the face of great perils. In November, 1875, Mrs. Pascoe died under the intentional maltreatment of a Mexican doctor. The Mission to the Indians was started at San Telmo in 1878.

There are now thousands of Protestants where, when Mr. Pascoe began his work, there was not one. Toluca and San Telmo, by means of the printing work, have become household words throughout the republic. Mr. Pascoe died November, 1888, and the work inaugurated by him is continued under the general superintendence of Mr. John Mercer.

**Pashtu or Afghan Version.**—The Pashtu belongs to the Iranic branch of the Aryan family of languages, and is spoken in Afghanistan, where it is also called Afghani. A translation of the New Testament was published at Serampore as early as in 1818. In 1832 the historical books of the Old Testament were also published at Serampore. A new translation was undertaken by the Rev. R. Clark, but only the Gospel of John was published in 1857, at Agra. In 1863 a new translation of the New Testament, made by the Rev. I. Loewenthal, a convert from Judaism, was published by the British and Foreign Bible Society. He was about to commence a translation of the Old Testament when he was killed in 1864. The work of translation was resumed by the Revs. T. P. Hughes and T. J. L. Mayes of the Church Missionary Society. The latter, who is aided by Quazi Abdur Rahman, translated considerable portions of the Old Testament, and his version of the Psalms was issued

by the British and Foreign Bible Society in 1881. In 1883 a revision committee was formed under the presidency of the Bishop of Lahore; and in 1888 the New Testament, translated by Mr. Mayer and revised by the Revs. W. Jukes and W. Thwaites, was published by the above Society by the photo-lithographic process.

(*Specimen verse.* John 3:16.)

څلره چه خداي دنياږه دارنك مينه كړي

ورځه چه هر يوسري چه يهغه باند يقين  
كوي هغه دهللك نشي ليكن هي نهايته  
ژوندون دموي .

**Pasumalai**, a city in Madras, British India, 3 miles southwest of Madras City, on the railway to Tuticorin. Climate healthy; average annual temperature, 85° F.; rainfall, 35 inches. Population of city and district, 85,000 (including out-stations), Hindus, Moslems, Roman Catholics, Protestants. Languages, Tamil, Telugu, Hindustani. Natives poor, illiterate farmers, slowly improving. Mission station A. B. C. F. M. (1845); 1 ordained missionary, 1 unordained, 1 missionary's wife, 22 native helpers, 2 out-stations, 1 church, 146 church-members, 1 printing establishment, 1 theological seminary, 10 students, 5 schools, 419 scholars.

**Patagones or El Carmen**, a town in the Argentine Republic, South America, on the Rio Negro, 18 miles from its mouth; a medical mission of the South American Missionary Society (1864), with a church and dispensary under the care of an ordained physician. The work is carried on among the Patagians, and also among the Spanish-speaking races.

**Patna**, a city in Bengal, India, on the Ganges, 326 miles northwest of Calcutta. The town is extensive, but its streets are narrow and crooked, its houses irregularly built, of many materials. It is on the East Indian R. R., and is the centre of the opium trade. Climate said to be unhealthy, but the natives are strong and well. Population, 158,900, Hindus, a few Moslems. Languages, Hindi, Urdu, Bengali. Mission station Baptist Missionary Society (1808-1810); 4 ordained missionaries, 3 single ladies, 11 native helpers, 9 out-stations, 4 native, 2 European churches, 68 native church-members, 1 girls' day-school, 25 scholars.

**Patrasburdsch**, a station of the Gossner Missionary Society among the Kols, Bengal, India (1869), with 12,775 church-members.

**Patterson, Alexander**, a native of Leith, Scotland; sent out by the Scottish Missionary Society to explore Tartary 1802, accompanied by Henry Brunton. On arriving at St. Petersburg he met so many discouragements that he felt inclined to turn back, when he unexpectedly found a friend in the lord of the emperor's bedchamber, M. Novassilgoff. Passports were given him, and full liberty granted to travel through the empire, and select any place as a residence agreeable to him. The

government also gave them a large grant of land, and permission to keep under their care and instruction any of the Tartar youths they might ransom from the Tartars, until they were twenty-three years of age.

They chose a Mohammedan village called Karass as the place for the commencement of their mission, which contained over 500 inhabitants. Both the missionaries studied the Tartar language. As soon as they began circulating some tracts they had written in the language great interest was excited, and discussions arose as to the merits of Christ and Mohammed, and many persons of rank became interested in the teachings of the gospel.

In 1805 Mr. Patterson had the joy of seeing several of the ransomed youths embrace Christianity and be baptized. They also went with him on his journeys, acting as interpreters. In 1810 the mission was making such progress among the people that the Mohammedan priests became alarmed, and aroused the bitterest opposition. The Mohammedan tribes south of Karass were so zealous that they threatened to kill all who bore the Christian name. The Mohammedan schools were crowded with scholars, who were taught to read that they might defend the faith.

In 1813 the missionaries were obliged to move to the fortified town Georghievsk, about 30 miles from Karass, on account of the constant irruptions of hostile Tartars. While here the translation and binding of the New Testament were finished. In 1814 the missionaries again went back to Karass. In 1816 Mr. Patterson took with him one of the ransomed slaves and made a tour through the Crimea, distributing tracts and Tartar Testaments. The journey almost cost him his life, but he felt amply repaid in the reception he met from all classes of people. In 1825, on account of the anti-biblical revolution in Russia and restrictions by the government, the mission was transferred to other fields.

**Patteson, John Coleridge**, the missionary bishop and martyr of Melanesia, b. London, England, April 2d, 1827. His father was Sir John Patteson, a distinguished English judge, and his mother a niece of Samuel Taylor Coleridge, the poet. He was educated at Ottery St. Mary, Devonshire, 1835-37; at Eton 1838; Balliol College, Oxford, graduating B.A., 1845. In 1849 he obtained a scholarship in Merton College. Through his schooldays he took high rank as a linguist. After graduating he travelled in 1851 in Switzerland, Rome, and Germany as tutor to an English family. In 1852 he became a Fellow of Merton College. In 1853 he was curate of Alington, and in 1854 was ordained. In 1855, March 29th, he sailed with Bishop Selwyn to the Melanesian Islands, in the South Pacific. During the voyage he acquired the Maori language. For five years he was assistant to the bishop in conducting a training school for native assistants. In 1861 he was made bishop of the Melanesian Islands. Possessing great linguistic talent, he translated the Bible, and reduced to writing and grammar several languages which before had only been spoken. His headquarters after being appointed bishop were at Mota, from which he made frequent excursions, and voyages to the other islands of his diocese in the mission ship, "The Southern Cross," exerting himself in

various ways for the good of the people. He not only preached, but taught the natives useful arts. In time of sickness he was their physician, watching and nursing them, and by love and kindness striving to lead them to the knowledge and worship of the true God. After one of these visits to Nackapu, an island of the Santa Cruz group, some traders having painted their ship in imitation of the bishop's ship, had through this artifice been able to kidnap some of the natives for the purpose of sending them to the plantations of Queensland and Fiji. When the missionary ship, as it cruised among the islands, again approached Nackapu, some of the islanders mistaking it for the kidnapping craft, determined to avenge themselves. The bishop, unsuspecting, lowered his boat, and went to meet them coming in their canoes. According to their custom, they asked him to get into one of their boats, which he did, and was taken to the shore. He was never seen alive again. Immediate search was made, and his body found, pierced with five wounds and wrapped in a coarse mat, with a palm leaf laid over the breast. When Parliament met next the Queen made touching reference to his untimely end. He is described as being in early life "gentle and refined in manner, scholarly in his tastes, devout, at the same time brave, earnest, vigorous, full of enthusiasm, being a leader and favorite at school in all athletic sports by reason of his elastic strength of body and skill in manipulation." All these qualities were needed, and all brought to his aid, when in later years he was at once friend, preacher, navigator, teacher, and exemplar in the useful arts to the Melanesian tribes.

**Payne, John**, was appointed by the Foreign Committee of the Protestant Episcopal Missionary Society in the United States to Africa, August 11th, 1836, and sailed May, 1837, reaching Cape Palmas, West Africa, on the 4th of July following. He was consecrated missionary bishop July 11th, 1851, and resigned the office in 1871. During this period of thirty-four years he was a faithful and laborious worker, both as a missionary and bishop. In his last report but one he said: "For myself, I fear that little ability remains to aid directly this glorious work. Thirty-three years' connection with one of the most unhealthy portions of the globe has left me the mere wreck of a man. But I claim that in devoting myself to preaching among the Gentiles the unsearchable riches of Christ, I was no fool. On the contrary, I did obey literally the command of my Lord. I did follow the very footsteps of apostles, martyrs, and prophets." He died at Oak Grove, Westmoreland Co., Va., October 23d, 1874, aged 60. The Foreign Committee in a minute adopted say: "Through thirty-three years he labored and suffered, oftentimes in great bodily weakness, yielding never until his powers were exhausted, oftentimes amid the deepest affliction of sickness and death in his own household or in the household of his fellow-missionaries. To him as the head of the mission all these things came as a great weight of sorrow on his heart. The Committee desire to record this minute of affectionate regard, and to join in a tribute of praise and thanksgiving to God for the grace which led His departed servant to consecrate to Him in untiring devotion all his powers of soul and body, and for the measure of success which attended his life-long

labors." At the time of his resignation the House of Bishops recognized his long, faithful, and arduous services.

**Pea-Radja** (Paja-radja or Pea Ridge), a small town in Batukland, Northwest Sumatra, on the upper course of the East Butang River. Mission station of the Rhenish Missionary Society; 2 missionaries, 3,983 members, 1,060 communicants, 294 school-children.

**Pease, Lorenzo Warriner**, b. Hinsdale, Mass., U. S. A., May 20th, 1809; graduated at Hamilton College 1828; studied law three years; graduated at Auburn Theological Seminary 1833; embarked as a missionary of the American Board August 20th, 1834; explored Cyprus, and commenced a station at Larnaca. He was attacked with bilious remittent fever, and on the twenty-first day of the disease, after an agonizing convulsion, died August 28th, 1839. "Preaching was his most delightful employment. He had acquired a facility in the Greek language, and an acquaintance with its grammar and idioms, which were most accurate and valuable. This rare and rapid progress in the language had been facilitated by his labor in composing an extended grammar of the Modern Greek language, which he had nearly finished and translated into Greek before his sickness. He had projected the preparation of a 'Life of Christ,' which was approved by his missionary brethren of the Levant. The last work he completed was a valuable treatise on the Christian Sabbath."

**Pedi or Sepedi Version.**—The Pedi belongs to the Bantu family of African languages, and is the common dialect of the North Transvaal. The tribes who speak the language are Bakatla, Belobedu, Bakanoa, and some others, numbering from 140,000 to 160,000, of whom about 7,000 people are able to read. At the request of the Rev. C. Krothe, superintendent of the Berlin Mission in North Transvaal, the British and Foreign Bible Society published a version of the New Testament in 1889 at London.

**Peet, Lyman Bert**, b. Cornwall, Vt., U. S. A., March 1st, 1809; graduated at Middlebury College 1834, Andover Theological Seminary 1837; was accepted as a missionary of the A. B. C. F. M., but detained on account of the lack of funds, and labored over a year in its service at home; sailed July 6th, 1839, reaching Bankok May 28th, 1840. There he labored over six years among the Chinese who had immigrated thither, speaking the Amoy language. In August, 1846, he was transferred from Siam to China, and was stationed at Foo Chow. As a pioneer in that field, where peculiar difficulties were encountered, he was very successful in his efforts to reach the people by means of schools, preaching, preparation, and distribution of books. In July, 1856, Mrs. Peet died, and he returned with his two children to the United States. Having again married, he re-embarked October, 1858, for China. In addition to his other labors he held for several years an early morning service daily at the Nantai Church. His health failing, he returned home again in 1871, and resided at West Haven, Conn., where his death occurred January 11th, 1878. Several days before his death he dictated messages to his fellow-laborers at Foo Chow, saying: "My heart is with the dear missionaries at Foo Chow,

and the native Christians, and with all missionaries throughout the world."

**Pegu**, a town in Burma, Farther India; the former capital of the kingdom of Pegu, 40 miles northeast of Rangoon, on the railroad to Mandalay. The inhabitants are largely Talains (Telugus) or Peguans. Mission station of the American Baptist Missionary Union; 1 female missionary, 4 native helpers, 4 out-stations, 2 self-supporting churches, 129 church-members, 3 schools, 128 scholars.

**Pegu Version.**—The Pegu belongs to the Mon-Anam family of Indo-China languages, and is spoken in the province of Pegu. A translation of the New Testament, made by the Rev. Haswell of the Baptist Missionary Society, was published at Moulmein in 1847, for the American and Foreign Bible Society.

(Specimen verse. Gal. 5: 1.)

ခရစ်တိုဝှလ်း သိုညး : တဲ့ရ်၊ ဖွဲ့နွဲ့ ဖလ်း : ဂ်တန်  
ခွင် ခိုဂ်ဝှဲ၊ ဖွဲ့လောင် ခိုက် ထဟင် ဖွဲ့နွဲ့ ဖွဲ့လ်း  
ဖွဲ့နွဲ့ခိုက်လိ၊

**Peking**, the capital of China, situated on a plain about 12 miles southwest of the Pei-ho, in latitude 39° 54' 36" north, longitude 116° 27' east, is an ancient and historic city. Its name means Northern Capital, in opposition to Nanking, which was the capital for a time, and it became the seat of government under Kublai Khan in 1264 A.D., and has continued to be the capital ever since, except during the years when the emperors held their court at Nanking (q.v.). The city is divided into two parts, each with a retaining wall. There is the inner or Manchu city, where the palace, government buildings, and barracks are, surrounded with a wall of an average height of 50 feet and a circumference of 14 miles; added on to this at the south is the outer or Chinese city, surrounded by one of the finest walls around any city of the world—10 miles in circuit, 30 feet high, 15 feet broad at the top and 30 feet at the ground, pierced with 16 gates, each one surmounted with a many-storied tower 100 feet high, with embrasures for cannon. Within both walls is inclosed about 26 square miles, and with the numerous public buildings, the palaces, pagodas, temples, with its broad avenues, the lofty gates and massive wall. Peking has challenged the wonder of all visitors since the stories of Marco Polo gave him an unjust reputation as a second Munchausen. Within the Manchu city a smaller inclosure, the Prohibited city, of three miles in circuit, surrounds the palaces of the emperor and his consort. The age of the city is not definitely known. It has been built and rebuilt many times, and now is not at the zenith of its magnificence, which it attained at the time of the Emperor Kanghi. It is the best example of an Asiatic city now extant. The population is of a most varied character. Chinese predominate, but Manchus are numerous, and Kalmucks, Tartars, Koreans, Russians, and representatives of almost every country of Central Asia are found in the crowds that throng its streets, and add much to the picturesqueness of its appearance by their motley garb and diversified colors in dress. The number of inhabitants has been

variously estimated from 1,000,000 to 3,000,000—the mean between these two estimates is probably correct. By reason of the lack of any tall spires or buildings, the view from a distance is not imposing, the only prominent buildings being the Clock Tower, where a water clock measures the time, and the Bell Tower, whose ancient bell (cast A.D. 1406), the largest suspended bell in the world (120,000 lbs. weight), tolls forth the watches of the night. Of the many noteworthy buildings, none are of such interest to the missionary as the altars where the emperor offers worship to Heaven and to the Earth. (See Confucianism.) The Altar to Heaven stands to the left of the south gate, within the Chinese city; the Altar to Earth is without the walls, to the north of the Manchu city. Separated only by a wall from the Altar to Heaven, is the "Altar of Prayer for Grain," often wrongly called the Temple to Heaven, which was one of the most beautiful buildings of the East. Its triple, dome-shaped roofs towered 100 feet high, and were covered with blue porcelain tiles. Its base was a triple terraced altar of white marble. Large teakwood pillars arranged in circular rows supported its roofs, and it was inclosed with windows, shaded with blinds of blue-glass rods. The destruction of this temple by fire in the fall of 1889 was regarded by the Chinese as a visitation of the wrath of Heaven upon the emperor himself. Not only is worship paid to Heaven, but the temples of almost every form of religious belief are found here. Islam is represented by the mosque outside of the southwestern angle of the Imperial city, in the midst of a number of Mohammedan Turks who came from Turkestan over a hundred years ago. Not far from the mosque, to the southwest, is an old Portuguese church, and inside of the Manchu city, west of the Forbidden city, is the Roman Catholic cathedral. The Greek Church, Protestantism, Buddhism, and all the pantheon of Chinese gods and deified heroes have their respective houses of worship.

In the limited space at the disposal of this article no more than a mere mention can be made of the Sacrificial Hall to Confucius; the monument to the lama who died, some say was murdered, at Peking; the examination hall; and the parks and artificial lakes with which successive emperors have beautified the city. The ruins of the Summer Palace, which was destroyed by the allied French and English forces during the occupation of the city in 1860, lie to the northwest of the city, about 7 miles away. Here small hills with intervening vales had been beautified with pleasure houses and bowers in the best of Chinese style, and in the various buildings were collected the treasures of many dynasties and monarchs; a rich booty they proved to the wanton pillage of the soldiers.

The streets of Peking are in general wide and spacious. The centre is sometimes paved and is somewhat higher than at the sides. In summer the dust from the unpaved portion, and in winter the mud, make them intensely disagreeable to the passer-by. No foreign merchants are allowed to carry on business in Peking, and the aspect of the city is entirely different from that of the other Chinese cities where commerce brings a distinctive European element and settlement. The climate is healthy, but subject to great extremes of heat and cold, and the dryness for ten months of the year is hard to bear. Peking Mandarin, as the language of the capital

is called, is the standard language of the empire. (For an account of this dialect, and for the history of missionary work at Peking, see article on China.)

Mission station of the Presbyterian Church (North), 1863; 5 missionaries (3 married), 2 missionary physicians (1 married), 1 female physician, 3 female missionaries, 22 native helpers, 3 churches, 183 communicants, 7 boys' schools, 60 scholars, 2 girls' schools, 34 scholars, 2 boarding-schools, 64 scholars, 180 Sabbath-schools, 18,640 out-patients (1888-89) in the hospital, and 155 in-patients. A. B. C. F. M. (1864); 3 missionaries (1 married), 2 female missionaries, 2 boys' schools, 1 girls' boarding-school, 36 pupils. Protestant Episcopal Church, U. S. A.; mission house and 2 chapels. Methodist Episcopal Church (North); 10 missionaries, 9 assistant missionaries, 4 female missionaries (in the district 500 members), 2 theological schools, 40 students, 2 high-schools, 180 students, 7 day-schools, 44 students, 3 Sabbath-schools, 400 scholars. L. M. S. (E. 1861, W. 1878); 4 missionaries, 3 female missionaries, 217 members, 2 Sabbath-schools, 130 scholars, 4 day-schools, 58 scholars. S. P. G. (1880); 1 missionary, 180 Chinese members.

**Pekyi**, capital of Krepeland, Slave Coast, West Africa; was in 1851 the starting-point of the North German Mission in this region, and has still a small congregation.

**Penang or Prince of Wales' Island** lies at the north entrance of the Straits of Malacca, and is one of the Straits Settlements belonging to England. It contains 106 square miles, and has a rich, fertile soil, where tropical fruits and spices are cultivated. The climate is healthy, and rain falls every month in the year. Georgetown, the capital, at the northeastern end of the island, is the seat of government for Malacca and Singapore as well. The province of Wellesley, on the peninsula opposite Penang, together with the Dindings, are included in its administrative district. Population (1881), 84,724 Malays, 67,820 Chinese, 12,058 natives of India, and 674 whites. Mission station of the S. P. G.; 1 missionary, 50 communicants.

**Penfield, Thornton Bigelow**, b. Alden, N. Y., U. S. A., October 2d, 1834; was converted at the age of eight, and his early consecration to the missionary work is traceable primarily to an address of Dr. Scudder, of which is found this memorandum: "Dr. Scudder asked me to become a missionary, and go to India and help him; and I intend to. T. B. Penfield, April 19th, 1846." He graduated at Oberlin College in 1856, and studied two years in Union Theological Seminary, New York. While there he was active in city-mission work, devoting to it a portion of each day. Returning to Oberlin he spent part of a year in theological study, and graduated in 1858. The way not being open to go to India, his chosen field, he went to Jamaica, W. I., under the American Mission Association, to labor among the emancipated negroes. There two daughters were born, the elder surviving him. His wife, returning in ill-health to Oberlin, died in 1863. Having labored for seven years in Jamaica, he returned to the United States in 1866, again married, and November 7th, the same year, sailed as a missionary of the American Board for the Madura Mission. In 1870, the cholera

raging violently, he spent much time in administering medicine to the sick, when he was himself slightly attacked. His health having somewhat improved by a visit to the sanitarium, he resumed his missionary labors. In July he returned from a tour very much exhausted, and for several days his sufferings were severe. He died August 19th, 1870. Mr. Washburn, quoting the memorandum respecting Dr. Scudder from a scrap of paper much worn and tattered, says: "This record (written when Mr. Penfield was a boy of twelve) is the key to his whole subsequent life. He was diligent and active to the full limit of his strength; his judgment was trustworthy, and he was careful most faithfully to administer the funds of the churches committed to his hands. Though he had been with us but little more than four years, his diligence in acquiring the language, his active habits, and his generous assumption of the work put upon him, gave promise of a future of great usefulness."

**Penguin**, a town in Tasmania (Australia), 81 miles northwest of Launceston. Climate very mild, genial, and healthy. Population, 5,000, English, Germans, and Chinese. Language, English. Religion, Protestant, Catholic. People moral, prosperous. Mission station United Methodist Free Churches (1878); 2 ordained missionaries, 1 missionary's wife, 11 native helpers, 9 out-stations, 3 churches, 120 church-members.

**Pentecost Bands** of the Free Methodist Churches in the United States. Headquarters, 104 Franklin Street, Chicago, Ill., U. S. A.—The Pentecost Bands were organized at Parma, Mich., July 25th, 1885, by Rev. V. A. Dake, an elder belonging to the Free Methodist Church. He had been preaching on circuits and travelling districts as chairman (presiding elder), but feeling the responsibility upon him, laid down his regular duties and began this work. A Free Methodist Society was organized at Parma, and turned over to the proper authorities of the church. The work was started on account of the many young people in the church who felt led to gospel work, but were not called to preach. At first the intention was only to do home-mission work,—going to new towns and localities where there were no Free Methodist societies, and organizing, building churches, and establishing the church. But in this intense, essential mission work the foreign branch of the work developed, until to-day the home work has become simply a training-school for foreign-mission work. In Michigan they have organized 8 new societies, and in Illinois 25, in which are 19 church enterprises.

There are now 23 bands: 2 in Africa, 1 in Norway, 1 in Germany, 17 in the United States, and 2 in Canada. The missionaries in both home and foreign fields are about 70 in number.

In connection with the Pentecost Bands has been started an institution which is called "The Reapers' Home." Here it is calculated to train the children of foreign missionaries, and also to gather in orphan and dependent children to train for mission work. It is started on the principle of having the children "born again" while from four to six years of age, and then keeping them by careful watch-care in the fear of God. The various enterprises will all be separate, as the whole work is started

on the cottage system. The "Reapers' Home" is temporarily located now, but may be addressed at 104 Franklin Street, Chicago, Ill. The leader of the Reapers' Home work is Mrs. Ida M. C. Dake. There is also a Mission Training work in St. Louis, Mo., under the charge of Mrs. C. W. Sherman. The object of this work is the especial training of those about to start for foreign fields.

The officers of the band are: a leader in charge, two assistant leaders in charge, one male and one female, a foreign-mission treasurer, a general book-agent, a secretary, and leaders of the Reapers' Home and Mission Training work. Each band has a leader and assistant leader. When several bands work together they are called a Division, and one worker is called the Divisional Leader. When work is opened in a foreign nation an overseeing leader is appointed, who is called the National Leader.

The first foreign field opened by the bands was near Colmar, in Elsass, Germany. The leader in charge went there in the summer of 1889, and organized a Free Methodist class and sent a Pentecost Band to continue the work. They stayed a few months and returned, and the work has since been in the charge of local leaders.

Monrovia, Liberia, was also opened in the fall of 1889 by Band No. 3, Elder George W. Chapman and his wife Mary W. Chapman, and C. S. Kerwood. The wife is the divisional leader. During the year Brother Kerwood has died, and his place has been filled by Band No. 9, Miss Matie North and Mrs. Jennie Torrence, making four workers on that field. They have an iron house costing \$1,500, and are well equipped for work.

In the fall of 1890 Band No. 12, Mr. S. V. Ulness and wife, Lillian M. Burt Ulness, and Hans Fass, went to Norway and opened up work there. The work in Canada is under the leadership of Thomas H. Nelson. At present Miss Gracie Toll and Laura Douglass are getting ready for India, Edward Cryer for England, and Harvey D. Brink for Australia. The work in England and Australia will be mainly for training missionaries.

The special work before the missionaries is the salvation of souls and the sanctification of believers. They all dress plainly, use very plain food, object to all worldly entertainments, and find their pleasure in prayer and obedience to God. While not opposed to educational work, this is only used as supplementary, and not primary. They believe the all-powerful factor in the conversion of the heathen is the "Holy Ghost and Fire."

A band is composed of four workers, of whom one is a leader and another an assistant leader. They enter into a field where work is needed, hold street-meetings, visit from house to house, hold public services in church, tent, or hall, and throw everything else aside in desperate efforts to "pluck brands out of the burning." They are earnest, enthusiastic, and noisy. Their methods may all be called short-cuts to win souls.

The "Vanguard," published at St. Louis, Mo., is the organ of the Pentecost Bands. It has about 5,000 subscribers, and is in quite a prosperous state.

During the winter holidays is held in each division, home and foreign, the Semi-annual Ingathering. In the summer, at the date of

organization, July 25th, is held the Annual Harvest Home Camp-meeting, when all workers are expected to be present. The whole movement is intensely missionary. A favorite song is "We'll girdle the Globe with Salvation." The home-work is for the purpose of training workers and raising money for the foreign work. The Bands are in their infancy. Only five years of effort, and yet they are constrained to say, What hath God wrought! From many lands comes the cry for Pentecost Bands to come and help in the battle against sin.

**Periodical Literature.**—When the missionary enters on his work he learns the number and power of the obstacles to its success. If he had pictured the heathen as calling on him to come to their help, he finds hard practical facts in sad contrast to such a dream; not that there are no heathen longing for the light, but the number of such is exceedingly small. One may labor for years among large masses of idolaters without finding one. The writer can never forget his surprise on first entering the missionary field to find a shrine of the Virgin Mary under the roof of good "Father Temple," as we called him in Smyrna; but the old servant to whom it belonged could not see the unscripturalness of such worship, and his employer was too wise to exercise authority in the matter. He preferred to wait for truth to lead the man to put it away himself, rather than to require it on the ground of his master's views of duty. The missionary finds men as mad upon their idols as he is loyal to Christ; many who welcome him as a man oppose him as a missionary. The worldly minded would receive him heartily if he brought some kind of merchandise on which they could make good profits. The unspiritual take scant interest in his most earnest setting forth of Christ and his salvation. The timid shrink from the persecution that is sure to follow their acceptance of the truth. The number who consent to listen to the preaching of the gospel is small, and the field extends in all directions beyond his reach. How can he fill it with the truth? If he prints it in volumes, however well reasoned and persuasive, they will not be read; but he can print the latest news from distant lands, and men who have not had access to it before are eager to hear that. He can set forth interesting facts in natural science or mechanics, and men read them also with avidity; and along with these he can sift in, not abstract dogmas, but truth in its practical applications; truth set at that angle which sheds light on their daily life, meets their wants, answers their questions, and brings the Word of God in contact with their hearts. Then each week the lesson is changed; some new aspect of truth equally timely and no less adapted to their needs is set before them. The lesson which needs reiteration is reiterated. The unexpressed longing is satisfied; the illusion that made error seem truth, and truth to look like error, is dexterously dispelled; and men are led on step by step till by the grace of God they know the truth, and the truth makes them free.

It may be questioned whether our churches at home are aware how much they owe to our own religious periodicals. In Mosul in 1844 the missionaries used to lend their "New York Observers" to the French consul, Mons. P. E. Botta, son of the Italian historian of our own revolution. He was a decided Romanist, yet

genial and friendly, and not only expressed admiration for the religious feeling that created and sustained such a paper, but affirmed that such a one could not possibly find support in Papal France. The religious periodical is the outgrowth of the Bible religion of the present century. It reaches a larger number than any one pulpit can touch, and it speaks the word for the hour simultaneously in many places, and on a great variety of themes. It is essential to the unity and vigor of every advance of the kingdom; and just as the needs of the home field have called it into existence there, so the needs of the foreign field called it into being almost from the first. As early as 1818 the Baptist Mission at Serampore issued the "Samarchar Darpan," or "Mirror of Intelligence." In 1834 our missionaries in the Hawaiian Islands established the "Lama Hawaii," a weekly quarto of four pages, and another was commenced in 1835. In all, ten have made their appearance at different periods in the islands. The pioneer periodical in Turkey was the old *ΑΠΟΘΗΚΗ ΤΩΝ ΩΦΕΛΙΜΩΝ ΓΝΩΣΕΩΝ*, "Magazine of Useful Knowledge," published in Greek by Rev. D. Temple in 1837-1843. It also appeared in Armenian, and in 1854 became the "Avedaper" (Messenger), a semi-monthly quarto of eight pages, and afterwards a weekly folio of four pages. It was issued also in Armeno-Turkish in 1857.

Newspapers were unknown in Turkey till 1834. The first, edited by a native Christian, appeared in 1840. Still even in 1860 a paper was rarely seen in the hands of the thousands that thronged the decks of steamers in the Golden Horn; but six years later the newsboys were as busy in Constantinople as with us. The fifty papers of that city, however,—thirty of them dailies,—were generally hostile to spiritual piety. The Turks allowed no printing for two centuries after the discovery of the art.

In 1872 the Greco-Turkish "Angeliophoros" was added to the Armenian and Armeno-Turkish. The first page of each was devoted to brief moral and religious articles. The second to education, religious intelligence, and general topics. The third was given up to the natives, and the fourth to current events. They were taken by one in five of adult Protestants, and were highly prized and carefully preserved. At the low rate of a dollar, postage included, they were very popular. In 1874, 1,800 copies of the weekly and 4,000 of the monthly were issued. As an evangelizing agency they went into hundreds of families not Protestant, and each copy was read by about four persons.

Besides these were four illustrated monthlies for children. Three of them, in the same languages as the weeklies, were established in 1871, and the fourth in Bulgarian, 1874, with 2,000 subscribers. These are the first periodicals for children printed in Turkey, and there has been great demand for them. The "Bulgarian Zornitza" was also issued as a weekly in 1877, and has proved one of the most important agencies in educating Bulgarians.

In Syria the "Neshera" (The Unfolding) has been issued for many years by the mission. It is a religious weekly, edited by Rev. Samuel Jessup. The "Koukab es Soobah" (Morning Star) is a monthly for the children, edited by Rev. H. H. Jessup, D.D. The "Lisan el Hal" (The Voice of the Condition, i.e., an object is better known from the sight of it than from any

description) is a semi weekly Protestant paper. The "Beirût" is a Moslem weekly. The Beirût "Official" is a government weekly. "El Musbah" (The Lamp) is a Maronite weekly. "El Beshir" (Good News; or, The Bearer of Good News) is a Jesuit weekly. "El Hadiyeh" (The Present, or Gift) is the weekly paper of the orthodox Greeks, and the "Hadikut el Akhbur" (Garden of News) is a government weekly in Arabic and French. The "Muktatif" and several other monthly journals once published in Beirût, have now been transferred to Cairo, Egypt. The number of these publications indicates great literary activity, as well as denominational rivalry among the Arabic-speaking population of Syria.

In Persia "The Rays of Light," a monthly in the Nestorian vernacular, commenced to shine in 1848, and still sheds its radiance over the plains of Northwestern Persia, and far up into the secluded valleys of Koordistan. It is an 8vo, and in 1866 contained 384 pages. The edition was 400 copies; each number containing a department of religion, education, science, missions, and poetry, not forgetting something to interest the children. In late years it deals more with practical missionary work, and the present social, moral, and religious condition of the people. It gives notices of religious meetings, also accounts of them when held. It publishes communications from the native brethren, and even in Persia has a page of political intelligence. Since Syriac scholarship has improved in both Europe and America, some copies are subscribed for in Christian lands. The whole number of paying subscribers is about 500; but this by no means gives the number who read it, for every copy is not only perused by the readers in the family of the subscribers, but by others also. It is much prized by the Nestorians.

In India, a monthly Marathi periodical, with the fitting name of "Dnyanodaya" (Rise of Knowledge), was commenced at Ahmednagar in 1842, and in 1845 was transferred to Bombay. For eight years it was edited by Rev. R. W. Hume. The people were so eager for it that it soon made its appearance every fortnight, and then once a week. It is still published as an Anglo-vernacular paper, and has a circulation among Hindus as well as Christians, and the "Balbodhmena," a monthly periodical for children, illustrated by engravings, also enters many Hindu homes.

The Bombay "Witness," a religious paper in English, commenced in 1844; also the Bombay "Temperance Advocate," Rev. G. Bowen, who went out in 1848, established the Bombay "Guardian," also in English. At Madras, "The Aurora," a Tamil semi-monthly, made its appearance in 1844; and in 1869 Rev. G. T. Washburn established a monthly called "The True Newsbearer," which was then the only distinctively religious paper in Tamil. He also edited "The Sathbia Wartamani," in Tamil and English. In Ceylon, "The Morning Star," a semi-monthly, in the same language, commenced about 1850; and "The Children's Friend," in Tamil, appeared in 1868.

The Rev. C. W. Park established at Bombay in 1873 "The Indian Evangelical Review." A specimen of the topics discussed in its pages for six years may be found in the Ely volume (p. 218). The "Review" was then transferred to Calcutta.

As early as 1845 ("Missionary Herald," p. 80)

there were in Bombay three weeklies and one monthly opposing Christianity; also a paper at Poona, and a Gujarati monthly, with three weeklies in the same tongue, besides two in Persian and one in Hindustani, all retailing the writings of English enemies of the gospel so that there was need enough for something on the other side.

In China the writer has not met with any notice of a missionary periodical. The well-known "Chinese Repository" (English) was established in 1832 by Dr. Bridgman, and edited by him and Dr. S. Wells Williams for twenty years. Its object was to diffuse information concerning China. A partial list of the topics discussed in it may be found in the Ely volume, pp. 32-35. It may be doubted whether Dr. Williams would have written the admirable account of China contained in his "Middle Kingdom" had he not been editor of the "Repository" for so many years. After that ceased to be issued, "The Chinese Recorder and Missionary Journal," commenced at Foochow in 1868 by Rev. S. L. Baldwin, took its place in the missionary department, and "The China Review" in literary matters. "The Chinese Evangelist," edited in New York in Chinese and English, by Mr. J. Stewart Happer, son of Dr. Happer, President of the Christian College, Canton, China, has been issued monthly, for the Chinese in our own country.

From Japan, Buddhists sent an agent to this country to gather together everything he could find against Christianity, and several of their periodicals deal out the result to their readers. The missionaries established "The Shichi Ichi Zappo" (Weekly Messenger) in 1876, giving a résumé of the scientific, political, and religious progress of the world. It is met with in the cars and steamboats, and men who have never seen a missionary have been led by it to Christ. It contains also papers on social science, such as the principles of hygiene, sanitary arrangements of the home, vaccination, and the like.

"The Morning Star" was issued among the Zulus in 1861, and has been succeeded by "The Torch Light."

Among the Dakotas "The Tapi Oaye" (Word-Carrier) commenced its rounds in 1871, edited by Rev. J. P. Williamson, and after his death by Dr. S. R. Riggs and Rev. A. L. Riggs. It receives an enthusiastic welcome. The Indians not only pay for it; they also write for it, and its circulation continually increases.

The periodicals referred to are only those issued by the missionaries of one or two of our large societies, but besides these are many more that have not been mentioned; and in view of so many published in so many languages, it is a privilege to pray that their editors may be so filled with the Spirit, that the truth they set forth may be blessed to the advancement of the kingdom of our Lord Jesus Christ.

**Perkins, Justin**, b. West Springfield, Mass., U. S. A., March 12th, 1805; graduated at Amherst College 1829; studied theology at Andover; embarked September 21st, 1833, as a missionary of the A. B. C. F. M., and established the Nestorian Mission at Oromiah, Persia. His teacher in Syriac was Mar Yohannan. Schools established by Dr. Perkins and Dr. Grant are now flourishing seminaries. Dr. Perkins translated the Scriptures and several religious books

into Syriac. He visited the United States in 1842, accompanied by the Nestorian bishop Mar Yohannan, whose presence and addresses awakened a deep interest in the mission. Returning to Persia in 1843, he labored successfully at his post, and ably defended Protestantism against misrepresentation and persecution. In 1869 impaired health compelled him to relinquish the work, in which he had been engaged for thirty-six years. He died at Chicopee, Mass., in the same year.

**Perm Version.**—The Perm belongs to the Finn branch of the Ural-Altaic family, and is spoken by the Permians in the Perm, Wiatka, and Archangel governments, Russia. They are composed of 50,000 souls, partially Christianized, but till recently without the Scriptures in their language, except the Gospel of Matthew, which was executed in 1866 by P. A. Popon, for Prince Louis Lucien Bonaparte, not with the view to circulation, but to aid in linguistic studies. In the year 1880 the British and Foreign Bible Society published an edition of the Gospel of Matthew, which has been revised and transcribed into the Russ character by the academician Wiedemann from the text prepared for Prince Bonaparte.

**Pernambuco**, a city on the northeast coast of Brazil, north of Bahia. Climate hot, but healthy. Population, 100,000, Portuguese, Africans, Indians. Language, Portuguese. Religion, Roman Catholic. Natives poor, ignorant, immoral, irreligious. Mission station of the Presbyterian Church (South), 1873; 2 ordained missionaries, 1 missionary's wife, 8 native helpers, 5 out-stations, 6 churches, 172 church-members. South American Missionary Society; 1 missionary and wife (conduct a Seaman's Mission). Southern Baptist Convention; 1 native pastor.

**Perry, John M. S.**, b. Sharon, Conn., U. S. A., September 7th, 1806; graduated at Yale College 1827; taught the Academy in Sharon 1827-28; graduated at the Yale Divinity School 1831; was ordained and installed pastor of the Congregational Church, Mendon, Mass., November 9th, 1831; married Harriet Joanna Lathrop, youngest sister of Mrs. Myron Winslow; relinquished his charge May 13th, 1835, to go to Ceylon; sailed the same year as a missionary of the A. B. C. F. M., arriving in Jaffna, Ceylon, in September.

In 1838 it was found necessary to reduce the number of students in the Batticotta Seminary from 150 to 100, and to disband nearly all the village schools. Mr. Perry, in behalf of the mission, addressed an earnest letter, March 1st, to the committee, in which he told of the 5,000 children of heathen parents deprived of Christian instruction, the discouragement of friends, the loss of influence and confidence caused by the want of funds, entreated the churches to repair the damage as far as possible, and to send no more missionaries till the means of usefulness were restored to those already in the field. Within ten days the writer of the letter died of cholera, after a few hours of severe suffering.

**Persia or Iran.**—The modern kingdom of Persia, called by the natives Iran, occupies, roughly speaking, that part of Western Asia lying between the Caspian Sea on the north and the Persian Gulf on the south, Afghanistan

and Baluchistan on the east and Turkey on the west. Its exact boundaries have not as yet been definitely located, but starting from Mount Ararat at the northwest, the river Aras forms the greater part of its boundary line between that part of Russia lying west of the Caspian Sea, though there is a small strip of country extending south of the river Aras along the Caspian Sea, which does not belong to Persia. East of the Caspian, Russian Turkestan bounds it on the north, though the exact limits of Persian territory have not been accurately settled, Russian authorities claiming more than is allowed by other European powers. On the east the boundary lines between Afghanistan and Baluchistan have been determined by British commissioners at different times, although some parts of it are still disputed. Its southern and southwestern boundary is the coast-line of the Arabian Sea and the Persian Gulf. Its western boundary from Mount Ararat in a general southwesterly direction to the Persian Gulf is the disputed Perso-Turkish frontier for the settlement of which a mixed commission, appointed in 1843, labored for 25 years, with the result that the disputed territory has been defined rather than the exact boundaries delimited.

Persia extends for about 700 miles from north to south, and 900 miles from east to west, and includes an area estimated at 628,000 square miles. The greater part of this region is an elevated plateau, almost a perfect table-land in the centre and on the east, but cut up by mountain chains on the north, the west, and the south. More than three fourths of its entire surface is desert land, but many of the valleys between the high mountain ranges are wonderfully fertile and exceedingly beautiful. Rare flowers, luscious fruits, valuable timber, and mountain brooks and torrents make the land a scene of picturesque beauty which is celebrated in history and song, and indissolubly connected with the ideas of Persia. With such a diversity of physical characteristics there is of necessity a diversity of climate. On the plateau the climate is temperate; at Ispahan summer and winter are equally mild, and regular seasons follow each other. At the north and the northwest severe winters are experienced, while the inhabitants of the desert region in the centre and on the east of it are scorched in summer and frozen in winter. Along the Caspian Sea the summer heat is intense, while the winters are mild, and heavy and frequent rainfalls make the low country marshy and unhealthy. In the southern provinces, though the heat in autumn is excessive, winter and spring are delightful; and summer, though hot, is not unpleasant, since the atmosphere of Persia in general is remarkable for its dryness and purity.

The population of Persia is usually divided into three distinct classes, those inhabiting the cities estimated at 1,963,800, the wandering tribes 1,909,800; and the inhabitants of villages and country districts 3,780,000. The latter are engaged mainly in agriculture, and the best wheat in the world, together with other cereals, is raised, and cotton, sugar, rice, and tobacco are produced in the southern provinces. The wandering tribes dwell in tents, and move about with their flocks and herds as the seasons succeed each other, spending the spring and summer on the mountain slopes and the winter on the plains. The two principal

racess are the Turks and the Persians, the latter of whom belong to the Mongol race. Besides these, 260,000 are Arabs, 675,000 Koords and Leks, 207,000 Baluchis and Gypsies, and 234,000 Lurs. These last are sometimes classed with the Koords.

The principal cities of Persia, with their population, are Teheran 210,000, Tabriz 165,000, Isfahan and Meshed each with 60,000, Kurman and Yezd each with 40,000. It is estimated that 6,860,600 of the population belong to the Shiah faith, 700,000 are Sunnis, 8,500 Parsis, 19,000 Jews, 43,000 Armenians, and 23,000 Nestorians.

The Government of Persia is similar to that of Turkey. It is a kingdom whose king, Nasr-ed-din, is called the Shah. He is the absolute ruler and the master of the lives and goods of all his subjects; but though his power is absolute, he must not act contrary to the accepted doctrines of the Mohammedan religion as laid down by the prophet and interpreted by his descendants (Syeds), and the highpriesthood. The laws are based on the precepts of the Koran, and the Shah is regarded as vicegerent of the prophet. A ministry divided into several departments, after the European fashion, assists him in the executive department of the government. A governor-general is appointed over each one of the 27 provinces, who is directly responsible to the central government. The nomad tribes are ruled over by their chiefs, who are responsible to the governors.

The only instruction of the bulk of the population is from the teachings of the Koran, but there are a great number of colleges supported by public funds, where students are instructed not only in religion, and Persian and Arabic literature, but also in scientific knowledge.

Internal communication is difficult, as there are only 26 miles of railway,—Teheran to Shah Abdul-azim (6 miles); Mahmudabad to Barfurush and Amol, 20 miles; and but two good carriage roads,—Teheran to Kom and Teheran to Kasvin, each about 94 miles, though large wagons are used, especially between Tabriz and the Caucasus. The greater part of its telegraph system of 38,024 miles is worked by a European company and the English Government.

**History.**—It is not the province of this article to give any sketch of the history of the country of Persia, but the following dates of the principal epochs in its history may be of service. From the earliest records, dating back to about 2,000 B.C., the first rulers of Persia were the Medes, who conquered Babylonia, and established a Medo-Persian empire, which lasted, under the rule of famous kings,—Cyrus, Cambyses, Darius, Xerxes, and Artaxerxes,—until the conquest by Alexander the Great, 331 B.C., when the Greek and Parthian Empire was established, which ended about the middle of the 2d century. The Sassanian Empire, from the beginning of the 3d century lasted until about the end of the 7th, when the period of Arabian domination commenced, and gradually grew in extent and influence. Mohammedanism completely captured the life and permeated the thought of the people to the very core. Persia was at times a province, and the centre of the Arabian Empire, under successive rulers of Arab, Turk, or Mongol origin. The sway of the Timurides and Turkomans lasted from 1405 to 1499. From 1499 to 1736 the Sufi or Sufawi

dynasty ruled the country. Its founder, Ismail Sufi, was the originator of Sufism, which made a broad division in the world of Islam. With the downfall of the Sufi, and the accession of Nadir Shah, 1736, the last native Persian dynasty passed away. At the death of Nadir Shah in 1747 a period of anarchy, followed by short reigns of various despots, ensued, until in 1794 Agha Mohammed ascended the throne,—the first of the reigning dynasty of the Kajars. The present Shah succeeded to the throne in 1848.

**Missions in Persia.**—I. UNDER THE OLD COVENANT.—The Persians or Medes were descendants of Japhet, and were the first Aryan race brought into close relation to the kingdom of God under the Old Covenant. For a time the religious hope of the world was bound up in the handful of Jewish captives, of whom Daniel was the chief. As twelve hundred years earlier the hope of the world was centred in one man, Abraham, who came from the same far East,—so on Daniel and the few thousand faithful Jews in that same land of the East depended the true religion in the world. Hence no event in ancient times was so important and central to the kingdom of God as the overthrow of Babylon, and the restoration of God's ancient people, and the preservation of the true faith. No one figure was so central and so closely related to the providential events in the restoration as Cyrus, the king of the Persians. One reason of the friendship of the Persians to the Jews is found in the fact that both nations were Monotheists. The Medes and Persians were never idolaters in the grosser sense of setting up images and worshipping them. "No images profaned the severe simplicity of the Iranic temple. It was only after a long lapse of ages and in connection with foreign worship that idolatry crept in. The Old Zoroastrianism was in this respect as pure as the religion of the Jews, and thus a double bond of sympathy united the Hebrews and the Aryans" (Rawlinson).

The Jews, so impatient generally under a foreign yoke, never rebelled against the Persians; and the Persians, so intolerant of other nations, respected and protected the Jews. This great fact related the Persians very closely to the Old Covenant. Their fidelity, though so imperfect, was acknowledged of God. The Prophets foretold the desolation and complete destruction of all the surrounding idolatrous nations. Not one is left. But Persia is not thus denounced, and Persia is still a nation, holding in her bosom not the Persian stock alone, but the Jewish colonies that were planted in exile more than twenty-five centuries ago in Mesopotamia and in the cities of the Medes. The people of God were thus in most intimate relation to Persia before the coming of Christ.

2. THE EARLY CHRISTIAN AGE.—A person standing on the hills of Palestine can see the Great Sea to the west. His eye also discerns the bluish outline of the mountains beyond Jordan bounding the eastern horizon. That outline was practically the bound of the Roman Empire. Beyond it were the desert and the plains of Mesopotamia and Assyria, extending 700 miles eastward from Palestine, and bounded by the Zagros or Koordish Mountains. The traveller who crosses this range traverses nearly a hundred miles, climbing up and winding his way among the steep valleys and passes, with snow-

covered peaks on every hand. The descent on the eastern side is less difficult, and opens on the plateau or upland regions of the Medes and Persians. We have reached the East in Mesopotamia and Babylon, and the Far East in Persia, whence came the Magi to Jerusalem to welcome the infant Redeemer. The regions of the East and Far East—all beyond the Roman Empire—were until A.D. 225 under the Parthian rule. From thence there were present at the day of Pentecost, Parthians, Medes, and dwellers in Mesopotamia. If we possessed an account of all the acts of the Apostles it would no doubt be clear that some of the twelve were missionaries in that Eastern land. Peter may have visited the Asiatic churches, as Origen and Eusebius assert, and 1 Peter 5:13 seems to convey the salutations of the church of the literal Babylon, the true centre of the East, where Peter and Mark were at the time, and not of the mystical Babylon of the West. Special traditions point to Bartholemew and Thomas as apostles in the Parthian dominions and eastward. Still more circumstantial is the mission of Thaddeus, one of the seventy, to Edessa (Oorfa) in Mesopotamia. Eusebius the historian is confirmed by Syriac documents of great antiquity. It should be remembered that eastward over Syria to the Persian Gulf the Aramaic was the common language, the vernacular of Christ and His apostles. Dr. Curiton says: "I have found among the MSS. in the British Museum a considerable portion of the original Aramaic documents which Eusebius cites as preserved in the archives of Edessa, and various passages from it quoted by several authors, with other testimonies which seem to be sufficient to establish the fact of the early conversion of the inhabitants of that city, and among them the king himself." These documents record that Abgar, King of Edessa, hearing of the fame of Jesus, and that He was persecuted of the Jews, sent Him a letter inviting Him to Edessa to live, and to heal the king of his malady. The reply of Christ was that His mission to the Jews was not complete, but after His ascension a disciple would come and teach the people of Edessa. This disciple was Thaddeus. He reached Edessa, saw the king, healed and converted, and thus planted the mother-church of the East. The king's son refused the Christian faith and persecuted the Christians. Following Thaddeus was Aggheus, his disciple, and then Maris from about A.D. 90, under whom 360 churches were founded in the valley of the Euphrates and the plains and mountains of Assyria. There are documents recording the acts of the martyrs at Edessa in the same year (A.D. 115) that Trajan conquered the Parthian territory, of which Edessa was a part. The Christians were numerous at that time, and the conversion of the king is proved by the coins as early as A.D. 165.

The evidence is that under the Parthians there was an open door to the eastward. They were tolerant in religious matters. The missionary activity of the church and the progress of the gospel under the Parthian rule of the East was as great as under the Roman rule of Europe in the same period.

3. **THE PERSIAN RULE OF THE SASSANIANS, (A.D. 226-641).**—At the time when this purely Persian dynasty arose many religious forces were in conflict. The Jews had grown powerful under the Parthians, and had their great schools

of tradition and Talmudic learning. The old heathenism in Mesopotamia was still prevalent. The claims of Christianity were pressed by growing numbers, but were paralyzed or retarded by the Gnostic sects, so prevalent in the East. Dominant over all, as the state religion, was the old faith of Zoroaster. There was a revival of this faith, with a fierce intolerance equal to any in the West. Some of the Persian kings were favorable to Christianity, but the national feeling always clung to the ancient faith. Many thousands of Persians became Christians, but the stronghold of Zoroastrianism never yielded, and there never arose an indigenous Persian church, worshipping in the Persian language and leaving the whole nation. The Persians refused to follow their wise men, as the Jews refused to follow their prophets, in accepting Jesus as the Christ. In fact the immense number of Jews in Persia had much to do in arraying the Magi against the Christians. When the religion of Christ was accepted by Constantine (A.D. 312) it was stigmatized by the rival empire of the East as the religion of the Romans. Religious zeal and national feeling united against it, and bitter persecutions continued in Persia for a century after they had ceased in the Roman Empire. The sufferings of the Christians under Shapur II. were as terrible as any experienced under Diocletian.

In the face of these obstacles it is clear that the Christian faith had a harder mission field in Asia than in Europe. The 3d century saw Christian missions there advancing generally in peace. The 4th century was full of conflict and persecution, with an open door and many adversaries. The pious and zealous monks of Egypt and Syria were the leading missionaries, and their labors are still attested by the many churches that bear their names in Mesopotamia and among the Nestorians. The Armenians were largely converted, and the Georgians. In this century also strong heretical sects took shape, that have left relics to the present day. The disciples of John near Bagdad, calling themselves Mandeans and numbering some hundreds of families, are such. Their literature and ritual are in the Aramaic dialect, and exceedingly complicated. They resemble the Manicheans. This sect was begun by Manes, a Persian, who formed an eclectic system from the doctrines of the Christians, Zoroastrians, and Buddhists, and gave himself out as the Paraclete promised by Christ. His disciples showed great activity in the spread of his doctrine, and, notwithstanding persecution, the sect increased and continued. It seems probable that a large section of the Persians to-day, called Ali Illahes or Dawoodes, are connected with this doctrine.

In the 5th century the bitter controversies within the church resulted in the separation of the Eastern Christians from the West. The Nestorian controversy at the Council of Ephesus (A.D. 431) resulted in a schism which was carried thence to Edessa, and thence to Persia. The separation of the main body of Christians under the Persian rule was completed in a council held at Seleucia A.D. 499. There were political reasons for this separation as well as theological. It gave satisfaction to the Persian Government to have its Christian subjects break their connection entirely with the Romans, and thus it gave rest from persecution. In the 6th and 7th centuries there was much missionary

activity by the Persian Church. Says Mosheim: "In the East the Nestorians, with incredible industry and perseverance, labored to propagate their religion beyond its former bounds among the barbarous and savage nations inhabiting the deserts and remotest shores of Asia." It appears from unquestioned documentary proofs that numerous missions were extended not only into but beyond Persia, to the Turkish tribes, and even to China. "Their zeal," says Gibbon, "overleaped the limits which confined the ambition and curiosity of the Greeks and Romans, and they pursued without fear the footsteps of the roving Tartar."

4. THE MOSLEM CALIPHS, A.D. 641-1258.—The dominant religion of Persia from the primeval days had been the faith of Zoroaster. Christianity failed to overthrow it. To this mighty religion, which once seemed likely to supersede all others and be proclaimed in the edicts of the great king over Europe as well as Asia, the fatal blow came suddenly, and from a quarter least expected. The Persian emperor received a letter one day from "the camel-driver of Mecca," bidding him abjure the faith of his ancestors and confess that "there is no God but God, and Mohammed is the prophet of God." The indignant monarch tore the letter in pieces, and drove the camel-drivers who brought it from his presence. But before ten years had passed the Arab hordes had driven the Persian from his throne. Persia, defeated in two decisive battles, reluctantly gave up the contest. The whole system fell with a crash, and the only remnants left to perpetuate its rites are some 5,000 souls in Yezd, a city of Persia, and 100,000 Parsis in Bombay.

The faith of Mohammed from that day to this has ruled in Persia. It is the only Aryan race that accepted Islam. One peculiarity should be noticed—the Mobeds of Magism became the Mollabs of Islam. These ecclesiastics were the bitter enemies of early Christian missionaries, and they are the bitter enemies of modern missions to-day. The rule of the Saracen caliphs at Bagdad did not destroy Christianity. The Christians were liable to excessive exactions, and to persecutions at times, but they were recognized as the people of the Book; and the Nestorians had special privileges, and held many offices of trust. The missionary work was prosecuted and expanded. It could not take much root in Persian soil after the Persians became Moslems, but it gained more and more influence in Tartary and China, beyond the Mohammedan conquest. There were ages of comparative peace in those regions, also of the greatest missionary zeal and enterprise on the part of the Nestorians. Their churches were planted in Transoxiana as far as Kashgar, in the regions of Mongolia, and throughout Northern China. To attest this fact there are extensive Christian graveyards containing memorials of the Turkish race on the borders of China, and the monument of Si-ngan-fu, in Shensi, giving the history of the Nestorian Mission in China for 145 years (A.D. 636-781). Timotheus, a patriarch of the church for forty years, was zealously devoted to missionary work, and many monks traversed Asia. What might have been the result if they had but taught the pure faith of the gospel, instead of fasts and formalism, and if they had but possessed an open Bible, and had relied on God's Spirit instead of trusting to intrigue and carnal weapons, we cannot say. But there was enough of the Christ-like

spirit and doctrine to lead multitudes to the Christian profession, and, we may hope, to eternal life. In the eleventh and twelfth centuries there were large Christianized communities. A Mogul prince, Unkh Khan, gave the name to the celebrated Prester John, and his successors were nominal Christians till overthrown by Genghis Khan. The names of 25 metropolitan sees, from Cyprus on the west to Peking on the east, are on record. The schools are almost as widely extended. When shall modern missions speak of training-schools and literary centres not only in the regions of Edessa, Nisibis, Seleucia, and Azerbaijan, but also among the Elamites and Arabs, and in Khorassan, and far east in Tartary?

5. UNDER THE MOGUL TARTARS, A.D. 1258-1430.—The Moguls arose in Chinese Tartary. The last of the race of Christian kings—Christian in name, doubtless, more than in reality—was slain by Genghis Khan about A.D. 1202. Genghis had a Christian wife, the daughter of this king, and he was tolerant toward the Christian faith. In fact the Mogul conquerors were without much religion, and friendly toward all. The wave of carnage and conquest swept westward and covered Persia, and overwhelmed the Caliph of Bagdad in 1258. This change was for a time favorable to the Christians, as the rulers openly declared themselves Christians, or were partial to Christianity. The patriarch of the Nestorians was chosen from people of the same speech and race as the conquerors—a native of Western China. He ruled the church through a stormy period of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging for a time the hope that they would form such an alliance with the Christians of Europe against the Moslems as would render all Asia, across to China, a highway for the Christian faith. But the period of such hope was brief, and soon ended in threatened ruin. The church of both East and West was too degraded in ignorance and superstition, too low in doctrine and life, to avail itself of the opportunity. After a time of vacillation the Moguls found Islam the more suited to their rough and bloody work. The emperor having decided in favor of the Moslems, flung his sword into the scale, and at his back were 100,000 warriors. The Christian cause was lost. The whole structure of the Nestorian Church, unequal to the day of trial, fell before the persecutions and wars of the Tartars. With Timourlane (A.D. 1379-1405) came their utter ruin. He was a bigoted Moslem, and put to the sword all who did not escape to the recesses of the mountains. Thus the fair field of Central Asia, once open to Christian missions, closed in the utter extermination of the Christians, leaving not a vestige of them east of the Koordish Mountains. The Christian faith was thrown back upon its last defences, and became a hunted and despised faith, with only a remnant of adherents, clinging with a death grip to their churches and worship.

6. THE PERIOD OF GREATEST DEPRESSION (A.D. 1400-1830).—Persia was torn by factions and wars for a century. As France rejected the Reformation and reaped her reward in anarchy and blood, so Persia suffered on a larger scale. The Christian Church was lost,—a buried and apparently lifeless seed only remaining, and the Christian name became a by-word.

In 1492 the confusion began to clear. The national religion underwent a change from the

orthodox or Sunnee to the heterodox or Shiah system of Mohammedanism. The distinction between these sects runs back to the days of Mohammed and to his son-in-law Ali. It was through the accession to the throne of Persia of a lineal descendant of Mohammed and Ali that the Shiah system became the established creed of Persia. Since that time the Persians and Turks have indulged in mutual hatred, and regarded each other as worse than infidels. This schism has led to as bloody wars between Moslems and Moslems, as the divisions of Catholic and Protestant have among Christians.

The Suffavean kings (A.D. 1492-1722) ruled over large populations of Armenians and Georgians, Nestorians and Jacobites, in what is now Russian and Turkish territory. Meanwhile the Reformation came to Europe, and the revival of the spirit of propagandism in the Romish Church. Toward the close of the 16th century occurred some events bearing on Persian missions, especially during the reign of Shah Abbas the Great (A.D. 1582-1627), the contemporary of Queen Elizabeth. One was diplomatic intercourse between England and Persia. The first attempt was a failure, for in 1561 Anthony Jenkinson arrived in Persia with letters from Queen Elizabeth for Tamasp Shah. At their interview the Shah's first question was, "Are you a Moslem or an infidel?" He replied that he was not a Moslem, nor was he an infidel. But the Shah expressed his dissatisfaction, and the Englishman retired, and every step of his was immediately sprinkled with sand and swept to remove the defilement of his contact with the royal court. But in 1598 Sir Anthony and Robert Shirley had better success, for they arrived in Persia with a numerous retinue, and for many years were intimately associated with Shah Abbas, and laid the foundation of English influence in the East.

Another event was in 1603 the forcible deportation of thousands of Armenians from the base of Mount Ararat to the central provinces. The descendants of these captives now form communities in Hamadan and Ispahan, and in many intervening districts and villages. This dispersed Christian population is the basis for missionary effort, the more important as the number of Armenians in Persia is small.

The aggressions of the Church of Rome upon the Nestorian Church began in the 13th and 14th centuries, when they competed with the Nestorians for the favor of the Grand Mogul. Nearly a hundred Papal monks perished in the massacres of Timourlane. In 1551 a dissension arose as to the succession of the patriarch, and an appeal was made by one of the parties to the Pope. This opened the way for a secession of a large party to Rome, and the setting up of a rival patriarch.

Following upon the Suffavean kings was an Afghan invasion of Persia, lasting through seven years of massacre and misrule. Then arose Nadir Shah, who extended the Persian frontier far eastward and westward, and pillaged India. A generation of anarchy and civil war followed, until the rise of the present line of kings, called the *Kajar* line, from the ancestral tribe from which they spring. Since the opening of this century these kings have ruled, and an era of peace has come. For twelve centuries Mohammedanism, in one form or another, has controlled the government, and moulded the laws

and morals and destinies of the millions of Persia.

7. THE BEGINNING OF MODERN PROTESTANT MISSIONS.—Manifestly the ancient and mediæval missions in Persia have failed to Christianize the nation. The way for modern Protestant missions began to open with the opening of this century. The Persian language, through the Mogul emperors and the conquests of Nadir Shah, became the polite language of a large part of India, and the *lingua franca* of all Western Asia. The East India Company required their officials to study the Persian, until the time of Lord Macaulay, when English became the official language. Persia also from its position has an importance as a political power that was courted by Napoleon, by Russia, and by England. Thus it came to pass that splendid embassies were sent to Persia early in the century, and English influence most of all controlled affairs for several decades. Henry Martyn was a chaplain in India, and there acquired the Persian language. He came to Persia in 1811 to complete and improve the Persian translation of the New Testament. No one can read his memoir covering the eleven months that he spent in Shiraz, and not marvel at his boldness in confessing Christ and his deliverance from the bigoted Mollahs. In June, 1812, his translation was completed, and he proceeded to the king's camp with the intention of laying the work before the king. Here he was called to a severe trial of his faith, and witnessed a good confession in opposition to the Mollahs before the prime-minister. Both his witness and his book were rejected with scorn. The devoted missionary left the country without knowing of a single convert, and on his way to his native England entered into rest at Tocat, in Asia Minor. His translation of the New Testament and the Psalms was the lasting fruit of his labors. He wrote on completing it this prayer: "Now may the Spirit who gave the word, and called me, I trust, to be an interpreter of it, graciously and powerfully apply it to the hearts of sinners, even to gathering an elect people from the long-estranged Persians." Many wonderful facts in later years show that this prayer is being answered.

The next laborer was the Rev. C. G. Pfander of the Basle Missionary Society. He visited Persia in 1829, and at intervals for a few years sojourned there, passing part of his time in Shusha, Georgia, where his brethren from Germany then had a flourishing mission. This learned and devoted man came near sealing his testimony with his blood at Kermanshab, in Western Persia, but was preserved for protracted labors. He died at Constantinople in 1869. His great work for Persia is "The Balance of Truth," a book comparing Christianity and Mohammedanism. This work and several other treatises on the controversy with Islam were published in India, and are doing a great deal secretly in Persia to direct the thousands whose faith in their religion is shaken. The same works, perhaps unwisely published in Turkey before Dr. Pfander's death, led to severe persecution, and to a strict suppression of all books aimed at the system of Islam. But the books still live, and have their work to do, for they are exhaustive and unanswerable.

In 1833 the Rev. Frederic Haas, another German missionary, with his colleagues, on

being obliged to leave Russia entered Persia, and for a time they made their headquarters in Tabriz. Mr. Haas especially was eminently fitted for the peculiar work among Persian Moslems, and he gained extensive influence and respect among them. Had the mission been sustained by the Society of Basle, the light of the gospel might have spread. Dr. Perkins in 1837 met them as they were leaving the country, and says: "They retired, not from choice, but from necessity. Their Society decided not to continue operations unless the gospel could be openly proclaimed to the Mohammedans. This is impracticable; life would be the price of the attempt." Mr. Haas was pastor until recent years in his native Wurtemberg, and has done much for Persia in times of famine, and in his efforts to establish an orphan asylum.

In 1838 Rev. Wm. Glen, D.D., a Scottish missionary, entered Persia. He had spent many years in Astrachan in Russia, on a translation of the Old Testament. He spent four years, from 1838 to 1842, in Tabriz and Teheran in revising the work with the help of native scholars. Dr. Glen's version of the Old Testament and Henry Martyn's of the New formed a handsome edition of the whole Bible, complete in 1847. Dr. Glen, at nearly seventy, returned to Persia to circulate the Scriptures, and had the pleasure of sowing the seed, but did not live to see any large harvest gathered.

8. MISSION OF THE A. B. C. F. M., 1834 to 1871.—About the year 1827 the erratic adventurer and converted Jew, Dr. Joseph Wolf, in travelling through the East made a short visit to the Nestorians of Persia. A paragraph from his writings led Dr. Anderson of the American Board to direct Messrs. Smith and Dwight in exploring the Armenian field to extend their tour to Oroomiah, Persia. In the spring of 1831 they spent a week among the Nestorians, and reported their visit as the most satisfactory and interesting of the whole tour. (See "Researches of Smith and Dwight.") The liberal views of these Christians, their love of the Scriptures, their rejection of image-worship, auricular confession, and other errors of the Papal Church, marked them as in some sense the Protestants of the East. As the wasting remnant of the once great Syriac-Persian Church they awakened a peculiar sympathy, and started also the hope that with the candlestick replaced and the flame rekindled they would again be the light-bearers to the regions of the Far East.

The A. B. C. F. M. determined to establish a mission to the Nestorians. Rev. Justin Perkins and his wife embarked in the fall of 1833. They reached Tabriz about a year later, and in the summer of 1835 were joined by Dr. and Mrs. Grant. This little company of two missionaries and their wives arrived at Oroomiah formally to occupy the place as a station in November, 1835. Meanwhile the A. B. C. F. M. in 1834 sent out the Rev. J. L. Merrick, who had specially prepared himself to explore the Mohammedan field of Persia and Central Asia. He continued a missionary till 1843. He travelled extensively in company with Mr. Haas, and both came near losing their lives in an encounter with the Mollahs in Ispahan. Mr. Merrick's labors resulted only in teaching some Persian youths the English language and science, and in translating the Sheah traditional Life of

Mohammed. It became evident that Providence had not yet opened the way to labor directly for the Mohammedans, and the effort was abandoned.

Thus in 1835 there were three men and two women on the field, and the A. B. C. F. M. Mission was fairly begun. The roll of this mission counts fifty-two missionaries, men and women, sent out previous to 1871. Time would fail to tell of all these. The pioneers, Messrs. Perkins and Grant, were enthusiastic and apostolic men. One of them, Dr. Grant, finished his career in 1845. Thousands in America and England became familiar with his work through his letters and his book on the "Mountain Nestorians," and his "Memoir," written by a colleague in the mountain work, Dr. Laurie. His grave is by the shores of the Tigris, while the account of his labors has passed into the annals of the church's heroes.

Justin Perkins, D.D., was spared to labor for more than thirty-six years, dying on the last day of 1869. His eminent services were seen in pioneer work, and in making known the Nestorians, especially through his volume called "Eight Years' Residence in Persia," published in 1843; also in beginning the system of education; in translating and carrying through the press the Scriptures in modern Syriac; in preparing a religious literature, and in fostering and encouraging every good work of missionaries and native Christians, and the patrons in America and England. In his later days he was a real patriarch, with all the venerable bearing and deep piety of the best fathers of old.

The force of missionaries was steadily increased from time to time by the arrival of several able men,—Messrs. Holladay and Stocking in 1837; Dr. Wright and Mr. Breath, the printer, in 1840; Mr. Stoddard in 1843; Mr. Cochran in 1848; Mr. Coan in 1849; Mr. Rhea in 1851—most with their wives; and Miss Fiske in 1843, and Miss Rice in 1847. These were men and women of marked piety and character. Four of the men and two of the women furnished subjects for missionary biography, and exerted a greater reflex influence upon the life and spirituality of the church at home than their direct influence could have exerted if they had never become missionaries. The second generation of missionaries came in 1858–1860. Five young ministers, one physician, two single ladies, and five married ladies then joined the mission. This large company soon faded away through death and ill-health, so that in 1864 of the whole company only two ministers, Messrs. Shedd and Labaree and their wives, and Mrs. Rhea, were left on the field. Dr. Van Norden and his wife joined the mission in 1866 and Miss Dean in 1868. Of the missionaries of the A. B. C. F. M. there remain in the work at this date (1890) five persons, Messrs. Shedd and Labaree and their wives, and Miss Dean.

The average missionary life of the seventeen men who died or left the work previous to 1870 was nine years and two months. The average of the women was higher.

The work of the A. B. C. F. M. was almost entirely for the Nestorians, numbering about 100,000 souls, partly in Persia and partly in Koordistan, under Turkish rule.

The stages of progress at Oroomiah may be noticed.

(1) *The Preparatory Work.*—When Messrs. Perkins and Grant reached Oroomiah they

found a people entirely accessible. In fact, their arrival was one general welcome from the ecclesiastics and the people. The bishops gave them cordial co-operation in the prosecution of their missionary labors, regarding them not as rivals, but as teachers and coadjutors in the work of instruction and improvement of their people. The influence of Dr. Grant as a physician was very great with the governor and leading men of the Moslems, and the King of Persia sent a special firman to express his pleasure that teachers had come from the New World to instruct his subjects, and also to command their protection.

The first formal work was to prepare a series of cards in the common language, that had not till then been reduced to writing. The first school was begun in a basement in January, 1836, with seven small boys. This was the germ of the training-school on Mount Seir that has sent out scores of preachers and teachers, and that is now continued as Orooniah College. About two years later Mrs. Grant succeeded in collecting a few little girls, the germ of the female seminary. In the first year three village schools were opened. This number increased till over seventy schools in less than ten years were in successful operation. In 1840 the printing-press arrived, and the Scriptures were so far translated that portions were at once struck off. Preaching was soon begun in the station chapel, in various village churches and in the schools. Privately and publicly, by teaching, preaching, and printing, the seed was sown broadcast. Hundreds had learned to read; the people were friendly, and scores of the ecclesiastics had been under instruction. The missionaries prophesied to the dry bones; but there were few if any signs of spiritual movement or life.

(2) *The Ingathering.*—After the lapse of ten years of faith and toil the harvest came in the two mission schools. Says Mr. Stoddard: "On December 19th, 1845, the Spirit came in both schools in wonderful power. From that time the interest rapidly increased, until two days after, as I was going to preaching service with one of the brethren, we heard the voice of prayer intermingled with sobs on every side. After exercises of the deepest solemnity we closed the meeting; but not one moved from his seat. When at last they left, they flocked to my study, and it was filled to overflowing with anxious inquirers. Then, with emotions that I can never describe, I unfolded with faltering tongue the gospel of Jesus Christ to one company after another, till near midnight. The morning light brought with it a repetition of similar scenes. Rising very early I found inquirers waiting to be guided to Jesus." Thus the work with deepening power continued for about two months in the two schools. At the close of that time fifty of the pupils had been hopefully converted. Thence the work spread throughout the mission premises and to several of the villages with something like pentecostal power and results, entirely changing the face of the missionary work, as the outgushing of a stream of water changes a Persian desert into a garden of flowers and fruits. Other similar revivals followed, and no year has passed since then without some portion of the field being blessed. A general enlightening and elevating influence went forth among the Nestorian

people. Nearly a thousand had been received to the communion previous to 1870.

(3) *Organizing and Training.*—The revivals brought some hundreds of converts to be trained and organized under difficult circumstances. The missionaries did not seek to form a new church, but to see a revival of pure religion in the old church. For many years an honest effort was made to reform the old body without destroying its organization. This effort failed. One reason was that the patriarch did his utmost, by his threats and persecutions, to alienate the spiritual-minded. Also, the converts could no longer accept the unscriptural practices and rank abuses that prevailed, and it became evident that there was no method to do away with these abuses and practices. The converts also asked for better care, and purer and better instruction and means of grace, than they found in the dead language and rituals and ordinances of the old church. The training began, something as Wesley's classes in England began, with no intention of disturbing the old establishment. The converts were invited to join with the missionaries in their communion, and the missionaries examined the candidates and exercised needed discipline. As the number became too large and widely scattered to come all to one place, it was divided, and after a time the native ordained preachers became pastors, and local churches arose and assumed their duties and responsibilities. In time these pastors and elders from the churches and the other preachers, including bishops, presbyters, and deacons, all of whom had received ordination in the old church, met in conference with the missionaries. The first conference was in 1862. This conference adopted very simple rules of order and discipline, and a brief confession of faith. Thus the separation took place in no spirit of hostility or controversy. There was no violent disruption, no bitter words were spoken of the old church or its ecclesiastics. Some things were taken from the canons and rituals of ancient usage, others from the usages of Protestant churches. The patriarch in office at the time was at first very friendly to Dr. Grant and the Mountain Mission, and personally aided in superintending the building of mission houses; subsequently he did all in his power to break up the mission. His most able brother, however, Deacon Isaac, accepted the evangelical doctrines, and till his death in 1865 was the foremost man in the reformed communion. Of the bishops, three united with the reform, and died in the evangelical communion,—Mar Elias of Geogtapa, Mar Yohannan of Gavalan, and Mar Joseph of Bohtan. A large majority of the presbyters of the old church in Persia joined the reform movement, and as large a proportion of the deacons; and the same is true of the Maleks or leading men.

The work accomplished under the A. B. C. F. M. was to establish an enterprise with all the appliances and parts of an aggressive reformation in this old church a thousand miles east of Constantinople, in the heart of Islam—the press, the training-schools for young men and young women, a band of over fifty native pastors and evangelists, an aggregate of over eighty schools and congregations. The results were great in themselves, and greater in their bearing upon the future.

The aggregate of appropriations made by the

A. B. C. F. M. for the nearly 38 years of its superintendence was about \$580,000—an average of \$15,470 per annum. The long inland journey renders Persia difficult of access, and one of the most expensive in the outlay for travel of the missions undertaken from America, while it is one of the cheapest in the employment of native agencies and expenses on the field.

9. MISSIONS OF THE PRESBYTERIAN BOARD. 1871 to 1890.—By the union of the two great branches of the Presbyterian Church in 1870, the New School body ceased its support of the A. B. C. F. M., and claimed a portion of the mission as its heritage. "The Mission to the Nestorians" changed its name, and since 1870 is called "The Mission to Persia," and the field was transferred to the care of the Presbyterian Board in 1871. The missionaries at the time of the transfer were 4 ordained missionaries and their wives, one physician and his wife, and one single lady. To these have been added since 1871, 18 ordained men and their wives, 4 physicians and their wives, 21 single ladies (two of whom are physicians), and 4 single gentlemen (one of them a physician): in all 26 men and 43 women. Some of these have been removed by death; a larger number have failed in health and returned to America. The mission staff of workers at present in Persia is 16 men and 27 women.

The expansion of effort has been great in these years. In 1870 the mission considered it an urgent duty to embrace at once within their efforts the Armenians and Moslems of Central Persia. This effort was seconded by the Board. Teheran was occupied as a station in 1872; Tabriz in 1873; Hamadan in 1882; Salmas in 1886; and the station for Mountain Nestorians was revived in Turkish territory in 1889. The area of country brought within evangelizing labor has been greatly enlarged. The eleven missionaries in 1870 are now four times as many. The one station has become six. The territory was too extended for annual meetings of missionaries separated by twenty days of caravan travel, and speaking several languages. In 1883 the mission was divided into West Persia and East Persia. A glance at the first fifty years of this American Mission shows that the American Church has sent to Persia—a far off and inland nation, with which our country has few commercial or political relations—nearly a hundred of her chosen sons and daughters, at an expense of nearly \$1,200,000 of free contributions for these missionaries and for evangelizing and educating the people. Such is the record in honor of Christ and for the benefit of the souls of men in a land so far away. The present annual expenditure of this mission is far in advance of former times, as the work and number of stations have increased. But in a great measure the work is still preparatory.

*The Western Mission* embraces the province of Azerbaijan, and a large portion of Koordistan, the lands of ancient Assyria and Media, and indirectly a much larger region in the Caucasus and in Turkey. The work is first for the nominal Christians, and then for Jews, Moslems, and others. Among the Syrian or Nestorian Christians there is the old work, continued in Oroomiah and the mountains.

The Oroomiah station continues to flourish. The reform among the Nestorians shows: communicants in 1857, 216; in 1877, 1,087; and in

1889 over 2,000. The Reformed Evangelical Church: the roll of ministers shows 40 fully ordained men, and 30 others, licentiates; also 87 elders, and 91 deaconesses of the congregations. The Reformed Church has its synod; also a native board of missions that meets monthly with the missionaries. By combining funds and counsels with the missionaries, a system of pastoral care and itinerant labors is in operation, which aims as fast as possible to reach all the Christian population, and to carry the gospel to all the other populations. The people are generally very poor in worldly goods, but are able to do much for their own support and for the spread of the gospel—averaging about a dollar a year to a communicant, when wages are but ten and twelve cents a day for work. The missionary spirit is embodied in their creed as well as the history of ancient times, and is seen in daily efforts of many men and women, especially the young laymen. There is a growing zeal to preach to Jews, Koords, Persians, and Moslems; and as the fields are ripening for the sickle, these native Christians are to be the reapers. They have already gathered the first-fruits among all these classes.

The first and highest call in a growing native church is for a native ministry, and here this field compares with any other in Western Asia. The college is at the head of the educational work, with a theological class, a scientific course, an industrial department, and a few medical students. New buildings have been erected in the same yard with the hospital, and thus the two agencies form a centre of great influence. In the city of Oroomiah is the Fidelia Fiske Female Seminary, with new buildings erected in 1888, for educating girls. During the winter in the villages far and near are over 100 parochial schools, giving education to 2,500 children. The Sabbath-school is the auxiliary in all the congregations attended by young and old to the number of about 5,000. These agencies are aided by the printing-press and small monthly papers, by colporteur work, and still more by the medical arm of the service. There are other schemes of benevolence in an orphanage conducted by Deacon Abraham, a native brother, and in relief for sufferers in time of famine. Two severe famines have passed over the region in the last twenty years, in which the mission has been the means of relieving thousands. The poor and oppressed and persecuted and unfortunate come to the missionary for assistance and help.

A notable event was the celebration of the jubilee of this work in 1885, followed by prevailing revivals in many of the congregations. The hope of the work is in the gift of the Holy Spirit in its convincing and renewing power. Thousands of hearts are more or less convinced, and there is opportunity for the work to grow manifold before it is completed. There is the beginning of the end in several self-supporting churches. There can be no doubt that the great Head of the church has owned and blessed the work among the Nestorians; multitudes of souls have been saved, and the foundations of a new and lasting reformation laid. The hope is certainly cherished that the Nestorians may be rapidly enlightened and won to living Christianity, not only through the station at Oroomiah, but from the renewed activity in the mountains of Koordistan.

10. ARCHBISHOP'S MISSION TO THE ASSYRIAN

CHRISTIANS.—For account of the work of this Society among the Nestorians, see article on the Society.

**Work among the Armenians in Persia.**—Many Armenians dwelt in Northern Persia in ancient times. The communities of Central Persia date from the time of Shah Abbas, when 40,000 were led into captivity from Trans-Caucasia and settled near Ispahan. In the war of 1830 with Russia the Armenians were accused of wishing to betray Tabriz into their hands, and their massacre was planned. They were saved by the English residents, who placed guards at the entrances of the Armenian quarters. At that time 9,000 families of Armenians fled from Persia. Afterwards Abbas Mirza secured the priests in his service by presents, and induced Armenians to return by granting them special privileges.

Small communities of Armenians are scattered throughout Persia. In the fertile plains of Salmas and Oroomiah, under the shadow of Ararat, on the northern slopes of the Elburz in Karadagh, through the valleys of Bakhtiari, on the shores of the Caspian, in the cities of Tabriz, Teheran, Hamadan, Ispahan, Maragha, Khoi, and their surrounding districts, are these communities of Armenians, wonderfully preserved by God in the midst of thousands of Mohammedans. There is certainly a grand purpose in this providence. Their presence enables missionaries and evangelists to occupy as preaching stations all these places, and not only to labor for them, but for the Mohammedans. The Armenians themselves, too, will become a leaven among the surrounding peoples when their Christianity is revived. They are like a metallic mirror which once reflected the light, but is now rusted, and needs repolishing to reflect Christ's glory round about.

The efforts to reach the Armenians of Persia are of recent origin compared with work for Nestorians. The missionaries living in Armenian communities have given most of their time to Mussulman work. Only very recently has the mission taken action that they should learn the Armenian language. The intolerance of Islam has driven them more to work for Armenians. Now the stations of the Presbyterian Mission at Tabriz, Teheran, Hamadan, and Salmas, and of the Church Missionary Society at Ispahan, are chiefly engaged in work for Armenians. At each of these places is a prosperous girls' boarding-school. At Ispahan is a large and flourishing boys' school, with several hundred pupils. In Hamadan almost all the Armenian children of school age are in Protestant schools. In Teheran and Tabriz the schools meet much opposition and competition. In the latter place the Armenians have two graded schools with seven rooms, and liberally paid, well-trained teachers. The mission school has 50 pupils, and a fine class of young men just ready for a theological course. There are six organized churches in Persia, which are composed chiefly of Armenians, with perhaps 325 members, the largest congregation being in Julfa, near Ispahan. A lack of Armenian teachers and preachers has been greatly felt, but it is now on the point of being supplied, and we can anticipate greater progress in the future.

Every forward step is contested by the Armenians and their ecclesiastics. The validity of Protestant marriage, the purchase of houses, the establishment of new out-stations and

schools, the entrance to new places—each advance is the occasion of a burst of opposition which frequently is not quieted until settled by the government. Sometimes they resort to the boycott. Mussulman work has been disturbed and persecution brought on by their instigation. Their belief that by dividing their race we weaken them politically is a great hindrance. The prospects are that the work among the Armenians will be slow.

**Persian Version.**—The Persian belongs to the Iranic branch of the Aryan family of languages, and is used in Persia, India, etc. Translations into the ancient Persian of single books of the Old and New Testament only are known: (a) Of the Old Testament, the Pentateuch, Proverbs, Ecclesiastes, and Song of Songs were slavishly translated from the Hebrew,—the Pentateuch by Jacob ben Joseph Tawns, and the other books by an unknown Jew. The former was published in Constantinople in Hebrew characters in 1546, and again in the London Polyglot in Persian characters with a Latin translation; the latter are still extant in a MS., No. 519, at the Paris National Library. (b) Of the New Testament there are two versions of the Gospels, one made from the Greek, the other from the Peshito. The former was edited according to two MSS. by Whelock and Pierson (London, 1657); the latter is contained in the London Polyglot, and was published in a Latin translation by Ch. Bode (Helmstadt, 1751). All these versions are prepared in the modern Persian; even the translation of the Pentateuch was made at a late period, as may be seen from the rendering of "Babel" in Gen. 10. 10, by "Bagdad," which was built in the year 772. An attempt to procure a version of the Scriptures in Persian was made by Nadir Shah, and a translation of the Gospels was prepared by the Jesuits Duhan and Desvignes in 1740. It was edited by Professor Dorn, Petersburg, 1848.

In the present century different translations into Persian were made. The New Testament was published by the Calcutta Auxiliary Society in 1816, and at London in 1825, according to a version made by Sabat; Henry Martyn's version was printed at St. Petersburg 1815, Calcutta 1826, and after. The Psalms, too, as translated by Henry Martyn, were published in 1816 at Calcutta; and republished at London, under the superintendence of Dr. Lee, in 1824. The Book of Genesis, translated by Mirza Jaffier, was printed at London in 1827; and Isaiah, as rendered by Mirza Ibrahim, was also published at London in 1834. At last the entire Old Testament, translated by the Archdeacon T. Robinson, was issued in 1838, after fourteen years had been spent on the work of translation. Another translation of the Old Testament, made by the Rev. W. Glen, of the Scottish Mission at Astrakhan, was published between 1830 and 1847, at Edinburgh. Henry Martyn's New Testament, which had been in use for more than half a century, was published in a revised form in 1877, the revision having been made by the Rev. N. R. Bruce, a Scottish missionary stationed at Julfa, near Ispahan. In the same year a revision committee, consisting of the Rev. R. Bruce of the Church Missionary Society, and the Revs. J. Bassett and J. L. Potter of the American Presbyterian Missions, has been formed for the purpose of revising the Persian

Scriptures. A revised edition of Mr. Bruce's revision of Henry Martyn's New Testament was published at London in 1881, the edition consisting of 6,000 copies; another edition was issued in 1885. The revision of the Old Testament has also been commenced by Dr. Bruce, and Genesis, Exodus, and the Psalms were published in 1888.

(Specimen verses. John 3: 16.)

زيرا که خدا آهـر جهان را دوست داشت  
که فرزند بکار خـود را ارزانی فرمود تا که  
هر کس که بر او ایمان آورد هـلاک نشود  
بلکه زندگانی جاوید یابد

Hebrew character.

**Peru**, a republic of South America, which lies between the Pacific Ocean on the west and Brazil and Bolivia on the east, Ecuador on the north, and Chili on the south. It contains three distinctive physical divisions—the coast region, the region of the Andes, and the tropical forests within the valley of the Amazon. Its area is 463,747 square miles, divided into nineteen departments. Every variety of climate is found in Peru, on account of the difference in elevation in various parts. The population (1876) is 2,621,844, besides 350,000 uncivilized Indians. Twenty-three per cent of the population are mixed races, Cholos and Zambos. There are 18,000 Europeans, and 50,000 Asiatics, chiefly Chinese. The principal cities, with their population, are: Lima, the capital (101,488); Callao, the principal seaport (33,502); Arequipa (29,237); and Cuzco (18,370). The constitution, proclaimed in 1856 and revised 1860, provides that a president and a congress of two houses shall be elected every four years. The constitution prohibits the public exercise of any other religion than the Roman Catholic, though in reality there is a certain amount of tolerance, since Anglican churches and Jewish synagogues are found in Callao and Lima. Education is compulsory, and is free in the municipal public schools. In 1889 there were 16,025 miles of railway, and Peru is in communication by cable with the telegraphic system of the world.

The American Bible Society through its colporteurs prosecutes the only Protestant work so far in Peru, by distributing the Bible translated into Spanish. The principal agent of the Bible Society is an Italian minister, who has been holding church services in Callao, where he gathered a congregation of over a hundred, to whom he preached in Spanish. His success in making converts roused the opposition of the priests, who viewed with unconcern the services in English, but saw that preaching in Spanish was likely to prove a potent means of enlight-

ening the people, and on the 25th of June, 1890, Mr. Penzotti, the minister, was arrested and put in prison, charged with offending the law, which has been practically a dead letter. At present writing (January, 1891) he is still in prison. The United States Government cannot interfere officially, since Mr. Penzotti is an Italian, but the consul has been instructed to use his personal influence to secure the release of the prisoner. The Italian Government has been strangely apathetic. In the mean time much popular indignation has been aroused in Peru, and several public meetings have been held to agitate the question of freedom of religion. Over 2,000 people, among them many of the most prominent citizens, attended such a meeting in Lima recently; the press have come out strongly in favor of freedom of religious belief and worship, and it is not unlikely that the prohibition of the Protestant religion will be removed ere the close of this year.

**Peshawar**, a city and military post in Punjab, India, 276 miles from Lahore, 190 miles from Kabul; the outpost against Afghanistan. The modern city has but slight architectural pretensions, the houses being generally built of small bricks of mud, held together by a wooden framework, and except the principal thoroughfare all the streets are narrow and crooked. The sanitary arrangements are good, and water plenty. Outside of the city are lovely fruit gardens, which form a favorite pleasure-ground of the people. Population of city and suburbs, 59,292, Moslems, Hindus, Sikhs, Christians, Jains, etc. Mission station C. M. S. (1855); 1 native pastor, 42 communicants, 18 native helpers, 4 schools, 656 scholars. An Afghan mission is conducted from this place. Kafiristan has also been reached from here.

**Petchaburee**, a city in Siam, on the west side of the Gulf of Siam, 85 miles southwest of Bangkok. Has 10,000 inhabitants. Mission station (1861) of the Presbyterian Church (North); 3 missionaries, 2 missionaries' wives, 2 single ladies, 17 native workers, 4 principal out-stations. There are 5 churches located in Petchaburee and its province, 153 communicants, 12 day-schools, 232 pupils, 60 Sabbath-schools, boys' boarding-school, 28 boys, girls' industrial school, 37 girls. At the dispensary 4,327 patients were treated in 1889.

**Petersburg**, a town in Central Kaffraria, South Africa, west of King William's Town. Mission station of the Berlin Evangelical Missionary Society (1856); 1 missionary, 5 native helpers, 42 church-members, 5 schools, 37 scholars.

**Philadelphia Medical Mission** was the first established in the United States. Dr. A. B. Kirkpatrick, now (1890) a missionary in Burmah, founded this mission in 1879. Headquarters, 519 South Sixth Street; Henry R. Fox, Superintendent. The Advisory Board consists of a chairman, secretary, superintendent, four physicians (including the chairman), seven clergymen, eleven laymen, and seven women. In 1889 there was also a dispensary on Front Street below Christian, and one at 973 Frankford Avenue. Mr. John B. Stetson, a large manufacturer, has founded a "medical department" to meet the wants of those needing medical treatment in the neighborhood of the mission rooms, especially the employees of

Stetson & Co. The payment of one dollar entitles one to medical treatment for three months, the medicines being provided at cost, and no one is turned away for lack of means to meet the stipulated requirements. The rooms are open daily except on the Sabbath; a clergyman is superintendent, with whom a physician is associated, and there is also a staff of eminent practitioners and specialists.

*The Design of the mission* is to reach men and women who otherwise would never hear the gospel; it seeks to rescue the perishing who are not sought out by any other agencies. Germans, Russians, Arabs, Turks, Indians, Chinese, and Negroes make up the crowds which stand and listen with interest as the good news of salvation is proclaimed in their hearing. Special effort is also made to reach the fallen women.

*Method and Means Employed.*—Every Thursday evening a lunch is given for women immediately after the gospel service; visits are made to those who are known in the various hospitals, homes, and prisons; tracts are distributed, the Bible read, and prayers offered with and for the sick, and situations are sought in which to place wandering women who have proved that they are thoroughly renewed by the gospel's power. Services are held for the patients immediately before being waited upon by the doctor. After the reading of a passage from the Bible, followed by a hymn and prayer, the gospel is briefly presented to all who are in waiting. The interest of these meetings is greatly enhanced and the attendance increased by delegations of young people who attend, in turn, from different churches in order to lead the music, imparting their zest and skill to this division of the service.

Twice a week, before the evening meetings, visits are paid to a number of the houses in the vicinity by the superintendent, accompanied by a co-laborer; invitations are given to attend the meetings, and tracts, especially adapted to the class being sought, are distributed. Carefully selected story-books, containing the gospel, are also loaned upon these occasions.

The work is well-nigh foreign in its character. Jews and Italians, Armenians, Arabs, and mongrel Orientals find their way to the free distribution of medicine with gratuitous attendance, and in seeking to recover health for the body often secure the salvation of their souls. A Christian Armenian from the Berber country has been a preacher and interpreter in the work of the mission.

*Results.*—Many are the touching testimonies of those who speak of the higher good attained while they were in search of temporal healing. "The cloud is lifted, I see the light;" "Out of my tears, and away from my self-trusting, I now see Him as my Saviour;" "Hearing John 8:12 explained, I saw my mistake; now I am looking to Christ, who is the Light—I return home, though sick, a happy man;" "Thank God, I am saved! how I bless Him for bringing me here!" And like expressions often fall from the lips of those who have found joy and peace in believing.

The following figures will convey some idea of the general results attained:

Number of meetings (at three dispensaries) 756; persons present, 1,915; at evening gospel meetings, 10,886; at open-air meetings, 3,830; at Sunday-school, 1,015—total, 17,646. Number of inquirers, 913; in previous years, 9,253;

total number in eleven years, 10,166. Tracts distributed (English, German, Hebrew, and Italian), 35,000; Bibles and Testaments given, 81; visits to hospitals, prisons, etc., 112; houses of prostitution visited, 140; visits to, 1,693; conversions of inmates, 8,465; women taken to reformatory homes, 17; received in the mission, 9; number furnished with clothing, 18; total number of dispensary cases in eleven years, 25,821; total number of home and dispensary cases in eleven years, 45,365; total number of home cases, 19,154; total number of prescriptions put up, 45,250. And all this work has been done at an average annual expense of about \$1,100, which includes from \$610 to \$660 for rent.

**Philip, John**, b. in England; studied at Hoxton Academy; was appointed as a Deputation with Rev. John Campbell to visit the stations of the L. M. S. in South Africa; sailed December 10th, 1818, reaching Cape Town February 26th, 1819. Accompanied by Mr. Moffat and Mr. Evans, the Deputation visited the stations within the colony, but were prevented by the Kafir war from proceeding beyond. Mr. Philip returned to Cape Town. In 1820 he received from Princeton College, New Jersey, U. S. A., the degree of Doctor of Divinity. The Deputation having completed their work, Dr. Philip was appointed permanent superintendent of the Society's Missions in South Africa. He was also pastor of an English congregation at Cape Town. In 1826 he visited England by invitation of the directors, his place as superintendent being supplied by Rev. R. Miles. While at home he published his work "Researches in South Africa." Certain representations made by him respecting the condition of the Hottentots led the Directors to present a memorial to the government, which secured certain regulations for the amelioration of the civil condition of that tribe among the people. Dr. Philip returned to the Cape July 18th, 1829, and resumed his office as superintendent of the Society's missions. Soon after his return he was called as defendant in an action for libel in the Supreme Court at the Cape on account of a passage in his work, "Researches in South Africa." The action was decided against him, and the damages and costs amounted to £1,200. This was generously paid by friends in England. On February 28th, 1836, he left Cape Town with Rev. James Read, a Kafir chief, and a Hottentot, reaching London May 14th. With these he gave evidence before a Parliamentary Committee respecting the aborigines in South Africa and the causes of the Kafir war. Having accomplished the object of this visit he re-embarked for Africa, arriving at Cape Town February 6th, 1838. He made repeated visits to the various stations, and also undertook the education of several young men, to prepare them for missionary work. In 1844 Rev. J. C. Brown having taken his place as pastor of the English church at Cape Town, he went, December, 1846, on account of Mrs. Philip's ill-health, to Port Elizabeth. Thence he proceeded to Hankey, where she died October 23d, 1847. Dr. Philip died at Hankey, South Africa, August 27th, 1851. His "Researches in South Africa" were published in 2 vols. in London, 1828.

**Philippine Islands**, a group lying in the Indian Archipelago, extending almost due

north and south from Formosa to Borneo and the Moluccas, embracing 16° of latitude and 9° of longitude, containing 114,326 square miles, with a population estimated at 7,500,000. Of the 400 islands many are small and of no importance. The two largest are Luzon and Mindanao. The climate is hot, but tempered by ocean breezes and great moisture; and the vegetation is luxurious.

The majority of the inhabitants are of the Malayan race. The resident Spaniards are few in number. There are a great many Chinese, and some tribes of Negritos.

The islands were discovered and conquered by the Spaniards in the 16th century, and they are now under the charge of a governor-general, under whom the 43 provinces are ruled by governors, alcaldes, or commandants, according to their importance. The capital, Manila, on the island of Luzon, has a population of 270,000 (1880). Other towns are Lavag, 36,639; San Miguel, 31,672; Banaug, 33,106; Cabecera, 29,057. Missions: British and Foreign Bible Society, with a depot at Luzon. Scriptures: Psalms, Gospels, Acts, and New Testament in Pangisauan.

**Philippopolis**, a city of Bulgaria, the most important city of the southern province (Eastern Roumelia). Population, 45,000, Bulgarians, Turks, Greeks, etc. It suffered a great deal during the Bulgarian insurrection, but since the establishment of peace and its connection by rail with Europe it has grown in importance. Mission station of the A. B. C. F. M.; 2 missionaries and wives, 1 female missionary, 22 native helpers, 12 out-stations, 6 churches, 223 church-members, 2 schools, 188 scholars. There is also a large school for girls, carried on by Mrs. Mumford as a "faith" mission. A medical mission and hospital under the auspices of the Friends [of England] is carried on by Mr. Tonjoroff, formerly a preacher under the A. B. C. F. M.

**Phillips, Jeremiah**, b. Plainfield, N. Y., U. S. A., January 5th, 1812; attended Madison (now Colgate) University, but did not complete his course of study, the Committee of the Missionary Society desiring that he should accompany Dr. Sutton on his return to India. He was ordained at Plainfield, and embarked for Calcutta in company with Dr. E. Noyes, September 22d, 1835, under the Free Baptist Missionary Society. His field of labor was Orissa, a region of country hitherto wholly untouched by missionary effort, and was occupied in 1836. Balasore was first occupied in 1840 with a boarding-school of six native children. The same year Mr. Phillips commenced a new station at Jellasore with some of the Balasore boarding scholars and native converts. He was the first to discover the Santals, a rude and numerous race of aborigines previously unknown to missionaries. He reduced their wild language to writing, prepared and published a grammar and dictionary, and established schools among them—for the first time in their existence, so far as known. As a result of his correspondence and published articles in the papers of India and America, seven missions have been established, and are successfully working among them. He translated the Gospels and other portions of the Bible into their language, and also prepared schoolbooks. The degree of doctor of divinity was conferred

upon him by Bates College, Maine. The India Government officially thanked Dr. Phillips for his great work among the Santals. "The Indian Evangelical Review," in a notice of his leaving India in impaired health, says: "When he arrived in Orissa all was one unbroken expanse of Hinduism. And after 44 years of faithful toil he left five congregations, 478 communicants, 453 pupils in Sunday-schools, many day-schools with a large force of native teachers and preachers, a press sending out a stream of Bibles and Christian books, some of them in a dialect which but a few years ago existed only in the unwritten speech of savages, and a Biblical school with seventeen Hindu young men preparing for the Christian ministry." He left for home in 1855, sailed again for India December 17th, 1864, and his health failing he took his final departure, June, 1879. He died at Hillsdale, Mich., December 9th, 1879.

**Pieter Maritzburg**, the capital of Natal, Africa, is situated in a fertile plain, 2,000 feet above the sea, surrounded by a circle of hills. It has an excellent climate, especially curative of pulmonary complaints, and the rich vegetation of its gardens and surrounding woods makes it one of the most delightful cities of Africa. Its population, numbering 15,769, is most cosmopolitan in character, consisting of Zulus, Kafirs, Europeans, Hindus, Chinese, and Arabs; and English, Dutch, Tamil, and Zulu are the prevailing tongues. Mission station of the Free Church of Scotland (1865), taken over from the Wesleyan Methodists; 1 missionary and wife, 1 female missionary, 22 native helpers, 1 church, 163 church-members, 3 schools, 136 scholars. S. P. G. (1851); 2 missionaries.

**Pinalap**, one of the Caroline Islands, Micronesia, has a population of 800. Mission work is under the Hawaiian Evangelical Association; 1 native pastor, 100 scholars, 238 church-members.

**Pinetown**, a town in Natal, Africa, near Pieter Maritzburg. Mission station of S. P. G. (1857); 1 missionary, 43 communicants.

**Ping-yang**, a prefectural city in Shansi, China, on a tributary of the Yellow River, in the southern part of the province. Mission station of the C. I. M. (1879); 1 missionary, 1 church, 81 church-members.

**Pinkerton, Myron Winslow**, b. Bos-cawen, N. H., U. S. A., July 18th, 1843; graduated at Ripon College 1868, and Chicago Theological Seminary 1871. His mother was deeply interested in missions, especially in the labors of Myron Winslow, and named her first-born son after him, expressing the hope that he would be a missionary. She died when he was three years of age, but having heard of her desire, he said that when in college it often came to his mind. He was ordained July 14th, 1871. He said: "Perhaps there will be men who would wish to go to Turkey or Japan, while few will go to Africa. I would rather go where the laborers are few." He sailed August 9th, 1871, as a missionary of the A. B. C. F. M. for Africa, arriving at Natal October 9th, and was stationed among the Zulus at Umpwalumi. In 1875 he went 125 miles inland towards the Koplamba Mountains, and founded the station of Indundama, to which he removed with his family in 1876. Here, be-

sides his pastoral and evangelistic work, he assisted in the translation of the Scriptures. Committing the station to the native helper, he pushed still further inland. A committee appointed by the mission to consider the matter of an inland mission, after due inquiry reported that desirable places could be found for mission stations, especially among the large Zulu-speaking tribes under the chief Umzila, and it was decided that such a mission be established. Mr. Pinkerton offered to engage in this enterprise, saying that if the mission desired it, he would make it his life-work. In 1879 he prepared to depart for Umzila's kingdom, distant by land a thousand miles. Before starting he took his family to America, "because," he wrote from Natal, "of the probably long time I shall be engaged, and the possibility of my being removed by death while I am away." Leaving his family at home, he sailed by way of England for Natal, reaching Durban July 2d, 1880. Associating with himself Mr. E. Jourdan, an American ship-officer, who had been five years in Senegambia, and more recently had labored in the mission at Adams and John Pohleni, a Zulu convert, Mr. Pinkerton sailed from Natal July 9th, for Umzila's coast, by the way of Delagoa Bay and Inhambane. A severe storm having prevented the steamer's stopping at Inhambane, he was taken to Zanzibar, 1,400 miles north. After much delay he started, and on the way commenced a letter to his wife, dated October 18th, which he finished at Bazaruto, 90 miles from Inhambane. In his letter he said: "Let us patiently hold on, and bear a brave but humble part in our peculiar work. My expedition to Umzila's has been very popular among the natives, as well as the Portuguese. The Lord is giving me a fine start. Different dialects are spoken, but Zulu is everywhere understood. I am preaching and teaching Christ in the uttermost parts of the earth now as never before. The natives here are even in denser darkness than those about Indundama. If no special hindrance occurs, we expect to reach the king's kraal in three weeks." But, alas! the hindrance did occur. His attendant Jourdan wrote from Inhambane, December 3d, saying that they had reached Bakot's kraal November 5th, when Mr. Pinkerton was taken ill of fever. He told Jourdan to take him out of the hut to the bush, saying, "If I die in this hut the natives will murder you." These were the last words he spoke. They put him in a hammock and started, crossing the Gabulu River in canoes, November 10th, and in half an hour after crossing, he died. He was buried by Jourdan the same day on the east bank of the river, under a large moss-covered tree. John Pohleni read the funeral service in Zulu. Only a week before his death everything was hopeful, and Mr. Pinkerton wrote at different dates on his journey in the most enthusiastic terms of the prospect of establishing a mission in Umzila's country.

**Pipli**, a town in Bengal, India, 27 miles from Cuttack, on the road taken by the pilgrims on their way to the Jagannath festival at Puri. Mission station of the General Baptist Missionary Society, visited from Cuttack; 1 native pastor, 1 chapel, 102 church-members, 52 day-scholars, 57 Sunday-scholars.

**Pirrie**, a town in Kaffraria, South Africa,

northwest of King William's Town. Mission station of the Free Church of Scotland; 1 missionary, 4 European teachers, 11 native helpers, 9 out-stations, 1 church, 280 communicants, 7 Anglo-vernacular schools, 340 scholars.

**Pithoragarh**, military outpost in Kumaon district, Northwest Provinces, India. Population, 438. Elevation, 5,334 feet. Mission station of the Methodist Episcopal Church (North); 1 medical missionary and wife, 1 assistant missionary, 28 native helpers, 16 schools, 578 scholars.

**Pogue, John Fawcett**, b. Wilmington, Delaware, U. S. A., December 29th, 1814; graduated at Marietta College 1840, Lane Theological Seminary 1843; sailed as a missionary of the A. B. C. F. M. for the Sandwich Islands December 4th the same year, reaching Honolulu July 10th, 1844. He was stationed 1845-48 at Koloa. There he came near losing his life from an extraordinary rise of waters in the night. Awakened by their rush past his dwelling, and attempting to reach the house of Dr. Smith near by, he was borne by the flood half a mile towards the sea, and when near perishing was thrown upon a heap of stones, where he remained till morning and the subsiding of the waters. He was associated with Mr. Alexander in the Lahaina Seminary, and succeeded him as principal, holding the position 1852-66. In 1870 he was elected secretary of the Hawaiian Board of Missions, and filled the office for seven years. Returning from a visit to the United States, he stopped at Laramie City, Wyoming Territory, on Saturday to avoid travelling on the Sabbath, was taken suddenly ill, and died at the hotel, December 4th, 1877. His labors, whether as pastor or teacher, were arduous. He was highly esteemed in the mission.

**Pohlman, William John**, born Albany, New York, U. S. A., 1812, of pious parents who belonged to the Lutheran Church; was converted at the age of 16, and united with the First Reformed Church at Albany. Devoting himself to the Christian ministry, he studied three years at the Albany Academy, graduated at Rutgers College 1834, and studied theology at the seminary in New Brunswick. While there he consecrated himself to the foreign missionary work. In August, 1836, he offered himself to the American Board, was ordained by the Classis of Albany, and with his wife, a sister of Dr. John Scudder, sailed for Borneo May 25th of the same year. After a brief sojourn at Singapore, he went to Batavia, where he was compelled to remain a year before the Dutch governor would permit him to go to Borneo. Meanwhile he studied the Malay language. Permitted to proceed, he settled at Pontianak, Borneo. Mrs. Pohlman died in 1845, a devoted, intelligent missionary. In 1844 he was transferred to China with Rev. Elihu Doty, to establish the Amoy Mission in connection with Dr. Abeel. Having studied the Chinese language in Borneo he was prepared to begin work at once in his new field. A church-building was erected with funds furnished from America, when there were but three communicants. Three other churches were established, native preachers and catechists raised up, and the mission has long been regarded as a model of evangelizing work in China. Mr. Pohlman's life was suddenly ended at Breaker's

Point by the wreck of the vessel on which he was bound from Hong Kong to Amoy, January 5th, 1849. Pirates attacked the sinking ship, but he sprang into the sea and was drowned. He is described as "amiable, buoyant, frank, tenacious to the last degree in prosecuting his good purposes, with practical common-sense and intense energy laboring for the kingdom of Christ."

**Point Pedro**, a town in Jaffna district, Ceylon. Mission station of L. M. S.; 2 missionaries, 148 communicants, 16 Sabbath-schools, 1,003 scholars, 16 day-schools, 1,214 scholars.

**Poklo**, a town in Kwangtung, Chiua, near the coast, east of Canton. Mission station of the L. M. S. (1860); 1 missionary, 5 out-stations, 6 native preachers, 119 church-members, 2 schools, 21 scholars.

**Polfontein**, a station of the Wesleyan Methodist Missionary Society in the Transvaal, Africa. Has 1 chapel, 37 church-members, 1 Sabbath-school, 30 scholars. The Hermannsburg Missionary Society have also a station.

**Poles**.—The Poles form the most numerous branch of the Western Slavs. They number about 10,000,000, distributed by the division of Poland among Russia, Prussia, and Austria. They are all Catholics, except 500,000 Protestants, and they use the Latin alphabet, modified so as to express the sounds peculiar to their language. Their language belongs to the western branch of Slavic languages, and is divided into four or five dialects, which, however, are not very different from each other. The Polish language has been influenced more than any other Slavic language by the Latin,—which in olden time was the literary and church language of Poland,—the German, and the French. Its distinctive characteristics are that it has retained the nasal expression or *rhinismus* of *a* and *o*, peculiar to the ancient Bulgarian or ancient Slovenic, but which has disappeared from common use now among the Slavs, and that it always accents the penultimate syllable of words. The Polish language bears quite a close resemblance to the language of the Bohemians and the Lusatian Serbs.

The history of the ancient settlements of the Poles is uncertain. Their history becomes more trustworthy with the introduction of Christianity among them, which took place in 965 or 966. It is deemed probable that orthodox Christianity was sown among them in the time of Sts. Cyril and Methodius, the Slavic apostles, long before this date; but it was soon supplanted by Latin Christianity, and so thoroughly extirpated that it has left no traces in their literature. Along with the introduction of Latin Christianity through German preachers, the Latin language acquired a firm footing in Poland, and was the language of the learned and higher classes, as well as of the courts. Luther's reformation penetrated into Poland, where it found zealous and ardent defenders and followers; but in spite of all the earnestness with which it was defended, it was overcome by the Catholic reaction. The political history of Poland is too long to be treated in details here. We can characterize it in a few words by saying that it was a history full of political vicissitudes, of glorious deeds, and of internal insta-

bility of government. The *szlachta* or nobility was the class that had the upper hand in the government of the country, while the common people had very little share in the government. The jealousies and the arrogance of the nobles was always a hindrance to the regular administration of the kingdom, and on more than one occasion the king's authority was set at naught. So the internal condition of Poland grew worse and worse, internal dissensions and strifes tended to weaken the government, and Poland fell a prey to her more powerful neighbors, who resolved upon her partition, and thus put an end to her independent political existence.

**Polish Version**.—The Polish belongs to the Slavonic branch of the Aryan family, and is spoken in Poland proper, and in parts of Prussia formerly belonging to Poland. The oldest manuscript extant of a translation into Polish is the "Psalter of Queen Margaret," preserved in the library of St. Florian at Linz, and edited by Count Borkowski, Vienna, 1834. A MS. of a Polish Bible from the second half of the 18th century is preserved in the college library at Saros-Patsk, Hungary, which was edited, at the expense of Prince George Lubor-nirski, by Prof. Anton Malecki in 1872, under the title "Bible of Queen Sophie." She was the daughter of Prince Andreas of Kiev, and fourth wife of King Ladislaus Jagello. The first complete Polish Bible was published in 1561 at Cracow (reprinted 1574-1577). As this edition did not answer all the requirements of the Church of Rome, the Jesuit Jacob Wujek, or Wuyk, prepared a new translation after the corrected Vulgate, and this edition was published at Cracow in 1593, 1617, 1647; Posen, 1594; Chelm, 1772; St. Petersburg, 1815; Moscow, 1819. Pope Clement VIII. highly praised his translation, and the National Synod held at Piotrkow in 1607 recommended it for use in all Roman Catholic churches. It was therefore often reprinted (Breslau, 1740, 1771, 1804; Warsaw, 1821; Lemberg, 1839-1840; Leipzig, 1846). The British and Foreign Bible Society also circulated Wuyk's version of the New Testament, besides a new edition of the New Testament in Roman character, published at Vienna in 1881, revised after the Greek.

Of the Protestant translations we mention the version of the Socinians, published at the expense of Prince Radziwill, Cracow, 1863. When hisson joined the Church of Rome he burned all the copies he could buy. A second translation, made for the Unitarians by Simon of Budug, from the original text, was published at Czaślau, Lithuania, in 1572. An edition for the adherents of the Reformed Lutheran churches was published at Dantzic in 1632 by Paul Paljurus, Daniel Mikolajewski, and Thomas Wengierski, and republished at Amsterdam, 1660; Halle, 1726; Königsberg, 1779; and Berlin, 1810. An edition of the Dantzic version, revised by Jakowski, was published by the Society for Promoting Christian Knowledge in 1853. The British and Foreign Bible Society also published the Dantzic version in Roman and Gothic types.

(Specimen verses. John 3:16.)

Albowiem tak Bóg umiłował świat, że Syna swego jednorodzonego dał, aby każdy, kto weń wierzy, nie zginął, ale miał żywot wieczny.

Hebrew character.

ווארין נאט האט דא וועלט אזוי גיליבט, דאש ער  
האט גיגעבן זיין אייגענע זיך, אז איינליכער  
דאש גלייבט אן איהם זאל נישט פֿרֿלירן ווערן,  
נישט ער זאל האבן דאש אייביג לעבן:

**Ponape**, the principal island of the Carolines, Micronesia, is high and fertile, with good harbors. Its population of 2,100 speak a language of their own. Mission work is under the A. B. C. F. M., whose missionaries take charge of the work on several adjacent small islands as well. The recent Spanish occupation of the island has proved hurtful to the work; but the natives look up to the missionaries as their best friends, and the Spanish officers have been friendly since the first arrest of one of the missionaries. In the district are 1 missionary and wife, 3 female missionaries, a training-school for teachers, a girls' boarding-school, 5 native pastors, and 18 churches.

**Ponape Version.**—The Ponape belongs to the Micronesian languages, and is spoken in Ponape, one of the Caroline Islands. Missionary work began in 1852 by Messrs. Sturges and Gulick, American missionaries. In 1859 the first eight chapters of Matthew, translated by Dr. L. H. Gulick, were printed on the island. In 1862 the Gospel of John, translated by Rev. A. A. Sturges, was printed; in 1866, Luke and the Acts; in 1870, Matthew and Mark. The complete New Testament, prepared by Messrs. Sturges and E. T. Doane, was published in 1887 by the American Bible Society in New York. Mr. Doane also translated parts of the Old Testament, of which Genesis was published in New York in 1875, Exodus in 1876, followed by Joshua, Judges, and Ruth. The books of Samuel and Kings were published in 1889.

(*Specimen verse.* John 3 : 16.)

Pue Kot me kupura jappa ie me a ki to ki Na  
ieroj eu, pue me pojón la i, en ter mie la, a en me  
maur jo tuk.

**Pongo Adongo**, a great trading-place in Loando, South Guinea, Africa, 89 miles from Dondo. Population, 1,500. Station of Bishop Taylor's Mission; 2 Europeans (1 married), house and chapel, and a farm of 300 acres.

**Poo**, a town in Little Tibet, Central Asia, where since 1865 the Moravian Brethren have had a station, waiting for the opening of Tibet proper. The station is 9,400 feet above sea-level, and is about as isolated a post as can be found. The missionary and wife who now live there pass years without seeing a European, and the nearest post-office is fourteen days' journey over Himalayan mountain paths. Work is carried on among the Lamas and Tibetans who are met on the border, and tracts and books have been translated into Tibetan.

**Poona**, the capital of a district of the same name in Bombay, India, is situated in a plain, on the Moota River, 80 miles southeast of Bombay. It was formerly the capital of the Marathi power. The seven quarters of the city are named after the days of the week. Its climate is very pleasant and salubrious, making it a favorite place of resort during the rainy

season. Population, 129,751, not including the garrison in the cantonment about two miles northeast of the city. Marathi, Gujarati, and Hindustani are the languages of the various races included in its mixed population.

Mission station of the Baptist Mission Society (1857); 2 missionaries (one married), 2 out-stations, 1 church, 10 members, 1 school, 30 scholars. Free Church of Scotland (1830); 1 missionary and wife, 2 female missionaries, 21 native helpers, 1 out-station, 1 church, 130 church-members, 8 schools, 284 scholars.

**Poor, Daniel**, b. Danvers, Mass., U. S. A., June 27th, 1789; graduated at Dartmouth College 1811; studied theology at Andover, and having been ordained, sailed as a missionary of the A. B. C. F. M. for Ceylon October 23d, 1815. He lived and labored at the station of Tilipally till 1823, when he took charge of the boys' seminary at Batticotta. While instructing his class in astronomy he had occasion to calculate an approaching eclipse, and when the native astronomers, who also had predicted it, but inaccurately, found that his calculations were more correct than theirs, they were profoundly impressed, and in consequence listened with more deference when he spoke to them of Christ. He remained at Batticotta till March 9th, 1836. Desiring to be engaged more fully in evangelistic work among the people, he then went to Madura, where a mission had been established two years before. Returning to Jaffna in 1841, he was stationed at Tilipally till 1848, when he sailed for the United States. His earnest addresses in behalf of missions were heard with great interest. Returning to Jaffna in 1851 he resided at Maneply till his death by cholera in 1855, aged 66, after thirty-nine years of mission service. He had no fear of death. His last words, pronounced in a whisper, were: "Joy! Joy! Hallelujah!" the word joy spoken in Tamil. Dr. Poor was a clear thinker, dignified and courteous in debate. His familiarity with the colloquial Tamil, his knowledge of Hindu works, his self-command and quickness of repartee, enabled him to meet the arguments and sophistries of learned disputants with effect. He received the degree of D.D. from Dartmouth College in 1835.

**Popo or Dahomey Version.**—The Popo is a dialect of the Ewe, belonging to the Negro group of African languages, and is used by the people of Dahomey, between the Volta and Lagos, as their vernacular. The Rev. J. Milum, who was on a visit to the Western Mission in South Africa, brought to England a version of the Gospels of Matthew and Mark, which the Rev. T. J. Marshall, a native minister of Porto Novo, had made, and the British and Foreign Bible Society published an edition in 1888, at London, under the title "O Wen-Dagbe le St. Matiu Po St. Mâki Po Ton Lo Ogunû Gbe-Me." In addition to these Gospels the Popo Translation Committee at Lagos have completed the translation of the Book of Psalms, the Gospels of Luke and John, and the Acts, which were also issued by the British and Foreign Bible Society in 1888.

**Port-au-Prince**, capital of Haiti, West Indies, on the west coast, at the head of the Bay of Gonaives. The town is on rising ground, with wide though ill-paved and very filthy streets, and dilapidated houses. The sur-

rounding country is marshy. Though the Bay of Gonaïves is large and beautiful, the roadstead of Port-au-Prince is small and shallow. Climate hot, unhealthy for foreigners; average, 81° F. Population, 21,000. Mission station of the African Methodist Episcopal Church; 1 missionary.

**Protestant Episcopal Church, U. S. A.** This mission was started independently in 1862 by a colored preacher from America, who devoted himself entirely to the utterly degraded negroes in Port-au-Prince and its vicinity. In 1874 he was consecrated Bishop of Haiti, and has now charge of 18 congregations with 14 pastors. In the capital are 102 communicants and 50 scholars.

**Port Lokkoh**, a town in Sierra Leone, west coast Africa, 60 miles east of Sierra Leone town. Climate tropical. Race and language, Timne. Religions, Fetichism, Mohammedanism. Social condition very low; domestic slavery prevalent. Mission station C. M. S. (1876). For statistics see Sierra Leone.

**Port Louis**, the capital of Mauritius Island, on the northwest coast, at the head of a bay, is open on one side to the sea, and enclosed on the other three by picturesque mountains. Of late years its prosperity has declined, fevers having become so prevalent that many have deserted it for other villages. Population 40,000. Mission station of the C. M. S.; 1 native missionary, 2 native helpers.

**Port Moresby**, a town on the west coast of the southeastern extremity of New Guinea, northwest of Kerepunu. Mission station of the L. M. S. (1871); 4 missionaries, 14 native preachers, 314 church-members, 13 schools, 927 scholars.

**Port of Spain**, the capital of Trinidad, West Indies, is one of the handsomest towns of the West Indies, with a good harbor and an active trade. Temperature, 70°-93° Fahrenheit. Population, 31,900, English, English and French creoles, Indian coolies, Chinese, and Spanish. Each race speaks its own language. Religions, Protestant, Roman Catholic, Hindu, Moslem. Social condition, though far from good, is better than in most of the West Indies. Government, British crown colony. Mission station of the Baptist Missionary Society (1843); 1 missionary and wife, 1 native helper, 15 out-stations, 3 churches, 750 church-members. United Presbyterian Church of Scotland; 1 missionary, 175 church-members, 285 Sabbath-scholars.

**Porto Novo**, a town in Dahomey, West Africa, under French authority. Mission station of the Wesleyan Methodist Missionary Society; 2 missionaries, 162 church-members, 275 Sabbath-scholars, 211 day-scholars.

**Porto Rico**, an island of the West Indies, lies east of Haiti. It is a Spanish colonial possession, containing an area of 3,550 square miles, and a population of 784,709, of whom over 300,000 are Negroes or of Negro blood. It is described as "the healthiest of all the Antilles." Slavery was abolished by the National Assembly on March 23d, 1873. The principal towns with their population are: San Juan, 23,414; Ponce, 37,545; San Germain, 30,146.

**Portuguese Version.**—The Portuguese

belongs to the Græco-Latin branch of the Aryan family of languages, and is spoken in Portugal and South America. Of Portuguese versions only two have become especially known. A Catholic version, with annotations by Anton Ferrara de Figueiredo, was published in Lisbon 1778-1790, in 23 volumes. The third edition, in 7 volumes, and greatly improved, was published 1804-1819. A Protestant version is the translation of John Ferreira d'Almeida. The New Testament was published at Batavia in 1693, Amsterdam 1712, Tranquebar 1765; the Old Testament between 1719 and 1732, also at Tranquebar. A version based on Almeida's translation was made by the Rev. Thomas Boys, and published at the expense of the Trinitarian Bible Society, London, 1843-47. Almeida's version was often republished by the British and Foreign Bible Society, but because the style and language are so stiff and antiquated that it repels readers instead of attracting them, this edition was not so favorably received as was anticipated. From time to time this Society issued revised editions, especially of the New Testament, in a modernized style and idiom, which appeared to give great satisfaction. In 1874 the same Society issued at Lisbon a thoroughly revised edition of Almeida's version. Another edition followed in 1877. The same Society, which since 1819 published Figueiredo's Bible, published in 1878 an edition with alternative readings from the Hebrew and Greek, under the care of the Rev. Robert Stewart. Besides the British Society, the American Bible Society published, in 1859, an edition of the New Testament after a version made in London from the Greek. In spite of the many revisions, the need of a better and more accurate translation of the Bible in the Portuguese language is generally recognized by the Protestant missionaries and laborers in Portugal and Brazil, and the American and British Bible Societies have taken steps for the formation of translation committees in Spain and Brazil, for the production of a new version of the Scriptures, which will be acceptable on both sides of the Atlantic. The committee, representing the Episcopalian, Presbyterian, Baptist, and Wesleyan churches, have prepared, under the presidency of Rev. R. Stewart, the Gospel of Matthew, which was published in 1886, and that of Mark in 1887. As an interesting item we remark that the editor of a newspaper has asked and obtained leave to publish the new version in his paper.

(*Specimen verse.* John 3: 16.)

Porque de tal maneira amou Deos ao mundo, que deo a seu Filho unigenito; para que todo aquelle que nelle crê, não pereça, mas tenha a vida eterna.

**Potscheffstroom**, a town in Southwest Transvaal, South Africa, southwest of Pretoria. Mission station of the Berlin Evangelical Missionary Society (1872); 1 missionary, 8 native workers, 2 out-stations, 4 other preaching places, 364 members, 156 communicants.

**Powers, Philander O.**, b. Phillipston, Mass., U. S. A., August 19th, 1805; graduated at Amherst College 1830, and Andover Theological Seminary 1834; sailed November 10th the same year as missionary of the A. B. C. F. M.

arriving at Smyrna, January 12th, 1835; released from the service of the Board 1862; re-appointed in 1864, and again in 1866. He was stationed at Broosa, Trebizond, Sivas, Antioch, Kessab, Oorfa, and Marsh. Dr. Schneider remarks: "A distinguished trait of his character was his sound judgment, by which he was successful in reconciling two parties at variance in the church and congregation for a long time. His self-sacrificing spirit appeared in his readiness to leave one missionary field for another, never allowing the comforts of home to interfere with or keep him from his work at a distance. On account of the illness of his wife he was obliged to return home, and was happily settled as a pastor in East Windsor, Conn., when the proposal was made to him to return to Antioch. Though he and his people were mutually attached, he accepted the call, and returned to the East alone, his wife having previously died. He had a fine taste for music. This talent, together with his skill in versification, made him an excellent hymnologist. Many of the best hymns in the Armeno-Turkish are from his pen. He had been requested by the mission to revise, and by the addition of new hymns to enlarge, the present Armeno-Turkish Hymn-book." Dr. Nutting says: "During all his sickness he manifested unwavering faith and cheerful hope." He died October 2d, 1872, at Kessab, an out-station of Antioch, in the house he had built, and the funeral services were held in the large and pleasant chapel, the erection of which he had superintended. His remains rest at the foot of Mount Cassius.

**Prague**, a city in Bohemia, Austro-Hungary, on the Moldau River, 155 miles northwest of Vienna. Climate temperate. Population, 300,000. Race, Slavic. Languages, Bohemian, German. Religion, Roman Catholic; 2 per cent Protestant. Social condition corrupt, very poor. Mission station Free Church of Scotland Jewish Mission (1864); 1 missionary and wife, 2 native workers, 30 church-members.

**Pratt, Andrew T.**, b. Black Rock, near Buffalo, N. Y., U. S. A., February 22d, 1826; graduated at Yale College 1847; studied one year at Union Theological Seminary, New York, and two in New Haven; pursued medical studies at the New York College of Physicians and Surgeons; ordained August 6th, 1852; sailed December 22d the same year as a missionary of the A. B. C. F. M. for his mission field in Turkey. His first station was Aintab, but he removed to Aleppo in 1856, and to Marsh in 1859. In 1838 he was transferred to the Western Turkey Mission, and removed to Constantinople, there to be connected with the literary department for the three American missions, and engaged especially with Dr. Riggs in the work of translating and revising the Scriptures, in the hope of "securing a correct and uniform translation of the Word of life in three of the languages of the Turkish Empire." He died December 5th, 1872. Dr. Schneider says: "He had not only an aptness in general for acquiring languages, but a special love for the Turkish. Often have I heard him expatiate on its beauties and power. His mind seemed to delight in its peculiar idioms and forms; his utterance in it was marked by a very pleasing flow of words. It is not surprising, therefore, that he became one of the best Turk-

ish scholars in the field. His grammar of the Turkish, partly a translation of a work by two Turkish gentlemen and partly his own, is proof of this. The mission committed to him the revision of the Armeno-Turkish Bible, and on this work he was engaged when death ended his career. He possessed a very active mind, and ranked high as a scholar, with extensive general information. His judgment was remarkably sound. He was fond of music, and had a poetic taste. He was therefore an excellent hymnologist, and wrote some original hymns, and translated more from the English. Many of the best hymns in the Armeno-Turkish are from his pen, and when a hymn was wanted for a special occasion he was expected to furnish it. He was a good physician, and trained several native Armenians as physicians, who are now usefully employed in the medical profession."

**Presbyterian Church in Canada**, Home and Foreign Missions of. Headquarters, Toronto, Canada.—In June, 1875, the four existing Presbyterian churches of Canada, of which two were in the Maritime Provinces and two in the Western Provinces, met in Montreal, to consider the question of union, solemnly declared their belief that it would be for the glory of God and the advancement of the cause of Christ that they should unite, and then and there constituted the first "General Assembly of the Presbyterian Church in Canada," which pledged itself to take up and prosecute the Home and Foreign Missionary operations of the several Churches. Since the union the church has greatly prospered: the communicants have increased from 90,000 to 171,987; the annual contributions for Home Missions from \$27,339 to \$99,987; for Foreign Missions from \$25,272 to \$103,915; and for all church purposes from \$982,671 to \$2,054,951.

**Foreign Missions.**—The Foreign Missions of the Presbyterian Church in Canada are six in number, and are very widely separated from each other. This is less the result of design than of a necessity laid upon the church at the time of the union in 1875, when it was expressly stipulated that all the missions to the heathen then in existence in the several churches were to be continued by the united church. So intense was the interest that had been created in missions consecrated by the prayers and contributions, aye, and the lives of members of these churches, that to abandon any one of them would have been considered paying too dearly for the union. This accounts for a mission in the South Seas, one in the West Indies, one in India, two in China, and one to the Indians in the Northwest Territories of Canada. The staff of missionaries consists at present of thirty-five ordained ministers, of whom five are native converts to Christianity. These missionaries are assisted by twenty-five Canadian ladies variously employed as matrons of industrial schools, teachers, zenana visitors, etc. Three of the ladies are duly qualified doctors of medicine. The number of native assistants is about two hundred and fifty.

**NEW HEBRIDES MISSION.**—For full account of this mission, as carried on conjointly by this Board and other Presbyterian Boards, see article New Hebrides.

**TRINIDAD MISSION.**—This mission to the coolies of Trinidad originated with the Rev. John Morton, D.D., in 1869. He was also a

minister of the Presbyterian Church of Nova Scotia, who, having visited Trinidad for the benefit of his health, noticed the deplorable condition of the imported laboring people, and on his return home offered his services to go and establish a mission for their benefit. In 1871 he was joined by the Rev. Kenneth J. Grant, who is now at San Fernando, a considerable town on the island, and from time to time the mission has been reinforced by other Canadians. There are now five Canadian ordained missionaries, two native pastors, five native catechists, and three Canadian lady teachers. The number of coolies in Trinidad is about 60,000. They are chiefly Hindus, brought from India under contract to labor on the sugar estates, with the option of returning to their native country at the expiration of a specified term of service. Many of them do return, but, as many more are coming still, their numbers have been increasing rapidly for some time past. The work carried on in their behalf is largely educational. The number of schools in operation last year was thirty-eight, having on the rolls 2,060 scholars, with an average daily attendance of 1,433. Thirty-five couples were married, 110 adults and 101 children were baptized, and there are 412 communicants in good standing.

**CENTRAL INDIA.**—Previous to the union of 1875 two of the Canadian churches had broken ground in India, by sending thither female missionaries who were attached in some form to a mission of the Presbyterian Church of the United States. In 1875 Rev. James Fraser Campbell of Nova Scotia was sent to Madras. About the same time, the Rev. James Douglas of Ontario was sent to Indore, Central India, situated about four hundred miles west by north from Bombay.

The city of Indore, having a population of some 70,000 inhabitants, was selected as the headquarters of the Canadian mission. Rev. John Wilkie was sent out in 1879. Other appointments followed, and now there are seven ordained ministers and ten Canadian ladies on the staff—three of the ladies being doctors of medicine. There are also about seventy native assistants employed in the work of the mission. The time for making an exhibit of results is not yet, for until within the last two or three years there has been one continuous struggle with the local authorities for the right even of existence, or to acquire any property for the purposes of a Christian mission. This having been at length conceded, the work has begun to assume an aspect at least of hopefulness. The Word is now preached without let or hindrance in many of the towns and villages. Day-schools and Sunday-schools have been established at a number of points, with a fair attendance of scholars. Medical dispensaries have been opened and a vast deal of suffering has been relieved through them: 17,979 patients were treated last year by the two doctors—Misses Beatty and Oliver. Now that the way is clear, the importance of providing higher education for the youth of the middle and upper classes is becoming every year more apparent. In view of this, a high-school and college, in affiliation with the University of Calcutta, have been opened at Indore with encouraging prospects of success,—the more that the field of higher education seems to be almost entirely unoccupied in that part of India, and that many of the more intelligent people appear to be willing to avail

themselves of the advantages the mission is prepared to offer them in this direction. During his recent furlough Mr. Wilkie received from friends in Canada the sum of twelve thousand dollars towards the erection of suitable college buildings, in the expectation that the people of Indore and neighborhood would contribute a like sum. He also received donations of a very considerable number of valuable books as the nucleus of a college library.

The expenditure on account of this mission last year by the Canadian Board was \$22,681.69. The Mission Council of Indore in its last report to the General Assembly records its "thankfulness for the past and hope for the future," and renews its pleading that the staff of missionaries may speedily be doubled.

**FORMOSA, CHINA.**—The mission in Northern Formosa has been one of the church's most successful enterprises. It was commenced in 1872 by Rev. George Leslie Mackay, a native of Oxford County, Ontario. In 1875 he was joined by Rev. J. B. Fraser, M.D., subsequently by Rev. Kenneth F. Junor, now of New York. At present the Rev. John Jamieson of Ontario is associated with Dr. Mackay. Dr. Mackay married a Chinese lady, who has been very helpful to him in gaining the attention of the women, and in superintending the girls' school. His opinion from the first was that the work of evangelizing the Chinese must be done through a native agency. So soon, therefore, as he had acquired a sufficient knowledge of the language himself he sought out young men with a view of training them to become teachers and preachers. He was fortunate in his first convert,—now the Rev. Giam Chheng Hoa,—through whose instrumentality a number of young men were brought under Dr. Mackay's influence. These were formed into a class, or band, rather, and were thoroughly drilled in a course of study which included the elements of theology, astronomy, geology, botany, geography, history, physiology, anatomy, medical practice, surgery, etc. Dr. Mackay having, meanwhile, adopted the itinerant method of preaching, he took his class with him wherever he went, and availed himself of such opportunities as he could for continuing his instructions.

In this way the students had the further advantage of observing Dr. Mackay's methods of working among the people, and had the opportunity afforded them from time to time of taking part in evangelistic services as they were qualified to do so. When a certain point had been reached in the student's curriculum he had a given district assigned to him, and he went to work as a local preacher; a chapel, with house accommodation for the preacher, and sometimes a prophet's chamber besides, was erected, and by and by a regular congregation was organized, with elders and deacons. In this way the work has spread over the whole of Northern Formosa, where Dr. Mackay has now the superintendence of 50 churches and congregations, 51 native preachers (including two native ordained pastors), a well-equipped college with 24 students, two large hospitals, and a girls' school. The number of baptized members—including adults and children—is 2,833, of whom 146 were baptized last year. There are 83 elders and 71 deacons. It is hoped that in the near future the mission will become an independent self-supporting church. Last year the people contributed \$1,143.85 for church

purposes. The draft upon the Canadian Committee was only \$13,967.94. The amount of work done, in so short a time, and chiefly through the marvellous energy and zeal of one man, surely justifies the exclamation, "What hath God wrought!"

HONAN, CHINA. (See China, Protestant Missions.)—This mission was begun so recently as 1888, by the appointment of the Rev. Jonathan Goforth and Rev. Donald Macgillivray, graduates of Knox College, Toronto, the Rev. James Smith, M.D., of Queen's College, Kingston, and Mr. William McClure, M.D., who was ordained as an elder and designated as a medical missionary to this field. The year following three students of the Presbyterian College, Montreal, were ordained and set apart as missionaries to Honan, viz., Messrs. Murdoch Mackenzie, John Macdougall, and John H. MacVicar, a son of the principal of the college. The General Assembly of 1889 authorized the formation of a Presbytery in Honan, which was accordingly constituted on the 5th of December in that year. This is, perhaps, the first instance of a Presbytery being formed before its constituent members had even reached the field of their prospective labors. This unique Presbytery held its first meeting, not in Honan, but in the adjoining province of Shantung, and then and there fixed upon desirable points in Honan at which to commence missionary operations.

Honan is one of the inland provinces of China (q.v.). It has been visited by agents of the China Inland Mission, but this Canadian enterprise is probably the first attempt to obtain a permanent lodgment for missionary purposes; and as the movement has already met with undisguised opposition on the part of the local authorities, the issue is regarded with no small degree of interest. While the common people have gladly submitted themselves to the healing art of the medical missionaries in their tours of exploration, and have even thereby been led to listen to the preaching of the gospel, the upper classes have intimated their wish that the missionaries should leave the country as quickly as possible. The missionaries, however, have gone there to stay, and will not be easily moved from their determination. As yet their efforts have been chiefly to obtain a requisite knowledge of the language, and in this they have all been reasonably successful.

Two circumstances connected with this incipient mission are worthy of a passing notice: (1) Much has been said during the last few years about the number of theological students in different countries who have intimated their willingness to engage in foreign-mission work, but here is an instance of a well-equipped mission, composed entirely of young men fresh from college, planted in a new and very difficult field, far away from their base of supplies, and almost entirely cut off from intercourse with other missionaries from whose experience in similar fields they might have hoped to derive advantage. (2) Another singular feature of the mission is that while these seven missionaries are the recognized agents of the General Assembly and are to carry on their work under the authority and supervision of its foreign-mission committee, their salaries are all provided for in a manner that indicates a new departure in missionary finance. Three of the seven have a guarantee for their support from

single congregations, with the understanding that these congregations shall continue their usual contributions to the general missionary fund of the church. Two are supported by the students comprising the missionary societies of Knox College, Toronto, and Queen's College, Kingston. The remaining two are each supported by private individuals. A statement like that would, in Canada at least, have been considered incredible a few years ago; and it goes without saying that when a like recognition of stewardship shall pervade the whole Christian Church one of the chief hindrances to the speedy evangelization of the world will have been removed. The disbursements on account of the Honan Mission for the year 1889-90 were \$13,534.79.

NORTH AMERICAN INDIANS.—This mission to heathen tribes in our own country was begun in 1866 by the late Rev. James Nesbit and has been carried on ever since with a fair measure of success. It has, of course, claims on our practical sympathies such as no other mission to the heathen can have. We have taken possession of the Red man's hunting-ground. By exterminating the buffalo we have deprived him of a chief source of his subsistence. We have restricted the former occupant of the boundless prairie to a few paltry acres of "reserves;" and, worst of all, we have exposed the whole race to contamination, if not to utter extinction, from the vices of civilization. The State receives the Indian into citizenship, makes him such compensation as the nature of the case admits of, protects his person and property, makes him a few presents, say of blankets, bacon, or seed-corn, and votes a few dollars annually for the education of his children. The church recognizes, to some small extent at least, her duty to the poor Indian by offering him Christianity as a substitute for his pagan rites, and teaching him how to provide food and clothes for his children. "Here again," our missionaries tell us, "it is in the school, and especially in the industrial school, that the great work of the church for the elevation of the Indian must be done." Accordingly their efforts have of late been largely directed to the extension of the industrial boarding-school system. By this means the children are withdrawn for lengthened periods from the degrading surroundings of their pagan homes, and brought into close and continuous contact with Christian civilization. They are taught the elementary branches of an English education; the boys are trained to agricultural and mechanical pursuits, and the girls to housekeeping and all the domestic accomplishments implied in that term.

The total Indian population of Canada is about 121,000, of whom about 3,500 are connected with the Presbyterian Mission at eleven different stations. There are seven ordained missionaries, who carry on the work on nineteen reserves. They are assisted by nine teachers, besides other helpers whose services are very valuable as matrons, interpreters, and assistant teachers. There are 187 Indian communicants, of whom 24 were added during the past year and 68 infants and 31 adults were baptized. In the six or seven industrial schools there are enrolled 222 pupils, with an average attendance of 154. The expenditure on account of the mission for the past year was \$15,544.87.

The total expenditure for the six missions above-named during the year ending 1st May,

1890, was \$103,915.83. The expenses of management only amounted to about \$2,000—the onerous duties of the chairman and secretary of the Foreign Mission Committee having hitherto been performed gratuitously. The time has now come, however, when it is necessary to appoint a convener of the Foreign Mission Committee, whose whole time and services shall be given to this department of the church's work.

Important aid has been rendered in the providing of means for carrying on the Foreign Mission work by the Women's Missionary Societies. The amount collected by the ladies last year reached \$36,568.59, the greater part of which was handed over to the General Assembly's Committee. "The women who publish the tidings are a great host," nearly 20,000 being enrolled in their auxiliaries and Mission Bands.

**Home Missions.**—It may seem enough to say that the home missions of this church are co-extensive with the Dominion; but the vast extent of the field will be better understood by stating that the Presbytery of Newfoundland embraces a larger area than Ireland; the Synod of the Maritime Provinces is larger than Great Britain; the province of Quebec is nearly as large as France; Ontario is nearly as large as Spain; Manitoba, small as it is in comparison with its sister provinces, is yet much larger than Holland; British Columbia is much larger than Austria; while the great "Fertile Belt" east of the Rocky Mountains—known as yet only as the "Northwest Territories"—is said to be capable of maintaining a population as large as Russia in Europe. The Presbyterian Church has followed the immigrant and the settler into the remotest parts of the Dominion. Her missionaries are to be found amid the fogs and storms of Newfoundland and Cape Breton, on the barren and inhospitable shores of Labrador, in the backwoods settlements of New Brunswick, Quebec, and Ontario, in the mining regions and lonely ranches of the Northwest, at the gold diggings of British Columbia, and amid the wilds of Vancouver Island. The machinery for overtaking this great work is necessarily somewhat complicated. For home missions proper there are two Central Boards of Management—east and west. Each of these has a sub-committee for supplementing the salaries of ministers in the weak and struggling congregations—the aim of the church being that none of its ministers should receive a smaller stipend than \$750 a year, with a manse.

The number of mission fields—i.e., groups of stations—in the 32 western Presbyteries is 276, and of preaching places 820. In the eastern section there are 45 fields and 170 preaching stations, making in all 321 distinct fields and 990 preaching stations. The total number of missionaries employed last year, for longer or shorter periods, was 329, of whom 121 were ordained ministers and licentiates; 208 were students and catechists. The number of families connected with these missions was 11,701, and of communicants, 13,997. The direct receipts by the Boards of Management were \$66,475.60; adding, however, the amounts received for the augmentation of stipends above referred to, say \$33,571.82, the whole amount is \$99,987.42. This does not include sums expended by individual churches on town and city missions, nor the amounts contributed by the people belonging to the

mission stations. For some years past by far the largest expenditure has been in Manitoba and the Northwest, where, owing to the opening up of the country by railways, the increase of population has been greatest. When the Presbytery of Manitoba was formed, nineteen years ago, the city of Winnipeg had only 421 inhabitants; now it has 25,000. The province of Manitoba had then 19,000 inhabitants; now it has 150,000. There are now six Presbyteries within the bounds of the original one. Vancouver, in British Columbia, had no existence five years ago; now it is a flourishing city of 18,000 inhabitants.

**FRENCH EVANGELIZATION.**—This branch of the work of the Church has for its specific object the spread of the gospel among the French-speaking Roman Catholics of Canada.

The Board of Management expended last year \$53,000 on the various departments of its work—preaching, colportage, and education. The number of missionaries employed by it at the present time is 63, of whom 30 are able to preach in both French and English. Sixteen colporteurs were employed last year in selling and distributing Christian literature in the French language. It is estimated that upwards of 150,000 French copies of the Scriptures have been distributed during the past fifty years; during the past year 2,796 copies, and 23,800 French tracts and pamphlets were put into the hands of the people, notwithstanding the precautions of the priests in forbidding them to purchase or to accept gratuitously a copy of God's Word. There are 36 mission schools under the Board, with 1,020 pupils, of whom 423 are from Roman Catholic homes. There are in connection with the French Mission 26 churches, 92 stations, 1,337 communicants, 1,067 families, and 1,187 scholars in the Sabbath-schools and Bible-classes. The estimate of the current year calls for \$70,000,—about forty per cent more than last year, indicating that the work is yearly assuming larger proportions.

Before passing from the Home Mission work of the church, it should be stated that there are six theological colleges, situated as follows: (1) The Presbyterian College, Halifax, N. S.; (2) Morrin College, Quebec; (3) The Presbyterian College, Montreal; (4) Queen's University and College, Kingston, Ont.; (5) Knox College, Toronto; (6) Manitoba College, Winnipeg. There are in all 19 theological professors, besides lecturers and teachers in the preparatory departments. The number of students last year having the ministry in view was 321, of whom 44 completed their theological curriculum. About two thirds of the students are usually employed during the summer months in the Home Mission fields of the church, where their services have been extremely valuable. In earlier years the churches in Canada were mainly dependent on the mother-country for the supply of ministers. But that is all changed now. Not only is Canada furnishing her own ministers of all denominations, but many trained in Canadian institutions are to be found in different parts of the world. The Presbyterian theological colleges are all aiming at permanent endowments for their support, but in the meantime the General Assembly authorizes an annual collection in all the congregations towards defraying the ordinary expenses of these institutions.

**Presbyterian Church of England, Foreign Missions.** Headquarters, 14 Paternoster Square, London.—The Presbyterian Church of England was virtually founded in 1570, when Cartwright opposed episcopal intolerance, and it promised during the period preceding the civil war to color the religious life of England, where it was the legal form of doctrine in 1641. After the time of Cromwell it gradually became the mere representative of the divided Presbyterian Church in Scotland, till 1776, when the congregations (in England) of the Free and United Presbyterian Churches united and formed the Presbyterian Church of England.

**Development of Work.**—CHINA.—The Rev. Wm. C. Burns was sent out as the first missionary, and Dr. James Young was his medical colleague in Amoy.

For the first four years after Mr. Burns's arrival in China he worked at Hong Kong, Canton, and the neighborhood, but in 1851 he visited Amoy on business, and was so much impressed with the needs of this city and the opening it gave for missionary work, that he transferred his work there, and made it the first centre of the organized work of the Presbyterian Church of England. As the work grew, the Society sent out in 1853 the Rev. James Johnson to join Mr. Burns; but in 1855 he was obliged to return home, and his place was filled by the Rev. Carstairs Douglas, who with Rev. David Sandeman was sent out by the Scottish branch of the mission (which contributes a fifth of the Society's income), and who at the time of Mr. Johnson's return was already on his way to China. These two men did efficient work both as evangelists and scholars before death stopped their labors. Dr. Douglas, it is said, was "a great power in China, remarkable for his evangelistic zeal and for his high literary attainments. To him is mainly due the organizing of the mission work in its several departments—Evangelistic, Medical, and Educational." His plan was to have a fixed centre from which steady and persevering efforts should be made for the redemption of the surrounding country. His plan has proved a good one, and the great aim of this mission, to build up a self-supporting native church, has been steadily kept in view.

The spheres of labor are: (1) The Evangelistic and Pastoral, carried out on the usual methods. (2) Medical, begun 1860; the medical missionaries also taking part in evangelistic work. (3) Educational, begun 1855, consisting of schools and colleges for the instruction of the children and training native youths for preachers and teachers. (4) Voluntary work by natives, which is of much value and of various sorts. (5) Woman's Work, begun 1879, chiefly carried on by the Woman's Association in connection with the Presbyterian Church of England, which aims to elevate and to help the women by means of schools and visiting in their homes.

This plan of work has also succeeded in India. In China proper this mission has three fields,—Amoy, Swatow, and the Hakka country,—in all of which a great and ever-increasing work is being done.

Also, the Society has extensive work in Formosa, begun in 1865, with its headquarters at Tai-wan-fu, the capital of the island. The conditions under which the missionaries entered Formosa were, and still are, peculiar and try-

ing. The Chinese colonists are driving back and overrunning the aboriginal inhabitants, and the struggle between these races makes the work more difficult. Still, however, the work is growing, and a hospital opened a few years ago extends its healing influence over a wide area. In Singapore, in the Straits Settlements, a station has been opened and has grown wonderfully, and five branch stations are now in full working order, where four Chinese workers are regularly employed.

INDIA.—A mission to India was begun in 1878, when the Rev. D. Morrison, D.D., settled at Rampore-Bauleah, Bengal. He is still at the head of this work, and reports that last year was a year of progress and increased hopefulness at his station. There are several schools and dispensaries connected with the mission, and a new hospital is being opened which will greatly increase the influence of the missionaries among the natives. For the Jewish Mission of the Presbyterian Church of England see article "Jews."

**Presbyterian Church of Ireland, Foreign Missions.** Headquarters, 12 May Street, Belfast, Ireland.—In 1840 the "Synod of Ulster" and the "Secession Synod" became united under the name of the "General Assembly of the Presbyterian Church in Ireland." The society thus formed immediately resolved to begin missionary operations, and led by Dr. Duff's eloquence and by a missionary survey which Dr. John Wilson of Bombay (both of the Free Church of Scotland) had made of the feudatory states of Kathiawar, they chose India for their first field and sent out as their first missionaries the Revs. A. Kerr and J. Glasgow. These men had not offered themselves for the service, but had been chosen and called upon by the Assembly's Committee to undertake it. As this mode of obtaining missionaries was deemed by them preferable to the ordinary practice of receiving voluntary offers of service, they recorded it, "that it may serve to be a precedent in all time to come."

The missionaries proceeded to Kathiawar in Gujarat, and located in Rajkot, one of the principal towns. Mr. Kerr was attacked by a fever, and survived his arrival by only a few weeks. This was a severe blow to the mission, but before long four other missionaries—the Revs. A. Glasgow, J. McKee, R. Montgomery, and J. H. Spears—were sent to strengthen the mission, and on their arrival two new stations were opened—one at Purbundet on the west coast, the other at Gogo to the eastward. These, in addition to Surat, which was transferred to them by the L. M. S., who had carried on work there for several years, gave them quite a large field for work. In Kathiawar, especially at Purbundet, from the Mohammedans, the missionaries met with opposition unusual even for India; but by patient effort they began to gain a considerable influence over the people, and many applied for and received baptism. The most prominent and influential convert has been a Mohammedan "munshi," who had the reputation of being the most learned man in the district, and his baptism made a deep impression. At present the mission has stations at Rajkot (occupied 1841), Gogo (1844), Surat (1846), Borsad (1860), Ahmadabad (1861), Anand (1877), Broach (1887), where work is carried on by 8 missionaries, 8 zenana agents, and

166 native agents. Total number of communicants, 315.

The work of this mission at these different stations is of the most varied kind. There are regular Sabbath and week-day services for the instruction of the native Christians. There are large numbers of day-schools and orphanages in which instruction is given in both the vernacular and English, and the Word of God is carefully taught. Each station is the centre for extensive evangelistic work, the missionaries and evangelists touring in all directions. Native congregations have been formed, several of which are now prepared to call their own pastors, and to a large extent to support them. The mission press in Surat is circulating through colporteurs a large amount of Christian literature. The Gujarati version of the Scriptures is being carefully revised and reprinted, and the Gospels, neatly bound, are being sold at a price so low that no one, however poor, need be without them. In connection with the zenana missions dispensaries are open daily in Surat and Ahmadabad, and many women while receiving medical aid are also being taught the Bible truth. The natives are being taught to contribute largely, and do much towards the support of a native ministry. Last year their contributions amounted to about \$453.

**CHINA.**—The work of the Irish Presbyterian Church in China was begun in 1879 in the province of Manchuria, North China. Their earliest station is Newchwang, a seaport town near the mouth of the Liao River; but in common with the agents of other societies, the Irish Presbyterian missionaries found that a Chinese seaport is a most unfavorable centre for operations. Still the station was held, and from Newchwang as a centre itinerating journeys were made and still are made over all the province to the far north, and the missionaries are making plans for occupying several large towns in the interior. The present mission staff consists of three ordained missionaries and one medical missionary and their wives, who are located at the three stations: Newchwang, Jin-jow, and Kirin.

**Jewish Missions.**—The Assembly has Jewish missions in Syria and in Germany; Colonial missions in Canada, Australia, and New Zealand; and Continental work in Spain, Belgium, France, Switzerland, Bohemia, and Italy, which have been treated of under their respective heads: Jewish Missions; Colonial and Continental Missions.

### **Presbyterian Church of Scotland.**

**1. Established Church: Committee for the Propagation of the Gospel in Foreign Parts, especially in India.** Headquarters, 22 Queen Street, Edinburgh.

**2. Free Church: Committee on Foreign Missions.** Headquarters, 15 North Bank Street, Edinburgh.

*History, antecedent to the separation of the Free Churches from the Established Church.*—The foreign missionary enterprise of the Church of Scotland dates farther back than is generally supposed. In 1699, shortly after the founding of the Scotch colony in Darien, the General Assembly sent out four missionaries to the isthmus to supply the vacant places of the two ministers who had accompanied the colonists but had died, one on the way out, the other shortly after his arrival.

In 1709 the Society for Promoting Christian Knowledge was incorporated, and in the years between 1741 and 1748 sent five missionaries to the American Indians. Between the years 1744 and 1814 several grand old preachers were preparing Scotland to become a missionary country. In 1818 Dr. Inglis caught the inspiration and began to urge the necessity of the Church of Scotland sending missionaries to the heathen; and in 1823 Dr. Bryce, a chaplain of the East India Company, sent home a memorial from Calcutta urging entrance on the work. In 1825 Dr. Inglis, then its convener, induced the General Assembly to appoint its first foreign mission committee, consisting of ten able men belonging to no one particular party in the church. At the first call for a collection the response was not enthusiastic, but when in 1829 Alexander Duff embarked for Calcutta as head-master of an educational institution which Dr. Inglis had proposed and the Society decided to attempt, the interest in missions increased. With the help of other missionaries, among them Dr. W. S. Mackay, Dr. D. Ewart, Rev. J. Macdonald, and Dr. Th. Smith, Dr. Duff during his service of thirteen years shaped the educational future of India. His aim was to raise up a body of well-disciplined Christian teachers, and of well-qualified native ministers; and to accomplish this end the missionaries resolved that educational seminaries of the highest character and on the most approved basis should be opened in the great centres of civilization. The institution at Calcutta, commenced by Dr. Duff in 1830 and carried on with the enthusiasm which he had himself and imparted to his colleagues, attained a pre-eminent degree of excellence and commanded general admiration. The whole course of education, even the literary and scientific parts of it, was brought to have a bearing on the religious improvement of its pupils, and although it was originally doubtful whether the Hindus would allow their children to attend an institution so decidedly Christian, yet the high education given in it made them not only willing but anxious to have their sons admitted, and the complete triumph of the institution over the prejudices of the natives has conferred an inestimable benefit on all future missions.

In 1835 the second great mission of the church was taken over by the General Assembly from the old Scottish Missionary Society, by which it had been founded in 1822. In Bombay and Poona Rev. John Wilson, D.D., F.R.S., Mr. Nesbit, Mr. James Mitchell, and Rev. Dr. J. Murray Mitchell had been since 1828 attempting the same work in Western as Dr. Duff was doing in Eastern India, with the difference that whereas the necessities of the Bengali Society made them fight for the use of English in the schools in Bengal, the use of Oriental languages, both classical and vernacular, was recommended. The first thing accomplished by the transfer of Bombay and Poona from the old to the newer Scottish Church Society was the development of the English school at Bombay into a missionary college, in which the first Parsi converts were won and many educated Brahmans convinced of the truth of Christianity. Of these converts two, the Rev. Dhanjibhai Naoroji, a Parsi, and Rev. Narayan Sheshadri, D.D., are among the most efficient workers in the mission field.

Dr. Duff's eloquent appeal in the General As-

sembly roused up the Rev. John Anderson to found, in 1837, a mission at Madras, South India. There, with the assistance of Rev. R. Johnston and Rev. J. Braidwood he soon developed a vigorous Christian institution out of a school. Very soon large towns or centres, both Tamil and Telugu speaking, were supplied with teachers and preachers, among them the Rev. A. Venkataramiah and Rev. P. Rajahgopaul, educated in the Madras College. In places such as Chingleput and Nellore, where the caste prejudice was not strong, many schools for girls were commenced, and good work done among the women.

In 1843 occurred the Disruption of the Church of Scotland and the formation of the Free Church, and from this point the history becomes twofold, embracing the work (1) of the Established Church, (2) of the Free Church.

1. *The Established Church of Scotland.*—This body found itself after the Disruption with a large amount of mission property, chiefly located in India, but without any missionary force, all the missionaries, with the exception of one lady, having joined the Free Church on its formation. Dr. Duff in withdrawing had made a proposition for an equitable arrangement regarding the property, but this was not accepted; and in 1845 Rev. Dr. Ogilvie was sent out to occupy the buildings, and take up the work left by Dr. Duff. Other missionaries filled the vacant places in Bombay and Madras, and as speedily as possible the institutions of all three presidencies were re-established on the same basis on which they had been conducted before. They were numerously attended, particularly that at Calcutta, and appear to have been carried on in a very efficient and successful manner. The whole instrumentality of the mission was after a time in operation—the girls' schools, including refuges for orphans; the branch stations, and the lectures on the subject of religion; and although the success of the Church of Scotland has not been great as regards the conversion of Hindus to the Christian faith, yet the high order of education they are offering India is undermining the Hindu religion slowly but steadily, and preparing the way for the future progress of the gospel in that country. In 1857 the church opened a new mission in the Punjab, their first station being Sialkot. Wazirabad was occupied in 1863 and Chumba in 1865.

GUJARAT.—This mission has been a very successful one, and has made steady progress, with the exception of one misfortune during the mutiny of 1857, when the missionary martyr Thomas Hunter of Sialkot was shot, with his wife and infant child. The Church of Scotland in 1870 sent out several missionaries to the British Lepchas of the Darjeeling district, who occupied first Darjeeling and afterwards Kalimpong (in 1873), now supported by the Young Men's Guild, whose first missionary, Rev. John A. Graham, sailed for India February, 1889; and Independent Sikkim, founded in 1886, and supported by the Missionary Association of the four Scottish Universities. "Great blessing has rested on this threefold mission." There is a monthly mission newspaper, the "Masik Patrika," in the vernacular, and the magazine "Life and Work" circulates with an English local supplement, linking the European residents with the mission. Both Europeans and natives contribute liberally to the mission.

2. *AFRICA.*—The Africa Mission of the Established Church, begun in 1874, owes its existence to the impulse given by the news of Livingstone's death and by Mr. Stanley's letter from Uganda. The Established Church and the Free Church of Scotland naturally took the territories most closely associated with Livingstone's memory, the Zambesi and Lake Nyassa. The Free Church Mission has an important station at the south end of that lake, while the Established Church Mission is at Blantyre, near Lake Shirwa. At present the East Africa Mission has 3 ordained, 2 medical, and 6 unordained missionaries, and 1 female missionary. Its two other stations are at Domasi and Chirazula. At Blantyre the native church is prospering, and it is hoped that some of the young men who have been baptized will hereafter be ordained missionaries. The mission has the advantage of most of those in Africa, in the fact that all its stations are elevated, and for Central Africa very healthy. The whole mission is full of promise, but it is at present struggling very hard against the attacks of cruel Arab invaders and treacherous Mohammedans, who are using all their wily strength to drive out the white men and hold the land for the slave-trade; and also from the threats of the Portuguese to annex Blantyre and Nyassaland.

In 1877, a mission was started at Ichang, China, where the Church of Scotland has now 2 ordained missionaries, 1 unordained medical missionary, and several native helpers at work.

The Society has also Jewish Missions in Egypt, Beirut, Smyrna, Salonica, and Constantinople. For full particulars of this work see articles on the Jews and those places. In 1878 Dr. Norman Macleod of the Barony Parish, Glasgow, visited the missions, and on his return, by his eloquence and work as Convener of its Foreign Mission Committee, did much to stir up the church to do its duty in foreign lands.

2. *Free Church of Scotland.*—In 1843, under the great advantage of beginning her career with a mission (except the buildings), and a mission staff, well trained by years of experience, ready to her hand, the Free Church commenced missionary operations in India and the East. New premises and various means necessary for carrying on the several institutions were speedily provided for the missionaries who had joined her cause, at considerable inconvenience in consequence of their resignation of the mission buildings, libraries, and philosophical apparatus belonging to the mission of the Established Church. Funds in aid of the mission also came in most liberally in both Scotland and India. When the Calcutta institution was reopened in the new premises after the usual vacation, the number of pupils was larger than ever, and the whole operations went on with the same regularity and efficiency as if nothing had happened. The school at Tahi established by the Church of Scotland was removed, on account of the unhealthiness of the place, to Baranagur, a village on the Hugli, a few miles above Calcutta; but afterwards, for some reason not generally known, Baranagur was also given up. In 1864 the congregation at Calcutta founded a most fruitful branch mission among the Santals in the rural districts of Upper Bengal, and about the same time flourishing schools were established at three other places, Chinsurah, Bansberia, and Culna. These schools were all of a superior

class, although of course not equal to the institution at Calcutta, on the model of which they were formed. In Bombay, Poona, and Madras the institutions and various schools, including those for girls which had recently been established by the women of the mission, were carried on as formerly, and with similar results. In Bombay the Wilson Missionary College, lately transferred to a new and splendid edifice, is the centre of a wonderful educational work; and from this city the mission, whose native converts give all their leisure time to assist the missionaries, work among the Jewish community as well as among the Parsis, Hindus, Mohammedans, and Africans. In Madras, under the Rev. W. Miller, C.I.E., L.L.D., the Institute has become the United Christian College for all South India. At Madras and Conjevaram there are medical missions, where the native youth are being educated for physicians and nurses. Two Scottish ladies are at present in London studying medicine, to work among the women of India.

At the Assembly in 1844 (although the Free Church of Scotland began with only £372 in its treasury) it was resolved to take two forward steps—to take over the Kafir Missions offered by that portion of the Glasgow Missionary Society which was in sympathy with the Free Church, and to respond to the invitation of Sir William Hill, of the Church of England, to open a mission in the Nagpur state, in the heart of India. Accordingly, in 1845, Rev. Stephen S. Hislop was appointed to found a station at Nagpur. Here he found already in the field three pious laymen, the surviving members of the German Mission among the Gonds, who had resided in the neighborhood of Nagpur since they left the forests of the interior, and were now received into the service of the Free Church. On the arrival of the Rev. Robert Hunter a second station was begun at Kampti, a British cantonment in the then native state of Nagpur, situated about ten miles from the capital. The missionaries met with determined opposition on the part of men of note among the Hindus; and many vexatious difficulties and disappointments arising from the “irregularity of attendance, which it was exceedingly difficult to correct, and the withdrawal of the best and most promising pupils at the very stage of their studies when it was most desirable they should continue them,” because their parents, influenced in sending them only by love of gain, withdrew them as soon as they were able to earn money. Yet in spite of all this several prosperous institutions were established, of which Hislop Missionary College is the centre, and its splendid work adds greater lustre to the name of Dr. Hislop, a man worthy to be ranked with Duff, Wilson, and Anderson, the founders of India's three other great colleges. At Bhandara a prosperous medical mission has been established, while in Sitabuldi the schools and evangelistic work are making excellent progress. In 1864 the Rev. Narayan Sheshadri, a graduate of the Wilson College while it was still under the auspices of the Established Church, founded the Dekkan Mission, chiefly in the Mohammedan state of Haidarabad. The stations now occupied by this mission are Calcutta, Bombay, Poona, Jalna, Bethel and villages, Amraoti, Madras, Nagpur, and Indapur.

All the colleges of India are affiliated with the universities, and train Christian converts to be

vernacular as well as English preaching missionaries, and pastors of native congregations established on the Presbyterian system.

2. AFRICA.—*Kaffraria*.—This mission was not started by the Free Church. In 1821, at a time when the Rev. John Brownlee of the L. M. S. was the only missionary working in the whole country, the Glasgow Missionary Society, a union formed of members of the Established Church of Scotland and Dissenters, sent out Rev. W. R. Thompson as missionary and Mr. John Bennie as catechist, to accompany a Scotch colony of people from Glasgow, who intended to settle on the borders of Kaffraria, and thus perhaps open a door for missionary work among the natives. The greater part of the company was lost at sea, but the missionaries escaped, and immediately upon their arrival opened missionary operations at a little village on the Chumie River, where the friendly attitude of the native chief made their work very successful, and in June, 1823, five Kafirs were baptized. In December, 1823, the Rev. John Ross and his wife arrived as reinforcements. At this time the schools were well attended by pupils of both sexes, and the progress of the children was most encouraging. A printing-press was in operation, and from the chiefs of different tribes the missionaries received warm invitations to come and be their instructors. In 1830 the mission was in a most thriving condition. The natives were fast becoming orderly and civilized in their habits, and showed a great desire for instruction. A church had been built, and the rude huts of the natives replaced by more substantial dwellings. A new station was now formed at Lovedale, twelve miles from Chumie, to which Messrs. Ross and Bennie were assigned. In 1833, another station, Balfour, had been occupied, where the work was progressing favorably; and during the next few years many other places were being evangelized. In 1838 the union between the Established Church and Dissenters was amicably dissolved, the members of the Established Church retaining the old name, and the Dissenters taking the name of the Glasgow African Missionary Society, and retaining the stations of Chumie, Izzibigha, Glenthorn, and Kirkwood, (the last three stations more recently occupied), while the old society took Lovedale, Burnhill, Pirrie, and Kwelcha, at all of which stations the work was carried on with most encouraging success. In 1843, when the Disruption of the Church of Scotland occurred, the Glasgow Society at Lovedale, etc., offered to hand over their mission to the Free Church of Scotland, and the offer being accepted, the transfer was made in 1844. At the time of the transfer there was a missionary seminary at Lovedale, under Rev. W. Gowan, valued at £2,000 to £3,000, free from debt, with twelve or fourteen native theological students, and some graduates already engaged in evangelistic work among their countrymen. The work went on smoothly, and in the hands of the Free Church continued to prosper greatly until 1846, when the breaking out of the Kafir war compelled the missionaries to flee. Mr. Gowan returned to Scotland. Mr. and Mrs. Gorrie, who were among the latest missionaries sent out, went to Cape Town to labor among the colonists, and some of the other missionaries barely escaped with their lives. Burnhill station was destroyed, and several others burned. Lovedale seminary and mission

houses had been turned into a garrison, and were occupied by 200 soldiers, with their military stores. But peace being restored, in 1848 the missionaries all returned to their posts, and at Lovedale soon everything was full of hope; and in 1849 the seminary was reopened with all its former success. At the other stations, however, the prospect was dreary enough. Much had been lost in the way of mission property and personal effects of the missionaries which for a time it was impossible to replace; but before the close of 1850 the mission had been restored to its former peaceful prosperity, and the fruits of the patient work of its earlier years began to be apparent. In 1852 Mr. Ross and his assistant were compelled to leave Pirrie for the fifth time on account of war but they returned as soon as possible, and the work went on.

The mission field is now in two parts—the South and North Kafir Missions, divided by the Great “Kei” River. At Alice, near King William’s Town [South Kafir Mission], in the Lovedale Institution, with its annex for girls, under the Rev. J. Stewart, M.D., successor of Mr. Gowan, large numbers of native boys are taught farming, carpentering, wagon-making, printing, and book-binding; and the girls are trained in various domestic and culinary arts, while both sexes are given a broad general education, and are made thoroughly familiar with the Word of God. (See also Lovedale.)

In connection with the Lovedale Institution is the Lovedale Kafir Church, with a native pastor and board of elders. The work of the mission is progressing, and extending eastward towards Pondoland. The centre of population has come to be in the diamond fields, and these and the gold fields have drawn away many of the converts, for whom—although they are followed as well as possible under the difficult circumstances—the lack of money and men prevents the mission from providing. Other churches are growing up in the neighboring towns, and the general aspect of the field is very encouraging. The North Kafir division, founded in 1868, has its centre at the Blytheswood Institution, under the Rev. James McLaren, M.A. The work of this mission is chiefly among the Fingoes, and although, being younger, it is far less advanced than that of the Southern, yet it is growing rapidly throughout all the field, which now stretches north on the main road to Natal as far as Tsolo, and has stations besides Blytheswood, at Cunningham, Nain, Duff, and Somerville. “This Kafir Mission held its jubilee locally in 1871, amid great rejoicings and thank-givings to God on the part of 2,000 natives and 1,000 Europeans. The one station of Kafir huts has grown into ten great evangelistic centres, with over 70 out-stations.” These are cared for by 14 ordained missionaries, of whom 3 are native pastors of large congregations.

*Natal.*—Dr. Duff’s visit to South Africa, and his eloquent appeals in its behalf when he returned to Scotland, brought about in 1867 the establishment of a new mission of the Free Church among the Zulu Kafirs of Natal. The first stations occupied were Pieter Maritzburg and Impolweni, for a long time under the charge of the Rev. James Allison, who proved himself a good and faithful missionary of Christ.

At present Rev. John Bruce with several European and native assistants, has charge of

Pieter Maritzburg, while Impolweni is superintended by Rev. James Scott and a number of helpers. The work at both stations is progressing nicely in spite of the difficulty in keeping some of the schools open, owing to the attractions of the gold-fields. Most faithful and fruitful work is being done by the native preachers and their wives in all parts of the mission. Medicine and medical advice are given free to all who apply at the dispensaries.

In 1874 the Dowager Countess of Aberdeen offered Dr. Duff a large sum if he would establish a station as a memorial of her son, Hon. J. H. Gordon, who had been removed by death before he could carry out his cherished plans of opening a mission to the heathen. A capital sum of £6,000, increased by gifts of £4,500, was vested in a trust, of which three of the noble Gordon family were members, and Gordon Memorial in Natal, a few miles from the frontier of Zululand, was occupied. The site had been selected by the Rev. J. Dalzell, who went out as its first missionary, and who still is at the head of the work. When schools and a native church were first being formed the Ketchawayo war broke out, and for some time mission work was obliged to cease. But when peace was restored the work increased and spread in all directions from Gordon Memorial as a centre.

East Central Africa forms the most self-sacrificing and interesting African mission field. The Free Church answered the appeal of Dr. Livingstone to the churches of Scotland, by sending out in 1875, the year after his death, missionaries to occupy the lands around Lake Nyassa, and half-way north to Lake Tanganyika. The work thus begun took the name of the Livingstonia Mission, as a memorial of the great explorer. “The enterprise is managed in detail by a sub-committee in Glasgow, and its secular affairs by the African Lakes Company.”

The first settlement was made at Cape Maclean, at the south end of the lake, by Rev. James Stewart, C.E., who sacrificed his East India career and his life for the mission, and who was succeeded by Rev. Robt. Laws, the present missionary. From this centre have grown the stations of Bandawe, with its surrounding villages, along the west shore of Nyassa, also under Dr. Laws; the stations in North and South Agoniland, among the Agoni, a marauding tribe of Zulu origin on the western uplands, with Chinyera as an out-station, all under Dr. Elmslie; Chauenji, on the Stevenson road, between lakes Nyassa and Tanganyika, with Chinga to the northeast, under Rev. A. Bain, Dr. Kerr-Cross, and Rev. A. C. Murray; and Chikusi in the uplands southwest of Cape Maclean, from which it has been very recently occupied as an out-station. Dr. Laws, at Bandawe, has been a long time in the country, and has thoroughly won the confidence of the people. On one recent occasion some five or six thousand people assembled in his schools, in which large numbers of children are taught daily. At present the prosperity and peace of the mission is threatened by two great dangers. First, by the effort on the part of the Portuguese to blockade the Zambesi and cut off the African Lakes Company from entrance to the lakes, and to subject them to many hindrances upon the same; and, secondly, by another danger which has lately shown itself in acute

form—the trouble which arises from the impatience of the Arabs at the presence of Europeans and their influence on the lake. For years back the Arabs have been accustomed to visit this region for the sake of obtaining slaves, and have kept the people in hourly terror of their lives; and although for some time there seems to have been an abatement of those horrors which Dr. Livingstone describes as witnessed by him and perpetrated by Arab slave-dealers, yet recent occurrences show that the Arabs are only biding their time to repeat on the shores of Lake Nyassa the murderous raids which have always marked their course. The missionaries are in great straits, and an active struggle is now being carried on between the English consuls and the missionaries of the Scotch Free Church and the Arab traders. “The consuls advised the missionaries to leave the country for six months and return with more guns and ammunition; others felt that any absence would mean the abandonment of the mission, and would encourage the Arabs, with the consequent discouragement of the native allies. It was finally agreed that the members of the African Lakes Company and Dr. Cross should fortify themselves at Chiringe, and that the consuls should go to the coast and send to the besieged men such reinforcements as were needed. This was done. The native chiefs all adhere to the mission, and are bitterly hostile to the Arabs. Hitherto Dr. Cross and the missionaries have taken no part in the fighting, but have offered their services as surgeons to all, showing thus that the mission desires peace. But it seems improbable that they will be able to maintain this position long, for though there is now more quiet, the Arabs are still most hostile, and an attack at no late date is expected. Yet in spite of all these dangers and interruptions the missionaries have succeeded in keeping the schools open, and in carrying on the regular evangelical work among the natives, who have learned, by the way the missionaries share their troubles and dangers, that they are indeed true friends. In return the natives have shown great bravery and fidelity to the Europeans during the recent disturbances.”

3. SYRIA.—*The Lebanon*.—The Free Church of Scotland resolved to carry on the work commenced in 1839 by their countrymen, M'Cheyne, Keith, Black, and A. Bonar, and followed in 1860 by the efforts of the Lebanon Schools' Society, a catholic agency in Scotland for the Christian education of the people of the Lebanon. Accordingly Dr. Duff and Principal Lumsden visited the mountains, and their visit resulted in the appointment in 1872 of the late Rev. John Rae, M.A., as an ordained, and in 1876 of the Rev. Dr. William Carslaw as a medical missionary. They chose the Metan as the district in which they should commence work, and occupied Shweir as their first station. They united in their work with the Lebanon Schools' Society, which has now 6 out-stations about Shweir, where a congregation of the Syrian Evangelical Church has been formed and a church built.

4. NEW HEBRIDES MISSION is conducted by nine Presbyterian churches in harmonious co-operation under a local synod. For full particulars of the work of the Free Church, see the article on the New Hebrides Mission.

5. SOUTH ARABIA.—In February, 1885, the Hon. Ion and Mrs. Keith-Falconer formed

plans for a mission to the Mohammedans and Somalis around Aden. These volunteer founders of the mission, who themselves met the entire cost of the enterprise, surveyed all the district about Aden as far as El Hauta, the capital of the Sultan of Lahej, and resolved to settle at Sheikh-Othman, a pleasant little village and British outpost 10 miles from Steamer Point. A grant of two garden-plots of land was made by the British Government, and Hon. and Mrs. Keith-Falconer, after having returned to England in 1886, again went out to Arabia, accompanied by Dr. B. Stewart Cowan as a medical missionary. While in England, Mr. Keith-Falconer, whose father, the Earl of Kintore, was an elder of the Scottish Free Church, asked the Foreign Mission Committee to recognize him and to appoint his medical colleague as its representative. This the Committee and the General Assembly at once agreed to, but although the mission in this way became connected with the Free Church, it is still strictly undenominational in its principle. In the first week of 1887 the Medical and Bible Mission at Sheikh-Othman was begun, in a native house, and was carried on with remarkable success until May 11th, when the beautiful life of the much-loved founder, Hon. Ion-Grant Neville Keith-Falconer suddenly and peacefully ended, and his body was buried in the cemetery of Aden Camp. Immediately the Countess Dowager of Kintore and Mrs. Keith-Falconer each offered to guarantee £300 a year for the support of two missionaries.

The Keith-Falconer Mission is at last fully equipped. Dr. Paterson, the new medical missionary, is in charge, with Mr. Lochhead as his assistant. The committee asked the Rev. W. R. W. Gardner, who had volunteered for Africa, to go to Aden as an ordained missionary; and Mr. Gardner, with great self-denial, gave up long-formed plans for service in Africa to carry on Mr. Keith-Falconer's work. Sheikh-Othman, the headquarters of the mission, forms the natural centre of mission operations amongst a group of small villages within a few miles radius. Some of these have been visited, and the reception has always been friendly, but this is, on the whole, a most difficult field, owing to the low moral and religious tone of the people, and to the fluctuating character and the sparseness of the surrounding population. The medical work done by the mission is large enough to warrant their desire to establish a small hospital near the town, and conversations with the better class have proved that they are interested in the establishment of a school, and in the subjects to be taught—such as Arabic, English, etc. This is very encouraging, although it remains to be seen what success will at first attend a school where the Bible must avowedly be taught in place of the Koran.

Besides the work among the Arabs and Somalis, much good is being done among the rescued Galla captives, and two houses (one for boys and one for girls) are being built for the accommodation of the children and their teachers.

(6) Jewish Missions and (7) Continental Missions will be separately treated under these heads.

GENERAL VIEW. (From the Free Church of Scotland Year-Book).—“The Free Church of Scotland's foreign missions are now consolidated

in seven well-defined fields, and are extended among certain great races of marked individuality and influence, in the two great continents of Asia and Africa. In and to the south of Asia the fields are: (1) India, and these especially among the educated Brahmanical Hindus, numbering 17,000,000, and the simple aboriginal demon-worshippers, numbering 7,000,000; (2) South Arabia, from Aden to Sheikh-Othman, as a base for work among the Mohammedan Arabs and Somalis; (3) The New Hebrides group of thirty islands in the Pacific Ocean, to the south of eastern Asia, containing 100,000 cannibals of the Malay or Polynesian, and the Negrillo or Papuan races; (4) Syria, where, on Lebanon, twenty miles to the northeast of Beirut, there is a medical and educational mission to the quasi-Mohammedan Druses, and to the ignorant Christians of the Greek and Latin churches. In Africa the missions are at work among the three principal varieties of the great Bantu race of fetich-worshippers, termed by their Mohammedan oppressors 'Kafirs.' These varieties are: (1) The Kafirs of Cape Colony, with whom we have fought seven cruel wars, but who are now peaceful, because largely Christianized and civilized around the provincial capital of King William's Town. In this great work the United Presbyterian and the Free Churches are practically, and will be corporately, united; (2) the Zulus of Natal are evangelized from Maritzburg, the capital; from Impolweni estate, where a girls' institution is being built like Lovedale, for Kaffraria proper; and from Gordon Memorial, on the borders of purely native Zululand; (3) the Kafir-Zulu tribes of Lake Nyassa region, farther north, are cared for by the Livingstonia Mission, begun by Rev. Dr. Stewart, and now under the Rev. Dr. Laws, who again illustrates the blessedness of union, being a United Presbyterian Missionary in the service of the Free Church of Scotland. The Free Church has in all 82 foreign missionaries in India, Africa, the New Hebrides, and Syria, besides 521 native agents who assist the missionaries."

New Hebrides: see New Hebrides Mission.

### **Presbyterian Church (North), U. S. A., Board of Foreign Missions.**

Headquarters, 53 Fifth Avenue, New York City.—"Foreign Missions" were undertaken by the Presbyterian Church in the United States at a very early date. The "Society for Propagating Christian Knowledge," which was formed in Scotland in 1709, established in 1841 a "Board of Correspondents" in New York, by whom the Rev. Azariah Horton, a member of the Presbytery of New York, was appointed to labor as a missionary among the Indians on Long Island. The second foreign missionary of the Presbyterian Church was David Brainerd, who was ordained by the Presbytery of New York, then meeting at Newark, N. J., June 12th, 1744, and immediately commenced his labors at the forks of the Delaware, on the Susquehanna, and at Crosswicks, near the centre of New Jersey. After his death in 1747, his brother, the Rev. John Brainerd, a member of the same Presbytery, took up the work among the Indians, which he carried on successfully for many years. These three missionaries to the heathen tribes of America maintained a correspondence with the parent society in Scotland, and derived a part of their support from that country. Mr. Horton

and David Brainerd received about two hundred dollars a year from that source, but John Brainerd was supported principally, if not wholly, by contributions from the Presbyterian churches in this country. In 1763 the Synod of New York ordered a collection to be made in all its churches for the support of the Indian missions, which now included work among the Oneidas. In 1766 the synod sent the Rev. Chas. Beatty and the Rev. George Duffield upon a mission to the Indians on the Muskingum River in Ohio; their report being very favorable, two missionaries were appointed to labor in the region. After the death of Mr. John Brainerd in 1780, on account of the many changes which, owing to the Revolutionary war and other causes, had occurred among the Indians, the foreign missionary work, which had been prosecuted for nearly forty years, was, to a considerable extent, abandoned, but was resumed in 1796, upon the formation of the "New York Missionary Society," a body independent of any presbyterial supervision, although it consisted principally of members of the Presbyterian Church. A considerable amount of funds was collected, and three Indian missions were established among the Chickasaws, the Tuscaroras, and the Senecas. In 1797 the "Northern Missionary Society," which, like its predecessor, was an independent body, and composed in part of Presbyterians, was instituted, and prosecuted missions to the Indian tribes for several years. In the year 1800, however, the General Assembly of the Presbyterian Church took up the work of foreign missions in a systematic manner. In 1802 the General Assembly's Standing Committee on Missions addressed a circular to all the Presbyteries under its care, urging collections for the support of missions, and making inquiries for suitable men to be employed. In 1803 a suitable person was found in the Rev. Gideon Blackburn, who offered himself for the work, and a mission was established among the Cherokee Indians, then residing within the limits of the chartered State of Georgia. The work was prosecuted with zeal and devotedness until, after eight years' labor, Mr. Blackburn's health failed. The General Assembly not being able to fill his place, the Rev. Mr. Kingsbury, acting under the American Board, established himself in the Cherokee country and built up a flourishing mission. From 1805 to 1818 the General Assembly carried on work among the Indians in various directions, and with some degree of success; but in 1818, a new society, consisting of the Presbyterian, Reformed Dutch, and Associate Reformed churches, was formed, called the "United Foreign Missionary Society," whose object was "to spread the gospel among the Indians of North America, the inhabitants of Mexico and South America, and other portions of the heathen and anti-Christian world," and until 1826 all the existing missionary interests of the Presbyterian Church were merged in this society. In 1826, when the Society had under its care nine missions, with a force of 60 missionaries, the whole work was transferred to the A. B. C. F. M., and the "United Foreign Missionary Society" ceased its operations.

Many Presbyterians desiring to prosecute foreign missions through the church of their preference, the Synod of Pittsburgh, which from its organization in 1802 had shown great missionary zeal, formed in 1831 the "Western

Foreign Missionary Society," intended not for that synod alone, but for all others which might wish to unite with it.

Operations were at once commenced, and the Society, organized for the purpose of "conveying the gospel to whatever parts of the heathen and antichristian world the providence of God might enable it to extend its evangelical exertions," had succeeded in planting missions among the American Indians, in India and Africa, and was contemplating work in China, when in June, 1837, a Board of Foreign Missions was established by the General Assembly, to which the work of the Society was surrendered. At this point (in 1838) the Presbyterian Church was divided, and the "Old School" Assembly carried on its work through the "Board of Foreign Missions," while the General Assembly of the "New School" continued to prosecute its missions by its "Committee on Foreign Missions" through the A. B. C. F. M. Upon the reunion of the Old and New School Assemblies in 1870, the Persian, Syrian, Gaboon, and several Indian missions were transferred from the American Board, and since that period all the missions of the Presbyterian Church, with the exception of those carried on by the Southern churches, which withdrew from the General Assembly of the Old School with the breaking out of the civil war, have been prosecuted through the "Board of Missions of the Presbyterian Church."

**Organization.**—The Board of Foreign Missions is simply a Permanent Committee of the General Assembly, and the title of "Committee" would have more clearly indicated its relation to that court. For convenience in holding real estate, a charter has been obtained in the State of New York, with the same title as designated by the General Assembly, "The Board of Foreign Missions of the Presbyterian Church in the United States of America." The members of the incorporated body are the same persons who are appointed as members of the Board by the General Assembly, which possesses exclusively the general authority, supervision, and control of the work of missions, the Board being but a form of its executive agency. From 1838 to 1870 the Board was composed of 120 members; from whom an Executive Committee was appointed of persons residing in or near New York City, the Board's headquarters. At the reunion, when the Board was reorganized, the membership was reduced to fifteen, and the Executive Committee was dispensed with. The Board has been presided over successively by Drs. James W. Phillips and J. M. Krebs, Mr. James Lenox (who was re-elected at the reorganization), Dr. William Adams, Dr. Wm. M. Paxton, and the present incumbent, Dr. John D. Wells. The first Corresponding Secretary of the Board was the Hon. Walter Lowrie, 1837-69. In 1838 the Rev. John C. Lowrie was chosen Assistant Secretary, and in 1850 became a full co-ordinate Secretary with his father, Dr. John Leighton Wilson was chosen third Secretary in 1853, continuing until 1861, when he resigned and became the first Corresponding Secretary of the "Foreign Mission Board of the Presbyterian Church in the Southern States." This vacancy was filled in 1865 by Dr. David Irving. In 1871, after the reunion, Dr. Frank F. Ellinwood was chosen third Secretary, to represent the New School churches. In 1883 the Rev. Dr. Arthur Mitchell became

the fourth Secretary, and in 1885 the vacancy caused by the death of Dr. Irving was filled by Dr. John Gillespie. The present (1890) Corresponding Secretaries are, in the order of their appointment, Drs. Lowrie, Ellinwood, Mitchell, and Gillespie, who divide the work of the Mission House among themselves, each having the correspondence with certain missions, and conducting such a share of the home correspondence as may fall to him. The Secretaries and Treasurer constitute the "Executive Council," which meets on the Friday preceding the meetings of the Board and carefully considers all business to be presented, formulating, on the various subjects, an opinion which is submitted to the Board, and adopted, rejected, or modified at its pleasure. In all business pertaining to the several missions the Board attaches great importance to the opinion of the missionaries on the field, and especially to the recommendations of the missions, which are the Board's business agencies, to which are committed the interests of the Presbyterian Church in the region covered by the mission. Local details are left as far as possible in the hands of the men on the ground, the general supervision being reserved to the Board. In its methods of work the Board has always assigned the chief place to the preaching of the Word as an evangelizing agency, while putting due emphasis upon the school, the press, the hospital and dispensary, with here and there an experimental effort in the line of the industrial arts.

Because of the many advantages for sending forth missionaries, remitting funds, foreign correspondence, etc., New York City was early chosen as the business headquarters of the Board, but for the first five years of its sojourn in that city it had no abiding-place, but was shifted from office to office, to the great inconvenience of all concerned; but in 1842, by the liberality of a few friends, in addition to collections made in some of the churches, the Mission House at 23 Centre Street was provided. With its ownership came the nucleus of a library, now increased to 7,000 volumes, and a museum of curios, illustrative of the customs of heathen nations, especially their idol-worship. The house on Centre Street continued to be occupied by the Board until in 1887 the "Lenox Mansion," 53 Fifth Avenue, was placed at its disposal.

**Missions of the Board.**—MISSIONS TO NORTH AMERICAN INDIANS.—The missions of the Presbyterian Board to the American Indians are treated of under the article Indians, but the following summary is here given:

*Chippewas and Ottawas.*—Station founded at Grand Traverse Bay, Michigan, 1839; church organized, 1843; Grand Traverse Bay station moved, Little Traverse Bay station opened, 1852; Middle Village station, 1853; manual-labor school opened at Grand Traverse Bay, 1853; church of 18 members organized at Little Traverse Bay, 1856. In 1867 the mission was discontinued, and the churches were placed under the care of the presbytery in 1871. During the 33 years of its existence about 200 members were received into the churches.

*Seneca Mission.*—Received from A. B. C. F. M., in 1870; placed under presbytery of Buffalo, 1880.

*Lake Superior Chippewas.*—Received from A. B. C. F. M. in 1870; boarding-school opened

at Odanah; out-station and day-school started at Ashland, Lac Court d'Oreilles Reserve, 1878; school opened at Round Lake, 1884. Over 100 members have been received into the church since 1870.

*Iowa and Sac Mission.*—Missionaries sent out, 1837; boarding-school opened near Highland, 1845, from which in 25 years 500-600 children received education. Mission abandoned, 1860; resumed, 1881.

*Sac and Fox Mission.*—Under the care of the W. B. F. M. of the U. W. The work is difficult, but a few have been converted.

*Dakota Mission.*—Received from A. B. C. F. M., 1870. Stations: Yangton Agency, Flundreau, Poplar Creek, Wolf Point, and Pine Ridge.

*Omaha and Otoe.*—Commenced at Bellevue (now in Sarpy County, Neb.), 1846; Otoes received, 1855. Present station is on the new reservation at Blackbird Hills, Northwest Nebraska, on the Missouri, 70 miles above Omaha.

*Winnebago Mission.*—School started among these Indians on the Omaha reservation, 1865, but soon after given up; work resumed, 1881. Twenty Christians have been organized into a church.

*Choctaws.*—Spencer Academy, to which \$6,000 was annually appropriated by the Indians, was offered to and accepted by the Board in 1845; great revival in 1854; boarding-school opened for girls, 1855; services held at seven different places. Statistics in 1859: 213 communicants, 171 scholars; received from the A. B. C. F. M. in 1860; 6 native preachers, 10 stations, 12 churches, 1,467 members, 3 day-schools, 3 boarding-schools, 445 scholars. Station and church organized at Jack's Forks, 1860; work discontinued on account of the civil war, 1861, and resumed by the Board of Home Missions, 1882.

*Creek Mission.*—Work commenced in 1841; boarding-school for 20 pupils built, 1845; larger school built at Koweta, 1848; school built at Tullahassee; work interrupted by the war, 1861; resumed at Tullahassee, 1866; school removed to Wealaka, 1882.

*Seminole Mission.*—Settlement of Seminoles on Creek reservation, 1832; unsuccessful attempt to establish a mission, 1845; work commenced at Oak Ridge, 1848; Seminoles removed and new station established at Wewoka, 1859; interrupted by the civil war, 1861; boarding-school reopened, 1870.

*Nez Percés Mission.*—Received from A. B. C. F. M., 1871. Stations occupied: Lapwai, Kamiah; church placed in close connection with presbytery of Oregon, and Spokane church organized with 92 members, 1878; Deep Creek, Wyoming Territory, church organized with 89 members, 1880; church on Umatilla Reserve, Oregon, with 28 members, and church among the Spokanes, 1882. Statistics for 1889 give 7 churches, 792 communicants. Joseph's Band have recently returned to their native place from their exile in Indian Territory.

*Chickasaw Mission.*—Work commenced, 1851; discontinued, 1861.

*Wea Mission.*—Work commenced, 1833; discontinued, 1838.

*Otoe Mission.*—Work commenced, 1856; discontinued, 1860.

*Kickapoo Mission.*—Work commenced, 1856; discontinued, 1860.

*MISSION TO MEXICO.*—*Southern Mexico Mis-*

*sion.*—Miss Rankin's work in Mexico, which was the means of directing Bishop Riley towards that country, also influenced the Presbyterian churches of the United States, and in 1872 the General Assembly took action in regard to the establishment of a mission there, and in September of that year the first band of missionaries for Mexico sailed for New York. They went directly to Mexico City, where they found a large body of dissenters from the Catholic religion, embracing nine congregations, who at once solicited their guidance, and the organization of churches was begun, and in January, 1873, the mission of the capital was formed. The education of the native ministry was at once undertaken, and a hymn-book was prepared which has since been adopted by many of the other branches of the church in Mexico, and schools for girls and young men were opened. From Mexico City advances were made into the surrounding country, as the way was opened; much opposition was encountered, especially among the ignorant and bigoted population of the more remote districts, and at Acapulco a violent outbreak occurred in 1875, resulting in the death of several persons. This put an end for some years to all public effort in the state of Guerrero, but after a time a humble Christian woman, Mathilde Rodriguez, was employed to distribute Bibles and tracts in that region, and to converse with the people in their homes; and in 1884 Rev. J. Milton Greene, accompanied by Rev. Procopio Diaz, one of the sufferers by the violence of the mob in 1875, ventured to revisit Guerrero, where they were eagerly received. In seven weeks they held 32 services, established 13 congregations, baptized 280 persons, and formed 6 churches, with elders regularly organized.

In 1887, when a missionary was sent to Zitacuaro in the state of Michoacan, he was greatly surprised to find the way all prepared for the preaching of the gospel; six years before, a Mexican had opened a book-store there, and had sold or given away 400 Bibles and a large box of tracts, which during these six years had been doing their silent work. At the present time there are within a radius of 35 miles more than 16 congregations, with a membership exceeding 4,000.

In Tabasco, in the extreme southeast, a large number of Bibles had been scattered by the colporteurs of the American Bible Society; and four years after the commencement of their work, a young graduate of the theological seminary in Mexico City (now removed to San Luis Potosi) volunteered to serve in Tabasco. He was gladly received, and two churches were at once organized. The Southern Mexican Mission now embraces 56 churches, in addition to 15 stated preaching places, and the total membership of the churches is 3,224. The work has been extended from Tabasco into Yucatan, and at Merida there is a church with native pastor.

*Northern Mexico.*—This mission includes the stations of Zacatecas (occupied 1873), San Luis Potosi (1873), San Miguel del Mezquital (1876), and Saltillo (1884). At Zacatecas it has a flourishing church, and also various schools for grown people and children. Zacatecas, like Mexico City, has been the centre of influence for the surrounding country, and the work has extended in many directions. In addition to the principal station in the city there are two

stations in the suburbs. In San Luis Potosi the theological seminary forms a very important part of the mission; the number of native students preparing for the ministry is 19; many have already gone forth from it to various parts of Mexico. At San Luis Potosi, also, is a boarding-school for girls, which is doing excellent work in training a large number of Mexican girls to be teachers among their own people. The school for girls which has been long in operation at Monterey is to be removed to Saltillo, on account of its more salubrious climate and other advantages. In Northern Mexico, as well as in the southern mission, the Protestants have met with much persecution, and in some places a good deal of fanaticism and opposition still exists, not, however, seriously affecting the work. The work of the mission press is of great interest and importance to the whole mission, the different sections of which have been brought into much closer contact since the building of railroads in the country.

*Guatemala Mission.*—Mission work in Guatemala has been thus far carried on exclusively by the Presbyterian Board, whose attention was called to it in 1882. The Jesuits had been expelled, religious liberty prevailed in the republic, and assurances were given of the sympathy of President Barrios with Protestant missions. These facts, and the consideration that there was not in the country one Protestant service, while in the capital were many Europeans and Americans who might be expected soon to make an English service self-sustaining, led to the appointment by the Board of Rev. John C. Hill and his wife as the first Protestant missionaries to Guatemala. The plan adopted was to gather an English-speaking congregation and organize a Protestant church. Services were held for a time in private residences, but very soon a house was rented from the President at a merely nominal sum, and furnished by the contributions of the English-speaking people. The missionaries were soon fully established, and were especially encouraged by the attendance of natives, the young men seeming to be particularly attracted. The patronage of leading citizens, both English and native, was offered if schools should be opened, and in January, 1884, upon the arrival of Miss Hammond and Miss Ottaway, a school was organized and received with great favor by the people. The Sunday-school was attended by the children of the President, and by others in high positions; and the new chapel was soon filled, mainly by intelligent citizens, who came notwithstanding the fact that their business was thereby endangered. Work among the Spaniards was taken up by Mr. Hill, in connection with a licentiate preacher from Mexico, whose ministrations attracted large numbers, some of whom gave evidence of conversion, and a church was organized in December, 1884. President Barrillos, President Barrios' successor, is most favorable to the mission, and the work in all its departments is making good progress.

*Mission in South America.*—The first mission of the Board in South America was the Buenos Ayres Mission, commenced in 1853, but discontinued in 1859.

*United States of Colombia.*—In 1856 a mission to "New Granada," now the United States of Colombia, was commenced at Bogota. The government interposed no hindrances, and when the services in Spanish called out bitter opposi-

tion from the priests, the disturbance was quelled by the authorities, and for some time the rights of toleration were vindicated, the priests however, threatening all Catholics who should attend any Protestant services with excommunication and its terrible consequences. The civil war which broke out in 1860 materially interfered with missionary work, the Romish party for a while holding the capital; afterwards the Liberal party gained possession of it, the Jesuits were banished, monastic orders restricted, and other means taken to reduce the political power of the papal party. The missionaries organized a church in 1868; a day-school and boarding-school were also established. For many years the work was carried on, against opposition, and the progress was very slow indeed. The difficulties still besetting the mission are so great as to prevent rapid growth; the opposition of the priesthood and the apathy and infidel tendencies of the people—who love Protestantism for political reasons, but hate its claims for a devoutly religious life—are among the greatest drawbacks to work in Bogota. A new station was opened at Barranquilla in 1888.

*Chili.*—The Chili Mission was transferred to the Presbyterian Board by the American and Foreign Christian Union in 1873, and occupies the whole republic, though operating from three centres, viz., Santiago, Valparaiso, and Concepcion. Santiago, situated on a plain 2,000 feet above the sea, is 120 miles inland from Valparaiso, and is connected with it by a railroad. It was first occupied by Rev. N. P. Gilbert in 1861, who, in the midst of many discouragements from foreigners and natives, persevered until he was able to organize a church and erect a building. The mission in Chili has had a most generous and efficient friend in Alexander Balfour, Esq., of Liverpool, and the training school and theological seminary at Santiago for five years received its support from him. The "Instituto Internacional," a boys' school for boarding and day pupils, is conceded to be far ahead of the Romish schools in curriculum and thoroughness, though in the erection and equipment of schools carried on in her interest the Romish Church expends large sums. At Valparaiso the Chilean church receives much help from the co-operation of the "Union Church," supported by English-speaking people. Its congregation numbers about 300. In addition to Sunday-schools the "Escuela Popular" for boys and girls has been established, and a "Shelter-home" for needy children is carried on under the supervision of the missionary, but is mainly supported by subscriptions in Valparaiso and receipts for board and lodging. The Valparaiso Bible Society is doing most efficient work.

Concepcion is the centre of a district containing nine towns and villages, which is in the charge of a native minister who received his theological training from this mission. Salea, Constitution, and Linares are other points of work in Chili, and in connection with this mission, work is carried on in Callao, Peru.

*Brazil.*—In June, 1859, the Rev. Ashbel Green Simonton sailed from New York as the Board's first missionary to Brazil. He landed at Rio Janeiro in August, and while acquiring the Portuguese language he gave lessons in English; but soon finding himself able to speak with some facility, he opened a place for preaching. His first audience consisted of two

men whom he had taught English, three attended his second service, and the number gradually increased until full congregations attended his ministrations. Other missionaries were sent to aid in the work, and in 1862 the first Presbyterian Church in Brazil was organized at Rio; in 1875 two hundred converts had been added to the number received in 1862. This church is now the centre of much work carried on in the surrounding country; regular worship is maintained at Praia Grande, the capital of the province of Rio de Janeiro, and evangelistic tours to Rezende and Petropolis have been made. São Paulo was occupied as a mission station in 1863; in 1865 a church was organized, consisting of several converts who had been received on profession of their faith, and steady, though not rapid, progress was made; a noticeable fact in its history is the great number of its members who have removed to other places, often carrying the blessing with them. Funds for a preaching hall and accommodations for training schools were obtained by Mr. Chamberlain, who joined the mission in 1865, and ground and materials for building were purchased. The boarding-school for girls—now so well known—was established in 1867; there are now on the roll 264 pupils, not including those in the kindergarten, which is independent of the Board. The value of the educational work in Brazil cannot be estimated, for the influence of the schools extends into many homes throughout the various provinces, and the Bible, a new book to all, and full of interest, is thus brought within the reach of many outside of the missionary circuit. A weekly journal, the "*Imprensa Evangelica*," whose publication was begun in 1864, is also widely circulated through the provinces, and exerts a silent but very great influence. Through this influence churches have grown up in places never visited by a minister of the gospel. Rio Claro, the centre of a large German population, was also occupied in 1863. In 1867 a school for girls was established which is most highly recommended, even Romanists approving it openly. In connection with the work are many preaching stations, where services are held regularly. At Bahia, 735 miles northeast of Rio de Janeiro, at Campos, and at Laranjeiras, and their out-stations, much energetic missionary work is carried on, and at Sorocaba, Caldas, Campanha, and Botucatu native churches have been organized, with native pastors in charge. Within the past year the church at São Paulo has become self-supporting and the pastoral charge put into the hands of a native minister, who had been trained in the theological school in that city. A station has been established at Corytiba, the chief town of the province of Parana, about 500 miles southwest of Rio de Janeiro.

The year 1889 was marked by the consolidation of the missions of the Board in Brazil with those of the Southern Presbyterian Church. The synod of the Presbyterian Church in Brazil thus formed has a total of 61 churches, with an aggregate membership of 3,000. By this union the Presbyterian Church now occupies 12 of the 20 provinces of Brazil; but as 34 of its churches are in the province of São Paulo and 9 in the province of Minas, it is plain that only a beginning has been made in many of the 12 provinces named. The synod of Brazil has asked for large reinforcements to

its missionary staff; and this appeal is all the more urgent by reason of the vast tide of emigration which has turned toward Brazil since the abolition of slavery in 1888, and which, owing to the establishment of the republic, will now be greatly augmented.

**WESTERN AFRICA.**—*Liberia Mission.*—The first settlement on the coast which now contains the republic of Liberia was by 89 free colored people who sailed from New York in 1820. Two years later a colony of manumitted slaves from the United States was planted by the American Colonization Society, under whose supervision they remained for twenty-five years, until the erection of the republic, with its capital at Monrovia, in 1847. Various missionary boards, representing all the evangelical Christian Churches, followed with their agents their members who had thus gone as colonists. The colonists, with re-captives from slave-ships, landed at Liberia, and the aborigines make now a population estimated at about 600,000. Mission work in Liberia was begun by Lot Cary, a slave, who, having bought his freedom, was sent out by Baptist aid in 1821; upon his death in 1828 the governor obtained Swiss missionaries from Basle, who were, however, afterward transferred to Sierra Leone. The Presbyterian Mission was commenced in 1833 at Monrovia, its more special object being work among the natives, and only incidentally for the colonists. Stations were extended to the Kroo coast near Cape Palmas. The six missionaries who were sent out very soon died from the effects of the climate. The Board then, in 1842, tried the experiment of sending only colored ministers, and Settra Kroo, Sinoe ("Greenville"), and Monrovia were occupied. The presbytery of Western Africa was constituted in 1848, and attached to the synod of Philadelphia. It was found that American Negroes were not exempt from fever, and, by their slave origin, lacked skill for the conduct of affairs; accordingly white men were again sent out. The Alexander High School, established at Monrovia in 1849, and also a school under the care of a very able colored teacher, did excellent work. After many discouragements, there came a year of blessing in 1857. Reinforcements were sent to the mission, and in 1859 two new stations were opened. At present the work is carried on from eight centres, viz., Monrovia, Brewerville and Clay-Ashland, Careysburgh, Schieffelin, Grassdale and Greenville; also at Ghina, in the Vey country, and among the Bassa tribe; all the missionaries of the present staff are Americo-Liberians, with the exception of two, one of whom is a Vey, the other a Bassa.

*Gaboon-Corisco Mission.*—In 1834 the American Board sent a missionary to Liberia, who located at Cape Palmas. A large missionary force followed him. There, work at first was successful, but after some reverses, and collisions with the neighboring American Negro colony from Maryland, it was in 1843 removed to Gaboon, about 1,000 miles distant. The great mortality among the missionaries of the Presbyterian Board on the Liberian coast led to the inquiry whether a more healthy locality could not be discovered elsewhere, and the comparative freedom from fever enjoyed by the missionaries of the American Board on the Gaboon River turned the attention of many to the equator. Accordingly two missionaries and

their wives were sent to form a new mission; aided by the counsels of the American Board, and after making full examination of various places, they selected the island of Corisco as their station, hoping that its insular position might assure exemption from fever, and that natives of the island, after careful education, could undertake the danger and exposure of carrying the gospel to distant regions. Neither hope was realized. Four stations were established on the island—Evaugasimba, Ugobi, Elongo, and Maluku; but the island proving quite as malarious as the mainland, and chronic tribal quarrels making it impossible to go any distance from their own tribe, the four Corisco stations were reduced to the single one of Elongo, and the work was extended to the mainland. In 1870 the Gaboon Mission was transferred to the Presbyterian Board, and since that time the work has been known as the "Gaboon and Corisco Mission," and now includes the stations of Baraka, on the Gaboon River, 10 miles from the sea, and Angow, higher up the same river; Corisco, with out-station at Mbiko, on the mainland opposite Corisco; Benita, Batanga, 75 miles north of Benita; Kangwe, on the Agowe River, 165 miles from the sea; and Talaguga, 50 miles above Kangwe. There are no roads in this part of Africa, the narrow forest-paths being trodden single file in hunting, or in emigrating from the bank of one river to another; the beach on the coast can be traversed by horse or hammock-bearer, but almost the entire travel and trade is done in native canoes and boats dug from the single tree-trunk, and by small foreign sloops, schooners, and steam-launches. The missionaries had always travelled by small open boats, with sails for the ocean and oars for the inland rivers, until 1871, when a rapid-sailing yacht was purchased for them; two years later this vessel was lost on the Corisco rocks, and her place was taken by the "Hudson;" this, again, has been replaced by the "Nassau," light enough for river service and large enough to take the place of sailing vessels for the coast stations.

The Mpongwe, Benga, and Fangwe dialects have been reduced to writing, and the entire New Testament and parts of the Old, with hymn-book, catechism, etc., have been translated into them. Churches have been organized on Corisco, at Benita, Gaboon, and on the Agowe; and schools for boys and girls at these points, and also at the other stations mentioned before and their out-stations. Owing to the fact that different sections of the territory occupied are under German, French, and Portuguese control, the missionaries have had many political difficulties to contend with. In the French territory French is now taught in the schools, and, so long as German and not English is taught within the German limits, no trouble need be apprehended from the German Government. Cannibalism still exists on the Agowe, and the custom of flinging sick children and aged parents into the river is openly followed. Polygamy is practised; this and the intemperance and indolence of the people, tribal wars, and slavery render the work of the mission most difficult; the people are, however, affectionate, hospitable, and docile, and the missionaries are encouraged by seeing the old customs constantly changing. Witchcraft murders are less frequent, houses and dress are

more civilized, and education is being sought for its own sake, and paid for. Native licentiates and candidates for the ministry have rapidly increased, and a disposition to self-support has been shown in a remarkable manner. During the past year a rich blessing has rewarded the long-tried and patient workers; 253 names were added to the church rolls, and religion in several of the churches was greatly quickened.

SYRIA.—Missionary work in Syria was undertaken by the American Board in 1818, and conducted by it until the reunion of the Old and New School branches of the Presbyterian Church in 1870, when the members of the New School body, who had constituted a very considerable portion of the supporters of the American Board, gave up their relation to it and became constituents of the Presbyterian Board of Foreign Missions. As it would have been unjust that the American Board with its diminished number of contributors should continue to bear the same burden, and also unjust that those who had so long contributed to its work should be required to renounce all their rights therein, an arrangement was made whereby the missions in Syria, Persia, and West Africa, and—as has been already explained—certain missions to the North American Indians, were transferred to the Presbyterian Board. A slight sketch of the whole period, 1818-1890, follows (see also article on A. B. C. F. M.):

The history of the Syrian Mission begins with the appointment of Pliny Fisk and Levi Parsons as missionaries to Palestine. Mr. Parsons reached Jerusalem in February, 1821, and began the work of distributing the Scriptures, but was before long obliged to withdraw on account of the disturbing influence of the war in Greece. He died in Egypt in 1822. Mr. Fisk, with Jonas King, afterwards so well known as a missionary to Greece, reached Jerusalem in 1823, where they preached and taught until 1825. Their work was broken up by the arrival of the Pasha of Damascus, who came with an armed force to collect tribute. Mr. King soon afterward left Syria, Mr. Fisk died, and the station at Jerusalem was suspended for nine years. Subsequent efforts to revive it were not successful, and in 1844 it was finally abandoned. In the mean time a new station had been established at Beirut, where Messrs. Bird and Goodell were the first missionaries. They occupied themselves with the circulation of the Scriptures, the preparation of useful books, and the education of the young. Eli Smith joined the mission in 1827, but the unsettled state of all the East at that time led the missionaries in the following year to remove for a time to Malta. In 1830 the work was taken up again, and with the exception of another short period of suspension, for a similar cause, has been prosecuted ever since. Notwithstanding the many difficulties, and perils by the plague, cholera, and war, and the intolerance and bitter hatred of the Moslem magistrates and populace, new efforts were put forth and new stations formed. New missionaries arrived, and the work went on through times of quiet and of persecution—seasons of great promise and times when what seemed opportunities for expanded work and permanent growth vanished. But the work as a whole has prospered, and within the last few years especially abundant fruit has been gathered. The press, the school, and the pulpit

have been the means employed. The first printing in connection with the mission was done at Malta, where the A. B. C. F. M. had an establishment in full operation as early as 1826. In 1834 the Arabic portion of the establishment was transferred to Beirut, where its issues have steadily increased in number and value. The Arabic translation of the Bible, prepared by Dr. Eli Smith and Dr. Van Dyck, is now on sale throughout the Mohammedan world.

Educational work has been especially prominent in the Syrian Mission. Schools were begun in Beirut in 1824, when a class of six Arab children was taught by the wives of the missionaries. In 1827 six hundred pupils (of whom one hundred were girls) were in attendance in thirteen schools, established in Mount Lebanon, the interior, and in various cities on the coast. At first only reading and writing were taught, there being no demand for higher instruction, but the great body of readers thus formed caused a demand for books and thus prepared the way for higher schools. Many taught in the common schools became converts to Christianity; Protestantism gained ground, and the other sects were roused to rivalry; the standard of intelligence was raised and knowledge diffused. It was part of the degradation of woman in Syria that it was thought unnecessary, or even dangerous, that she should be taught; but the missionaries received girls into their families; induced them to attend the common schools; and, finally, schools were opened for them. Some of the most important are the boarding-school at Beirut, the Missionary Institution at Sidon, and the school at Tripoli. The total number of schools now in operation is 80, with an attendance of 3,509 pupils, of whom 819 are girls.

At a meeting of the mission in 1861 the project for a Syrian Protestant College was discussed and the plan sketched. This college was opened in 1866. Although an outgrowth of the mission, "missionary instruction having created a demand for it, the plans and prayers of missionaries having established it, and the friends of missions having endowed it," it has been from the first entirely independent of the Board of Missions. A course of medical instruction was soon added to the academic, and medical work is now one of the most important branches of missionary work in Syria. The physicians of the Medical Department of the college have been appointed by the Order of St. John in Berlin, as the Medical Attendants of the "Johanniter Hospital" in Beirut, which is supported by the Order, and served also by the deaconesses of Kaiserswerth. Within the past year about 11,000 cases have been treated by the medical faculty of the college.

The Theological Seminary at Beirut was dedicated in 1883; this institution is under the sole charge and support of the Board of Foreign Missions.

The chief centres of missionary effort are at Beirut, Abeih, Tripoli, Sidon, and Zahleh. In connection with the first are four preaching places, with 2,000 children in the Sunday-schools; in Abeih are 4 churches, 23 preaching places, and 18 Sunday-schools. Tripoli has 15 preaching places and 22 Sunday-schools; Sidon, 25 preaching places and 17 Sunday-schools; and Zahleh, entered in 1872, three churches.

PERSIA.—In 1829 Rev. Messrs. Smith and

Dwight were sent by the American Board to explore the regions of Northwest Persia. They became especially interested in the oppressed Nestorians on the plains about Lake Oroomiah, and upon their representations a mission to Persia, which for many years was known as the "Nestorian Mission," was resolved upon, and in September, 1833, the first missionaries, Justin Perkins and his wife, sailed from Boston, and about a year later reached Tabriz; in 1835 they were joined by Dr. and Mrs. Grant, and the little company formally occupied Oroomiah as a station in November of that year. A few years later Dr. Grant died, but Dr. Perkins was spared to labor with great vigor and usefulness for 36 years. With the help of one of the most intelligent of the Nestorian bishops, Mr. Perkins gave himself to the study of the common language, and, when he had mastered it to some extent, undertook the work of reducing it to writing (which had never yet been done), and the preparation of a series of cards. The first school was opened in January, 1836, in a cellar, with 7 small boys in attendance. This school was the germ of Oroomiah College, and has sent forth scores of devout and scholarly preachers and teachers among the people. During the past year 13 have been graduated from the course of theological study, and have gone out as pastors and evangelists; six have been graduated from the academic course. The school for girls, founded by Mrs. Grant in 1838, has increased to the proportions of a seminary, and is steadily growing in numbers and efficiency. As in the Syrian Mission, educational work was from the first employed as one of the chief auxiliaries, but the preaching of the Word was also regarded as of prime importance, and was at once instituted, the missionaries preaching in their own dwellings, in the homes of the people or in school-houses, until the Nestorian churches were opened to them. Much of the time of the missionaries was given to the villages, utterly ignorant and degraded, in the neighborhood of Oroomiah, and in these places the college students spent the long vacation, conducting schools and pursuing evangelistic labors.

In 1837 a printing-press was sent to the mission by the Board. It proved too unwieldy to be taken over the mountains, and was sent from Trebizond back to Constantinople. Two years later a press which could be taken to pieces had been invented, and one of these, in charge of Mr. Breath, a printer, was at once sent to Oroomiah, and was regarded with great interest and wonder by the people. Since that time many books have been published, and for many years a monthly periodical has been issued. Medical work very early became and continues to be an important feature of the mission. Tabriz, Teheran, Hamadan and Salmas have since been occupied, and new work has lately been taken up among the mountain Nestorians on the borders of Persia and Turkey. For a more extended account of the Persian Mission, see article "Persia."

INDIA.—In May, 1883, the Western Foreign Missionary Society sent the Rev. John C. Lowrie and the Rev. Wm. Reed to India to lay the foundations of missionary work. The selection of the particular field in which work should be commenced was left to their judgment after consultation with friends in India. Reaching Calcutta in November of 1883,

they decided, after getting the best information available, to begin work in Lodiana, a frontier town of the Northwest Provinces, bordering upon the Punjab, which was at that time under the control of Ranjit Singh, a Sikh chief. While Messrs. Lowrie and Reed were detained at Calcutta Mrs. Lowrie died. Mr. Reed's health failed, and the conclusion was reached that he and his wife should return to America; in July, 1834, they took passage in a ship bound for Philadelphia, but three weeks after leaving Calcutta Mr. Reed died. Mr. Lowrie reached Lodiana in November, 1834. From failure of health he was soon obliged to return to America, but the work which he inaugurated has been successfully established in the Northwest Provinces, in the Punjab, and in the Kolhapur Mission, Southern India.

The Lodiana and Furrukhabad missions now comprise the stations of Rawal Pindi, Lahore, Ferozepore, Hoshiarpore, Jalandhar, Lodiana, Ambala, Sabathu, Dehra, Woodstock, Saharanpur, Mazaffarnagur, Furrukhabad, Futtehgarh, Mainpuri, Etah, Etawah, Gwalior, Jhansi, Futtehpore, and Allahabad. These stations are given in geographical, not chronological, order. From Rawal Pindi in the northwest to Allahabad the distance by railroad is 900 miles. Throughout these provinces the same languages are spoken, and missionary work in them is conducted on the same methods; but for convenience of local and general administration the mission is divided as above indicated. The Kolhapur Mission comprises the stations of Kolhapur, Panhala, and Sangli. Lahore, the capital of the Punjab, was regarded as the objective point by the first of the missionaries sent to India, and for many years much of the work done at Lodiana was in preparation for the time when an advance might be made in this direction. This time came in 1849, when the death of Ranjit Singh left the country without a ruler, and the people soon fell into a state of anarchy under the leaders of the army which he had trained, who were so elated with mistaken views of their own power as to resolve on the overthrow of the British dominion in India. For this purpose they crossed the Sutlej into British territory. The conflict which ensued was terrible, and the issue for a long time doubtful; but in the end the Punjab was annexed to the Anglo-India Empire, and the whole of that interesting country was now open to the missionary. Missionary work in all the stations of these missions is carried on in the usual lines; the truth is preached in the chapel and on the highway, books and tracts are circulated, and schools established. Special educational advantages are offered at Lahore, in the college, which, under the usual policy of the church, may soon be separated from the Board and placed on the same footing as the Anglo-vernacular colleges at Beirut and Canton, and in the other excellent schools for boys and for girls. At Dehra is a large boarding-school for Christian girls, in which a training-class for work in the zenanas has recently been formed. There are day-schools also for boys and girls, which have been well attended. Zenana visiting is an important feature of the work at Dehra, 96 zenana pupils having been taught during the last year. The school at Woodstock, of which a fuller account will be found in articles on the Woman's Societies, is well

established, and may be regarded as one of the permanent agencies for the extension of Christ's kingdom in Northern India.

Of the mission stations of the Presbyterian Board, Lodiana, Futtehgarh, and Allahabad were the greatest sufferers in the Mutiny of 1857. The missionaries from Futtehgarh and the adjoining station of Furrukhabad endeavored to reach Cawnpur, were captured on the way, forced to march eight miles to Cawnpur, were detained for a night in the house of their captor, and the following morning, on the parade-ground of the station, fell before the fire of their murderers.

*Kolhapur Mission.*—Kolhapur was selected by the Rev. R. G. Wilder, in 1853, as a centre of missionary operations. His work had been supported for years by friends in the United States and in India, and after he had severed his connection with the American Board it remained independent of any church until its transfer to the Presbyterian Board in 1870. Ratnagiri, on the coast, and Panhala have been occupied as mission stations within a few years. Work was suspended at the former for two years, but is to be resumed as soon as reinforcements can be sent out. The same agencies employed in Northern India are in operation in this mission. Zenana visiting and the work of the medical missionary are prominent features. The Kolhapur Mission being far distant from the Northwest Provinces suffered but little during the Mutiny.

*SIAM AND LAOS MISSION.*—The first visit made to Siam by any representative of the Presbyterian Church was for the same purpose which had already brought other visitors there, namely, to find some door of access to the Chinese; but the Rev. R. W. Orr, having spent a month at Bangkok in 1838, recommended the Board of Foreign Missions to take Siam as a field of effort, not only for the Chinese, but for the Siamese themselves. Accordingly Mr. and Mrs. Buell were sent to Bangkok, arriving there in 1840. After laying a good foundation for future work, Mr. Buell was compelled by the illness of his wife to return home in 1844, and for various reasons it was not until 1847 that his place was filled by others. From that time until the present, continuous work, addressed directly to the native Siamese, has been maintained, although for several years after the arrival of the Rev. Stephen Mattoon and his wife and the Rev. S. R. House, M.D., its foothold seemed very precarious, on account of the active, though secret, opposition of the king, whose despotic influence was so exerted upon the slavish people that none of them could be induced to sell or rent any house to the missionaries. Other difficulties of the same general nature were put in their way, until it seemed certain that they would be prevented from establishing themselves in the country, when the death of the king, in 1851, brought about a change in the whole situation and in all the succeeding history of the country, a change which is directly traceable to the influence of Protestant missions. The man whom the nobles elected to fill the throne was not an ignorant, unmanageable barbarian like his predecessor, but a man who could appreciate civilization, and who claimed to be himself quite a scholar even by European standards. This came from the fact that while still in private

life he had been under the instruction of a missionary of the American Board, which maintained a mission in Siam from 1831 to 1850.

The policy of the new king proved to be very liberal; and during all the years which have intervened since his accession, Protestant missionaries have been accorded very noticeable influence with the government. For many years very slight results appeared, to gladden the hearts of the faithful workers in this field. The first convert was baptized in 1859, twelve years after the arrival of the missionaries, since which time members have been steadily gathered into the churches, and the work, though it may be regarded as largely in its preparatory stage, gives many a token of encouraging success. All the usual forms of Christian effort are employed with diligence and effectiveness; the press affords an agency of especial importance in a country where four-fifths of the men and boys are able to read, and the mission press at Bangkok is constantly sending forth copies of the Scriptures in Siamese,—printed in separate portions, for a complete copy, even in the smallest Siamese type, would make a volume larger than Webster's Unabridged Dictionary,—“Pilgrim's Progress,” tracts, etc.; the “Siamese Hymnal” also proves very serviceable to this music-loving race. Medical work here exerts a twofold influence; as in every land, it opens a way to the hearts of men by its self-denying beneficence, and affords many an opportunity of pointing the sin-sick soul to the Great Physician; it also has the further effect of undermining the native confidence in the efficacy of spirit-worship. The mere fact of finding malaria healed through the use of quinine by one of the native assistants is mentioned as producing a marked impression of this kind, and the employment of incantations and witchcraft for the sick is proven to be false and useless by the scientific medical practice introduced by the missionaries. The opportunities for such service are abundant, Dr. House having in the first eighteen months of his practice treated 3,117 patients. The Siamese are now taking up this work for themselves. In 1881 a hospital for 60 patients was erected and given for public use by a native nobleman, being placed in charge of a native physician who had graduated first from the missionary boarding-school at Bangkok and afterwards from the Medical School of the University of New York. The very existence and operation of such a hospital is a living argument against Buddhism, of unceasing and ever-widening operation. The work of proclaiming the Word is always regarded as of the first importance, and educational work is vigorously prosecuted, with great encouragement to the missionaries because of the interest and approbation manifested by the government. Dr. MacFarland of the mission has been for some years, by appointment of the king, principal of King's College and superintendent of public instruction. In 1843 Petchaburee, 100 miles from Bangkok, was visited by a missionary, who was repulsed by the authorities in the most uncompromising manner; but in 1861, at the urgent request of the governor, a station was formed at this point; two years later a church was organized, which has been steadily growing ever since. School-work is very prominent, and the native ministry began to receive its development at this station. Medical work is also important, and the hospital

is so near the chapel that all patients physically able attend the daily morning service, as well as the preaching of the gospel on Sabbath afternoon. Within the past year 5,500 cases have come under the doctor's care, many of his patients coming from far-distant provinces.

The prime minister of Siam offered three years ago to furnish suitable buildings for a new mission station at Ralburee if the Board would undertake work at that point. Just before the new recruits arrived, the prime-minister died; but he had left in writing the expression of his desire that his plans in behalf of the missionaries might be fulfilled, and through the good-will of the king his wishes were met, and the station was established in 1889.

*Laos Mission.*—Chieng-Mai, the capital of the Laos country, was visited by a deputation from the Siam Mission in 1863. In 1867 and 1868 the Rev. Messrs. McGilvary and Wilson opened a station there, and were soon encouraged by the conversion of a man who had thoroughly studied Buddhism and was dissatisfied with it, while knowing of nothing to replace it; he began to study eagerly the spiritual truths of Christianity, and was soon able to make an intelligent confession of his faith in Christ. Seven other converts were baptized within a few months, but at this point the infant church was brought to a season of persecution and martyrdom. Exercising full control over his own people, though tributary to Siam, the king began to manifest the hostility he had thus far concealed. Two of the converts were arrested, and, on being brought before the authorities, confessed that they had forsaken Buddhism. They were tortured all night, and again examined in the morning, but steadfastly refused to deny their Saviour, even in the face of death. They prepared for execution by praying to Him, closing with the words: “Lord Jesus, receive my spirit!” They were then taken to the jungle and clubbed to death by the executioner; one of them was also thrust through the heart by a spear. The persecution was checked by the death of the king, and the mission was resumed. Another crisis was encountered in 1878, and an appeal was at once made to the king of Siam, which brought for reply a “Proclamation of Religious Liberty for the Laos,” which entirely changed the conduct of the officials.

*Siamese Mission.*—Medical work has received especial attention. The Bethlehem Church was organized in 1880, at a point 9 miles above Chieng-Mai, as the result of an interesting awakening of inquiry among the natives, who had heard of Christianity from relatives visiting the capital. A station has been established at Lakawu, 90 miles from Chieng-Mai, where a very encouraging work is in progress. Maa Dok-Dang Church was organized in 1881, and the four churches of the mission were formed into a Presbytery in 1883. The number of churches at present is 5; membership, 600; number of schools, 6, with an attendance of 195.

*CHINA MISSION.*—Three months after its organization, in December, 1837, the Presbyterian Board sent two missionaries, Revs. J. A. Mitchell and R. W. Orr, to the Chinese Mission at Singapore. Mr. Mitchell died soon after reaching Singapore, and Mr. Orr was compelled by failure of health to return home. Mr. McBride, sent out in 1840, returned for the same reason in 1843. In the same year Dr. Hepburn and Mr. Walter Lowrie were sent out. They trans-

ferred the mission from Singapore to China, reinforcements were sent to them, and a most important agency, the mission press, was established. A special appeal for funds was made by the Board, and as a result a large force of workers was sent to strengthen the mission, and Macao, Amoy, and Ningpo were occupied as stations. The work as at present organized comprises the Canton, Shantung, Peking, and Central missions. Canton was occupied in 1845, and the agencies at first employed were chapel preaching, distribution of the Scriptures, teaching and ministering to the sick. In 1846 a boarding-school for boys was established, and a dispensary was opened in 1851. The first church was organized with seven members in January, 1862. A second was organized in 1872, and a third in 1881. A girl's school was opened in 1872, to which has since been added a preparatory school for younger girls, and a training-school for women. Each pupil in this school commits to memory the entire New Testament, and, in addition to the Chinese classics, the course of study embraces all branches commonly taught in a girl's seminary. The day-schools now established throughout the mission number 32, a large proportion being in Canton itself. The theological school has an attendance of from 15 to 20 students. The remaining stations of this mission are at Macao, on the island of Hainan, and at Yeung Kong; nearly 400 cities and villages have been visited by the Canton missionaries, and in a large number out-stations have been opened. The mission staff is assisted by 3 native pastors, 17 undordained evangelists, 24 native assistants, 37 teachers, and 11 Bible-women. Six medical missionaries, three of them ladies, are on the staff, and medical work constitutes a very important part of the mission; two hospitals and four dispensaries are maintained, in which, and through the visits of the physicians, nearly 50,000 patients have this year been treated. The Canton College, although not sustained by the funds of the Board, is an important adjunct and auxiliary to its work.

*The Central Mission* includes Ningpo (1845), Shanghai (1850), Hangchow (1859), Suchow (1871), and Nanking (1876).

Ningpo, one of the five ports opened in 1842, was entered in 1844 by Dr. McCartee. A few months later he was joined by a large force of missionaries, among them the Rev. W. M. Lowrie, who was in 1847 killed by pirates. The first convert was baptized in 1845, and a church was organized later in the same year. The girls' boarding-school dates from 1846, the industrial school for women from 1861, and the Presbyterian Academy, for the sons of native Christians, and almost wholly supported by the tuition fees and the native churches, from 1881. The boys' boarding-school, organized early in the mission, was removed to Hangchow in 1877. The field covered by the Ningpo station, 200 miles long and from 20 to 100 miles wide, embraces a population of several millions. There are several out-stations, at one of which is a self-supporting church of 111 members. Members of several churches have this year gone out at their own charges to tell the story of Christ's love to their fellow-countrymen. The number of churches connected with the station is 10; number of day-schools, 8. The three centres of missionary effort at Shanghai are at the Missionary Press, the South

Gate, and Hongkew. The first, within the city limits, in addition to the great printing-press, which has become historic, has closely connected with it a church, organized in 1882, and a day-school. The printing work of the mission, begun at Macao in 1844, was removed to Ningpo in 1845; in 1856 the use of separate characters instead of cut blocks was begun, the sum of \$15,000, needed to secure the manufacture of matrices for the type, being furnished by King Louis Philippe, the British Museum, and the Presbyterian Board. After this a type-foundry and electrotyping department were added, and the institution was removed to Shanghai, which possessed superior commercial advantages, in 1860. Since 1876 the press has not only paid its way, but has also brought a large surplus into the mission treasury. Eight presses are constantly running, and 75 men are employed. Much printing is done for other societies in addition to that for the mission of the Board. At the "South Gate," outside the city limits, but in the midst of a dense population, uncared for by any other Society, there are boys' and girls' boarding-schools, a church, and a number of day-schools. Hangchow has two organized churches and a boarding-school, with an industrial department for boys. The work at Soochow is largely that of city evangelization, but five day-schools are kept up by the small missionary force, and itinerating tours are made. At Nanking educational work continues to be the most encouraging feature.

*The Shantung Mission* comprises the stations of Tungchow (1861), Chefoo (1862), Che-nan-foo (1872), Wei Hein (1882), and Chining Chow and Ichowfoo (1889). The people of Tungchow having been found willing to listen to the truth, a station was opened there in 1861, and a native church was organized in 1862. A boys' school was established in 1866. At the close of the twelfth year 31 boarders were reported, 21 of whom were professed Christians. In that year the name was changed to Tungchow High School, and it is now regularly organized as a college. Its religious tone has always been high, and nearly all the students are Christians. Much faithful work is carried on in the out-stations and in the neighboring villages. The boys' boarding-school at Chefoo is an important agency, as are also the girls' school and industrial school for children, and numerous day-schools. Many have been received to the church who became interested in Christianity through what they heard from the children in these schools. In a theological class helpers and preachers receive instruction; and Bible-women, specially trained for their work, are constantly employed in teaching from house to house. During the past year 24 preachers and 4 Bible-women have been employed under the supervision of Dr. Corbett, their work covering a district more than 300 miles in extent. The work in Che-nan-foo has been carried on in the face of much opposition from the higher classes, which has during the past year been more than usually violent. The chapel and dispensary work have been carried on daily; the boys' school has also had its usual number of scholars. Much time and labor are given to the out-station, and to the establishment of village day-schools. At Wei Hein work on the usual lines is prosecuted. The Christians here have met with much persecution, which is gradually diminishing.

Dr. Hunter's dispensary work has been encouraged by good attendance, many of the patients showing interest in religious truth. Connected with Wei Hein are 60 out-stations, where also there is less persecution, and greater respect is shown to foreigners than formerly.

*Peking Mission.*—The hospital at Peking and the medical training-school are doing a very important work. The women's department of the hospital is under the charge of a lady physician and trained nurse sent out this year by the Board. The lady missionaries at Peking, as at other stations, are doing much for the Chinese women, visiting from house to house, and conducting a training-school for them, which it is hoped may result in fitting many of them to be Bible-women. Two churches have been organized; the second, organized in 1888, is under the care of a native pastor, supported by the members. In addition to his support, this little handful of believers, numbering at the beginning of 1889 only 25, has contributed \$100 to benevolent purposes; the greatness of their generosity can be measured only by the depths of their poverty.

*MISSION IN JAPAN.*—The Christian Church was watching with intense interest the steps by which Japan was opened to the civilized world. In 1853 Commodore Perry succeeded in opening the long sealed gates, and in 1855 the Presbyterian Board requested Dr. McCartee, one of its missionaries in China, to visit Japan to prepare the way for missions to that country. Dr. McCartee went at once to Shanghai, but was unable to obtain a passage thence in any vessel to the Japanese Islands, and returned to his work at Ningpo. After three years of waiting, favorable indications were seen, and the new mission was undertaken. Dr. James C. Hepburn and his wife, formerly missionaries in China, and Rev. J. L. Nevius and wife, of the Ningpo Mission, were appointed to commence the work. The latter were prevented from permanently joining the mission by the state of their health and the urgent call for their services in China. Dr. Hepburn and his wife arrived in Japan early in November, 1859, and settled at Kanagawa, a few miles from Yedo (now Tokyo). Here a Buddhist temple was soon obtained as a residence, the idols were removed, and the heathen temple was converted into a Christian temple and church. Public service was established in the home and mission work begun, Dr. Hepburn availing himself of his medical practice to speak to the suffering of Christ, whose gospel he was not permitted to preach. Not being allowed to engage in direct mission work, the missionaries devoted themselves, until further opportunities might arise, to dispensary work, the acquisition of the language, and the distribution of Chinese New Testaments among a small portion of the people who could read that language. On account of the opposition of the Japanese authorities to the residence of foreigners in Kanagawa, Dr. Hepburn in 1862 purchased property for the mission in Yokohama, and removed thither. Soon after Rev. David Thompson joined the mission, and the study of the language and the rough preliminary translation of the Scriptures was pushed forward with great energy and success, and opportunities for other work began to appear. Dr. Thompson was asked to instruct a company of young Japanese in mathematics and chemistry, and was able to

connect with this instruction lessons in Christian doctrines and duties. These young men were soon called away to fill posts in the army, but most of them took with them copies of the Bible in English and Chinese. Though not allowed to open public schools, they were invited to teach in the government schools, and in these and other ways laid the foundation on which they and others might afterwards build. The first edition of Dr. Hepburn's Japanese and English dictionary was published in 1867. Reinforcements joined the mission in 1868, and in 1869 the first converts were baptized. In 1870 the translation of the four Gospels was completed. Up to January, 1872, there had been no regular stated preaching of the gospel to a native audience. At that time, when all the missionaries at Yokohama and the English-speaking residents of all denominations united in the observance of the week of prayer, some Japanese students connected with the private classes taught by the missionaries also were present. For their benefit the Scripture of the day—the Book of Acts was read in course day by day—was extemporaneously translated. The meetings grew in interest, and were continued until the end of February. After a week or two the Japanese were on their knees entreating God that he would give His Spirit to Japan as to the early church and to the people around the apostles. These prayers were characterized by intense earnestness. Captains of men-of-war, English and American, who were present said: "The prayers of these Japanese take the heart out of us." The missionary in charge often feared he would faint away, so intense was the feeling. Such was the first Japanese prayer-meeting, and soon after a church consisting of eleven members was organized by the Rev. S. R. Brown, a missionary of the Reformed Church, who had labored side by side with the Presbyterian missionaries; they now rejoiced in the fruits of their common toil, as the church increased in numbers. From this time rapid progress was made. The year (1872) was also marked by the entrance of the woman's societies into this field. For account of their work see articles on Woman's Societies. In 1874 two churches were organized in Tokyo and Yokohama, which increased in numbers and manifested a readiness to engage in every Christian work. Through their influence many other churches were formed in other cities and towns. In 1877 the "United Church of Japan" was formed, which has established a theological seminary in which many Japanese have been trained for the ministry, and has, through its strong missionary spirit, extended the knowledge of Christianity. In all, 61 churches (with a membership of nearly 10,000) have been organized, of which 22 are entirely self-supporting. The total number of pupils in the schools is 2,260.

*MISSION IN KOREA* (see also article on Korea).—This mission was established in 1884 at Seoul, the capital. The work has prospered from the first; the church already has a membership of over seventy. Eight young men are under theological instruction; four native helpers are employed at out-stations, and four native teachers are under the direction of the mission, which has now a force of 4 ordained missionaries (three of them married), and 1 unmarried lady missionary teacher. The boys' boarding-school has an attendance of 36. Steps

have been taken toward opening a new station at Fusan.

Missions to the Chinese and Japanese in the United States are carried on in San Francisco (1852), Oakland (1877), and Los Angeles, California; in Portland, Oregon; and New York City. Work for the Chinese is also carried on by volunteer workers in nearly all the principal cities of the Atlantic coast.

The Board has for many years extended some aid to the Protestant churches of the Presbyterian faith and order in Continental Europe, and within the past year action has been taken to render this aid more systematic and efficient.

**Presbyterian Church in the United States (South), Foreign Mission Committee.** Headquarters, Nashville, Tennessee, U. S. A.

The history of the missionary work of the Presbyterian Church of the southern portion of the United States runs parallel with that of the northern portion up to the year 1861. At that time, in consequence of the civil war, the Synods of the Southern States united in the formation of a separate body, known as the General Assembly of the "Presbyterian Church in the Confederate States of America," which title, subsequent to the war, was changed to the "Presbyterian Church in the United States."

Immediately on the organization of the Southern Assembly, at Augusta, Ga., in December, 1861, a committee was chosen to conduct the work of foreign missions, with the Rev. J. Leighton Wilson, D.D., as Secretary, and the Rev. Jas. Woodrow, D.D., Treasurer. Dr. Wilson had labored nearly twenty years as a missionary in Africa, but for some time previous to the outbreak of the war had been connected with the Foreign Mission Office of the Presbyterian Church in New York. Dr. Woodrow was a Professor in the theological seminary at Columbia, South Carolina. The Committee was located at Columbia, with the Rev. Jas. H. Thornwell, D.D., as Chairman. Among other distinguished members of that committee were the Rev. Geo. Howe, D.D., and the Rev. Jno. B. Adger, D.D., also Professors, as was Dr. Thornwell, in the theological seminary. The first efforts of the committee were directed to the Choctaws, the Chickasaws, and other tribes of the Indian Territory. During the continuance of the war more than a dozen faithful laborers were sustained in this field; the more prominent of these being the well-known missionaries Drs. Kingsbury and Byington. A number of Presbyterian missionaries, natives of the Southern States, were laboring in foreign lands, and invitations were extended to these, who had originally been sent out by the Presbyterian Board in New York, to become the representatives of the Southern Church in their respective fields. Some of these labored in Africa, others in China, Japan, and Siam. As the outcome of these negotiations, the Rev. Elias B. Insee of Hangchow, China, entered into a correspondence with the committee, which resulted in the establishment of its first mission in foreign lands. This, however, was not until the close of the war. Mr. Insee, who was a member of the Synod of Mississippi, returned to the United States in 1866, was formally appointed, and sailed for his field in China in June, 1867.

In August of the same year the committee appointed Miss Christine Ronzone, a missionary under its care, to Italy, of which country she was a native. She labored first in the city of Naples, but subsequently removed to Milan, where she has ever since conducted a very interesting work. At the meeting of the General Assembly that year the committee was directed to publish a monthly magazine in the interest of the work. The first number of this periodical, "The Missionary," was issued from Columbia, South Carolina, in January, 1868. In the summer of that year the Rev. G. Nash Morton was sent to Brazil with a view to the establishment of a mission; and in September the Rev. Messrs. M. H. Houston, J. L. Stuart, and Benjamin Helm joined the mission in China.

Missions were established in Mexico and Greece in 1874, in Japan in 1875, and in the Congo Free State in 1890. In 1889 the Indian Mission was transferred to the Home Mission Committee. The total number of missionaries now (1891) under the care of the committee is 82; the number of stations established, 18; out-stations, 98; the number of communicants, 2,072; pupils in day-schools, 845; Sabbath-schools, 1,207; number of native ministers, 19; contributions from the native churches, \$4,317. The contributions of the home churches in the support of this work have steadily increased from \$15,000 in 1862, to \$107,000 in 1890.

*Administration.*—The office of the Executive Committee was first established in Columbia, S. C., in 1862. In 1875 it was removed to Baltimore, Md., for increased commercial and financial facilities. In 1889 it was removed to its present location, Nashville, Tenn. The first Secretary was the Rev. J. Leighton Wilson, D.D., who remained in office until his death, in July, 1886. In 1872 the Rev. Richard McIlwaine, D.D., became co-ordinate Secretary, and also succeeded Professor Woodrow as treasurer, the latter having held that office from the establishment of the Committee in 1862. In 1882 Dr. Wilson became sole Secretary, and Dr. McIlwaine (who became President of Hampden Sidney College at that time), was succeeded as treasurer by Mr. L. C. Inglis. In 1884 the Rev. M. H. Houston, D.D., who had for many years been connected with the China Mission, was elected Assistant Secretary. He became full Secretary in 1887, after the death of Dr. Wilson. In 1888 the Rev. D. C. Rankin was elected as Assistant Secretary, to which office that of the retiring Treasurer, Mr. Inglis, was added on the removal of the office to Nashville in 1889.

*Missionary Societies.*—Children's Missionary Societies were first suggested by the Assembly in 1873. Contributions from missionary societies were first reported in 1874, the sum at that time being \$2,100. In the annual report of the committee for that year these missionary societies were specially referred to, and again in 1875, at which time 58 societies were mentioned as in existence, contributing that year, \$4,500. In 1890 there were 440 Ladies' Missionary Societies, 180 Children's Missionary Societies, and 15 Men's Societies, making 635 missionary societies in all. The total contributions from these societies in 1889 amounted to \$27,855. There are also four Presbyterian Unions, including, for more effective work, all the Ladies' Missionary Societies in a given Presbytery. These Unions

exist in the Presbyteries of East Hanover, Wilmington, Lafayette, and West Lexington.

**Missions.**—**INDIAN MISSION.** (See article Indians, American.)

**CHINA MISSION.**—This mission, as has already been stated, was organized in 1867. It includes 4 stations in the cities of Hangchow, Soochow, Chinkiang, and Tsing-Kiang-pu, and 7 out-stations.

**Hangchow.**—The work at Hangchow, conducted by 10 foreign workers, assisted by native helpers, includes preaching and teaching in the city and in the three out-stations, with much itinerant work among neighboring villages and in the country districts. An important feature of the Hangchow work from its inception, more than twenty years ago, has been the excellent school for girls, which now has about 50 boarding pupils. Recently great interest has been awakened in the Linwu district, some thirty miles northwest of Hangchow; and in many other portions of this field there are tokens of rich harvest in store for the laborer. Medical work is a very valuable aid here, as everywhere in China. The church in the Mission Compound has a membership of 60, and there are nearly one hundred members in the out-stations.

**Soochow.**—At this station, opened in 1872, there are 7 foreign missionaries. An important adjunct of the work here has been "The Woman's Home," under the care of Miss A. C. Safford, who died in August last. Regular preaching services are held in the street chapels of the city, and much itinerant work is done along the Grand Canal and in neighboring villages. The missionaries at Soochow have also done valuable work at Wuseih, a city thirty miles north of Hangchow, on the Canal. In Soochow Miss Safford had done a valuable work as an author and a translator of books into Chinese. Her death was a heavy loss to the mission. There are 3 day-schools attended by 60 pupils. The church is yet small, numbering only 6 communicants.

**Chinkiang.**—This city is a treaty port on the river Yangtze, where it is crossed by the Grand Canal, about one hundred miles north of Soochow. The fruits here are yet small, this station having only been opened in 1883, but much evangelistic work has been done in the street chapels, among the boatmen who frequent this large commercial city; and in the towns and villages that line the Grand Canal.

**Tsing-kiang-pu.**—This station was opened in 1887, and its field extends through the northern part of the province of Kiangsu and into the southern portion of Shantung. It includes the district formerly occupied by the English Baptists. As a result of their seed-sowing, many inquirers and native Christians are found throughout this section by the missionaries. At Tsing-kiang-pu resides the only medical missionary of the Southern Committee, Dr. Edgar Woods. His services have been invaluable in the work of the mission.

**ITALIAN MISSION.**—This mission is prosecuted through the boarding and day school conducted by Miss Christine Ronzone, and assisted by Madame Rivoir. Miss Ronzone began her work in the city of Naples in 1867. In 1869 her school was transferred to Brodighiera, near Genoa, and in 1871 to Milan, where it has remained to the present time. All the pupils in the school, a number of whom are Roman

Catholics, study the Bible and attend the Sabbath-school of the Waldensian church. This modest mission has done an excellent work, the fruits of which are found in many portions of Southern Italy and Switzerland.

**BRAZIL MISSIONS.**—On account of the great distances in Brazil, the work of the Southern Presbyterian Church is conducted there through three distinct missions, viz., those of Southern, Northern, and Interior Brazil.

**Southern Brazil Mission.**—One station, Campinas, with 12 flourishing out-stations. Campinas is a city of 25,000 inhabitants, and the mission was opened here in 1869. From the first an important feature of the Campinas work has been the International College, which now has an attendance of about 140 pupils, many of them boarding pupils. Besides the Campinas church, there are organized churches at Jundiaby, Itatiba, Branganca, and other places. This is a fine and encouraging field, and the work makes steady progress. The condition of the churches is good, and the members generally live in a manner that would make them examples to many professing Christians at home. From this important station as a centre the gospel has been preached and the Scriptures put in circulation over a large extent of country. Members of the mission have assumed the task of putting into circulation, either by translation or original composition, at least one book or treatise annually for the support and defence of the gospel in South America. The mission publishes "Pul-pito Evangelico," a monthly magazine, which is doing great good. Recently a new printing-press has been given to the mission for this work.

**Northern Brazil Mission.**—This mission includes three separate stations: Pernambuco, Ceara, and Maranhao.

**Pernambuco.**—This station was opened in 1873, and now has a church with 60 members and 35 baptized children. An important part of the work of Dr. Smith, one of the missionaries at this station, has been the training of native ministers, a number of whom are now laboring most acceptably in the out-stations of this mission. Not only in Pernambuco, which is a city of 140,000 inhabitants, but in many of the surrounding towns, such as Goyanna, Parahyba, and Pao de Assucar, the work is full of encouragement. In these smaller towns there are more than 100 communicants who lead exemplary Christian lives. They also contribute liberally of their substance for the support of the gospel.

**Ceara.**—This station was opened in 1882. Ceara, which is the capital of the state of Ceara, has a population of 40,000 inhabitants. A church building has been commenced in the city, where the membership is about 50, with some 40 baptized children. There are also four other preaching places in this field, at one of which (Mossoro) there are 23 communicants. At this station there are six foreign missionaries, two of whom (ladies) have recently opened a day-school with encouraging prospects.

**Maranhao.**—This station was opened in 1885, and has proved to be one of the most inviting in Brazil. There are four foreign missionaries and a good church-building in the city of Maranhao, and a membership of about 40. Dr. Butler, in addition to his evangelistic labors, has enhanced his usefulness by his medical skill. An interesting work has been done in Alcantara, a town on the opposite side of the

bay from Maranhao. Good use has been made of the press, and articles published weekly in the principal papers of Maranhao have added materially to the usefulness of the missionary.

*Interior Brazil Mission.*—This mission was opened in 1887, its only station being the town of Bagagem, in the State of Minas-Geraes. This place is 360 miles north of Campinas. From it as a centre the missionaries have made repeated and extended tours, especially up the San Francisco River and into the State of Goyaz. In these journeys thousands of miles have been travelled. The missionaries have preached in towns and communities never before visited by a missionary, and large numbers of copies of the Scriptures have been circulated. Everywhere the missionaries have been received most cordially by the people. Their preaching has been largely attended, and many have united with the Protestant church during these evangelistic tours. In no part of Brazil is the field so white to the harvest. One of the most interesting features in the work of interior Brazil has been the publication of "O Evangelisto," a semi-monthly paper edited by the Rev. Jno. Boyle. On these uplands of interior Brazil an old French atheist had owned and published a little paper called "The Echo of the Backwoods," in the prosecution of which work he had trained as his printers two orphan boys. In the course of time Mr. Boyle purchased the old editor's press, and with the aid of the two youthful printers sent forth the first numbers of "O Evangelisto." The paper at once met with such a cordial reception, that from time to time it was enlarged. It now has an extensive circulation in several of the states, and is doing great good. The Executive Committee of Foreign Missions has recently made an appropriation for the purchase of a new press for Mr. Boyle, and will hereafter make annual appropriations for its running expenses.

The Synod of Brazil.—The progress of Protestant missions in Brazil had been so encouraging, that in 1889 the Synod of Brazil was organized, composed of the four Presbyteries of Rio, São Paulo, Campinas and Western Minas, and Pernambuco. This Synod has no ecclesiastical connection outside of Brazil, and includes the churches of both the Northern and Southern Presbyterian missions.

In connection with work in South America, it should be mentioned that in 1869 the Southern church established a mission in the United States of Colombia, with stations at Baranquilla and Socorro. The missionaries at these stations were the Rev. H. B. Pratt and wife, the Rev. J. G. Hall and wife, and Mr. A. H. Irwin. This mission was discontinued in 1878, and Mr. and Mrs. Hall were transferred to the Mexico Mission.

MEXICO MISSION.—This mission was undertaken in 1874, and has proved one of the most prosperous and interesting under the care of the Southern church. This work is carried on in the States of Nuevo Leon and Tamaulipas, with Brownsville, Matamoras, and Linares as bases for evangelistic work. There are now 7 organized churches in this field, which have been constituted a Presbytery, bearing the name of Tamaulipas. The work in Brownsville and Matamoras has been both educational and evangelistic. In both places there are good schools under the care of lady missionaries. All the churches throughout the Presbytery are now supplied by

competent native pastors. The foreign missionaries have chiefly the general direction of the work. This involves extended tours among the ranches throughout the Sierra Madre Mountains. The opening of new railroads in these states has added to the encouraging features of this work. One of these roads, branching off from the Mexican National at Monterey, runs in the direction of Tampico, passing through the towns of Montemorelos, Linares, and Victoria, in all of which towns there are growing churches. The work at Linares has been especially full of encouragement and promise. The native ministry of this mission forms a fine body of faithful men, full of promise for the church in this portion of Mexico. The work has not been prosecuted without its difficulties, and at times the missionaries and their assistants, as well as the church-members, have suffered persecution.

CUBA MISSION.—In response to an earnest appeal from Protestant Christians in Havana, the Executive Committee sent Mr. Graybill of the Mexico Mission to Cuba in the summer of 1890. This visit resulted in the organization of two Presbyterian churches, one in Havana and one in Santa Clara, a town in the interior of the island. Mr. Graybill also licensed and ordained to the work of the gospel ministry Sr. Earisto Collazo of Havana. So full of encouragement is this work, that again in the early part of the present year (1891) the committee sent Mr. Hall to visit these young churches. The result of this visit is not yet known.

GREEK MISSION.—The headquarters of this mission, which was begun in 1874, are at Salonica in Macedonia. The annual report for 1890 says: "The work among the Greeks, which had languished for forty years, began about ten years ago to show some symptoms of life, and within the last five years has advanced more than in forty-five years before. It now shows steady progress: some in Greece, more in Macedonia, more still on the western coast of Asia Minor, and a great deal on the Black Sea. The evidences of this change in the hopefulness of the Greek work are varied. Although so few in numbers and although so recently organized, the Greeks already lead all other natives in the matters of self-support and self-government. The special circumstances which are most encouraging to the thoughtful observer are such as the following: The general reading of the New Testament in the schools and the churches, as well as among the people generally; the increase in the number and quantity of preachers in the old church, as well as the growing dissatisfaction with the services and practices of the ignorant priest; a disposition to recognize evangelicals as not only not traitors, but as patriotic Greeks; the almost hearty welcome given by leaders of influence to missionaries, where a few years ago they were bitterly opposed. There is now an opportunity in Macedonia and Epirus and Asia Minor such as never existed there before. The work there can only be done by Americans, who are not mixed up with politics abroad or embarrassed by state establishments at home. The republican principles of our church are peculiarly acceptable to the infant liberties of Europe. In 1885, when the work in the Greek field was redistributed, there were two church-members in Salonica; in 1887 a church was organized with 10 members. There are now more than 25 regular members, besides 10 who com-

mune with us regularly. There are a Bible depot and 3 colporteurs who help disseminate the truth. We are urged to open schools, and have no difficulty in obtaining houses, which was once almost impossible. Mr. Sampson is a member of the Literary Club, composed entirely of Greeks, in this city (Salonica), and Mrs. Sampson of the Ladies' Society for the Poor,—both by election. Monthly meetings of Christian workers, organized in 1889, have succeeded admirably, and done more than anything else to awaken and sustain an interest in the work generally. The members of the church all attend prayer-meeting regularly, and take active part in praying and speaking. They all contribute with commendable liberality to the church, and all have family worship. They have taken upon themselves the whole responsibility of the Sabbath-school, leaving the evangelist free for other work in the city and out of it."

**JAPAN MISSION.** Stations, Kochi, Nagoya, Tokushima, Okazaki.—This mission was established near the end of the year 1885, by Messrs. Grinnan and McAlpine. The Presbyterian missions of Europe and America act jointly in a council known as "The Council of United Missions." By the advice of this council the new missionaries settled at Kochi, an important city on the island of Shikoku.

**Kochi.**—This city is in the province of Tosa, one of the leading provinces of the empire, and the one which through her liberty-loving citizens has played an important part in the marvelous changes that have taken place in Japan in the last twenty years. Leading statesmen, such as Count Itagaki, warmly welcomed the new missionaries and patronized their schools. With such auspicious surroundings this mission (named the "McPheeters Mission" in memory of the Rev. Dr. S. B. McPheeters) was opened, and its success has surpassed even the most sanguine hopes of its friends. In January, 1886, active work was begun in Kochi, where a small body of native Christians already existed. In one year this band was more than doubled, and the membership of this vigorous young church has now grown to about 600. The congregation has built, without foreign aid, a commodious house of worship, capable of seating 700 persons, and supports its own native pastor. From Kochi as a centre the missionaries visit some twenty places in the surrounding country, where they preach the gospel to large and attentive audiences. In most of these out-stations there is now preaching once a month. When there is no evangelist present, the Christians gather for Bible-study on the Sabbath. At Susaki, the second city of the province, and at Aki, on the road from Kochi to Tokushima, the work is specially encouraging, and strong churches are being gathered.

**Nagoya.**—This is a large city of 250,000 inhabitants. It is situated on the Bay of Owari, on the southeastern coast of the island of Nippon. This important field having been transferred to the Presbyterians by the Reformed (Dutch) Board in the autumn of 1887, Mr. McAlpine at once began work there. The plain of Nagoya teems with a vast population, and is studded with numerous villages and towns yet unreached by Christian influences. The stringency maintained by Japanese officials in reference to passports has prevented the missionaries from laboring in this extensive field as effectively as they could wish.

Nevertheless, at Midzuno, seven miles from Nagoya, a church with 50 members was organized in October, 1889. In the city of Nagoya itself the obstacles to progress have been many, since this city is a great Buddhist stronghold. Nevertheless, after three years of faithful and patient seed-sowing, the missionaries are beginning to reap the harvest. Here also, as in most other Japanese missions, successful school-work is done by members of the mission.

**Tokushima.**—This city of 60,000 inhabitants is the largest and most important on the island of Shikoku. The gospel had never been preached to these thousands prior to the establishment of this station by Messrs. Brown and Cumming in 1889. A church has been organized with encouraging prospects. (See Tokushima.)

**Okazaki.**—In the beginning of 1890 Mr. Fulton of the Nagoya station opened a new station at Okazaki, a city of 25,000 inhabitants, situated in the great plain of Nagoya, and some 30 miles distant from that city. He reports the work here as full of promise.

**AFRICA MISSION.**—For many years the Southern Presbyterian Church had cherished a desire to plant a mission in Africa. During the latter part of his life, the Rev. Dr. J. Leighton Wilson, the father of the mission work of his church, and who had himself labored nearly twenty years in Africa, earnestly laid this matter before the General Assembly; but various obstacles prevented the accomplishment of his heart's desire until he had passed to his rest. In the mind of the Southern Church there was an abiding conviction that because of the large Negro population within her own bounds she was specially called of Providence to undertake this work. Accordingly, at the meeting of the General Assembly in 1889, the Executive Committee of Foreign Missions was directed to take steps looking to the opening of the long-contemplated mission in the "Dark Continent." Early in 1890 the Rev. Samuel N. Lapsley (white), of the Synod of Alabama, and the Rev. W. H. Sheppard (colored), of Atlanta, Ga., were commissioned and sent forth with instructions to found a new mission in the Congo Free State. The appointment of Mr. Sheppard (who has already proved to be a most valuable worker) was of special interest, since he was the first fruits of a long-cherished desire on the part of many in the Southern Church to see some of this race bearing the gospel to the land of their forefathers. He was also the first-fruits, in this direction, of the Theological Seminary in Tuscaloosa, Alabama, which had been established some years before by the Southern Presbyterian Church exclusively for the purpose of training a colored ministry. Proceeding first to England, and then to Brussels in Belgium, they received every encouragement and assistance in preparation for their work. King Leopold himself granted Mr. Lapsley a personal interview, in which he expressed the deepest interest in his mission. They have gone as pioneers, with instructions that their station be sufficiently separated from other missions to give it the character of a thoroughly independent work. They were instructed to seek a locality as healthy as possible, on some highlands removed from the coast, and yet not too distant from the bases of supplies. The lives of these young missionaries have been gra-

ciously preserved thus far, and they have done a successful work in prospecting on the Upper Congo and its large tributary, the Kassai. At last accounts they had not yet found a suitable location for their mission. They have been most kindly received by the English and American missionaries already laboring on the Congo. The Executive Committee contemplates sending a considerable reinforcement to this mission during the year 1891.

**Presidency** (in British India), one of the chief administrative divisions of British India, of which there are three: Bengal, Bombay, and Madras. In the two latter the government is conducted by a governor, appointed by the crown, who is assisted by an executive council in matters of administration, and by a legislative council in making laws and regulations. The local government, thus constituted, is under the general supervision of the governor-general and viceroy of India. The Bengal presidency, much the largest of the three, has no governor and executive council, but is subdivided into several provinces, each with a lieutenant-governor or chief commissioner at its head, who is appointed, not by the crown, but by the governor-general of India. See under the titles Bengal Presidency, Bombay Presidency, and Madras Presidency.

**Pretoria**, a town in Central Transvaal, South Africa, northwest of Wakkerstroom. Mission station of the Berlin Evangelical Missionary Society (1866); 1 missionary, 11 native helpers, 3 out-stations, 665 church-members. S. P. G., 1 missionary. Wesleyan Methodist Missionary Society; 4 missionaries, 2 native helpers, 3 chapels (1 English), 120 native church-members, 3 schools, 97 scholars.

**Primitive Methodist Missionary Society.** Headquarters, Primitive Methodist Book Room, Sutton Street, Commercial Road, George's-in-the-East, London. — The Primitive Methodists are a body which arose in England in 1810. Finding themselves gaining strength, they organized in 1843-44 a foreign missionary society, adopting Canada, New Zealand, and Australia as their fields of labor. Since that time they have strengthened their mission in New Zealand and Australia, and their work has met with success; but some years after it was started they transferred their Canadian stations to the Methodist Church of the Dominion, which has since carried on the work. These home and colonial missions were the only ones carried on by this Society until 1869. In that year a vessel named the "Elgiva," trading between Liverpool and the west coast of Africa, touched at Fernando Po, a Spanish colony in the Gulf of Guinea. The captain and carpenter of this ship were good men, members of the Primitive Methodist Church of Liverpool, and during their short stay at the island, Mr. Hands, the carpenter, called together as many people as he could, and held a prayer-meeting with them. He found a few converts who had joined the English Baptist Church, before the Spanish authorities had expelled Mr. Saker, the missionary, from the island, and these people welcomed Mr. Hands most eagerly, and begged him to stay and teach them, since a change in the Spanish law now made this possible. He could not do this, of course, but promised to try and send them a missionary

when he should have returned home. Upon his having submitted the appeal of these people to the Missionary Committee of the Primitive Methodist Connexion, that body, after careful consideration, granted the request, and in 1870 sent two missionaries, Revs. R. W. Burnett and H. Roe, with their wives, to open a station at Santa Isabel, the chief town of the island. They met with a hearty welcome, and at once began work. In 1871 Rev. D. T. Maylott joined them, and an attempt was made to open a new station along the west coast. The plan met with some difficulties, but in 1873 George's (or San Carlos) Bay was occupied.

Associated with Mr. Maylott in this mission was the Rev. W. N. Barleycorn, one of the first converts of Santa Isabel, and his work among the Bubis was very successful, the first convert of the west mission being baptized in 1874.

The work at Santa Isabel had grown so much that several new missionaries had been sent out and a station had been opened at Banni on the northeast coast of that island, and thither in 1884 Mr. Barleycorn was removed, and remained for a short time; but difficulties with the Spanish authorities made his return to George's Bay necessary. No new stations have recently been occupied, but a steam-launch has been started, which runs between Fernando Po and the mainland, and along the coast of the island, touching at various points, and carrying, besides the passengers, all the mail and freight of the mission and of the government officials. At present there are in the mission 3 foreign missionaries, 1 native missionary, 3 other helpers, 3 chapels, 120 communicants, 3 schools, 13 teachers, 188 scholars. These missions have been steadily growing, although the hostility of the Roman Catholic priests and trouble with the civil authorities have often caused serious annoyance. But of late a better understanding with Spain has been established, and arrangements for increased educational advantages have been made, and the work bids fair to increase both in extent and usefulness.

**SOUTH AFRICA.**—In 1869 an appeal for help came to the Missionary Committee from Aliwal, North, a town and district in Cape Colony, bordering on the Orange Free State. The committee decided to send a missionary to that locality, and in 1870 Rev. H. Buckenham sailed for Port Elizabeth, Cape Colony, and travelled overland to Aliwal. Here he settled, at first conducting his services in a Dutch church which had been placed at his disposal; but in 1871 he opened a Sunday-school in a room fitted up for that purpose, and later commenced first an evening and then a day school for native pupils. Before long a church and parsonage were built, and Mr. Buckenham remained until 1875, when the Rev. John Smith succeeded him. In 1883 Rev. John Watson was sent out, but both he and Mr. Smith returned to England, and the present missionary, Rev. G. E. Butts, took charge of the work at Aliwal and its branch station, Jamestown. A native pastor, the Rev. John Msikinya, a graduate of the Lovedale Institution (see Lovedale), is associated with the missionary in the work at Aliwal, and his labors are proving most successful. A new training-school for native youths has been opened, which it is the purpose of the mission to make, as far as possible, self-sustaining.

**Zambezi Mission**—It had long been a wish of the Missionary Committee to send a mission-

ary party to the Upper Zambesi, but owing to the expense of pioneer work in such a difficult region, they had not been able to collect funds sufficient for the purpose.

In April, 1889, however, the Rev. H. Buckenham (formerly missionary at Aliwal, North) and Mrs. Buckenham, with Rev. A. Baldwin and Mr. J. Ward, sailed for Africa, and a few months later had gone from Cape Town to Aliwal, where they at once began to make preparations for their journey to their new field. Probably several of the native preachers at Aliwal will accompany them, and before the close of 1890 a new mission of the connexion will be begun at some station on the Zambesi.

**Princetown**, a town of South Central Trinidad, almost due east of San Fernando, and southeast of Concord. Mission station of the Presbyterian Church in Canada; 2 missionaries, 1 female missionary, 63 communicants, 138 school-children.

**Probbolingo**, a town in Central Java, southeast of Cheribon and southwest of Samarang. Mission station of the Christian Reformed Missionary Society (of Holland), 1867; 690 church-members.

**Prome**, a city in the district of Pegu, Burma, India, on the Irrawaddy, 166 miles north-northwest of Rangoon. Climate temperate, healthy. Population, 28,000 Buddhists. Language, Burmese. Mission station of the American Baptist Missionary Union (1854); 1 missionary and wife, 1 other lady, 16 native helpers, 6 out-stations, 4 churches, 243 church-members, 3 schools, 300 scholars.

### **Protestant Episcopal Church in the United States, Domestic and Foreign Missionary Society.**

Head-quarters, 21-26 Bible House, New York City. —The American Protestant Episcopal Church is indebted for its existence, under God, to the Church of England. Being a mission itself, generations passed before it felt strong enough to found missions on a large scale either within or without its own borders; its advancement being hindered by the expense and trouble of sending men to England to be ordained, and the prejudices following the Revolutionary war. However, in the beginning of this century interest in missionary work became manifest in the American Church, one of the prime movers in the cause being Bishop Griswold, who in correspondence with the Secretary of the Church Missionary Society suggested that an American clergyman be sent out by that Society into the foreign field. The English Society, however (1817), urged the formation of an American Board, and offered pecuniary aid. This advice was acted upon, and the Domestic and Foreign Missionary Society was instituted in 1820, the Rev. J. R. Andros being the first of the American clergy to offer himself for the foreign field.

Although organized in 1820 as a Society it was not until 1835 that it assumed its present character, and became but another name for the Church herself. Previous to that time the administration of the Society's work had been committed to a Board of Directors, who through its Executive Committee had made several attempts to found missions in heathen lands, but had only succeeded so far as to appoint a lay

teacher in Africa and two clergymen to China. They had, however, sent two clergymen to Greece in 1830, to labor among the nominal Christians in that country. In 1835 a change was made in the organization of the Society, which provided that the Society should be considered as "comprehending all persons who are members of this church." This action placing general mission work immediately under the direction of the church, was hailed with enthusiasm, the newly awakened interest being particularly manifested in the marked increase in the contributions.

Such were the beginnings of the Foreign Missions of the Protestant Episcopal Church of America. The first missionaries of the church were the Rev. J. J. Robertson and the Rev. J. H. Hill, and their wives, who were sent to Greece in 1830; but upon the reorganization of the Society in 1835 the work immediately began to assume greater proportions, and now is carried on in five foreign lands, where the work increases yearly in magnitude and importance, while the home interest is continually manifested in the generous contributions and general missionary enthusiasm.

**Constitution and Organization.**—The Board of Missions, which meets triennially, consists of all the bishops, and the members for the time being of the House of Deputies to the General Convention, the delegates from the Missionary jurisdictions, the Board of Managers, and the Treasurers of the Domestic and Foreign Committees. The bishops and the treasurers are members of the Board of Managers by virtue of their respective offices. There are, besides, fifteen clergymen and fifteen laymen elected by the Board of Missions. Of these, seven clergymen and eight laymen serve as the Committee for Foreign Missions.

**Development of Foreign Work.**—The first field chosen by the Society immediately on its organization was Africa, the field being one of great promise, and opportunities being offered for labor, due to the efforts of the American Colonization Society. The first missionary was appointed in 1822, but did not go; a second, appointed in 1828, died after his passage was engaged; and it was not until 1830 that work was actually begun there, in Monrovia, where the American Colonization Society had founded a colony of free colored people.

In 1830 Greece was chosen as a field for the work of the Society, since it was a nominally Christian country, but one where general Christian intelligence and education were sorely needed. Athens was decided upon as the most favorable point for location, for by its central position in regard to the whole Greek population, its facilities for communication with them, and its healthy climate, it promised to be an eligible missionary station.

The cause of missions in China, which under the guidance of the Church has assumed such important proportions, was indebted for its initial impulse to the devoted zeal of the Rev. Augustus Foster Lyde, who, though prevented by his early death from carrying into effect the one great longing of his life, to bear the gospel to the Chinese, inspired others with the enthusiasm which gave rise to the Chinese mission. In 1834 the Society voted to make China a field for missionary labor, and in 1835 Rev. F. R. Hanson and the Rev. H. R. Lockwood were accepted as laborers for that field.

The expedition of Commodore Perry in 1852, followed by the treaty between the United States and Japan in 1854, and the opening of the ports of Hakodati and Simoda, opened Japan to the introduction of Christianity. Through the firmness of the United States consul-general, Townsend Harris, permission to teach Christian doctrine and hold Christian service was secured, and in 1858 the first Christian worship in Japan for nearly two and a half centuries was held at Consul Harris's house. In 1859 Rev. Messrs. C. M. Williams and J. Liggins, the first Protestant missionaries to Japan, were sent there by the Society of the Protestant Episcopal Church of America.

The work in Haiti was due to the interest and labor of the Right Rev. James Theo. Holly, a bishop of the church, of African descent. While in deacon's orders he obtained permission of the Foreign Committee to examine the field in Haiti, and having been ordained a priest, in 1861 sailed with a missionary colony for Port-au-Prince. In 1865 the mission was transferred to the Society of the Protestant Episcopal Church, and became one of their fields of active labor.

CHINA.—The China Mission dates from the landing at Canton of the Rev. Messrs. Hanson and Lockwood in 1835. They proceeded, however, to Java, to labor there, at Batavia, among the Chinese. The third missionary, the Rev. W. J. Boone, M.D., reached Batavia in 1837. In February, 1840, he really began work on Chinese soil, by the opening of a station at Amoy. Four years later he was consecrated as the first bishop of the Anglican communion in China. In 1845 the mission moved from Amoy to Shanghai, and in 1846 Mr. Kong Chai Wong, afterward a clergyman, was baptized, the first convert, on Easter Day. Since his baptism the work has spread marvellously, gradually gaining ground along the coast and in the interior. In 1860 the plan of opening the work in the interior was carried into effect, and two missionaries and their wives, after some difficulty, succeeded in fairly establishing a station at Chefoo. In 1868 another station was opened in Wuchang, capital of the province of Hupeh, in the very heart of the empire, from which point a population of 1,200,000 could be reached. The work now carried on in thirty-one stations is educational, evangelistic, and medical, and is scattered over the northern and central part of the vast empire.

JAPAN.—This mission was established in 1859 by the Rev. Messrs. C. M. Williams and J. Liggins, who were the first Protestant missionaries to settle in the empire. The first baptism was reported in 1866. The work for the first fifteen years of the mission was little more than learning the language, so great was the opposition experienced from the government and the bitter feeling on the part of the people. But in 1872 occurred the removal of the edicts against the Christians, and the release from imprisonment and the return from banishment of thousands of native Christians; and from this time the work has been carried on without danger or interruption. Until 1874 the Japan Mission was under the jurisdiction of the Bishop of China, but in that year, owing to the increased extent of both fields, it was decided to separate them into two dioceses. Rev. C. M. Williams, then Bishop of China, was appointed Bishop of Japan, and a new bishop set over China. The

work is carried on in Tokyo and Osaka, and the towns in the vicinity of each. Japan is a promising field, and there is great need of workers, the principal difficulty the mission has had to contend with being the lack of a sufficient staff of capable missionaries.

HAITI.—The Board's connection with Haiti dates from 1865, when the financial responsibility for the work at Port-au-Prince, carried on by Rev. J. Theodore Holly, was transferred by the American Church Missionary Society. It was conducted from that time until 1874 as a mission, when the church in Haiti was recognized under certain conditions by the General Convention, and Dr. Holly consecrated as its first bishop. The work has been constantly hindered by fire, war, pestilence, and famine; yet, considering the very limited resources at any time at the command of the bishop, the work has been exceedingly successful. By action of the House of Bishops taken in 1883, the church in Haiti was reorganized as an independent church, but nevertheless regular assistance is given by the Society to it as a church in communion with the Protestant Episcopal Church.

AFRICA.—The mission work of this church in Africa is confined to the Republic of Liberia. Mr. and Mrs. J. M. Thompson (colored), residing at Monrovia, were the first persons employed by the Society. They were appointed as missionary teachers in 1835, and in 1836 Rev. Thomas S. Savage, M.D., the first foreign missionary, landed at Cape Palmas. During the early years of the mission frequent difficulties occurred between the colonists and the native "bushmen," and the missionaries and mission property were often in danger. In 1843 troubles arose which compelled the missionaries at Cape Palmas to abandon the town and take refuge on a U. S. ship, and the school at Cavalla, an out-station, had to be closed. The next year found the work going on quietly, but in 1845 the disturbances again threatened the mission; still in spite of the political troubles there were substantial proofs of the progress of the mission. In 1849 the cornerstone was laid of the first Episcopal church edifice of Liberia, and in 1850 Rev. John Payne was appointed Missionary Bishop of Cape Palmas and the parts adjacent. The work gradually extended its borders from this time, with the exception of the years of financial trouble at home during the civil war, when, owing to the reduced support, the mission was obliged to discontinue work at some of the stations and curtail it at others. The principal native tribes with whom the missionaries come in contact are the Grebos in the northern, the Bassas in the central, and the Veys in the southern section of the country. The work is now carried on in Cape Mount, Monrovia, St. Paul's River, Bassa, Sinoe, Cape Palmas, and Cavalla.

GREECE.—The work in Greece was begun at Athens in 1830 by the Rev. J. J. Robertson and the Rev. J. H. Hill and their wives. The principle on which the mission was established was that of not attempting to make proselytes, or to withdraw the people from their own church, but simply to spread scriptural truth among them in the expectation that this would lead eventually to the reformation of the church by the Greeks themselves. The work was begun by establishing schools, and a printing-press set up at Athens, which last, how

ever, had to be given up on account of the expense. In 1837 a station was begun on the island of Crete, which had to be given up at the end of a few years. In 1839 the Rev. Dr. Robertson removed to Constantinople with a view to working specially among the Greeks, but the object of the mission was afterward extended to the other Eastern churches. The mission in Greece is wholly educational; for fifty years the average attendance on the schools has been five hundred, and it is worthy of remark that more than half of these have been girls. The work is now confined to the city of Athens, and is carried on by Miss Marion Muir, assisted by 11 Greek teachers and 3 Greek student teachers, the number of scholars being 510, 136 of whom are boys and 374 girls.

**Provençal Version.**—The Provençal belongs to the Græco-Latin branch of the Aryan family of languages, and is a dialect of Southern France. Towards the close of the twelfth century a version of the Scriptures into this dialect was made by Waldo and his disciples. A copy of his version was presented to the Pope at the Lateran Council of 1179, but the work was condemned and prohibited by the Council of Toulouse in 1229, because it was written in the vernacular. Many copies were in consequence destroyed, but one copy was conveyed to England, and deposited by Cromwell in the library of the University of Cambridge. It now appears to be lost. There are, however, MSS. extant at different libraries, which may be traced back to one archetype, from which all seem to have been made. Such MSS. are the Dublin, the Grenoble, the Zurich, Lyons, and Paris. An edition of the Gospel of John, prepared after these MSS., was published by Dr. Gilly in 1848. The report of the British and Foreign Bible Society for 1884 makes the following statement: At the request of a liberal supporter interested in the peasantry of Cannes, the same Society agreed to publish one Gospel in the Cannes patois, to which the country people are attached. The work of translating the Gospel of Luke was committed to Mons. Amouretti, a student of the University of Paris. As the translation, however, was found incomplete and unsatisfactory, a version of the Gospel of Mark was prepared by Pastor Pesquet in the Languedoc dialect of the Canton La Salle St. Pierre, Gard. The translation, which was examined and revised by the Rev. Dr. Duncan Craig of Dublin, was issued by the British Bible Society in 1887.

**Province Wellesley**, a strip of territory on the west coast of the Malay peninsula, opposite Penang, 45 miles in length with an average width of about 8 miles, including a total area of 270 square miles. It forms part of the settlement of Penang (q.v.), and with it is a part of the British Colony of Straits Settlements (q.v.). The S. P. G. has a station among the 71,000 people, mostly Malays.

**Pudukattai** (Poodocottah, Puducotta), a town in Madras, India, 28 miles southeast of Trichinopoly; is unusually clean, airy, well built; small, but having a fine mosque, a palace, and several temples. Population, 15,384, Hindus, Moslems, Christians. Mission station S. P. G. (1858); 2 native pastors, 1,547 church-members.

**Puebla**, a city in Mexico, 76 miles east-

southeast of Mexico City, 25 miles northeast of the volcano Popocatepetal. The sacred city of Mexico, containing many religious and charitable institutions. Mission station Methodist Episcopal Church (North); 2 missionaries, 2 female missionaries, 8 native helpers, 243 church-members, 136 scholars. Methodist Episcopal Church (South); 1 missionary, 1 native pastor.

**Puerta Plata**, a seaport town of San Domingo, West Indies, on the north coast, 100 miles north-northwest of Santo Domingo City. Population, 3,000. It lies on the slope of a mountain by the shore of a crescent-shaped bay. The harbor has good anchorage, but shallows rapidly towards the shore. Mission station of the Baptist Missionary Society; 1 missionary, 77 church-members, 37 day-scholars, 149 Sabbath-scholars.

**Punjab** (British India), one of the five provinces going to make up the presidency of Bengal, in India. It is the most northerly of all the territories of Hindustan; its highest northern point is in latitude 35°, its most southern, 27° 39'. Its limits of east longitude are 69° 35' and 78° 35'. The area of that portion of it under British administration is 106,632 square miles; population (1881), 18,850,437. But there are 34 native states whose territory is intermingled with that of the British possessions—all of which are under the political supervision of the Punjab Government, though each has its own native chief (see article Native States, where these relations are explained more at length), and the area of these swells the total area of the Punjab to 142,449 square miles, and its aggregate population to 22,712,120. The Punjab is governed by a lieutenant-governor, under the general supervision of the governor-general and viceroy of India. The province—British and native together—comprises one-tenth of the territorial extent and furnishes one eleventh of the whole population of all India. It contains one-fourth of the Mohammedan population, but only one twentieth of the Hindu. The name means "Five Waters," and is derived from the fact that its territory is intersected by five great Himalayan rivers; these are the Sutlej, the Beas, the Ravi, the Chenab, and the Jhelum. The Indus River, into which these all flow, and which runs near the western (political) boundary, and the Jumna, which forms a part of the eastern (political) boundary, describe a course outside the territory to which the name was originally given; but that name has recently been made to cover the entire province placed under the administration of the local government. On the north the Punjab extends to the great range of the Himalayas, and on its north-western corner extends into that area where the Himalayas unite in vast mountain masses with the other immense ranges of Central Asia. North and northeast it touches the independent kingdom of Cashmir, and also the frontier of Chinese Tibet. South it touches Sind and Rajputana; and on the west it comprises a part of the Trans-Indus territory extending to the Sulaiman Mountains, which run north and south-west of that river, and form the boundary between British possessions and those of Afghanistan in the north, and Baluchistan in the south. The famous Khyber Pass extends through these mountains and is the natural door-way from India into Afghanistan, or from the countries of the northwest into India, and it was through

this pass that the early Aryan invaders must have entered India, from whom are descended the present Hindu race, and whose earliest religious system has developed into the surprising and cumbrous growth of Hinduism and Buddhism. Later, through that same pass, came Alexander the Great and his armies. In the 10th and 11th centuries of our era, and later, the Mohammedan invaders, who in time extended the sway of Islam over the whole of India, and founded great dynasties whose ruins exist at Delhi, at Agra, at Haidarabad, at Bijapur and elsewhere, threaded the same defile; but the English—the last and greatest conquerors of India—came through another entrance, even by the gateways of the sea.

Thus the history of the Punjab is of exceeding variety and interest. So extensive and so various is it, that it must here be left almost wholly untouched. Suffice it to say that here was the original Indian home of the Aryans; here the Vedic rites were first practised, and here probably the Vedas written; here Hinduism began its development; and hence did the Hindu race, as it swelled to larger size and power, emerge for the conquest first of the great Gangetic valley, and then of all the Deccan and Southern India. The beginning of this Hindu history cannot be later than 1500 B.C., and may be earlier. Here also the Mohammedan power in India first took root. Lahore was the first Mohammedan capital, after a time Delhi was occupied as their imperial city, and later still Agra, by a few of the Mogul emperors in the 16th and 17th centuries.

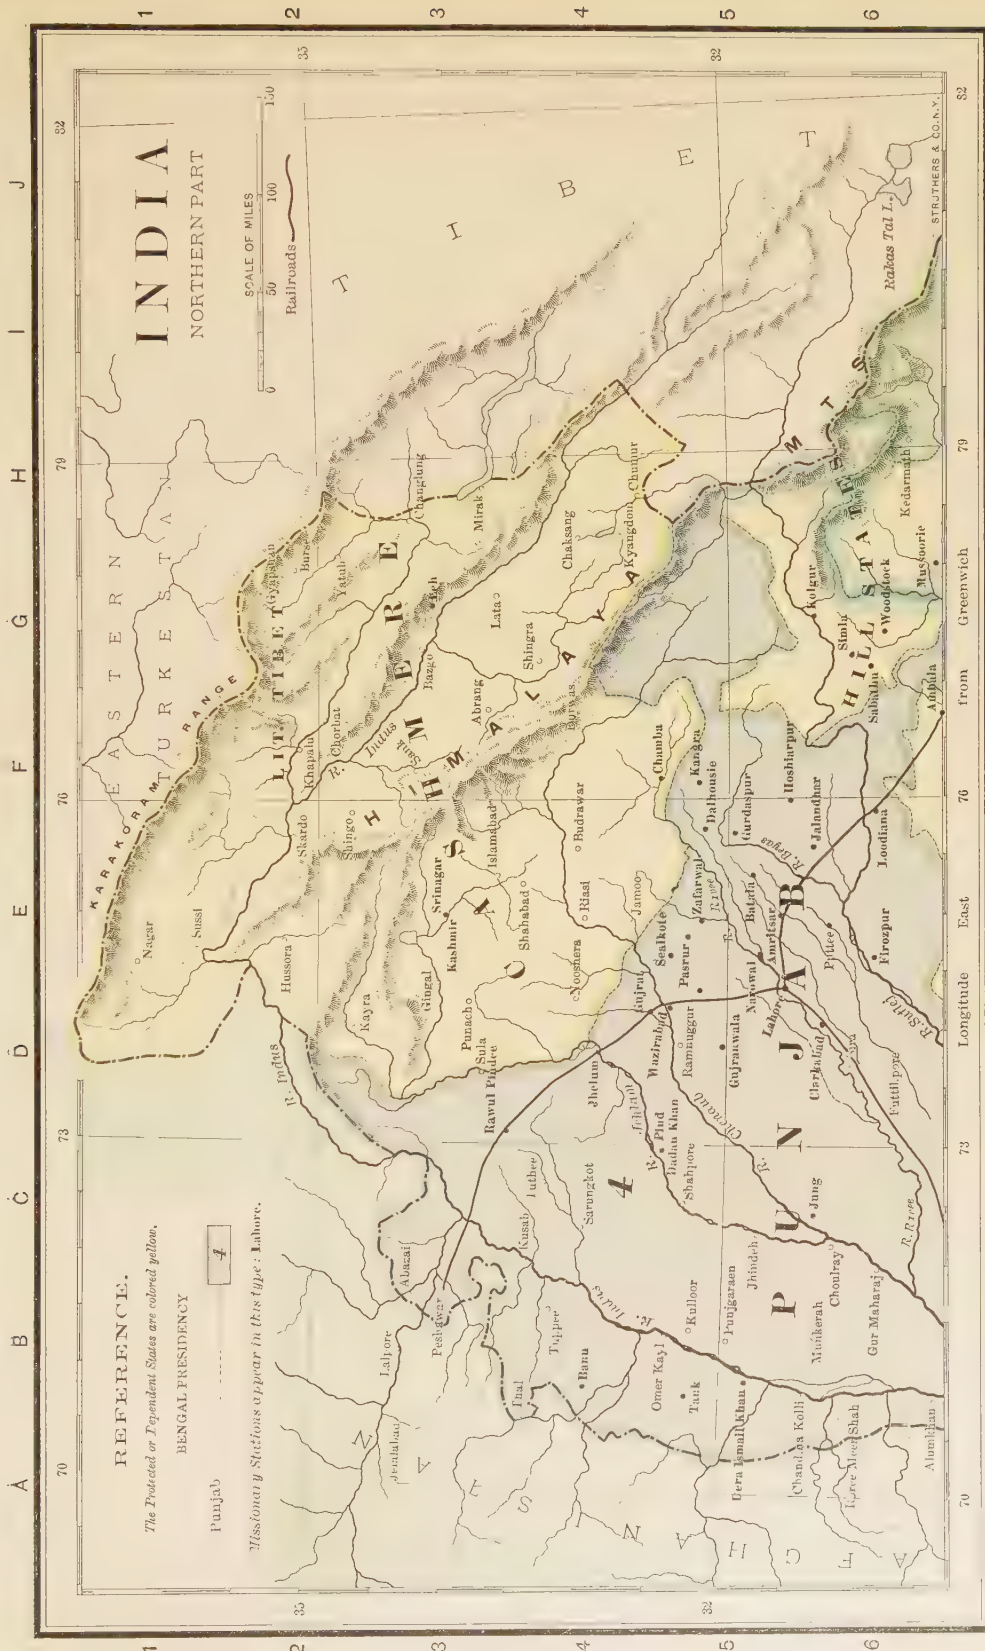

The city of Delhi, which indeed lies outside of the natural area of the Punjab, though now within its political area, stands on the site of Indraprastha, a prehistoric Hindu capital, the foundation of which is said to go back to the 15th century B.C. Lahore, which is now the capital of the Punjab (population in 1881, 149,369), was founded probably early in our era, but became the capital of the early Mohammedan emperors, and grew greatly in size and importance under their sway. Amritsar is the chief city of the Sikh religion (population 151,896). Early in the 16th century there flourished one Baba Nanak, who was born near Lahore, and who taught a pure form of Monotheism—devotion was due to God alone; forms were of small account; both Hindu and Mohammedan worship was acceptable. He gained a large following, and a succession of teachers or *gurus* perpetuated his leadership among the people. Their power became so great that it drew the attention of the Mohammedan emperors, who undertook to quell the rising sect. Meantime Amritsar had been founded, and the temple—the sacred centre of Sikhism—had been built. The Sikhs—as they were called, meaning “Disciples” of Nanak, their first *guru*—suffered greatly for several generations, and were several times defeated in battle; but in the last century, as the Moslem power grew weaker, theirs grew stronger, and during the last quarter of the last century they were virtually masters of the Punjab. Early in the present century Ranjit Singh, an able adventurer of this sect, assumed the headship, and consolidated the power of his people into a strong kingdom, with Lahore as its capital. He made a treaty with the British, whose power by that time had crept up near to the confines of the Punjab. But his successors made inroads on British territory, with the

inevitable result of war, defeat, and finally annexation. It was in 1849 that the Punjab was finally made a part of the English dominions. The treaty was signed by the young king of the Punjab, the Maharaja Dhulip Singh. Among other things, it was stipulated that the famous diamond Kohinur should be given up to the Queen, and it has since reposed peacefully among Her Majesty's crown jewels. The Maharaja received a pension, and retired to England, where he settled down as an English nobleman. Latterly he has engaged in intrigues against the government, of which he now professes himself repentant. After the mutiny the Punjab was made a lieutenant-governorship. The history of its connection with the great mutiny need not here detain us. It must be enough to say that, through the exertion of the chief English officials, the rebellion was promptly quelled and it was possible to send effective aid from that province to the assistance of the English army operating against the mutineers at Delhi.

Classifying the people by religions, nearly 56 per cent are Mohammedans; about 38 per cent Hindus; nearly 6 per cent Sikhs. In round numbers, there are 10,500,000 Mohammedans, 7,000,000 Hindus, and 1,000,000 Sikhs. These were the figures of 1881. There are nearly 36,000 Jains, and over 33,000 Christians, of whom less than 4,000 in 1881 were natives. The number is considerably greater now. The preponderance of Mohammedans is explained partly by the fact of early and long Mohammedan possession of the Punjab by rulers of that faith (as just described), and partly by its propinquity to the Mohammedan countries on the northwest, whence immigration is so easily accomplished. Peshawar is the city of next importance to those already named. It stands west of the Indus, in that part of the Punjab which was once Afghan territory. Its population was nearly 80,000 in 1881. It is the chief station on the northwest frontier, and its proximity to the territory of Afghanistan, peopled with its wild and violent mountain clans, makes it one of much importance.

The people of the Punjab are largely agriculturists. A sixth of the population of British Punjab is thus returned—over 3,000,000. The commercial and artisan classes number nearly 1,500,000. The rainfall is slight; in some parts of the province artificial irrigation is resorted to with good results. The rivers swell with the melting of the mountain snows, and when they subside leave well-watered strips of alluvial land enriched with the fresh deposits of each season. Education is in a tolerably forward state. It is stimulated somewhat by the existence of the Punjab University, which dates only from 1882, with which a number of colleges are affiliated. In 1883-4 there were 2,227 schools of all grades in operation, with 125,906 pupils; 348 of these schools were for girls, and the attendance at them was 10,588. The language of the Hindus is Punjabi—allied to Hindi. Hindustani and Persian are used by the Mohammedans. The Afghans speak Pashtu.

Missionary work in this province began in 1834. The American Presbyterians were first on the ground, and their earliest station was at Lodiana, where, besides the usual work of preaching, schools were at once begun, and a printing-press established, from which have since issued multitudes of books and tracts, including Bibli-

cal translations. Many other places have since been occupied. The Church Missionary Society occupied Amritsar in 1851. In 1870 that Society began a theological school at Lahore for training native preachers, which was the first school of the sort in India, it is said, to include Hebrew and New Testament Greek in the curriculum of study for native Christian students. Rev. T. Valpy French, afterwards the first Bishop of Lahore, was the first principal of the school, which he conducted with great success for several years. The same Society has occupied several stations in the Trans-Indus territory, as near the line as possible, with a view to using them as bases of movement upon the unevangelized regions of Afghanistan and Beluchistan. Peshawar was occupied in 1855 as a centre of Afghan missionary work. The United Presbyterians of America have a mission in the Punjab, in Sialkot, and adjoining districts. The Church of Scotland has a station at Chamba. Several leper asylums have been founded in connection with one and another of these missions, but these are now managed by the "Mission to Lepers in India"—a society founded in 1874 by Mr. W. C. Bailey, formerly connected with the Church of Scotland's mission, whose sympathy for these unfortunates was profoundly stirred, and who has devoted himself to the work of ameliorating their condition, both bodily and spiritual. His Society has asylums in many other parts of India besides the Punjab. The Moravians, true to their instincts of selecting the most difficult, laborious, and apparently unpromising fields, started a mission in 1855 at Kyelang, far up among the Himalayas, though in British territory, among the Tibetan mountaineers. Their work has involved severe hardship and unusual self-denial, but it has not been without its direct results. Circumstances have impelled the Punjab missionaries to labor among Mohammedans probably to a greater extent than has been attempted elsewhere in India. More than half the population being Mohammedans, opportunities have been constantly presented for meeting them, which it has not seemed right to disregard, although there has not been hope of great success. Several of the missionaries of the Punjab have studied the religion of Mohammed profoundly, and have published scholarly works in elucidation of it, while not neglecting the preparation of other works designed to commend Christianity directly to the Moslems themselves. Their labors have resulted in the conversion of many Mohammedans, some of whom have become able and fearless preachers of the gospel. The literary labors of Dr. Pfander, one of these missionaries, whose controversial works against Islam have won him renown in India as well as without its borders, deserve special mention; and among the living, Rev. T. B. Hughes, formerly at Peshawar, and Rev. E. M. Wherry, late of Lodiana, are among those who have contributed through their writings greatly to the comprehension of Mohammedanism, and added to the facilities of missionaries who undertake to cope with it.

**Punjabi or Sikh Version.**—The Punjabi belongs to the Indic branch of the Aryan

family of languages, and is spoken in the province of Punjab, North India. A translation of the Bible into this language was undertaken by Serampore missionaries at a very early period, and was published in 1811. In 1832 a second edition was undertaken. Of the Old Testament only Genesis to Ezekiel was translated and published since 1820. A new translation was undertaken by the Rev. J. Newton in connection with American missionaries, and in 1850 Genesis, Exodus, the Psalms, and the New Testament were published by the British and Foreign Bible Society at Lodiana.

(Specimen verse. John 3 : 16.)

ਕਿਉਂਕਿ ਪਰਮੇਸਰ ਨੈ ਜਗਤ ਨੂੰ ਅਜਿਹਾ  
ਪਿਆਰ ਕੀਤਾ, ਜੇਉਸ ਨੈ ਆਪਲਾ  
ਇਕਲੋਤਾ ਪੁਤ੍ਰ ਦਿਤਾ; ਤਾਂ ਹਰੇਕ ਜੇ ਉਸ  
ਪਰ ਪਤੀਤ, ਤਿਸ ਦਾ ਨਾਸ ਨਾ ਹੋਵੇ, ਸਗਹਾਂ  
ਸਦੀਪਕ ਜੀਉਲ ਪਾਵੇ ।

**Pure Literature Society.** Headquarters, 11 Buckingham Street, Adelphi, Strand, London, W. C.—This Society was established in 1854 for the purpose of increasing the circulation of pure literature throughout the United Kingdom and its colonies. This it endeavors to effect (1) by the publication of a catalogue of periodicals, books, and prints which the committee consider useful and good; (2) by grants from this catalogue of libraries at half-price; (3) by acting as an agency for the selection and distribution of desirable publications in order to supply persons, schools, and institutions, at home and abroad; and (4) by correspondence with managers of publications, either in praise or kindly remonstrance.

The Society's catalogue now contains the names of 4,548 books, each of which was carefully examined before being placed on the list. Library grants have been made to soldiers, sailors, policemen, mutual-improvement societies, etc., and to the English in France, Germany, Belgium, Switzerland, Italy, Holland, Denmark, Egypt, Turkey, Austria, and Jerusalem. Similar grants have been made to the Channel Islands and the British colonies. Books at half-price have been granted, to the value of £63,176, to 7,762 libraries.

**Puri**, the chief town of the district of the same name in Bengal, India, is situated on the coast, covers an area of 1,871 acres, and is a city of lodging-houses. Its ordinary population (22,000) is almost entirely Hindu, but during the great festivals of Jagannath, which are held here, there are 100,000 pilgrims added to the ordinary residents.

Mission station of the General Baptist Missionary Society, together with Pipli (q.v.). The work is carried on principally in the time of the festivals, by means of colporteurs and street-preachers.

**Purulia**, capital of the Manbhum district, Bengal, India. Population, 5,695. It has good public buildings, a hospital, and considerable trade. Mission station of the Gössner Missionary Society; 606 church-members.

Q.

**Queenstown**, a town in Northeast Kaffria, South Africa, northeast of Engotini and west of St. Mark's (Transkei). Mission station of the S. P. G.; 1 missionary.

**Queretaro**, a town 110 miles northwest of Mexico City, Central Mexico, situated on a plateau among hills 6,000 feet high, and separated from its suburbs by a small stream. The streets are well laid out, the houses regular, and the whole city one of the finest in the republic. Mission station M. E. Church (North); 1 missionary and wife, 1 school.

**Quetta**, a town in the western part of the Punjab, India, west of Dera Ghazi Khan and southwest of Dera Ismail Khan. Mission station of the C. M. S. among the Afghans; 1 missionary, 1 physician, 12 church-members.

**Quichua Version.**—The Quichua belongs to the South American languages, and is used in the interior of the Argentine Republic. A translation of the Gospel of John was undertaken by the Rev. J. H. Gybbon-Spilsbury of the South American Missionary Society, which was published at Buenos Ayres in 1880 for the British and Foreign Bible Society, in an edition of 1,000 copies. Another edition was issued after that time, and up to March 31st, 1889, 2,000 copies were disposed of.

(Specimen verse. John 3:16.)

Pachacmackca-chicacatami runacunata munafca, chay Zapallay-Churinta kokeurca, tucuy paypi yllie, mana huafunanpac, ullay causay-tari apinanpac.

**Quillota**, a town of Chili, South America, on the railroad connecting Valparaiso and Santiago. Population, 1,500. Mission station of the Presbyterian Church (North); 1 missionary and wife, 1 native preacher.

**Quilon**, a town and historic port in Travancore, India; is one of the oldest towns on the Malabar coast, from whose re-foundation in 1019 A. D. Travancore reckons its era. It was long one of the great ports of Malabar, and its ancient history goes back to the record of the primitive Syrian Church in India. Population, 13,588. Mission station L. M. S. (1821); 20 out-stations, 1 missionary and wife, 10 native helpers, 279 church-members, 28 boys' schools, 531 scholars, 2 girls' schools, 181 scholars.

**Quitta**, formerly a Danish, now a British, fort and town on the sea near the east point of the Gold Coast, Africa. Mission station of the North German Missionary Society.

**Quop**, a town in North Borneo, a little southeast of Sarawak, near the northern coast. Population, 700. Mission station of the S. P. G.; 2 missionaries, 150 communicants.

R.

**Ra**, one of the Banks Islands, New Hebrides, Melanesia; has a Melanesian mission station since 1884, with 31 church-members.

**Rabai or Kisulutini**, a station of the C. M. S. (1846) in equatorial Africa, not far to the northwest of Mombasa, on the east coast. Has 1 missionary, 2 female missionaries, 190 communicants, 201 scholars.

**Rabinowich, Joseph**, a Jewish evangelical preacher in Kishinew, Russia. (See article Jews.)

**Ragharapuram**, a town among the Telugus, in East Madras, British India, on the Krishna River, south of Dummagudiem and northwest of Masulipatam. Mission station of the C. M. S.; 1 missionary, 2 native pastors, 347 church-members, 8 schools, 112 scholars.

**Rahuri**, a town in Ahmadnagar district, Bombay, India, 25 miles north of Ahmadnagar City. It has a railroad station and a weekly market. Population, 4,304. Mission station of A. B. C. F. M.; 1 missionary and wife, 37 native agents, 23 out-stations. S. P. G. (including Sangammer); 120 communicants, 1 boarding and 13 day schools, with a total of 311 pupils.

**Raiatea**, a pretty town in the Society Islands, extending for two miles along the margin of a bay. Agriculture and mechanical arts

have been introduced by the missionaries with happy effect. Mission station L. M. S. (1816); 1 missionary. As the western group of the Society Islands, to which Raiatea belongs, is not under the French protectorate, the Protestant mission has not been disturbed here.

**Rai Bareli** (Roy Bareilly), a town in Oudh, Northwest Provinces, India, 48 miles southeast of Lucknow; possesses many interesting specimens of architecture, the principal being a strong, spacious fortress. Population, 11,781 Hindus, Moslems, Christians, etc. Mission station Methodist Episcopal Church (North); 1 missionary and wife, 5 other ladies, 10 native helpers, 40 church-members, 14 day-schools, 347 scholars, 29 Sabbath-schools, 800 scholars.

**Rajamahendri** (Rajahmundry), a historic town in Madras, India, on the bank of the Godaveri River. Population about 20,000. The surrounding country is rich and the people are prosperous. A mission station was opened here in 1844 by the North German Missionary Society, but the work was transferred to the General Council of the Evangelical Lutheran Church (U. S. A.) in 1851. Has 1 missionary, 91 scholars.

**Rajasingamangalam**, a town in Madras, India. Mission station of the S. P. G.; 9

native workers, 27 out-stations, 142 church-members, 6 schools, 169 scholars.

**Rajkot**, a city in Gujarat, India, a little north of the peninsula of Kathiawar. Climate tropical, 115° F. Population, 20,000, Hindus, Moslems. Language, Gujarati. Mission station Irish Presbyterian Church (1841); 1 missionary and wife, 13 native helpers, 1 church, 12 church-members, 5 schools, 249 scholars.

**Rajputana**, a vast territory in the north-west of India, which derives its name from the Rajput clans who inhabit it. The word "Rajput" means "son of a king;" and the Rajputs trace their origin from the princely families among the original Aryan invaders of India. Some of these clans have had their abodes here from time immemorial. The invading armies of Mohammedans, after the 11th century, shut them up within its borders, where, owing to the desert and difficult character of a great part of the territory, they were safe from further intrusion. The exact boundaries of Rajputana it is difficult to give. In a general way it may be said to lie between Sind on the west, the Punjab on the northwest, the Northwest Provinces on the northeast and the Maratha states of the Gaikwar, Sindhia, and Holkar on the south. Its limits of north latitude are 23° and 30°, and of east longitude 69° 30', and 78° 15'. Its area is supposed to be about 132,000 square miles, containing a population of over 10,500,000 people. Within this area lies the British Commissionership of Ajmere-Merwara (q.v.), of which both area and population are included in the totals just given, and 20 native states (mostly Rajput—though at least one is Mohammedan) all under the general supervision of the paramount British power, though each is ruled by its own chief. (See article on Native States, where the relations between these states and the British Government are more fully explained.) The population is prevalently Hindu, only about nine per cent being Mohammedan, and about half as many Jains—who are more nearly Hindus than anything else. Those of other faiths furnish a mere sprinkling in the total mass. There are many wild jungle tribes—especially Bhils, of which any exact enumeration is well nigh impossible; the Bhils, however, are supposed to number nearly 170,000, included mostly among the Hindus, whose religion they follow. These figures are those of 1881.

Much of the territory of Rajputana, especially in the western part, is mere desert. The southeastern portion is more fertile. The chief city is Jaipur (population in 1881, 142,578), capital of the native state of the same name. This is said to be the finest of modern Hindu cities, and is laid out on a regular plan, with streets of different widths crossing each other at right angles, with sewers, street lights and water, a college, hospitals, and other appliances of civilization. The Raja of Jaipur is a very intelligent ruler, who takes pride in the progress of his people and the adornment of his chief town. Missionary work in Rajputana is in the hands of the United Presbyterian Church of Scotland, and dates from 1860. The stations are Jaipur, Ajmere (q.v.), Nasirabad, Deoli, Beawar, Todgarh, Udaipur, Alwar, and Jodhpur. Much attention has been given to medical work; and the diligence of the missionaries in relieving distress during a famine in

1869 gave them a firm hold upon the hearts of the people. There is a mission press at Ajmere, and a strong corps of missionaries.

Education is said to be making fair progress, though female education is neglected. The Rajputs, who have given their name to the country and who constitute its aristocracy, furnish only about half a million of the population.

**Ramah**, a town on the northeast coast of Labrador, west of Zoar. The most northerly of the mission stations of the Moravian Brethren (1871); 2 missionaries. There are as yet no native preachers, but good work is being done in building up the native church.

**Ramah**, or **Ramah Key**, a small island in the lagoon, fifteen miles south of Blewfields, Mosquito coast, Central America. Mission station of the Moravian Brethren.

**Ramahyuck** (i.e. Ramah—our home), a town on the southeast coast of Victoria, Australia, 120 miles east of Melbourne. Mission station of the Moravians (1862); 1 missionary and wife. The success of this mission in civilizing, educating, and Christianizing the blacks has been more marked even than in Ebenezer (q.v.), and the work is steadily progressing. The sewing-machine and the harmonium may be found in the huts.

**Ramaliene**, a Hermannsburg station in the Mariko circle, Transvaal, South Africa, with 232 church-members.

**Ramapatam**, a town on the Bay of Bengal, India, between Nellore and Ongole. Climate not unhealthy, but generally debilitating. Mission station of the American Baptist Missionary Union (1870); 1 missionary and wife, 1 other lady, 25 native helpers, 1 church, 470 church-members, 1 theological seminary, 110 students, 1 school, 45 scholars.

**Ramnad**, a town in Madura, Madras, India, 125 miles northeast of Cape Comorin. Population, 10,519. Mission station of the S. P. G.; 2 missionaries, 6 native pastors, 16 native helpers, 1 church, 7 schools, 260 scholars.

**Rampur-Beauleah**, a town in Bengal, India. Mission station of the Presbyterian Church of England; 1 medical missionary, 2 female missionaries.

**Rangiora**, a town in New Zealand. Mission circuit of the United Methodist Free Churches; 1 itinerant, 3 local preachers, 92 church-members, 182 Sunday-school scholars.

**Rangoon** (Rangun), the capital of Lower Burma, is situated on the left bank of the Rangoon River, 26 miles from the sea. It was annexed by Great Britain after the war of 1852. Large sums of money have been expended in improving the city, and the European quarter contains many fine buildings, though the native town is not much improved. Population (1881), 134,176. Burmese, Mohammedans, Christians, and others. Buddhism has here its stronghold, and the city is noted for the number and splendor of its temples and dagobas or shrines. The most magnificent and venerated one is the Shway Dagon, or Golden Dagon dagoba, said to be 2,300 years old. It is heavily decorated with gold, and is the receptacle of relics of the

last four Buddhas, including eight hairs of Gautama.

Much internal and foreign commerce is carried on in Rangoon, as it has communication by rail and by water with the upper provinces. An English newspaper is published here. Mission station of the A. B. M. U. (1813; see article on A. B. M. U.); Burman department; 2 missionaries and wives, 7 female missionaries; Sgau-Karen, 2 missionaries and wives, 1 female missionary; Pwo-Karen, 1 missionary and wife. Shan Mission, 1 missionary and wife; Theological Seminary, 2 missionaries and wives; College, 1 missionary and wife; Eurasian boys' school, 1 female missionary; Mission Press, 1 superintendent; total, 28 missionaries and assistants; Burman Mission, 7 out-stations, 9 native preachers, 4 churches, 451 church-members, 5 Sunday-schools, 231 scholars, 7 schools, 231 pupils; Karen Mission, 23 out-stations, 70 native preachers, 80 churches (76 self-supporting), 4,434 church-members, 2 Sunday-schools, 150 pupils, 51 schools (49 self-supporting), 1,622 pupils.

S. P. G. (1862); 4 missionaries, 4 churches, 561 Burmese church-members, 511 natives of India, 23 Karens, 20 Chinese, 2 boys' boarding-schools, 350 boys, 5 boys' day-schools, 1,136 boys, 1 girls' school, 35 girls, 2 mixed schools.

Methodist Episcopal Church (North), 1878; 3 missionaries, 3 female missionaries; English work—1 chapel, 132 members, 1 high-school, 175 pupils, 2 Sunday-schools, 200 scholars; Tamil and Telugu—49 members, 1 Sunday-school, 31 scholars, 1 day-school, 45 scholars; Burmese, 5 members.

Leipsic Missionary Society (1878), 172 members.

**Raniganj**, a town in Bengal, India. Mission station of the Wesleyan Methodist Missionary Society; 2 missionaries, 2 chapels, 15 church-members, 45 Sabbath-schools, 208 day-scholars.

**Ranikhet**, a town and military sanitarium in the Northwest Provinces, India, on the southern slope of the Himalayas, a little west of Almora. Climate temperate. Population, Hindus, Moslems. Language, Hindi. Natives prosperous, uneducated as yet, but honest and loyal. Mission station L. M. S. (1869); 1 missionary and wife, 14 native helpers, 3 out-stations, 2 churches, 26 church-members, 2 schools, 95 scholars, an asylum for lepers.

**Rankin, Henry**, b. Newark, N. J., U. S. A., September 11th, 1825. He was the eighth of ten children, religiously trained by godly parents, converted while in his junior year in Princeton College, and there, in his seventeenth year, resolved to be a missionary to the heathen. After his graduation in 1843 he studied theology for six months with Dr. Todd at Pittsfield, Mass. The following year he spent in the theological seminary at Auburn, and then entered the seminary at Princeton, graduating in 1847. He was ordained in 1848 by the Presbytery of Elizabeth; sailed October 7th, the same year, for China as a missionary of the Presbyterian Board, reaching Ningpo early the following year. In that city, containing a population of 300,000, and among the villages, with tens of thousands more, he labored with success until 1856, when Mrs. Rankin's failing health compelled him to return

to the United States. While at home he visited almost every State in the Union, presenting in the churches, seminaries, colleges, and schools the claims of the foreign missionary work. Mrs. Rankin's health being restored, they returned to China. But in 1860 her health again made a return to America necessary, while he remained for two years at his work, alone. Civil war then raging in China, and the Taiping rebels approaching the city of Ningpo, the missionaries, who knew their hostility to idolatry, deputed two of their number, one of them Mr. Rankin, to seek an interview with the commander-in-chief in behalf of the Christians in the city and suburban villages. He was promised safety from death and pillage for all the Christian Chinese. This promise was kept when the city was captured, and the idols were destroyed, and many of the people perished. In 1862 Mrs. Rankin returned to find her husband greatly prostrated from his continued work in the unhealthy climate of Ningpo. Though suffering much, he labored on till April, 1863, when he was advised to return home. Unwilling to leave China, he was persuaded by Dr. McCartee to go to Tungchow, in the healthy province of Shantung. He arrived there in May, and lingered till July 2d, 1863, when, among loving friends, he passed away.

**Ranchi**, a town in Bengal, India, with a population of 12,000; was made a mission station of the Gössner Missionary Society in 1844. Their work was mainly among the Kols, some of whom came to the town and asked to see Christ in person before they took any decisive stand. In 1869 a division took place in the mission, and a great part of the mission force left Gössner and took service under the S. P. G., which now has a bishop of Chota Nagpur resident at Ranchi, which is the head-quarter for its Chota Nagpur Mission (see Nagpur, Chutia). The two societies are now working in harmony.

**Rarotonga**: see Hervey Islands.

**Rarotonga Version**.—The Rarotonga belongs to the Polynesian languages, and is vernacular to the people of Hervey or Cook's Islands, numbering somewhat less than 10,000. The islanders speak seven dialects, but the Rarotongan language alone has been used by the missionaries in printing. In 1827 the Rev. John Williams, the discoverer of the island, accompanied the Rev. C. Pitman to Rarotonga, and remained with him a year. These two missionaries translated the whole of the New Testament (except two books by Rev. A. Buzacott, who had joined Mr. Pitman in 1828). The first complete edition of 5,000 copies of the New Testament was carried through the press in England at the expense of the British and Foreign Bible Society by Mr. Williams during his visit to England (1835-38). The first edition of the entire Bible was carefully edited by Mr. Buzacott during his stay in England (1847-51), at the request of the British Bible Society and 5,000 copies were printed and disposed of in three years. In 1855 the Rarotongan Bible was reprinted with a few alterations, under the care of Revs. William Gill and Thomas Metter. The edition consisted of 5,000 copies. In 1872 the British Bible Society issued a third and greatly improved edition of 5,000 copies. It was edited by the Revs. E. R. W. Krause and

George Gill. A thoroughly revised edition of the Bible in 8vo, with marginal references and stereotyped, was issued for the British Bible Society by the Rev. W. Gill during his stay in England in 1886. This revised standard version is in a great measure a return to the original translation made by Williams, Pitman, and Buzacott, with this difference—that thousands of foreign words in native dress have given place to native equivalents, thus rendering the book more intelligible. The edition consisted of 4,000 copies. Up to March 31st, 1889, there were 22,973 portions of the Scriptures disposed of.

(*Specimen verse.* John 3: 16.)

I aroa mai te Atua i to te ao nei, kua tae rava ki te oronga anga mai i tana Tamaiti anau tai, kia kore e mate te akarongo iaia, kia rauka ra te ora mutu kore.

**Ratnapura**, a town in Ceylon, on a navigable river, 45 miles east of Colombo. Mission station of the Baptist Missionary Society; 1 missionary and wife, 5 native helpers, 8 out-stations, 21 church-members, 109 scholars.

**Rauch, Henry**, a missionary of the United Brethren to the North American Indians in 1740. Soon after his arrival in New York he heard that a delegation of the Mohican Indians had arrived in the city to treat with the government. On visiting them he found them in such a state of inebriety that he could not converse with them; but waiting patiently till they were sober, he inquired of two of them, named Tschoop and Shabash, whether they wished a teacher to settle among them and teach them the way of salvation. He agreed to go with them to their village (Shekomeko) on the borders of Connecticut, about 25 miles from the Hudson River. For a long time he persevered in his work, only to meet defiance and ridicule. After twelve months the two Indians he had met in New York were converted, and the white Christians at once became interested in his work on account of this wonderful circumstance, and Rauch was invited to preach to them. These encouraging prospects continued only a short time. Soon some unfriendly whites instigated the savages to threaten his life if he did not leave the place. He withdrew for a time to the house of a farmer, where he held the position of a teacher. He could not give up the work among the Indians, and often returned to Shekomeko to see them. His persistent efforts, patience, and fortitude at last gained for him the respect of the savages, and many true conversions followed. The regeneration of Tschoop was remarkable, as he had been one who had done most to alienate the affections of the Indians from their teacher, but now did all he could to restore harmony, and express to others his earnest belief in the truths he had heard.

Count Zinzendorf visited this station in 1742, and witnessed the baptism of Tschoop and Shabash. The mission was strengthened, new workers were sent to its aid, and the conversions were many. In 1743 ten of the Indians at Shekomeko were converted, and partook of the communion. A chapel was built for public worship, and at the close of the year sixty-three had been baptized in this mission alone. Up to this time the missionaries had experienced very

few difficulties; but in 1746 the white people in the neighborhood, who had failed in their efforts to draw the Indians away from their teachers, now began enlisting their own countrymen in the overthrow of the mission. Numerous persecutions now followed the missionaries, compelling them to serve in the militia, from which service they were exempt as ministers, and at last an act was passed forbidding them to instruct the Indians on pretence that they were connected with the French. All efforts to improve this state of affairs proved fruitless, and the Brethren with sorrowful hearts retired to Bethlehem.

**Rawal Pindi**, a city in Punjab, India. Because of its broad, straight, handsome streets, and its excellent drainage and sanitary arrangements, it is said to present a cleaner appearance than any other town in Northern India. Trees have been freely planted, and give the place a very pleasing appearance. Population, 26,735; Moslems, Hindus, Sikhs, Jains, Christians, Parsis. Mission station Presbyterian Church (North); 2 missionaries, 1 female missionary, 2,257 school-children.

**Read, Hollis**, b. Newfane, Vt., U. S. A., August 26th, 1802; graduated at Williams College 1826; taught a year after graduation in the Academy of Bennington; studied theology at Princeton Seminary; was licensed by the Franklin Association, Massachusetts, May 18th, 1829; spent a short time at Andover Seminary; was ordained at Park Street Church, Boston, September 24th, 1829; married Caroline Hubbell, of Bennington, Vt. Sailed August 2d, 1830, as a missionary of the A. B. C. F. M., for India, reaching Calcutta December 25th, and Bombay March 7th. His field of labor was Ahmadnagar. Failure of Mrs. Read's health caused his return in 1835, and prevented his again engaging in mission work abroad. He spent two years as agent of the Board, and preached and taught in a number of places. He died at his son's residence in Somerville, N. J., April 7th, 1887, and was buried in Bennington, Vt. One thus speaks of him: "Of great industry and perseverance, in earnest on all moral questions, he had also an inquisitive mind which ever delighted in the progress of the arts and sciences. He was full of interest in new things until the last."

**Rebmann, John**, b. Germany; was appointed in 1846 by the C. M. S. to the East African Mission. On his arrival at Mombasa arrangements were made by him and Dr. Krapf for commencing a mission among the Wa-Nikas, and Kisulutini (Rabai), fifteen miles inland, was selected for the station. The people gave their consent for a mission, assuring the missionaries of their friendship and protection. They found the place more healthful than Mombasa, but the people exceedingly ignorant, superstitious, intemperate, sensual, and cruel. They now began the journeys in the interior which led to the remarkable East and Central African explorations. They found a new country highly favorable for missionary labor, and three groups of mountains from 4,000 to 5,000 feet high, enclosing the Taita country, containing 170,000 people. In 1847 Mr. Rebmann made a journey to Kadiaro in the Taita country, 100 miles from the coast. In 1848 he explored the country beyond the Taita, called Jagga or Chagga, 300

miles inland, the Switzerland of East Africa, travelling on foot for seven days in a thorny jungle infested by wild beasts. On May 11th he discovered Kilima Njaro, a mountain as large as the Bernese Oberland, and proved since to be 18,700 feet high. He was reminded of the air and scenery of the Jura Mountains in the Canton of Basle. In his second journey he found King Manking friendly, but when he went again in 1849 he found him very treacherous, plundering him and his native attendants of almost everything, so that he was obliged to return. The object of these journeys is thus explained by Rebmann: "We wished to pave the way for evangelizing Eastern Africa by making ourselves acquainted with its unexplored countries, their manners, modes of thought, languages, government, etc., by at least naming the name of Christ where it had never been named before, and by explaining to the natives the general character of our objects." Dr. Krapf having gone to Europe, Rebmann was left alone at Kisulutini. In 1856 he was driven from the place by an incursion of the Mosai, who destroyed the station, and dispersed the Wa-Nika people under instruction. Retiring to Zanzibar, he continued his linguistic studies for two years, and then returning to his old station, resumed his labors. For many years he was there alone, and in 1873 Sir Bartle Frere found him, quite blind, with a dozen converts, absorbed in his dictionaries and translations, which he prepared with the help of his faithful native attendant, Isaac Nyondo, son of Abe Gunga, the first convert of the mission. When the mission was reinforced in 1875 he returned home. An attempt to restore his sight was unsuccessful. He took up his abode near Dr. Krapf in Konthal, and died October 4th, 1876, after a missionary service of twenty-nine years. He translated Luke's Gospel into Ki-Swahili, and compiled also Ki-Nika and Ki-Nyassa dictionaries. Rebmann and his associate Krapf, though much occupied in exploring and discovering, were, above all, missionaries. "We came to Africa," wrote Rebmann, "without a thought or wish of making geographical discoveries. Our grand aim was but the spreading of the kingdom of God." Yet their labors led to great results. Their remarkable journeys into the interior contributed to all subsequent geographical and missionary enterprises in Eastern Africa. After discovering the two snow-capped mountains Kilima Njaro and Kenia, a map was prepared from native information, showing a great inland sea two months' journey from the coast, which led to the journeys of Burton, Speke, and Grant, later to the travels of Livingstone, and the expeditions of Stanley and Cameron. Their investigations into the languages of East Africa laid the foundation of our present knowledge of them, and their dictionaries and translations have been of great value to subsequent scholars.

**Reeve, William**, b. England, 1794; studied at Gosport; sailed April 22d, 1816, as a missionary of the L. M. S. to India; stationed first at Bellary. In January, 1821, accompanying Mrs. Reeve to Madras, on her way to England for health, he remained in Madras, occupied in the revision of the Kanarese version of the Old Testament. He returned in October to Bellary, leaving again for Madras in January, 1824, to arrange for printing his Kanarese and English

dictionary. The same year he sailed for England; re-embarked for India in 1827, and was stationed at Bangalore. In 1831 he went to Madras to superintend the printing of his Kanarese and English dictionary, which being completed, he returned to Bangalore. In 1834, on account of ill-health, he left with his family for England. In 1836 he became pastor of the Congregational Church in Oswestry. He died at Bristol February 14th, 1850.

**Reformed (Dutch) Church in America, Board of Foreign Missions.** Headquarters, 26 Reade Street, New York, N. Y., U. S. A.—This Board was organized in 1832 by the act of the General Synod of the "Reformed Protestant Dutch Church," as it was then called. This was not, however, the beginning, but rather the outgrowth, of its interest in missionary work, and of its effort and prayer for the conversion of the heathen. As early as 1643 missionary work was carried on by several of its ministers among the Mohawk Indians, many of whom were converted and baptized.

In 1816 the church united with the Presbyterian and Associate Reformed churches in forming the United Missionary Society, which sent missionaries to the Indians, until 1826, when it was merged in the A. B. C. F. M. In 1832 the General Synod elected "The Board of Foreign Missions of the Reformed Protestant Dutch Church," which, though operating through the American Board, was allowed to conduct its missions according to the ecclesiastical polity of the church. It continued its connection with the American Board until 1857, when an amicable separation took place, which was due to no dissatisfaction, but to a growing conviction that more would be accomplished for the salvation of souls and the glory of Christ if the two Boards acted independently. In the same year the American Board transferred to this Board the mission at Amoy in China, and the Arcot Mission in India, with the individual missionaries composing them. The contributions, which were in 1857 but \$10,076, rose the next year to \$25,034; and have since gone on increasing, till in 1887-8 they reached the sum of \$155,381, of which about \$50,000 were given to endow a theological seminary connected with Arcot Mission in India.

In 1875, in accordance with a recommendation of the General Synod, "The Woman's Board of Foreign Missions of the Reformed Church in America" was organized. Its objects were to awaken a deeper interest in the work of foreign missions among the women of the church, and to act as an auxiliary to the Board of the church. In 1880 it assumed the support of the work of that Board for women and girls in all the mission fields, including the maintenance of the several seminaries for girls in China, India, and Japan. Its contributions have steadily risen as the work has increased, and have always been more than sufficient for the purpose named. In 1875 it received \$2,891; in 1889, \$17,437; and in the fifteen years of its existence, \$161,741.

**Development of Foreign Work.**—The foreign missions of the Reformed Church have been five in number, of which four are now maintained. The earliest mission was established on the island of Borneo in 1836. Four missionaries, with their wives and a single lady,

sailed for Borneo in that year, and after spending a year at Batavia, by direction of the government, were allowed to proceed to their destination. Two stations were established at Sambas and Pontianak, with schools and preaching services in three languages. The first missionaries were joined at different times by five others, and part of the force began work among the Chinese colonists in Borneo. In 1844 two of the missionaries, Messrs. Pohlman and Doty were transferred to the more promising field of Amoy; others were obliged, from ill-health, to return home, and the mission was abandoned.

CHINA.—The Mission of the Reformed Church in Amoy was the first in that field. It was commenced by Rev. David Abeel, D.D., in 1842, when Amoy, at the close of the opium war, became an open port, and was reinforced in 1844 by Messrs. Pohlman and Doty, who had been laboring among the Chinese colonists in Borneo.

The district occupied by the Amoy Mission is about sixty miles square, and has a population of 3,000,000. In this district are three stations and nineteen out-stations and preaching places. There are at present in the mission six ordained missionaries and one unordained, and nine ladies (two unmarried). The first church was organized with eleven members in 1851, and there are now (1889) in the field eight churches, of which five are self-supporting, with a total of 861 communicants. The contributions from these churches during the year amounted to \$2,367.66.

Medical and educational mission work is carried on by the missionaries. During the year past a hospital and dispensary has been built in the new station of Sio-ke. Connected with the hospital force is a native helper, and to all who come for treatment and medicine the gospel is preached. The educational work of the mission is represented by nine day-schools with 120 scholars, a Bible-school where native women are fitted to become Bible-women, three seminaries, one male and two female, and a union theological seminary, which is carried on by the American Reformed and English Presbyterian Missions conjointly. The London and the English Presbyterian missions are closely associated with that of the Reformed Church, with which they are in perfect harmony.

INDIA.—The Arcot Mission was organized in 1853 by Revs. Henry M., William W., and Joseph Scudder, three sons of Rev. John Scudder, M.D., one of the pioneers of American missions among the Tamils. A member of the Reformed Church, he was sent out under the American Board while the two Boards were still connected, and continued under it until his death in 1854. Of eight sons of Rev. John Scudder, seven, together with their sister, have been at some time connected with the Arcot Mission, and three are now on the field, together with six of the third generation.

The Arcot Mission occupies chiefly the Arcot district of the Madras Presidency, with an area of about 10,000 square miles, and a population of about 3,000,000, nearly equally divided between Tamils and Telugus. The people are divided into three general classes or castes, and the intense caste feeling forms one of the great difficulties of the mission work. The Brahmins, although but four per cent of the population, are by far the most influential section,

the duties of the priesthood and the intellectual professions being largely in their hands.

The Sudras form 75 per cent of the population, and are virtually the people. They were rude and ignorant when the Brahmins first came among them, but from them they have learned the arts and sciences. They are, like the Brahmins, tenacious caste-holders.

The Pariahs, or outcastes, form 20 per cent of the population, and are in a most pitiable condition, being little more than slaves. Much of the success of mission effort has been among this class.

The mission has 8 stations and 98 out-stations. These out-stations are placed under the care of native pastors and catechists, who also preach in the surrounding villages. The catechists are unordained helpers, but perform the same labors as a pastor, with the exception of administering the offices of the church. There are now on the field 8 ordained missionaries, 4 of whom are physicians, and 1 unordained, together with 11 ladies (3 unmarried). The number of churches is 23, forming the Classis of Arcot; of congregations 93, and of communicants 1,696, of which number 68 were received last year. There are in the mission 6 boarding-schools (4 male and 2 female), 8 caste girls' schools, and 97 day-schools.

There is also at Palmanair a theological seminary, opened March, 1888, for which a special endowment fund of about \$50,000 was raised by Rev. Jacob Chamberlain, D.D., of the mission, while in the United States in 1887. The mission has also a hospital and dispensary at Ranipet, near Arcot, where about a hundred patients are treated daily.

JAPAN.—The Japan Mission was established in 1859, three missionaries and their wives being sent out in that year, of whom one, Rev. Guido F. Verbeck, D.D., is still on the field. He was at one time President of the Imperial College, which brought the mission into most friendly intercourse with the official Japanese. The number of missionaries now on the field is 11, of whom 2 are engaged in teaching and are unordained. There are also 16 ladies, 6 unmarried and engaged in teaching.

In 1874 the United Presbyterian Church of Scotland, the Presbyterian Church (North), and the Reformed Churches of America united in forming the "Union Church of Christ in Japan," and the general work has since then been carried on conjointly. There are 68 churches on the roll of the United Church, with a total membership of 8,954. Eighteen of these churches were established by this Board. The Kaigan church of Yokohama, organized in 1872 with 11 members, was the first, and is now the largest, having a membership of 649 adults and 39 children. The Japan Mission had three stations, Nagasaki, Tokyo-Yokohama, and Morioka, with 20 out-stations. In 1889 this mission was divided into the North Japan Mission, with the stations of Tokyo-Yokohama and Morioka; and the South Japan Mission, on the southern island of Kiu Shiu, with its station at Nagasaki. In educational work the Reformed Church, in conjunction with the Presbyterian Church, maintains the Meiji-Gakuin at Tokyo, which consists of a theological and academical department.

It is worthy of note that of the 219 students in 1889, 129 were professing Christians. Under

its own special care the Board has the Ferris Seminary, a school for girls of a high grade, at Yokohama, with 144 scholars; the Sturges Seminary for girls, and the Steele Memorial School for boys and young men, at Nagasaki. A precious work of grace in 1877 in the Ferris Seminary brought 45 of the pupils to a confession of Christ.

*Special Features.*—The missionaries of the Board have borne an honorable part in the work of translating the Scriptures into the languages of the peoples to whom they have been sent. The Scriptures have already been translated entire in Tamil and Japanese, and in part in Telugu and the Amoy dialect.

Each mission of the Board is regularly organized with its appropriate officers. It was doubtless the original intention of the Reformed Church, as expressed in the constitution of its Board of Foreign Missions, that Classes or ecclesiastical bodies similar to those in the United States and having organic relation to the Synod, should be organized at as early a date as possible in each of its mission fields. This purpose has been carried out only in the Arcot Mission in India. The Classis of Arcot was organized in 1854, and includes the missionaries, native pastors, and representatives of the native churches, of which there are 23. This organization is entirely distinct from that of the mission, though composed in part of the same members. To the Classis belongs the spiritual care and oversight of the churches. To the mission is reserved all control of the funds appropriated by the Board, and of the educational work.

The attempt to secure a similar organization at Amoy was made in 1857. It was met, however, with earnest remonstrance by the members of the mission, who were closely associated in sympathies and labors with the missionaries of the English Presbyterian Church. Their view finally prevailed, and the missionaries of both churches, together with their native pastors and elders, now form the "Tai-hoey."

It is now proposed, as one result of the conference held at Shanghai in May, 1890, to unite all the Presbyterian and Reformed churches of Amoy, Swatow, and Formosa in one organization.

In 1876 the union of the missionaries of the Reformed Church in Japan with those of the United Presbyterian Church of Scotland and the Presbyterian Church (North) of the United States in the "Council of United Missions," and the formation of the "United Church of Christ in Japan," embracing the churches organized under these missions, was approved by the Synod.

In 1886 the General Synod formally approved the stand taken by its Board of Foreign Missions "on the important subjects of Union and Co-operation in Foreign Missions, etc.," and "permitted and advised" the Classis of Arcot "to initiate such measures as shall tend to bind together the churches of the Presbyterian polity in India." It further resolved "That this Synod will indorse the union of the Classis of Arcot with such a Union Church of Christ in India, composed of those holding the Reformed faith and Presbyterian polity."

A movement was inaugurated in 1890, at the meeting of the Presbyterian Alliance in Calcutta, looking to the formation of such a Union Church in India, with fair prospect of success.

The Reformed Church therefore occupies advanced ground in relation to the principle of co-operation in mission work, and the establishment in each mission field of a national, self-governing, self-supporting, and self-propagating church, "that shall grow from its own root."

*Constitution and Organization.*—The Board of Foreign Missions of the Reformed Church in America consists of 24 members, ministers and laymen, of whom at least one half shall be ministers, chosen by the General Synod, and regularly incorporated under the laws of the State of New York. Its members are chosen for three years, and are divided into three classes, so that one third of the membership is elected each year. The regular meetings of the Board are held at Synod's rooms, now at 26 Reade Street, N. Y. City, once in three months; and in addition to these, special meetings may be called at any time by order of the Executive Committee, or by a written request of three members of the Board. Its officers are, President, Vice-President, Recording Secretary, Honorary Secretary, Corresponding Secretary, and Treasurer, whose duties are such as are usually connected with those offices. In addition to these, at the regular meeting of the Board immediately following that of the General Synod, in June of each year, an Executive Committee is chosen, consisting of five ministers and five laymen. This committee meets in regular session once a month, and as much oftener as is necessary, and has the general oversight of all operations of the Board in the interval between its regular quarterly meetings, at which all its acts are reported. Upon this committee devolves the selection of candidates for active work in the missions, whether as missionaries, physicians, or teachers. The application of the candidate is accompanied by testimonials from his instructors, pastor, teachers, or others who are qualified to speak as to his fitness for the post applied for. If the candidate is a minister, the approval of his Classis is required in every case, and this is received as evidence of his theological training and acquirements and soundness in doctrine, without further examination by the Board. If, after consideration of the application and testimonials, they are accepted by the committee, a personal interview with the candidate is sought, and that proving satisfactory, the appointment is made.

The Finance Committee, which consists of three members chosen by the Executive Committee from its own body, is charged with the management of all financial interests pertaining to the work of the Board. It receives the estimates from the missions, from which it prepares the schedule of appropriations for each year, which is then submitted to the Board for approval. It also audits the accounts of the treasurer. In addition to the regularly constituted Board, each Classis nominates from its own members a missionary agent, subject to the approval of the General Synod, for the purpose of advancing the interests of foreign missions within the bounds of the Classis. These agents are, by act of General Synod, authorized to attend any or all meetings of the Board, and to participate in its proceedings by voice and vote. This agency serves a very useful purpose as a medium of communication between the Board and the churches, and in developing and fostering a greater interest in missions throughout the churches.

For several years past the General Synod has directed that apportionments of the whole amount needed for the work of each year be made by the Board among the various Classes of the church. The further distribution devolves upon the missionary agent in each Classis, with or without the advice and consenting action of the Classis.

For several years, beginning in 1880, a General Missionary Conference has been held, usually in October or November of each year. These meetings have been occasions of deep interest and great spiritual power, and have greatly helped to swell the tide of enthusiasm, which has been steadily rising throughout the denomination. During the years 1832-89 the Board has sent out a total of 182 missionaries, including 50 ordained (8 physicians), 6 unordained men, 51 missionaries' wives, and 25 unmarried female missionaries, and has organized 51 churches, with an aggregate of 3,719 members, in India and China.

**Reformed (German) Church in the United States.** Headquarters, Pottsville, Pa., U. S. A.—The Board of Commissioners for Foreign Missions of the Reformed Church in the United States was organized on the 29th day of September, in the year 1838, at Lancaster, Pa., during the sessions of the Synod. It is an interesting fact that the suggestion to organize a Foreign Missionary Board came from the Home Missionary Society. There was no opposition to it on the part of the delegates. The Synod made a good beginning. Immediately five ministers arose and signified their willingness to sustain a missionary of the cross in heathen lands. Rev. Dietrich Willers, D.D., was the first president, and a very sincere friend of the cause. Rev. Elias Heiner, D.D., of Baltimore, Md., an officer of the Board for a quarter of a century, was one of the most active ministers, taking a deep interest in the work and giving to its support his fervent prayers and constant labors to the last hour of his life. Elder Rudolph F. Kelker, the venerable treasurer, is the only link that unites the past with the present. His zeal and fidelity are well known throughout the Christian Church. Among the many faithful servants of the Board was the late secretary, the Rev. Thomas S. Johnston, D.D., who died at his residence in Lebanon, Pa., June, 1887.

Although the Board had no foreign missionary of its own, yet the Reformed Church in the United States was a regular contributor to the A. B. C. F. M., towards the support of Rev. Benjamin Schneider, D.D., from October 13th, 1840, to October 9th, 1865, just twenty-five years.

Beginning with 1860, the Synod became dissatisfied with this way of evangelizing the heathen, and in 1865 it decided to establish its own mission and to cease contributing to the American Board. From this time on the Board applied its funds to the support of the East India Mission, and to the work among the Winnebago Indians in Wisconsin. In the year 1873 the Board was reorganized. This was a very significant meeting, for it marks a new era in the foreign-mission history of the Reformed Church in the United States. The Board then laid the foundation for its present flourishing mission in Japan. In the year 1878 there began a most gracious work in the General Synod at Lancaster, Pa., which among

other precious results gave a new impetus to the Board of Foreign Missions. It was a happy coincidence that in the same church where the Foreign Mission Board was originally organized, it should receive new life from the God of Missions.

The Board of Commissioners for Foreign Missions consists of 12 members, 8 ministers and 4 elders, elected by the General Synod. The Executive Committee consists of the officers of the Board and an additional member elected by the Board. This committee has the general oversight of all the work of foreign missions; and when impracticable to secure a meeting of the Board, it has all the powers of the same to meet any emergency which may occur and which requires immediate action, in which case it may appropriate necessary moneys. The regular meetings of the Board are held annually immediately before and after the annual session of the General Synod, and at such other times as the Board shall appoint. Special meetings may be called at any time by the Executive Committee.

**JAPAN MISSION.**—The Reformed Church in the United States has a very prosperous mission in Japan. It is only ten years old, but during this brief period the Board has sent out three male and three female missionaries. The first missionaries, the Rev. A. D. Gring and his wife, settled in Yokohama, but it was thought best to remove to Tokyo. In May, 1884, he organized the first church, in connection with this branch of the Reformed Church, at Nihon Bashi.

The large and flourishing Bancho church is the fruit of the Rev. J. P. Moore's work, the second missionary sent out by the Board, in 1883. In 1887, in response to a call from Yamagata for a teacher in an English-Japanese boys' school, Mr. Moore undertook the work, and while teaching there for two years laid the foundation of a strong congregation.

In 1885 another missionary went to the field and settled in Sendai, in response to a call from that field, and laid there the foundations of the Sendai Theological Seminary. In the year 1886 the foundation was laid for the flourishing girls' school at Sendai.

Besides the theological seminary and the girls' school at Sendai, the mission of the Reformed Church has paid much attention to evangelistic work. It has three centres of operation, Tokyo, Sendai, and Yamagata, comprising twelve stations and seventeen out-stations. Rev. Mr. Oshikawa, who was one of the first Christians in the empire, is identified with this mission. To him belongs the honor of being the pastor of the congregation which purchased in 1887 a large Buddhist temple at Sendai. This is the first instance in the history of the mission work in Japan where a heathen temple became a Christian church.

**Reformed Presbyterian (Covenanter) Church in North America, Foreign Missions.**—Secretary Rev. R. M. Sommerville, D.D., 126 W. 45th St., New York, N. Y., U.S.A.—At a meeting of the Synod of the Reformed Presbyterian Church in North America held in 1818, a committee was appointed to inquire into the expediency of establishing a foreign mission. Nothing was accomplished then, however, and it was not until 1841 that the question was really considered and plans for foreign work proposed. In 1843

a committee was chosen to select a field for operation, and the island of St. Thomas in the West Indies was chosen. In 1846 this spot was abandoned in favor of Haiti, and in the fall of that year the Rev. J. B. Johnson was sent out by the Board to inspect the field. In the following year the Rev. J. W. Morton with his family was sent by the Board to Port-au-Prince, which had been designated by Mr. Johnson as the best place to begin operations, and, after preparing some books in French, the language of Haiti, he opened a school, which was very successful. While laboring at Port-au-Prince, Mr. Morton changed his views in regard to the Christian Sabbath, denying that the first day of the week was such. He returned to the United States to lay his case before the synod, and was suspended in May, 1849. The mission to Haiti was then abandoned.

At a meeting of Synod held in 1856 interest in missions was revived, and it was resolved to recommence foreign work. Syria was chosen as the field of operations. The Rev. R. J. Dodds and Joseph Beattie were chosen missionaries, and with their families sailed for Syria in October, 1856. After spending some time in Damascus in the study of Arabic, Mr. Dodds settled at Zahleh, a large town at the foot of Mount Lebanon, Mr. Beattie meanwhile continuing his studies at Damascus. In May, 1858, Mr. Dodds was compelled to abandon Zahleh on account of the threats of the Catholic priests, and, joined by Mr. Beattie, spent the following year in Bhamdun and Beirut. After several explorations, Latakia, a city on the Mediterranean, was selected in October, 1859, where the mission was permanently established.

In 1867, the United Presbyterian Church of Scotland having abandoned its mission to Aleppo, Dr. R. J. Dodds took charge of it until his death in 1870. The work was extended to Suadea on the river Orontes in 1875, and to Tarsus in Cilicia in 1882. The Latakia Mission has also undertaken work on the island of Cyprus, which has so increased that the Board has appointed a missionary to take charge of it. Within recent years a Chinese mission has been in progress in Oakland, Cal., and Indian missions have been established at several points in the United States.

**LATAKIA MISSION.**—As has been said, the Rev. Messrs. R. J. Dodds and Joseph Beattie were sent out by the Board in 1856 to open a mission among the Jews in Syria and Palestine. They went first to Damascus, intending to make that the headquarters of the work, but finding the Jewish field occupied they removed to Zahleh in Mount Lebanon. From Zahleh too, for reasons stated elsewhere, they were obliged to remove, and while looking for another field they met the Rev. S. Lyde of London, who was searching for the right persons to take up his work among the Nusairiyeh, which on account of failure of health he was obliged to lay down. While travelling in 1854 Mr. Lyde had come upon these strange people of Northern Syria, and, seeing their degradation and vice, had commenced a mission among them, which for several years he carried on at his own expense at Bahamrat. This work he now requested Mr. Dodds to undertake. Feeling that Providence must have brought about their meeting, Mr. Dodds agreed to do so, and with Mr. Beattie commenced operations at Latakia, with Bahamrat as an out-station. The Nusairiyeh, to whom

they attempted to bring the gospel, while nominally Moslem, are really a pagan people. They are the lineal descendants in race and religion of the Canaanites who fled before Joshua, and are as yet almost absolutely inaccessible to any Christian influence. Holding to their ancient faith with a pertinacity that is wonderful, yet compelled by a relentless oppression to cover their belief under the forms of a hated religion, they have developed a power of deceit and dissimulation probably not equalled in the history of any race. Defying all investigation, punishing treachery or apostasy with instant death, they seem impregnable to approaches of any kind, and have repelled in their gloomy isolation all Christian workers "except the sturdy Scotch Covenanters, who with persistency not less dogged than their own, but with a faith which lays hold on the power of the highest, have commenced their attack." Mr. Lyde during his life among the Nusairiyeh learned many of their customs and secured some of their religious books. From his published account of them we quote the following facts in regard to their history and religion.

Politically they are divided into many tribes or clans, each with its own chiefs or sheikhs, who are continually at war with each other. These wars are caused by the old custom of avenging the blood of the slain by his next of kin; only the custom has been broadened by the Nusairiyeh; so that it is not the next of kin that takes vengeance on the murderer, but the whole clan of the murdered man becomes the avenger, and the whole clan of the murderer, the party on whom vengeance is to be taken. Occasionally the matter is settled by paying the "price of blood."

In religion they are divided into two sects, the Shamaleiyeh and the Kalazeiyeh, the main difference between them being that the former reverence or worship the moon, and the latter the sun, as the dwelling-place of Ali. The former are the stricter in the practice of their religion, and it is almost impossible to open a school or do any mission work among them. Their condition socially and morally is of the lowest, and the government, although counting them as a Mohammedan sect and drawing soldiers from them, considers them so unclean that it will neither allow them to enter the mosques, nor eat any meat which has been killed by them. Much more might be said, but enough has been told to show the exceeding difficulty of the Latakia Mission, and also that, notwithstanding, a remarkable work has already been accomplished (see article Nusairiyeh). In the field of Latakia are now two regularly organized congregations, besides the one at Latakia. The total number of communicants is 190. Medical work in connection with the mission was begun in 1865 by the Rev. David Metheny, and carried on by him at Latakia until 1882, when he removed to Mersine. Dr. Archibald Dodds taking up his work in Latakia. In 1885 Dr. Dodds was lost in the wreck of the steamer "Sidon," off the coast of Spain, and during the two years following no medical work was carried on at Latakia. In 1887 Dr. I. M. Balph was appointed to conduct the medical work of the mission, which had become, and continues to be, a very important feature.

The present working force of the mission is: 2 married missionaries, 1 physician, as

above mentioned, 3 lady missionaries, 4 native licentiates, who are also ruling elders, and 34 teachers. The total number of pupils under instruction in the schools is 730.

Since the year 1874 the mission at Latakia has had charge of work at Suadea, the ancient Seleucia, which was begun in 1846 by Dr. Holt Yates of London, and carried on by him, or by an agent placed there by him, until 1874, when he gave the property to the Reformed Presbyterian Mission. After his death Mrs. Yates supplied the funds for carrying on the work until the spring of 1890, when her own death took place. Six hundred dollars per annum suffices to carry on the boarding and day school, and the Board is making an effort to supply this sum by some other means, so that the work need not be stopped.

**MERSINE, ASIA MINOR.**—After the mission at Latakia had been established, it was found that a large number of Nusairiyeh were living in the cities of Mersine, Tarsus, and Adana, and surrounding villages, in Asia Minor, and it was decided to open a station among them; and accordingly, in the fall of 1882, Dr. Metheny and Miss Sterrett went there and established a mission, of which the city of Mersine is the headquarters. Here too, notwithstanding very great difficulties and obstacles, the work has made progress. The working force is 2 ministers, 3 female missionaries, and 6 native teachers in charge of six schools, with an aggregate attendance of 153 pupils.

**CYPRUS.**—Some years ago, to put him beyond the reach of persecution, a native teacher was sent from Latakia to Larnaca, on the island of Cyprus. While there he gathered together some children and taught them, thus beginning a work which was continued by the Latakia Mission until 1890, when the school had to be closed. The work was, however, only relinquished for a time, not abandoned; and the Board has now under appointment a missionary to Cyprus, under whose care it is hoped a successful mission may be developed.

**Reformed Presbyterian Church of North America, General Synod, Board of Missions.** Headquarters, Philadelphia, Pa.—The foreign missionary work of the General Synod of the Reformed Presbyterian Church was commenced in 1836, in the Northwest Provinces of India. In that year Dr. James Campbell was sent to Saharanpur. In the following year Rev. Joseph Caldwell and family and Mr. James Craig were sent out to join Dr. Campbell, and a Presbytery was organized in connection with the General Synod. A large orphanage was gathered at Saharanpur, the principal station, and sub-stations were formed at Roorkee and Dehra. In 1868 the Presbytery of Saharanpur, which had derived its support partly from the Reformed Presbyterian Board and partly from the Presbyterian Board, withdrew from the General Synod, and the mission stations passed under the control of the Presbyterian Board. In 1883 the mission at Roorkee, by mutual arrangement, reverted to the control of the General Synod, and in the same year the Rev. George W. Scott was sent thither by the Synod. Mr. Scott now has under his care a congregation at Roorkee, eight sub-stations, with a catechist at each, and four zenanas in or near Roorkee. At two of these

stations schools have been established and are in successful operation. Preaching services, Sabbath-schools, and prayer-meetings are held regularly at Roorkee. Preaching services are also held in the adjacent villages, in eight of which, as has been said, sub-stations have been formed.

In 1884, Mr. Charles G. Scott, formerly of Sialkot, was brought to the United States by the General Synod. After passing through the Synod's Theological Seminary in Philadelphia, Mr. Scott entered the medical department of the University of Pennsylvania, from which he was graduated in 1889, and in the same year was sent by the General Synod to India to join his brother at Roorkee. He has since organized a congregation of thirteen members at Muzaffarnagar, and a church building and mission house are in course of erection at Patala, where the medical department will be an important feature of the work. Just before Mr. Scott's departure for India he was instrumental in leading to Christ a young man from India who belonged to the Society of Arya Somaj, and who is now being educated in Philadelphia by the General Synod for work among his countrymen.

**Reformed Presbyterian Church in Scotland; Foreign Mission.**—From the year 1852 up till 1863 the Reformed Presbyterian Church of Scotland had mainly confined its foreign mission operations to the New Hebrides. In the latter year the church was divided over questions bearing upon the distinctive principles and position hitherto held and maintained by the church. The missionaries in the foreign field adhered to the majority of the Synod, who, in 1876, united with the Free Church of Scotland. Since that date the work in the New Hebrides, formerly carried on by the Reformed Presbyterian Church, has been under the direction of the Free Church of Scotland. The minority, who still continued to adhere to the principles and position of the church, found themselves so much weakened, numerically and financially, by the disruption of 1863, that they felt it impossible to continue to carry on work in the foreign field, alone. In these circumstances, an approach was made in 1865 to the Irish Reformed Presbyterian Synod, then contemplating entrance upon work in the foreign field, with a view to the establishment of a joint mission. An arrangement of this kind was subsequently entered into by the two Synods. Appeals were made for missionary agents, and, after some disappointments, Mr. James Martin, M.A., M.D., offered himself for service in the foreign field and was accepted. Syria, where the Reformed Presbyterian Church in the United States of America had already established a mission, was selected as the sphere of operations, and Dr. Martin was ordained and sent out in 1871. In 1875 Dr. Martin fixed on Antioch as a field and centre for his missionary labors, and up till the present he has continued vigorously to prosecute the work in that place and in surrounding districts. For a time both the preaching of the gospel and the educational work in the schools had to be conducted in rented premises; and those obtainable were not always of a suitable and satisfactory kind. After some delay a plot of ground was secured and a building for mission purposes was erected at a cost of nearly two thousand pounds sterling. This

building furnishes accommodations for public worship, for dispensary purposes, and serves as a residence for the missionaries.

In 1884 a branch mission was established at Idlib, a village between forty and fifty miles distant from Antioch, and recently a mission school for girls has been opened in Suadea, the ancient Seleucia. In 1883 Miss Martha Cunningham, who had been under special training for some time, was designated and sent out to Syria as a female missionary to strengthen the mission staff there. Mr. Thomas Kirkwood, M.A., Greenock, Scotland, has offered his services as a missionary to Syria, and he is at present prosecuting medical studies in order to go out as a fully qualified medical missionary. The work is carried on by the stated preaching of the gospel to the congregation that assembles in the mission premises; open air preaching among the Fellabehn; religious instruction in the mission schools; visiting, Bible reading and religious conversation by European female missionaries; Bible reading and exposition by a native colporteur; and Bible reading by two native women converts. The members of the mission congregation are mostly drawn from the Greek church; but efforts are made to reach the other sections of the population—Moslems, Jews, and Nusairiyeh—as opportunity offers, and some of all these classes have been reached either through the preaching of the gospel, instructions in the mission schools, or by means of private personal dealing with the individuals.

The present statistics of the mission are: 1 ordained medical missionary, 2 female missionaries, 5 native teachers; 1 colporteur; and 2 native Bible women. The number of members gathered in is about 40. The ordinary expenditure on the mission will amount to over £600 sterling annually. The mission secretary for the Synod in Ireland is Rev. J. D. Houston, B.A., Coleraine; and Rev. Robert Dunlop, Paisley, is the secretary for the Synod in Scotland.

**Rehoboth**, a town in Great Namaqualand, West South Africa, celebrated for its hot springs. Mission station of the Rhenish Missionary Society; 1 ordained missionary, 1 female missionary, 5 native helpers, 244 communicants, 117 school-children.

**Relation of Missionaries to Governments.**—This is a matter of great perplexity, difficulty, and importance. The missionary is in one sense a man without a country. In another sense he is a man of many countries. He does not renounce his nationality or citizenship. As Paul at times fell back on his high position as a Jew and Pharisee, so the missionary must often assert his privileges of birth and country. At the same time he is a resident of foreign lands and inevitably related to foreign governments, on his own account, as an individual; in behalf of the property and other local interests acquired by his mission, and in behalf of converts and adherents, who rely on him for justice and protection in secular as well as sacred things. As Paul appeared now before Ananias, the high-priest; now before Felix and Festus, Roman governors; now before Agrippa, and finally appealed to Cæsar: so the missionary may find himself tossed between different, often conflicting, sources of authority, seeking to reach some supreme Cæsar, often finding only Herods and Pilates who will make friendship over his defeat.

The relation which he sustains to various governments may be one of defiance, of alliance, or of independence. These occur in all degrees and in all combinations. They may apply to the home government, the foreign governments, or to both. Ever since the Apostles met the prohibition of their persecutors by saying, "We ought to obey God rather than men," and rejoiced "that they were counted worthy to suffer dishonor for His name," the first preachers of the gospel have encountered in most countries the hostility of the powers that be. From Stephen to Bishop Hannington they have found hostile peoples and rulers arrayed against them, and yet have persisted in gentle defiance of threat and command and force. The first Protestant work in Japan was in quiet disregard of hostile laws, proclamations, and penalties. And for years before, Catholic priests had been at work sustaining suppressed Christianity, "sleeping," as one of them expressed it, "by day, working by night." Long have they also done the same in Korea, where, at last, our own missionaries are to-day, having come for the understood purpose of establishing a prohibited religion. Their position at Seoul, the capital, affords a most interesting instance of the curious intermingling of possible relations with different governments. As foreigners at an open port they are under the diplomatic protection of their home governments. As court physicians, heads of hospitals, asylums, schools, etc., they are under the protection of the Korean government, receive distinct appointment as Korean officials of a certain rank, and have a kind of private policemen assigned them for protection and service. In private they are also recognized as missionaries. Yet in all this public capacity, mission labor is prohibited; in any capacity it is liable to be stopped at any moment. The situation is one full of complications both for the judgment and the conscience. But Christianity is taking root in Korea; it has made progress more rapidly than in Japan at the start; churches are already organized, one of which has grown in three years from twenty members to over one hundred.

Even in Japan one restriction yet remains which involves the question of the true relation of the missionaries to the Japanese government. Outside of the open ports, passports are still required. These may be procured for residence by teaching in a Japanese school. For travel they can be had only for purposes of health and science. It is still a question among missionaries whether it is legitimate to use such travelling passports for evangelistic purposes, and whether the truer policy would not be to refuse to take out such ambiguous permits, casting all the evangelistic work on the native Christians until the whole country is thrown open to foreigners.

The first missions to India were in defiance not so much of heathen, as of Christian, government. The history of the East India Company's friendship with heathenism and hostility to Christian effort is one of disgrace, happily relieved, however, by noble exceptions, and steadily improved by the pressure of the better sentiment of England until, with the assumption of rule by the British government in 1857, the present policy of friendly neutrality was adopted. At the time, however, there was often nothing for the deported or prohibited missionaries to do but seek some other country,

like Burma, or cast themselves on the help of a friendly government like that of Denmark at Serampore, or wait in quiet and disguise for reluctantly extorted permission to go on with work.

In Turkey the Christian laborer stands under the protection of his own government, with explicit recognition of his character as a missionary. Yet so far as his work touches Mohammedanism, he is engaged in an endeavor to lead persons to violate by a change of religion the most stringent provisions of their sacred law. This change only the most persistent pressure on the part of Christian governments has induced the Turkish government to permit in theory. Practically it is still bitterly opposed. The relation of a missionary to a government thus compelled against its will is of necessity strained. He must avow purposes utterly repugnant to the authorities. Yet he must claim rights and privileges secured for him and his work by treaty obligations. And he must have constant dealings with lower and higher officials who on the most flimsy pretext, or with no pretext at all, seek to close his schools and chapels, stop his printing-press, and silence his native preachers, while the unthinking multitude are stirred up to riot against Protestants, and wildest excesses are committed, until the diplomatic screws force the powers at Constantinople to interfere. The censorship of the press exercised in Turkey and especially directed against the missionaries is in many cases only more ignorant than it is severe.

School-books are claimed for inspection. Months pass. A decision is entreated. At last some official, who may know little or nothing of the contents of the book, gives or refuses the permit. Hamlet, Macbeth, Richard the Third, and Julius Cæsar are prohibited because they portray the death of kings. A pamphlet was recently published by a Greek benevolent society in Constantinople which bore on the title-page a quotation from Paul's Epistle to the Galatians. Shortly after an officer appeared in the printing-office with instructions to arrest one Paul, who had been writing letters to the people of Galata, a section of Constantinople, and to secure a copy of these presumably seditious letters. It was of no use to tell him that Paul died centuries ago, and that Galatia was a province of the old Roman Empire. In default of Paul, the editor was arrested and put in prison, where he might have been to-day had not the Greek patriarch come forward with a New Testament and shown the officials Paul's letter. At present the Turkish law prohibits the importation of all books reflecting on the government or religion of the empire. The worst of these are burned, the others returned to their native land at the expense of the owners. To keep in communication with hostile officials, to avert, evade, or endure oppressive laws, to contend for old-time rights and privileges, to press important cases on the attention of the American consul or minister—these are among the great embarrassments and hardships of a missionary's life, not only in Turkey, but in China, Korea, and, to some extent, still in Japan. Such are also some of the great difficulties in Austria and other papal countries. And a large part of the time of the American minister at Constantinople, even though he be a Hebrew, must be and has been spent in protecting the interests of

missionaries against the assaults and intrigues of those who are opposed to their work.

How a man shall be at once just and wise and true and Christian is often a most difficult question to answer. To specify but one point: How far may a missionary yield to the corrupt practices which prevail in Turkey and China, and secure his ends by a "proper" consideration?

Backshesh is expected, and demanded. In most instances it is practically nothing more than a fee imposed by custom instead of being sanctioned by law. Yet its influence is demoralizing. How far shall the missionary sanction the prevailing corruption? how far must he resist it? This most practical question repeatedly recurs.

The missionary's relations to the government in India are also embarrassing in much the same way, though from a very different cause, as there it is help rather than hindrance that he receives from the state. Subject to official inspection, the government makes large grants of aid to all schools which fulfil certain conditions. The mission schools are largely sustained by these grants. But to conform to the minute and ever-changing requirements, to prepare scholars for the numerous examinations, to secure and retain the favor of the inspector and other officials, involves such an amount of time, delay, labor, annoyance, and secularization of the school, that many missionaries are of the opinion that it would be better, once for all, to dispense with all financial help from the government.

Much more entangling, however, are the relations of the missionary who enters into alliance with governments of any kind. It is as harmful to his work as the alliance of Church and State has ever been from the time of Constantine. The failings of Roman Catholic missions in this respect, whether in North and South America, in Japan, China, India, or other countries, are too well known to be told. They form a most instructive part of the history of missions. France and Germany to-day are eager to offer such alliance to missionaries. France, in particular, has sought to advance its diplomatic and colonial interests through claiming to be the protector of the missions. It has long sought to gain political power in China by posing as the patron of all Roman Catholic missionaries of whatever nationality. It has regarded and treated both Catholic and Protestant missionaries as its own emissaries in pushing its colonial schemes. The Legion of Honor has been recently conferred upon M. Casalis, an old French Protestant missionary, for "extending the influence of France in Basutoland," in the sphere of British influence in South Africa.

Germany, too, has the colonial fever, and the interest in missions has been increased all over the land because it is believed that even if missionaries are not successful as Christianizers of heathendom, they can be used wisely as Germanizers of certain parts of it. As a veteran missionary friend in Germany puts it: "The opinion of the German African Society with regard to missionary societies is that they are not unselfish attempts to spread the gospel, but merely handmaids to colonial politics—a cow to give milk to the mother-country."

But this very alliance of the government with missionaries gives rise to a new set of hostile relations. France wants only French, Germany only German, missionaries. The language and

sentiments of each country must be exclusively taught in the colonies of that country. Missionaries of other nationalities must be excluded, for they neither could nor would enter into such alliances for political and national schemes. This policy has been working with most harmful effect on many missions. It only just failed of breaking up the work of the A. B. C. F. M. in the Caroline Islands, now claimed by Spain. It has driven from Tahiti the British missionaries who converted that island, and in pursuance of it France is now endeavoring to annex the lesser islands of the Society group, to the vast harm of English mission work.

The work of the Presbyterian Board in its Gaboon and Corisco missions in West Africa has been seriously interfered with by the edict of the French Government which substitutes French not only for English, but even for the vernacular. The attempt has been made to transfer the work to the French Protestant Society, but so far without success. In the Cameroon country the English Baptists have been driven out by the Germans.

One of the most conspicuous instances of this baneful nationalization of missions occurred at the close of 1887 in the Loyalty Islands. The London Missionary Society had labored there so successfully, that "the whole of the people, so lately wild and savage cannibals, had embraced Christianity." There was left no trace of heathenism. There were self-supporting churches with over 3,000 members. There was but one missionary, with 40 native pastors. Then came the blow which Rev. John Jones thus describes: "I, the only English missionary on the island, while doing nothing more in religious work than revising the Maré Scriptures, was, on the morning of the 9th of December, 1887, expelled by the French Government, at half an hour's notice, from the island, where, with my wife, I had labored to elevate the natives for more than 34 years." Here the French Protestants have established a state church, and regard the native Christians as rebels because they will not attend it.

The whole matter of colonies and missions has become a burning question, and the energetic protest of German mission magazines against all mingling of the missionary interests with national movements stands in strong contrast with the position of most French Protestants.

Whatever profit may accrue to the government from such alliances as this, there can be no question as to their harm to missions. The Dutch Government long ago established religion on an official basis in Ceylon, requiring from all native office-seekers assent to its church creed as a condition of appointment. It has left the opprobrious epithet of "Government Christian" as a warning against all similar attempts to do spiritual work by secular bribes. The missionary is the ambassador of the King of kings. He is the herald of the Prince of Peace. He denies and betrays his Lord if he allows himself to be entangled in worldly schemes which, under cover of a Christian name and purpose, seek political aggrandizement. This danger of alliances with rulers and powers of this world is nowhere greater to-day than in Africa. Petty potentates of every tribe are only too happy to avail themselves of the resources and science and

prestige of a European or American to overcome a rival or to regain a throne. Not all missionaries are as wise as those of the Church Missionary Society on Lake Victoria Nyanza, who refused their services for this purpose to King Mwanga, and sought to prevent their native converts from joining his army. It was an old scandal which declared, especially of China, "With the missionary there is always the inevitable gunboat." The scandal will be as great in Africa, if with the missionary there is always the inevitable gunpowder. "What are we to think," writes Dr. Cust, "of rifles, revolvers, and one thousand rounds of ball-cartridges being part of the outfit of a Christian missionary to Africa in 1880?" Whether for resistance or succor to the native chiefs, such appeal to arms, to armies, and home governments back of them, is not of the true spirit of missions. There is frequent call from Africa to England that it should interfere by force in behalf of endangered missionaries. Lord Salisbury in 1888, however, clearly declined to interfere in territory beyond the sphere of British influence. "I will not use any language," he said, "to encourage the belief that the government will make any attempt by military action to support the commercial and religious efforts of the missionaries there. . . . We are certain that we should only injure, instead of promoting the great civilizing and missionary efforts if we were to convert them into a cause of war—of war the most exhausting, the most terrible, the least remunerative, in any sense; war with the countless savages who fill these territories." That is perfectly true, and should lead missionaries to avoid all militant relations with their own or any other government.

But another large class of questions is added to those which perplex the missionary when he is appealed to by native Christians to secure government aid or interference in behalf of them and their interests. The expectation and hope of such aid and protection from the missionary is one of the motives most damaging to the sincerity of new converts. It harms the missionary, too, by filling his time and thoughts with civil matters, lawsuits, appeals, etc.

The temptation to such reliance on the arm of flesh to secure the rights and promote the interests of native Christians is strongest in British India and its protected states, where British law has modified many old customs in favor of humanity and religious equality. In Travancore, for instance, the question of the caste privileges of Christians comes up. They are said to be low caste, which would shut them off from much. They claim to be no caste. One typical case decides many. The privileges of entire communities are at stake; the courts must decide, the missionaries must make up, present, and push the case. That may keep them in the courts for years. Anywhere in India the right of Christians to use the village well or fountain may be denied. But the government has declared the wells free to all. The missionary must bring the case before the collector.

Lands of Christians are involved in lawsuits, perhaps brought on as part of a petty persecution by their heathen neighbors, perhaps independent of all religious cause. The influence of the missionary is incessantly invoked to help his adherents. Natural sympathy for those in

distress and the desire to see fair play have made some men allow most of their time for years to be consumed by such lawsuits, whose result, of whatever sort, was sure to be harmful to their spiritual work.

There is another connection with the local government, however, which often works for good. From their superior education and ability missionaries are often appointed to some official position. Dr. Verbeck was for some time a state official of Japan. President Martin, of Peking, at the head of the Imperial College, was appointed by the Government of China. Dr. Allen and Mrs. Bunker were the court physicians of the King and Queen of Korea. Dr. McKenzie at Tientsien was closely related to the Viceroy Li Hung Chang. Others have served for a time as diplomatic agent of the home government, like S. Wells Williams. Dr. Whitney, of Tokyo, as Secretary of the American Legation, is in a position to use his official as well as medical services for the benefit of Christianity. Such positions often prepare the way for the gospel, and commend it to strangers.

Yet as a rule, contrasting the high calling of a simple missionary with any other position, one might say of some who turn aside from the mission to official work what Dr. Carey wrote regretfully of his son, "Felix has shrunk to an ambassador."

It is not strange, when one sees what a snare is spread in all such dealings with magistrates and civil authorities, that many of those who are most consecrated and experienced should decide that the only safe and desirable plan for missionaries is that of entire neutrality in all such matters. The best they can ask from any government is to be let alone, and regarded with friendly neutrality. The best they can do for the mission is to eschew the sword and the rifle, to lean on no arm of flesh, invoke no aid of consul or magistrate, but rely on God and what he may do for his servants. They are not the foes of any people, they should not be the political engines of any government, nor should they make any government their engine.

Alone, unarmed, and uninjured Mr. McCarthy of the China Inland Mission walked through the whole of China. "I am persuaded," writes the secretary of a leading society, "that official remonstrances do not help in the long-run. Patience is our strength when we are in the right." And another says: "During the whole course of the mission's history our agents have made their way and found safety and acceptance among savage tribes, quite independently of any aid from gunboats or otherwise from government. . . . Treaty rights involve treaty wrongs, to the injury of the people, and the hindrance in the most fatal manner of missionary effort."

When the German Government had discharged the British Baptists from the Cameroon country they asked the Basle Missionary Society, as one related to and sympathetic with Germany, to undertake the work in their place. The Society made the grand response that it had always maintained a position above all political considerations, and would never depart from it, all that was asked being liberty of action.

An experiment in this line of freedom from all reliance on government is now being tried in the Soudan. The "Church Missionary Intelligencer" (June, 1890), says: "Mr. Brooke is

anxious that no missionary should seek safety from peril by virtue of being a British subject, and so looking to the British authorities for protection. He wishes to go to the Moslem and say, 'You and I are both in equal peril of life and liberty; nothing will be done for me that would not be done for you, if you have to suffer for Christ, so have I.' In the Turkish Empire a missionary could scarcely say this; in the Soudan he can if he will. . . . All that Mr. Brooke and Mr. Robinson really asked for was, (1) that no protection should be invoked for them which could not equally be invoked for any converts from Mohammedanism that God might give them; and (2) that neither for them nor for the converts should force or threats, involving the possible use of force, be employed. At a large and enthusiastic meeting of the committee it was resolved that the committee . . . would be thankful to welcome and send out at once a band of earnest, devoted men, who, with full knowledge of the risks involved, are prepared to carry on a vigorous mission on such methods as have been above indicated." Three weeks later the following explanatory resolution was added: "That while they heartily approve of the desire expressed by Mr. G. Wilmot-Brooke and his brethren to go among Mohammedans with exactly the same liabilities and perils as would attach to Christian converts from Mohammedanism in the same countries, they cannot pledge themselves, and do not understand that the resolutions of the committee of correspondence were intended to pledge them, never under any circumstances to interpose in any way to secure the safety or deliverance of the Society's missionaries or converts who may be in peril of life or liberty; but they put on record their conviction that the use of force, or of threats implying its possible use, in behalf of missions is a line of action which, as a missionary society, they could not take any steps to promote."

The general rule of the Church Missionary Society, as published among its regulations, is as follows: "Every missionary is strictly charged to abstain from interfering in the political affairs of the country or place in which he may be laboring;" "Never assume a position of hostility to the ruling powers;" "Stand aloof from all questions of political leadership and political partisanship;" "Tribute to whom tribute is due, custom to whom custom, fear to whom fear, honor to whom honor."

But the instructions of the China Inland Mission to its missionaries are still more strict. Under the head of "Relations to Governments" it says: "Too great caution cannot be exercised by all missionaries residing or journeying inland to avoid difficulties and complication with the people, and especially with the authorities. All the agents of the mission must fully understand that they go out depending for help and protection on the LIVING God, and not relying on an arm of flesh. While availing themselves of any privileges offered by the British or Chinese Governments, they must make no claim for their help or protection. Appeals to our consuls to procure the punishment of offenders, or to demand the vindication of real or supposed rights, or indemnifications for losses, are to be avoided. Should trouble or persecution arise inland, a friendly representation may be made to the local Chinese

officials, failing redress from whom, those suffering must be satisfied to leave their case in God's hands. Under no circumstances must any missionary on his own responsibility make any appeal to the British authorities. As a last resource the injunction of the Master can be followed: 'If they persecute you in this city, flee ye into another.'

Of that independence of all earthly government which must often become defiance, no one has spoken better than Dr. Duff in his letter in 1841 to Lord Auckland, Governor-General of India. In a question "affecting the interests of eternity not less than those of time, the Christian missionary must not, dares not, be silent, even if his voice should be uplifted against kings and governors and all earthly potentates. When the honor and glory of his Divine Master and the imperishable destinies of men are involved, the ambassador of Jesus can brook no alliance with mere human greatness or rank or power. In the spirit of Basil in the presence of the Roman prefect, he is ever ready to exclaim: 'In all other things you will find us the most mild, the most accommodating among men; we carefully guard against the least appearance of haughtiness, even towards the obscurest citizen, still more so with respect to those who are invested with sovereign authority; but the moment that the cause of God is concerned, we despise everything.'"

**Religious Tract Society.** Headquarters, Paternoster Row, London, England.—This Society was established in London in May, 1799, at the instance of Rev. G. Burder and Rowland Hill with some associates. Its first secretary was the Rev. Joseph Hughes. From the first, the Society has been unsectarian in principle, always selecting its committee from Churchmen and Nonconformists equally. Its special work is the publication and dissemination of Christian tracts and books, both at home and abroad. It carries on its work both by special agents and colporteurs, and by means of grants to Missionary and Tract Societies throughout the world. The accompanying statement of the general character of its work is from one of the officers of the Society, and indicates very clearly the nature of the work carried on by all the different Tract and Publication Societies of both Great Britain and America.

Towards the close of the last century and the beginning of the present there came that great outburst of missionary enterprise to which all the most powerful societies owe their origin, and the blessed influences of which are yearly widening and deepening over the whole heathen world. At this very epoch, viz. in 1799, a few earnest, devout, practical Christian men met together in St. Paul's Churchyard, and founded a society, then scanty in numbers and weak in resources, for the production and the sale of religious books and tracts. But the little society was a seed. It had within it some portion of the divine life, and it grew; and now "it has become a tree, and the fowls of the air come and lodge in the branches thereof." Out of the Religious Tract Society sprang almost immediately the Bible Society, and in less than a hundred years the work of the Tract Society has so developed that it is now carried on in two hundred languages, and the publications fostered, and in many cases rendered pos-

sible only by its aid, are now coëxtensive with the whole mission field. It is no exaggeration to say that there is scarcely a society or a missionary laboring for the salvation of the heathen who is not aided materially, directly or indirectly, by its work.

It was not until the year 1818 that the Society made its first grant for foreign work. In that year it voted \$550 to aid French Protestants in their efforts to counteract infidelity and irreligion by a wide circulation of tracts. This work developed into the foundation of the Paris Tract Society in 1820, and of the Toulouse Book Society in 1835. From this beginning, close to her own shores, the circles of beneficent influence have widened out decade by decade until they now embrace the habitable globe.

The original method of foreign translation work was to do it in the main, if not wholly, at the central office in London. Such tracts and books as were deemed suitable for the localities assisted were prepared in London, and then forwarded to the distributing agencies. In the beginning of the great enterprise it was hardly possible to do otherwise. Means of communication were slow and uncertain, laborers were few and far between, knowledge of special districts and special needs was necessarily imperfect. But the principle on which the work has been pursued from the first is to do the best possible at any given time, although it may not be the ideally perfect.

In process of time experience indicated defects in the method of centralization. It was found, for example, that many tracts prepared in London for French readers had one radical defect—they were not truly French. The words and phrases were those of our volatile, light-hearted, attractive brethren, but the subtler modes of thought, the national point of view, the knowledge of French life, were not there, and hence the tracts only very imperfectly did their work. And so it came to pass that a new principle emerged, viz., that of trying to work wherever possible through local scholars and translators. The enormous advantage of this method can easily be seen. The worker on the spot, in close touch with those whom the tract, or book, or newspaper is intended to benefit, familiar with local coloring, and modes of thought and peculiarities of language, must of necessity know—other gifts being equal—how best to put the truth into the language and form desired.

Hence the bulk of the work for France was transferred at an early date to Paris and Toulouse, the Society in London stipulating that the workers in these places should first determine what in their judgment was best suited for the needs of France, should then put their proposals in a clear and business-like form, and thus render them suitable for consideration by the London Committee. When this was done, if, in accordance with their prayerful judgment, the scheme was one the Committee could approve, the Tract Society did all in its power to carry it into practice. For many years past, in addition to special grants for special publications, the Dépôt Centrale, Paris, has received \$1,000 annually, the Paris Tract Society \$1,000 or \$1,500, and the Toulouse Book Society \$2,000.

The most interesting recent extension of this principle in the foreign field has taken place in China. In no country is the circulation of

Christian literature easier or more fruitful in the most blessed results. From the time of Morrison onwards the missionaries have labored unceasingly in the effort to give the millions of China pure Christian literature. Special conditions have rendered the work exceptionally difficult. Missionaries are but human, and differences of opinion—carried sometimes to a point where they have been positively hurtful—have not been unknown. In 1882 the Society made a resolute effort, so far as their translation work was concerned, to bring about closer union and fuller co-operation among all their helpers. As regards translation work, the day for the solitary worker has almost passed. Hence Dr. Murdoch visited all the chief centres of Chinese Christian literary production, held conferences with the brethren, and finally formulated a scheme which has since, to a very large extent, been accomplished. This was to map out China into well-defined districts, to secure a thoroughly representative committee for each district, to lay down as an axiom that the chief literary enterprises of each district must be carefully considered by its committee, and that only upon their recommendation could tracts and books be sanctioned for publication. Three such committees are now at work: the North China Tract Society, having its headquarters at Tientsin; the East China Tract Society, with its centre at Shanghai; and the Mid-China, located at Hankow. The South China Committee has not yet been formally constituted.

The benefits of this system are: The Committee does not repress but encourages individual effort. It gets the best literary workers to take seats at its board. The various projects are discussed, the literary achievements criticised by the men best competent to form an accurate judgment; while a unanimous request from such a body comes to the home Society with a force which only one consideration—lack of funds—is able to resist.

One constant effort on the part of the Society is to get larger funds for China. Sums varying from \$1,250 to \$2,000 are granted annually to these committees; the constant effort being made to use these grants as stimulants to the liberality of others. For example, it has become a common practice for the Society to bear a part only of the expense of an undertaking. The proportion varies between one-quarter and three-quarters of the whole outlay. In this way others are influenced to give, and many a useful book, such as the Bulgarian Bible Dictionary, or the Japanese Pilgrim's Progress, or "More about Jesus," in the Congo language, has been thus sent on its useful way. The great missionary societies have always admitted the need for and the benefit of Christian literature in the foreign field; but it is not always possible, and sometimes it is not even deemed needful, to get the very best and ablest men to devote themselves to this department of work. Much, however, has already been accomplished, and still greater results are possible in the near future.

A few examples of what has been done will illustrate the work of the Society. The New Testament part of the well-known Annotated Paragraph Bible has been translated into eleven languages, and of these, special mention may be made of the renderings into Urdu, Marathi, Tamil, Kanarese, Sinhalese, Burmese, and Arabic. The recent visit of Dr. Wright to China, and the great conference held at Shang-

hai early in 1890, emphasized the need in China for not only the Word of God, without word and comment, in such Chinese renderings as the ripest Christian scholarship can give it, but also of editions containing such explanations as will remove difficulties peculiar to Chinese modes of thought and habits of life, and also equip the native convert with the best and latest aids to Bible study. The preparation of such editions as these will, in all probability, fall to the lot of the Tract Society.

Next to the Bible the Pilgrim's Progress is the book that has done most for the evangelization of the human race. This book has now been translated into no less than eighty-five languages, and in almost all of these editions the Society has had a hand, sometimes bearing the whole, sometimes only a fraction, of the cost. In its committee room in Paternoster Row stands a case containing specimens of nearly all these editions, and it would be hard to select a better object-lesson upon the spread of the gospel in our days than a careful inspection of these shelves. The Englishman, the Welshman, the Highlander, the Irish Erse-speaking peasant can there find the book in his native tongue; the Finn, the Russian, the Czech, the Greek, and the Armenian can delight his eye with familiar words and phrases; all the chief languages of India and China are represented; the Cree Indian, the Maori, the Kafir, the Malagasy, the Mexican, the dweller in Eastern or Western Africa, and the whilom cannibal from the islands of the Pacific can there follow the stages of the journey to Mount Zion by the aid of the only language he knows; and as the Japanese or the Chinese sees the Pilgrim struggling in the Slough of Despond, or passing through Vanity Fair, or crossing the cold dark river with the golden gates beyond, his feeling of national pride is gratified by illustrations executed by his own countrymen, representing exclusively costumes and habits familiar to him, and yet showing by the admirable way in which they illustrate the text that the life and the heart of the Oriental are subject to the same sins and need the same Saviour as the dweller in the west.

As illustrations of the scope and variety of foreign translation work, reference may be made to the new publications of 1888 and of 1889. In the former year there were prepared and issued in the way indicated above a Bible Dictionary for Spain, a Hymn-book for Portugal, a Church History for Bohemia, a Book of Prayers and Meditations for Hungary, a Commentary for Bulgaria, Bible Stories and "Come to Jesus" for Poland, a Church History for Samoa, the Pilgrim's Progress in Fanti (East Africa), a Hymn-book for Bechuanaland, the Pilgrim's Progress in Chinese (Swatow), a Hymn Book for Foochow, "More about Jesus" for the Congo, a Concordance for the Loyalty Islands, and a tract by John Williams, the martyr of Eromanga, for the Hervey Group, Polynesia. In 1889 the chief productions were a second edition of the Japanese Pilgrim's Progress and a volume on the "Evidences of Christianity" in the same tongue; a series of four-page tracts in Arabic consisting exclusively of Scripture passages bearing on the fundamental doctrines of Christianity, for circulation among Mohammedans, and at Cairo an Arabic edition of "The Silent Comforter" was published; for Abyssinia the Pilgrim's Pro-

gress in Amharic; a new edition of the same book, a Bible Dictionary and a large handsome hymn-book with tonic sol-fa notation for Basutoland; for the Congo "Peep of Day," "Line upon Line," and "More about Jesus;" for Madagascar a "Life of Luther," a volume of Sermons, and a Catechism; for India special schemes have been under consideration, first to secure there a much larger circulation for the "Present Day Tracts," and secondly by the appointment of a special agent to superintend the production of Christian literature by the ablest man.

Great efforts are being made in many parts to preach the gospel by means of newspapers and magazines. In these it is very rare for the Society to take any direct literary part. But it is hardly too much to say that if the aid given by the Society were withdrawn a very large part of this work would be either stopped at once, or else permanently crippled. By money grants, by either free gifts of electrotypes or engravings, or else by supplying them at a merely nominal charge, and above all by free grants of enormous quantities of printing paper, the Society develops this branch of missionary literature. In this way the now very extensive Christian literature of Madagascar has been created; in this way such literary centres as Madras, Calcutta, Hankow, Beirut, and Constantinople have been doubled or quadrupled in power; and although at first the statement may sound somewhat novel, it is yet nevertheless true that the gospel reaches many a family and many a heart because of this power to give clean white printing paper to the chief centres of missionary periodical and literary production.

Some conception of the present scale of this and the other forms of literary effort may be formed from the fact that the total foreign issues of all kinds in 1899 were 15,000,000, and the total expenditure on foreign missionary literary work was as follows: money grants, \$50,000; printing paper, \$12,500; publications of various kinds, \$27,500; electrotypes and engravings, \$7,500,—making a grand total of \$97,500 for the year. And these figures give the work of the largest but still only one society among the many that are enlisting the press in the ministry of the gospel to the heathen.

**Rendall, John**, b. Halifax, Nova Scotia, January 21st, 1821; lived in Utica, N. Y.; studied at Quincy, Ill.; was ordained at Roxbury, Mass., October 13th, 1845; sailed as a missionary of the A. B. C. F. M. the same year for India. He was connected with the Madura Mission. Mr. Herrick thus writes: "Mr. Rendall's love for the natives, shown by a readiness to deny himself in their behalf, his excellent advice to them when in trouble, led them in great numbers, heathen as well as Christians, to trust and love him. The brotherly love and absence of self-interest, always apparent in him, together with the rare ability shown by him in the discharge of difficult duties, caused his associates to love him in return, to honor him, and to depend on him with peculiar confidence." For more than twenty-five years he was called to fill the offices of secretary and treasurer. His standing as a clergyman, and a man called to the frequent discharge of duties demanding peculiar qualifications, led officers of the government and other gentlemen with whom he came in contact, to regard him with great re-

spect. Mr. Rendall had for some time suffered from a disease which required surgical treatment. Dr. Chester of the mission accompanied him to Bombay to assist in the operation. The operation was not successful, and he died June 13th, 1883, at the house of Rev. E. S. Hume, after thirty-eight years of mission service.

**Rhea, Samuel Audley**, b. Blountville, Tenn., U. S. A., January 23d, 1827; graduated at Knoxville University 1847; Union Theological Seminary, New York, 1850; spent some weeks in visiting the churches in Tennessee, presenting the subject of missions; ordained February 2d, 1851; sailed as a missionary of the A. B. C. F. M. March 4th, same year, for the Nestorian Mission, in company with Mr. Stoddard, who was on his return to Persia. In 1851 Mr. Rhea went to the new station at Gawar, among the Koordish Mountains. His associates having died or left, he had the entire charge of the mission field, which was one of much hardship. His health being impaired, he spent the winters of 1858 and 1859 at Oroomiah, and in the latter year was obliged to return to his native land. He re-embarked July 3d, 1860, for Persia, and was stationed at Oroomiah till his death. Mr. Rhea was a close student, a thorough and accurate scholar. He was well versed in Hebrew and Syriac; spoke the modern Syriac with great accuracy and fluency; was able to preach in Azerbaijan-Turkish with acceptance to the Armenians and others. His last public discourse in that language was delivered in Tabriz a fortnight before his death to a congregation of deeply-interested hearers. While at Tabriz he pursued his investigations in the Tartar-Turkish with the view of translating the Scriptures into that tongue, having already rendered in it the Sermon on the Mount. While in Koordistan he prosecuted the study of Koordish, and wrote out a small synopsis of the grammar. He was treasurer of the mission, and its business agent in general. He also had the charge of fifteen villages, some of them very large. His travels among the wilds of Koordistan were often protracted and perilous. He embraced every opportunity to preach Christ among Nestorians, Armenians, Mohammedans and Jews, high and low. He had long desired to visit Tabriz, for the purpose of settling difficulties in the church and removing prejudices from the mind of the foreign minister. The first week of his arrival there he took a severe cold in a sudden change of temperature, which brought on a fever. The next day he appeared convalescent, and started on his journey homeward. Reaching the village of Maian he passed the night in great suffering. The next day he set out for Ali Shah, where in a few hours he passed away. He died September 2d, 1865. The mission thus testifies concerning his worth: "We are called to deplore the removal of one of the most amiable and devoted of Christians, one of the most gifted, indefatigable, and devoted of missionaries, and one of the most eloquent and effective of preachers that ever adorned and blessed the missionary cause." Dr. Perkins remarks: "Mr. Rhea is one of the finest preachers I ever heard, whether in the English or in the Nestorian language. The Nestorians denominate him Chrysostom, from his remarkable powers as a preacher."

**Rhenish Mission Society**, Headquar-

ters, Barmen, Germany.—A small mission society was formed at Elberfeld in 1799, and another at Barmen in 1815. They kept closely connected with the Society of Basle and had their missionaries educated there or in Berlin. But in 1825 an independent mission seminary was founded at Barmen, and in 1828 delegates from the societies of Elberfeld, Barmen, Cologne, and Wesel met at Mettmann and formed the Rhenish Mission Society, which was confirmed, June 24th, 1829, by Friedrich Wilhelm II.

In the same year the new Society sent out its first missionaries. They went to South Africa and landed at Cape Colony in October, 1829. In that region 40 missionaries under the direction of the Moravian Brethren, the London Society, the Wesleyans, and the Free Scotch Society, were already at work at 30 stations among the Hottentots, Kafirs, Negroes, Bastards, etc., and the Rhenish missionaries hesitated where to go. Finally, in the beginning of 1830, they founded their first station at Wupperthal, and in 1832 they built and consecrated their first church at Unterbarmen, after which the South African Mission progressed steadily and safely. In 1884 the Society found that they had more missionaries ready for work than could be employed in Africa, and moved by what they had heard from the American missionary, Abeel, and the Dutch missionary, Medhurst, they decided to open a new field in Borneo, to which they afterwards added two other places in the Dutch colonies of the East Indies, Sumatra in 1862, and Nias in 1865. In 1846 they had also begun a Chinese mission.

Meanwhile difficulties arose at home. In 1881 the trade company of the Society failed and left it in debt for 204,966 marks. It was compelled to transfer parts of its Chinese mission to the societies of Basle and Berlin, but the interruption of its activity was only short, and it has recently been able to start a new mission in New Guinea. Thus it works at present in four different fields: South Africa, Dutch East Indies, China, and New Guinea. In 1888 its revenue amounted to 382,968 marks; its expenses to 384,762 marks. The whole body of converts under its care was 32,870, among whom were 10,475 communicants, contributing 49,752 marks. It maintained 53 stations, 75 out-stations, 69 ordained missionaries, and 166 salaried native helpers.

**South Africa.**—This field comprises three distinct divisions: Cape Colony, Namaqua, and Herero. Cape Colony is the best developed of these divisions. It is financially completely self-supporting, though it is very far from being morally able to govern itself. The population consists of European settlers, imported Negroes, native Hottentots, and a mixed people of all possible combinations and degrees. Such a population has, of course, no national religion and no national priesthood, a circumstance which cannot but be of some advantage to the Christian missionary. On the other side, however, the old saying that a half-breed is more likely to inherit the parents' vices than their virtues, is not altogether without truth, and the inborn levity, superciliousness, and frivolity of the half-breeds, together with those remnants of old superstitions which still linger among them, and those new-fangled vices which they are only too ready to adopt, present grave difficulties. Complaints of drunkenness and lewd-

ness are loud enough in almost every report from the individual stations, and only in one case, Schietfontein or Carnavon, the remark has been added, that however lamentable those vices may be, they cannot be said to be on the increase but rather on the decrease. Another circumstance causes considerable embarrassment. When the first Rhenish missionaries arrived, the Hottentots, Negroes, and half-breeds were slaves, and the gulf between the slave and the master cannot at once be filled up by an emancipation edict. On the contrary, the situation becomes for a time more strained. The former slave naturally looks to the missionary as a protector, and the former master is apt to see in him a kind of seducer. The Cape Colony Government gives a land grant to every school which has a certain number of pupils and the official school inspector's certificate for the standard of those pupils. The schools are consequently crowded. The settlers complain of the impertinence and laziness of the working-class, and the missionaries complain of the havoc which the excitement of a discovery of new diamond or gold fields plays in their congregations. The state of affairs is somewhat peculiar, when, as for instance at Saron, the station owns considerable landed estates, and the missionary is not only the pastor, but also the employer.

In Namaqua the mission meets great difficulties. The country is by no means sterile, but it is dry, and the climate is rainless. Without artificial irrigation—something which, of course, in the present state of civilization cannot be thought of—the soil is unfit for agriculture, and the inhabitants are nomads. The bulk of the population consists of a Hottentot tribe, the Namaquas, who were gradually forced by their stronger neighbors to leave Cape Colony, where they originally belonged. They brought firearms with them, took a fancy for hunting, neglected their herds, and when game began to grow scarce they robbed their northern neighbors, the Hereros, who had large and fat herds and no fire-arms. Soon, however, the Hereros came into possession of the necessary weapons. Their defence was successful. The raids were thrown back upon the Namaquas, and in the war, still raging, some of the northern mission stations were utterly destroyed, and consequently had to be abandoned. Only the five northern stations have been able to continue their work in peace. Moreover, while in Cape Colony everybody is able and willing to speak Dutch, the Namaqua understands nothing but Namaqua, and that language is so uncongenial to the white man's ear and tongue, that even missionaries who for all scientific or literary purposes were complete masters of it, could not preach without an interpreter. On account of the unpromising prospects of the country and the people, the Germans have been the sole workers of the field, and at Walfisch Bay, which is the inlet not only to Namaqua, but also to Herero, they celebrate service in German.

In Herero, he who comes from the south comes into contact for the first time with a genuine African Negro tribe. They are herdsmen; the milk of their cows is their daily food. They have something like a national religion, and national organization. They are dull and slow to impress, but what they once grasp they hold tightly. The language proved an almost insur-

mountable barrier, but the mission has tried with considerable success to educate native helpers. Then came the raids with the Namas, and finally the rivalries between the Germans and the English. The German agents were overbearing in their demands, and reckless with respect to the promises they gave. The English agents saw the opportunity and improved it by the introduction of whiskey. By these squabbles the position of the missionary was, of course, greatly embarrassed.

**Dutch East Indies.**—This also comprises three distinct fields, Borneo, Sumatra, and Nias. Borneo is a huge, hot, forest-covered swamp, so thinly peopled that one may make a day's journey up a river without meeting a single village, and so unsteadily settled that the village of to-day may next week have been moved hundreds of miles away. The inhabitants are agricultural nomads. When a rice-field turns out less fertile than was expected or becomes exhausted, the farmers take their houses on their backs and go to another place. The missionaries landed in the southeastern portion of the island among the Dyaks, a tribe belonging to the Malayan race but occupying a very low stage of savagery.

In that country and among those people the missionaries labored for eight years before they could baptize the first convert. And even then they found they had accomplished nothing. They adopted two measures, both of which miscarried: i. e., the ransoming of "pandelings" or slaves for debt, and compulsory attendance at their schools. The Dyak is either very poor or very rich: one has not a rice-seed to eat, and another has a gold crown so heavy that he cannot bear it. Then the poor man borrows of the rich, but the rate of interest is so outrageous that a very small debt will in a very short time make a man a pandeling. He likes, of course, to be ransomed, but that ransom cannot make him a Christian. By the agency of the Dutch government the Dyak children were driven to the mission school, but that was not the true entrance to Christianity either. In 1859 the whole fabric suddenly tumbled down. The Dyaks rose in rebellion, seven missionaries were killed, the rest fled to to Bendjermasin, the seat of the government, and all the stations were burnt down and destroyed. In reality, the rebellion was raised against the Dutch government, but the missionaries were the sufferers, and they were not able to resume work until 1866. From that time, however, the work has progressed steadily and surely. It is principally carried on through the medium of native preachers and evangelists. The first were educated in the Malayan Evangelical Seminary at Depok, Java; but that method proved a failure. When the Dyak returned home from Depok, he felt discontented and confused. There is now a small seminary at Kwala Kapnas, and it succeeds.

Sumatra has rapidly developed into the most important field of the Rhenish mission. Circumstances were propitious. The climate is much better than that of Borneo, as most of the stations are situated at an altitude of 2,000 feet or more. The country is well filled up, and the Battas, the Malayan tribe among which the mission works, are possessed of some civilization. They have themselves reduced their language to writing, and they like to read. Dutch missionaries have long ago mastered the language for all scientific and literary purposes, and the whole Bible is

translated into Batta. Very fortunate also it was that the Rhenish missionaries came in contact with the Battas as early as, in some cases even earlier than, the Dutch government, whence it followed that the peculiar sympathy which the statesmen of Amsterdam apparently feel for Islam was not allowed free play. At any rate, not long ago the Mohammedans of Sumatra petitioned the king of the Netherlands for the expulsion of the Christian missionaries, but the request was refused.

Nias is the largest of the chain of islands which stretches along the western coast of Sumatra. It is inhabited by about 170,000 people, who maintain a very lively intercourse with the main island. Opium-smoking and whiskey-drinking are common among them, and polygamy is the prevailing custom. Nevertheless, the mission is very promising, as the statistics show.

**The Chinese Mission** works among the Puntis in the province of Kwantung. It maintains 3 stations, 5 out-stations, 6 missionaries, 6 salaried native helpers, and has gathered 265 members, among whom are 155 communicants. The Rhenish missionaries, like all other missionaries working in China, are forced to contend with the curious pride of the natives and their peculiar antipathy to all foreigners.

But they trust that the better mutual understanding which generally results from a fuller acquaintance will in due time correct whatever of mistake there may be at this point on either side. The greatest trouble is that while truth is the fundamental principle of all our morals, the Chinese cultivate lying as one of the fine arts; and when they are caught, they are simply ashamed of their own awkwardness and lack of elegance, but they have no feeling of baseness and depravity. The most discouraging feature of their religion is their ancestor-worship, and here Christianity finds itself face to face with a phenomenon which it can neither recognize nor reject, and which, as yet, it does not know how to treat. Until this is overcome, however, Christianity can make but comparatively small progress. Still the latest statistics from China give ground for encouragement.

**Kaiser William's Land** in New Guinea did not become a German possession until 1885, and missionary work did not begin there, among the Papuans, until 1887. One station has been founded, at Bojadjim, and the reports are encouraging.

**Rhenius, Charles Theophilus Ewald**, b. November 5th, 1790, at the fortress of Gaudens, West Prussia; attended the Cathedral School of Marienwerder till his fourteenth year. At the age of seventeen, after many spiritual conflicts, he found peace, and devoted himself wholly to Christ. Reading the missionary publications of the Moravians, he was led to inquire whether he should not preach the gospel to the heathen. Having decided that this was his duty, he entered in 1811 a seminary at Berlin, established for preparing young men for the missionary work. He was ordained August 7th, 1812, at Berlin as a minister of the Lutheran Church, to be a missionary to the heathen. Proceeding to England, he spent eighteen months, by direction of the Church Missionary Society, with the Rev. Thomas Scott in further preparation for his future work. The court of directors of the East India Company having given permission

for missionaries to go to India, he embarked as a missionary of the C. M. S., February 22d, reaching Madras July 4th. He soon proceeded to Tranquebar, his appointed station. At the end of five months he was sent to Madras to establish a new mission. He was the first to labor there under the C. M. S. Having been appointed in 1816 to revise Fabricius' translation of the Scriptures, he found it so defective that he began a new translation. In two years a regular congregation of nineteen, or five families, was formed. During the five years of his residence in Madras he was constantly employed preaching the gospel in public meetings, conversing with individuals, holding discussions with Brahmins or other learned men, studying the Tamil and Telugu, and making frequent tours to various cities and temples. In 1817 Mr. Schmid joined him, to be his colleague for many years in mission work. In 1819 the corner-stone of a church in Black Town was laid, with impressive services. After laboring nearly six years in Madras, it was decided by the committee that Mr. Rhenius should establish a mission in Tinnevely district, and in June, 1820, he removed to Palamcottah, the chief city of the district. Here he found Mr. Hough, the chaplain of the station, who was much interested in the people, and had established several schools. The schools and the heathen, the translation of the Scriptures, and the preparation of a pamphlet, "The Essence of the True Veda," occupied Mr. Rhenius' time. He was joined by his beloved friend, Mr. Schmid. He prepared a "Harmony of the Gospels," which has had extensive circulation in Southern India. Mr. Hough having left Palamcottah in 1821, Mr. Rhenius held an English service on the Sabbath for English residents until the arrival of another chaplain. In 1822 a seminary was established for the education of youth, which has furnished catechists and schoolmasters for the mission. The Madras Bible Society requested Mr. Rhenius to continue the translation or revision of the Bible. In 1824 he visited the missions in North Ceylon, and was delighted with what he saw and heard. The foundation of a church within the mission premises was laid January 3d, 1826. Previous to this the services had been held in a building with mud walls, thatched with palmyra leaves, and now too small to accommodate the worshippers. Besides subscriptions from Europeans, resident and elsewhere, and a liberal grant from the C. M. S., a wealthy heathen moodeliar contributed to its erection. The services at the dedication were in Tamil and English, and it was a memorable day for the mission. The differing opinions and discussions among Tamil scholars as to the principles of translation led Mr. Rhenius to publish early this year a valuable pamphlet of 60 pages, entitled "An Essay on the Principles of translating the Holy Scriptures, with critical remarks on various passages, particularly in reference to the Tamil language." The translation of the New Testament, begun 12 years before, was printed in 1828, but the Old Testament was left unfinished at his death. A distinguishing feature of this mission encouraged by Mr. Rhenius was the formation and settlement of Christian villages. In order to withdraw the converts from the influence of heathenism, pieces of land were purchased, those who forsook idolatry were located on them, and formed into a Christian congregation. A catechist was appointed, a school established, and a

small chapel erected. But when in 1826 and the following years the Christian villages had increased in number, to relieve the missionary of the burden of their management an association of natives was formed in 1830, called "The Native Philanthropic Society," having for its object "the settling of native Christians in villages, the building of schoolhouses, the acquisition of grounds, etc., for these purposes, and the rendering of other assistance to the native Christians in their external affairs." In 1832 the congregations of Mr. Rhenius consisted of 2,519 families, containing 8,780 souls.

In 1832 an unhappy controversy arose between the C. M. S. and Mr. Rhenius regarding the ordination of natives, some having declined ordination because they could not subscribe to the articles, homilies, and canons. Mr. Rhenius proposed that the missionaries be allowed to use the German mode of ordination, to which the natives would not object. That the committee might know exactly his views in regard to the church, he sent them a "review" of a book by Mr. Harper entitled "The Church, her Daughters and Handmaidens." The Committee charged him with impugning in this the government, ritual, formulas, and discipline of the Episcopal Church, and dissolved the connection between him and the Society. He replied that the Home Committee had long been aware that he held the sentiments on church forms advanced in the review, and that the mission had been conducted without disapproval in accordance with those sentiments. He said also that he never promised to submit to the English bishops, nor even to observe the Church of England forms; that the C. M. S. had followed the example of other English societies, whose missions in India were conducted by Germans according to the form of the German church, and which authorized their German missionaries to ordain native priests according to the German ritual. The Committee adhered to its resolution that the connection between them must be dissolved, and also that he must leave the district of Tinnevely. Admitting that the property belonged to the Society, he maintained that he had a strong claim to the congregations; yet for the sake of peace he would leave. Against the protests of the catechists he went to Madras, and fixed upon Arcot as the field of his future labors. While there he received numerous letters from Tinnevely signed by a large number of catechists urging him to return. They wrote also to the Committee expressing their dissatisfaction. He returned, and finding the situation as represented, he decided to remain. In October, 1835, he was again in his chosen field. Separated from the C. M. S., and not connected with any organized body of Christians, he was dependent on the offerings of the friends of missions. Liberal donations came from England, Scotland, Germany, America, and India, so that he was able to go on with his work without embarrassment. In 1836 he published a "Grammar of the Tamil Language," 8vo, 300 pages, a work of high merit, and he intended to begin the preparation of a Tamil dictionary. Just before his illness he finished "The Summary of Divinity" in Tamil, for the use especially of catechists. His "Harmony of the Gospels" is in general use. He was struck with apoplexy, and died June 5th, 1836.

In the death of Mr. Rhenius India lost one of its greatest missionaries. In unremitting

labors he was not surpassed by any, and as a Tamil scholar he had no superior. The following estimate of his character and work is from the "Madras Budget": "Since the days of Schwartz there has been no missionary in Southern India equal to Rhenius. The happy union of such cheerful piety, masculine talent, strength and activity of mind, promptitude of action and decision of character, high acquirements in the native language, with a bodily constitution capable of great and sustained exertion, entirely consecrated to the Saviour's service, has not appeared in the missionary field. It was not merely or perhaps most by his preaching and teaching of the gospel that he has been the instrument in the hand of God for enlightening and saving men: his Tamil writings are both numerous and valuable, and will long delight and instruct both Christians and heathen. His piety and worth drew men's hearts to him. He had an extraordinary power over those who came under his personal influence. There was something winning in his manner and address; and few remained long with him, or came often under his ministrations without being brought under an influence which led them to vital religion. He was an honored instrument for bringing many to a knowledge and love of the Saviour, and his memory will long be cherished in the Indian church."

**Richards, James**, b. Abington, Mass., U. S. A., February 23d, 1784. He was converted at the age of thirteen, and early expressed a strong desire to devote himself to the ministry. He graduated at Williams College in 1809, where he excelled in mathematical studies. He was the class-mate of Samuel J. Mills, was with him at the haystack prayer-meetings, and between them a very endeared friendship was early formed. He was among the first in his native land who devoted themselves to the cause of foreign missions, at a time when the subject had excited little attention in America, and before any except the little band of brethren (see biographical sketch of Mills) had thought of making it a personal concern. At Andover Seminary, where he graduated in 1812, he labored with Mills and others to promote a spirit of missions among the students, and in the Christian public, by distribution of books and pamphlets. His name was one of the six who drew up the memorial to the Massachusetts General Association that led to the formation of the A.B.C.F.M. But his name and that of Hull were withdrawn lest the Association should be alarmed at the expense of supporting so many missionaries. He was licensed to preach in 1812, and studied medicine two years in Philadelphia, preaching while there to destitute congregations, and also employed as a city missionary. Ordained 1815 at Newburyport with Mills, Warren, Meigs, Poor, and Bardwell, he sailed the same year, October 22d, for Ceylon. On leaving his native land he said: "I have been waiting with anxiety almost eight years for an opportunity to go and preach Christ among the heathen. I have often wept at the long delay; but the day on which I now bid farewell to my native land is the happiest day of my life." He reached Ceylon March 22d, 1816. His health having soon failed, he took a voyage to the Cape of Good Hope, but returned without much benefit. He continued however

to perform missionary work and to render important service as a physician for four years. He died, after intensely painful sufferings, in Jaffna, Ceylon, August 3d, 1822, and was buried at Tiliipally.

**Richards, William**, b. Plainfield, Mass., U. S. A., August 22d, 1792; graduated at Williams College 1819, Andover Theological Seminary 1822; sailed November 29th, same year, as a missionary of the A.B.C.F.M., for the Sandwich Islands, accompanied by four natives educated in the United States. He was stationed at Lahaina, on Maui. In 1837 he visited his native land with his wife and six children, arriving in May and returning in November. In 1838 the king and chiefs requested him to become their teacher in the science of government and laws, and also their chaplain and interpreter in their intercourse with foreigners. As he was well fitted for the position, and had the entire confidence of the king, chiefs, and people, the mission and the Prudential Committee approved of his compliance with their request. He was accordingly released from the mission and his connection with the Board, "that he might guide the infant steps of the government as it went onward, relaxing the bands of despotism, and forming relations with the great Christian world." The government up to this time was an absolute despotism, the chiefs sole proprietors of the soil, and the people virtually slaves. Dr. Anderson, who knew Mr. Richards well, having been his class-mate in the theological seminary, testifies to his "intelligence, his sound judgment, and utmost disinterestedness." In 1840 the king conferred upon the people a constitution, recognizing the three divisions of king, legislature, and judges, and defining the duties of each. The code of laws adopted by the nobles and people was translated into Hawaiian by Mr. Richards, occupying 228 pages. From 1842 to 1845 he was absent on a mission to secure the acknowledgement of the independence of the islands by Great Britain, France, and the United States. After this recognition by foreign powers, he was sent as ambassador to England and other courts. On his return in 1845 he was appointed minister of public instruction, which office he held till his death, November 7th, 1847. His influence with the king and government was very great. The mission thus speak of him: "For many years he was an efficient and self-denying missionary. He always displayed a deep and cordial sympathy with our work, and was wholly devoted to the instruction of the Hawaiian race. As the advisor of the king and chiefs, he was often embarrassed by the opposition of foreigners; but he enjoyed the confidence of the government to the end, and when he died the grateful nation decreed a pension to his widow."

**Ribe**, a town on the east coast of Africa, in Masai-land, northeast of Freretown. Mission station of the United Methodist Free Churches; 7 native preachers, 1 chapel, 108 church-members, 54 Sunday scholars.

**Richmond** (1), an out-station of the S. P. G. Mission at Grahamstown, Cape Colony, Africa. (2) Mission station of the United Free Churches in New Zealand; 70 church-members, 1 chapel, 230 Sunday scholars.

**Rietfontein**, a town in Great Namaqualand, South Africa, near Keetmanshoop. Mis-

sion station of the Rhenish Missionary Society; 1 missionary and wife, 1 female missionary, 75 communicants, 100 scholars.

**Rifi Version.**—The Rifi is a dialect of the Shilha, and belongs to the Hamitic group of the languages of Africa. It is spoken by the wild tribes in the mountains in the north part of Morocco. Mr. William Mackintosh, agent of the British and Foreign Bible Society, at Tangiers, translated nine chapters of the Gospel of Matthew, which were tentatively printed in Arabic type in 1883. As these few chapters of Mr. Mackintosh's version were much admired by the natives, the translator proceeded with his version, and the entire Gospel was published in 1888. Mr. Mackintosh is continuing his translation work, and is preparing the Gospel of John.

**Riggs, Stephen R.**, b. Steubenville, Ohio, U. S. A., March 25th, 1812; graduated at Jefferson College; studied theology at Alleghany Seminary; ordained April 6th, 1837; went at once, with Mrs. Riggs, under appointment of the A. B. C. F. M. to the mission among the Dakotas. Here he labored with great zeal and success in missionary and literary work at various places till the Sioux outbreak of 1862, when, barely escaping with his life, he fled to St. Paul, returning soon as chaplain of the military forces sent to suppress the outbreak. For three years he dwelt at St. Anthony, making frequent and important visits to the Dakota prisoners at Fort Snelling and other posts. In 1865 he removed to Beloit, Wisconsin, where he resided till his death, engaged in winter in translating the Scriptures, and spending the summer in active missionary service, retaining his connection with the Board till the transfer in 1882 of the Indian Mission to the care of the American Missionary Association. After a long and painful illness he died, August 24th, 1883, aged 71, having spent over 45 years in active and successful work among the Indians. Dr. Riggs reduced the Dakota language to a written form, organizing and adapting it to religious expression, and translated into it nearly the entire Bible. He prepared also a Dakota dictionary of more than 16,000 words, which was published by the Smithsonian Institute. Upwards of 50 volumes, religious and literary, partly translated, partly original, were prepared by him for the use of the Dakotas in their language. He lived to see ten churches organized and efficient, under native pastors. Of his eight children, five entered the missionary field, four among the Indians and one in China. "Dr. Riggs," says the editor of the "Missionary Herald," "was an uncommon man, and was ordained and strengthened to an uncommon work. It has fallen to the lot of few to do a more important work for the triumph of the gospel." Dr. Riggs received the degree of D.D. from Beloit College, Wis., and that of LL.D. from Jefferson College, Penn.

**Ringeltaube, William Tobias**, b. Scheidelwitz, Prussia; educated at the University of Halle; sailed 1797 for India as a missionary of the S. P. C. K., and was stationed at Calcutta. Suddenly without any adequate reason he resigned and sailed for England. He was afterwards employed by the L. M. S. and went to India in 1804. He labored to some extent in Tinnevely, and preached the gospel

along the coast from Tuticorin to Cape Comorin. There was a scattered community of Christians brought into the fold through catechists sent by Schwartz, but they were very ignorant and their lives inconsistent. Ringeltaube earnestly set himself to correct their abuses, and impart sound religious instruction. He was very eccentric, but wholly devoted, and endured much privation and persecution. His work was a genuine work of usefulness among Christians and natives. Before settling in Travancore he spent a year in Madras in the study of Tamil. At the end of this period he had not only acquired a knowledge of the language so as to be able to write it, but had also completed a small dictionary in English and Tamil. Early in 1806 he went from Tranquebar to Tuticorin, where he found a congregation of fifty Christians, to whom he at once began to preach. He travelled more than a thousand miles, preaching everywhere, and baptizing many adults and children. He went also to Trichinopoly, where he baptized thirty-six adults. Through the kind offices of Col. C. Macauley, British resident at the court of Travancore, he received permission from the rajah to reside at Malâdi, to the south of the Ghauts, and to erect a church there. This was the first station of the L. M. S. in that province. Here he trained two young men for the ministry. He lived in a most primitive fashion. He occupied a small native hut, his only articles of furniture a rude table, two stools, and a cot. His habits were of the simplest character. "Scarcely an article of his dress," says Mr. Hough, "was of English manufacture. He seldom had a coat to his back, except when furnished with one by a friend in his occasional visits to Palamcotta. Expending his stipend on his poor people, his personal wants seem never to have entered into his thoughts." By the end of 1812 there were 677 communicants at all the stations. It was his custom to visit each congregation twice a month. In 1815, in the midst of his useful labors, he suddenly left his people, no one knew why. He called on Rev. Mr. Thompson of Madras, with whom he spent an evening, without a coat, though about to undertake a voyage to sea, and with a hat of native manufacture. No one ever knew whither he went, nor was he ever heard of again.

**Rio Claro**, a town in São Paulo, South Brazil. Climate temperate. Population 12,000. Language Portuguese. Religion Roman Catholic. Natives civilized but uncultured. Mission station Presbyterian Church (North) 1873; 2 married missionaries, 1 single lady, 9 native helpers, 3 out-stations, 4 churches, 227 church-members.

**Rio de Janeiro**, commonly called Rio, the capital of Brazil, is the most important commercial city of South America. It is situated on one of the finest harbors of the world, 75 miles west of Cape Frio. The bay is land-locked, and is entered from the south, and extends inland 17 miles, with a greatest breadth of 12 miles, and is said to be the most secure and spacious bay in the world. The city itself, like Rome, is built on seven hills, and the houses with their white walls and red roofs, clustering in the valley or extending along the sides of the green slopes, present a most picturesque appearance as one approaches from the sea. The old part of the town lies nearest the bay, while the

elegantly built new town is situated on the west of it. Here are fine streets, handsome public buildings, hospitals, asylums, over fifty chapels and churches, and many convents and nunneries. A national college, academy of medicine, theological seminary, and a national library meet the literary and educational wants of the people. A splendid aqueduct conveys pure spring-water from a mountain three miles southwest of the city. The climate is tropical, ranging from 54° in August to 97° in December. The annual rainfall is about 60 inches, one-fifth of that falling in February. The commerce of Rio de Janeiro is great and steadily increasing. As Brazil is the greatest coffee-producing country in the world, Rio is the largest coffee-exporting city. The population is estimated at 357,332, consisting largely of Portuguese, with a mixture of Negro blood.

Mission station of the Methodist Episcopal Church (South); 2 missionaries. Southern Baptist Convention; 3 missionaries and wives, 1 female missionary. South American Missionary Society; 1 missionary to the seamen. Presbyterian Church (North); 2 missionaries and wives, 1 church, 230 communicants, 67 Sunday-scholars, 1 school, 19 pupils.

**Riversdale**, a town in Cape Colony, South Africa, 150 miles east of Cape Town, 22 miles from the sea. Mission station of the Berlin Evangelical Missionary Society (1868); 2 missionaries, 2 female missionaries, 17 native helpers, 10 out-stations, 451 communicants. S. P. G. (1857); 1 missionary.

**Robbins, Elijah**, b. Thompson, Conn., U. S. A., March 12th, 1828; graduated at Yale College 1856, and East Windsor Theological Seminary 1859; ordained August 3d; sailed as a missionary of the A. B. C. F. M. September 29th, the same year, for the Zulu Mission, where he and his wife labored for nearly thirty years, Mrs. Robbins dying October 20th, 1888. He was stationed first at Umzumbi, but the latter portion of his life was spent in connection with the Mission Training School at Adams. He died there June 30th, 1889. Mr. Tyler writes: "He had spoken of the deep interest he felt in the theological department at Adams, and his gladness that I could give to the students a course of lectures on pastoral duties. The seminary for training Zulu men for the mission is in a great measure the fruit of Mr. Robbins' zeal and perseverance. The native laborers now in the field are ready to testify to the diligence and thoroughness of their teacher."

**Robertson**, a town in Cape Colony, South Africa, near Cape Town. Population, 12,000. Mission station of the S. P. G.; 1 missionary, 300 church-members.

**Rock Fountain**, a town in Ixopo, Natal, East South Africa, where Mr. and Mrs. E. S. Clarke (Friends) have worked among the Zulu Kafirs since 1879. These natives are a fine race, but very degraded, although they gladly welcome the missionary, and are especially glad to have their children educated.

**Rodosto**, a town on the coast of Roumelia, West Turkey, 80 miles west of Constantinople, on the Sea of Marmora and the great route west of Constantinople. It has large caravansaries and khans, and is the seat of

important trade by sea. Mission out-station A. B. C. F. M., worked from Constantinople.

**Rolwein**, an out-station of the Moravian Mission at Elukolweni between that town and Bethesda in Griqualand, East South Africa. The chief of the Kafir tribe occupying this district has given the mission a favorable site for a school-house, and has promised that 24 children will attend the school.

**Roma**, one of the southern Moluccas, East Indies, under Dutch authority, has about 1,000 inhabitants, of whom 280 are Christians. But these Christians offer sacrifices to the idols and have never seen that "assistant pastor" which the Dutch government is supposed to pay for since it compelled the missionaries to go.

**Roman Catholic Missions.**—By this we do not mean the mediæval missions appertaining to the yet undivided Western Church, but those which have been undertaken since the Reformation, by the Roman Catholics as distinct from the Protestants.

It is often said that the Roman Catholic missions among the heathen were undertaken to make good the losses of Rome from the great Protestant defection. No doubt this was a powerful motive. As Canning said of his patronage of the Spanish-American revolts, Rome desired "to call a new world into existence to redress the balance of the old." But, as pointed out by Dr. Warneck, the prime motive was the sudden enlargement of opportunity offered by the Spanish and Portuguese discoveries. Mr. Mackenzie, in his history of Spanish-America, states that from the very first a pure zeal glowed in the bosom of the Spanish Church, and of the Spanish State, both to convert the newly-discovered natives, and to protect them against the rapacious adventurers who poured out from the Iberian peninsula, and that both efforts were unremitting and slowly effective, though not until great multitudes had been swept away. Of both efforts Las Casas was the illustrious exemplification.

Rome has never claimed the right to compel unbelievers to receive baptism. Thomas Aquinas distinctly disavows this right for the Church, and even in Spain the bishops at various times rebuked the zeal of the princes for forcible proselytism. But as the rebukes of Alcuin did not deter Charles the Great from his policy of forcing Christianity upon the Saxons, so those of the Spanish bishops were often equally ineffective to prevent the forcible proselytizing of Jews and Moors. In the south, as in the north, religious unity was rightly esteemed by the rulers the only certain foundation of civil unity, and the State did not allow itself to be deterred by the inconsistency of forcible proselytism with the gospel from applying it where it was likely to avail. And the Roman Church, which maintains her own right to compel the baptized to remain, thereby broke the force of her protest against compelling the unbaptized to enter. Latin Christianity indeed being so predominantly an institute, cannot possibly be quite so sincerely disinclined to the ruder forms of conquest as Protestant Christianity, which emphasizes the necessity of inward appropriation of the gospel.

**SPANISH-AMERICA.**—Here there appears to have been but little forcible proselytism. The conquerors, indeed, prohibited the pagan

worship, for Rome holds that the worship of the true God, as practised by Christians or Jews, has alone a right to demand toleration of a Christian government.\* It is doubtful how far she would extend this allowance, even to Mohammedanism. But the actual incorporation of the American natives into the Christian Church was essentially the work of persuasion. The conquered Indians, indeed, except where they retreated as untamable tribes into the Andes or the Sierras, had little reluctance to accept the forms of the conquering religion. A French priest, however, declares that the Mexicans are Catholics, but are not Christians, as Southey says of the common people of England before the Wesleys, who had gone through two religions, but were not yet evangelized. The Spanish-American Wesley, it is to be feared, is yet to come.

The first Mexican missionaries were Franciscans. They are charged with having afterwards, at least in Northern Mexico, become hard slaveholders, who brought back their runaway Indians with the lasso. But it does not appear that any shadow rests on the name of the early missionaries. They came first in 1523 from Ghent. One of them, as Kalkar relates, Pedro de Musa, a simple lay-brother, who devoted fifty years of unwearied activity to the spiritual and temporal interests of his Indians, reports in 1529 to his Provincial, that in six years they had incorporated 200,000 souls with the Church of Christ; in eight years the archbishop of Mexico is said to have been metropolitan of a million Christians. This splendid see was refused by Musa, and also by the Emperor Charles the Fifth's near relative, Pedro of Ghent, likewise a simple lay-brother. He writes to his imperial kinsman: "Because the people possess a peculiar skilfulness, I can truly say that there are among them good copyists, preachers, and singers, who might well be cantors in Your Majesty's chapel. In a school and chapel built here there are every day 600 boys instructed. A hospital has been put up near our cloister, which is a great comfort, and a means of conversion." "Most heartily, and in the true evangelical temper, he raised his voice to plead against all oppression of the natives." The Mexican Indians, however, unlike the West Indian and the Peruvian, were treated mildly, or at least with comparative mildness, except in the mountain mines.

In 1526 appeared the first Dominicans, who henceforth furnished most of the bishops. Then came Augustinians, Antony de Roa being the most distinguished. In 1572 came Jesuits, who went into New Mexico, where they have always remained the chief influence. By their skilful kindness they allured the natives from the cliffs and cañons, and established them in villages.

The baneful Inquisition was soon transplanted. The Indians, however, were not so much exposed to it as the whites, partly from their simplicity, partly from the contempt in which their intellects were held as hardly capable of heresy (though sometimes of pagan practices), and partly from repeated royal edicts of exemption, lest haciendas and mines should be deprived of their peons.† The devotion of

the natives to the sacrament of Penance was most edifying, confession of sin being a main element of the Aztec religion. On the other hand, it is said that up to this century few of them were thought mentally competent to be admitted to the communion, although a rite analogous to this was also found in their old religion. That this estimate was too disparaging is beyond all question. It is even said that the pure Indians of Mexico commonly lead their classes in the schools.

Mexico, converted, became in her turn a basis of missions. From her the Philippines and Ladrones were Christianized, perhaps we should rather say, laid waste. Yet Sir John Bowring, it appears, regards the present condition of the Philippines as testifying to the judicious kindness of the Jesuits.

The Indians of the West Indies, a gentle and pleasing race, but of singular vileness of morals, who turned their memorial visits to the tombs into veritable orgies of lewdness, met the first wave of Spanish adventure, fierce, cruel, and rapacious, as yet unchecked by the slower steps of civil justice or religious benevolence, and were almost at once swept away. We lament the cruelty, but cannot think that the world lost much in the disappearance of so depraved a race.

Peru was conquered in 1533, and after twenty years of disturbances was brought to tranquillity in 1555 by the viceroy Mendoza, who took care to provide the natives with priests of good conduct. The Indians passed easily from the mild paganism of sun-worship into a nominal and formal Catholicism. Throughout Spanish and Portuguese America little pains seems to have been taken to build up an intelligent Christianity that shall deeply influence the heart and life. Yet that may have been true of South America which a missionary of the American Board states of Mexico, namely, that the Catholic Church seems there to have been mainly concerned about the shell of Christianity, but has by no means altogether withheld the substance, and that now and then there is a preacher of enlightened and energetic apprehensions of evangelical truth. Some one remarks of the Indians of California that they are devoted to Catholicism with all their hearts, and that all their highest feelings and ideas are intertwined with it.

The famous Jesuit mission of Paraguay was established in 1586, after the intolerable tyranny of the Spaniards had long rendered fruitless all the attempts of the Franciscans and some lesser orders to secure the conversion of the Indians. The Jesuits wisely judged that the Spaniards needed reconverting first, and turned their efforts towards their reformation with so good effect, that before long the Indians, believing at length that there must be something in a religion which could change the conduct of the whites, began to return to Christianity, or to seek baptism for the first time. The Jesuits were indefatigable. There was no tropical wilderness too intricate or wide-stretching for them to traverse, no water too wide for them to cross in their hollow logs, no rock or cave too dangerous for them to climb or enter, no Indian tribe too dull or refractory for them to undertake. "Their only weapons were the Word of God and the language of love." The Jesuit, like a Christian Orpheus, would often go up and down the rivers drawing the savages

\* Indeed, it is doubtful whether she allows the public worship even of Jews.

† It raged, however, terribly, notwithstanding.

to him by the force of music and sacred song.

The missionaries, apparently becoming convinced that the reformation among the Spaniards, though sufficient to set the good work of Indian conversion in motion, was neither extensive nor deep enough to make them, on the whole, desirable neighbors for their converts, obtained from the King of Spain authority to govern their 200,000 or 300,000 neophytes with entirely independent authority. Under their mild control, resting purely on persuasion, the Guaranis (as these Indians were called) enjoyed a hundred and sixty years of simple happiness until the Jesuits were expelled in 1767. "The social system established in Paraguay," says the *Encyclopædia Britannica*, "was the most effectual ever contrived for reclaiming the Indians from their savage mode of life; but even its success shows how hopeless is the attempt to raise the American tribes to the rank of thoroughly civilized nations. The Jesuits were able to introduce settled habits and a slight knowledge of religion and the arts among the Indians only by means of the personal ascendancy they acquired over them. It was a few superior minds gaining the respect and confidence of a horde of savages, then employing the influence they acquired to lead them as children, giving them such portions of instruction as taught them to trust implicitly in their guides, working alternately on their fears, their pride, their kind affections, but never fully revealing to them the springs of the machinery by which they were governed. The incurable indolence of the savages rendered it necessary to prescribe the labor as task-work, and to carry it on under the constant inspection of the missionaries. The plan of cultivating the ground in common and of storing the produce in magazines, out of which the wants of each family were supplied, was resorted to as a check upon their improvident habits. In short, the eye and the hand of the missionaries were everywhere, and the social system was held together entirely by their knowledge and address. When these were withdrawn the fabric soon fell into ruins, and the Indians relapsed into their idolatry and savage habits."

According to the "Handbook of Foreign Missions," the whole number of Catholic Indians in all America, outside of those who were once subject to Spain or Portugal, is to be estimated at about 40,000. Of course the Spanish-American states are no longer properly mission ground.

CANADA.—Jesuit missions in Canada have been most fascinatingly described by Mr. Parkman. The heroism, both natural and regenerate, the humbleness and unswervingness of devotion to the most dreary and unfruitful field of labor, the patience and sweetness of temper of these heroes of the faith, form one of the noblest chapters of church history. Almost or quite all the original missionaries died as martyrs, commonly under atrocious torments, which they always had in view, but from which they never shrank. The heroic Brébeuf, before his martyrdom, which he suffered conjointly with Père Lallemond, had baptized 7,000 Hurons. The Huron Mission, says Kalkar, was the most brilliant point of the Jesuit labors in Canada; but the fierce Iroquois, destroying the tribe, destroyed the mission. Kalkar rightly laments the measure in which the Jesuits accommodated

themselves, never to Indian fierceness or immorality, but too often to the grossness of Indian superstition. But he remarks that the blind hatred with which the English followed them up in the inhospitable regions in which they bore every hardship for the love of God and men, makes it harder for us to resent the persecutions which our missions have so often suffered at the hands of Roman Catholic nations.

The most triumphant fields of Roman Catholic missions have been India and China, and for awhile Japan. Here too, unhappily (that is, in India and China), the dark shadow of Jesuit accommodation to heathenism has been the deepest.

INDIA.—The first Christians from Europe were the Portuguese, who landed, under the lead of Vasco da Gama, in 1498, at Calicut, on the southwest coast. The dissensions of the many independent states opened the way for their conquests, of which, in 1510, Goa became the capital. Here a bishopric was established, which was then raised into an archbishopric, whose incumbent bore and still bears the title of Primate of the East.\* His metropolitan authority formerly extended from Southern Africa to China. The Inquisition, unhappily but inevitably, was also established in Goa, in all its baneful rigor. But neither Archbishop nor Inquisition could accomplish much amid the flood of sheer ungodliness which poured in from Europe. The reputed wealth of India brought an innumerable company of adventurers, whose unrestrained profligacy moved the indignation and incurred the indignant rebukes of the Hindus themselves. Meanwhile the uncertain endeavors of Diego de Borba and of Miguel Vaz, Vicar-General of Goa, to extend the gospel accomplished little. They established a school in Goa, it is true, for the Christian training of young people from India, China, and Abyssinia, which did good service for many years. "But still," says Kalkar, "there was lacking to the work of conversion anything like a fixed plan, and a rule of orderly proceeding." At last the right men appeared in the Jesuits.

May 6th, 1542, there landed in Goa the illustrious Francis Xavier. Of the high nobility of Spain, distinguished for learning and for eloquence, he had, in Paris, been brought over by his fellow-Spaniard and fellow-Basque, Ignatius Loyola, from visions of earthly glory to a burning zeal for the cause of Christ and of Rome, which in his mind were so absolutely one that there is no reason to suppose that even the shadow of a suspicion of any possible divergence between them ever fell upon the simple loyalty of his mind. Of Jesuit astuteness and accommodation to a worldly standard, as they afterwards developed themselves both abroad and at home, there does not appear to have been a trace in Xavier. Sunny frankness was the essence of his character. Himself one of the original Jesuits, he followed the wise temperance of its policy, and neither affected nor shunned privations and austerities. For the most part, however, he trod the way of hardship. He watched through the night with the sick; visited the prisons; trod half-shod the glowing sands of the Indian coast to care for the spiritual and the temporal wants of the oppressed pearl-fishers; met their savage op-

\* He has lately been raised to the rank of a Patriarch.

pressors with dauntless courage, with only the cross in his hand, and in the might of the spirit, by the simple power of his rebuke, inspired them with such terror that they fled. No wonder that, himself as it were a visible Christ, he soon counted so many thousands of converts from among the heathen that his voice often failed for weariness, and his arms sank exhausted in the act of baptizing. He had, indeed, in these rapid and myriad conversions to submit to the necessity of leaving the greater part of his neophytes very ignorant of Christianity, although he took care to have the catechism translated into Tamil, and to supply the new congregations with priests as fast as possible, leaving them meanwhile in the care of his most trusty laymen. It does not appear, however, that Xavier, whose labors were spread over so wide a field, both in India and Japan, laid the foundations of any very thorough instruction of his converts. He might have done more had he stayed longer. But popular instruction has never been the strong point of Catholicism in general or of Spanish Catholicism in particular. Sir William Hunter, however, says that the elder missionaries of the Roman Catholic Church in India were far too indifferent to popular instruction, but that the modern missionaries have at last become convinced that they can only break up heathen superstition by a more thorough education, and that they are now behind none in their zeal for it.

Eminent Roman Catholic authorities, and such as are thoroughly friendly to the Jesuits, remark, nevertheless, that the results of their early labors in India hardly answered to their zeal and wisdom in them. Of course they found the same enormous difficulties that still exist—the strong solidity of Mohammedanism, at that time the imperial though not the prevailing creed of India, and the immovable prejudices of Brahminical caste. We are sorry to say that in Goa itself it was an act of persecution that opened the way to a somewhat greater extension of Christianity. In 1560 the Portuguese viceroy banished certain leading Brahmins from Goa, whereupon the Jesuits were soon after able to baptize some 13,000 converts.

The immovable barrier presented by Brahmin supremacy, and the divisions of caste, finally led the Jesuits into a system of accommodation—it would be well if we could say nothing worse—which met for a while with a brilliant outward success, but in the end showed its hollowness by its collapse. A Jesuit, Robert de Nobili, of one of the most illustrious families of Tuscany, and who therefore had all the aristocratic habitudes which fitted him to play his new part to perfection, gave himself out for a Brahmin of the west allied to princes (the last assumption being the truth); perfected himself in Sanskrit, Telugu, and Tamil; performed the usual Brahminical ceremonies; suffered only men of high caste to approach him, and received these seated on a throne; produced a Sanscrit book which he declared to be a recovered fifth Veda, and produced the sworn attestation of his fellow-Jesuits that this audacious forgery had been received by them from the god Brahma, as containing a mysterious wisdom which alone could give life. The result of this unscrupulous falsehood and accommodation to the ways of heathenism was, that in three years he had gained over seventy leading Brahmins, who of course had accepted the

Christian doctrine of God, creation, immortality, atonement, and the general teachings of Christian morality, and had abandoned their idols, but who retained all the haughtiness of caste, and were permitted to sign themselves with the sacred ashes, interpreted, of course, as having only a social significance. That they were allowed to baptize their children by the old heathen names does not signify so much, as in the early church no one scrupled to use such names as Phoebe, Demetrius, Diotrophes, Apollon, Hermas, and the like.

The accommodations of de Nobili and his followers did not disguise from the Brahmins at large that the sages of Rome proposed to them a fundamentally new religion. Angry oppositions arose, but before long 30,000 converts had been gathered. Separate churches were built for the higher and lower castes, the latter being rigorously forbidden to join with the former in their worship, while the Pariahs or outcasts were forbidden even to approach the priests. Even the last sacraments were administered to them at the end of a staff, so that the administrator might not be defiled.

One of Robert de Nobili's chief associates was Juan de Brito, son of the viceroy of Brazil. He brought great numbers to the faith in the kingdom of Marava, and died a martyr in 1693. Another associate, Veschi, was equally able, learned, successful, and heroic, and barely escaped martyrdom. He lived to become a mortal antagonist of the more enlightened Danish missionaries, dying in 1747.

The accommodations of Robert de Nobili and the Jesuits to heathenism could not fail to arouse great scandal at home. The rumor even spread that de Nobili had apostatized. His kinsman, the great Cardinal Bellarmine, himself a Jesuit, though better informed than to suppose this, expressed his grief over such principles of proceeding, saying (to quote from Kalkar): "The gospel needs no such false coloring; that Brahmins are not converted is of much less account than that Christians should not preach the gospel with joyful openness. The preaching of Christ crucified was once to the Jews a scandal, and to the Greeks foolishness; but St. Paul did not therefore cease to preach Christ, and Him crucified. I will not," he continues, "argue as to individual points, but cannot refrain from declaring that the imitation of Brahminical haughtiness is sadly at variance with the humility of our Lord Jesus Christ, and that the observance of their usages has something exceedingly dangerous to the faith." It is sad to reflect that the pressure of his order brought this great and good man at length to something very much like a retraction of these sound and evangelical principles.

The other orders were naturally scandalized over the Jesuit policy. While as yet it was represented at Rome that nothing was intended beyond an allowance of certain harmless national usages, Gregory XV., in 1623, had issued a bull not unfavorable to the Jesuits. But these took occasion thereby, it is said, to push their compliances farther and farther, until at last Roman Catholic Christendom at large was in a ferment. Finally, in 1703, the Pope sent Cardinal Tournon to India, where, after thorough investigation, he suggested the decree by which, in 1710, Clement XI. rigorously forbade all accommodations whatever to heathen usages.

The Jesuits, however, paid scarcely the least

attention to the decree, and soon obtained from a later Pope, Clement XII., a virtual revocation. But at last Father Norbert, of the Capuchins, came to Rome, and there opened the matter with so much insight and unreservedness, that the wise and upright Benedict XIV., in the bull *Omnium sollicitudinum*, of October 7th, 1744, condemned and forbade the Jesuit practices in the most peremptory terms. Norbert's life, however, was held to be in such danger from Jesuit revenge that the Pope gave him leave to lay aside his habit for better disguise. He fled from land to land, taking refuge even in Protestant countries. At last, when the Jesuits were banished from Portugal, he sought a safe harbor there. "Meanwhile in India," says Kalkar, "things remained on the old footing: the order founded for the vindication of the Papacy became its antagonist, mocked at and scorned the other orders, engaged in mercantile and other secular undertakings, until these things also did their part in hastening its fall."

These conversions around Goa, proceeding from Robert de Nobili as a centre, are to be distinguished from those in the more southern parts of the peninsula, and among the humbler classes, who did not provoke so much disingenuousness. No such stain, happily, rests on the memory of Xavier. He had his share of Spanish imperiousness, but nothing of de Nobili's Italian craftiness.

The result of this collapse of Jesuit missions in India was, that more than half a century passed during which the Roman Catholic Christians of India were almost wholly abandoned to themselves. Rome does not seem, in Hither India, to be much inclined to encourage the formation of a native priesthood. The development of subject energies generally is something of which she is rather jealous than zealous. Nevertheless, when Catholic missions were resumed in India, Mr. Marshall says that over a million converts were found to have remained steadfast to the great truths of creation and incarnate redemption, though, of course, their minds had become greatly obscured as to all secondary Christian doctrine, and overspread with many heathenish superstitions. Mr. Marshall's numbers, however, must be a good deal too large, as the official statements of the church make the present number of Roman Catholic Christians to be only 1,185,142, having 996 European and 93 native priests, 2,677 churches and chapels, 1,566 elementary schools, and 64,357 scholars. For the last five years the annual rate of increase has been  $\frac{3}{4}$  per cent. Sir William Hunter gives the present general rate of Christian increase in India as 64 per cent in nine years. It appears therefore that under a Protestant government Christianity in India is chiefly advancing in the Protestant form. About 100,000 of these Roman Catholics are proselytes from the Syrian Church of India, not from heathenism. There are also 300,000 so-called Goa Christians—Catholics who have fallen out of communion with Rome during the long disputes between Portugal and the Pope over the right of nomination to the Indian bishoprics, and over the prerogatives of the Archbishopric of Goa. As these disputes are said to have been lately accommodated on very favorable terms for Portugal and Goa, which latter appears to have been advanced to patriarchal jurisdiction throughout India, the schism will probably now disappear.

In *Farther India* Roman Catholic missions

were established about two centuries ago. They are, according to the "Handbook," divided into five nationalities, including 13 vicariates apostolic. *Burma* has 3, with 147 churches and chapels, 38 European and 11 native priests, and 25,808 Catholics. *Cambodia* has 74 churches and chapels, 23 European priests, and 16,280 Catholics. *Cochin China* has 3 vicariates, 536 churches and chapels, 94 European and 94 native priests, and 124,267 Catholics. *Siam* has 2 vicariates, 67 churches and chapels, 43 European and 10 native priests, and 24,438 Catholics. *Tonkin* has 5 vicariates, 820 churches and chapels, 82 European and 258 native priests, and 437,483 Catholics. In all, 628,276 Catholics in an estimated population of about 45,000,000.

Tonkin and Cochin China have been eminently a land of martyrs. The "Handbook" remarks: "We cannot withhold our sincere admiration of the spirit which has animated both the European missionaries and the native converts of these missions. We may question some of the methods of the former and the customs of the latter; but in the presence of the courage and devotion of the missionaries, and the spirit of true martyrs manifested by both, in repeated and fiery persecutions, we have no desire to detract from their noble example. The converts in these missions have shown a manhood and constancy worthy of apostolic times."

"The difference between these missions and those of India is worthy of remark. The number of native priests in Tonkin is three times as great as in the whole of India, and as the number of converts is only about a third, the proportion is really eight or nine times greater in Tonkin, while the number of European priests is very small in proportion. This indicates much more of manly and independent spirit in the inhabitants, or of better management in the church, or it may be both."

AFRICA.—The Roman Catholic Mission in the kingdom of Congo, near the mouth of the great river, began as early as 1491. A vast number of negroes were baptized, so that, as with Xavier, the missionaries could hardly hold up their hands for weariness. Père Labat puts the number of the baptized at 100,000! Of preliminary instruction there had been none; an enemy at hand moved the missionaries to enroll as many as possible of those who might soon fall in battle in the ranks of the regenerate. The people had followed the example of their king and queen. Soon, however, the scene changed. "The mysteries of the faith," says one of the Dominican Fathers, "were something of which they were very willing to hear. But when we began to preach the moral virtues to them—that was another matter." A persecution even unto death, and headed by the newly baptized king, broke out. But the crown prince Alphonso, soon coming to the throne, displayed a steadfast zeal for Christianity. He even became, though not a priest, yet a zealous preacher. It appears, however, that he did not demand that his subjects should forsake their polygamy, but did demand, on pain of death, that they should forsake their idolatry. That rude mixture of superstition, gospel, and force, which is characteristic of Catholic mediævalism, was shown here in its perfection.

Portugal, with the profound selfishness which distinguishes all her early dealings abroad, took advantage of this new influence in Congo to secure enormous supplies of slaves. Depend-

ent as they were on Portuguese protection, the priests made faint opposition to this iniquity, and even became accomplices in it. Soon they declined in zeal, and the princes and people in interest; "the shepherds became plunderers;" it is said they quarrelled with their bishop, and went back to Portugal with great substance. Yet baptisms went on, and soon Congo was proclaimed "wholly Catholic"! A very heathenish kind of Catholicism, it appears. The court relapsed into the deepest dissoluteness, which remained proof against the efforts of the few Jesuits who came to Congo about 1550, although these did a good deal, temporarily, for religion and education among the people. Unhappily, however, they could not resist their inborn propensity to intrigue for Portuguese sovereignty, and soon, neglecting their flocks, became little else than agents to secure the King of Portugal a large supply of slaves. Scandalized at this, their superiors recalled them. The next two Jesuits were of a purer zeal, and preached vigorously against polygamy and unchastity (of which the native clergy seem to have taken little account), but soon had to shake off the dust of their feet against the king, the court, and the people. After some alternations of persecution and apparent repentance, Christianity in Congo began to decay. Then matters passed into Spanish hands. But after 150 years Christianity is little more than a shadow. This closes the first period of the Congo Mission.

The second period opens in 1640, when the Capuchin friars arrived. Meanwhile the heretical Hollanders had diffused their opinions, which, however, were easily rooted out, with the help of a little persecution. It is hard to say which was the more pious or the more rapacious—Portugal or Holland. The new missionaries now preached against polygamy, but only stirred up a persecution against themselves. They gained a victory, but soon learned to be very tolerant towards such vices "as are to be expected in men of that color." When the kings apostatized, the people did; when they came back, the people professed to do so. The Capuchins made far too much use of royal edicts, but declared that there was no hope of accomplishing anything without them! The missionary Zucchelli in 1698 declares: "Assuredly the misery is great! Here is neither honor nor reputation, neither knowledge nor conscience, neither Word of God nor faith, neither state nor family, neither government nor civility, neither discipline nor shame, neither polity nor righteousness, neither fear of God nor zeal for the welfare of souls, nor anything. And great as are the sins, scandals, and vices which they commit every day, yea, every hour and moment, yet you can never bring them to any shame for them. . . . You can say nothing of these people when you see them, except that they are in fact nothing else than baptized heathen, who have nothing of Christianity about them but the bare name without any works."

Finally, everything went into ruin together. Says Zucchelli:

"Utter ruin impends over the land, the people, the mission. For there is no wisdom, reason, counsel, policy; no one troubles himself about the common weal. Civil wars, enmity, murder, robbery, superstition, devilish arts, incest, and adultery are the people's and the

prince's virtues. Deceit in word and deed is in full vogue. As there is in the land no fortified place of refuge, men hide themselves in the wilderness."

Various subsequent attempts were made, some by the Capuchins, some by the Benedictines, to stay the rapidly advancing tide of temporal and spiritual ruin, but to no purpose. "Captain Tuckey, who in the year 1816 was sent by the English Government to explore the Congo, found during his stay on the left bank of the Congo no trace of Catholicism except some crucifixes and relics, which were strangely intermingled with the amulets and fetiches of the country. Of civilization not a trace was to be discovered; the visitors of the ship were one and all impudent, dirty vagabonds, full of vermin. With the people of Sogno the other inhabitants of the West Coast contrast to their own advantage. Among them a man presented himself on board as a priest, exhibiting a certificate; but he was wholly uncultivated, and so ignorant of the principles of the church which he pretended to represent, that he shamelessly confessed to having a wife and five concubines." Whose and what was the fault of this great ruin?

CHINA.—Christianity was preached here as early as the eighth century by Nestorian missionaries. As early as 782 it was flourishing in the two widely distant provinces of Shensi and Fokien. This appears from the celebrated inscription in Shensi, discovered by the Jesuits in 1625, whose genuineness has been established. Even as late as 1300, under Kublai Khan, Nestorian Christians were numerous and powerful in China, and in Peking itself, then called Cambalu. In 1294 the Pope sent the Franciscan John de Monte Corvino to Peking, of which Rome afterwards appointed him archbishop. Neander says of him: "This distinguished man, displaying the wisdom of a genuine missionary, spared no pains in giving the people the Word of God in their own language, and in encouraging the education of the children, as well as training up missionaries from among the people themselves. He translated the New Testament and the Psalms into the Tartar language, and had these translations copied in the most beautiful style, and made use of them in preaching. . . . He had, during his residence in this place, baptized from five to six thousand; and he believed that, had it not been for the many plots laid against him by the Nestorians, he would have succeeded in baptizing above thirty thousand." Unhappily, however, says Neander, the Nestorians ultimately succeeded in bringing his labors to naught. His sainted memory, however, remains, and the souls whom he has been the means of saving. The Nestorians naturally resented being called heretics, but cannot be acquitted of deep blame, as Monte Corvino appears to have been a man of mild and pure spirit. Finally, however, the reassertion of Chinese independence, under the Ming dynasty, and the overthrow of the friendly Mongols, drew after it the destruction of Christianity, of which every trace seems to have disappeared.

In 1517 the Europeans, in the persons of the Portuguese, re-entered China,—this time by way of the sea. In 1556, for services rendered against the pirates, who have always been so formidable on the waterways of China, the Portuguese received the islands of Sancian and

Macao. It was on Sancian that, in 1552, Francis Xavier closed his heroic and consecrated life. "Rock, rock, when wilt thou open?" expressed the spirit of his last sighs, though the words were those of an earlier missionary, in front of the frowning seclusion of the great heathen empire.

The first Roman Catholic missionary who came to China in this second era was the Provincial of India, Nuñez Barreto, S.J., who, traveling to Japan in 1555, twice spent a short time at Canton. Neither he nor his immediate Jesuit, Franciscan, and Spanish successors, however, were permitted to remain long. At last, in 1582-3, the Jesuit Michael Roger, after some five or six fruitless visits to China, obtained with Paes and Matthias Ricci, who was afterwards so notable in China, leave to remain, and many privileges from the viceroy of Canton. The first public baptism was given in 1584. In 1586 there were 40 Christians, but then persecution broke out. After the Jesuits had adopted the dress of the mandarins, they were less annoyed. In 1598 Ricci, already in high repute for his scientific attainments, and now the head of the independent Chinese Mission, was received in Peking, and established himself permanently there in 1601, dying in 1610. He is accused of having carried the conformity to Chinese usages to such a length as to have dispensed himself from his vow of celibacy, and to have married a Chinese woman, who bore him two sons. But the animosity of the other orders towards the Jesuits had become so great, that we are not to be too sure of the justice of any particular accusation against these. This animosity, which seems to have been strongest in the Dominicans, had various grounds. Jesuitism had an alertness and flexibility that contrasted very favorably with the lumbering mediaevalism and rigid orthodoxy of the Dominicans. Their attainments in literature and science were also very much greater, and drew public favor to them. They showed also a wise consideration of circumstances, to which the rather stupid stiffness of the Dominicans was not adequate. Thus, when the Dominicans asked the Jesuits how soon they intended to introduce the discipline of fasting for their converts, the latter replied, "Not until Providence relieves them from the continual fasts imposed by their poverty." Yet, on the other hand, the Dominicans seem to have been essentially in the right, and the Jesuits essentially in the wrong, as to the great question of accommodation. The controversy turned especially upon the custom of ancestral worship. The Jesuits argued—and the emperor, in a public edict, confirmed their position—that this, in China, is only a civil and social act, implying nothing in the nature of religious homage. The Pope, however, and the Protestant missionaries, after full investigation of the opposing arguments, have decided that the Dominicans and the other protesting orders were right, and the Jesuits wrong. Herr Faber, who has given a very thorough exposition of the controversy in the "*Allgemeine Missionszeitschrift*," gives as his judgment, that, had Rome taken the Jesuit side, it would have reduced Christianity in China to the position of Buddhism—a mere luxury of private sentiment, entirely subject in all practical matters to the rigorous civic secularism of Confucianism.

Mr. Marshall, in his eulogy on Catholic Mis-

sions, gives glowing accounts of the wonderful successes which attended the Jesuit efforts in every class of Chinese society, and how, when persecution broke out, brothers and sisters of a former emperor—one of whom had even been viewed as a possible successor—cheerfully underwent for Christ's sake banishment, imprisonment, chains, and other maltreatment, under which several sank in martyrdom. The slight allusion to this family in Wetzer and Welte's great Roman Catholic encyclopedia confirms the belief that there were such imperial converts, and that they did exhibit this example of cheerful Christian faithfulness unto death. If we had nothing but the "*Lettres Edifiantes*" to depend upon, we should not know what to think. These princes and princesses, therefore, may be likened to the husband and wife, Clement and Domitilla, cousin and niece of the Emperor Domitian, who, in the first century underwent, the one death, the other banishment, for the name of Christ.

In 1617 the Jesuits had about 13,000 converts; in 1650 about 150,000; in 1664, 257,000. The Franciscans and Dominicans together had hardly more than 10,000. The conversions went on increasing until towards the end of the century, when the papal decisions against the accommodations allowed by the Jesuits, and the bitterness with which the other orders and the papal legates enforced them, led to violent persecutions. One of the legates, Cardinal Tournon, was sent to Macao, and died in prison there. Some even say that the Jesuits poisoned him. Many Christians were martyred; much greater numbers fell away, partly under the terror of death, and partly under the exasperation of national feeling. Compromises were for awhile admitted by the representatives of the Pope, which somewhat stayed the desolation. But Rome at last, in 1742, in the pontificate of Benedict XIV., issued a peremptory and irrevocable decision, forbidding every accommodation that could be interpreted as a concession to paganism. Then the persecutions broke out more violently than ever, and according to Wetzer and Welte, the Christian faith was almost rooted out. The Papacy is certainly highly to be commended for its immovable faithfulness to the essential principles of Christianity, even at the cost of losing almost all that had been won. Even Clement XI., so servile to the Jesuits in France, was immovable here. It is much to be regretted, however, as Herr Faber thinks, that Rome could not exhibit this Christian faithfulness without at the same time alloying it with so much of her own characteristic haughtiness, with such a contempt of the imperial representations, and such a determination to carry through the right position by overbearing will, that the emperor, the mandarins, and the people gathered the deep impression, that if they would become Christians they must cease to be Chinese.

At various times the devoted Roman Catholic missionaries in China underwent various persecutions, banishment, imprisonment, scourging and even death. The first actual martyr was the Jesuit Francis Martínez, murdered in 1606. The Dominican Francis de Capillas was beheaded in 1648. In 1665 five Christian mandarins were beheaded. The regent who commanded this was, however, soon after punished by the young emperor with death. During the exasperation caused by the decree

of Benedict XIV., the Dominicans Peter Sanz, Serrano, Royo, Alcober Diaz, and the catechist Ko (Sanz being a bishop), and the Jesuits Anthemis and Henriquez, suffered death in 1747.

Only obscure accounts are accessible as to the subsequent resuscitation of Roman Catholic missions in China. There were still hundreds of families in which Christianity had become hereditary, and there have doubtless been many conversions in this century. In 1805 there was a cruel persecution; also in 1816 and in 1820. In these later persecutions three or four priests suffered death, one of them being Vicar Apostolic and Bishop *in partibus*. The present estimated number of Roman Catholic Christians in China is 483,403; European priests, 471; native priests, 281; scholars, 25,219.

The controversy which has raged so violently among Protestant missionaries in China as to the true name of God,—whether it should be Shang-ti, Shin, or Tien,—had previously rent the Roman Catholic ranks. They have finally decided on Tien-chu, Lord of Heaven.

It is to be feared that the Jesuits, as commonly, have finally tired out the Holy See, so that it connives at a good many practical infractions of the edict of Benedict XIV. It is, moreover, greatly to be deplored that two excellent edicts, rendered from Rome as early as 1615, for the celebration of the sacred offices in Chinese, and for a vernacular translation of the Scriptures, have both remained ineffective; yet the incidental notices of Abbé Huc show among the Roman Catholic converts a good deal of moral purity and genuine Christian piety.

JAPAN.—Japan, say Wetzer and Welte, had scarcely been opened to Europeans, when St. Francis Xavier, with some companions, hastened thither to plant the standard of the cross. Japan, it is known, until after the revolution induced by the American interposition, was divided into a number of feudal states governed by Daimios, who were subject in theory to the divine Mikado, but in fact had their lord paramount in the intensely human Shogun or Tycoon, the Emperor or General-in-chief of the realm. This feudal looseness of cohesion facilitated the spread of the gospel, as in Germany of the Reformation. Unhappily the Mikado had no such practical power of interfering with his military mayor of the palace as the Pope had of interfering with the emperor; so that when the Emperor made up his mind, his vassals had finally to yield. For a long while, however, the preaching of the missionaries was undisturbed, and in 1582 there were more than 200,000 Japanese Christians, with 250 churches. Even three Daimios were baptized. At last, however, the Shogun Taiko, or Taikosama, gradually became jealous of the missionaries, suspecting them of being agents of Portugal, and after the temporary union of the two Iberian crowns, agents of Spain for reducing Japan to dependence. It is customary for Protestant narrators to assume that of course these suspicions were well grounded. But our disposition to think ill of the Jesuits sometimes overshoots itself. As the details of their asserted intrigues seem to have been given out a good many years after the persecutions had begun, they were probably manufactured in order to justify the persecutors. At the same time there is reason to suppose that the Jesuits did inspire their converts with a habit of looking to Spain and Portugal

which might have injured the national instinct of independence. The Jesuits at this time were zealous partisans of the Spanish supremacy throughout Europe, and could hardly have been entirely relieved of their Iberianism by going to the East. Whatever the immediate occasion of Japanese suspicion may have been, Taiko began to persecute the Christians about 1582. The steadfast chastity of Christian maidens is said to have been one of the causes which inflamed the wrath of the imperial voluptuary. The inconsiderate zeal of some Franciscans, also, who persisted in public preaching after the Jesuits had discontinued it, is said to have increased his displeasure. On the 5th of February, 1597, 6 Franciscans, 3 Jesuits, and 17 other Christians were crucified. With the sound of psalms these heroes and followers of Christ breathed out their souls. From 1598 till 1611, under a new Shogun, there was a respite. But then a fearful revolution of sentiment in the Shogun's mind brought him and his three successors to that persevering and concentrated cruelty towards the Christians, which finally rooted out their religion. The guilt of this is laid by the Catholics on the Dutch, who revenged the cruelties of Spain towards them by stirring up all the terrors of heathen ferocity against the innocent converts of Iberian missionaries. We can well believe the charge, for Holland, in her Oriental policy, has always shown and still shows a cold-blooded indifference to everything but the pure love of gain, which, according to a Dutch missionary in Java, renders the very name of a white man odious to her subjects there. The Hollanders stirred up afresh the slumbering jealousies of the government towards Spain and Portugal, and towards the Jesuits, until its rage was so great, that all common forms of torment being too little for the wrath of the rulers, they exhausted their ingenuity in devising new tortures.

It has well been said that the Roman amphitheatres never witnessed, in men, women, or children, more resolute heroism of martyrdom. Here again, for a good while, the blood of the martyrs was the seed of the church. From Taikosama's death in 1598 to 1614, the Jesuits baptized 100,000 converts, and for many years afterwards they baptized several thousand yearly. Some apostasies took place, but in general all the Christians, princes, nobles, men, women, and children, went joyfully to their doom. "Children endured the most terrible deaths, without giving a sign of suffering." When any were conducted to the crown of martyrdom so greatly desired, they would be accompanied by many thousand Christians, who followed in triumphal procession, praying, praising, and bearing lighted tapers in their hands. But persecution raged incessantly, and finally outstripped the increase of the church. At last, in desperation, 37,000 Christians seized the fortified place Simbara, since known as the Mount of Martyrs, and there, after a long defence, were, shameful to tell, with the help of the Dutch, at length slain almost to the last man. Then were published the edicts forbidding "the God of the Christians, on pain of death, to re-enter Japan." Then too was introduced the requirement, maintained till within a few years, that all the subjects of the realm should, once a year, trample on the crucifix. With this requirement the cold-blooded Dutch merchants infamously complied, doubtless ex-

cusing the profanation under the pretext that the crucifix was a superstitious emblem. Until our own generation the real Christianity of Holland does not appear to have overflowed into the eastern world. Now, however, we are glad to say, it begins to show an undaunted and belligerent front towards the soulless ungodliness of Dutch government abroad. And the government itself is beginning to be ashamed of its apathy, and to promise its best support to the teachers of a living Christianity in the East Indies.

When Japan was reopened by the Americans, it was discovered that there were hundreds of concealed Roman Catholics in one province. A number of martyrdoms have taken place even since then, but are now, of course, discontinued. The Rev. Edward A. Lawrence, who has lately visited Japan, informs us that in the absence of Bibles, which unhappily Rome, as usual, had neglected to provide, these secret Christians had even forgotten the baptismal formula, and used to baptize their children "in the name of the Holy Jerusalem!" Mr. Lawrence asked a Jesuit missionary there whether such a formula would be valid. "No," he answered, "the Church must have her rules. But," he added most justly, "God is very much kinder than the Church."

The present number of Roman Catholic Christians in Japan is 30,230, with 84 churches, 78 priests, a good many being natives, and a number of schools. The missionaries are described by a native Japanese preacher as good men of irreproachable lives, humble, laborious, and sympathetic, sharing willingly in the poverty and the toils of their people, who belong almost altogether to the poorer classes. Among the more influential classes they make no headway, and their numbers increase much more slowly than those of the Protestants. He is of the opinion that they are doing a good and lasting work, but that the future of Japan does not rest with them. The superstitions, servility, and anachronistic forms of thought which weigh down their system, find no acceptance with the cultivated mind of Japan. There seems to be, however, a vitality and solidity in their work utterly lacking to the missionary work of the Russo-Greek Church, which appears to be fading away. As Dean Stanley says, the whole Western Church, from pope to presbyter, as compared with the Eastern Church, is full of the vigorous movement of thought and life.

The missionary operations of the Roman Catholic Church in most other regions of the world not yet noticed, especially in the Pacific, and in Madagascar, are so complicated with the Protestant work, and are so largely a simple proselytism from Protestantism, that they can hardly be put on the same level with her properly missionary labors, as already described. In Madagascar, however, they have 84,000 adherents. In Africa as a whole (including Madagascar) they reckon 210,000 converts. In Oceania, about 75,000. In the regions adjacent to China, 78,000. The noble witness rendered to Christ by the martyrs of Uganda is fresh in memory. Of these some 20 were Protestants, and about 180 Catholics. Their numbers were doubtless greater, and the young tyrant Mwanga raged most fiercely against them, being himself an apostate Catholic catechumen. The fortunes of the Protestant and the Catholic Mission of Uganda have been so

intertwined, that their history must be treated as one. Père Lourdel thinks that the Christians might have maintained their ground\* there if they had not, after Mwanga's dethronement, against the admonitions of their guides, shown an inordinate zeal to fill the higher offices with their own men, and thereby awakened the jealousy of the Moslems, who had joined them in resisting the pagan tyranny. All Christendom, Catholic and Protestant, is now engaged to withstand the flood of Moslem fanaticism which is advancing from the Soudan towards the Mediterranean and towards the Lakes.

**Missionary Organization of the Roman Catholic Church.**—Rome divides the whole world into two great sections, *terra catholica* and *terra missionis*. Within the former her missionary organization has, properly and ordinarily, no application; within the latter it controls all ecclesiastical persons and processes whatever, archbishops and bishops themselves being subject to it.

*Terra catholica* (perhaps more properly *terrae catholicae*) is definable as including all those countries whose governments lend the support of the secular arm for the coercion of all baptized persons, whether Catholics, heretics, or simple schismatics, into obedience to the Holy Roman Church; that is, to the Roman Bishopric, which claims a maternal superiority to all other churches, that is, bishoprics, and claims the right to instruct them, and by inference to govern them. All schismatics or heretics, therefore, within the limits of any bishopric, may (it is held by the prevailing opinion) be lawfully compelled to yield obedience to their Catholic bishop, and in him to the Supreme Bishopric of Rome, which possesses throughout the Church both an ordinary and an appellate authority. The latter is chiefly in use, but the former may at any time be exercised. Wherever, then, the civil government, being apprised by the Holy Office of the Inquisition, a commission of Cardinals of which the Pope himself is the Prefect, that heresy or schism is prevailing within its jurisdiction, lends its authority to crush it, there, and there only, is *terra catholica*. All the rest of the world, Christian, Moslem, and Heathen, is *terra missionis*.

But as at present scarcely a government in the world subordinates itself to the Holy Office, which has now no tribunals outside the Vatican, and as almost every government of a Roman Catholic country has formally declared liberty, not only to Jewish worship, which Rome herself protects,† but to every variant form of Christian worship, does it not follow that there is now no *Terra catholica*—that the whole world is *Terra missionis*? There is still, however, a noticeable distinction between the two regions, as in the former the popular and even legal presumption commonly recognizes Roman Catholicism as the predominant religion. And in the hope that Catholic countries may even yet come to a better mind, and restrain the "madness" of freedom of conscience, Rome still thinks it prudent to maintain the distinction *dissimulando*.

Rome has no different agencies for proselytism of Christians and for conversion of unbelievers. Any country which does not, through its government, give effect to its spiritual subjection

\* Which they have since recovered.

† At least if private.

to her, is indiscriminately included in the *Terra missionis*. Even the Eastern churches, although their ordinations are acknowledged, and although the prevailing Roman theory concedes to them spiritual jurisdiction, are nevertheless subject to the activity of the Propaganda, which, however, does not appear in fact to extend its operations among them except so far as they are in Moslem or pagan countries.

Rome, however, makes very important distinctions, within the *Terra missionis*, between *infideles*, *schismatici*, and *heretici*. The former term includes all who have never embraced the faith. For the conversion of these, it is held, the only lawful means is Persuasion, as they have never been subject to the jurisdiction of the church. *Heretici*, being baptized, are subject to her jurisdiction. For the restoration of these the lawful means are Persuasion and Coercion, the former being preferable. *Schismatics*, who are orthodox, but disobedient to Rome, may likewise, as occasion serves, be either persuaded or coerced into returning. Perhaps the only simple *schismatics* are the members of the Greek Church, which is not impeached by Rome of heresy, though she impeaches Rome of heresy, and sometimes speaks dubiously of her orders, and even of her baptism. The Greek and even the Monophysite and Nestorian bishops appear to be often recognized by Rome as the legitimate bishops of their sees, and the few Greek bishops, at least, who chose to admit the papal supremacy were received without difficulty to an equal suffrage in the Vatican Council. But in the Levant, if Rome spies an advantage, she is very apt to forget her concessions, and to thrust in her own nominees where she cannot secure the submission of the actual incumbents. Her policy here, it appears, is peculiarly odious and violent, and the examples given by her agents are often the reverse of reputable. Reordination, however, of the Eastern clergy she does not permit, even where, as in Abyssinia, the rites are extraordinarily irregular and defective. The succession, she says, is unquestioned, and the sacramental intention is sound, and sufficiently expressed.

In the Protestant world, however, she is not embarrassed by any question of orders or of jurisdiction. Only as to the Anglican communion is there with her even a pause of thought as to the former: and since the accession of Elizabeth she has always treated the Anglican orders as null, maintaining that the probabilities against their valid transmission are so overwhelming as to leave her under no obligation to pursue remote considerations and abstract possibilities. And as to jurisdiction, she declares even the Old Catholics of Holland, Germany, and Switzerland to be void of this, although she acknowledges the validity of their episcopal succession.

Protestants, therefore, are held to be destitute of all the ordinary means of grace except the sacraments of Baptism and Matrimony. She pursues her missions among them almost as if they were heathen. She does not, however, as often supposed, designate Protestant countries as *partes infidelium*. *Infideles*, as noted above, is the technical term of Rome and of Trent for all human beings who are neither baptized nor catechumens. Its application to cover heretics is casual, and seldom, if ever, official. *Partes infidelium* are those Mohammedan re-

gions whose ancient Christian cities now give a titular dignity to some three hundred Roman Catholic bishops who have no actual dioceses. As they are largely employed in Protestant countries, their former style of "Bishops *in partibus*" was often mistaken as referring to the place of their residence, and not, as it did refer, to the location of their nominal sees. To obviate this not unnatural misunderstanding, the present Pope has courteously directed that they shall henceforth be known as *episcopi titulares*.

All ecclesiastical activity of the Roman Catholic Church within the *terra missionis*, whether of proselytism, conversion, or ordinary administration, is subject to the control of the *Congregatio de Propaganda Fide*. This great and powerful commission, which—subject, of course, to the Pope's intervention at any point—exercises papal authority over all Roman Catholics throughout the Protestant, Oriental, Moslem, and Pagan world, was instituted by Pope Gregory XV. in the year 1622. This Pope was the first pupil of the Jesuits who had ascended the chair, and therefore was naturally interested in missions. The *Congregatio de Propaganda*—familiarily called The Propaganda, and by Roman Catholics simply Propaganda—has permanent authority within regions yet extra-Christian, and within Christian regions until they become again *terrae catholicae*, subject in its modes of proceeding to the distinction laid down in a brief of Pius VI. of the year 1791: *Discrimen intercedit inter homines, qui extra gremium Ecclesiae semper fuerant, quales sunt Infideles atque Iudaei, atque inter illos, qui se Ecclesiae ipsi per susceptum baptismi sacramentum subjecerunt. Primi etenim constringi ad catholicam obedientiam prestandam non debent, contra vero alteri sunt cogendi*. So soon as this *coactio* is feasible, a region would cease to be a *terra missionis*, and would become a *terra catholica*, the yet unevangelized populations, however, remaining still the objects of missionary activity, and not becoming subject to the Holy Office, so long as they do not act offensively toward the Church.

The *Congregatio de Propaganda Fide*, which, of course, has its seat at Rome, is composed of a varying number of cardinals, at present 31, some being non-resident correspondents, and of a Secretary and Protonotary, on whom the practical business mainly devolves. There are also consultors and a large force of officials. It has also a training college for pupils from almost every nation under heaven. There are also in Rome various national colleges and monastic training houses for missionaries. Yet the whole number of pupils appears to be small compared with those that are trained for the priesthood in Protestant countries and other missionary jurisdictions.

Where the Roman Catholics in a country, being few, have never been organized into a diocese, or where the bishoprics have fallen under Mohammedan or heretical control, there the Pope, as having ordinary jurisdiction throughout the Church, is sole diocesan. The first stage of organization is the appointment of a priest as papal representative, with the title of Prefect Apostolic. He has almost unbounded authority (under the Propaganda), being empowered to station priests at discretion within his prefecture, and to grant dispensations almost *ad libitum* from every ecclesiastical

precept not included in the *jus divinum*, from which last, of course, the Pope himself cannot dispense. If the mission flourishes, and there is a call for a superintendent with power to ordain to the priesthood, the Prefecture Apostolic becomes a Vicariate Apostolic. The distinction does not appear to be a hard-and-fast one, as there are occasionally Vicars Apostolic that are simply priests, who have to send elsewhere for new clergymen.

Almost all, however, are bishops *in partibus*, or, as they are now called, Titular Bishops. Both prefects and vicars are movable at pleasure.

If the Church has won or recovered such a following (especially in Protestant countries) as to warrant it, the Pope proceeds to organize a regular hierarchy of diocesan bishops, usually arranged in metropolitan provinces, each under the presidency of an Archbishop, who, besides his ordinary diocesan authority, has a certain right of determining appeals from his suffragan bishops, and always presides in the Provincial Council, whose decrees, when ratified by the Pope, have binding force. The bishops of the United States, moreover, have three times been convoked by Rome in Plenary Council, the Archbishop of Baltimore, the bishop of the eldest national see, having been each time appointed to preside as Apostolic Delegate. The decrees of these councils, of course, when papally ratified, are binding for the whole country.

The diocesan bishops of England and America are not, like mere Vicars Apostolic, remarkable *ad nutum*, but are understood to enjoy fixity of tenure, like those of Catholic lands. The cardinal's rank enjoyed by the present Archbishop of Baltimore greatly increases his influence, but adds nothing to his episcopal or metropolitan authority. As Cardinal he has no jurisdiction outside the city of Rome. And as belonging to a missionary jurisdiction, he, and all other American bishops, are still controlled by the Propaganda, due regard, of course, being had to the more developed character of their sees. The bishops enjoy the same powers with Vicars Apostolic, of dispensing from ordinary canonical restrictions. These powers, granted from Rome for terms of five years, are known as the Quinquennial Faculties.

Previous to the institution of the Propaganda missions were pursued in a somewhat disconnected way. Each order sent out its missionaries for itself, who rendered account of their activity only to their own provincials and generals, these latter, doubtless, frequently communicating with the Holy See, and obtaining from it such suggestions, exemptions, consecrations, pecuniary subventions, and other aids as it might be inclined to grant and they to receive. But since 1622 the control of all missions, among heretics, schismatics, and pagans, has lain in the hands of the Propaganda. Yet the bonds of connection within each monastic order are so strict, the authority of its superiors so unbounded, its policy and spirit, and even its doctrinal tenor, so specific, and the character attributed to each of the elder orders so sacred, that the comparatively new *Congregatio de Propaganda Fide* has doubtless to accommodate itself largely to this distinctness of action. The Jesuits, above all, though willing enough to accommodate themselves in form to the Papacy and its delegations, have, in

fact, as is very well known, been much more disposed to govern Church, Pope and all, than to submit to any of them. In what way, and how far, the missionary operations of this overbearing society, or of the other orders, have been actually subordinated to the Propaganda, is something which it would require a profound interior knowledge of the workings of Roman Catholicism to decide. It must suffice us to know that every missionary, Jesuit, Benedictine, Franciscan, Dominican, of whatever order or of the secular priesthood, is subject to the supreme and universal episcopate of the Pope as ordinarily exercised through the Propaganda.

The orders, especially the Dominicans and Capuchins over against the Jesuits, have carried on their missions, especially in India and China, with far more bitterness of controversy against each other, than has prevailed between Protestant denominations the most widely remote. The Jesuits indeed long seemed disposed, both among Pagans and Protestants, almost to claim a monopoly of conversions, and if any one of another order, especially among the heretics, was guilty of a success, Pascal has described to what extremities their animosity would sometimes go. It was these internecine wars that finally came so near to ruining Roman Catholic missions in the far East. But since the suppression and restoration of the society, which has now an almost uncontested right of control in the church, and which in its turn has doubtless learned wisdom by its tribulations, we hear no more of these scandalous dissensions. The Jesuits doubtless take whatever fields of activity they wish, and leave the rest to others. There appear to be among the missionaries but few secular priests, that is, priests who, like the ordinary parish clergy, are subject only to the general authority of the church, and not to that of any monastic order. The native clergy from among the heathen are probably for the most part seculars.

The Roman Catholic laity appear to have just the same privileges in regard to missions that they have in regard to every other ecclesiastical interest, namely, the privilege of contributing of their substance for them and of being absolutely passive as to the disposal of it. The consequence is what might be expected. Assuming 100,000,000 as the number of active Roman Catholics, which almost equals the largest estimate of ostensible Protestants, it is estimated, as has been stated by Cardinal Lavigerie, that the Protestants contribute about twenty times as much for foreign missions. Whether lay associations, contributing to foreign missions, have a right to designate the objects\* to which their gifts shall be applied, and to enter into correspondence, say with converted pagans, does not appear by examining the *Annals of the Propagation of the Faith*, or by a somewhat hasty reference to *Les Missions Catholiques*. Such an intervention of the laity would, indeed, be quite out of keeping with the general spirit of the Church.

France is the great centre of Roman Catholic zeal for missions among the heathen. The cheerfulness and kindly sympathy of the French character, when purified and elevated by Christian faith, make French priests and nuns by far the best missionaries. The Society

\*It appears that some lay societies send their gifts to particular regions.

for the Propagation of the Faith, the seat of which is at Lyons, raises far more money for this end than any other similar Roman Catholic association. How the vast extent of Roman Catholic missions outside Christendom is maintained, it is difficult to say. The converts doubtless do much; the Propaganda has large means; the Pope makes ample contributions; and missionary bishops and priests may not unfrequently supply their own modest support from their private resources. The orders also, it may be presumed, have a natural interest in maintaining the efficiency of such missionaries as belong to them. The Jesuits especially are popularly supposed to be an exceedingly, even an inordinately, wealthy society.

It thus appears, from the somewhat vague lines in which we are able to portray the missionary activity of the Roman Catholic Church, that outside Christendom, while allowing ample play to the peculiarities of individual habit and devotion, and to the specific activities of various monastic institutes (some of which, like the brethren of the Christian schools, and various female orders, are devoted exclusively to education), it reserves an undisputed and all-pervasive control to Rome. Voluntary societies are welcome as a means of procuring money, but the missions themselves are through prefects apostolic, vicars apostolic, and more developed sees, at every point in the hand of the Church.

**Romansch Versions.**—The Romansch belongs to the Græco-Latin branch of the Aryan family of languages, and consists of three dialects, the Upper and Lower Engadine (so called because spoken in the Engadine, Switzerland), and the Oberland.

(a) *The Upper Engadine.*—A translation of the New Testament into this dialect was published by Jachiam Bifrum (Basle, 1560; Püschlaff, 1607), Griti da Zuoz (Basle, 1640), and Menni (Coire, 1862). The latter's version is that circulated since 1882 by the British and Foreign Bible Society. The Psalms were published by Lorenz Witzel (Basle, 1661).

(b) *The Lower Engadine.*—The Psalms were translated by Ciampel (1562, Lindau, 1606); parts of the Old Testament were published by J. Pitscher Saluz, 1657 seq., and the entire Bible by Jac. Ant. Vulpio and Dorta a Vulpera (Basle, 1679, based on Diodati's Italian Version). Later editions, Basle, 1743. The New Testament was again published in 1812; the Old Testament of T. Gaudenz by the Coire Bible Society in 1815. An edition of the entire Bible was published at Cologne, 1867-1870.

(c) *The Oberland.*—In this dialect, which is spoken in the Grisons of Switzerland, Luis Gabriel published the New Testament at Basle, 1648. J. Grass edited the Psalms at Zurich, 1683. A version of the entire Bible was published at Coire in 1718, 1818-20, in 2 vols., and by the British and Foreign Bible Society at Frankfurt in 1870. The Coire Bible Society published in 1856 an edition of the New Testament, made by Otto Carisol.

(Specimen verse. John 3 : 16.)

Engadine.

Perche chia Deis ha taunt amâ 'l muond, ch'el ha dat sêis unigenit Filg, aciò chia scodün chi craja in el nun gija a perder, mo haja vita èterna.

Oberland.

Parchel Deus ha tenui il mund aschi car, ca el ha dau siu parsul naschiu figl, par ca scadin, ca erei en el, vomi buc a perder, mo hâgi la vita perpetna.

**Rosario**, a city of Argentine Republic, South America, in the province of Santa Fé, on the right bank of the Paraná, 170 miles north-west of Buenos Ayres. Population, 40,000. It is the second commercial city of the republic, is well laid out, with neatly-paved gas-lighted streets, traversed by cars. Climate temperate, healthy; average, 78° F. Mission station of the M. E. Ch. (North); 3 missionaries. South American Missionary Society; 1 missionary.

**Rotuma**, an island north of the Fiji Islands; has 2,500 inhabitants. In 1841 some evangelical missionaries landed from Tonga, in 1846 the French Jesuits, and in 1869 began the war between the two parties. But in 1879 the English Governor of the Fiji Islands annexed Rotuma, and the Jesuits left. Mission of the Wesleyan Methodist Church under the Australian Conference; 1 native preacher.

**Rotuma Version.**—The Rotuma belongs to the Melanesian languages, and is spoken in Rotuma Island. The first portions of Scriptures which were translated into this language were the Gospel of Matthew, the 19th Psalm, and the 13th chapter of 1st Corinthians, made by the Rev. Joseph Waterhouse, with the assistance of a Fijian teacher named Eliezer, in 1857. They were printed at Hobart Town, Tasmania. In 1864 the Rev. William Fletcher of the Wesleyan Missionary Society settled at Rotuma and translated the entire New Testament, which was printed in 1870 at Sydney, at the expense of the British and Foreign Bible Society. The edition consisted of 2,500 copies. A second and revised edition was carried through the press by the Rev. James Calvert in 1885. Thus far 4,020 portions of the Scriptures have been disposed of.

(Specimen verse. John 3 : 16.)

Ne e fuamamau ne hanis on Oilitu se rantei, ia na on Lee eseamu, la se raksa teu ne lelea ne maa se ia, la iris po ma ke mauri seegataaga,

**Roumania** is the name given to the kingdom formed in 1861 by the union of the two principalities, Wallachia and Moldavia. Its independence from Turkey was proclaimed by its people in 1877, and was confirmed by the congress of Berlin in 1878. Its area is estimated at 48,307 square miles. On the northeast it is separated from Russia by the river Pruth and the Kilja mouth of the Danube, which latter river forms its southern boundary west of Silistria. The Transylvanian Alps and the Carpathian Mountains form its western and north-western boundaries. That portion which lies between the Danube and the Black Sea is called the Dobrudja, and differs greatly from the rest of the kingdom. The climate has great extremes of temperature; in winter the cold northeast winds are very trying, while in the summer the southwest wind is scorching in its intense heat. The rainfall is not abundant. Agriculture is the principal occupation of the people, though not a few cattle and sheep are raised. The government is a constitutional monarchy, and the king is assisted by a senate of 120 mem-

1822 the Psalms were published by the Holy Synod, the translation having been made by the Rev. Dr. Paosky, of the Cathedral of St. Petersburg. Editions of the New Testament, as well as of the Psalter, were printed and published at Leipsic, 1838, 1853, and at London, 1862. The Psalms were the only part of the Old Testament which was published by the Russian Bible Society. To supply the people of Russia with the entire Old Testament, the British and Foreign Bible Society engaged Prof. Dr. Levisohn to undertake the work, but he was cut off suddenly in the midst of his career in 1868. The work was taken up by Prof. Chwolson, and in 1876 the Old Testament in modern Russ, as translated by Levisohn and Chwolson, was printed at Vienna. In the mean time the Holy Synod had also issued the Russ Bible, and an edition of the Bible was printed by that body for the British and Foreign Bible Society in 1881, with the Apocryphal Books omitted, and the Septuagint readings in the Canonical Books expunged. Prof. Astafieff read the final proofs of this edition, in order to secure a pure text, and the Authorized Russ Bible can now be circulated by the British Bible Society. The edition consisted of 20,000 copies. For the Russian blind, who number from 160,000 to 200,000 souls, the British Bible Society issued the Gospel of John, and the Sermon on the Mount, according to Moon's system, in 1880.

(Specimen verse. John 3. 16.)

Ибо такъ возлюбилъ Богъ мръ, что  
отдалъ Сына своего единороднаго, дабы  
всякій, вѣрующій въ Него, не погибъ, но  
имѣлъ жизнь вѣчную.

**Russelkonda**, a town of Madras, India, in the mountainous district of Gumsar. Population, 2,631. Mission station of the Geneva Baptist Missionary Society (1861); 1 missionary, 69 church-members.

**Russia**.—Mission work has been attempted at different times in different parts of this empire by the Basle and Moravian Missions, the London Missionary Society, the Scotch Free Church, etc., but it has never been successful, owing to the repressive action of the Russian government, whose laws forbid any subject to change his religion except as he becomes a member of the State Church, a branch of the Oriental Greek Church. The American and British and Foreign Bible Societies have accomplished a good deal in the form of Bible distribution (see articles on those societies).

**Russians**.—The Russians are the most numerous Slavic nation, numbering over sixty millions. They are divided into three chief branches: Great Russians, Little Russians, and White Russians. The Ruthenians or Red Russians, living in Austria, are also classed as a branch of the Russians. The distinctions between these various branches are rather linguistic than national. The great mass of the Russians belong to the Eastern Church, while 3,108,000 are *Uniates* or Unionists, 500,000 Catholics, and the number of the dissenters (*Raskolniks*) is variously estimated from 3 to 11 and even 15 millions.

The orthodox Russians use the Slavonic language in their church services; so also do the

*Uniates* and the Dissenters, while the Catholic Russians use the Latin liturgy. In their literature all the Russians use the *Kyrillitza* alphabet. The Russian language belongs to the southeastern branch of Slavic languages, and is related to the Bulgarian and the Servian. It is divided into three dialects: the Great-Russian, the Little-Russian, and the White-Russian. The first of these dialects forms the Russian literary language of the present day; the Little-Russian may be considered as a distinct language, though related to the Great-Russian, while the White-Russian occupies a middle place between Great-Russian and Little-Russian, and contains elements of both these and of the Polish language. The language of the Ruthenians in Austria is Little-Russian.

The origin of Russia has been traced back to a group of Slavic tribes who inhabited the country around Kieff. They lived in separate communities, and were united into one government when Rurik, with his Varinagian companions, came to rule over them. During the reign of Prince Vladimir (972–1015) Christianity was introduced into Russia from Byzantium, and with it the productions of Byzantine literature found their way into the country. Owing to the very close proximity then existing between the Bulgarian and Russian languages, the Russians copied also several of the productions of the ancient Bulgarian literature. The most ancient monument of this literature is “Ostromirov’s Gospel,” of 1053. In 1224 the Tartars invaded Russia and ruled over her for more than two centuries; and although their rule did not denationalize the people, it left its imprint upon the civil administration of the country, upon the social condition of the people, and upon their language. The Tartar dominion retarded the onward progress of Russia, and it was only in the reign of Peter the Great (1689–1725) that Russia began its emancipation from its semi-Asiatic, semi-barbaric condition, and became fit to take a rank amongst the European powers.

The reforms of Peter the Great could not be executed without producing discontent in the land. Before him the Patriarch Nikon, one of the greatest men on the patriarchal throne in Russia, roused the indignation of the people by attempting to revise the Bible and the liturgical books, and to purge them from the errors that had crept into them through the ignorance of the transcribers. Nikon was denounced as a heretic, his corrections were deemed sacrilegious, and a great many people refused to accept the revised books, and seceded from the Church. These were and are still called Dissenters (*Raskolniks*), and although the points on which they originally disagreed with the Church were puerile, they have clung and do still cling to their notions with an astonishing pertinacity. In their eyes the present Russian Church is not a true Church, the Tzar is an antichrist, and they only are the true Christians, because they hold to the old faith. The Russian Dissent has given rise to a great many sects, some of which profess the wildest vagaries. Nikon’s revision of the church books is the one used now in the Russian, Bulgarian, and Servian churches, and its language, modified according to the Russian orthography, is known as the Church-Slavonic.

The Russian was governed originally by archbishops or metropolitans, who were ordained by the Greek Patriarch of Constantinople, and several of whom were Greeks. But after the

capture of Constantinople in 1453 the metropolitans were consecrated by a council of bishops, and in 1589 the chief metropolitan was raised to the rank and dignity of a Patriarch. The Patriarchate lasted till the time of Peter the Great, who, in order to curb the opposition of the clergy to his reforms, abolished it and replaced it by a Synod, whose head was to be the Tzar. This reform has lasted till now, and the Russian Church is governed by it. But though the Tzar is the real president of the Synod, he never takes any part in its deliberations, but is represented by a substitute, usually a layman, who bears the title of *ober-prokuror*. The Synod can do nothing without the sanction of the *prokuror*; in fact, he is the Synod. The Tzar's prerogatives, however, are limited to the administration of the Church; his authority does not extend to matters purely spiritual, and he cannot interfere with the dogmas of the Church. The constitution of the Synod and of the Russian Church in general is such that it places the clergy under the authority and supervision of the government and makes it subservient to the interests of "the powers that be."

**Russ-Lapp Version.**—For the people of Russian Lapland, Magister Genetz translated the Gospel of Matthew. The work, after having been examined and approved by Prof. E. Lönnrot, was printed in 1877 by the British and Foreign Bible Society. The people who speak that dialect number about 4,000 or 5,000.

(*Specimen verse.* John 3: 16.)

Тян гудйк што Иммель нит шабэши  
тап альме, што иджес Альге, эхту-  
шэнтма эцдй, тэн варас што юкьянъ,  
Кіе Сонне віер, ій майкьяхъ, а лехъ  
соніе агесалмуш.

**Rustchuk**, a city in Bulgaria on the Danube, 187 miles by rail northwest of Varna. Population, 30,000. Mission station of the Methodist Episcopal Church (North); 2 missionaries, 3 native helpers, 1 theological seminary, 24 students, 1 other school, 14 scholars.

**Rust en Vrede**, a station of the Moravians in Surinam, Dutch Guiana, South America. It was organized as a separate congregation in order to relieve to some extent the work in the large church of Paramaribo, and is situated in a suburb on the southwest side, in which during the last few years a great number of Negroes belonging to the Moravian Church had settled,

having migrated thither from the plantations. This suburb is divided into numerous squares by streets running at right angles. One looking down a street sees only what looks like a pathway leading through a wood far away into the dense forest. This seeming forest is inhabited throughout, Negro huts being hidden beneath the tall mangoes, cocoa-palms, and other fruit-trees. Two plots of ground were purchased, and the church from the abandoned station Annaszorg was brought and re-erected here, receiving the name Rust en Vrede (Rest and Peace).

**Rust en Werk**, a station of the Moravians in Dutch Guiana, established in the year 1821, at the request of the owners of an estate which lies on the north bank of the river Comewyne, not far from its junction with the Surinam, about ten miles below Paramaribo. The owners of this estate gave a large house as a residence for the missionary, the upper story of which served as a church. On the day upon which it was opened the first four Christians of this neighborhood were baptized. Many Chinese and coolies now live upon the adjoining estates, some of whom have united with the congregation.

**Ruthenian Version.**—The Ruthenian belongs to the Slavonic branch of the Aryan family of languages, and is spoken in Little Russia. In 1874 the British Bible Society published at Vienna the Gospel of Luke, as translated by Mr. Kobylanski. Being in the Cyrillic type, it was well received, and proved a success, because a part of the Divine Word was thus given to the Ruthenians for the first time in their vernacular. During the year 1877 the same Society published the Gospel of John, translated by the same author, after it had been critically examined by Professor Micklovich. A translation of the New Testament into Ruthenian was prepared from the Greek by Dr. Puley, with the assistance of Mr. Kulisch. The British and Foreign Bible Society bought in 1882 500 copies of this version for circulation, but in 1885 purchased the copyright of the translation, and published an edition in Cyrillic character, of 5,000 copies, in 1886.

(*Specimen verse.* Luke 15: 18.)

Вставши нѣдѣ до ѣтца мѣего, і  
зказѣ іемъ: Отче, згрѣшив іем прѣтѣ  
неба і перед тобѣ.

S.

**Sabathu** (Subathu), a town in Simla district, Punjab, India, 23 miles from Simla, 110 miles northwest of Lodianna. Mission station of Presbyterian Church (North), 1836; 1 missionary, 2 native helpers, 16 church-members, 44 school-children, and a hospital for lepers, several of whom are church-members.

**Safed**, a town, formerly of considerable note, on a hill overlooking the western coast of the Lake of Tiberius, Asiatic Turkey, 65 miles

west of Damascus. Mission station of the L. S. P. C. among the Jews; 2 missionaries, 2 native helpers, also a medical mission.

**Sagaing**, a populous town in Burma, on the west side of the Irawadi River, fifteen miles below Mandalay. It lies just opposite Ava, the scene of Judson's imprisonment, which is now an out-station of the work at Sagaing. Mission station of the A. B. M. U.; 2 missionaries and wives, 1 church, 23 commu-

nicants, 1 Sunday-school, 20 scholars, 3 schools, 78 scholars.

**Saharanpur**, a town in Northwest Provinces, India, 90 miles northeast of Delhi, 130 southeast of Lodiana. A large town, rather substantially built, and steadily improving in appearance and increasing in importance. Owing to its low, moist situation, it was very unhealthy, but recent sanitary improvements have somewhat remedied this evil. Mission station Presbyterian Church (North), 1836; 1 missionary and wife, 8 native helpers, 57 church-members, 429 scholars.

**Saibai Version**.—The Saibai belongs to the Melanesian languages, and is vernacular in Torres Straits. A translation of the Gospel of Mark into this dialect was made by Mr. Elia, a teacher who has been fifteen years engaged in the work, and revised by the Rev. S. Macfarlane of Murray Island. It was published at Sydney in 1883 under the care of the Auxiliary of the British and Foreign Bible Society. Besides the Gospel of Mark, that of Matthew has also been published.

**Saint Albans**.—A town in northeast Kaffraria, South Africa, near St. John's. Mission station of the S. P. G.; 1 missionary and wife, 250 communicants.

**Saint Barnabas**, a town in Norfolk, Melanesia: is the chief seat of the Melanesian Mission and its bishop since 1867. The mission consists of 8 native missionaries, 130 male and 35 female students. In the cool season, March to December, the bishop sails from island to island inspecting the various stations, and in the mean time he keeps school on board the steamer. The printing establishment, from which books in 35 different languages are issued, is also at St. Barnabas.

**Saint Croix**, one of the West Indies, is a Danish possession since 1716. It has an area of 74 square miles, and a population of 18,430 (1880). The inhabitants are mostly free Negroes, and are engaged in the raising of sugar-cane and the manufacture of rum.

The Moravian Brethren commenced their mission to the Danish West Indies at this island in 1754, and now have three stations: Friedenthal, Friedensberg, and Friedensfeld, with 3 missionaries, 1,363 communicants, 3 Sunday-schools, 825 scholars. The Danish Lutheran Church has also quite a membership here.

**Saint Eustache** is one of the Dutch West Indies, and forms part of the colony of Curaçoa. It contains a population of 2,335 in its area of 7 square miles. Mission station of Wesleyan Methodist West Indian Conference.

**Saint Helena**, an island belonging to Great Britain, in the Atlantic Ocean, 1,200 miles west of Africa and 2,000 miles east of South America. Area, 47 square miles. Population (1886), 4,500, Negroes and half-breeds. Mission field of the S. P. G.; 3 stations—St. Paul's, Jamestown, Longwood; 355 communicants. There are also 1 Roman Catholic and 2 Baptist chapels.

**Saint Jan** or **Saint John**, one of the Dutch possessions in the West Indies, has an area of 21 square miles, and a population (1880) of 944, among whom the Moravian Brethren commenced work in 1754, with stations at Bethany

and Emmaus (see St. Thomas). Mission field of the Danish Missionary Society.

**Saint John's**.—1. The chief town on the island of Antigua, West Indies. Population, 10,000, chiefly pure Negroes and mulattoes. A station of the Moravian Brethren, opened in 1756 by a missionary from the Danish islands, who was moved by the miserable spiritual condition of the Negro population in Antigua to come to their assistance. He accomplished much, and his work is now being carried on by 1 missionary and his wife, 1 unmarried man, and 1 single lady. A training-school for women is carried on at this station, and the church has a congregation of over 1,000.

2. A diocese of the S. P. G. in South Africa, founded 1873, containing 10 stations, 2,523 communicants.

**Saint Kitt's**, or **Saint Christopher**, is one of the Leeward Group of the British West Indies. Its greatest length is 23 miles, and it contains an area of 65 square miles, with a population of 45,000. The island is of volcanic origin, the scenery is rich and beautiful, and the soil is fertile and well-watered. Basseterre, with a population of 7,000, is the capital. Mission field of the Moravian Brethren, with stations at Bethesda, Basseterre, Bethel, and Eastbridge, with a total of 3 missionaries, 1,480 communicants, 7 day-schools, 854 scholars, 6 Sunday-schools, 2,000 scholars. S. P. G. (1877); 1 missionary, 285 communicants. (For the work of the Wesleyan Methodists, see West Indies.)

**Saint Louis**, a town on an island at the mouth of the Senegal River, West Africa, is the chief town of the French possession, Senegambia, with a population of 20,000. Mission station of the Paris Evangelical Missionary Society (1863); 2 missionaries, 1 medical missionary.

**Saint Lucia**, one of the Windward Islands, British West Indies, has an area of 122 square miles, with a population (1888) of 42,504, principally Negroes and half-breeds. Chief town, Castries, 4,555. There are 26 schools (14 Protestant, 12 Roman Catholic), 3,351 pupils.

**Saint Mark's**, a station of the S. P. G. diocese of St. John's, in the Transkei, South Africa, was the first station (1859) occupied in the diocese; has 1 missionary, 746 communicants.

**Saint Mary's Island**, a large island off the coast of Gambia, West Africa, at the mouth of the Gambia River, east of Cape St. Mary. The principal city on the island is Bathurst. Mission station of the Wesleyan Missionary Society; 4 missionaries, 23 native helpers, 3 chapels, 2 schools, 358 scholars.

**Saint Matthew's**, a station of the S. P. G. in the diocese of Grahamstown, South Africa, near King William's Town; was occupied in 1859, and has 1 missionary and 370 communicants.

**Saint Paul de Loanda**, the capital of the province of Loanda, in the Portuguese colony Angola, on the west coast of Africa, is situated on a beautiful landlocked harbor, sixty miles by sea north of the mouth of the Coanza. Its population, estimated at 5,000, consists of a few hundred Portuguese, and the rest are Negroes. It was the starting point in 1884 for the

mission of Bishop Taylor to Central Africa, and is a station of that mission.

**Saint Paul's**, a station of the S. P. G. in Natal, South Africa, not far from the coast; has 1 missionary and 80 communicants.

**Saint Peter's**, a town in Cape Colony, South Africa, on the border of Kaffraria, northwest of King William's Town. Mission station of the S. P. G. in the diocese of Grahamstown; 1 missionary and wife, 110 communicants.

**Saint Thomas**, one of the West India islands belonging to Denmark (1716); has an area of 23 square miles, and a population of 14,389, mostly Negroes. Sugar and rum are the products. Mission field of the Moravian Brethren, with stations at New Herrnhut, Nisky, and St. Thomas. Including St. Jan (q.v.), there were in 1886 5 stations, 2 missionaries, 1,289 communicants, 7 schools, 388 pupils, 5 Sunday-schools, 1,000 scholars.

**Saint Thomas**, a town on the above island, is picturesquely situated on three hills on the south coast, overlooking a fine harbor. For many years it was the terminus of several steamship lines, a depot for the surrounding islands, and a port of call for vessels of all nations; but the laying of West India telegraph cable greatly changed these conditions, and its commercial importance is rapidly declining. In 1843 the Moravian Brethren, who had hitherto confined their labors to the sugar plantations, found it necessary to provide instruction for the many converts who had come out to the town to live, and a place of worship was procured near the centre of the town, where a school and preaching services were held. In 1882 a fine new building was completed, and was a memorial church of the 150th anniversary of the beginning of Moravian missions. The Danish Government provided schools and churches for the people at a very early date in their occupancy of the island.

**Saint Thomé**, a suburb of Madras, India, is a mission station of the S. P. G. for 16 villages, with 4 native preachers, 241 communicants, 3 mixed schools, 196 boys and girls.

**Saint Vincent**, one of the Windward Islands, West Indies, is a British colonial possession (1763), under an administrator and colonial secretary. Its area is 122 square miles. Population (1888), 46,872, mainly Negroes and half-breeds. Kingston is the capital; population, 5,393. Mission work is carried on by both the Wesleyan Methodists (W. I. Conference) and the S. P. G., the latter having 2 missionaries, 2 stations, 620 communicants.

**Salem**.—1. A town in a district of the same name in Madras, India. Its climate is dry and hot. Population, 50,667. Hindustani and Tamil are the languages spoken. Mission station of the London Missionary Society (1824), with 15 out-stations, 2 missionaries, 185 church-members, 3 Sunday-schools, 120 scholars, 9 boys' schools, 478 boys, 2 girls' schools, 178 scholars.

2. A town in the Coronie district, Surinam, South America, on the coast west of Paramaribo. Mission station of the Moravian Brethren, started in answer to the appeal of several English proprietors of estates in this district. A large congregation has been gathered into the church.

3. A town in Jamaica, West Indies, formerly called New Hope, lies near the seashore at Parker's Bay. A congregation was organized here and the place made a regular mission station of the Moravian Brethren in 1838.

**Salmas**, a district in West Persia, north of Lake Oroomiah, half-way between Tabriz and Oroomiah, and near the eastern boundary of Turkey. (It is spoken of as a city, though there is really no city of that name.) Climate unusually pleasant and equable. Population, 30,000, Moslems, Armenians, Nestorians, Jews, and Koords—each speaking its own language, and generally Turkish also. Social condition of Moslems low, but of other classes a little better. Mission station of Presbyterian Church (North), 1884, chiefly among the Armenians; 2 missionaries and wives, 2 single ladies, 75 native helpers, 1 out-station, 1 church, 30 church-members, 6 schools.

**Salonica**, a seaport city in European Turkey, at the northeastern extremity of the Gulf of Saloniki. Population, 80,000, Greeks, Bulgarians, Wallachians, Turks, Spaniards. Religions, Greek Orthodox and Islam. Mission station of Presbyterian Church (South), 1876; 1 missionary and wife, 3 native helpers, 3 out-stations, 1 church, 35 church-members.

**Saltillo**, a city in North Central Mexico, in the frontier state of Coahuila, 239 miles southwest of Laredo, Texas, 60 miles west of Monterey. Climate mild, temperate, and healthy. Population, 15,000, mixed Spanish and Indian, speaking Spanish and Indian dialects. Social condition of two thirds of the people very degraded; class lines are closely drawn. Mission station of the Southern Baptist Convention; 2 missionaries and wives, 4 female missionaries, 3 colporteurs. Presbyterian Church (North), 1884; 2 female missionaries, 10 out-stations, 580 church-members, 363 Sabbath-schools, 9 day-schools, 194 scholars.

**Salvador**, a republic of Central America, borders on the Pacific coast for 160 miles from the mouth of the Río de la Paz to the mouth of the Goasoran, in the Gulf of Fonseca. Its inland boundaries are Guatemala on the west and Honduras on the north and east. It is the smallest of the Central American republics, having an area of 7,225 square miles. Except along the coast, where there are low alluvial plains, the country consists of a high plateau 2,000 feet above the sea, with many volcanic mountains. The volcanic forces are still at work, as shown by the frequent earthquakes.

Since 1853, when the union with Honduras and Nicaragua was dissolved, the government is that of a republic, with a president elected for four years by suffrage of all citizens, and a congress of 70 deputies. The population (1886) is 651,130, an average of 89 to the square mile, which is twenty times the average of the other Central American States. The bulk of the inhabitants are of aboriginal or mixed races; only 10,000 are whites, or descendants of Europeans. The natives are engaged principally in agriculture, though there is much mineral wealth as yet undeveloped. The climate is mild and pleasant. Roman Catholicism is the state religion, but there is tolerance of other religions. Education, which is under the care of the government, is carried on in free schools, attendance upon which is obligatory. In 1888 there

were 732 primary schools with 27,000 pupils, and 18 high-schools with 1,293 students. Railways are being built; there are 1,440 miles of telegraph; telephones connect San Salvador, the capital, with Santa Anna, and the resources of the country are rapidly being developed. There is no organized mission work in Salvador.

**Salvation Army.** Headquarters, 101 Queen Victoria Street, London, E. C., England. —The Salvation Army is the largest and most powerful evangelizing agency in existence. It may be said to have been founded on July 5th, 1865, when Rev. Wm. Booth, who had shortly before left the Methodist New Connexion, held alone the first open-air meeting of what was then called the "Christian Mission." The meeting took place on Mile End Waste, in the heart of one of the most disreputable neighborhoods of London. The Christian Mission became the Salvation Army in 1878. It now occupies 34 countries and colonies, and its 4,000 corps are officered by some 10,000 men and women, to none of whom is any salary guaranteed, and none of whom receive anything more than the supply of their actual wants. These officers speak 29 languages. The total number of meetings held weekly is estimated at 50,000.

The Army publishes in 15 languages 27 weekly and 15 monthly journals, having a total annual circulation of 33,500,000 copies. The annual circulation of books and other pamphlets is put at 4,000,000 more. The total sum raised annually by the Army is reckoned at \$2,250,000. Balance-sheets are issued every year from all the headquarters in the different countries, and quarterly in all the corps or local bodies. The balance-sheets of the various headquarters are audited by independent accountants.

The form of government is military throughout. The General for the time being is, under a deed-poll enrolled in the British High Court of Chancery, the trustee of the entire funds and property of the Army. General Booth has never drawn any salary or allowance whatever (except out-of-pocket expenses) from the Army funds, his private income being derived from other sources.

The General's representatives in charge of the work in the different countries may be of any rank, but have the power and, frequently, the title of Commissioner. There are six other grades of responsibility and power on the staff of the Army. Then come the field officers—those who conduct the work of the local corps, and then the local officers who assist those last mentioned.

The soldiers are converts or members who, having given satisfactory evidence of conversion for at least a month, have signed the Articles of War, and have been sworn in as members of the corps. In these they avow their determination to serve God, by His help, all their lives; to be true soldiers of and in the Army for life; to renounce the world with all its sinful pleasures, companionships, and objects, and to boldly confess Christ at all costs; to abstain not only from all intoxicating liquors, but opium, morphia, and all other baneful drugs, except when ordered by a doctor in sickness; to abstain not only from all low and profane language, but also from all falsehood, dishonesty, and fraud; that they will "never treat any woman, child, or other person in an oppressive, cruel, or cowardly manner;" to spend all the time, strength, money, and in-

fluence possible in supporting and carrying on the operations of the Army; to be obedient to all the lawful orders of superior officers; and to do all these things for the love of Christ.

The theology of the Army is most analogous to that of the Methodist Church.

Among features sufficiently striking to be distinctive of the Army are: 1. The prominence given to women, who form about one half of the total number of officers, and are not barred by their sex from any position in the whole organization. 2. The use (in theory at any rate) of every individual member as an active worker, and that as soon as he professes conversion. 3. Its adaptation of system and methods to particular tastes or needs of peoples, times, and circumstances. 4. The activity and energy shown in the meetings held every day of the week the year round. 5. The number and variety of its branches or offshoots. 6. The application of unusual means to attract the people to its meetings, etc. 7. The principle of self-support applied to every corps, division, and territory. 8. The self-denial of the whole Army in all lauds, not only displayed by its officers and soldiers as such, but more especially by the "self-denial week" every year for the extension of the work generally, especially outside the territory raising the money. 9. The wearing of a distinctive uniform by all members of whatever rank. 10. The implicit, unquestioning obedience rendered by all to those next above them in rank. 11. The prominence given to teaching and testimony with regard to entire sanctification or complete deliverance not only from the guilt of sin, but also from its power. 12. The numerous opportunities afforded to every member not only for dealing with sinners by many different means, but also to rise to any position in the Army itself. 13. The mutual personal love and affection felt by Salvationists of all ranks, in all nations, and the solidarity of the whole organization. 14. The time and energy bestowed upon open-air work. 15. The raising up everywhere of native soldiers and officers for the salvation of their own fellow-citizens or countrymen.

The principal officers are: William Booth, the General; W. Bramwell Booth, Chief of the Staff (this gentleman, by the way, has been aptly described as "the Von Moltke of the Salvation Army"); Commissioner Booth-Clibborn, Paris; Commissioner Ballington Booth, New York; Commissioner Booth-Tucker, Bombay; Mrs. Bramwell Booth, the head of the Rescue Work; Commissioner Railton, Berlin; Commissioner Howard, London; Commissioner Coombs, Melbourne; Commissioner Estill, Kimberley; Commissioner Adams, Toronto; Commissioners Carleton and Cadman, London: of these last the former is at the head of the gigantic trade operations of the Army, and the latter is in charge of the Social Reform wing. Of the same rank is Kommandor Hanna Ouchterloney of Stockholm, commanding the forces in Sweden, Norway, and Finland.

The respective numbers of corps and officers in the different countries are as follows: Great Britain, 1,514 and 4,652; the United States, 445 and 1,120; Canada and Newfoundland, 391 and 1,056; Australia (Victoria, South Australia, New South Wales, Tasmania, Queensland), 756 and 991; New Zealand, 170 and 193; France and Switzerland, 167 and 397; India and Ceylon, 158 and 423; Sweden, 150 and 373; South Africa (Cape Colony, Natal, Orange Free State, Trans-

vaal), 61 and 160; Holland, 51 and 155; Norway, 48 and 142; Denmark, 36 and 100; Germany, 21 and 75; Finland, 5 and 19; Belgium, 4 and 26; Argentine Republic, 4 and 20; St. Helena, 1 and 2. Grand total, 3,834 corps and outposts and 9,904 officers. There are in all 33 Rescue Homes, 10 Prison-gate Brigades, and 35 Slum Posts, and about 60 garrisons for the training of officers.

In India and Ceylon the officers wear a dress similar to that worn by the natives, live in native huts, and beg their food from door to door, after the manner of the religious devotees so numerous in Oriental lands. In South Africa officers have been set apart to live among the Zulus and Swazies, following similar lines as to food and manner of life; and in New Zealand the Maoris are receiving attention of a similar character—in all four countries the Army officers even abandoning their own names and taking others from the people they seek to benefit.

The general lines of work are much the same everywhere. The Army does not so much try to teach doctrine as to bear witness to the power of God to deliver from the power as well as from the guilt of sin. Hence the comparative lack of education of some of its officers is not so great an obstacle to success as some might think, because their lives bear out the statements they make. The positiveness with which the Army speaks of many things which to not a few professed Christians are matters only of belief, is often startling; but the poverty, hard work, and self-sacrifice of the officers are everywhere proved to be powerful arguments in favor of the religion taught by them. The Army universally insists not only on a complete separation from the world and abandonment of even doubtful things, but upon a bold confession of Christ and His religion in every possible way—notably by public testimony and the wearing of uniform. It has little faith in religion that produces no change in a man that can be seen by his neighbors, and therefore every possible means is used to transform every convert into an active evangelist as quickly as possible. It also makes heavy demands upon the time and means of all its adherents, and is continually urging them on to a higher platform of devotion and self-sacrifice for the sake of the perishing.

The Army never attacks other religions, nor does it enter into discussions about its own. It conceives its mission to be to proclaim to all men the possibility of salvation through faith in Christ for every man who will accept it and renounce his sins, and it always aims to deal with the heart and conscience rather than with the intellect.

Every effort is put forth to make the meetings pleasant and attractive, music and singing being usually given great prominence. The chief object of every Salvationist in going into a meeting is usually rather to benefit others than to perform acts of adoration or to receive personal instruction for himself, and this principle has a great effect on the character of the services.

The positive, aggressive, and, as some consider, extreme character, not only of the religious theories but the practices of the Army on the one hand, and its bold and uncompromising hostility to every form of sin, vice, and hypocrisy on the other, have made the history of the Army a long record of opposition, slander, misrepresentation, and persecution of every

conceivable kind. General Booth boasts of being at the head of the only religious body that always has some of its members in prison for conscience' sake. It is a curious fact with respect to imprisonment, that while the authorities of the United States, Canada, Great Britain, India, Sweden, South Africa, and Switzerland have all done their share in this direction, the avowedly atheistic French Government has never yet laid hands on a single Salvationist on account of his religion. Among those who have been imprisoned for conscience' sake are the General's eldest daughter and second son; the eldest son, as the result of action taken in concert with others to deal with peculiarly horrible vice, has been in the dock, charged with an offence of which he was subsequently acquitted; the third daughter has been arrested for street-preaching, though not imprisoned; and the third son has appeared before the Court of Queen's Bench, charged with inciting to riot. Commissioners Booth-Tucker and Booth-Clibborn, the husbands of two of the General's daughters, have also been to jail for Christ's sake—one in Bombay, the other in Switzerland.

As might be expected, the fiercest opposition—and that which most frequently finds expression in mob-violence—comes from the representatives of the liquor interest; and this is true everywhere, although in some instances, as in Switzerland, the authorities have also added their oppression to the action of the mob. It is not so easy to account for the active opposition of professedly Christian people and leaders—almost equally widespread—except on the theory that the practical sacrifice and self-denial demanded by the Army from others and practised by itself are considered to involve a reflection upon their own religious teaching and lives. In all forms of opposition and persecution it is a somewhat singular fact that Great Britain has always led the way: in no land have the attacks upon the Army been more bitter or fierce, and nowhere has it had to contend with more prejudice, contempt, secret enmity, and cruel hostility.

The Salvation Army's first landing in the United States took place in 1881, when Commissioner Railton and a small company of female evangelists arrived. It will be seen on looking at the figures for the whole world that the United States field stands next to that of Great Britain, with 445 corps and 1,120 officers. These extend all across the continent, and from Washington State in the north to Texas and Florida in the south; and not only is the whole country belted with corps, but also with training garrisons at the following cities: New York, Brooklyn, Boston (2), Detroit, Grand Rapids, Englewood, Ill., Des Moines, Omaha, Oakland, and San Francisco. There are Rescue Homes at Grand Rapids and San Francisco, and besides two Slum Posts in New York, work of the same kind is carried on by the Golden Gate. Prison work is done, though not on any large scale as yet, at Auburn, N.Y.; Minneapolis, Minn.; Kansas City, Mo.; and San Francisco. The National Headquarters is at 111 Reade Street, New York City, where Commissioner Ballington Booth, the General's son, can usually be found. The headquarters of the different divisions into which the country is divided for purposes of oversight are at Portland, Me.; Boston, Mass.; Syracuse, N.Y.; Baltimore, Md.; Homestead and Harrisburg, Pa.; Cleveland, O.; Springfield,

Ill.; Detroit, Mich.; Chicago, Ill.; Minneapolis, Minn.; Des Moines, Ia.; Kansas City, Mo.; Topeka, Kan.; Denver, Col.; Helena, Mont.; Sacramento and San Francisco, Cal.; Portland, Ore.; Los Angeles, Cal.; Austin, Tex.; and Jacksonville, Fla. There are 12 corps in Chicago, 8 in Brooklyn, 6 in New York, 5 in Detroit, 4 each in Boston, San Francisco, Kansas City, Minneapolis; 3 each in St. Paul and Baltimore; 2 each in Philadelphia, Buffalo, Cleveland, Nashville, St. Louis, Grand Rapids, Saginaw City, Omaha, and Los Angeles. There are Swedish corps in New York, Brooklyn, Perth Amboy, Chicago, Des Moines, and San Francisco, and a Danish corps at Omaha.

That the labors of the Army here have not been without visible result is shown by the fact that during the past twelve months (1890) no fewer than 22,550 persons professed conversion at its penitent forms. During the month of October no fewer than 1,070,000 persons attended the indoor meetings of the Army in this country, and a careful calculation shows that its open-air meetings during the past year were attended by 4,000,000 persons. This total is the more remarkable, because the municipal authorities in not a few cities either forbid open-air work altogether, or place restrictions upon it either so numerous or of such a character as to render it of little value compared with what the Army considers that it might be. It is estimated, however, that, taking both forms of meeting together, no fewer than 13,000,000 persons have, during the past year, listened to religious truth from the Army.

Of course these large figures are partly due to the immense number of the meetings. At every corps there are, or should be, ten indoor meetings per week, and, where there is liberty to do so, there should be at least six held in the open air. The Army is the only Protestant body with whom a devotional meeting at 7 A.M. on Sundays is a regular thing, and the attendance at, and character of, this meeting is judged to afford a fairly accurate index as to the spiritual condition of the corps. The meetings on Sunday morning and Friday evening are usually devoted to the inculcation of the Army views on holiness, and one evening in the week is given to spiritual dealing, by the officers, with the soldiers only. The other meetings are held chiefly with a view to reaching the godless and unconverted.

The officers responsible for the conduct of these meetings are the captain and lieutenant, but they are assisted in the management of the affairs of the corps by a treasurer, secretary, and sergeants, if the corps be large enough to need the services of all these. Every corps is supposed to raise its own income and pay its own expenses—usually week by week, and the officers are not supposed to draw their allowance until all the expenses for the week are paid. Male captains and lieutenants can then draw \$7 and \$6 respectively per week, and female officers of the same rank draw one dollar less. When the receipts are not equal to paying everything and leaving enough for the officers, the soldiers and friends usually give the latter articles of food. Over a number of corps is placed a divisional officer, who is supported by a small percentage from each of his corps on their receipts. It is his duty to visit all the corps in his charge as often as possible, to commence the work in new places, and to see to the

welfare of his officers and soldiers. He is responsible to headquarters for the prosperity of his division, and he has to report there both weekly and monthly on forms provided. The National Headquarters is supported largely by the profits accruing from the sale of the "War Cry" and other Army literature; also of uniform, musical instruments, and other things needed for the use of the Army. In this building are usually the offices where is conducted the business connected with property, candidates, the "War Cry" and other literature, the appointments of the field officers, and the financial arrangements. The number of departments and offices varies in different countries, according to the strength of the particular contingent. All officers are liable to removal at any moment, although commissioners under ordinary circumstances remain some four or five years in a command, divisional officers about a year, and field officers from four to six months. In theory every officer is ready and willing to go to any part of the globe at a moment's notice, and in the great majority of cases this is literally true; and where it does not so apply to individuals, it is because of family or other circumstances beyond their control.

The principal books published by the Army are: "Orders and Regulations for Field Officers" (700 pp.), "Salvation Soldiery," "The Training of Children," "Holy Living," and "In Darkest England and the Way Out," by the General; "Popular Christianity," "Aggressive Christianity," "Life and Death," "Godliness," "Practical Religion," "The Salvation Army in relation to the Church and the State," by the late Mrs. General Booth; "Heathen England," "Twenty-one Years Salvation Army," and "Apostolic Warfare," by Commissioner Raiton; "The Doctrines and Discipline of the Salvation Army," "The Soldier's Manual," by Commissioner Ballington Booth, and "Beneath Two Flags," by Mrs. Ballington Booth. There are two "War Crys" (one in Swedish) published in New York and another in San Francisco. "All the World" is the best and largest monthly, although the "Deliverer," the organ of the Rescue Work, is rapidly increasing in influence and circulation. The "Musical Salvationist" (monthly) is in its fifth year of publication; the contributions are furnished by officers and soldiers of the Army, although a few national and other tunes are to be found among them with Salvation Army words. The first volume of the "Musical Pioneer," recently published by the New York Headquarters, was the cheapest volume of music issued by the Army at the time of its appearance.

One feature of Salvation Army literature is that there are no "outside" advertisements in any book, journal, or magazine. When the enormous circulation of these is considered, it will be seen that the Army by this course sacrifices large sums of money every year. On the other hand, nearly every "War Cry" contains a column or so of advertisements for missing relatives and friends for which nothing is charged. No other religious papers are pushed as are the various "War Crys." In London and Melbourne, Cape Town and Bombay, Paris and Toronto,—to name typical cities,—Salvationists take their journals into saloons, beer-halls, concert-rooms, brothels, slums, and other places of ill-savor, and not only take them there, but sell them there. No issue of any "War Cry" in any language ever appears that does not con-

tain in some form or other plain directions by which any person can learn the way and conditions of salvation, and the first attack on any person or society has yet to appear.

One of the ablest journalists in England, and a man whose personal experience of the world is such as to make his words worthy of attention, says, in referring to the Army's educating and elevating influence upon the masses: "It has trained thousands whose energies would have been wasted in tap-rooms and at street-corners, to do the practical work of teaching, ruling, and administering. It has done more to spread a real, rough, but genuine culture among the lowest than both our universities. It is easy to sneer at its 'War Crys,' but as a rough-and-ready school of journalism they have no rival. They are the natural expression of the common man, who, but for the Salvation Army, would never have learned to write grammatically, to express himself concisely, and to report succinctly what he sees. The Army hymnology may not be as polished as that of the Anglican Church, but regarded as the spontaneous utterance of the aspiration of the English poor towards an ideal life, it is one of the most remarkable literary and devotional growths of our time. Then, again, in music the Army has done great things. To teach every one to sing, to accustom the poorest and the most ignorant to the most inspiring music of the day, to rear up in almost every village men and women who will spend hours learning to play musical instruments—all this is foundation work which must not be despised."

Among its more distinctive methods of work may be mentioned: 1. *Open-air Parades*. In addition to the evangelistic services in the open air, the Army, wherever practicable, has "marches." The soldiers form a procession, four deep, if there is a sufficient number, and as they march they sing songs, usually to stirring or popular tunes, calculated to direct the attention of all hearers to vital religious truths. At the head is carried the Army flag, and frequently the national colors also; then come the officers in command, then the band, followed by the rank and file. The utility of this method is not only abundantly proved by the number of strangers who follow to the building,—a tap-room or bar very frequently being emptied by the music—but in hundreds of instances the words of the songs sung have been used to the conversion of those who would not have brought themselves under any religious influence whatever, but could not help hearing the street singing. The practical value of this mode of evangelization cannot be over-estimated. 2. *Bands of Music*.—These are greatly owned of God. The greatest care is taken to keep out from these any element of selfishness or vain-glory. No member of any band receives any payment whatever, and when it is remembered that the great majority of the musicians never touched an instrument before their conversion, it is evident that disinterested love for souls is the sole incentive to a large amount of self-denying effort at a cost of much time and labor. Much of the music played by these bands is composed by officers and soldiers of the Army. 3. *Distinctive Titles and Phraseology*.—Not only are the holders of different positions in the Army designated by military titles, but most of the meetings are described in terms different to those used by most churches. The early morn-

ing prayer-meeting is "knee-drill," the Sunday-afternoon meeting usually given to testimony and song for the benefit of the godless crowd is a "free-and-easy;" the commencement of the work in a city is an "attack" or "bombardment;" the building used is frequently referred to as "the Hallelujah Factory," if that has been the character of the building rented; and so on: the object of this being to avoid the dislike and contempt of the "masses" in most countries for churches. Hundreds who do not and would not go to church on any account can be found in the Army halls every night in the week, and the use of these terms has much to do with this.

4. *"Demonstrations" of Various Kinds*.—These are usually arranged where there are several corps near together, and are held with several objects in view. The most usual of these is, in the first place, to make an impression upon the public mind as to the existence of the Army in that city, and the success of its work; in the second, to encourage and create love, unity, and solidarity among the soldiers themselves; and in the third, to promote the advancement of the local work generally by giving special prominence to some particular feature, such as the reclamation of drunkards, the swearing-in of soldiers, the introduction of some new officer of rank, or some new plan for local work. 5. *The Slum Work*.—This is carried on by female officers, who take rooms in the most vicious and degraded neighborhoods that can be found, and live there. They dress as nearly as possible like the people among whom they labor, and spend much of their time in introducing the gospel of Christ to those most in need of it, by means of the gospel of soap and hot water. They nurse the sick and bedridden, wash dirty children, and perform many kind offices for those who have no other helper. They also visit low saloons and dives, and deal with the people they find there. There are two posts in New York, the first having only been established a few months. The officers have averaged about five in number, but in that time they have visited about 7,500 families, independently of visits made to individuals. They have had a *crèche* running for two or three months, at which 1,700 children have been nursed, fed, washed, and attended to during the day while their mothers were out at work.—6. *The Rescue Work*. This is carried on very successfully by the Army, the figures comparing very favorably with those of other organizations. In Victoria and other Australian colonies the Army receives grants of money for this special branch of work. In the United States there are Homes at Grand Rapids and San Francisco.—7. *The Prison-gate Work*. This branch deals with criminals when they leave jail, and, where the authorities are sufficiently sympathetic, while they are prisoners. It has been most conspicuously successful in Australia, South Africa, India, and Ceylon. The colony of Victoria gives an annual grant of money also to help this form of labor, and the Minister of the Interior gave the officer in charge of it, Colonel Barker, a most complimentary letter testifying to the value of this work to the State, when he returned to England to push it forward there. At Kimberley, in South Africa, there is quite a little corps of Salvationists among the prisoners, who have been "saved" through the exertions of the Army officers. At Colombo, in Ceylon, the prison-gate officers are furnished with lists

of the prisoners leaving jail, with particulars about them and their offences for guidance in dealing with them.

The motto of the Army is the phrase "Blood and Fire," the former word referring to the blood of Christ, and the latter to the fire of the Holy Ghost. The expression has, however, come into frequent use as an adjective, especially in reference to the Flag of the Army, often spoken, sung, and written about as the "Blood and Fire Colors." This flag consists of a crimson field with a blue border. In the centre of the red is a yellow star bearing the words "Blood and Fire," and usually the number of the local corps in the territory. This flag is probably the only ensign in the world that flies after nightfall, and in all kinds of weather, but day and night, summer and winter, these colors are leading the soldiers of the Army all round the world—out in the streets and highways and byways of their cities seeking the lost, and advertising the Salvation of God.

This brief summary would not be complete without a reference to the late Mrs. General Booth, in many respects the most remarkable woman of the century. She died of cancer on October 4th, 1890, after two years' illness. For forty years she had been such an inspirer, companion, counsellor, and helpmeet as it falls to the lot of few men, either public or private, to possess. She was an eloquent preacher, an able advocate, a most convincing exponent of doctrine, and an unceasing worker both with voice and pen on behalf of the cause and the organization that she and the General had so much at heart. Her reasoning powers were developed to a remarkable degree, and her foresight, sound judgment, and almost unerring mental instincts made her labors in the cabinet as valuable to the Army as her sermons, speeches, and writings in public. Her funeral took place on the 10th of October, and the afternoon previous no fewer than 36,000 persons gathered in the great hippodrome known in London as Olympia, for her funeral service. On the following day the streets were for five miles thronged with people, traffic being completely suspended, while her coffin, followed by two or three thousand officers, was borne to the cemetery. It was doubtless mainly through her personal influence and example that what may be called female ministry has been so prominently brought to the front in the Army, and that many other of its distinctive features became part of its system. In addition to all the labor referred to, she brought up a family of eight children, every one of whom is engaged in the work of the Salvation Army in some form, all of them (except one, who has been an invalid from childhood) adorning prominent positions in the Army.

A fortnight after Mrs. Booth's death appeared the General's book, "In Darkest England and the Way Out" (370 pp.). The first edition was sold in three hours, and it produced a tremendous sensation throughout the world. This was because it contained a scheme for dealing with all forms of social evil that, although gigantic in its scope, seemed practicable as coming from a man who had such a force at his disposal as the Salvation Army with which to carry it out. The book goes on the startling calculation that no less than 10 per cent of the population of England is in a chronic condition

of vice, pauperism, or crime, forming what the General calls the "Submerged Tenth." After giving several chapters to graphic description of the condition of different classes of these people, it is shown that any scheme that will be of any permanent or practical service must combine within itself all of the following essentials: (a) Where a man is in his present circumstances because of his own character, influences must be brought to bear upon him that will change that character. (b) Where a man is in those circumstances either altogether or partly through no fault of his own, those circumstances must be modified. (c) The scheme must be large enough to cope with an evil of such great magnitude. (d) It must be permanent. (e) It must be immediately practicable. (f) It must not demoralize those whom it seeks to benefit. (g) It must not benefit one class by injuring another. The plan set forth in the book meets all these needs, and, speaking broadly, consists of three parts—the "City Colony," the "Farm Colony," and the "Over-the-Sea Colony." The first of these is really a combination of several agencies now in active operation, and that have been worked successfully for longer or shorter periods. Chief among these are the Food and Shelter depots, where supper, bed, breakfast, a Salvation Army meeting, and facilities for washing can be obtained for eight cents. These places are self-supporting, and not assisted by charity, except possibly in the matter of the first expense of altering buildings and fitting them up for this special purpose; the Labor Factory, where temporary work can be given those willing to do it, and the Labor Bureau for placing employers and laborers in communication with each other. The Rescue Work and the Prison-gate Brigade would doubtless also be channels by which many individuals would reach the City Colony. From the City Colony the members are transferred to the Farm or Country Colony, and from thence to the Over-Sea Colony. There are many details connected with the plan that can only be named here—the Household Salvage Brigade, the Poor Man's Metropole (a kind of glorified tenement-house run by Salvationists), the Bureau for finding lost people, industrial schools, asylums for moral lunatics, model suburban villages, a poor man's Long Branch or Newport for the benefit of the inhabitants of city slums, a poor man's bank, and even a matrimonial bureau. Of course every detail of the whole scheme is to be worked by Salvationists, and through the whole book as through the whole plan the General continually reminds the reader that his sole reliance for success is on God and Him alone, and that these various schemes are only devised as making it easier for certain people to find and retain salvation. The "Farm" and "Over-Sea" colonies are still in the future. At the end of the book the General estimates the sum needed to put the whole scheme into working order as five million dollars, but that half a million would be sufficient to start it. Of this latter amount the largest part was given or promised before Christmas. Few who have any intimate knowledge of the Army itself, its spirit, discipline, and the men and women of whom it is composed, can have any doubt as to the ultimate successful execution of the plan, although, of course, in respect of time, much will necessarily depend upon the amount of

money forthcoming from outside its ranks. The poverty of the Army itself is, while a source of weakness in some respects, an advantage in others, as it either excludes self-seeking or ambitious people altogether, or speedily drives them out if they do manage to get in for a time. Among the many "credentials," as the General calls them, that the Army can present in order to justify its being intrusted with the execution of the plan are: 1. Its willingness to do it. 2. Its reliance upon, and experience of, the power of God. 3. The wonders that God has wrought by, for, and in it in all countries where it works. 4. Its acquaintance with, and past experience in, discipline exercised both within itself and over others. 5. The extent and universality of the Army. 6. The fact that the great majority of the officers of the Army have had considerable experience of the outer world before reaching their present positions. 7. The fact that among the officers are to be found men and women representing probably every trade, profession, and industrial occupation, who can bring their practical experience to bear upon all such present or future details of the scheme as they may be personally conversant with. Some idea of the tremendous influence that this new scheme is likely to produce upon the world may be obtained from the fact that General Booth—a man given to carefully weighing his words—has declared publicly that should it be carried out in England, in twenty years' time there would not be a man or woman in the land willing to work for whom there would not be employment. We close this sketch with two testimonies to the success and value of the operations of the Army from sources of a diametrically opposite character.

The editor of the "Review of Reviews" writes:

"I remember, as it were but yesterday, a remark made to me by a leading freethinker and eminent politician when we were discussing the work of the Salvation Army before its immense development over sea had more than begun. 'We have all been on the wrong tack,' he said, emphatically, 'and the result is that the whole of us have less to show for our work than that one man, Booth.' 'Whom do you call "we"? I asked.' 'Oh, we children of light,' he said, laughing; 'Herbert Spencer, Matthew Arnold, Frederic Harrison, and the rest of us who have spent our lives in endeavoring to dispel superstition, and to bring in a new era based upon reason and education and enlightened self-interest. But this man Booth has produced more effect upon this generation than all of us put together.' I suppose I must have seemed pleased, for he went on hastily, 'Don't imagine for a moment that it is his religion that has helped him. Not in the least. That is a mere drivelling superstition. What has enabled him to do this work is his appeal to the social nature in man. He has evoked the potent sentiment of brotherhood. He has grouped together human beings in associations, which make them feel that they are no longer alone in the world, but that they have many brethren. That is the secret of what he has done—that, and not his superstition, which is only a minus quantity.'"

Then, to go from the atheistic extreme to the organ of the High-Church party in the Anglican Establishment, we find the "Church Times" saying, only last May:

"When we compare the so-called 'Catholic advance' of the Pope in England with the Salvationist advance of the other international commander, the General, in England and all the world, the Pope has to be content with a very much lower place. What a very poor story is the glowing chronicle of the 'Tablet' in comparison with the glowing chronicle of the 'War Cry.' In the vulgar and imposing category of mere quantity the Pope lags far behind the General. In the spiritual category of quality, if the Kingdom of Jesus Christ be especially the Commonwealth of the Poor, the victories of the General are more stupendously brilliant in every way than the triumphs attributed by the 'Tablet' to the last two Popes. None are more ready to do honor than we are to the devotion of so many Roman clergy and sisters to the service of the poor. They have done, as Calvinists and Methodists have done, much *for* the poor. But the Pope cannot boast in his 'Tablet's' triumph-song, as the General can boast in his 'War Cry,' that he has done almost everything for the poor *by* the poor."

On Friday, the 30th January, 1891, at St. James's Hall, London, General Booth publicly signed a deed of trust for the half-million dollars above referred to. He was inaugurated as director-general, but can make no change in the provisions of the deed without the consent of two-thirds of a consultative committee of which he controls or nominates only six members. The other twelve are nominated in pairs by the Archbishop of Canterbury, the President of the Wesleyan Society, the Chairman of the Congregational Union, the Chairman of the Baptist Union, the Attorney-General, and the Chairman of the London County Council, all of whom can, if they choose, serve on the committee themselves.

**Samarang**, a commercial centre of great importance, near the mouth of the Samarang River, Java. Population, 60,000, including many Chinese. Mission station of the Netherlands Missionary Society (1849); 230 church-members. Ermelo Missionary Society (1857).

**Sambalpur**, a district in the chief commissionership of the Central Provinces, India. The town of the same name is situated on the north bank of the Mahanuddi, which during the rainy season becomes a mill-brook, but at other times is a small stream fifty yards wide. The population of the district (1881) was 1,655,960. Mission station of the General Baptist Missionary Society. A very encouraging work among the Kols is being carried on, and there are in the town and district 1 chapel, 55 church-members, 39 day-scholars, and 25 Sunday-scholars.

**Samoa**, a group of islands in the South Pacific, 14 in number. Area, 1,701 square miles. The principal islands and the population of each are: Upolu, 36,000; Savaii, 12,500; and Tutuila, 3,750. The climate is equable and pleasant. Rain falls throughout the year, and in January, February, and March heavy storms with rain are frequent.

At the conference at Berlin in 1889, between the powers of Great Britain, Germany, and the United States, an act was signed (June 14th) by which the neutrality of the islands was guaranteed, and the rights of the citizens of the three signatory powers were declared to be equal in respect to trade, residence, and personal pro-

tection. Samoa is governed by a king, whose independence was recognized, and he was restored to power November 9th, 1889, and the natives are left in possession of their right to elect the king and legislate according to their own customs. A supreme court is established, to be presided over by one judge, the chief-justice of Samoa, who is to be appointed by the three powers, or, in case of disagreement, by the King of Norway and Sweden. To this court must be referred all civil suits concerning real property in Samoa, and rights affecting the same; all civil suits of any kind between natives and foreigners, or between foreigners of different nationalities; all crimes committed by natives against foreigners, or committed by such foreigners as are not subject to consular jurisdiction.

The natives are Polynesians, one of the finest races in the Pacific. The men are above the average height, with straight, well-rounded limbs and erect bearing. The women are slight, symmetrical, and graceful in their movements. The inhabitants of the islands are now all nominally Christians—Protestants and Roman Catholics. Nearly all the children of over seven years of age can read and write, and so can most of the adults. The Bible has been translated and printed. Mission work is carried on by the L. M. S., with stations in Tutuila, Manua, Upolu, Savaii, Tokelau, Ellice and Gilbert groups; 7 missionaries, 6 missionaries' wives, 175 native helpers. The B. F. B. S. have a depot on Navigator's Island.

**Samoa Version.**—The Samoan belongs to the Polynesian languages, and is spoken in Navigator's Island by about 40,000 people. The gospel was first conveyed to its shores by the Rev. John Williams and Rev. Charles Barff of the London Missionary Society. The first portion of the Scriptures which was printed was the Gospel of John, in 1841, and in 1846-50 the entire New Testament was completed at the mission press at Samoa. In 1849-50 a second and revised edition of the New Testament, consisting of 15,000 copies, was published at London by the British and Foreign Bible Society. In 1855 the Old Testament was printed at the mission press, and in 1861 a revised edition of 10,000 copies of the entire Bible, with marginal references, was published at London, under the Rev. Dr. Turner. In 1868 an edition of 5,000 copies of the New Testament and Psalms in large type was published at London; and a thoroughly revised edition of the entire Bible, prepared by the Revs. G. Pratt, Henry Nisbet, Dr. Turner, and A. W. Murray was published, under the care of Dr. Turner, at London, in 1872. The edition, which was stereotyped, consisted of 15,000 copies. A third edition, still further improved, corrected in about 1,378 places, was issued again under the care of Dr. Turner, at London, and in 1886 another edition of the Bible in small size was issued at the same place and by the same editor. Up to March 31st, 1889, 75,637 portions of the Scriptures were disposed of.

(*Specimen verse.* John 3: 16.)

Auā ua faapea lava ona alofa mai o le Atua i le lalolagi, ua ia au mai ai lona Atalii e foatasi, ina ia le fano se tasi e faatuatua ia te ia, a ia maua e ia le ola e faavavau.

**Samogitian Version.**—The Samogitian belongs to the Lithuanic branch of the Aryan family of languages, and is spoken in the province of Kovno, Russia. In 1816 the Bible Society published at St. Petersburg a translation of the New Testament, made by the Bishop of Samogitia, Prince Giedrayti. In 1866 the British and Foreign Bible Society published an edition of the New Testament at Wilna and Berlin, and in 1885 a revised edition of the same. Up to date 5,200 copies have been disposed of.

(*Specimen verse.* John 3: 16.)

Refa taipu Dievas numilėjo švieta, jog Šunu samo viengimust dāve: išant lietmienaš, turs ing ji tif, ne pražutu, bet turėtu amžina givota.

**Samokov,** a city of Bulgaria, European Turkey. Climate temperate. Population chiefly Bulgarians, though there are some Greeks, Turks, Albanians, etc. Its position is quite elevated, and the climate very healthy. Mission station A. B. C. F. M. (1869); 4 missionaries and wives, 2 other ladies, 24 native helpers, 10 out-stations, 3 churches, 347 church-members, 1 theological seminary, 20 students, 7 schools.

**Samsoon,** a city on the Black Sea, Turkey, 500 miles east of Constantinople. Population, Turkish, Greek, and Armenian. It is the port through which passes the greater part of the trade between Constantinople and northern and eastern Asia Minor. A carriage road has been built connecting it with all the mission stations of the Western and Eastern Turkey missions, except Erzroom, and the missionaries for those stations as a rule pass through it. It is very malarious, and continued residence has been impracticable for the missionaries. There is a native church under the care of the Marsovan station.

**Samulkota** (Chamarlakota), a town of Madras, India, in the Godaveri district, 7 miles north of Cocanada. Mission station of the Evangelical Lutheran General Council, which has out-stations in 7 villages, presided over by 1 missionary. There are in the mission district 41 scholars, 104 communicants.

**Sanders, Marshall D.,** b. Williamstown, Mass., U. S. A., July 3d, 1823; graduated at Williams College 1846; Auburn Theological Seminary 1851; ordained at Williamstown; sailed as a missionary of the A. B. C. F. M., for Ceylon, October 31st, 1851. In 1868 Mrs. Sanders died, and the next year he returned to the United States. After laboring to raise funds for a college in Ceylon, he re-embarked with his second wife May 10th, 1871. In apparently good health when he arrived, he died of apoplexy August 29th, only eight days after his arrival at Batticotta. Mr. De Riemer says: "The loss of any two other men would not have crippled and involved matters as the loss of Brother Sanders does. He was our strong tower. We thought him equal to any burden. Then the starting of the college was looked upon as the *summum bonum* for our field of labor. Our standard-bearer has fallen. He was admirably adapted to mission work. He had indomitable energy and foresight to arrange for his labor far in the future. He was a model of promptness and precision, as dependent upon

his watch as upon his feet. He visited with happy effect every family of his out-stations, speaking a word with every person who showed any interest in Christianity." Dr. Hastings says: "I have been intimately associated with him for eighteen years, in missionary work, and have always found him a genial companion, an efficient co-laborer. He was systematic in his plans, prompt in meeting appointments, most persevering in his labors, not easily deterred by obstacles, nor easily discouraged. He possessed largely the confidence and affection of the native Christians, and the respect of the heathen. The training-school, over which he presided with great efficiency for many years, will feel his death deeply."

**Sandoway**, a very ancient town in Arakan, Lower Burma, on the Sandoway River, 15 miles from its mouth. Climate, except in town proper, unhealthy, owing to mangrove swamps. Population, 1,508, Ch'ins, Kemmees, other hill-tribes, Burmans, Arakanese, etc. Language, Burmese. Religions, Buddhism, Moslemism, demon-worship. Before the Pegu province of Burma was taken by the English, Sandoway was the headquarters of the Bassein Sgau Karen mission, and thousands were baptized there. Mission station American Baptist Missionary Union (1885); 1 missionary and wife, 1 other lady, 25 native helpers, 11 out-stations, 11 churches, 238 church-members, 3 schools, 126 scholars.

**San Fernando**, a town in Trinidad, West Indies, on the west coast, south of Conra. Mission station of the Presbyterian Church in Canada; 1 missionary, 1 female missionary, 1 native pastor, 2 other helpers, 7 out-stations, 261 communicants, 16 schools, 877 scholars. United Presbyterian Church of Scotland (1850); 1 missionary, 60 church-members, 4 Sabbath-schools, 89 scholars.

**Sangi Islands**, a group of islands, composed of Great Sangi and several smaller islands, in the East Indian Archipelago, south of Mindanao, Philippine Islands, between latitude 3° and 5° north. The Gossner Missionary Society has stations on Great Sangi and Sijauw.

**Sangi Version**.—The Sangi or Sanguir belongs to the Malaysian languages, and is used in the island of Sangi. A translation of the New Testament was made by the Rev. F. Kelling of the Gossner Mission, and for more than twenty-five years a missionary on the island of Tagulandang. The translator was assisted by an intelligent native, and at the request of the Moravian Mission in Germany and London the British and Foreign Bible Society published in 1879 an edition of 4,000 copies of the Gospels of Luke and John in the Siumo dialect. In 1882 the same Bible Society published an edition of 2,000 copies of the New Testament, made by Mr. Kelling, and intended for a people numbering 80,000 souls, of whom 10,000 have been baptized. As the New Testament was well received and purchased by the natives, the British Bible Society published Mr. Kelling's translation of the Psalms in 1885, and in 1888 an edition of 2,000 copies of his version of the Book of Proverbs, edited by his son, Paul Kelling.

**Sangli**, a town in South Bombay, India, 30 miles east of Kolhapur. Mission station of the

Presbyterian Church (North), 1884; 3 missionaries and their wives, 3 native helpers.

**San Luis Potosi**, a city in Central Mexico. Climate semi-tropical; elevation, 6,000 feet. Population, 60,000, Mexicans, Indians, Spaniards. Language, Spanish. Religion, Roman Catholic. Natives poor, ignorant, priest-ridden. Mission station Presbyterian Church (North), 1887; 1 missionary and wife, 8 native helpers, 7 out-stations, 4 churches, 150 church-members, 3 schools, 75 scholars. Methodist Episcopal Church (South); 1 missionary.

**San Salvador**.—1. One of the Bahamas Islands, West Indies (q.v.). Mission station of the S. P. G. (1884); 2 missionaries, 84 communicants.
